Subject: Draft Environmental Impact Statement for the 3 Bars Ecosystem and Landscape Restoration Project, Eureka County, Nevada (CEQ # 20130280)

Dear Mr. Lewis:

The U.S. Environmental Protection Agency has reviewed the Draft Environmental Impact Statement for the 3 Bars Ecosystem and Landscape Restoration Project (3 Bars Project) pursuant to the National Environmental Policy Act, Council on Environmental Quality regulations (40 CFR Parts 1500-1508), and Section 309 of the Clean Air Act.

The EPA strongly supports the objectives of the 3 Bars Project. The land restoration treatments proposed should, when implemented in conjunction with the standard operating procedures outlined in Appendix C, help to achieve objectives—including to restore riparian, aspen, and sagebrush habitats, slow singleleaf pinyon pine and Utah juniper encroachment, and thin pinyon-juniper communities—identified by the BLM as central to the 3 Bars Project.

Based on our review of the subject DEIS, we have rated the Preferred Alternative and the document as LO-1, Lack of Objections – Adequate (see the enclosed “Summary of EPA Rating Definitions”). The EPA recognizes the need for the use of mechanical thinning and prescribed fire and wildfire to achieve long-term restoration objectives. We commend the BLM for committing, in the Preferred Alternative, to strong best management practices and soil and water conservation measures to protect sensitive resources during mechanical harvest and fire treatments. We would also like to acknowledge the description, in the DEIS, of the possible effects of climate change on the 3 Bars planning area. We recommend that the Final EIS and Record of Decision include a commitment to mitigate such effects, and to adapt management strategies accordingly, over the life of the 3 Bars Project.

We are also pleased with the riparian area restoration goals proposed in the 3Bars Project. These goals, including plans to “restore 31 miles of perennial streams, 17 miles of intermittent streams, and 40 springs that are within the riparian treatment zone” should aid efforts to protect sensitive riparian and aquatic species. We recommend, however, that the FEIS provide additional information on the potential interface between the stream restoration work planned for the 3Bars Project and Section 404 of the Clean Water Act (CWA); such restoration work could result in impacts to waters of the U.S. The DEIS states that no formal delineation of wetlands has been done for the project area, but that based on the USFS National Wetlands Inventory, the project area contains approximately 2,363 acres of wetlands.

The FEIS should describe how jurisdictional waters will be identified over the life of the 3 Bars Project, and how the BLM will coordinate with the U.S. Army Corps of Engineers to ensure that any stream restoration activities comply with the permit requirements of Section 404 of the CWA.

We recognize the challenge the BLM faces by implementing a restoration plan that will rely heavily on prescribed burns and wildfire to achieve project objectives. Though the 3 Bars planning area has good air quality, and meets all federal ambient air quality standards, the fine particulate matter generated during wildland fire does present a human health risk. We recommend that the BLM implement BMPs and work with local and State of Nevada air quality officials to reduce emissions from prescribed burns and wildfires to the greatest possible extent. We also recommend that the BLM analyze and include a description, in the FEIS, of the potential for further reductions in air emissions, in proposed forest treatments, by lessening or eliminating pile burning of residual fuels in favor of biomass energy production.

We appreciate the opportunity to review this DEIS, and are available to discuss our comments. When the FEIS is released, please send one CD copy to this office (specify Mail Code CED-2). If you have any questions, please contact me at 415-972-3521, or contact Jason Gerdes, the lead reviewer for this project. Mr. Gerdes can be reached at 415-947-4221 or gerdes.jason@epa.gov.

Sincerely,

/s/ Connell Dunning for

Kathleen Martyn Goforth, Manager
Environmental Review Office
