

US EPA ARCHIVE DOCUMENT

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

JUL 22 1996

OFFICE OF
SOLID WASTE AND EMERGENCY
RESPONSE

Mr. Kevin Igli
WMX Technologies
c/o Chemical Waste Management
3003 Butterfield
Oakbrook, Illinois 60521

Dear Mr. Igli:

This letter is in response to your comments on the U.S. Environmental Protection Agency's (EPA) Notice of Data Availability on the Land Disposal Restrictions (LDR) Phase IV proposed rule. (61 FR 21418). The Agency has reviewed the data, and is requesting additional information/data before it can be further evaluate. As you know, EPA's LDR program has specific requirements for any data that may be evaluated for possible Best Demonstrated Treatment Technology (BDAT) analysis. Based on these criteria, we require the following clarifications and/or addition information:

- o Detailed information about waste characterization
- o Corresponding untreated and treated constituent concentrations
- o Clarification of whether data were based on grab or composite sampling
- o Quality assurance/quality control information
- o Clarification of whether the data are from full-scale processes

Please submit any additional information you may have to assist the Agency with reviewing your data submittal to Anita Cummings of my staff by August 7, 1996. All information submitted will be placed in the docket for the Phase IV rulemaking. Because we are promulgating

under a negotiated schedule, if you claim your response or data are CBI, please justify that designation as required under 40 CFR 2. If you have any questions please contact Ms. Cummings at (703) 308-8303. Thank you for your timely attention to this matter.

Sincerely,

Shonda M. Craig, for

**Michael Petruska, Chief
Waste Treatment Branch**
