

US EPA ARCHIVE DOCUMENT

# Additional Sources of EPA Information

## EPA Publication Numbering System

Hazardous and solid wastes are managed by several different statutes. EPA is organized into offices reflecting the major statutes. Thus, waste management information is available from several different offices. The primary source of hazardous waste information is the Office of Solid Waste and Emergency Response (OSWER), which is divided into several major offices. The Office of Solid Waste (OSW) produces this catalog and the documents described in it. All documents produced by OSW are assigned EPA publication numbers in the 530 series.

The EPA publications numbering system provides easy identification, tracking, and dissemination of EPA documents. Each publication number tells you which office is responsible for producing it, and includes a specific office/division within the organization, an alpha descriptor of the document type, and the publication year.

Example:

## Additional EPA Sources

Other EPA offices producing materials on hazardous and solid waste are:

### Office of Underground Storage Tanks: 510-X-YR-XXX

#### 510-B-00-001

*Catalog of EPA Materials on Underground Storage Tanks* (no cost).
