G. Air Quality Requirements (detailed discussion starting on Page 63 of this guide)

Assigned To

Getting a State Implementation Plan (SIP) Permit

- G.1. Who will determine if you need an air permit? A permit may be required for the uncontrolled open burning of debris, dust generation, vehicle emissions, and combustion gases from oil-fired equipment. _____
- G.2. Who will be responsible for getting the air permit? _____
- G.3. Who will be responsible for implementing the requirements of the SIP permit? _____

Getting a New Source Performance Standard (NSPS) Permit

- G.4. Who will determine if an NSPS permit is required (i.e., if a rock crusher, cement plant, or hot mix asphalt plant is operated on site)? _____
- G.5. Who will notify site personnel of the permit requirements if a large source of emissions such as a rock crusher, cement plant, or a hot mix asphalt plant is located at the construction site (e.g., ensuring that proper recordkeeping and monitoring are completed)? _____

Ozone Depleting Substances (CFCs)

- G.6. Who will determine if equipment containing ozone depleting substances is located at the site? _____
- G.7. Who will be responsible for disposing of any equipment containing ozone depleting substances located at the site? _____
- G.8. Who will determine if the equipment containing ozone depleting substances will be removed for treatment off site or treated on site before demolition activities are begun? _____
- G.9. Who will maintain copies of records from the disposal contractor verifying that the ozone depleting substances have been removed from the appliances? _____
- G.10. Who will determine if the Transportation Conformity Rule applies? _____
- G.11. Who will determine if the project meets the requirements of the Transportation Conformity Rule? _____
