

Appendix G - Preliminary PM CEMS Test Sites Supporting Data

This appendix contains the Method 5 and PM CEMS data and results produced from the two preliminary PM CEMS test programs conducted at an Rollins and LaFarge HWC facilities. All information is organized in the same manner for the two similar tests. Calibration relations as specified in PS 11 are presented in a comma-delimited text (CVS) format and titled “rol-yy.cvs” and “laf-yy-q”. At each of the preliminary sites there were two monitor “yy” represent these monitors, “q” represents either a “c” for calibration or “r” for response calibration audits. All the corresponding figures are contained in “pre-fig.pdf”.
