1. For all pollutants listed (with the exception of Diesel PM), the 1999 background used in Puerto Rico and the Virgin Islands is the same as the 1996 assessment/CEP background. For Diesel PM, the modeling based approach was used to calculate for Puerto Rico and Virgin Islands. Other pollutants in the 1999 national-scale assessment not listed in this table are assumed to have a background value of 0.
2. Pollutants not modeled in 1996 national-scale assessment.
3. Battelle provided only a single national value.
