EXECUTIVE SUMMARY

Introduction E-1
Location E-1
Hydrogeology E-1
Engineered Design E-2
Stormwater Management E-3
Construction Quality Assurance Program E-3
Operating Plan E-4
Environmental Monitoring E-4
Closure and Post-Closure Care Plan E-4
Conclusion E-4

SECTION 1 LOCATION

Introduction 1-1
Project Location 1-1
Site Background 1-2
Legal Description 1-2
Site Location Standards 1-2

SECTION 2 HYDROGEOLOGIC INVESTIGATION

Introduction 2-1
Field Activities 2-1
Hydrogeologic Investigation Findings 2-1

SECTION 3 DESIGN AND GROUNDWATER IMPACT ASSESSMENT

Overview of Design 3-1
Chemical Waste Unit Cell Design 3-1
Design Capacity 3-2
Multiple Layer Composite Liner System 3-2
- Hydrogeological Considerations 3-2
- Compacted Cohesive Earth Liner 3-3
- Geomembrane 3-3
- Geosynthetic Clay Liner (GCL) 3-3
- CQA Documentation 3-4

Geotechnical Analysis for the Chemical Waste Unit 3-4
- Slope Stability 3-5
  - Seismic Analysis 3-5
  - Failure Scenarios 3-5
- Foundation Construction 3-6
- Bearing Capacity Analysis 3-6
- Landfill Settlement 3-7
  - Foundation Settlement 3-7
  - Waste Settlement 3-7

Leachate Management for the Chemical Waste Unit 3-7
- Leachate Drainage/Collection System 3-8
- Leachate Collection System Efficiency 3-9
- Leachate Collection 3-9

Shaw®

TABLE OF CONTENTS

Leachate Treatment and Discharge 3-10
Construction Phasing for the Chemical Waste Unit 3-10
Final Cover System 3-11
Final Cover Barrier Soil 3-12
Geomembrane Layer 3-12
Drainage Layer 3-12
Vegetative Layer 3-12
Vegetative Cover 3-13
Final Cover Construction and Maintenance 3-13
Cover Percolation 3-13
Final Landform 3-13
Landfill Gas Management 3-14
Groundwater Impact Assessment 3-14
Groundwater Impact Assessment Model Input 3-14
Groundwater Impact Assessment Findings 3-15

SECTION 4 STORMWATER MANAGEMENT PLAN

Introduction 4-1
Stormwater Requirements 4-2
Physiography and Topography 4-3
Precipitation Data 4-3
Regulatory 100-year Floodplain Limts 4-3
Developed Site Conditions 4-3
Interim Site Conditions 4-4
Detention Basins 4-4
Perimeter Ditches 4-5
Terrace Berms 4-5
Letdown Pipes 4-6
Hydrologic Analysis 4-6
Hydrologic Results 4-7
Stormwater Controls During Cell Development 4-13
Final Grading 4-14
Vegetative Soil Stabilization 4-14
Non-Vegetative Soil Stabilization 4-14
Erosion and Sediment Control 4-14
Inspection and Maintenance 4-15
Conclusion 4-16

SECTION 5 CONSTRUCTION QUALITY ASSURANCE PLAN

Introduction 5-1
Responsibility and Authority 5-1
Owner 5-1
Design Engineer 5-1
CQA Personnel 5-2
Contractor(s) 5-4
Manufacturer(s) 5-4
Project Meetings 5-4
Preconstruction Meeting 5-4
Progress Meetings 5-5

Shaw®

TABLE OF CONTENTS

Problem or Work Deficiency Meetings 5-5
Test Liner 5-6
Field Observation and Testing Activities 5-6
Landfill Foundation 5-6
Containment Berms 5-7
Sidewall Excavations 5-8
Groundwater Seepage 5-8
Landfill Floor 5-9
Compacted Clay Foundation Fill 5-9
Compacted Clay Fill Materials 5-9
Compacted Clay Fill Subgrade Preparation 5-10
Compacted Clay Fill Placement and Compaction 5-11
Liner 5-11
Earth Liner 5-11
Earth Liner Materials 5-11
Earth Liner Subgrade Preparation 5-12
Earth Liner Placement and Compaction 5-13
Earth Liner Thickness 5-14
Earth Liner Grades 5-14
Geomembrane 5-14
Geomembrane Preinstallation Activities 5-15
Geomembrane Placement and Protection 5-16
Geomembrane Welds and Defect Repairs 5-16
Geomembrane Field Quality Control 5-17
Geosynthetic Clay Liner 5-17
Documentation 5-18
Leachate Drainage, Collection, and Storage 5-18
Leachate Collection Pipes and Gravel Envelope 5-18
Leachate Collection Sumps and Sideslope Risers 5-20
Sand Drainage Layer 5-21
Geocomposite 5-22
Geotextile 5-23
Leachate Piping System 5-23
Leachate Storage Tank(s) 5-24
Final Cover 5-25
Final Cover Barrier Soil 5-25
Final Cover Barrier Soil Materials 5-25
Final Cover Barrier Soil Subgrade Preparation 5-26
Final Cover Barrier Soil Placement and Compaction 5-26
Final Cover Barrier Soil Thickness 5-27
Geomembrane 5-27
Geomembrane Preinstallation Activities 5-27
Geomembrane Placement and Protection 5-29
Geomembrane Welds and Defect Repairs 5-29
Geomembrane Field Quality Control 5-30
Documentation 5-30
Geocomposite 5-30
Protective / Vegetative Cover 5-31
Turf Establishment 5-32
Stormwater Control Features 5-33
Earth Fill 5-33
Random Fill Material Quality 5-33

Shaw®

Random Fill Subgrade Preparation 5-33
Random Fill Placement and Compaction 5-33
Letdown Pipes, Culverts, Etc. 5-34
Erosion Control Armor 5-34
Lines and Grades 5-35
Statistical Sampling Program 5-36
General 5-36
Earth Liner Field Density and Field Moisture Content Tests 5-36
Field and Laboratory Hydraulic Conductivity Tests 5-37
Geomembrane Seam Destructive Tests 5-37
Documentation and Reports 5-38
Field Documentation 5-38
Daily Report 5-38
Test Data Sheets 5-39
Photographs and Photographic Logs 5-39
Acceptance Reports 5-40
Document Control 5-40

SECTION 6 OPERATING PLAN

Introduction 6-1
Operating Hours and Personnel 6-1
Landfill Director 6-1
Facility Manager 6-1
Gate Control Officer 6-1
Scale Operator 6-2
Equipment Operators and Laborers 6-2
Waste Acceptance Procedures 6-2
Signage 6-2
Waste Analysis Plan 6-2
Acceptance Criteria 6-4
Foundry Wastes 6-5
RCRA Empty Containers 6-5
Record Keeping 6-5
Waste Manifests 6-5
Profile Identification Record 6-6
Load Inspection Procedures 6-7
Waste Solidification 6-8
Testing Requirements 6-8
Waste Solidification Containers and Methods 6-9
Phasing of Operations 6-10
Manner of Waste Placement 6-10
Daily and Intermediate Cover 6-11
Liner Freeze Protection 6-12
Operating Equipment 6-12
Operation Controls 6-13
Boundary Control 6-13
Survey Control 6-13
Air Quality, Dust, and Odor Control 6-14
Road Maintenance 6-14
Mud Tracking 6-14

TABLE OF CONTENTS

Noise Control 6-14
Vector Control 6-14
Fire Protection 6-15
Leachate Management System 6-15
Extraction System Operations 6-15
Response Plan to Potential Leachate Seeps 6-15
Leachate Storage and Offsite Transfer 6-15
Landfill Gas Collection and Control System 6-16
Inspection and Maintenance Plan 6-17
Personnel Monitoring and Protection 6-17
Operating Record 6-18

SECTION 7 ENVIRONMENTAL MONITORING

Introduction 7-1
Groundwater Monitoring 7-1
Groundwater Monitoring Overview 7-1
Groundwater Monitoring Constituents and Frequency 7-1
Applicable Groundwater Quality Standards 7-5
Groundwater Monitoring Period 7-5
Summary of Groundwater Monitoring 7-6
Leachate Monitoring 7-6
Surface Water Monitoring 7-6
Ambient Air Monitoring 7-7
Methodology 7-7
Sample Frequency 7-9
Notification 7-9

SECTION 8 CLOSURE AND POST-CLOSURE PLAN

Introduction 8-1
Closure Requirements 8-2
Premature Closure 8-2
Determination that Premature Closure is Necessary 8-3
Equipment Decontamination 8-3
Remove All Unnecessary Equipment and Structures 8-3
Site Security 8-3
Stormwater Management 8-3
Final Cover Placement 8-3
Groundwater Monitoring 8-5
CQA Activities 8-5
Certification of Closure 8-5
Documentation 8-5
Schedule for Premature Closure 8-5
Routine Closure 8-7
Notification of Closure 8-7
Equipment Decontamination 8-7
Site Security 8-7
Final Cover Placement 8-7
Vegetation 8-7
Groundwater Monitoring 8-7

Shaw®

TABLE OF CONTENTS

Certification of Closure 8-7
Documentation 8-8
Schedule for Routine Closure 8-8
Post-Closure Care Requirements 8-10
Maintenance and Inspection 8-10
Final Cover 8-11
Vegetation 8-11
Groundwater Monitoring 8-12
Leachate Management 8-12
Surface Water Monitoring 8-13
Record Keeping 8-13
Security 8-13
Cost Estimates 8-13
Closure Cost Estimates 8-14
Post-Closure Care Cost Estimates 8-14
Financial Assurance 8-15

LIST OF APPENDICES

Volume I

Appendix A IEPA Permit

Appendix B Legal Description

Appendix C County Resolution

Appendix D Location Standards
1. Airports
2. Floodplain
3. Wetlands
4. Seismic Impact Zone
5. Wild and Scenic Rivers
6. Historic and Natural Areas
7. Endangered Species
8. Sole Source Aquifer / Regulated Recharge Area
9. Water Supply Well Setback
10. Location Report from Application for Permitted Clinton Landfill No. 3

Volume II

Appendix E Hydrogeologic Investigation
1. Clinton Landfill No. 3 Hydrogeologic Investigation
2. Climate Data
3. Regional Water Wells
4. Coal Mining
5. Soil Boring Logs and Monitoring Well Completion Reports
6. Historical Groundwater Elevations

Appendix F In-Situ Hydraulic Conductivity (Slug Test Data)

Appendix G Geotechnical Data

Volume III

Appendix H Geotechnical Analysis
1. Summary of Geotechnical Design Parameters
2. Slope Stability Analysis - Global Analysis, Section A-A' and Slope Stability Analysis - Chemical Waste Unit, Section B-B'
3. Foundation and Waste Settlement
4. Bearing Capacity of Landfill Foundation
5. Geocomposite Drainage Net Capacity
6. Previous Geotechnical Analyses

Shaw®

LIST OF APPENDICES

Volume IV

Appendix I Leachate Collection System
1. Leachate Design Compatibility
2. Groundwater Seepage
3. Leachate Head Determination
4. Capacity of Leachate Collection Pipe
5. Laminar Flow in Leachate Collection Pipe
6. Leachate Storage Tank(s)
7. Earthloads on Leachate Collection System
8. Ring Deflection of Leachate Collection Pipe
9. Structural Capacity of Leachate Collection Pipe
10. Leachate Cleanout
11. Typical Leachate Pumps
12. HELP Model

Appendix J Stormwater Management System
1. Stormwater Calculations - Interim Conditions
2. Stormwater Calculations - Closed Conditions
3. NPDES Permit

Appendix K Construction Quality Assurance
1. Specifications
2. Two-Stage Boutwell Permeameter Test Methodology

Appendix L Quantities

Appendix M Permitted Groundwater Monitoring Plan

Appendix N Permitted Groundwater Impact Assessment
1. Groundwater Impact Assessment
2. Groundwater Impact Assessment Input Parameter Backup, Model Runs, and Additional Information Provided to the IEPA

Appendix O Operating Plan
1. Personal Training Program Outline
2. Hazard Prevention and Emergency Plan
3. Inspection and Maintenance Plan
