DESCRIPTION

In November 2007, the state released its [Climate Action Plan](#). The Plan includes which 14 are adaptation recommendations for the state's water supply, and one assessment and creation of associated adaptation plans.

In April 2008, Governor Ritter signed [Executive Order B007 08](#) creating a Climate recommendations for achieving the goals of the state's Climate Action Plan, including effective planning for adaptation to climate change. The panel met for the first time

HIGHLIGHTED CLIMATE ACTIONS

Milwaukee has implemented many climate actions by investing in infrastructure to manage stormwater runoff and received the [2011 Green CITS program Leadership Award](#) for an ongoing commitment to addressing stormwater impacts through green infrastructure. From 2003 to 2004, [Milwaukee spent about \\$900,000](#) on green infrastructure to absorb runoff and capture contaminants. The city installed downspout disconnections, rain barrels, and 60 rain-gardens to control runoff. These installations reduce the burden on inadequate storm-water infrastructure and prevent potential flood damage. Milwaukee also installed a twenty thousand square foot green roof on a local housing project and spent an additional \$300,000 on four other green roof projects.

Milwaukee has also managed its coastal vulnerabilities to climate change by partnering with [The Conservation Fund \(TCF\)](#), a national finance and land-acquisition nonprofit group, to help run its [Greenseams program](#). This program has the goal of purchasing flood-prone, lowland properties in order to protect key areas from development and allow for natural stormwater filtration. By increasing natural filtration, the program lowers the amount of stormwater that reaches traditional infrastructure during

What you can do –

- Explore partnerships or collaborative efforts.
- Encourage city officials to generate relevant material and upload their local adaptation actions to existing platforms.
- Help identify knowledge gaps.

C2ES plans to –

- Author content for use in platforms.
- Provide in-depth research and comparative analysis.
- Qualitatively assess each surveyed city's progress toward its climate adaptation plan.
- Author and publish case studies.

- **ICLEI – Local Governments for Sustainability**

<http://www.iclei.org>

International network, case studies, toolkits.

- **EcoAdapt – Climate Adaptation Knowledge Exchange (CAKE)**

<http://cakex.org>

Database of organizations, case studies, tools.

- **Georgetown Climate Center**

<http://www.georgetownclimate.org/adaptation/clearinghouse>

Adaptation clearinghouse of resources and organizations.
