Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Melissa Damaschke

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be/must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kaye Aurigemma

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Joyce Niksic

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Barbara Spietz

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Nancy Kurtz

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Letitia Noel

Chicago, IL 60610-7406

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Nancy Alcumbrack

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Leigh Deleonardo

Apr 30, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I have lived near Lake Michigan my whole life. And so I feel a tremendous affinity for and responsibility to this Great Lake. The pollution of the lake must end, not just by the SS Badger... but all the other polluters as well. But let's start here... let's start now.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Susan Clayton

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Hailey Gladden

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Petra Oberbeck

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Timothy Koos

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Nick Barron

Chicago, IL 60660-4542

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Helga Guequierre

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jean & John Imperial

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kathleen Crowther

For more than 40 years I have crossed Lake Michigan - sometimes using the Badger and I will never forget my shock and horror when we reached the middle of the lake and the boat belched out the terrible black sludge that was going into my drinking water and onto the beaches of Michigan. I couldn't believe this was allowed to happen - and it has been happening constantly for more than 40 years and no one stops this horrible pollution. Is the payoff so great that our health is sacrificed and the lake purity is compromised. The lake water is one of our greatest natural assets - and we don't care what happens to it. Are we really that stupid to just let this travesty continue? Shame on you who make the decisions to let this pollution continue. STOP IT NOW

Elizabeth Gotsch

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Ellis Talbert

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Please eliminate any activity on the part of the S.S. Badger. Please shut them down immediately.

We are all aware of what they are doing. It has been in the news many times in the past years. Why is it even continuing to operate? Who is paying whom?

Surely our elected officials are smart enough to know the damage that is being caused. I would say there is no such thing as a free lunch, but I guess those persons who operate the S. S. Badger will happily tell me there is. Please tell them that the free lunch is over.

Cease their activity until they can find a cleaner way to operate their ship.

And slap them with a huge fine for polluting the lake and making monkeys out of my elected officials.

Thank you.

Sincerely,

Leonard & Phyllis Adams

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sara Dell

**Subject:** United States v. Lake Michigan Trans-Lake Shortcut, Inc., D.J. Ref. No. 90-5-1-1-10771

Apr 26, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Can I assume that you realize coal ash is toxic? Here's part of a recent article by Physicians for Social Responsibility: "The coal ash spill in southeastern Wisconsin that poured heavy metals and toxicants into Lake Michigan poses potentially serious health risks to the communities in the area. When previous coal ash accidents have occurred, water samples have found elevated levels of arsenic, lead, chromium, and mercury, which can cause cancer, neurological damage, or both in humans. This is another stark reminder of why EPA needs to adopt strong regulations of coal ash and why our federal, state and local policies should focus on the health and well-being of our citizens rather than on corporate profits."

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

I was born in Manitowoc and have taken a round-trip on the S.S. Badger unaware of its dumping. This dumping is wrong, and I personally think the measures suggested above are too wimpy.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Pat Messer

Apr 26, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Shriijana Chalise

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

You will have received many of the standardized message, so I've no need to repeat that. I use the lakeshore in that region, usually at Point Beach State Forest. The comings and goings of the SS Badger are easily tracked by the trailing smudge of smoke. I have seen the ferry at dock and the huge piles of coal within a few feet of the shore with little to keep their seepage from running off into the lake. Finally, four and a half tons of coal ash dumped day after day, must that happen when alternatives exist? I would be willing to bet that federal grants or loans could be obtained to convert the ferry to natural gas. Is the coal ash amount small, relative to the size of the lake? Of course, but it is just one of many toxic inputs and one that is easily ended, as is the the contribution of CO2 to the atmosphere and the other ingredients of coal emissions, such as mercury and hydrogen sulfide. The ferry is a venerable part of the Midwest transportation scene. Changing from coal to natural gas will not diminish that heritage.

Sincerely,  
Will Stahl

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sergio Kips

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Ian Ingram

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Michelle LeMoine

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Rolland Scheels

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Laura Ortiz

  
West Bend, WI 53090-8421

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance. They shouldn't be dumping ANYTHING into the lake, so let's cut their refuse disposal down as much as possible.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree. I swim in the lake and drink its waters, so I am appalled to hear that this dumping has been and still is going on!

Sincerely,

Laura Mueller

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Ann Searing

Franklin, WI 53132-2041

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Carol Atkins

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Emma Myles

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you please consider the following ways of strengthening the proposed consent decree:

This is important! There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Karin Hills

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

As a boy, I crossed Lake Michigan on the S.S. Badger and have some nostalgic attachment to the ferry. However, I have closely followed the issue of coal ash dumping and conclude that the owners of the S.S. Badger are not acting in good faith to remedy the problem.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

William Hoagland

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

First, I think NO coal ash should be dumped into our most precious resource. To allow this to continue even one more day is inexcusable, and begs the questions: who is benefiting, and who is being paid off with money or votes or other favors?

When something so wrong on many levels is allowed, it is obvious that something illegal is occurring.. My primary hope is that this will stop immediately; or if it does not, those who are 'on the take' will be publicly exposed.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Derek Ziomber

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Erin Sherer

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Jo Schnabel

  
Skokie, IL 60076-3644

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Cindy Ross

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Connie Fletcher

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue. There is a strong essential, necessity to bring about an end to the S.S. Badger's coal ash dumping in Lake Michigan.

Coal Ash is noted to be more Radioactive than Nuclear Waste, meanwhile, coal is considered responsible for a host of more quotidian problems, such as mining accidents, acid rain and greenhouse gas emissions. I request that you initiate the following guidelines to strengthen the proposed consent decree:

1. There should be an explicit agreement stated by both parties that they shall be no further request for extensions to the cessation of coal ash dumping and pollution by the S.S. Badger during and following the 2014 summer season.
2. The U.S DOJ and EPA should increase the civil liabilities and penalties for the S.S. Badger's continued pollution and destruction of Lake Michigan's environmental habitat.
3. These agencies should provide stricter reductions on the S.S. Badger's coal ash dumping over the coming year in order to provide a stronger path towards compliance.
4. The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be and must be made publicly available on an easily accessible website.

The pollution of Lake Michigan is not only a severe health hazard for our children and families, but is very destructive of the lake habitat, as well as the fishing and tourism industry. There by causing severe economic loss for all states boarding Lake Michigan

I suggest and request that you consider implementing immediately, restrictions to halt the S.S. Badger from dumping coal ash in Lake Michigan.

Thank you for your consideration of these provisions for strengthen and improving the proposed consent decree.

Sincerely,

LD Rockwell

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Marvin & Karen Anderson

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Michael Maranda

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

paul & elaine anderson

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Thank you for taking time to review this issue. I will state outright that I am, well, outraged that this pollution is allowed to continue in Lake Michigan. We have come ways too far and know far too much about what this kind of pollution is doing to our water and air and all the wildlife that depend on them, to allow this to continue.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

For as long as I remember, my family has been taking the Badger every summer across Lake Michigan to see our family on the other side in Michigan. While I thought it was a better environmental choice, I am now ashamed to learn that my family, being consumers of the ferry for so many years, have contributed to this environmental catastrophe.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Bryan Cyra

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mike Woods

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Robert Thomas  
13218 Fewins Rd  
Interlochen, MI 49643-9206

Apr 25, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

The S.S. Badger dumps almost four tons of coal ash into Lake Michigan each and every day it operates. The car ferry crosses Lake Michigan for five months out of the year and has been polluting the Lake we treasure for decades. Coal ash contains nasty pollutants such as heavy metals and other toxic substances. I'm sure you know more about those than I do.

Lake Michigan is the sixth largest freshwater lake in the world. Millions of people depend upon it for drinking water. The state economies of Wisconsin, Michigan, Illinois, and Indiana depend on the beauty and recreational opportunities of Lake Michigan to bring millions of visitors each year.

The Badger's parent company was given a deadline to do something about its pollution, and it voluntarily allowed that deadline to pass without acting.

Why are the 10 million residents of Michigan, the 6 million residents of Wisconsin, the 13 million residents of Illinois, and the 6 million residents of Indiana being forced to accept the Badger's ongoing pollution of our Lake for another two years via the consent decree?

We don't allow residents to dump their garbage cans into Lake Michigan and we shouldn't allow the SS Badger to dump its coal ash into our Lake either.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you strengthen the proposed consent decree in the following ways:

Rather than offering the Badger a two year extension in addition to the time it's already wasted, make it one year.

Rather than a simple two year extension, require the Badger's parent corporation to provide proof of progress toward meeting the final goal after six months in order to receive another six month extension, with a total extension of two years available.

There should be an explicit agreement by both sides that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should increase the civil penalties for the S.S. Badger's continued pollution, since the only way to make a corporation listen is to enact meaningful penalties for failure to act.

The U.S. DOJ and the U.S. EPA should provide for steeper reductions in the S.S. Badger's coal ash dumping over the next two years, in order to have a stronger path towards compliance.

The S.S. Badger should be required to provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Sincerely,

Mike Strawn

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Four tons of coal ash dumped into Lake Michigan every day by this car ferry and it operates five months of every year. This is absolutely appalling. Why is this company allowed to pollute our precious Lake Michigan with such impunity?

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

JoAnn Rapp

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Dan Mackay

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I have spend many, many summers on Lake Michigan. i am an artist and finished my masters degree at MSU's summer painting school in Leland in 1967. I have sponsored "paint outs" along the shores of Lake Michigan. I attend a Nantucket Basket Class in Pentwater every summer. I had no idea that the Badger, out of Luddington, was poluting Lake Michigan, its life blood. While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Cassie Yun

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Re: The SS Badger consent decree.

No further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season. The operators of this ferry have already had time to shift their ship's power plant from coal or to at least dispose of coal ash in a responsible way. Instead, they choose to stall and litigate.

In response, the U.S. DOJ and the U.S. EPA should increase the civil penalties for the S.S. Badger's ongoing pollution or impose rules that will stop further pollution of Lake Michigan.

The well-being of Lake Michigan is more important than the cynical actions of the ferry operators, who only want to squeeze more profit from their reliance on an outmoded dirty technology.

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

j eskra

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Laura Rice

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Glenn Green

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Shirley Powell

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

C Sorensen

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

The U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I urge that you consider these ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request further extensions to ending the coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties, if the SS. Badger continues to pollute Lake Michigan.

The U.S. DOJ and the U.S. EPA should consider providing for greater percentage reductions in the S.S. Badger's coal ash dumping over the next two years. This is intended to create a stronger path towards compliance.

The operators of the S.S. Badger should provide monthly reports of how much coal ash is being dumped into Lake Michigan. That information should be made available to the public, on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kent Newman

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

{Once upon a time, the people of the Great Lakes had a sustainable transportation system, they travel through the the waterways rather than pave roads around them. Their crafts were build by workers living here with resouces harvested here, today's bulk freighters are assembled in Japan. They shipped everything from food, clothes, live animals, medicine, and passengers, today we transport bulk feight only bulk freight. This old transit system existed 8,000 years ago, during the copper era. It's ironic that men with birch bark canoes had a system far more flexible than the ridged modern methods of today.}

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jacob Breczinski

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Judith Matrise

  
Kenosha, WI 53144-2440

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

It begs the question of why they could pollute Lake Michigan in the first place. Water is a finite resource and needs to be protected. We use the water in the lake for drinking, swimming, fishing, boating etc. It should not be a dump for anyone!

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Marie Leven

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Eugene Blue

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Theresa Lecompte

Aurora, IL 60506-3749

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jesse Lindell

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Andrea Schneider

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Lisa Hershenson

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Andy Kurkulis

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I have ridden the Badger and enjoyed watching it sail on many occasions.

I do not however, agree that the Badger should continue to be able to pollute the lake.

The Badger has already been given an extension. This was their opportunity to correct their pollution problem. Another extension is not warranted or justified!

If the Badger is going to continue to operate the waste should be hauled to a dumpsite and disposed of appropriately.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thanks you,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

It is our responsibility to preserve and protect our environment and its inhabitants. Without a healthy environment there won't be a healthy us.

Sincerely,

Tressa Glassman

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kimberly Perutz

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Amelia Sefton

Grand Rapids, MI 49506-1735

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Patrick Maloney

Chicago, IL 60657-6778

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I didn't know about the S.S. Badger's polluting ways when my wife and I took a honeymoon trip across Lake Michigan. I didn't know about it when I traveled many times to visit my daughter, her husband and family in Wisconsin. I'm sure that if I had known, I wouldn't have used the Badger to transport me.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Robert Hastings

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Lynette Stuhlmacher

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Nancy Palubickinancypalubick

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Water is a precious resource. Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

C. Virginia Finn

**Subject:** United States v. Lake Michigan Trans-Lake Shortcut, Inc., D.J. Ref. No. 90-5-1-1-10771

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I have been am a sailor for years; love Lake Michigan and the idea of the S.S. Badger. But, while I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

As an attorney, I understand that rights are balanced in consideration of taking action. In this case, the S.S. Badger owners have been aware of the problems for many years and have refused to voluntarily take steps to end the danger they create by dumping ash into the Lake. Accordingly, the interests of others in Lake Michigan must outweigh those of the owners of the S.S. Badger to continue to use the Lake as a dump for its toxic by-product in the effort to maximize their profits.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kevin Killeen, Esq.

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Roderic Krapf

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

My family's drinking water comes from Lake Michigan. The owners of the Badger agreed to a deadline to clean up but haven't kept their part of the bargain. Now they're trying to achieve "Historic Landmark" status so they can continue to grossly pollute Lake Michigan for eternity. Please do everything you can to help the people, not the Badger owners.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 24, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Eugene Majewski

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Elaine Stein

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Diane Good

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be must be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Beverly Beatham

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I believe the S.S. Badger provides a valuable service for Wisconsin and Michigan. I have used the ferry a few times but I cannot accept the continuing disposal of coal ash into Lake Michigan. I understand that Lake Michigan Car Ferry, Inc. has known it needs to cease this dumping activity but it has postponed taking any action for years.

I also understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue. I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Linda Prostko

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Anne Moore

  
Ann Arbor, MI 48105-1285
