The Board's response to EPA charge questions presented at the January 17, 2013 meeting.

A completed study report from the Antimicrobial Exposure Assessment Task Force II (AEATF) in which the dermal and inhalation exposure of professional janitorial workers was monitored as they poured liquid antimicrobial pesticide products from conventional or reduced-splash containers into different sizes and types of receiving containers.

Charge to the Board - Science

- Was the research reported in the Antimicrobial Exposure Assessment Task Force II (AEATF) completed liquid pour study report (AEA05) faithful to the design and objectives of the protocol and governing documents of AEATF?
- Has EPA adequately characterized, from a scientific perspective, the limitations on these data that should be considered when using the data in estimating the exposure of people who pour liquid antimicrobial pesticide products?

Lead Discussant: William Pependorf, Ph.D.

Associate Discussants: Jose Manautou, Ph.D.
