Gentlemen:

Please find enclosed EPA Form 3510-1, Application Form 1 - General Information, and EPA Form 3510-3, Hazardous Waste Information, of the Consolidated Permits Program for the Carboline Company located at 125 Fairgrounds Road in Xenia, Ohio.

The forms are being submitted so that Carboline can register its paint manufacturing plant as a storage facility under the RCRA regulations and continue its storage operations by receiving interim authority from EPA.

Carboline is registered with EPA as a generator of hazardous waste (EPA ID #OHDO30963615). Currently, all hazardous waste is removed from the site within ninety days after the date of its initial accumulation. However, in the near future, Carboline wishes to operate a spent solvent reclamation still on-site. This operation may necessitate the storage of hazardous wastes on-site for periods longer than ninety days. It is for this reason that Carboline requests a permit to store hazardous waste at the Xenia facility.

If there are any questions concerning this application, please do not hesitate to contact me.

Sincerely,

William J. Stewart
W. J. Stewart
Manager of Corporate Engineering
