1. AHETF:
   a. **AHETF Technical Summary** – This document provides an overview of the AHETF task force as well as describes the approaches it proposes for conducting occupational monitoring studies. This document also includes two appendices which (A) introduces and describes the criteria used by AHETF to evaluate existing data for incorporation into the AHED database and (B) describes the statistical methods used by AHETF to define the scope of the research plan including numbers of samples and the situations to be monitored (e.g., establishing a range of acres treated or amounts of pesticide handled in a monitoring unit).
   b. **Conservatism Paper** - This document provides a discussion of the AHETF analysis of conservatisms in the Agency's exposure assessment processes. The Agency has not yet formally reviewed this document so it is submitted for consideration by the panel with that stipulation.
   c. **ORETF-PHED Comparison To Biomonitoring Paper** - This document provides the AHETF retrospective analysis of passive dosimetry and biological monitoring data. [See Section 3.1 of the Agency background document for more information concerning retrospective analysis methods.] The Agency has not yet formally reviewed this document so it is submitted for consideration by the panel with that stipulation.
   d. **Passive Dosimetry Comparison To Biomonitoring Paper** - This document provides the AHETF concurrent analysis of passive dosimetry and biological monitoring data. [See Section 3.1 of the Agency background document for more information concerning concurrent analysis methods.] The Agency has not yet formally reviewed this document so it is submitted for consideration by the panel with that stipulation.
   e. **Sample Size Paper** - This document provides a discussion of the AHETF analysis of the numbers of samples that should be developed by the AHETF. The methodology used to complete the analysis is also discussed in the document. It also addresses The Agency has not yet formally reviewed this document so it is submitted for consideration by the panel with that stipulation.
