RE: Amended Response to the Report of Dam Safety Assessment of Coal Combustion  
Surface Impoundments – NRG Energy, Huntley Electric Generating Station,  
Tonawanda, NY

Dear Mr. Hoffman:

In amendment to NRG's original response on April 15, 2013 to the e-mail request from Jana Englander, US EPA on March 14, 2013, NRG is providing the following additional response to the recommendations on the "Report of Dam Safety Assessment of Coal Combustion Surface Impoundments – NRG Energy, Huntley Electric Generating Station, Tonawanda, NY" (Report).

South Ash Settling Pond, North Pond 2, and North Pond 3 (Geotechnical Study)

In response to the recommendations of AMEC Earth & Environmental, Inc. (AMEC), NRG will perform a geotechnical study, including both borings and a piezometer at each pond. NRG plans on completing this study by October 31, 2014. Appropriate response actions will be developed as necessary once an evaluation of the geotechnical study is complete.

Please direct any questions related to this submittal to my attention at (716) 879-3954.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Pietro", written over a horizontal line.

Joseph J. Pietro
