Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Joe Arevalo

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Robert Anderson

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Eugene Antas

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Robert Luhm

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

J Frederick Bartlett

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

It is hard to believe that, with all of the regulations, restrictions, and rules currently in force, this practice has been allowed to continue for so long.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kimberly Haas

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Dan Keaton

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Melinda Moo

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

It's ironic that on a small scale, I teach children to clean up after themselves, avoid littering, protect the environment and care for the earth, but on a larger scale - we see contradiction. Only when caring for the environment is the first priority instead of the last, will those children and their children's children be able to believe in a future.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Luke Dunscombe

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Colin Cybulski

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

John Sefick

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Steven Pedlow

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Joseph Popp

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

John Novinson

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary C Sengstock

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jacqueline Potoski

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Racquel Baldwin

  
Blue Island, IL 60406-2339

Why can't they store the ash on board until landfall and proper disposal, or how come they are the last coal burner on the lakes? Haven't other ships converted to diesel? Every photo of the ship shows a dark pume of toxic emissions from their stack too!

Sincerely,

Ed McArdle

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Teresa Kohl  
10724 191st St  
Mokena, IL 60448-1078

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Patricia Maryniak

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Thomas Voelker

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Bill King

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

With the continuing difficulty in cleaning up our water and the fact that we force the public to comply in regulations, like water saving toilets and low flow toilets. How do we continue to allow a business to continue to intentionally pollute our waters. They have had years to fix the problem. Most business would have to fix the problem or close their doors. The S.S. Badger should be held to the same standards that ships on the Great Lakes have been held to.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

William Gawne

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Virginia Holden

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jill Bromann

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jeffrey Sanders

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Roberta Paonessa

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Susan Witzel

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

A couple of years ago I went across the lake on the Badger. The black smoke was so heavy and nauseating that I was unable to stay out on the deck, as had been my 60th birthday "bucket list" plan. The blackness covered the sky and darkened vast swathes of the lake. It was heartbreakingly revolting and a travesty for our water environmental heritage!

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

David Burton

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kathy Krway

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Peggy Hutchinson

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Tom Lamb

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Susan Leibowitz

Chicago, IL 60614-1507

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jay Schroed

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

H Espinoza

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

How many jobs do they say this polluting of Lake Michigan save? 20? 40? 100? How many people drink Lake Michigan water? a million? ten million? fifty million?

Sincerely,

Jeff Bantz

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Renee Anderson

Four tons of coal ash a day is a ridiculous amount of pollution to come from something as simple as a car ferry. It's not powering a city. It's moving goods across a lake.

Please end this senseless, unnecessary waste of resources and the systemic destruction of the environment we all share by a private for-profit business.

Thank you.

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mike Glasheen

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

William Boisvenue

These problems are serious, and Lake Michigan is the heart of not only Chicago, but the Midwest. It's imperative that we stop polluting the lake where we get our drinking water from. PLEASE do something, end the pollution, set the right example of how a city should treat its water bodies. As a lifetime Chicagoan, as a student, as an environmentalist, as a 20 year old, I sincerely hope you will take this plea seriously.

Thank you!

Sincerely,

Meg Schmitt

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Aaron Bussey

1651 N. Greenway Ave, Apt 400

Chicago, IL 60640-7944

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Paula Nessel

  
Riverside, IL 60546-2174

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Johanan Mathiau

Michigan City, IN 46360-7417

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Suzanne Sullivan

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Peter Whitney

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sarah Sercombe

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

This special exemption from the pollution regulations is especially egregious as the owners of the S.S. Badger had promised many years ago to upgrade their power plant by shifting to diesel. They never made any attempts to fulfill their promise and now they come begging one more time. It is time to shut this massive polluting machine down.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

William Holleman

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Clarissa Walker

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kenneth Hanisko

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

The Sierra Club, of which I am a proud member, has prepared this nice, polite statement for us to use. Personally, I am horrified that the agencies whose charge it is to protect the citizens and future citizens of this country, can't find a way to control one single, obvious threat to all of our well-being. I am truly astonished and confused. But, here's the polite statement:

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Ryan Gordon

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

The continued use of coal as fuel should include the cost of proper disposal of coal ash when comparing it's continued use to the cost of diesel or other fuels.

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Michael Mikulka

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I am amazed that the Badger has pulled some of the stunts it has tried to keep polluting my drinking water. They have already had an extension and now they want another? In two more years, than what - another extension request? Then maybe they will be able to get around the extension again. Enough already!

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Norman Spielman

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Russell Griffin

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Alex Temple

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Elizabeth Weamer

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Janet Mcconaughey

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

It was with horror that we learned the ferry dumps coal ash into Lake Michigan! We cannot understand why this is allowed by the EPA and DOJ, .

We're begging you to stop this pollution. We've ridden on the SS Badger and know it's nice to have that transportation option but not at the expense of the Lake.

Please make this illegal and enforce it. Please!

Sincerely,

Eleanor Conaway

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Joanne Maggio

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Michael Martin

  
Portage, MI 49002-6424

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I realize it is important to proceed carefully to avoid any legal missteps, the poisoning of Lake Michigan by the Badger has gone on long enough: There are enough threats to Lake Michigan. The Badger's pollution should be stopped now -- by the end of 2013 !!

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following this summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping this year in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Ted Curran

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Bill Pawlicki

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Gayle Bettega

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Nicholas Panico

  
Gurnee, IL 60031-4492

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Scott Harmon

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jeffrey Roseberry

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Owen Pearlman

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jessica Hart

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Ken Schulman

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website. I just don't understand why this is even allowed. Why is this happening? I thought the Great Lakes was precious to us as our greatest natural resource and you allow this company to pollute it daily. What am I missing here that makes this make sense? We sure can't dump our garbage out there but this company can? how much do they pay you for this privilege? There has to be money passing hands for this kind of crime to continue. Whoever is letting this go on should be out of a job Yesterday! What kind of an Assistant Attorney General are you? Is this the only option for this company or just the cheapest one? I'm so mad right now I'm seeing red! How long has this been going on and what are the consequences of it? has anyone checked to see what damage it's doing or doesn't anyone care? Apparently you don't that's exactly why you should be out of a job!

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Suzanne Michael

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Jessamine Belland

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Dennis Jarnecke

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I totally support the suggested ways of strengthening the proposed consent decree listed below. As a Lake Michigan/ Bay De Noc recreational property owner I am extremely concerned with this issue. All of our Great Lakes should be treated like the incredible environmental treasure that they are, everything possible needs to be done to protect and restore their water quality. The S.S. Badger's parent company needs to find ways to 1) safely store their coal ash 2) find ways to recycle it or 3) stop using coal.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Ann Carter

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

I love the Badger: it's a historical treasure and a fun ride, but for too long its owners have irresponsibly spent time and money playing political games instead of doing the right thing by refitting the ship to be less polluting.

The latest proposed consent decree with the Department of Justice and EPA is a good start, but it should be stronger. It should declare that cessation of coal ash pollution by the S.S. Badger MUST start after the 2014 summer season with no more extensions. It should also stipulate steeper percentage reductions in the ash dumping during the next two years and carry increased civil penalties for violations. Finally, there should be monthly reporting--available to the public--of how much ash is being dumped into the lake.

The owners have thumbed their noses at previous attempts to reduce this egregious ongoing pollution. This time the government needs to make these needed changes stick.

Sincerely,

Huck Parks

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Kevin Marshall

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Beverly Finlayson

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Every extension given so far has resulted in little action and only led to further requests for extensions. Now is the time to end the polluting activities of the S. S. Badger once and for all.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season. Every extension given so far has resulted in little action and only led to further requests for extensions. Now is the time to end the polluting activities of the S. S. Badger once and for all.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Peter Schultz

Downers Grove, IL 60516-5128

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Claudia Palmer

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Cameron Flint

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Roger Gonnering

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Patricia Rochehuber

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Chris Kripke

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

My husband and I took the SS Badger over to Manitowac, WI in 2002. During our trip over the water, there was a thick plume of smoke that you could see for miles back. The SS Badger makes 4 trips back and forth daily. With all the coal being burned for 4 trips, I can imagine how much mercury is in Lake Michigan!! While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Bunker

Chicago, IL 60646-1210

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

I would not be surprised if the route of the S.S. Badger can be followed by the ongoing dumping into Lake Michigan. When I was not aware of this grossly defiant attitude by the S.S. Badger ownership, I had ridden on it. I can say that it is unbelievably filthy to the point where you need to stay inside to avert ash on everything. Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Randy O'Connell

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Trycenia Upshaw

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Douglas Michalek

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Joyce Radtke

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Susan Schaid

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

John Lawrence

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Barbara Sherman

Downers Grove, IL 60515-0494

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Tessa Weyh

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

As someone who grew up using this ferry to get from my home in Wisconsin to my grandparents' cabin in Northern Michigan, I understand the utility of this ferry. That being said, this type of dumping is so far beyond acceptable that it is an embarrassment to me as a citizen of the Great Lakes region. The negative consequences of persistent dumping of chemical/physical waste into the Lake demand a damning ruling of the practice.

Thank you for your consideration.

Sincerely,

Kirke Elsass

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Justin Greer

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Sandra Earley

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

The S.S. Badger operators should understand more than almost anyone the absolute need for protecting this awesome and awe inspiring Great Lake. We now live in a 21st Century world and it is time for the S.S. Badger to move forward with the rest of us. As we work hard to remediate many generations worth of pollution to this lovely lake, we're only moving backwards if we continue to allow dumping of anything. The goal of the Federal Water Pollution Control Act, also known as the Clean Water Act, was to move to zero pollution, not to allow just a little bit of pollution. We need to return to the original goals of the Clean Water Act, and get back on the path toward increasingly cleaner water.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this very serious pollution issue, I ask you to consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated and spelled out by both parties that there will be no further time extensions for the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution, with steep fines assessed for each day they pollute.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger and shorter path towards compliance. Change will not come incrementally with technology changes, it will come either all at once, or at least in large chunks. The goal should not be to be closer to compliance - but to completely \*stop\* polluting Lake Michigan with coal ash.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of my input regarding this issue. .

Sincerely,

Rita Chapman

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

Honestly, this ship should NOT BE ON LAKE MICHIGAN. This 2013! Why is it still operating? As stewards of the Great Lakes, it is our job to protect them from pollution. There is absolutely NO reason why the S.S. Badger should have special privileges to dump coal ash into our beautiful Lake Michigan. None.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Harold Bland

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Donette Erdmann

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Mary Pritchard

**Subject:** United States v. Lake Michigan Trans-Lake Shortcut, Inc., D.J. Ref. No. 90-5-1-1-10771

Apr 23, 2013

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

David Goldsmith

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Tom Agosta

  
Detroit, MI 48226-2114

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Daniel Bierman

Assistant Attorney General, U.S. DOJ-ENRD

Dear U.S. DOJ-ENRD,

For too long, the Lake Michigan Car Ferry, Inc.'s S.S. Badger ship has dumped too much coal ash into Lake Michigan. It's time for this pollution to come to a stop. The S.S. Badger should clean up its operations and stop polluting our Great Lakes.

While I understand the U.S. Department of Justice and U.S. Environmental Protection Agency's view that a consent decree may offer a quicker resolution to this pollution issue, I request that you consider the following ways of strengthening the proposed consent decree:

There should be an explicit agreement stated by both parties that they will not request any further extensions to the cessation of coal ash pollution by the S.S. Badger following the 2014 summer season.

The U.S. DOJ and the U.S. EPA should consider increasing the civil penalties for the S.S. Badger's continued pollution.

The U.S. DOJ and the U.S. EPA should consider providing for steeper percentage reductions in the S.S. Badger's coal ash dumping over the next two years in order to have a stronger path towards compliance.

The S.S. Badger should provide monthly reporting of how much coal ash is being dumped into Lake Michigan, and that information should be made publicly available on an easily accessible website.

Thank you for your consideration of these provisions to strengthen and improve the proposed consent decree.

Sincerely,

Maria Miller

  
Grand Rapids, MI 49505-3618
