

US EPA ARCHIVE DOCUMENT

Template for Data Collection

- **Who are the users?**
 - Existing
 - Potential
 - What would bring them in (More, different data? Tools? Training?)
- **What are the uses?**
 - Scale (temporal and geographic)
 - From local land use to global modeling
 - End products
 - Maps, models, forecasts, scenario testing, decision support
 - Applications, Decision support systems/tools
- **What data are needed? Are they available?**
- **Who provides the data?**
 - Is the information stable, standard, and available?
- **Specific for land/biodiversity**
- **Which data are common to many SBAs?**
 - Make them interoperable and consistent
 - E.g. land cover; IP3 pilot for 4 SBAs

Iterative process as more data and uses get identified and tested
