**Additional Comments :**

Purpose of monitoring visit was to sample oily waste at the Pascagoula staging area located at 2210 Petit Bois St., Pascagoula, MS 39581. Only hard boom (for decontamination) was present at the staging area. Damon Williams (Waste Management) informed me that one full roll-off of oil contaminated debris, located at CC's Bait Shop (nearby VOO deployment site), was scheduled to be relocated to the Pascagoula staging area today. In order to get a sample of oily waste, it was decided that a sample would be obtained from the roll-off at CC's Bait Shop.

Several random grab samples of oily absorbent boom were taken from roll-off #RT713 and composited into two 8 oz. glass jars for purposes of running TCLP analysis for VOCs, SVOCs, metals and ignitability. No undue concerns regarding waste management practices were noted during the visit.

Others present included:
