Priority Pesticide List: Expert Meeting 1
PPDC 21st Century Toxicology/New Integrated Testing Strategies Workgroup
Biomonitoring Subgroup
Meeting Minutes
Time: 2:00 – 3:30 PM (EST)

Summary

The purpose of this first meeting was to bring together scientists and public health professionals with expertise in medical toxicology, environmental medicine, and public health to establish prioritization criteria and make recommendations on which pesticides should be the focus of further biomarker research and development. Discussion of criteria for selecting pesticides was the focus of this meeting, and future meetings of this expert workgroup will focus on developing a list of priority pesticides for biomarker research based on the criteria. The Pesticide Program Dialogue Committee (PPDC) 21st Century Toxicology Workgroup proposed this project to EPA following a 2011 workshop entitled “Diagnostic Tools and Biomarkers in Pesticide Medical Management, Exposure Surveillance, and Epidemiologic Research.”

Next Meeting

The 2nd Expert Workgroup Meeting to develop a priority pesticide list will be scheduled for the near future.

Attendees

Non-EPA Expert Representatives: Jimmy Roberts, Geoff Calvert, Matthew Keifer, Daniel Sudakin, Asa Bradman, Amy Liebman, Jeff Burgess, Mike Bartels, Cheryl Cleveland

Non-EPA Biomonitoring Subgroup Representatives: Erik Janus, Caroline Cox

EPA Representatives: Aaron Niman, Jennifer McLain, Ed Scollon, Stephen Edwards, Garland Waleko
