RCRA REVISION CHECKLIST 153

Conditionally Exempt Small Quantity Generator
Disposal Options under Subtitle D61 FR 34252-34278

July 1, 1996

(RCRA Cluster VII, HSWA provisions)

States with authorized RCRA programs may have already adopted requirements under State law similar to the provisions addressed by this checklist; however, these States are not authorized to implement these requirements in lieu of EPA until the State modification has been approved. (As indicated in the checklist, only the changes to §261.5 will be assessed against the Federal program.) States with such existing standards may continue to administer their standards as a matter of State law, but they need to seek authorization for these provisions. States, whose requirements are more stringent and do not allow the disposal of wastes generated by CESQGs into Subtitle D landfills under their existing authorized Subtitle D program, would not be required to revise their programs and obtain authorization for the revisions to §261.5. Instead, the State should inform their EPA Regional Office by letter that for this final rule they are not required to submit an application because the State provision currently in effect is more stringent than the requirement authorized in the July 1, 1996 (61 FR 34252) final rule.

For a State not to be required to submit a revision authorization application for this checklist, the following must be true:

- ! the State must have provisions that are already authorized by EPA,
- ! these provisions must be more stringent than the Subtitle C provisions in the final rule addressed by this checklist and not allow the disposal of CESQG waste in Subtitle D landfills, and
- ! the State must not change its authorized regulatory language.

Because the provisions in such States are more stringent than those addressed by this checklist, they would continue to apply in that State, even though the Federal provisions are promulgated pursuant to HSWA authority.
