**Summary:** EPA is announcing interim replacement standards for spent potliners from primary aluminum reduction (EPA hazardous waste K088) under its Land Disposal Restrictions program. Spent potliners will now be prohibited from land disposal unless the wastes have been treated in compliance with the numerical standards contained within this rule. The newly promulgated treatment standards will be in place until EPA has fully reviewed all information on all treatment processes which may serve as a basis for a more permanent revised standard. In addition, EPA has extended the K088 national capacity variance until September 21, 1998.
