

US EPA ARCHIVE DOCUMENT

### CEIP Design Details: Proposed State and Tribal Shares of Matching Pool

EPA is proposing an approach to determining each state’s and tribe’s pro rata share of the matching pool, and is proposing to divide each jurisdiction’s share into a reserve for renewable energy projects and a reserve for low-income community projects. This apportionment is shown in the table below. As finalized in the CPP, the share of the matching pool for each state and tribe with affected sources is calculated in a proportional manner. The proportional share is based on CO<sub>2</sub> reductions from 2012 levels that affected power plants in each state or tribe are required to achieve relative to those in other states or tribes. EPA is taking comment on this approach. For more information, see Section III.A of the preamble.

|   | Available Matching Allowances (mass-based plan states) |                                    |                    | Available Matching ERCs (rate-based plan states) |                                    |                    |
|---|--|------------------------------------|--------------------|--|------------------------------------|--------------------|
|   | Renewable Energy Reserve (50%)                         | Low-Income Community Reserve (50%) | Total Share (100%) | Renewable Energy Reserve (50%)                   | Low-Income Community Reserve (50%) | Total Share (100%) |
| Alabama                                   | 4,683,458  | 4,683,458                          | 9,366,916          | 5,854,323  | 5,854,323                          | 11,708,646         |
