RCRA REVISION CHECKLIST 104

Used Oil Filter Exclusion

57 FR 21524-21534

May 20, 1992

(RCRA Cluster II, HSWA provisions)

Note: The final rule addressed by this Revision Checklist preserves the status quo for used oil destined for disposal and exempts, from the definition of hazardous waste, certain types of used oil filters. The Agency is not taking final action, at this time, on a listing determination and/or management standards for used oils that are recycled as proposed in 1985 and 1991. It will, in the near future, make a final decision on such a listing under the authority of RCRA section 3014. The Agency may also propose standards controlling the burning of used oil in boilers and furnaces at a later date.

The standards addressed by this checklist narrow the scope of the Toxicity Characteristic (TC) rule promulgated pursuant to HSWA authority, as well as the characteristics of EP toxicity regulations promulgated under non-HSWA authority; thus, authorized States are not required to adopt them.
