Mr. G.E. Brussell, Manager
Registrations Research & Development
Agricultural Chemicals Division
Mobay Chemical Corporation
P.O. Box 4913
Kansas City, MO 64120

Dear Mr. Brussell:

Subject: Amaze Inhalation LC_{50} Study

Results of a recent lab audit of an inhalation LC_{50} study (accession no. 243557) conducted in May, 1980 at the Mobay Stanley Research Farm have revealed the following deficiencies:

1. Actual (as opposed to nominal) concentrations of product and/or active not reported.

2. Particle size data was not available.

3. If the apparatus used for the inhalation LC_{50} studies was a modified 55-gallon drum as described, then such studies would be inadequate.

Please inform us within 75 days from the date of this letter of progress made toward correcting these deficiencies.

Sincerely,

William H. Miller
Product Manager (16)
Insecticide-Rodenticide Branch
Registration Division (TS-767)
