

US EPA ARCHIVE DOCUMENT

Appendix F: Import/Export Federal Registers

Request for Information Concerning Transfrontier Movements of Wastes Destined for Recovery Operations Within the OECD Area (64 FR 44722; August 17, 1999)

Requests information about harmonizing the OECD waste identification procedures with the identification procedures of the Basel Convention. The rule lists proposed changes to the OECD green, amber, and red lists of wastes in order to correspond these listings with Annex VIII and IX of the Basel Convention.

Imports and Exports of Hazardous Waste: Implementation of OECD Council Decision; Final Rule (61 FR 16290; April 12, 1996)

Identifies wastes subject to a graduated system of procedural & substantive controls when moved across OECD national borders for recovery. The rule modifies the procedural controls governing imports/exports of waste when shipped for recovery among OECD countries.

Notification Concerning the Basel Convention (57 FR 20602; May 13, 1992)

This information-only notice describes the development and major provisions of the Convention. It also discusses the potential impacts that requirements imposed by ratifying countries have on U.S. waste importers and exporters. Contains complete text of the Basel Convention.

Hazardous Waste Management System; Final Rule (51 FR 28664; August 8, 1986)

This rule promulgates final requirements regarding exports of HW. These regulations prohibit exports of HW unless certain conditions are met, including advance written notification to EPA, prior consent by the receiving country, and conformance of shipment to such consent.

Hazardous Waste Management System; Proposed Rule (51 FR 8744; March 13, 1986)

Pursuant to HSWA and section 3017 of RCRA, these regulations propose requirements pertaining to imports and exports of HW.

Hazardous Waste and Consolidated Permit Regulations (45 FR 33140; May 19, 1980)

This rule amends the February 26, 1980, final rule by requiring a specific address on the notification as a means to expedite EPA's handling of export notification information during international shipments.

Overview and Definitions of Generator Transporter Regulations; Final Rule (45 FR 12722; February 26, 1980)

First rule to promulgate requirements for international shipments of hazardous waste. These regulations essentially parallel those pertaining to domestic shipments of hazardous waste, requiring generators to initiate a manifest, use proper labels and containers, offer placards, and comply with the recordkeeping and reporting requirements of RCRA.
