There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sijisfredo Aviles

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Linda Torony

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

The Badger's exceptional status, as free pass polluter needs to be completely curtailed! It is a ridiculous hangover policy from days gone by, when industries ran roughshod over the environmental concerns, which nobody seemed to be aware of. NOT ANY MORE!!! TIME OUT!! PERSONAL FOUL!! PENALTY!!

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I say this as someone born in Wisconsin, currently living in Chicago, who has taken the ferry on a recreational basis, who has enjoyed doing so, and who recognizes its charm and tourist draw.

However, a mature consideration of the impact of this vessel's operation makes clear that it does far more harm to the fresh water of Lake Michigan than is warranted by either its transportation or tourist value. Clean water is simply too important to trade for the profitability of one company providing an archaic service.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jonathan Helstad

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree. The Ludington Ferry is a beautiful way to travel from Wisc. to MI., but the S.S. Badger has got to find a better place for its coal ash waste. Could coal ash be used in some other industry so that it might be turned into a useful product? Could S.S. Badger run on natural gas? There must be a win/win solution somewhere. Let's find it!

Sincerely,

Marcia Dam

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Please stop the S.S. Badger from polluting Lake Michigan. The SS Badger represents old outdated technology that should be retired immediately. It is a struggling venture at best that should give way to newer and cleaner ferry boats like the Lake Express.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Rebecca Gurga

Chicago, IL 60632-1911

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Elizabeth De Guise

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Adrian Vazquez

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Tennell Lavery

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sherri Isaac

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Allowing the Lake Michigan Car Ferry to dump coal ash into the lake makes no sense. It is a part of the history of the Great Lakes and unless it can change its manner of locomotion, it must be retired. We would hope that all of the following suggestions be considered and acted upon!

While we understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, we request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Monica Garcia

Chicago, IL 60606-5075

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I was appalled to learn that that the S. S. Badger has been dumping coal ash into Lake Michigan for more than sixty years. How has this been allowed to happen? Why would anyone think that filling the lake with toxic ash makes sense? Our Great Lakes are our nation's natural treasure and an amazing source of fresh water. They provide beauty, recreation, food and most importantly drinking water for many communities. Stopping this insane practice of dumping toxic waste into the lake is a "no-brainer!" It never should have been allowed in the first place. Obviously the general public had no idea this was happening.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

The dumping of coal ash should cease permanently as soon as possible!

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Madigan

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Barbara Carr

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sandra Dupuis

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sarah Karnes

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Below, you'll note a preset message regarding this issue. And that's fine... However I and my family are outraged that this has been allowed to go on for such a long time. I say "allowed" even though Lake Michigan Car Ferry, Inc. has been told - repeatedly - to cease and desist. The Federal Government knew of their dismissive behavior, and still nothing has been done. Please! Please, do the right thing. You know what has to be done. No more excuses for them. We, all of us, are really begging you to do the right thing.

And isn't it a deep shame that we have to BEG you to do the right thing!! Shameful!!

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

William Luzzi

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Marcie Willis

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Matthew Robitaille

  
Chicago, IL 60657-1711

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

It is my feeling that the S.S. Badger has had more than enough time to refit so that it is not dumping coal ash into Lake Michigan. I would not have given them permission for even this year to continue in their polluting. Why should they be allowed to continue when we all agree the Lake is precious?

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Chris Law

  
Chicago, IL 60625-2712

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

As a resident of Michigan, a lover of our lakes and an avid traveler, I vow not to patronize the ferry system as a mode of transportation until the dumping of coal waste into the lake is prohibited. Furthermore, I will be sharing this information with everyone I know and will encourage them to use other modes of transportation to visit our fair neighbor state of Wisconsin.

The health and well-being of our collective natural environment/wilderness should take a FRONT SEAT in every discussion, every policy, every law this state and nation undertakes.

Without a healthy planet, we won't have to worry about the economy or jobs because eventually, the impact from all the exploitation, pollution and habitat destruction will impair our species' ability to survive.

Whatever deals were made to allow the dumping of coal ash into Lake Michigan need to be undone.

Sincerely,

Stacie VanOosterhout

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Richard Nystrom

Portland, OR 97203-2034

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Cecilia Roman

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Rosaire Lucassen

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Susan Crowley

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Dianna Rimarcik

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Adrian Manning

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Renata Castiglione

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Marjorie Soule

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Joyce May

  
Streamwood, IL 60107-2354

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I grew up near the shore of Lake Michigan and spent many childhood hours playing on along the lake. I am saddened to think that even today children are still being exposed to more and more pollution of our beautiful lake. This needs to stop!

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Ann Offer

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Martin & Sharon Mcgladdery

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Coal ash is loaded with all kinds of carcinogens including mercury which has been ingested by fish for as long as coal burning plants have been in operation. The recommended consumption of fish is limited to no more than 3 servings per week as a result of mercury contamination, and that's a sad commentary on the way things are. The fact that the S.S. badger is dumping coal ash directly into the lake adds insult to injury, and makes the problem even worse. It might be that coal burning power plants have been doing the same thing surreptitiously over the years anyway, but this kind of behavior needs to change. We all need something greener and cleaner..

Sincerely,

Robert Hoekstra

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kim English

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sarah Schaefer

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sam Orlich

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jan Kirch

Libertyville, IL 60048-4320

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Gena Todd

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Rebecca Gilman

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Grady Anderson

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

John Vargo

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Paul Fourman

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution to preserve our lakes.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Barbara Hartley

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I appreciate the SS. Badger is an icon but something needs to be done about the pollution of Lake Michigan. My suggestion would be to replace the present coal burning fuel setup with a much "greener" system but maintain the vintage look that is part of lake history.

I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Joshua Jeffers

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Karen Land

Ann Arbor, MI 48105-1477

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Dirk Vankoughnett

Chicago, IL 60614-3748

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

David Rinaldi

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Susan Burke

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Stephanie Miklavcic

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jill Priebe

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mark Woodbury

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Lou Tomes

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

As the S.S. Badger states that it will be too expensive to continue running unless the coal ash dumping is allowed to continue, the S.S. Badger should open their financial records so that this claim can be verified. If the claim is true, then the DOJ and EPA should work together with the S.S. Badger to find a way to retrofit the ship so it is environmentally safe and the coal ash dumping ceases..

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Art Fritz III

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Brian Seely

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that informatioHn should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Brian Whinnery

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Karen Woollams  
16940 Heim Rd  
Chelsea, MI 48118-9782

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Barbara Nelson

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Bob Cole  
10081 Springborn Rd  
Casco, MI 48064-3401

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jennifer Holtz

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

CITIZENS CANNOT POLLUTE  
CORPORATIONS are now Deemed to be citizens  
CITIZENS CANNOT POLLUTE

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Padraig O'Hara  
4500 N Winchester Ave Apt 1006

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Steven Huffman

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Brian Glienke

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

C. Max Oettinger

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Barbara Garber

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jean Sayre

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Philip Young

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jo Ann Fritz

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

I appreciate the historical significance and charm of the Badger. However, the dumping practice cannot continue. We do not allow open sewers at Ft. Macinac, the Badger must modernize or stop its runs. There has been enough time provided - my impression is that the Badger management will use further time to continue operations with only lip service to solving the problem. Enough is enough.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sarah Lyon-Callo

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Matthieu Brillet

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mikele Garrett

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Lauren Phillips

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Christopher Lawell

Kenosha, WI 53144-1703

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Suza Barrera

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jordan Sherwood

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sally Peterson

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

We are not asking that the ferry operation be stopped but the S.S. Badger should be converted to a non-polluting fuel source or moth-balled as a museum and replaced by more eco-friendly shipping. We live on the Lake and can see the results of pollution from too many sources. Current operations of the S.S. Badger should be stopped immediately.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

William Powers

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Dennis Stafford

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

W. Micheal Cosby

Gobles, MI 49055-9104

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Laura Barman

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Paul Dombrowski

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Millions of people drink the water from the Great Lakes (specifically, Lake Michigan), and many hundreds of thousands swim in the waters and eat fish from the waters. We really can't have an antiquated boat (and an antiquated law) continue to poison those waters on a regular basis. It's time to stop that from happening.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kevin Loucks

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Cyndie Junod

  
Auburn Hills, MI 48326-4000

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Michael Zeller

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kathryn Klemp

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Conway

Chicago, IL 60625-3733

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

The U.S. Department of Justice and U.S. Environmental Protection Agency's consent decree may offer a final resolution to this pollution issue rather than the years of constantly harping on negative approaches that would destroy jobs and a real treasure for the people of Michigan and Wisconsin. I know that the Badger's owners may have been less than helpful, honest, and forthright in addressing this issue over the years. But as a U. S. citizen it also appears to me that the U.S.Doj and EPA have been less than helpful with many of their pronouncements. While their motives may have been good, I believe that both sides have contributed to the present stalemate. And while they have also meant well, I believe that the leaders of the Sierra Club and other environmental concern groups have not always acted in the best way on this issue. It is past time to stop fighting and get together to fix the problem for the mutual benefit of everyone.

The U.S. DOJ and U.S. EPA, Sierra Club, states, cities and counties must move beyond the years old policies of punish, punish, punish to a more positive approach. As representatives of the people of the United States they should be helping and encouraging the Badger's owners, the States of Michigan and Wisconsin, and their respective cities and counties, to find grants and investors to refit the ship to dispose of or make commercial use of the ash on shore or install engines that use cleaner fuels. There should be an explicit agreement stated by all parties that they will work together to produce the cessation of coal ash pollution by the S.S. Badger BEFORE the end of the 2014 summer season, or continue the consent decree if real and measureable progress is being made.

The U.S. DOJ and the U.S. EPA should consider decreasing the civil penalties for the S.S. Badger's lessening of pollution as it happens. This might work something like highway construction contracts that provide monetary incentives for early completion of projects.

The U.S. DOJ and the U.S. EPA should consider providing incentives for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information must be made publicly available on an easily accessible website.

Thank you for your consideration of these possibilities to strengthen and improve the proposed consent decree.

Sincerely,

John Potter

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Chris Houben

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Ralph Rider

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Nancy Mcadam

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jennifer Murray

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kevin Rashid

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I don't agree with it at all. The car ferry is not necessary at all, it is an extravagance, one which certainly does not warrant dumping of coal ash into this beautiful Great Lake whatsoever. The total amount of coal ash dumped annually into the lake by this dinosaur of a boat is more than the combined annual pollution of all of the other 125 other largest ships operating on the lake.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Hanley

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Caren Dybek

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Valerie Pogue

  
Milwaukee, WI 53211-3421
