Estimating the Condition of Gulf of Mexico Estuaries: National Coastal Assessment and National Estuary Program

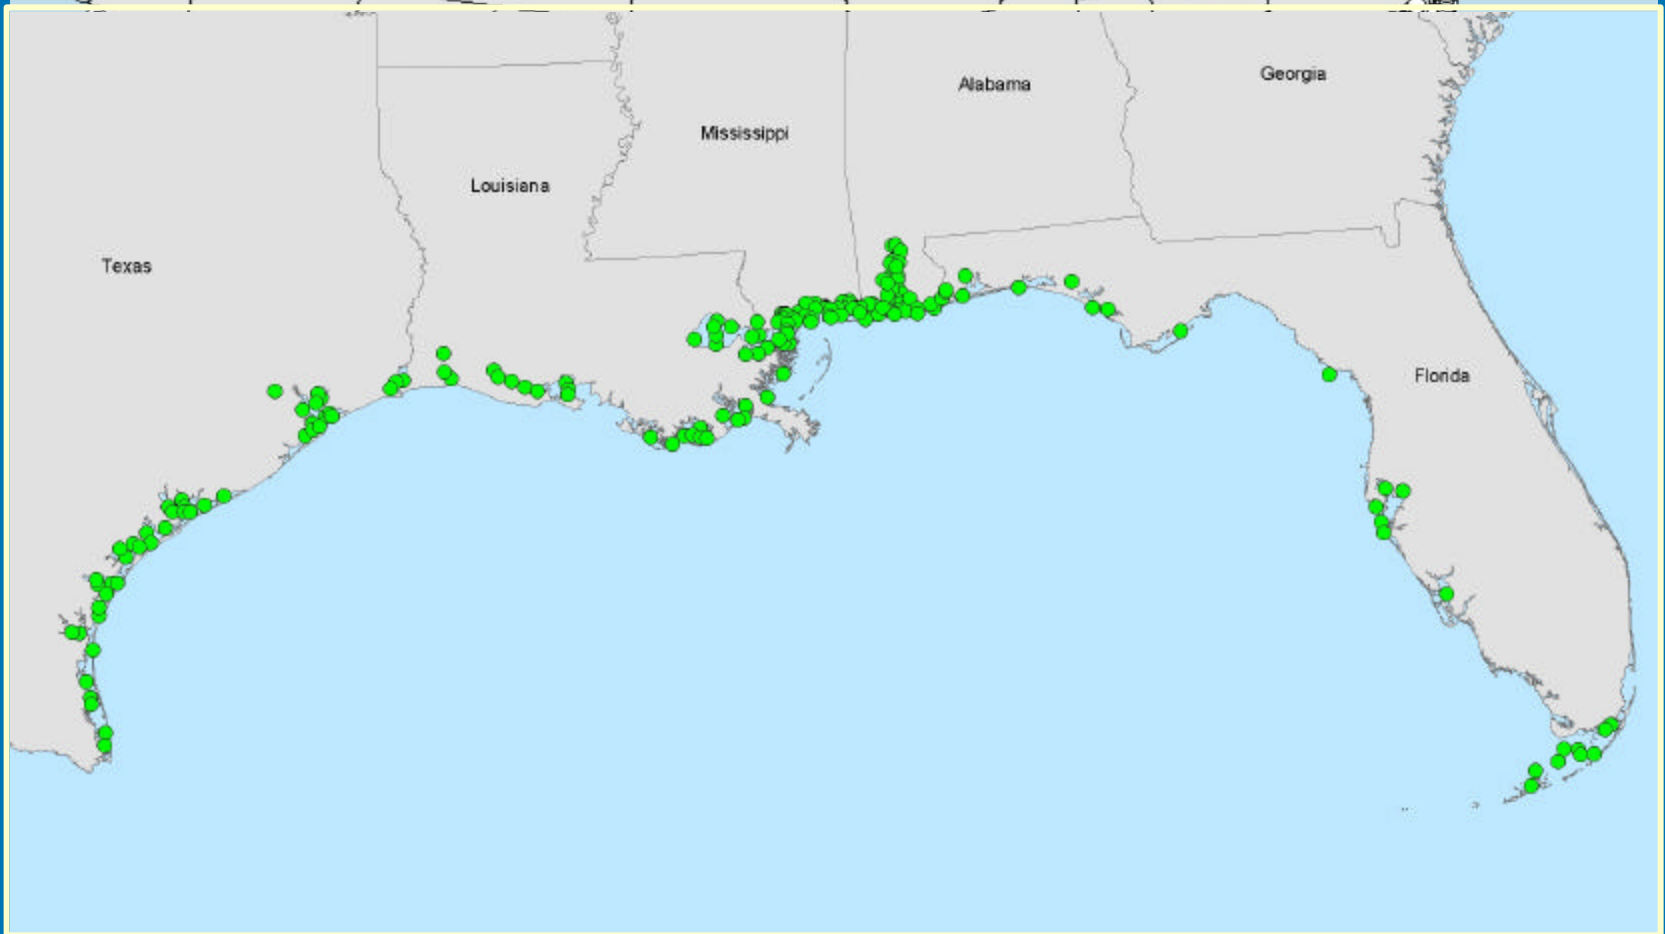

**Virginia Engle
USEPA/ORD/NHEERL
Gulf Ecology Division
EMAP Symposium 2004**

Program Goals

- **National Coastal Assessment**
 - Assess condition of U.S. coastal resources
 - Create an integrated, comprehensive coastal monitoring program among the coastal states.
- **National Estuary Program**
 - Improve quality of estuaries of national importance
 - Attain or maintain water quality in estuaries by developing Comprehensive Conservation and Management Plans.

National Coastal Assessment

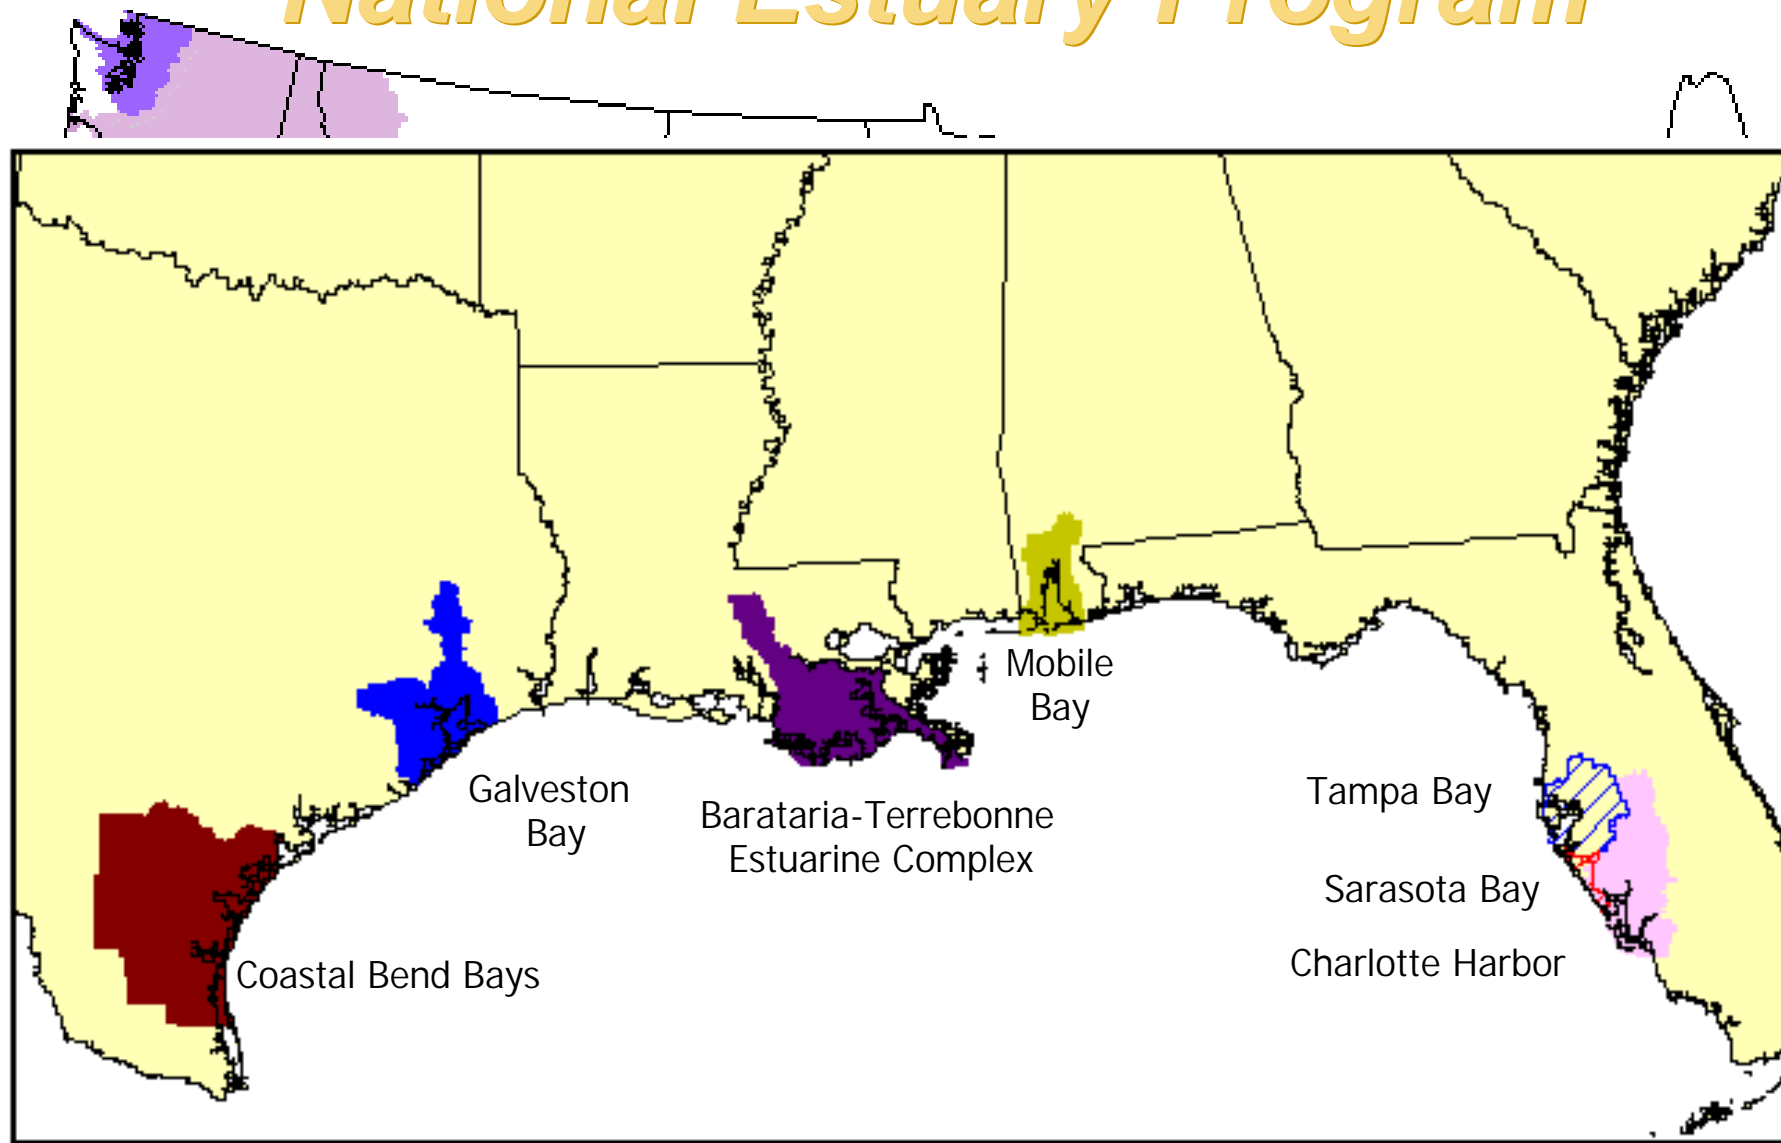

RESEARCH & DEVELOPMENT

Building a scientific foundation for sound environmental decisions

National Estuary Program

RESEARCH & DEVELOPMENT

Building a scientific foundation for sound environmental decisions

Estuarine Assessments

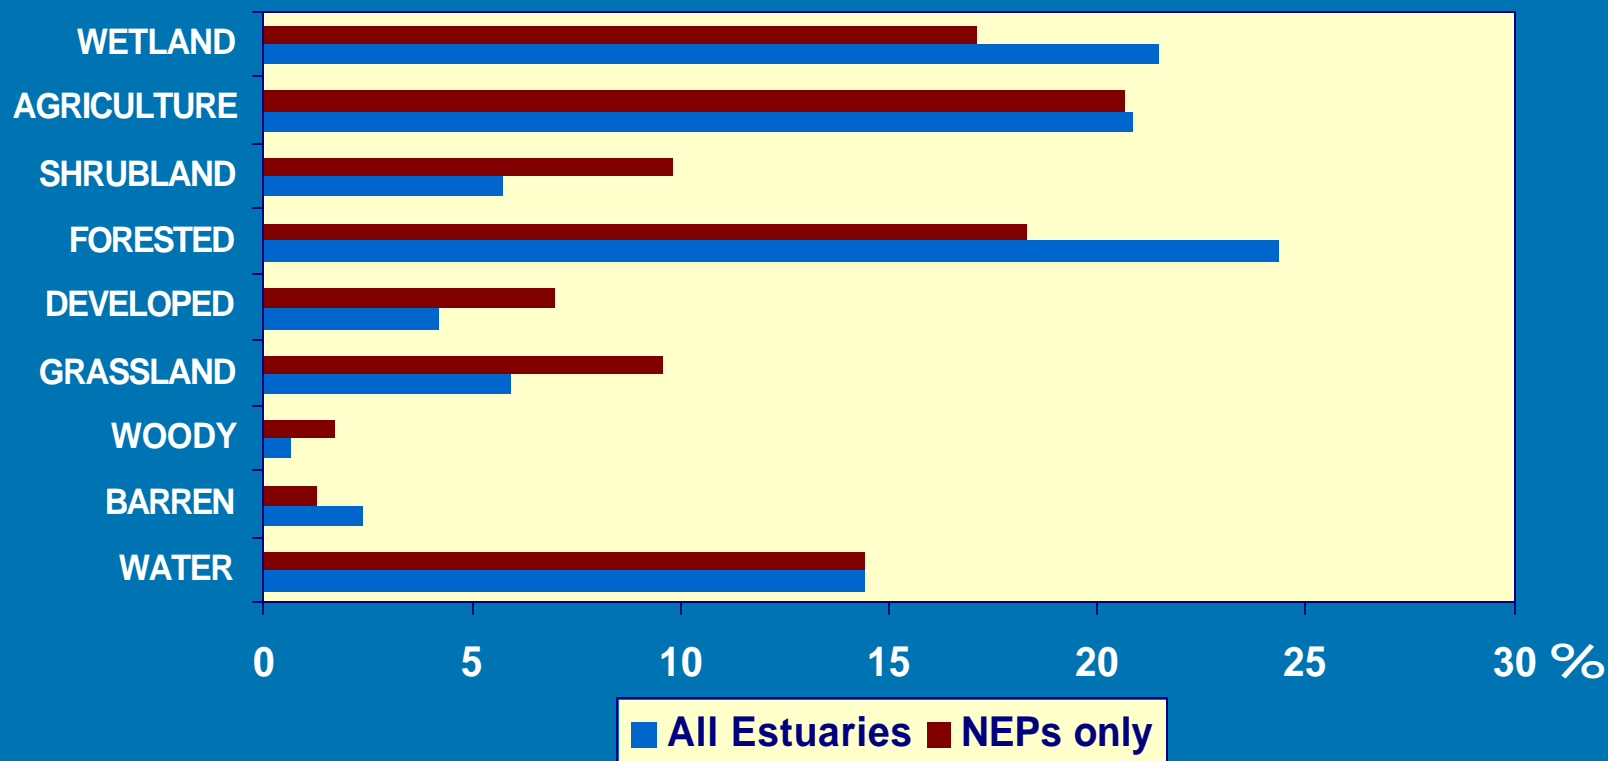

How well does the condition of NEP estuaries represent the condition of Gulf of Mexico estuaries?

Surface Area of Gulf of Mexico Estuaries

Gulf of Mexico Estuarine Drainage Areas Land Cover Estimates

Methods

- **Probability-based survey designs**
- **Data collected by states using standardized field, lab, & QA protocols**
- **Data analysis**
 - **Cumulative distribution functions (CDFs) with confidence intervals**
 - **Maps and pie charts showing distribution of good, fair, poor conditions**

Number of Stations

| NCA | 2000 |
|--------------------|-------------|
| Florida | 23 |
| Alabama | 50 |
| Mississippi | 35 |
| Louisiana | 38 |
| Texas | 45 |

| NEP | 2000 | 2001 | 2002 |
|-----------------------------|-------------|-------------|-------------|
| Charlotte Harbor | | | 30 |
| Sarasota Bay | | 20 | |
| Tampa Bay | 25 | | |
| Mobile Bay | 33 | 33 | |
| Barataria-Terrebonne | 11 | 14 | |
| Galveston Bay | 12 | 16 | |
| Coastal Bend Bays | 13 | 14 | |
