11th International Electronics Recycling Congress IERC 2012
January 18 – 20, 2012, Salzburg, Austria

Patronage:
Federal Ministry of Agriculture, Forestry, Environment and Water Management, Austria
European Electronics Recyclers Association (EERA)
European Lamp Companies Federation (ELC)
European Committee of Domestic Equipment Manufacturers (CECED)
DIGITALEUROPE
ORGALIME
PlasticsEurope
WEEE Forum
Back in the Eighties, Austria embarked on a journey towards waste management. Thanks to the waste management policy of the Nineties, high standards of safety, the efficient use of resources and product responsibility are now integral components of our modern waste policy. On the other side the production of goods primarily depends on the constant exploitation of raw materials. Both the enormous consumption rate of fossil fuels and the amounts of mineral raw materials being exploited are continuing to rise. This gigantic turnover of materials prompted by the economy is leading to ever greater amounts of waste and harmful substances. This could be remedied by curbing the use of materials and increasing the use of waste management, which takes into account the possibility of re-use and recovery in the goods production phase already and thus helps prevent harmful substances.

The root of sustainable economic management is increased eco-efficiency, in which the increase in material efficiency takes on greater importance and is decisive for waste management.

The electrical and electronics sector is marked by rapid product changes. Technical innovation and market expansion has led to an ever increasing rate of goods being replaced. More and more uses are added and there is scarcely an area of modern life that does not involve the use of electrical and electronic equipment. This development has led to a marked increase in the number of electrical and electronic devices. At the European level, the need for more harmonisation has been recognised as a means to come up with new European solutions of the pan-European waste electrical and electronic equipment issue, not least due to the numerous national developments and efforts.

The Austrian implementation of the European Union Directives by the Waste Electrical and Electronic Equipment Ordinance is into force for more than 6 years now and it is a full success story. Because of the joint solution with lowest possible administration expense and expenditure for producers and distributors the collection and recovery could work flawlessly. Owing to the environmental awareness and the co-operation of all citizens Austria exceeded the European Union collecting goal in the previous year by more than 130%.

The transfer of knowledge and the exchange of experience constitute important elements for introducing good solutions and comparable standards in the whole world. I am looking forward to the world of experts meeting in Austria, in Salzburg on the occasion of the IERC 2012, and I wish every success and a nice stay.
Welcome to Salzburg – the hometown of Amadeus Mozart and “Red Bull”

In the name of the Steering Committee I’m welcoming you to Salzburg for the 11th International Electronics Recycling Congress.

For our industries the year 2011 will be probably another good year. Sales, volumes, margins get better and better. It’s not only one of the fastest growing industries – but it is also one of the best and most interesting businesses. In our industry you need common knowledge about technologies, raw materials, commodity prices, legal requirements for collection, transportation, recycling and you have to take care of the constant change of the electronics products we are talking about.

There are still young entrepreneurs who start their businesses in garages, but no longer in Europe and North America. These pioneers still exist – in Asia. Some of them became the world’s largest recycling companies. We will definitely talk about this at the IERC 2012.

Regulations and new laws do not hurt our recycling industry, but the unlevelled international playing field and the total lack of law enforcement are the critical factors of our economy. We definitely need the help of the politicians and authorities of our civilized countries.

EU is trying to preserve raw materials in order to supply European industries. But at the same time, EU does not make sufficient action against illegal export of wastes to Africa and Asia. It is said that rare earth materials are critical. But why does EU allow the export of used electric motors to Asia? Electric motors contain magnets – one of the major sources for rare earth elements!

IERC 2012 will give you the platform to discuss such issues. It is a growing, innovative, neutral and very effective platform to meet clients, listen to the news of the speakers, discuss with the authorities, watch the hottest products of the exhibitors and make business in a relaxed atmosphere.

I look forward to meeting you in beautiful Salzburg – a town full of pioneers and success stories.

DR VIKTOR HAEFELI
Chairman of the Steering Committee International Electronics Recycling Congress
KEY MESSAGES

MICHAEL WIDMER
Bank of America Merrill Lynch
Global Research Strategist
United Kingdom

“HOW DO RAW MATERIAL PRICES DEVELOP”

ROSALINDE VAN DER VLIES
European Commission
DG Waste Management
Deputy Head of Unit
Belgium

“EUROPE’S GOAL OF BECOMING A RESOURCE-EFFICIENT ECONOMY AND A RECYCLING SOCIETY”

“SUSTAINABLE RECYCLING IS THE BASIS TO TACKLE THE SCARCITY OF RAW MATERIALS”
The 11th International Electronics Recycling Congress (IERC 2012) will be held at the:

Salzburg Congress
Auerspergstraße 6
5020 Salzburg, Austria
Phone: +43 662 889870
Fax: +43 662 88987210
www.salzburgcongress.at

Salzburg Congress is located in the centre of Mozart’s city. You can easily reach the congress centre by all modes of transport.

Salzburg – The city of Mozart
UNESCO nominated Salzburg’s city centre as part of the world’s cultural and natural heritage. Now the city officially ranks among the most beautiful cities in the world, certainly one deserving a high degree of protection.

For the participants of the congress a number of rooms are held at a special rate until December 16, 2011 at the hotels mentioned below. Reservation after this date will be subject to space and rate availability. If you wish, you may also extend your stay at the same rate.

Sheraton Salzburg Hotel *****
Auerspergstraße 4, 5020 Salzburg

CONGRESS PROGRAM IERC 2012

TUESDAY, JANUARY 17, 2012
17.00 – 19.00 Registration

WEDNESDAY, JANUARY 18, 2012
08.30 – 09.30 Registration, welcome coffee and tea

Session 1: Keynote speakers from industry and authorities
Session Chairman: Dr Viktor Haefeli, Chairman of the Steering Committee
09.00 – 09.15 “Welcome and Introduction”
Dr Viktor Haefeli, Chairman of the Steering Committee
09.15 – 11.00 KEYNOTE SPEAKERS
“How do raw material prices develop?”
Michael Widmer, Bank of America Merrill Lynch, United Kingdom
“Europe’s goal of becoming a resource-efficient economy and a recycling society”
Rosalinde van der Vlies, European Commission, Belgium
“What electronic waste can teach us”
Jim Puckett, Basel Action Network (BAN), USA
11.00 – 11.30 Coffee break

Session 2: New challenges
Session Chairman: Prof. Hsiao-Kang Ma
National Taiwan University, Taiwan
14.30 – 15.00 “Li-ion batteries – Mobile energy and dangerous goods in WEEE”
Imke May, Stiftung Gemeinsames Rücknahmesystem Batterien, Germany
15.00 – 15.30 “Recycling of high-purity selenium from CIGS solar cell materials”
Anna Gustafsson, Chalmers University of Technology, Sweden
15.30 – 16.00 Coffee break

Session 3: Standards
Session Chairman: Dr Andreas Röthlisberger
WEEE Forum, Switzerland
16.00 – 16.30 “Reuse criteria for WEEE”
Dimitri Strybos, OVM – Public Waste Agency of Flanders, Belgium
16.30 – 17.00 “Different recycling standards in the EU and the US”
Jean Cox-Kearns, DELL Global Takeback Ireland
17.00 – 17.30 “Lifting a tip of the veil on WEEELABEX conformity verification”
Dr Robert Hediger, WEEE Forum, Belgium

Presenting the Cowbell Award 2012
13.00 – 14.30 Lunch

Parallel Session 2: Country reports
Session Chairman: Wendy Neu Hugo Corporation, USA
14.30 – 15.00 “The recovery and recycling industry in Spain”
Alicia García-Franco Zúñiga, Spanish Federation for recovery and recycling Spain
15.00 – 15.30 “WEEE management in Romania”
Marius Costache, GreenWEEE International SA, Romania
15.30 – 16.00 Coffee break

Parallel Session 3: New processes I
Session Chairman: Manfred Fahrner
ALBA R-plus GmbH, Germany
16.00 – 16.30 “Novel distributed solutions for sustainable and economic recovery of base & precious metals from e-waste”
Privathini Bradoo, BioMine, USA
16.30 – 17.00 “How can you reach the highest environmental standards by simple and efficient WEEE-recycling-technology?”
Helmut Oberguggenberger, MeWa Recycling, Germany
17.00 – 17.30 “Optical sorting in high-definition of WEEE”
Felix A. Holtenstein, MSS, Inc., USA
17.30 – 18.30 “Bierfass” reception in the exhibition hall sponsored by

19.30 Networking dinner
THURSDAY, JANUARY 19, 2012

08.00 – 09.30 Welcome coffee and tea

09.00 – 09.30
- **Session 4: Flat panel display recycling**
  - Session Chairman: Dr Sven Grieger, ENE EcologyNet Europe GmbH, Germany
  - “Feasibility research of E-waste recycling processes in Vietnam: An investigation with CRT glass and PCBs at the small communities”
  - Prof. Do Quang Trung, Vietnam National University of Hanoi (VNUH), Vietnam

09.30 – 10.00
- “Risks and opportunities in the recycling of flat panel displays - Results of a Swiss study”
  - Heinz Boeni, Empa – Materials Science & Technology, Switzerland

10.00 – 10.30
- “Application of environmental practices in the commercial recycling of liquid crystal”
  - Dr Timothy McDonnell & Dr Karl Williams, University of Central Lancashire, United Kingdom

10.30 – 11.00 Coffee break

11.00 – 11.30
- **Session 5: Strategic metals recycling**
  - Session Chairman: Stefan-Georg Fuchs Aurubis AG, Germany
  - “Reconstituting rare earth permanent magnets from process and end-of-life scrap. A recycling process that maximizes the recovery of added value”
  - Jack Lifton, Technology Metals Research LLC, USA

11.30 – 12.00
- “The new Rare Earths urban mine:Rhodia launches an industrial unit for RE recycling from used low consumption lamps”
  - Nicolas Barthel, Rhodia Rare Earth Systems France

13.30 – 14.00
- **Session 6: Lighting & lamp recycling**
  - Session Chairman: Dr Thomas Marinelli Philips Lighting B.V., Netherlands
  - “Lamp recycling in changing markets”
  - Christian Bonmann, DELA GmbH Recycling Solutions, Germany

14.00 – 14.30
- “The future of LED lighting: Facts & figures”
  - Harry Verhaar, Philips Lighting B.V., Netherlands

14.30 – 15.00 Coffee break

15.00 – 17.00 PANEL DISCUSSION: “Who takes the responsibility for collection?”
- “Facts & figures on collection”
  - Leo Donovan, WEEE Ireland, Ireland
  - Victor Durat, IBM Corporate Environmental Affairs, Spain
  - Dr Jaco Huisman, United Nations University – UNU, Netherlands
  - Dr Kirstie McIntyre, Hewlett-Packard, Europe, Middle East and Africa
  - Moderator: Norbert Zonneveld, EERA, Netherlands

Participants: Carl Huijbregts, Inspectorate for Environment and Transport, Netherlands
  - Gerhard Jokic, REMONDIS Electrorerecycling GmbH, Germany
  - Luigi Meli, CECE, Belgium
  - Jan-Willem Scheijgrond, Philips, Netherlands
  - Jan Vlak, Wecycle, Netherlands

12.00 – 13.30 Lunch

from 17.00 Cocktail reception in the exhibition hall
PLANT TOURS IERC 2012
FRIDAY, JANUARY 20, 2012

08.30  Departure by bus to Montanwerke Brixlegg AG
10.30  Arrival at Montanwerke Brixlegg AG
10.30 – 12.30 Visit of the copper smelter
14.30* Arrival at Salzburg Airport
14.45  Arrival at the Salzburg Congress Centre

Montanwerke Brixlegg AG is Austria’s only copper producer and has a history stretching back more than 500 years. Today Montanwerke is one of the leading secondary smelters in Europe.

Core business is recycling copper and other precious metals from scrap and in further steps process it into cathodes and billets. For these two highly pure copper products the total output is over 200,000 tons per year.

www.montanwerke-brixlegg.com

* No guarantee on arrival time due to traffic conditions.

100%
RECYCLING

99,99%
COPPER CONTENT

Each year, the Montanwerke Brixlegg AG processes approximately 130,000 tons of copper containing secondary material. The recovered highly pure copper has a copper content of 99,99%. This excellent quality and a wide range of application possibilities have made the brand “BPX” well known worldwide.

More information about recycling and the production you can find under www.montanwerke-brixlegg.com
PLANT TOURS IERC 2012
FRIDAY, JANUARY 20, 2012

MÜLLER-GUTTENBRUNN, METRAN AND MBA POLYMERS, AMSTETTEN/KEMATEN

08.00  Departure by bus to Müller-Guttenbrunn Group
10.00  Arrival at the above mentioned 3 companies
10.00 – 14.30  Visit of the shredder plant of Metall Recycling Mü-Gu
               Visit of the metal separation plant of Metran
               Visit of the plastic recycling plant of MBA Polymers
17.00*  Arrival at Salzburg Airport
17.15  Arrival at the Salzburg Congress Centre

The Metall Recycling Mü-Gu in Amstetten de-pollutes the E-Waste in an environ-mentally friendly manner and each of the de-polluted fractions are disposed of in line with the E-Waste directive. The selective shredder separates high quality ferrous metal scrap; most non ferrous metals are further extracted and concentrated by type of metal (copper, aluminium etc.) by the company Metran GmbH.

Metran also creates a valuable plastics fraction, which is delivered to MBA Polymers for further processing. Even metals <1mm can thus be extracted and re-introduced into the recycling cycle. MBA Polymers recovers high-quality post-consumer ABS, HIPS and PP resins for use in demanding applications. Premium grades are offered under the EvoSource™ brand and are either UL-HB recognized, impact modified and/or available in different colours – replacing virgin plastics and closing the loop. These post-consumer plastics reduce energy consumption by over 80% and protect the environment from between 1 and 3 tons of CO2 emissions, compared to the production of one ton of “virgin” plastics from petrochemicals. The technical visit will include the MBA Polymers plant in Kematen/Ybbs in Lower Austria, which is one of the most advanced plastics recycling facilities in the world, covering approximately 20,000 m², with a processing capacity of 40,000 tons per year. MBA Polymers Austria employs a staff of 75 highly qualified personnel, operating and supervising the individual production stages, quality assurance, and preventive maintenance.

* No guarantee on arrival time due to traffic conditions.

Your partner means business
Müller-Guttenbrunn Group

We utilize raw materials from waste fractions
Your partner for e-waste, end-of-life vehicles and metals

SAUBERMACHER DIENSTLEISTUNGS AG
UNTERPREMSTÄTTERN

08.00    Departure by bus to Saubermacher Dienstleistungs AG
12.00    Arrival at Saubermacher Dienstleistungs AG
12.00 – 14.30 Visit of the e-cycling-park with MeWa Querstromzerspaner in Unterpremstätten
15.00*   Arrival at Graz Airport
19.00*   Arrival at Salzburg Airport
19.15    Arrival at the Salzburg Congress Centre

Saubermacher is Austria’s leading private waste disposal and recycling specialist. The company is regarded as a highly competent partner for an entire array of environmental issues for more than 1,600 local authorities and 40,000 customers within industry, trade and commerce in Austria.

As an internationally successful company, Saubermacher manages about 100 locations and 75 joint ventures in Austria, Slovenia, Hungary, Czech Republic, Romania, Croatia, Serbia and Macedonia from its headquarters in Feldkirchen bei Graz.

PLANT TOURS IERC 2012
FRIDAY, JANUARY 20, 2012

S+S SEPARATION AND SORTING TECHNOLOGY GMBH
SCHÖNBERG (GERMANY)

08.00
09.30
10.30
10.30 – 13.00
16.00*
16.15

Departure by bus to S+S Separation and Sorting Technology
Introduction of S+S Sorting Technology, company tour and demonstration of S+S sorting machines in action in the S+S technical center
Arrival at S+S Separation and Sorting Technology
At the plant tour to S+S Separation and Sorting Technology GmbH you will get an introduction about the company. After a plant tour you will see some sorting and separation trials in the S+S laboratory.
The VARISORT COMPACT CMN sorter will be used to demonstrate different sorting tasks for the e-scrap recycling industry like metal separation, copper wire separation and plastic type separation.
Arrival at Salzburg Airport
Arrival at the Salzburg Congress Centre

At the plant tour to S+S Separation and Sorting Technology GmbH you will get an introduction about the company. After a plant tour you will see some sorting and separation trials in the S+S laboratory.
The VARISORT COMPACT CMN sorter will be used to demonstrate different sorting tasks for the e-scrap recycling industry like metal separation, copper wire separation and plastic type separation.

www.sesotec.com

For more than 30 years, S+S has been a leading manufacturer of metal detection and sorting technology for companies worldwide. We are focused on providing the highest quality products while utilizing state of the art technology. This attention to detail ensures reliable performance under the harshest operating conditions.
By designing solutions tailored specifically for our customers, we produce results that ensure maximum return on investment.

Sorting examples for e-scrap:
- Separation of CRT glass
- Separation of heavy metals
- Wire separation
- Separation of PC boards
- Plastic type separation
- Metal separation

PLANT TOURS IERC 2012
FRIDAY, JANUARY 20, 2012

VOESTALPINE AG, LINZ

09.00  Departure by bus to voestalpine AG
11.00  Arrival at voestalpine AG
11.00 – 14.00  Guided tour at voestalpine Stahlwelt and plant tour at the factory premises of voestalpine in Linz
16.00*  Arrival at Salzburg Airport
16.15  Arrival at Salzburg Congress Centre

Around the world, voestalpine produces, processes and develops steel to make high-quality products and innovative solutions. Be our guest – come and visit voestalpine’s world of discovery, where you can learn more about steel and the countless ways it can be used. Discover the fascinating world of steel. Discover the voestalpine Stahlwelt.

Our steel plant is the cleanest and most innovative in the world. A claim many steel plants make – but how many give anyone a glimpse of what’s on the other side of the factory gate? We do, and we even go one step further: After you visit the exhibition in the voestalpine Stahlwelt, you’re in for an exciting plant tour.

Our multimedia buses will transport you deep inside the plant grounds covering 5.2 square kilometers. Directly to the production facilities, where you will get a behind-the-scenes look at the steel-making process.

Please note: that you must wear sturdy, closed-toed shoes (no sandals, flip-flops, crocs, etc.). We also recommend you wear stain-resistant clothing.

www.voestalpine-stahlwelt.at

* No guarantee on arrival time due to traffic conditions.
A large exhibition area will be offered to companies wishing to display their products or advertising materials. The fees for an exhibition booth for the full time of the congress are:

- Booth 6 m² 2 m x 3 m EUR 3'000.–
- Booth 12 m² 3 m x 4 m EUR 4'500.–

Space is limited, so take your chance and book your exhibition booth today!
On Wednesday, January 18, a special networking dinner will be organized in beautiful Salzburg.

Do not miss this perfect possibility to meet your business partners and register to this evening now!

Networking Dinner

Registration for the congress should be made by means of the registration form. Participants registering and paying before November 30, 2011 will benefit from a reduced registration fee. The registration fee includes congress, entrance to the exhibition, proceedings and luncheons.

The city of Salzburg, best known as the birthplace of Mozart, has a very proud history and is able to magic its visitors back in time. Salzburg is a World Metropolis, Cultural Centre, Festival and Mozart city all rolled into one.

Numerous cultural museums and exhibitions are waiting to be visited. Salzburg offers Tradition and Innovation and also of course outstanding Architecture. There are only a very few cities with such outstanding baroque work within its many churches. Also worth a mention is the Hohensalzburg Fortress a symbol of the Mozart city and the largest complete fortress in middle Europe.

Salzburg, situated on the Salzach (Salt) river is also a city embedded within an imposing mountain world. Discover and experience with us this fascinating city and the amazing natural beauty within the area.

Why not extend your stay in Salzburg and enjoy a beautiful weekend in the mountains only 1 hour car drive from Salzburg?

Obertauern is one of the alpine skiing resorts where snow is guaranteed. And that means: ideal skiing conditions from the end of November until beginning of May!

Obertauern is situated in the fantastic Salzburg mountain world at altitudes between 1630 m and 2313 m. There you will also have great après ski, exciting nightlife, modern hotels, top wellness and fitness facilities and last but not least a wonderfully relaxed holiday atmosphere!

We have organized a skiing weekend in the beautiful hotel “Das Seekarhaus” www.seekarhaus.at which is situated in the middle of the mountains. A limited number of hotel rooms are reserved, so please book today!

Come and enjoy together with your friends and business partners a great, unforgettable weekend with lots of snow, fun and “Jägertee”.

For booking contact: info@icm.ch
WHO SHOULD ATTEND?

- Original electronic equipment manufacturers (OEMs)
- Electronic components suppliers
- Electronic equipment importers and dealers
- Retailers
- Ferrous & non-ferrous metal traders
- Collection and transportation companies
- Recycling and dismantling companies
- Shredding companies
- Plastics industry
- Non-ferrous metal industry
- Ferrous and stainless steel industry
- Environmental authorities
- Universities and research institutes
- Laboratories for material science

6th World Recycling Forum WRF 2011
International Conference & Exhibition on Electronics, Battery and Car Recycling
November 15 – 18, 2011, Hong Kong

The next top-quality recycling forum will focus on:
- How to invest into the raw materials business in Asia
- OEM’s success and challenges regarding recycling
- Update of the booming recycling business in China and India
- Best available technologies for dismantling, sorting and recycling
- Global trade and transboundary movement of raw materials and waste
- Update on worldwide recycling laws and regulations

An exhibition area is integrated into the conference facility, where vendors meet their clients. Cocktails receptions and a networking dinner create an excellent atmosphere to get in touch with your business partners, friends and competitors. Plant tours to leading manufacturing and recycling companies in the vicinity of Hong Kong, Shenzhen and Guangzhou are offered to all participants.

12th International Automobile Recycling Congress IARC 2012

The next top-quality congress in ELV recycling will focus on:
- How do car manufacturers and the industry close the recycling loop?
- New cars and new recycling technologies
- Where are the new cars sold? – Where are they going to be recycled?
- Best available recycling technologies
- Reports about illegal export of wrecked vehicles
- Hybrid vehicle dismantling and parts reuse
- European ELV Directive – A monster with no teeth?
- Recycling – High-tech or low-cost technology?

An exhibition area is integrated into the conference facility, where vendors meet their clients. Cocktails receptions and a networking dinner create an excellent atmosphere to get in touch with your business partners, friends and competitors. Plant tours to leading recycling companies and car manufacturers in the vicinity of Budapest are offered to all participants.
