PUBLIC NOTICE

Occidental Chemical Corporation, Ingleside Chemical Plant

ANNOUNCEMENT OF PROPOSED PERMIT AND PUBLIC HEARING, AND REQUEST FOR
PUBLIC COMMENT OF PROPOSED CLEAN AIR ACT GREENHOUSE GAS PREVENTION OF
SIGNIFICANT DETERIORATION PRECONSTRUCTION PERMIT

Public Comment Period July 10, 2013 to August 9, 2013

The United States Environmental Protection Agency (EPA) provides notice of and requests public comments on the EPA's proposed action relating to the Prevention of Significant Deterioration (PSD) permit application for the Occidental Chemical Corporation (OxyChem), Ingleside Chemical Plant. If finalized, the permit would regulate greenhouse gas (GHG) pollutant emissions associated with the project to construct a new natural gas liquids (NGL) fractionation plant, in accordance with the PSD regulation (40 CFR 52.21). The proposed construction will occur at the existing facility, Ingleside Chemical Plant, which is located at 4133 Hwy 361, Gregory, TX 78359.

Under the provisions of 40 CFR 52.21 (except paragraph (a)(1)), EPA Region 6 implements a greenhouse gas PSD Federal Implementation Plan (FIP) for Texas. *See 40 CFR 52.2305*. As the project will result in increased greenhouse gas emissions for a facility described at 40 CFR 52.21(b)(49)(v), EPA concludes that the application is subject to PSD review for GHG emissions. The construction of the NGL fractionation plant covered by the draft permit is composed of the following emission sources: two thermal oxidizers, emergency flare, cooling tower, emergency use engines, and process fugitives.

Any interested individual may submit written comments on EPA's proposed PSD permit for the OxyChem project. All comments must be received in writing by August 9, 2013 or postmarked by August 9, 2013 to Aimee Wilson at one of the following addresses:
