† Optional provisions.

- 1 The June 14, 2005 final rule for Revision Checklist 208 completely revised the incorporation by reference of test methods at 40 CFR 260.11. While the same methods are being incorporated they are now organized according to the source of the materials under subparagraphs (b) through (g) (e.g., materials from ASTM are listed under 260.11(b) and its subparagraphs). 40 CFR 260.11(a) is dedicated to the incorporation by reference in 40 CFR and the availability of copies through the U.S. EPA and NARA.
- 2 There is a typographical in the June 14, 2005 Federal Register notice. In the third sentence of 40 CFR 266.112(b)(2)(i) (see 70 FR 34588), the phrase “appendix VII of this chapter” should be “appendix VII of this part” in order to correctly reference Appendix VII of part 266.
- 3 There appears to a typographical error in the June 14 Federal Register notice. In Footnote 7, of the table at 40 CFR 268.40 (see 70 FR 34589); there is an apostrophe after the “s” in “Test Methods” that should be removed.
