Appendix R - CEMS Zero and Span Calibration Drift Data

This appendix contains the automatic daily zero and span calibration drift data as recorded by the data logger for two of the PM CEMS (Durag and ESC).   These data are presented in a comma-delimited text (CVS) format and titled "yyy-drxx.csv" using abbreviations "yyy" for the PM CEMS name (e.g., dur for the Durag) and "xx" for the months (e.g., January = 01).
