PROJECT NARRATIVE

HOC300411

The results reported herein are applicable to the samples submitted for analysis only.

This report shall not be reproduced except in full, without the written approval of the laboratory.

The original chain of custody documentation is included with this report.

Sample Receipt

Sample WGK-BIGMO-TMX-INF-A listed on the chain of custody appears not to have been collected. Only one sample was received and the client was notified.

Custody seals were not present.

Quality Control and Data Interpretation

Unless otherwise noted, all holding times and QC criteria were met and the test results shown in this report meet all applicable NELAC requirements.

EPA methods TO-14A and TO-15 specify the use of humidified “zero air” as the blank reagent for canister cleaning, instrument calibration and sample analysis. Ultra-high purity humidified nitrogen from a cryogenic reservoir is used in place of “zero air” by TestAmerica Knoxville.

The sample was received on 03/30/10 in a Tedlar bag and transferred into a Summa Canister within 72 hours of sampling.
