RE: Notice of intent to continue the approval to store Polychlorinated Biphenyls (PCB)

Dear Ms. Setnicar

The current Approval to Commercially Store Polychlorinated Biphenyls (PCB's) for Environmental Recycling (ER) expires on June 27, 2010. ER requests our approval as a Commercial Storage Facility to continue for an additional ten years.

Environmental Recycling is a full service waste management company providing over 6500 business large and small professional services for 15 years. As a PCB commercial storage facility, Universal Waste destination facility, Hazardous Waste Hauler, Used oil Transfer facility, and RCRA Part B Hazardous Waste Storage Facility, we provide professional waste management services for all of our customers.

In May 2008 ER was granted EPA approval to store hazardous waste in our facility. As a Lamp recycler we store all types of customer generated lamps prior to processing/recycling. ER maintains a fully funded closure for the RCRA permit. This closure is separate from the closure fund established for the original PCB commercial storage approval. The PCB storage approval closure is fully funded. The trust has been evaluated and maintained yearly to ensure the appropriate funds are available. An updated closure plan with current information is included with this submittal.

Please see the attached original PCB Commercial Storage application with updated information. The original content will remain in the text and all updates will be identified with a single line strikethrough identifying and edit has been made. Any new content will be identified in bold text. The updates will not affect Environmental Recycling's ability to safely and effectively manage PCB materials.

Environmental Recycling would request in writing that during the review process for re-approval the current storage approval remain valid.

If you have any questions or require any further information please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'Todd Hendrick', is written over a horizontal line.

Todd Hendrick
