3. Any evidence of oily waste or oily waste waters?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A
4. If yes, was it adequately addressed?	
5. How many samples were collected?	

Additional Comments :

WASR arrived at 0930 hours and met with BP waste disposal contractors from Heritage Environmental Michael Harry and PEC Scott Lodge. Heritage indicated that there aren't any frags located on site due to decon ops being transferred to the Cocodrie's facility; site only receives soft boom from barge crews. Boom that is received at site is placed in rolloff boxes then sent to Colonial Landfill in Sorrento, LA for disposal. There are twelve rolloff boxes total onsite. (1) rolloff is used for storage, (4) containing awaiting analytical results, and (5) actively generating waste. All rolloffs were lined. Heritage indicated that the site is still scheduled to be shut down and consolidated into the Cocodrie site within the next 2 weeks. WASR departed the site at 1050 hours.
