RE: Response to letter entitled - Request for Action Plan regarding Luminant Power – Monticello Steam Electric Plant

Mr. Hoffman,

Luminant is in agreement and pleased with the findings that the design, operation, maintenance, and inspection program for the coal combustion residue impoundments at the Monticello Steam Electric Plant received the highest rating of **SATISFACTORY**.

The Monticello facility has, and will continue to implement an effective program for operation, management, maintenance/ repair, training, and inspections for all impoundments. Since these activities have historically been part of our fleet's operations, and will continue, no new action plan is necessary.

Please let me know if you have any questions, or require additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "Kim Mireles", written over a thin horizontal line.

Kim Mireles
