

US EPA ARCHIVE DOCUMENT

## Materials Considered at Earlier HSRB Meetings Potentially Relevant to Topics for October

### **Carroll-Loye Protocol LNX-003**

- a. The current EPA guideline for performance testing of skin-applied repellents, OPPTS 810.3700, is in the file for HSRB meeting #3 (June 2006).
- b. The most recent draft EPA guideline for efficacy testing of topical repellents is in the file for HSRB meeting #11 (October 2008).
- c. Carroll-Loye tick study protocols have previously been reviewed in HSRB meetings #3 and #4 (June and October 2006, Protocol EMD-003) and #8 (October 2007, Protocol SPC-002).
- d. Reports of completed Carroll-Loye tick studies have previously been reviewed in HSRB meetings #5 and #6 (January and April 2007, Study EMD-003) and #12 (February 2009, Study SPC-002).
- e. CLBR Protocols using the same test materials as LNX-003 have been reviewed at HSRB meetings #7 (June 2007, LNX-001) and #13 (June 2009, LNX-002). Completed study LNX-001 was reviewed at HSRB meeting #11 (October 2008).

### **AEATF-II Exposure Monitoring Program**

- a. The Governing Document and SOPs for the AEATF-II were last reviewed by the HSRB at meeting #9 (April 2008).
- b. Scenario designs and protocols for the AEATF-II were last reviewed by the HSRB at meeting #9 (April 2008).
- c. Documentation of EPA's resolution of issues concerning sampling strategy for the AEATF-II and AHETF monitoring programs was also included among the background documents for HSRB meeting #9 (April 2008).
- d. No reports of completed AEATF-II studies have yet been submitted to EPA or reviewed by the HSRB.
