

US EPA ARCHIVE DOCUMENT

1,2,4,5-Tetrachlorobenzene

CAS Number: 95-94-3

What is 1,2,4,5-tetrachlorobenzene?

1,2,4,5-Tetrachlorobenzene is an odorless man-made substance that can range in appearance from a colorless crystal to a white flaky or chunky solid.

irritate or bother your eyes and skin and can affect your ability to breathe. It can also affect the mucous membranes. In addition, laboratory animals exposed to 1,2,4,5-tetrachlorobenzene experienced lesions, or changes to the liver and kidney.

What is 1,2,4,5-tetrachlorobenzene used for?

1,2,4,5-Tetrachlorobenzene is used as an intermediate or building block to make herbicides, insecticides and defoliants. It is also used to make other chemicals like 2,4,5-trichlorophenol and 2,4,5-trichlorophenoxyacetic acid.

What levels of exposure have resulted in harmful health effects?

The U.S. Environmental Protection Agency established an oral reference dose (RfD) of 0.34 milligrams per kilogram per day for oral exposure to 1,2,4,5-tetrachlorobenzene. The RfD is an estimate of the highest daily oral exposure humans can be exposed to without resulting in harmful effects.

How can 1,2,4,5-tetrachlorobenzene enter and leave your body?

1,2,4,5-Tetrachlorobenzene can enter your lungs if you breathe contaminated air. It can enter your body if you eat contaminated food or be absorbed through your skin if you come into contact with the substance.

Where can you get more information?

Contact your state health or environmental department, or:

Agency for Toxic Substances and Disease Registry
Division of Toxicology
1600 Clifton Road, N.E., E-29
Atlanta, Georgia 30333

How can you be exposed to 1,2,4,5-tetrachlorobenzene?

If you work in a factory that makes or uses 1,2,4,5-tetrachlorobenzene, you can be exposed by breathing contaminated air. You could also be exposed if you eat contaminated food like fish or if your skin comes into contact with the substance.
