Re: Air Sampling Data Comparison Report
General Services Administration-Kansas City Site, Kansas City, Missouri
CERCLIS ID No. MO0470000520

Dear Mr. Powers:

Enclosed are three copies of the Air Sampling Data Comparison Report and three CDs for the General Services Administration-Kansas City Site. This report compares the results of the four quarterly air sampling events conducted in 2010 at the General Services Administration – Kansas City site in Kansas City, Missouri.

Four separate rounds of sampling were conducted between February and November 2010. After each of the four separate sampling events the EPA contractor performing the work completed a trip report and data summary. The Air Sampling Data Comparison Report dated May 24, 2011, was prepared to compare the volatile organic compounds data results from each sampling event in a single report. This subject reports summarizes all VOC data results and includes figures and tables to show the different concentrations found for each contaminate in the indoor air, ambient air and sub slab vapors.

We have also included a copy of our internal memorandum which accompanies this report in our Superfund site file. If you have any questions, please contact me at (913) 551-7566 or by e-mail at Hammerschmidt.ron@epa.gov. If I am not available, please contact Ron King, Technical Lead, at (913) 551-7568.

Sincerely,

A handwritten signature in black ink, appearing to read "Ron Hammerschmidt".

Ronald F. Hammerschmidt, Ph.D.
Director
