Urban Waters Flagship Update

FY2010 – 4th Quarter

Description of Flagship Effort

- The Urban Waters effort falls under the “Expanding the Environmental Conversation with Communities” Flagship Theme
- The goal is to help communities, especially underserved communities, access, restore and benefit from their surrounding waters
- EPA is leading an Urban Waters Federal Partnership including eleven agencies and support from the White House Domestic Policy Council to integrate federal support from communities
- EPA is working to develop new Web 2.0 tools for community-to-community information sharing, reach out to non-digital audiences, and provide technical assistance to communities
- Why this effort?
 - Urban waters throughout the country are substantially impaired, impact large populations, and are typically entangled in complex issues
 - When urban rivers, lakes, streams or wetlands are inaccessible or degraded, the surrounding communities miss the benefits of community stability and growth that clean urban waters bring
- There is a special emphasis on environmental justice
