Section 4 – Asbestos and COPC Abatement and Removal Plan Amendment Form
DATE FORM EFFECTIVE: 6/29/06

Title **Section 4 – Asbestos and COPC Abatement and Removal Plan**
130 Liberty Street Abatement & Deconstruction Project
September 7, 2005

AMENDMENT #1

Provide clarity on activities that will not be stopped due to an exceedance of an USEPA Site Specific Trigger Level.

Reason for Amendment:

Some activities such as the maintenance of engineering controls are essential during a work stoppage to prevent the occurrence of a situation that may present an imminent and substantial endangerment to public and worker health and the environment.

Section of Asbestos and COPC Abatement and Removal Plan Affected:

Section 1.04, Authority to Stop Work: The following language will be added as the last paragraph of this section: "When work stoppage is required, the following essential and ancillary activities would not be subject to work stoppage: air monitoring, hoist operation, negative air unit operation and maintenance, maintenance of critical barriers, deliveries from off-site, and security."

Date Implemented:

June 29, 2006
