UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
REGION 4  
ATLANTA FEDERAL CENTER  
61 FORSYTH STREET  
ATLANTA, GEORGIA 30303-8960

FEB - 4 2003

4APT-APB

Lewis Shaw, Deputy Commissioner  
South Carolina Department of Health  
and Environmental Control  
2600 Bull Street  
Columbia, South Carolina 29201

Dear Mr. Shaw:

Thank you for your submittals of Early Action Compacts for the Upper and Lower Savannah Areas in South Carolina, which were received on December 23, 2002. (The Early Action Compacts for Allendale and Bamberg Counties were received on December 26, 2002.) The counties that are included in these Compacts are listed in the enclosure. The State of Georgia also submitted an Early Action Compact and Letter of Support from Richmond and Columbia Counties, respectively, as participants in the Lower Savannah Compact. The Early Action Compact process was designed to protect human health by enabling an accelerated local approach to ozone attainment, and to encourage early emission reductions that will ensure attainment of the 8-hour ozone standard. The Early Action Compact protocol, which was endorsed by the Environmental Protection Agency (EPA), Region 6, on June 19, 2002, is intended to be used in developing and implementing control strategies, accounting for growth, and achieving and maintaining the 8-hour ozone standard. As such, it represents a key component to these areas' Early Action Compacts. In these Early Action Compacts, you have committed to a planning process that will result in cleaner air for South Carolina, potentially prior to the regulatory deadlines that will be established for 8-hour ozone standard nonattainment areas.

The Metropolitan Statistical Area (MSA) is the EPA's presumptive boundary for the 8-hour ozone standard nonattainment designation, as described in EPA's March 28, 2000, boundary guidance memorandum. As you know, EPA has not yet designated areas as attainment or nonattainment for the 8-hour ozone standard, an action which will take place by April 2004. Prior to EPA's designations for the 8-hour ozone standard, the Agency is soliciting recommendations from the states by April 2003, and will review these submittals based on the March 28, 2000, guidance, submit an official response to the states by October 2003, and have discussions to resolve any remaining issues during the following 120-day period as provided by the Clean Air Act. Through our acceptance of these Compacts, EPA is not prejudging the outcome of the 2004 designations process.

The State of Georgia also submitted an Early Action Compact and Letter of Support for Richmond and Columbia Counties, respectively, which are part of the Augusta-Aiken MSA. However, the Early Action Compact in Georgia does not encompass McDuffie County, Georgia,

which is also part of this MSA. Edgefield County, South Carolina, is part of Upper Savannah Compact, but is also part of the Augusta-Aiken MSA, which is primarily represented by the Lower Savannah Compact. Therefore, we recommend that Edgefield County be included in the stakeholder process for the Lower Savannah/Augusta-Aiken Area. EPA may determine later in the designation process that a county which is part of or adjacent to a nonattaining CMSA or MSA, and not a participant in the compact, should be included along with the remainder of the CMSA or MSA as a nonattainment area. If this occurs, then that county, and the entire nonattainment area, will be ineligible for deferral of its nonattainment designation.

We support your efforts to promote early attainment of the 8-hour ozone health standard and believe that this plan will be beneficial to the citizens of the Upper and Lower Savannah areas. EPA Region 4 is pleased to be a signatory to these Early Action Compacts. I have enclosed copies of the signed Compacts (these are enclosed in the packages that were mailed to your State Air Quality Agency) and encourage you to share these documents with the local agencies in your State that are part of the process, including your transportation planning partners and other interested stakeholders such as environmental and industrial representatives. EPA Region 4 will continue to work closely with you to assist in this stakeholder planning process, and is developing a web site for the Early Action Compact process to assist you in this effort. This web site will have copies of all of the Compacts which have been approved. The web site address will be provided to your State Air Quality Agency as soon as it is available.

If you have questions or would like to discuss this issue further, please feel free to contact me or have a member of your staff contact Kay Prince of Region 4 staff at (404) 562-9026.

Sincerely,

A handwritten signature in black ink, appearing to read "J. I. Palmer, Jr.", with a stylized flourish at the end.

J. I. Palmer, Jr.  
Regional Administrator

Enclosure

**Counties included in these Early Action Compacts  
Upper and Lower Savannah**

<b>Upper Savannah Area (between Anderson and Aiken)</b>
Abbeville County
Edgefield County (actually in Augusta-Aiken MSA)
Laurens County
Saluda County
Greenwood County
<b>Lower Savannah (including the Augusta-Aiken MSA)</b>
Aiken County
Edgefield County (included in Upper Savannah area)
Orangeburg County
Barnwell County
Calhoun County
Allendale County
Bamberg County
Richmond County (Georgia)
Columbia County (Georgia)
