Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 73 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.

2. The relationship between the Federal Register and Code of Federal Regulations.

3. The important elements of typical Federal Register documents.

4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, January 27, 2009
9:00 a.m.–12:30 p.m.

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741–6008

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 531

RIN 3206–AK88

Changes in Pay Administration Rules for General Schedule Employees; Correction

AGENCY: U.S. Office of Personnel Management.

ACTION: Correcting amendment.

SUMMARY: The U.S. Office of Personnel Management issued final regulations on pay setting rules for General Schedule employees on November 7, 2008 (73 FR 66143). This correcting amendment clarifies an instruction.

DATES: Effective on December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Carey Jones, (202) 606–2858.

SUPPLEMENTARY INFORMATION:

Background

As published, the final regulation omitted a definition name in an amendatory instruction for § 531.203. This correcting amendment adds that name to the instruction so that the definition is properly revised in the CFR.

List of Subjects in 5 CFR Part 531

Government employees, Law enforcement officers, Wages.

U.S. Office of Personnel Management.

Jeanne Jacobson,

Manager, Pay Administration Group.

■ Accordingly, 5 CFR part 531 is corrected by making the following correcting amendments:

PART 531—PAY UNDER THE GENERAL SCHEDULE

■ 1. The authority citation for part 531 continues to read as follows:

Authority: 5 U.S.C. 5115, 5307, and 5338; sec. 4 of Public Law 103–89, 107 Stat. 981; and E.O. 12748, 56 FR 4521, 3 CFR, 1991 Comp., p. 316; Subpart B also issued under 5 U.S.C. 5303(g), 5305, 5333, 5334(a) and (b), and 7701(b)(2); Subpart D also issued under 5 U.S.C. 5335(g) and 7701(b)(2); Subpart E also issued under 5 U.S.C. 5336; Subpart F also issued under 5 U.S.C. 5304, 5305, and 5338; and E.O. 12883, 58 FR 63281, 3 CFR, 1993 Comp., p. 682 and E.O. 13106, 63 FR 68151, 3 CFR, 1998 Comp., p. 224.

■ 2. In § 531.203, revise the definitions of *position of record, rate of basic pay, special rate,* and *special rate supplement* to read as follows:

§ 531.203 Definitions.

* * * * *

Position of record means an employee's official position (defined by grade, occupational series, employing agency, LEO status, and any other condition that determines coverage under a pay schedule (other than official worksite)), as documented on the employee's most recent Notification of Personnel Action (Standard Form 50 or equivalent) and current position description. A position to which an employee is temporarily detailed is not documented as a position of record. For an employee whose change in official position is followed within 3 workdays by a reduction in force resulting in the employee's separation before he or she is required to report for duty in the new position, the position of record in effect immediately before the position change is deemed to remain the position of record through the date of separation.

* * * * *

Rate of basic pay means the rate of pay fixed by law or administrative action for the position held by a GS employee before any deductions, including a GS rate, an LEO special base rate, a special rate, a locality rate, and a retained rate, but exclusive of additional pay of any other kind. For the purpose of applying the maximum payable rate rules in §§ 531.216 and 531.221 using a rate under a non-GS pay system as an employee's highest previous rate, *rate of basic pay* means a rate of pay under other legal authority which is equivalent to a rate of basic pay for GS employees, as described in this definition, excluding a rate under § 531.223. (See also 5 CFR 530.308, 531.610, and 536.307.)

* * * * *

Special rate means a rate of pay within a special rate schedule established under 5 CFR part 530, subpart C, or a similar rate for GS employees established under other legal authority (e.g., 38 U.S.C. 7455). The term *special rate* does not include an LEO special base rate or an adjusted rate including market pay under 38 U.S.C. 7431(c).

* * * * *

Special rate supplement means the portion of a special rate paid above an employee's GS rate. However, for a law enforcement officer receiving an LEO special base rate who is also entitled to a special rate, the special rate supplement equals the portion of the special rate paid above the officer's LEO special base rate. When a special rate schedule covers both LEO positions and other positions, the value of the special rate supplement will be less for law enforcement officers receiving an LEO special base rate (since that rate is higher than the corresponding GS rate). The payable amount of a special rate supplement is subject to the Executive Schedule level IV limitation on special rates, as provided in 5 CFR 530.304(a).

Verification of Eligibility for Free and Reduced Price Meals in the National School Lunch and School Breakfast Programs

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule.

SUMMARY: This interim rule implements provisions of the Child Nutrition and WIC Reauthorization Act of 2004 relating to verification of applications approved for free or reduced price meals in the National School Lunch Program and the School Breakfast Program. This interim rule includes changes to sample sizes for local education agencies (school districts) when conducting verification which include alternatives when there is an increase in the number

of responses to the requests for verification; direct verification provisions which allow the local educational agency to contact means-tested programs to verify the information on applications without contacting the applicant household for documentation; and revised deadlines for completion of verification efforts. This interim rule also establishes a standard sample size of three percent for local educational agencies that do not qualify for use of an alternative sample size. The direct verification provision will reduce the number of households that must be contacted to submit documentation. This interim rule incorporates other statutory changes designed to assist households in completing the verification process. These changes require the local educational agency to have a telephone number that households may call, without charge, for questions about verification. The local educational agency must also make at least one attempt to follow-up with households selected for verification prior to denying benefits when the household fails to respond. There is also a provision that gives local education agencies the discretion to replace selected applications when households are deemed unlikely to respond to the verification request. These are safeguards to avoid termination of a child's benefits due to misunderstandings or other difficulties that may preclude households from effectively complying with the verification request. The changes made in this interim rule are intended to enhance verification efforts which will improve the accuracy of benefit distribution.

DATES: *Effective date:* This rule is effective February 17, 2009.

Comment dates: Comments on Rule Provisions: Mailed comments on the provisions in this rule must be postmarked on or before March 18, 2009; e-mailed or faxed comments must be submitted by 11:59 p.m. March 18, 2009; and hand-delivered comments must be received by 5 p.m. March 18, 2009.

Comments on Paperwork Reduction Act Requirements: Comments on the information collection requirements associated with this rule must be received by January 20, 2009.

ADDRESSES: The Food and Nutrition Service invites interested persons to submit comments on this interim rule. Since comments are being accepted simultaneously on several rulemakings, please include the title (Verification of Eligibility for Free and Reduced Price Meals in the National School Lunch and School Breakfast Programs). Comments may be submitted by any of the following methods:

- Federal eRulemaking Portal: Go to *http://www.regulations.gov* and follow the instructions for submitting comments.
- Fax: 703–305–2879, attention Robert Eadie.
- Mail: Mr. Robert Eadie, Chief, Policy and Program Development Branch, Child Nutrition Division, Food and Nutrition Service, Department of Agriculture, 3101 Park Center Drive, Room 640, Alexandria, Virginia 22302–1594.
- Hand Delivery or Courier: Deliver comments to 3101 Park Center Drive, Room 640, Alexandria, Virginia 22302–1594, during normal business hours of 8:30 a.m.–5 p.m.

All comments submitted in response to this interim rule will be included in the record and will be made available to the public. Please be advised that the substance of the comments and the identity of the individuals or entities submitting the comments will be subject to public disclosure. All submissions will be available for public inspection at this location Monday through Friday, 8:30 a.m.–5 p.m. The Food and Nutrition Service may also make the comments available on the Federal eRulemaking portal.

FOR FURTHER INFORMATION CONTACT: Address any questions to Robert M. Eadie, Child Nutrition Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, VA 22302 or by telephone at 703–305–2590. A regulatory cost-benefit analysis was completed for this rule. Single copies may be requested from the Food and Nutrition Service's official identified above.

SUPPLEMENTARY INFORMATION:

I. Background

Summary of Changes Affecting Verification Procedures Made by Public Law 108–265

The Child Nutrition and WIC Reauthorization Act of 2004 (Pub. L. 108–265, June 30, 2004) amended Section 9(b) of the Richard B. Russell National School Lunch Act (NSLA) concerning verification of households' applications for free and reduced price meals in the National School Lunch Program (NSLP) and the School Breakfast Program (SBP). In sections 104 and 105, Public Law 108–265 added a number of provisions and also incorporated into the NSLA provisions concerning verification activities that were previously addressed only in regulations (7 CFR 245.6a) or guidance (primarily an instruction entitled ''Eligibility Guidance for School Meals Manual,'' August, 2001). New requirements and modifications made by Public Law 108–265 to existing procedures are discussed in this preamble.

The primary changes made by Public Law 108–265 concerning verification are:

- Transferring the responsibility for conducting verification from the school food authority (SFA) to the local educational agency (LEA);
- Establishing a new standard verification sample size of three percent which is both the maximum and minimum requirement;
- Reducing sample sizes for LEAs that improve their verification response rates;
- Permitting LEAs to replace applications in the sample, on a case-by-case basis, when complying with the request for verification may pose a particular challenge to the selected household;
- Requiring LEAs to conduct a confirmation review of applications selected for verification to check for approval errors;
- Requiring LEAs to have a telephone number that households may call, at no charge, for assistance with verification;
- Establishing direct verification methods which use records from certain public agencies;
- Requiring follow-up by the LEA with households selected for verification; and
- Revising deadlines for completing verification activities.

This preamble discusses these changes in this order to provide the reader with a sequential overview of the verification process and an understanding of any new procedures as well as how existing procedures are affected. Please note that other related provisions of Public Law 108–265 concerning free and reduced price eligibility and certification are addressed in separate rulemakings.

Implementation Memoranda Issued to Date

Because the statutory amendments addressed in this interim rule became effective on July 1, 2005, the Food and Nutrition Service (FNS) issued a series of implementation memoranda, as required by section 501(a) of Public Law 108–265, to help administering agencies initiate implementation of the statutory provisions and assess how these changes would affect their existing verification procedures. It was especially important for LEAs to know

how verification efforts conducted for School Year 2004–2005 could affect their eligibility for alternative sample sizes in subsequent school years. The first memorandum was dated August 25, 2004 (SP–5) concerning the period for acceptable verification. Another memorandum dated November 15, 2004 (SP–8) concerned direct verification. The purpose of that memorandum, which also discussed the provision on mandatory direct certification of children who are members of households receiving food stamps, was to encourage State child nutrition agencies to work with their counterparts in State agencies administering means-tested programs that could be sources for direct verification. The next memorandum was dated November 19, 2004 (SP–9). That memorandum explained that if the non-response rate for School Year 2004–2005 was less than twenty percent, then the LEA would qualify to use an alternative sample size in School Year 2005–2006, the first year the new verification procedures were to be followed. It also explained that for School Year 2006–2007, an LEA was qualified to use an alternative sample size if there was at least a ten percent improvement between the non-response rate in School Year 2004–2005 and in School Year 2005–2006. Another memorandum was issued on March 10, 2005 (SP–13) addressing the new verification activities for LEAs including confirmation reviews, substitution of applications and follow-up. An April 19, 2005 (SP–14), memorandum discussed State education agency agreements with their counterparts to conduct direct verification. Other memoranda were issued on August 30, 2005 (SP–16), September 14, 2005 (SP–22), September 21, 2005 (SP–19), September 26, 2005 (SP–21), and September 27, 2005 (SP–18). These memoranda discussed and clarified various verification procedures. A July 25, 2006 memorandum (SP–27–2006) clarified that the standard sample size for verification is both a minimum and a maximum. A memorandum dated August 31, 2006 (SP–32–2006), provided clarification for direct certification. All of these memoranda may be found on the Child Nutrition Web site (*http://www.fns.usda.gov/cnd.*)

Terminology: Responsible Entity

Public Law 108–265 specified, in section 105(a), that in newly designated section 9(b)(3)(D)(ii) of the NSLA, the LEA must conduct the verification activities as well as activities related to certifying children as eligible for free or reduced price meals or free milk and section 108(b) added a definition of LEA in section 12(d)(4) of the NSLA. Prior to this amendment, the NSLA indicated that the SFA, which is defined only in regulations, had the responsibility for conducting certification and verification activities. An SFA, as provided in existing regulations at 7 CFR 210.2, is the governing body responsible for the administration of one or more schools and which has the legal authority to operate the NSLP and SBP in those schools. Because the NSLA now specifies that the LEA is responsible for NSLP and SBP certification and verification activities, this rule uses the term LEA. While this change may only have modest immediate effect in implementation and program operations, it is important because it recognizes that income eligibility determinations may be used for a broad array of educational-related benefits and are no longer used exclusively for meal benefits. We note that this distinction was discussed in the House Report 108–445, which accompanied H. R. 3873, a bill related to the Senate bill which eventually became Public Law 108–265. That House Report noted that ''[b]ecause eligibility determinations* * *are used for purposes that extend beyond the receipt of free or reduced-price school meals, the Committee believes that school and district administrators, not food service personnel, should be held accountable for the accuracy of meal certifications reported to the state and the Secretary of Agriculture.''

Terminology: Timing for Acceptable Documentation

The existing regulations at 7 CFR 245.6a(a)(1) specify the period of time for acceptable income documentation; *e.g.*, the household must submit information for the most recent full month available. This rule adds a paragraph at 7 CFR 245.6a(f)(2) to permit households to submit documentation verifying the source, amount and frequency of their income for any point in time within that period. Timing for documentation for direct verification purposes is discussed in V. Direct Verification.

II. Verification Sample Sizes

Background

Each school year, LEAs are required to verify the eligibility of children in a sample of household applications approved for free or reduced price meal benefits. Under the existing regulations at 7 CFR 245.6a(a), the SFA may verify a sample of randomly selected applications or a sample of focused applications. Under random sampling, all applications have an equal chance of being selected for verification and the sample size is the lesser of three percent (3%) or 3,000 approved applications. Under focused sampling, the sample size is the lesser of one percent (1%) or 1,000 of all approved applications selected from applications with household monthly income within $100 ($1200 annually) of the free/reduced price income limit PLUS the lesser of one-half of one percent (.5%) or 500 applications with a Food Stamp Program, Food Distribution Program on Indian Reservations (FDPIR) or Temporary Assistance to Needy Families Program (TANF) case number, provided in lieu of household income information.

Section 105(a) of Public Law 108–265 amended section 9(b)(3) of the NSLA, 42 U.S.C. 1758(b)(3), by specifying a new standard sample size as well as alternative sample sizes for which LEAs may qualify. The law also revised the date for determining the sample size.

Date for Selection of Sample Size

The existing regulatory date for determining the sample size is October 31 of the current school year. Public Law 108–265 amended the NSLA at section 9(b)(3)(D), 42 U.S.C. 1758(b)(3)(D), to establish October 1 of the current school year as the date for determining the sample size based on the number of approved free and reduced price meal applications on file for the current school year. This action changes the date the sample size is determined from October 31 to October 1. The earlier date should assist households selected for verification and should result in changes in eligibility status being acted upon more quickly. The provision on the date for sample size determination may be found in this interim rule at 7 CFR 245.6a(a)(5).

While LEAs must determine the required sample size based on the number of applications on file as of October 1, it may be that they begin their verification activities prior to October 1. This should assist LEAs in completing verification within the required timeframes.

Standard Sample Size

Section 105(a) of Public Law 108–265 amended section 9(b) of the NSLA, which specified that the new standard sample size is the lesser of three percent (3%) of all applications approved by the LEA for the School Year as of October 1 or 3,000 error prone applications approved by the LEA for the School Year as of October 1. Public Law 108–265 also added a definition of error prone application at section

9(b)(3)(D)(i)(I), which is all household applications approved by the LEA as of October 1 that indicate monthly income within $100 of the monthly limit or annual income within $1200 of the annual limit of the applicable income eligibility guidelines. This is similar to the way income applications are selected under the existing focused sampling.

The new standard verification requirement established in Section 105(a) of Public Law 108–265 amended section 9(b) of the NSLA, which concentrates on error prone applications in the interest of improved accuracy of eligibility determinations. The definitions of error prone applications and standard sample size may be found in this interim rule at 7 CFR 245.6a(a)(2) and 7 CFR 245.6a(c)(3), respectively.

Section 105(a) of Public Law 108–265 amended section 9(b)(3)(D)(i)(I)(bb) of the NSLA to permit the Secretary to establish other criteria for error prone applications in lieu of the error prone application standards. At this time, we are not establishing any other criteria and are requesting suggestions on potential criteria for error prone applications. Some possible parameters include different thresholds depending on household size, or different triggers for consideration as an error prone application. Commenters should keep in mind the limited amounts of household information included on the meal benefit application.

Mandatory Standard Sample Size

The NSLA, as amended by Public Law 108–265, specifies that the sample size is three percent or 3,000 applications, whichever is less. This is both a minimum and a maximum sample size. Local educational agencies may no longer choose to verify a larger sample of applications as part of their normal verification activity. This includes LEAs with a small number of free or reduced price applications that have previously verified all applications.

However, LEAs are encouraged, on a case-by-case basis, to verify ''for cause'' any application which is questionable. Verification for cause may include situations in which a household reports zero income or when the LEA is aware of additional income or persons in the household. If the LEA verifies a household's application for cause, the household must be notified in accordance with existing regulatory procedures and, if there is a decrease in benefits, the household would receive a notice of adverse action and would have the opportunity to appeal the LEA's decision. This interim rule is codifying this procedure at 7 CFR 245.6a(c)(7) which previously was only specified in program guidance.

Alternative Sample Sizes

Section 105(a) of Public Law 108–265 amended section 9(b)(3)(d)(iv) to provide two alternative sample sizes available to an LEA which qualifies through its efforts to improve the verification response rate (see below). The alternative sample sizes available to LEAs that qualify are: The lesser of 3,000 or three percent of all approved applications selected at random; or the lesser of 1,000 or one percent of error prone applications plus the lesser of 500 or one-half of one percent (0.5%) of approved applications with a Food Stamp Program, FDPIR or TANF case number provided in lieu of income information. These alternatives are also based on the number of approved applications as of October 1. The alternative sample sizes may be found at 7 CFR 245.6a(c)(4) in this interim rule.

Completing the Sample Size

Some LEAs will not have enough error prone applications to meet the standard or the 1000/1% element of that alternative sample size, as applicable. Section 9(b)(3)(D)(v) of the NSLA, as amended by section 105(a) of Public Law 108–265, states that the LEA must select additional approved applications at random to meet the applicable standard sample size or the 1000/1% element of that alternative. This provision is included in this interim rule at 7 CFR 245.6a(c)(5).

Qualifications Applicable to All LEAs

An LEA may qualify for an alternative verification sample size if it has a non-response rate for the preceding school year of less than twenty percent (20%). This requirement may be found in this interim rule at 7 CFR 245.6a(d)(2). In recognition of the effect of a household's failure to respond to verification requests, Section 105 of Public Law 108–265 added incentives to LEAs to decrease their non-response rates. In 2002, FNS conducted a review of nearly 3,500 applications selected for verification in 14 large SFAs. A key finding of this review was that non-response to the verification process accounted for the most changes in benefits. Seventy-seven to eighty percent (77–80%) of reductions/terminations of benefits were the result of non-response. In an effort to determine the extent of verification non-responses, FNS added a regulatory requirement (68 FR 53483; September 11, 2003) that SFAs report information on verification activities, including the number of non-responses to their State agency. Non-response rates are then reported annually by each State to FNS on the FNS–742, the Verification Summary Report. FNS will use the data from these reports to determine the effects on changes in non-response rates as a result of States' efforts to decrease the number of children who lose benefits because of the household's failure to respond.

The existing regulations do not define non-response rate. Section 105 of Public Law 108–265 added a definition of non-response rate. The statutory definition of non-response rate is the percentage of approved applications for which verification was not obtained after all required attempts; this definition may be found at 7 CFR 245.6a(a)(3) of this interim rule. (Also see the discussion in this preamble concerning what constitutes a non-response for the purposes of the LEAs' obligation for follow-up activities.)

Qualifications Applicable to Large LEAs

Section 105 of Public Law 108–265 amended section 9(b)(3)(D)(iv)(IV) to provide criteria by which large LEAs may qualify for sample size alternatives. A large LEA is defined as one with more than 20,000 children approved by application (excluding children eligible through the direct certification process) as eligible for free or reduced price meals as of October 1 of the school year. To qualify for this alternative, a large LEA must have a non-response rate in the preceding school year which is at least ten percent (10%) below the rate for the second preceding school year. To meet this criterion, a large LEA would compare its non-response rates from one school year to another and determine if there is adequate improvement (at least ten percent (10%)) between the second preceding school year and the preceding school year.

For example, in School Year 2004–2005, the LEA had:

- 21,000 children approved for free and reduced price meal benefits based on a total of 6,000 approved applications; therefore, 180 household applications (3% of 6,000) are subject to verification;
- 45 households failed to respond to verification requests;
- Therefore, the non-response rate is 25% (45 ÷ 180 as a percentage).

The LEA would then calculate the level of improvement needed for School Year 2005–2006 as follows:

- The LEA must improve the non-response by at least 10%, with the 10% improvement determined by taking the previous non-response rate of 25% and multiplying it by 10%, which is 2.5%;

• The improvement level of 2.5% is then subtracted from the previous non-response rate (25.0% − 2.5%) which is 22.5%;

• Therefore, the LEA needs a non-response rate of 22.5% or less to meet the 10% minimum improvement level in order to qualify to use an alternative sample size.

In School Year 2005–2006:

• The LEA again had 6,000 approved applications, so the sample size is 180 (3% of 6,000);

• The number of non-respondents is 40 which is a non-response rate of 22.2% (40 ÷ 180 as a percentage);

• 22.2% is less than the minimum non-response rate of 22.5% needed to qualify for this option; therefore, this LEA may use the alternative sample sizes in School Year 2006–07.

This provision may be found at 7 CFR 245.6a(d)(4) of this interim rule.

Qualifying for Alternative Sample Sizes

As discussed above, Section 105 of Public Law 108–265 permits LEAs to qualify for alternative sample sizes by improving the rate of household responses to their verification efforts. An LEA must annually determine if it can qualify to use an alternative sample size. If the LEA does not reevaluate its eligibility for alternative sample sizes on an annual basis, it must use the standard sample size in 7 CFR 245.6a(c)(3) of this interim rule. Once the LEA determines that it qualifies, it must notify the State agency of the intended use of an alternative sample size, specify which option and indicate the basis for qualifying. The State agency may establish a deadline for notification and may establish criteria for reviewing and approving use of alternative sample sizes. This provision is found at 7 CFR 245.6a(d)(1) of this interim rule.

Declining and Substituting Applications Selected for Verification

Section 105 of Public Law 108–265 amended section 9(b)(3)(J) of the NSLA to allow an LEA to replace up to five percent of approved applications selected for verification upon individual review in accordance with criteria established by the Secretary. This provision effectively allows the LEA some flexibility in verifying applications from families/households that the LEA determines may not be able to satisfactorily respond to the verification request because of instability or communication difficulties. This should minimize the possibility that truly needy families may lose benefits simply due to their inability to fully understand the requirements of the verification process. This interim rule is adopting this approach as the criteria that LEAs would use to remove applications and then select substitutes.

This procedure would be conducted, if the LEA chooses to use this option, once the applications are selected for verification. For each application removed from the verification sample, the LEA would replace it with another approved application. The maximum number of replacements is five percent of the sample selected. Prior to any contact with the selected households, the LEA would consider which households may have difficulties with completing the verification process and replace those applications. Replacement applications would be selected in accordance with the LEA's applicable procedures (*i.e.*, an error-prone application that is selected must be replaced with an error-prone application). Once the replacement process is complete, the LEA would notify the remaining households of the verification process. This provision does not permit an LEA to replace an application once the household is notified of its selection for verification. Further, this provision does not permit the LEA to eliminate a category of applications such as those from a particular group or community. The Department of Agriculture (the Department) will provide additional assistance to LEAs in selecting specific applications if it proves necessary. This provision may be found at 7 CFR 245.6a(e)(2) of this interim final rule.

III. Verification Process/Procedures

Section 105(a) of Public Law 108–265 added provisions concerning follow-up with households selected for verification. These provisions are designed to improve and streamline the process for LEAs as well as to provide additional ways to assist households with completing the verification process, and reduce the non-response rate. Section 105(a) of Public Law 108–265 also added a requirement that LEAs must review applications selected for accuracy of each eligibility determination including math or other errors, prior to contacting the household. Section 105(a) also added section 9(b)(3)(F) allowing LEAs to use direct verification—a process in which information from specific means-tested programs is used as the basis for verifying application data.

Preliminary/Confirmation Reviews

Section 105(a) of Public Law 108–265 added a requirement that the LEA check the accuracy of the certification before proceeding with verification of any application. In the statute, this is referred to as a ''preliminary review.'' The Department is using the term ''confirmation review'' in this preamble and in the regulatory language to emphasize that, while this review is the first verification activity conducted by the LEA, it is a confirmation of the original decision made on the application. The confirmation review must be made by someone other than the person who made the original determination. This procedure is intended to detect any arithmetic or other errors prior to beginning verification so that the LEA can appropriately review the documentation submitted by the household. Please note that any LEA or school that conducts confirmation reviews of all applications as part of its certification process meets this requirement.

The LEA must document that confirmation reviews were conducted. To this end, the prototype free/reduced price application developed by FNS includes a signature line for the person who conducted the confirmation review. The LEA may also maintain a list of applications and their disposition with the reviewer's signature attesting to completing this requirement. The person who conducts the confirmation review must not be the person who makes the initial eligibility determination. However, the provision does not preclude the person who completes the confirmation review from conducting the verification process. These provisions are found at 7 CFR 245.6a(e)(1) in this interim rule.

Section 105(a) of Public Law 108–265 also recognizes that some LEAs use electronic data systems that provide a high level of accuracy in making the initial eligibility determination, in accordance with the certification requirements of the NSLP, on applications for free or reduced price meals. If an LEA uses an electronic data system that rejects inconsistent or incomplete application information and that accurately determines eligibility based on income level and household size or other information establishing categorical eligibility for free meals, it is not subject to the requirement to conduct separate confirmation reviews.

An LEA with such a system must notify the State agency that it is not conducting confirmation reviews because its initial eligibility system accurately processes applications consistent with the income eligibility guidelines. State agencies may require additional documentation of the accuracy of the system and may require the LEA to conduct confirmation

reviews if they consider the system to be inadequate. This provision may be found at 7 CFR 245.6a(e)(1)(ii) of this interim rule.

Disposition of Applications After the Confirmation Review

The confirmation review can occur at one of two times—immediately after the initial review which makes it part of the certification process or as part of the verification process as a double check on only those applications selected for verification. When the confirmation review is part of the application process, the notice of eligibility reflects any adjustments made to the initial determination made as a result of the ''up-front'' confirmation review.

However, when the confirmation review is part of the verification process, the following requirements apply—

- If the confirmation review indicates that there should be an increase in benefits, the LEA must make the change as soon as possible, notify the household and proceed with verification;
- If the confirmation review shows that there should be a decrease in benefits from free to reduced price, the LEA should proceed with and complete verification before any notification of a new eligibility status is given. If the decrease is substantiated by the documentation submitted by the household or the household fails to respond (subsequent to at least one follow-up attempt by the LEA), the LEA will then provide the household with a notice of adverse action which will inform the household of the pending action and of their appeal rights.
- If the confirmation review indicates that the application should have been denied initially, the LEA would remove that application from the verification sample, select another like application (for example, another error prone application) and would provide the household with a notice of adverse action which will inform the household of the pending action to terminate their free or reduced price benefits and of their appeal rights.

These procedures are designed to avoid a possible unnecessary reduction in benefits. The verification notice requirements are not changed by adoption of the confirmation review; that is, the verification notice continues to explain that the application was selected, to detail the process and required documentation, to assign a deadline for receipt of documentation, and to provide a no-charge phone number to call for assistance. These provisions may be found at 7 CFR 245.6a(f) of this interim rule.

Direct Verification: Background

Section 105(a) of Public Law 108–265 provides for a procedure called ''direct verification.'' The NSLA was amended to include, at section 9(b)(3)(F), an option for LEAs to directly verify applications selected for verification. This procedure is similar to the existing direct certification process. Direct verification allows the LEA to request information from an agency administering one of the means-tested programs listed in the NSLA without contacting the household. Contact with one of the means-tested programs is the first verification effort. Although existing regulations do not specifically include direct verification, existing 7 CFR 245.6a(b)(3) provides for use of agency records from a State or local agency that administers the Food Stamp Program, FDPIR or TANF program which have similar eligibility limits and information maintained by the State employment office. This procedure is discussed in detail in this preamble under V. Direct Verification.

Telephone Assistance With Verification

As indicated earlier, the existing regulatory provision requiring that the LEA notify the household in writing of its selection for verification (except for those households' whose eligibility status is verified through direct verification) did not change. However, Section 105(a) of Public Law 108–265 added provisions concerning contacts with households selected for verification.

The existing regulations do not require that the SFA provide a telephone number for households to call concerning verification, but the prototype application and verification forms as well as guidance encourage SFAs to provide a telephone contact for verification activities. Section 105(a) of Public Law 108–265 amended the NSLA to require that the written notification to households concerning verification include a telephone number that the household may call without charge. The telephone number could be toll-free. The toll-free telephone number must be to a source that can respond to the household's questions about the verification process. This provision is found at 7 CFR 245.6a(f)(5) of this interim rule.

Requirement for Follow-Up With Non-respondents

Section 105(a) of Public Law 108–265 also added a requirement that the LEA make at least one follow-up attempt to contact any household that fails to respond to a request for verification. This rule does not specify the method of follow-up or the timing; the follow-up attempt may be in writing, via e-mail, through a telephone call or in person. The LEA must document the attempt. Many LEAs already perform follow-up contacts.

As permitted in section 9(b)(3)(G)(iv) of the NSLA, this rule allows the LEA to contract with a third party to conduct the follow-up activity. Any use of a third party is subject to the confidentiality requirements in Section 9(b) of the NSLA and 7 CFR Part 245. Any contract is also subject to the procurement requirements in existing 7 CFR 210.21. The provision on third party contracts may be found in 7 CFR 245.6a(f)(6) of this interim rule. The use of a third party to perform follow-up contacts would facilitate this process for LEAs which may not have the staff resources to readily absorb this required function. It is important to note, however, that the information the contractors will be using is subject to the use and disclosure requirements in the NSLA and program regulations. All such information must be carefully controlled, remains the property of the LEA and may not be used by the contractor for any other purpose.

Non-Response in Relation to Follow-Up Contacts

A non-response, for the purposes of a follow-up contact, would arise when the LEA is unable to verify the household's status for school meal benefits for which it was certified. A non-respondent household would be a household that failed to provide documentation that enables the LEA to resolve or confirm its eligibility status.

Follow-up contacts can assist families in continuing meal benefits for their children as well as improve LEAs' verification completion rates. Examples of situations which indicate the need for a follow-up contact by the LEA would be—

- The household has not, in any way, contacted the LEA concerning its initial request for verification documentation.
- The household contacted the LEA and has submitted some but not all needed documentation. This could include needed written material from the household itself or the inability of the LEA to complete a collateral contact. In the latter situation, the household may need to indicate another collateral contact or provide other written evidence.
- The household contacted the LEA but the communication was

inconclusive and the LEA needs additional information.

• Information obtained from a public agency is incomplete or inconsistent with information on the application.

IV. Deadlines/Extensions

Deadlines for Completing Verification

The existing regulations establish the deadline for completing verification as December 15. Section 105(a) of Public Law 108–265 changed this date to November 15. This change will result in more timely determinations of the accuracy of children's eligibility for free or reduced price meals or free milk. Shifting this date closer to the beginning of the school year will allow LEAs to more promptly make necessary adjustments to eligibility status and thus target meal benefits more appropriately. The deadline is found at 7 CFR 245.6a(b)(1) of this interim rule.

Please note that the October 31 date for reporting data on the number of children eligible for free and reduced price meals and free milk has not changed. This date is a point in time used to ensure consistent data on program participants. The reference to the verification deadline in 7 CFR 210.18(h)(1)(iv) is also revised by this interim rule.

Extending the Verification Deadline

Section 105(a) of Public Law 108–265 also amended the NSLA to allow the State agency to extend the verification deadline to December 15 under criteria established by the Department. The regulations will now permit extensions of the verification deadline on a case-by-case basis, depending on justification submitted by the LEA. Reasons for extensions may include, but are not limited to, strikes or labor disputes or natural disasters. This provision is found at 7 CFR 245.6a(b)(2)(i) of this interim rule.

Additional Extensions Due to Local Conditions

Section 105(a) of Public Law 108–265 amended the NSLA to address verification alternatives when local conditions warrant. Section 9(b)(3)(I) specifies that the Department may allow alternatives to the sample size, the sample size selection criteria and to the verification deadline when a natural disaster, civil disorder, strike or other similar conditions exist. This allows LEAs flexibility in completing verification activities when circumstances prevent timely or complete compliance with the requirements. The law directs the Secretary to establish criteria for extensions and alternatives. Requests under this provision would be necessary only if the LEA were requesting different sample size and selection criteria and/or an extension for completing verification beyond December 15. We emphasize that these requests would be made on a case-by-case basis and that approval would be given only when necessitated by unusual circumstances. Section 245.6a(b)(1)(ii) will now allow the State agency to request use of alternative sample sizes or sample selection and/or an extension of the deadline beyond December 15 through a written request to FNS.

V. Direct Verification

As discussed briefly above, section 105(a) of Public Law 108–265 amended section 9(b)(3)(F) of the NSLA to permit LEAs to directly verify households through information obtained from the State agency administering the Food Stamp Program, FDPIR, TANF or State Medicaid programs under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*) and any similar income-tested program or other source of information determined by the Secretary.

Direct verification is a procedure that uses information directly obtained from an agency that administers a means-tested program (such as the Food Stamp Program) or that maintains information about income or wages (such as the State unemployment offices). Direct verification is similar to using agency records as a means of verification of information on a household's application. However, direct verification is conducted prior to contacting the household of its selection for verification. If the source of the direct verification information confirms the household's eligibility status, the household will not need to be notified of its selection as verification was completed through the agency contacts.

The use of direct verification can help LEAs in completing the verification process in a timely manner and lower the non-response rate since households do not need to be contacted if the eligibility status can be verified through extant data sources.

The direct verification process is discussed below as follows: (1) Information sources and the age and type of acceptable data; (2) direct verification using Food Stamp Program, FDPIR and TANF sources; (3) direct verification using state Medicaid program sources; (4) direct verification using State Children's Health Insurance Program (SCHIP) sources; and (5) using Medicaid/SCHIP information in States with higher income limits.

Sources for Direct Verification and Timing

Section 9(b)(3)(F)(i) of the NSLA specifies that direct verification may be achieved through systems of records maintained by the public agency administering the Food Stamp Program, FDPIR, TANF, or the State Medicaid program. It also permits the Department to include similar means-tested programs or sources of information. This interim rule incorporates the statutorily identified programs at 7 CFR 245.6a(g). Please note that while children are categorically eligible for free meals if they are in a Food Stamp Program or FDPIR household or in most TANF households (see below for a discussion of the exception), Medicaid recipients are not categorically eligible. In addition, because income eligibility limits for Medicaid vary from State to State and may exceed the threshold for free/reduced price meal benefits, a State agency must first determine what the limits are in its State. It must then determine whether the Medicaid office is able to provide household income information or an indication (such as the percentage of the Federal poverty line) of whether the household's income is within the limits for either free or reduced price benefits. These are the first steps in implementing direct verification with Medicaid.

Under the authority in the NSLA, we have determined that SCHIP, which is authorized under title XXI of the Social Security Act, should be included as a potential source for direct verification as it is an adjunct of the Medicaid program. As with the Medicaid program, SCHIP recipients are not categorically eligible for free or reduced price benefits and the income limits vary by State. Again, the first step for a State agency would be to determine how the SCHIP program is structured in its state. SCHIP is defined in 7 CFR 245.2 of the existing regulations.

Public Law 108–265 specified that the direct verification information from public agencies must be the most recent information available. The ''most recently available information'' is described in the NSLA as information reflecting program participation or income during the 180-day period immediately prior to the date of school meals application. The data need only indicate eligibility for the program at that point in time, not that the child was certified for that program's benefits within the 180-day period.

In order to be consistent with the documentation permitted for households notified of their selection for verification, LEAs have flexibility

with identifying acceptable documentation for direct verification purposes. As discussed earlier, household being verified may provide documentation for any point in time between the month prior to application and the time the household is required to provide income documentation. For consistency between verification and direct verification activities, this interim rule, at 7 CFR 245.6a(g)(5), therefore states that direct verification efforts may use information from any point in time between the month prior to application and the time direct verification is conducted. In other words, for direct verification LEAs must use information (which may never be more than 180 days old) that is the most recent available information; information from any one month from the period one month prior to application through the month direct verification is conducted; or information for all months from the month prior to application through the month direct verification is conducted.

Names Provided to Direct Verification Sources

LEAs or State agencies conducting direct verification must only submit the names of the eligible children and not names of other members of the household, such as parents, grandparents or non-school age siblings. This provision may be found at 7 CFR 245.6a(g)(1) of this interim rule.

How Direct Verification Is Conducted Using Food Stamp Program, FDPIR, and TANF Records

Under section 9(b)(3)(F)(i)(I)–(III) of the NSLA, as amended by Public Law 108–265, LEAs may submit a list of identifiers for children listed on applications selected for verification to the agencies that administer the Food Stamp Program, FDPIR or TANF.

These programs would then indicate if they have information that supports the child's eligibility for free or reduced meal benefits. This may be done even if the school meals application does not indicate receipt of benefits from one of these programs. This ''direct verification'' contact would occur prior to notifying the household of its selection for verification. If the data obtained was within the time frames discussed above and shows that a child was a member of a household participating in one of these programs, the child's eligibility for free meals is validated. If data indicates that one eligible child is a member of a household participating in the FSP, FDPIR, TANF, or Medicaid, all eligible children in that child's household are verified. If none of the children's participation is confirmed by the direct verification source, regular verification procedures must be followed. For consistency, this approach is now applied to applications selected for verification that contain case numbers. This change may be found at 7 CFR 245.6a(f)(3) in this interim rule.

With respect to the TANF program, eligibility for that program continues to be subject to the provision in the NSLA concerning TANF eligibility standards in place in 1995. Section 9(d)(2)(C) of the NSLA specifies that a child is eligible for free meals if the standards used for the State's TANF program are comparable to or more restrictive than the eligibility standards in effect on June 1, 1995. Therefore, direct verification to determine eligibility for free meals based on TANF information may be used only in those States that currently meet this criterion or in States that can provide the household's income level or indicate that the family's income is less than 130% of the applicable poverty guideline. Please note that while this section of the NSLA also addresses eligibility for reduced price meals, children in households receiving Food Stamp Program, TANF or FDPIR benefits are categorically eligible for free meal benefits.

Direct Verification Using State Medicaid Program Sources

Public Law 108–265 amended the NSLA at section 9(b)(3)(F) to allow use of State Medicaid income and program participation information as sources of direct verification. The NSLA specifies that eligibility for free meals may be confirmed when the Medicaid income limit is 133% or less of the official poverty line and that eligibility for reduced price meals may be confirmed when the Medicaid income eligibility limit is no more than 185% of the official poverty line.

The LEA may verify children's eligibility for either free or reduced price meals based on Medicaid data. Medicaid and SCHIP (as added under the discretion provided to the Secretary) eligibility standards vary from State to State. If the State's Medicaid limit is between 133% and 185% of poverty, the Medicaid/SCHIP agency must also be able to provide a household's income and size or the percentage of the official poverty line that the household's income represents; otherwise, direct verification may not be feasible when there are different eligibility standards for receipt of Medicaid.

Verification of Eligibility for Free Meal Benefits

If the State's Medicaid program's eligibility standards are 133% or under of the poverty limits, the LEA can use information from the Medicaid agency to verify free status. While the income limit for free meals is 130% of the applicable poverty guideline, section 105(a) of Public Law 108–265 permits use of the greater percentage. The 133% figure was used because this is the Medicaid limit in a number of states for school-age children. When the Medicaid agency can identify which households are participating, the LEA has documented the child's eligibility for free meals. No additional individual documentation is needed. In states with Medicaid limits of 133% or below, there is no need to have the household's income because eligibility status is confirmed solely through Medicaid participation. These provisions may be found at 7 CFR 245.6a(g)(3) of this interim rule.

Verification of Eligibility for Free or Reduced Price Benefits

If the State's Medicaid limit is between 133% and 185% of the poverty limits and the Medicaid agency can provide the percentage or amount of income used, the LEA could use Medicaid information to verify the child's eligibility either for free or for reduced rice benefits, depending on the basis for the child's Medicaid eligibility. In these states, the agency administering the Medicaid program must be able to provide the income amount and household size used to determine Medicaid eligibility or the percentage of the applicable poverty guideline for that income. That information can be used to confirm the child's status for free or reduced price meals, as appropriate. These provisions may be found at 7 CFR 245.6a(g)(4) of this interim rule.

Direct Verification Using SCHIP

Some States have used their SCHIP grants to expand their Medicaid coverage for children through higher income limits. Other States have separate SCHIP programs. For the latter States, the State agency must determine the income limits and establish the same type of parameters discussed above for State Medicaid programs.

Resolving Discrepancies Between the Application and Information Received Through Direct Verification

For the purposes of direct verification, the LEA submits the names and other identifiers, such as birthdates and addresses for a child certified for free or reduced price meals and selected for

verification. Therefore, direct verification potentially establishes a child's participation in one of the eligible programs, thereby confirming their eligibility for free or reduced price meals. Any child listed on the application who is certified for free or reduced price school meals who is established as participating in one or more sources of direct verification (within the applicable limits for the various programs) is verified. The LEA has completed verification for that household and household contact is not required. If the information received from sources of direct verification is inconsistent or inconclusive, the LEA must notify the household that it is subject to verification and the household must provide documentation of their income.

Use of Direct Verification Is an LEA Option

Public Law 108–265 expanded Section 9(b)(3)(F) of the NSLA to permit the use of direct verification by LEAs, although it is still optional. The law specifies that the decision to use direct verification is made at the LEA level. State agencies must support and assist any LEA's decision to use direct verification. State agencies should also work towards establishing contacts with their state-level counterparts to coordinate direct verification use and to develop a State-wide system to encourage the use of direct verification by LEAs.

If an LEA chooses to use direct verification, the State agency must work with the LEA in determining the best method for doing direct verification and assist in facilitating contacts with State-level agencies, as needed, to establish the mechanism for doing direct verification. Because administrative systems vary greatly among States, the Department is not establishing any specific procedural criteria in the regulations for conducting direct verification. This will provide State agencies with flexibility in developing procedures that best meet their needs.

Agreements To Conduct Direct Verification

Section 104(b) of Public Law 108–265 amended the Food Stamp Act of 1977 by adding Section 11(u), 7 U.S.C. 2020 (u), to require an agreement between the State agency administering the school meals programs and the State agency administering the Food Stamp Program. The Food Stamp Act of 1977 requires that State agencies to establish procedures to conduct direct verification for children eligible for free or reduced price school meals. All States have such agreements in place. For direct verification with other programs, the Department suggests that the State education agency enter into an agreement spelling out procedures, available data, etc., with each different State agency that will be a direct verification source.

Additional Programs for Direct Verification

Public Law 108–265 allows the Secretary to permit direct verification with similar means-tested programs or other sources of information. Prior to extending direct verification to additional programs, the Department would need to determine which programs have comparable eligibility standards and which are accessible to State agencies and/or LEAs. As mentioned above, we have extended direct verification to SCHIP. To assist us in expanding this provision further, we are requesting comments on any additional programs that could be included as sources for direct verification.

VI. Miscellaneous

Effect of Public Law 108–265 on Existing Verification Provisions

Some of the existing regulations in 7 CFR 245.6a are modified by this interim rule while others are unchanged but may be relocated. Under existing regulations, directly certified households are not subject to verification because their status was already determined through contact with the appropriate agency. This exception is not changed. However, the following categories of children were added as not subject to verification as authorized by Public Law 108–265—children who are homeless, as defined under section 725(2) of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11434a(2)); children served by a runaway and homeless youth grant program established under the Runaway and Homeless Youth Act (42 U.S.C. 5701 *et seq.*); or migratory children as defined in section 1309 of the Elementary and Secondary Education Act of 1965 (ESEA) (20 U.S.C. 6399). These groups will also be addressed in separate rulemakings. This provision is relocated by this interim rule from existing 7 CFR 245.6a(a)(5) to 7 CFR 245.6a(c)(2).

Existing regulations also provide for other exceptions from verification for children in residential child care institutions and schools. Further, LEAs using the special certification/reimbursement procedures in 7 CFR 245.9 are not required to conduct verification except in the base year when applications are submitted. These exceptions remain in effect but are relocated from 7 CFR 245.6a(a)(5) to 7 CFR 245.6a(c)(2) by this interim rule.

Clarifying What Information Is Submitted on the Verification Report

LEAs, through their State agencies, submit the FNS–742, School Food Authority Verification Summary Report. We are clarifying, in newly redesignated 7 CFR 245.6a(h), that LEAs and State agencies only report on statutorily required verification activities. For example, an LEA would only report on the results of verifying the required three percent (up to 3,000 applications) of error prone applications. The verification report would not include any applications verified for cause as permitted in 7 CFR 245.6a(c)(7) as set forth in this interim rule.

Unchanged Provisions

The following chart shows other existing verification provisions that have been relocated and rewritten to improve their clarity and conformity with the provisions revised by this interim rule. These policies and procedures provided in these provisions are otherwise unchanged.

Provision	Existing citation	New citation
State agency conducting verification	7 CFR 245.6a(a) Introductory Text	7 CFR 245.6a(c)(1)(i).
Approval with essential documentation	7 CFR 245.6a(a)(1)	7 CFR 245.6a(c)(1)(ii).
Notification of households selected for verification.	7 CFR 245.6a(a)(2) Introductory Text	7 CFR 245.6a(f)(1).
Notification of households/social security numbers.	7 CFR 245.6a(a)(2)(i) through (a)(2)(iv)	7 CFR 245.6a(f)(1)(i) through (f)(1)(v).
Sources of information	7 CFR 245.6a(b) Introductory Text	7 CFR 245.6a(a)(7).
Verification reporting	7 CFR 245.6a(c)	7 CFR 245.6a(h).

Provision	Existing citation	New citation
Nondiscrimination	7 CFR 245.6a(d)	7 CFR 245.6a(i).
Adverse action	7 CFR 245.6a(e)	7 CFR 245.6a(j).

VII. Procedural Matters

Executive Order 12866

This interim rule has been determined to be significant and was reviewed by the Office of Management and Budget under Executive Order 12866.

Regulatory Impact Analysis

Need for Action

This interim rule amends regulations to reflect changes made to the NSLA by Public Law 108–265, the Child Nutrition and WIC Reauthorization Act of 2004, regarding the verification of applications approved for free or reduced price meals in the NSLP and SBP. The provisions of this interim rule are expected to enhance verification efforts which will improve the accuracy of benefits distribution. FNS estimates that the net increase in administrative burden from implementing the provisions of this interim rule will be outweighed by the benefits of improved accuracy in the targeting of benefits.

Benefits

The interim rule is expected to better target NSLP and SBP benefits to eligible children. The rule's requirement that LEAs make greater use of an error-prone sampling method to select applications for verification is expected to reduce the value of improper federal reimbursements. Increased reliance on focused sampling should also reduce the loss of benefits to otherwise eligible applicants who fail to respond to verification requests. Other provisions, such as moving the verification process closer to the beginning of the school year, and requiring LEAs to help applicants through the verification process, are also expected to better align benefit approval with applicant eligibility. Over the fiscal year 2008–2012 period, FNS estimates that the verification process will reduce improper federal meal reimbursements by $19.7 million. This estimate considers only the direct savings that result from recertifying a subset of children whose applications were selected for verification. Additional savings are expected to follow as the data collected from the verification process, and from the FNS' *Access, Participation, Eligibility and Certification* (APEC) study, facilitates the development of guidance, training, and policy options to further reduce certification error.

Costs

FNS estimates that the net increase in administrative burden to LEAs will total $0.13 million over the fiscal year 2008–2012 period.

Regulatory Flexibility Act

This interim rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). Nancy Montanez Johner, Under Secretary for Food, Nutrition and Consumer Services, has certified that this rule will not have a significant economic impact on a substantial number of small entities. Local educational agencies already must conduct verification of a sample of applications for free and reduced school meals. This interim regulation provides additional options for local educational agencies that improve their verification techniques. The Department of Agriculture (the Department) does not anticipate any adverse fiscal impact resulting from implementation of this rulemaking; rather, the Department anticipates that benefits will be more targeted towards eligible children and that local educational agencies will have incentives to work towards improvements in their verification efforts to be able to have more flexibility. Although there may be some burdens associated with this rule, the burdens would not be significant and would be outweighed by the benefits of improved accuracy in the targeting of benefits and in enhanced flexibility for local school districts.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes a requirement for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, the Department generally prepares a written statement, including a cost-benefit analysis. This is done for proposed and final rules that have ''Federal mandates'' which may result in expenditures of $100 million or more in any one year by State, local, or tribal governments, in the aggregate, or by the private sector. When this statement is needed for a rule, section 205 of the UMRA generally requires the Department to identify and consider a reasonable number of regulatory alternatives. It must then adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule.

This interim rule contains no Federal mandates of $100 million or more in any one year (under regulatory provisions of Title II of the UMRA) for State, local, and tribal governments or the private sector. Thus, this interim rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 12372

The National School Lunch Program and the School Breakfast Program are listed in the Catalog of Federal Domestic Assistance under Nos. 10.555 and 10.553, respectively. For the reasons set forth in the final rule in 7 CFR Part 3015, Subpart V, and final rule related notice at 48 FR 29114, June 24, 1983, these programs are included in the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

Federalism Summary Impact Statement

Executive Order 13132 requires Federal agencies to consider the impact of their regulatory actions on State and local governments. Where such actions have federalism implications, agencies are directed to provide a statement for inclusion in the preamble to the regulation describing the agency's considerations in terms of the three categories called for under section (6)(a)(B) of Executive Order 13132:

Prior Consultation With State Officials

Prior to drafting this interim final rule, we received input from State and local agencies at various times including national and regional meetings. The Child Nutrition Programs are State administered, federally funded programs. FNS sponsored a meeting in September 2004 to brief State agencies on the amendments to the NSLA and Child Nutrition Act made by the Child Nutrition and WIC Reauthorization Act of 2004 (Pub. L. 108–265). FNS received a number of comments from participants at that meeting as well as from meetings held within various states. In addition, FNS staff had informal and formal discussions with State and local officials on an ongoing basis regarding program implementation and performance. Upon request,

representatives of FNS have attended state-sponsored meetings to brief both State and local cooperators on the changes and to obtain feedback that forms the basis for any discretionary decisions in this rule.

Nature of Concerns and the Need to Issue This Rule

State and local agencies are generally concerned about the paperwork and financial burdens placed on food service to conduct verification, especially in light of the potential for larger sample sizes and additional follow-up activities while local educational agencies are continuing to implement other changes to the verification reporting process.

The issuance of an interim rule was permitted by amendments made to the Richard B. Russell National School Lunch Act in section 501(b) of Public Law 108–265. This rule implements provision of Public Law 108–265. FNS plans to assist States with implementing the revised verification procedures and to issue additional guidance as needed in response to operational issues. The comment period will also allow States to share their operational concerns so that problems may be addressed in development of the final rule.

Extent to Which We Meet These Concerns

We believe that we adequately address the issues of paperwork and financial burdens by providing State and local flexibility in the manner in which local educational agencies implement the required verification sample sizes and other required activities. Additionally, expansion of the categories of children who are not subject to verification reduces the burden placed on local educational agencies and households. Those local educational agencies can reduce the number of applications/households that are subject to verification by qualifying for one of the verification sample size alternatives.

This rule is intended to have a preemptive effect on any State law that conflicts with its provisions or that would otherwise impede its full implementation. To the extent the rule includes discretionary changes, the Department has established compliance timeframes which give due consideration to State agency processes for notification of customers and stakeholders for the implementation of the new procedures in local offices.

Executive Order 12988

This interim final rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would impede its full implementation. This rule is not intended to have retroactive effect unless that is specified in the **DATES** section of the preamble of the rule. Before any judicial challenge to the provisions of this rule or the application of its provisions, all administrative procedures that apply must be followed. The only administrative appeal procedures relevant to this interim rule are the hearings that local educational agencies must provide for decisions relating to eligibility for free and reduced price meals and free milk which are found at 7 CFR 245.7 for the NSLP, SBP, and SMP in schools.

Civil Rights Impact Analysis

FNS has reviewed this interim rule in accordance with the Department Regulations 4300–4, ''Civil Rights Impact Analysis,'' to identify any major civil rights impacts the rule might have on children on the basis of race, color, national origin, sex, age or disability. After a careful review of the rule's intent and provisions, FNS has determined that this interim rule facilitates the participation of all eligible participants and does not establish any new burdens.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chap. 35; see 5 CFR part 1320) this rule contains information collections that are subject to review and approval by the Office of Management and Budget (OMB) before they can be implemented. FNS invites comments on information collection requirements contained in this interim rule for which FNS intends to seek approval. Those requirements will not become effective until approved by OMB. When these information collection requirements have been approved, FNS will publish separate action in the **Federal Register**.

Comments on the information collection requirements contained in this interim rule will be accepted under an abbreviated comment period of 30 days. To be assured of consideration, comments must be received by January 20, 2009.

Comments may be sent to the Office of Information and Regulatory Affairs (OIRA), either by fax to 202–395–6974 or by e-mail to *OIRA submission@omb.eop.gov* marked ''attention, desk office for FNS.'' Please also send a copy of your comments or requests for information to: Ms. Lynn Rodgers-Kuperman, Chief, Program Analysis and Monitoring Branch, Child Nutrition Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Room 640, Alexandria, Virginia 22302. Comments will also be accepted if sent through *http://www.regulations.gov* by 11:59 p.m. on January 20, 2009. For further information or copies of the information collection, please contact Ms. Rodgers-Kuperman at the above address.

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. All responses to this Notice will be summarized and included in the request for OMB approval and will become a matter of public record.

Title: 7 CFR Part 245 Determining Eligibility for Free and Reduced Price Meals and Free Milk in Schools.

OMB Number: 0584–0026.

Expiration Date: 01/21/2010 .

Type of Request: Revision of currently approved information collection.

Abstract: Section 105 of the Child Nutrition and WIC Reauthorization Act of 2004 (Pub. L. 108–265), amends section 9(b) of the Richard B. Russell National School Lunch Act (42. U.S.C. 1728(a)) by revising the requirements and procedures for conducting verification of a sample of applications approved for free or reduced price school meals. These new requirements are being codified under 7 CFR Part 245, Determining Eligibility for Free and Reduced Priced Meals and Milk in Schools, and 7 CFR Part 210, National School Lunch Program.

This interim rule implements direct verification procedures that allow local education agencies (LEAs) to request information from a State or local agency administering the Food Stamp Program, Food Distribution Program on Indian Reservations or Temporary Assistance to Needy Families Programs, which have similar eligibility limits without contacting the household directly. Without this provision, all households would be contacted when selected for verification. Also, this rule requires LEAs to follow up with any household

that fails to respond to a request for verification. The paperwork burden for LEAs is due to the requirement to conduct direct verification with the Food Stamp Program and because of the requirement to conduct follow-up with households that fail to respond to the request to provide documentation to verify eligibility.

Affected Public: Local educational agencies.

ESTIMATED ANNUALIZED BURDEN

	7 CFR section	Annual No. of respondents	Number of responses per respondent	Average burden per response	Annual burden
Recordkeeping: Local educational agencies (LEAs) conduct verification using agency records					
Currently Approved	245.6a(b)(3)	16,342	1	.25	4,085.5
Total Proposed LEAs	245.6a(g)	16,342	1	.33	5,392.9
Difference					+1,307.4
Reporting: LEAs conduct one follow-up with verification non-respondents					
Currently Approved		0	0	0	0
Total Proposed LEAs	245.6a(f)(6)	3,824	1	.05	191.2
Difference					+191.2
Total New Burden					+1,498.6

Estimated Number of Respondents: 16,342.

Estimated Number of Responses per Respondent: 2.

Estimated Hours per Response: .09.

Estimated Total Annual Burden: 1,498.6.

E-Government Act Compliance

FNS is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Public Participation

This interim rule is being published without prior notice or public comment under authority of 5 U.S.C. 553(b)(3)(A) and (B). In recognition of the need to implement the provisions on verification and direct verification, as promptly as possible, in order to reduce the burden on participants and local educational agencies, section 501(b)(4) of Public Law 108–265 allows the Department to issue interim rules on these and other provisions in that law. This rule implements a number of provisions of Public Law 108–265 which were described in very specific statutory language. Consequently, these procedures were largely non-discretionary; including standard and alternative verification sample sizes, local educational agency qualifications for using an alternative sample size, detailed requirements for confirmation reviews and household contacts and mandatory dates for various aspects of the verification process. Further, due to the statutory mandate in section 501(a) of Public Law 108–265 to implement these provisions as soon as possible through guidance, these procedures have been in effect since School Year 2004–2005. Based on these factors, the Department has determined in accordance with 5 U.S.C. 553(b) that Notice of Proposed Rulemaking and Opportunity for Public Comments prior to codification is unnecessary and contrary to the public interest. However, this rule is being promulgated as an interim rule and, as such, provides for a public comment period of 90 days. Comments received during this period will enable the Department to make, in the final rule, identified and need changes resulting from the experience of local educational agencies.

List of Subjects

7 CFR Part 210

Children, Commodity School Program, Food assistance programs, Grants programs—social programs, National School Lunch Program, Nutrition, Reporting and recordkeeping requirements, Surplus agricultural commodities.

7 CFR Part 245

Civil rights, Food assistance programs, Grant programs—education, Grant programs—health, Infants and children, Milk, Reporting and recordkeeping requirements, School breakfast and lunch programs.

■ Accordingly, 7 CFR Parts 210 and 245 are amended to read as follows:

PART 210—NATIONAL SCHOOL LUNCH PROGRAM

■ 1. The authority citation for 7 CFR part 210 continues to read as follows:

Authority: 42 U.S.C. 1751–1760, 1779.

■ 2. In § 210.18:

■ a. Revise paragraph (h)(1)(iii);

■ b. Amend paragraph (h)(1)(iv) by revising the first sentence and by removing the words ''December 15'' from the second sentence and adding in their place the words ''November 15''; and

■ c. Revise paragraph (h)(1)(vi).

The revisions read as follows:

§ 210.18 Administrative reviews.

* * * * *

(h) * * *

(1) * * *

(iii) Determine that applications for verification are selected in accordance with the applicable procedures in § 245.6a(c) of this chapter and that no discrimination exists in the selection process.

(iv) Establish that verification is completed by November 15 (or other date established in accordance with § 245.6a(b)(2)(i) or (b)(2)(ii) of this chapter) including any follow-up activities as required in § 245.6a(f)(6) of this chapter. * * *

* * * * *

(vi) Ensure that verification records are maintained as required by § 245.6a(i) of this chapter.

* * * * *

PART 245—DETERMINING ELIGIBILITY FOR FREE AND REDUCED PRICE MEALS AND FREE MILK IN SCHOOLS

■ 1. The authority citation is revised to read as follows:

Authority: 42 U.S.C. 1752, 1758, 1759a, 1772, 1773, and 1779.

■ 2. In § 245.2, revise the definition of *Verification* to read as follows:

§ 245.2 Definitions.

* * * * *

Verification means confirmation of eligibility for free or reduced price benefits under the National School Lunch Program or School Breakfast Program. Verification shall include confirmation of income eligibility and, at State or local discretion, may also include confirmation of any other information required in the application which is defined as *Documentation* in § 245.2. Such verification may be accomplished by examining information provided by the household such as wage stubs, or by other means as specified in § 245.6a(a)(7). If a Food Stamp Program or TANF case number or a FDPIR case number or other identifier is provided for a child, verification for such child shall only include confirmation that the child is a member of a household receiving food stamps, TANF or FDPIR benefits. Verification may also be completed through direct contact with one or more of the public agencies as specified in § 245.6a(g).

■ 3. In § 245.6a:

■ a. revise paragraphs (a) and (b);

■ b. redesignate paragraphs (c), (d) and (e) as paragraphs (h), (i) and (j), respectively;

■ c. add new paragraphs (c), (d), (e), (f), and (g); and

■ d. amend newly redesignated paragraph (h) by revising the first sentence.

The revisions and additions read as follows:

§ 245.6a Verification requirements.

(a) *Definitions.*

(1) *Eligible programs.* For the purposes of this section, the following programs qualify as programs for which a case number may be provided in lieu of income information and that may be used for direct verification purposes:

(i) The Food Stamp Program established under the Food Stamp Act of 1977 (7 U.S.C. 2011 *et seq.*) as defined in § 245.2;

(ii) The Food Distribution Program on Indian Reservations (FDPIR) as defined in § 245.2; and

(iii) A State program funded under the program of block grants to States for temporary assistance for needy families (TANF) as defined in § 245.2.

(2) *Error prone application.* For the purposes of this section, ''error prone application'' means an approved household application that indicates monthly income within $100 or annual income within $1,200 of the applicable income eligibility limit for free or for reduced meals.

(3) *Non-response rate.* For the purposes of this section, ''non-response rate'' means the percentage of approved household applications for which verification information was not obtained by the local educational agency after verification was attempted. The non-response rate is reported on the FNS–742 in accordance with paragraph (h) of this section.

(4) *Official poverty line.* For the purposes of this section, ''official poverty line'' means that described in section 1902(l)(2)(A) of the Social Security Act (42 U.S.C. 1396a(l)(2)(A)).

(5) *Sample size.* For the purposes of this section, ''sample size'' means the number of approved applications that a local educational agency is required to verify based on the number of approved applications on file as of October 1 of the current school year.

(6) *School year.* For the purposes of this section, a school year means a period of 12 calendar months beginning July 1 of any year and ending June 30 of the following year.

(7) *Sources of information.* For the purposes of this section, sources of information for verification may include written evidence, collateral contacts, and systems of records as follows:

(i) Written evidence shall be used as the primary source of information for verification. Written evidence includes written confirmation of a household's circumstances, such as wage stubs, award letters, and letters from employers. Whenever written evidence is insufficient to confirm income information on the application or current eligibility, the local educational agency may require collateral contacts.

(ii) Collateral contacts are verbal confirmations of a household's circumstances by a person outside of the household. The collateral contact may be made in person or by phone. The verifying official may select a collateral contact if the household fails to designate one or designates one which is unacceptable to the verifying official. If the verifying official designates a collateral contact, the contact shall not be made without providing written or oral notice to the household. At the time of this notice, the household shall be informed that it may consent to the contact or provide acceptable documentation in another form. If the household refuses to choose one of these options, its eligibility shall be terminated in accordance with the normal procedures for failure to cooperate with verification efforts. Collateral contacts could include employers, social service agencies, and migrant agencies.

(iii) Agency records to which the State agency or local educational agency may have access are not considered collateral contacts. Information concerning income, household size, or Food Stamp Program, FDPIR, or TANF eligibility maintained by other government agencies to which the State agency, the local educational agency or school can legally gain access may be used to confirm a household's income, size, or receipt of benefits. Information may also be obtained from individuals or agencies serving the homeless, as defined under section 725(2) of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11434a(2)); administering a runaway and homeless youth grant program, as established under the Runaway and Homeless Youth Act (42 U.S.C. 5701); or serving migratory children, as they are defined in section 1309 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6399). Agency records may be used for verification conducted after the household has been notified of its selection for verification or for the direct verification procedures in paragraph (g) of this section. Any information derived from other agencies must be used in accordance with the provisions concerning use and disclosure of eligibility information found in § 245.6(f) through (i) of this part.

(iv) Households which dispute the validity of income information acquired through collateral contacts or a system of records shall be given the opportunity to provide other documentation.

(b) *Deadline and extensions for local educational agencies.*

(1) *Deadline.* The local education agency must complete the verification efforts specified in paragraph (c) of this section not later than November 15 of each school year.

(2) *Deadline extensions.*

(i) The local educational agency may request an extension of the November 15 deadline, in writing, from the State agency. The State agency may approve an extension up to December 15 of the current school year due to natural disaster, civil disorder, strike or other circumstances that prevent the local educational agency from timely completion of verification activities.

(ii) In the case of natural disaster, civil disorder or other local conditions, USDA may substitute alternatives for the verification deadline in paragraph (b)(1) of this section.

(3) *Beginning verification activities.* The local educational agency may conduct verification activity once it begins the application approval process for the current school year and has approved applications on file. However, the final required sample size must be based on the number of approved applications on file as of October 1.

(c) *Verification requirement.*

(1) *General.* The local educational agency must verify eligibility of children in a sample of household applications approved for free and reduced price meal benefits for that school year.

(i) A State may, with the written approval of FNS, assume responsibility for complying with the verification requirements of this section on behalf of its local educational agencies. When assuming such responsibility, States may qualify, if approved by FNS, to use one of the alternative sample sizes provided for in paragraph (c)(4) of this section if qualified under paragraph (d) of this section.

(ii) An application must be approved if it contains the essential documentation specified in the definition of *Documentation* in § 245.2 and, if applicable, the household meets the income eligibility criteria for free or reduced price benefits. Verification efforts must not delay the approval of applications.

(2) *Exceptions from verification.* Verification is not required in residential child care institutions; in schools in which FNS has approved special cash assistance claims based on economic statistics regarding per capita income; or in schools in which all children are served with no separate charge for food service and no special cash assistance is claimed. Local educational agencies in which all schools participate in the special assistance certification and reimbursement alternatives specified in § 245.9 shall meet the verification requirement only in those years in which applications are taken for all children in attendance. Verification of eligibility is not required of households if all children in the household are determined eligible based on documentation provided by the State or local agency responsible for the administration of the Food Stamp Program, FDPIR or TANF or if all children in the household are determined to be homeless, as defined under section 725(2) of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11434a(2)); served by a runaway and homeless youth grant program established under the Runaway and Homeless Youth Act (42 U.S.C. 5701); or are migratory as defined in section 1309 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6399).

(3) *Standard sample size.* Unless eligible for an alternative sample size under paragraph (d) of this section, the sample size for each local educational agency shall equal the lesser of:

(i) Three (3) percent of all applications approved by the local educational agency for the school year, as of October 1 of the school year, selected from error prone applications; or

(ii) 3,000 error prone applications approved by the local educational agency for the school year, as of October 1 of the school year.

(iii) Local educational agencies shall not exceed the standard sample size in paragraphs (c)(3)(i) or (c)(3)(ii) of this section, as applicable, and, unless eligible for one of the alternative sample sizes provided in paragraph (c)(4) of this section, the local educational agency shall not use a smaller sample size than those in paragraphs (c)(3)(i) or (c)(3)(ii) of this section, as applicable.

(iv) If the number of error-prone applications exceeds the required sample size, the local educational agency shall select the required sample at random, *i.e.*, each application has an equal chance of being selected, from the total number of error-prone applications.

(4) *Alternative sample sizes.* If eligible under paragraph (d) of this section for an alternative sample size, the local educational agency may use one of the following alternative sample sizes:

(i) *Alternative One.* The sample size shall equal the lesser of:

(A) 3,000 of all applications selected at random from applications approved by the local educational agency as of October 1 of the school year; or

(B) Three (3) percent of all applications selected at random from applications approved by the local educational agency as of October 1 of the school year.

(ii) *Alternative Two.* The sample size shall equal the lesser of the sum of:

(A) 1,000 of all applications approved by the local educational agency as of October 1 of the school year, selected from error prone applications or

(B) One (1) percent of all applications approved by the local educational agency as of October 1 of the school year, selected from error prone applications PLUS

(C) The lesser of:

(*1*) 500 applications approved by the local educational agency as of October 1 of the school year that provide a case number in lieu of income information showing participation in an eligible program as defined in paragraph (a)(1) of this section; or

(*2*) One-half (½) of one (1) percent of applications approved by the local educational agency as of October 1 of the school year that provide a case number in lieu of income information showing participation in an eligible program as defined in paragraph (a)(1) of this section.

(5) *Completing the sample size.* When there are an insufficient number of error prone applications or applications with case number to meet the sample sizes provided for in paragraphs (c)(3) or (c)(4) of this section, the local educational agency shall select, at random, additional approved applications to comply with the specified sample size requirements.

(6) *Local conditions.* In the case of natural disaster, civil disorder, strike or other local conditions as determined by FNS, FNS may substitute alternatives for the sample size and sample selection criteria in paragraphs (c)(3) and (c)(4) of this section.

(7) *Verification for cause.* In addition to the required verification sample, local educational agencies must verify any questionable application and should, on a case-by-case basis, verify any application for cause such as an application on which a household reports zero income or when the local educational agency is aware of additional income or persons in the household. Any application verified for cause is not considered part of the required sample size. If the local educational agency verifies a household's application for cause, all verification procedures in this section must be followed.

(d) *Eligibility for alternative sample sizes.*

(1) *State agency oversight.* At a minimum, the State agency shall establish a procedure for local educational agencies to designate use of an alternative sample size and may set a deadline for such notification. The State agency may also establish criteria for reviewing and approving the use of an alternative sample size, including deadlines for submissions.

(2) *Lowered non-response rate.* Any local educational agency is eligible to use one of the alternative sample sizes in paragraph (c)(4) of this section for any school year when the non-response rate for the preceding school year is less than twenty percent.

(3) *Improved non-response rate.* A local educational agency with more than 20,000 children approved by application as eligible for free or reduced price meals as of October 1 of the school year is eligible to use one of the alternative sample sizes in paragraph (c)(4) of this section for any school year when the non-response rate for the preceding school year is at least ten percent below the non-response rate for the second preceding school year.

(4) *Continuing eligibility for alternative sample sizes.* The local

educational agency must annually determine if it is eligible to use one of the alternative sample sizes provided in paragraph (c)(4) of this section. If qualified, the local educational agency shall contact the State agency in accordance with procedures established by the State agency under paragraph (d)(1) of this section.

(e) *Activities prior to household notification.*

(1) *Confirmation of a household's initial eligibility.*

(i) Prior to conducting any other verification activity, an individual, other than the individual who made the initial eligibility determination, shall review for accuracy each approved application selected for verification to ensure that the initial determination was correct. If the initial determination was correct, the local educational agency shall verify the approved application. If the initial determination was incorrect, the local educational agency must:

(A) If the eligibility status changes from reduced price to free, make the increased benefits immediately available and notify the household of the change in benefits; the local educational agency will then verify the application;

(B) if the eligibility status changes from free to reduced price, first verify the application and then notify the household of the correct eligibility status after verification is completed and, if required, send the household a notice of adverse action in accordance with paragraph (j) of this section; or

(C) if the eligibility status changes from free or reduced price to paid, send the household a notice of adverse action in accordance with paragraph (j) of this section and do not conduct verification on this application and select a similar application (for example, another error-prone application) to replace it.

(ii) The requirements in paragraph (e)(1)(i) of this section are waived if the local educational agency is using a technology-based system that demonstrates a high level of accuracy in processing an initial eligibility determination based on the income eligibility guidelines for the National School Lunch Program. Any local educational agency that conducts a confirmation review of all applications at the time of certification meets this requirement. The State agency may request documentation to support the accuracy of the local educational agency's system. If the State agency determines that the technology-based system is inadequate, it may require that the local educational agency conduct a confirmation review of each application selected for verification.

(2) *Replacing applications.* The local educational agency may, on a case-by-case basis, replace up to five percent of applications selected and confirmed for verification. Applications may be replaced when the local educational agency determines that the household would be unable to satisfactorily respond to the verification request. Any application removed shall be replaced with another approved application selected on the same basis (*i.e.*, an error-prone application must be substituted for a withdrawn error-prone application).

(f) *Verification procedures and assistance for households.*

(1) *Notification of selection.* Other than households verified through the direct verification process in paragraph (g) of this section, households selected for verification shall be provided written notice that their applications were selected for verification and that they are required, by such date as determined by the local educational agency, to submit the requested information to verify eligibility for free or reduced price meals. Any communications with households concerning verification must be in an understandable and uniform format and, to the maximum extent practicable, in a language that parents and guardians can understand. The written notice shall also include a telephone number for assistance in accordance with paragraph (f)(5) of this section. These households shall be advised of the type or types of information and/or documents acceptable to the school. This information must include a social security number for each adult household member or an indication that such member does not have one. Local educational agencies must inform selected households that:

(i) Section 9 of the Richard B. Russell National School Lunch Act requires that, unless the child's Food Stamp Program/FDPIR case number or other FDPIR identifier or TANF case number was provided, households selected for verification must provide the social security number of each adult household member;

(ii) In an adult member does not posses a social security number, that adult member must indicate that s/he does not possess one;

(iii) Provision of a social security number is not mandatory but if a social security number is not provided for each adult household member or an indication is not made that he/she does not possess one, benefits will be terminated;

(iv) The social security numbers may be used to identify household members in carrying out efforts to verify the correctness of information stated on the application and continued eligibility for the program. These verification efforts may be carried out through program reviews, audits, and investigations and may include contacting offices administering means-tested programs or the State employment security office and checking documentation produced by household members to prove the amount of income received. These verification efforts may also include contacting employers to determine income.

(v) The provisos in paragraphs (f)(1)(i) through (f)(1)(iv) of this section must be provided to the attention of each adult household member disclosing his/her social security number. State agencies and local educational agencies must ensure that the notice complies with section 7 of Public Law 93–579 (Privacy Act of 1974).

(vi) Households notified of their selection for verification must also be informed that, in lieu of any information that would otherwise be required, they can submit proof that the children are members of a household receiving assistance under the Food Stamp Program, FDPIR or TANF as described in paragraph (f)(3) of this section to verify the free meal eligibility of a child who is a member of a household receiving assistance under the Food Stamp Program, FDPIR or TANF household. Households must also be informed that, in lieu of any information that would otherwise be required, they may request that the local educational agency contact the appropriate officials to confirm that their children are homeless, as defined under section 725(2) of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11434a(2)); are served by a runaway and homeless youth grant program established under the Runaway and Homeless Youth Act (42 U.S.C. 5701 *et seq.*); or are migratory as defined in section 1309 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6399). Households notified of their selection for verification shall be advised that failure to cooperate with verification efforts will result in the termination of benefits.

(2) *Documentation timeframe.* Households selected and notified of their selection for verification must provide documentation of income. The documentation must indicate the source, amount and frequency of all income and can be for any point in time between the month prior to application for school meal benefits and the time

the household is requested to provide income documentation.

(3) *Food Stamp FDPIR or TANF recipients.* On applications where households have furnished Food Stamp Program or TANF case numbers or FDPIR case numbers or other FDPIR identifiers, verification shall be accomplished by confirming with the Food Stamp Program, FDPIR, or TANF office that at least one child who is eligible because a case number was furnished, is a member of a household participating in one of the eligible programs in paragraph (a)(1) of this section. The household may also provide a copy of ''Notice of Eligibility'' for the Food Stamp Program, FDPIR or the TANF Program or equivalent official documentation issued by the Food Stamp Program, FDPIR or TANF office which confirms that at least one child who is eligible because a case number was provided is a member of a household receiving assistance under the Food Stamp Program, FDPIR or the TANF program. An identification card for these programs is not acceptable as verification unless it contains an expiration date. If it is not established that at least one child is a member of a household receiving assistance under the Food Stamp Program, FDPIR or the TANF program (in accordance with the timeframe in paragraph (f)(2) of this section), the procedures for adverse action specified in paragraph (j) of this section must be followed.

(4) *Household cooperation.* If a household refuses to cooperate with efforts to verify, eligibility for free or reduced price benefits shall be terminated in accordance with paragraph (j) of this section. Households which refuse to complete the verification process and which are consequently determined ineligible for such benefits shall be counted toward meeting the local educational agency's required sample of verified applications.

(5) *Telephone assistance.* The local educational agency shall provide a telephone number to households selected for verification to call free of charge to obtain information about the verification process. The telephone number must be prominently displayed on the letter to households selected for verification.

(6) *Followup attempts.* The local educational agency shall make at least one attempt to contact any household that does not respond to a verification request. The attempt may be through a telephone call, e-mail, mail or in person and must be documented by the local educational agency. Non-response to the initial request for verification includes no response and incomplete or ambiguous responses that do not permit the local educational agency to resolve the children's eligibility for free or reduced price meal and milk benefits. The local educational agency may contract with another entity to conduct followup activity in accordance with § 210.21 of this chapter, the use and disclosure of information requirements of the Richard B. Russell National School Lunch Act and this section.

(7) *Eligibility changes.* Based on the verification activities, the local educational agency shall make appropriate modifications to the eligibility determinations made initially. The local educational agency must notify the household of any change. Households must be notified of any reduction in benefits in accordance with paragraph (j) of this section. Households with reduced benefits or that are longer eligible for free or reduced price meals must be notified of their right to reapply at any time with documentation of income or participation in one of the eligible programs in paragraph (a)(1) of this section.

(g) *Direct verification.* Local educational agencies may conduct direct verification activities with the eligible programs defined in paragraph (a)(1) of this section and with the public agency that administers the State plan for medical assistance under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*), (Medicaid), and under title XXI of the Social Security Act (42 U.S.C. 1397aa *et seq.*), the State Children's Health Insurance Program (SCHIP) as defined in § 245.2. Records from the public agency may be used to verify income and program participation. The public agency's records are subject to the timeframe in paragraph (g)(5) of this section. Direct verification must be conducted prior to contacting the household for documentation.

(1) *Names submitted.* The local educational agency must only submit the names of school children certified for free or reduced price meal benefits or free milk to the agency administering an eligible program, the Medicaid program or the SCHIP program. Names and other identifiers of adult or non-school children must not be submitted for direct verification purposes.

(2) *Eligible programs.* If information obtained through direct verification of an application for free or reduced price meal benefits indicates a child is participating in one of the eligible programs in paragraph (a)(1) of this section, no additional verification is required.

(3) *States with Medicaid Income Limits of 133%.* In States in which the income eligibility limit applied in the Medicaid program or in SCHIP is not more than 133% of the official poverty line or in States that otherwise identify households that have income that is not more than 133% of the official poverty line, records from these agencies may be used to verify eligibility. If information obtained through direct verification with these programs verifies the household's eligibility status, no additional verification is required.

(4) *States with Medicaid Income Limits between 133%–185%.* In States in which the income eligibility limit applied in the Medicaid program or in SCHIP exceeds 133% of the official poverty line, direct verification information must include either the percentage of the official poverty line upon which the applicant's Medicaid participation is based or Medicaid income and Medicaid household size in order to determine that the applicant is either at or below 133% of the Federal poverty line, or is between 133% and 185% of the Federal poverty line. Verification for children approved for free meals is complete if Medicaid data indicates that the percentage is at or below 133% of the Federal poverty line. Verification for children approved for reduced price meals is complete if Medicaid data indicates that the percentage is at or below 185% of the Federal poverty line. If information obtained through direct verification with these programs verifies eligibility status, no additional verification is required.

(5) *Documentation timeframe.* For the purposes of direct verification, documentation must be the most recent available but such documentation must indicate eligibility for participation or income within the 180-day period ending on the date of application. In addition, local educational agencies may use documentation, which must be within the 180-day period ending on the date of application, for any one month or for all months in the period from the month prior to application through the month direct verification is conducted. The information provided only needs to indicate eligibility for participation in the program at that point in time, not that the child was certified for that program's benefits within the 180-day period.

(6) *Incomplete information.* If it is the information provided by the public agency does not verify eligibility, the local educational agency must conduct verification in accordance with paragraph (f) of this section. In addition, households must be able to dispute the validity of income information acquired through direct verification and shall be

given the opportunity to provide other documentation.

(h) *Verification reporting and recordkeeping requirements.* By March 1, each local educational agency must report information related to its annual statutorily required verification activity, which excludes verification conducted in accordance with paragraph (c)(7) of this section, to the State agency in accordance with guidelines provided by FNS.

Animal and Plant Health Inspection Service

7 CFR Part 319

[Docket No. APHIS–2007–0111]

RIN 0579–AC87

Importation of Ash Plants

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule as final rule.

SUMMARY: We are adopting as a final rule, without change, an interim rule that amended the regulations governing the importation of nursery stock to prohibit or restrict the importation of ash (*Fraxinus* spp.) plants for planting, except seed, from all foreign countries except for certain areas in Canada that are not regulated areas for emerald ash borer. The interim rule was necessary to prevent further introductions of emerald ash borer into the United States and to prevent the artificial spread of this destructive plant pest.

DATES: Effective on December 18, 2008, we are adopting as a final rule the interim rule published at 73 FR 54665–54667 on September 23, 2008.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Tschanz, Senior Risk Manager, Commodity Import Analysis and Operations, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1231; (301) 734–5306.

SUPPLEMENTARY INFORMATION:

Background

The emerald ash borer (EAB, *Agrilus planipennis*) is a highly destructive wood-boring insect that attacks ash trees (*Fraxinus* spp., including green ash, white ash, black ash, and several horticultural varieties of ash). The insect, which is indigenous to Asia and known to occur in China, Korea, Japan, Mongolia, the Russian Far East, and Taiwan, eventually kills healthy ash trees after it bores beneath their bark and disrupts their vascular tissues. We do not know the full extent of the distribution of EAB throughout Asia and in other regions, nor do we know if there are other serious plant pests affecting *Fraxinus* spp. plants for planting present elsewhere in the world.

The regulations in 7 CFR part 319, ''Foreign Quarantine Notices,'' prohibit or restrict the importation of certain plants and plant products to prevent the introduction or dissemination of plant pests and noxious weeds in the United States. In an interim rule [1] effective and published in the **Federal Register** on September 23, 2008 (73 FR 54665–54667, Docket No. APHIS–2007–0111), we amended the regulations in § 319.37–2(a) to prohibit imports of ash (*Fraxinus* spp.) plants for planting, except seed, from all foreign countries, with the exception of areas of Canada that are not regulated for EAB. To reflect that prohibition, we also amended § 319.37–7(a)(3) by removing *Fraxinus* spp. from the list of plants requiring postentry quarantine.

Comments on the interim rule were required to be received on or before November 24, 2008. We received one comment by that date. The comment was from a State entomologist who expressed support for the interim rule. Therefore, for the reasons given in the interim rule, we are adopting the interim rule as a final rule without change.

This action also affirms information contained in the interim rule concerning Executive Order 12866 and the Regulatory Flexibility Act, Executive Order 12988, and the Paperwork Reduction Act. Further, for this action, the Office of Management and Budget has waived its review under Executive Order 12866.

PART 319—FOREIGN QUARANTINE NOTICES

■ Accordingly, we are adopting as a final rule, without change, the interim rule that amended 7 CFR part 319 and that was published at 73 FR 54665–54667 on September 23, 2008.

Done in Washington, DC, this 12th day of December 2008.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

Importation of Baby Squash and Baby Courgettes From Zambia

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the fruits and vegetables regulations to allow the importation into the continental United States of baby squash and baby courgettes from Zambia. As a condition of entry, both commodities must be produced in accordance with a systems approach that includes requirements for pest exclusion at the production site, fruit fly trapping inside and outside the production site, and pest-excluding packinghouse procedures. Both commodities must also be accompanied by a phytosanitary certificate with an additional declaration stating that the baby squash or baby courgettes have been produced in accordance with the requirements of the systems approach. This action will allow the importation of baby squash and baby courgettes from Zambia into the United States while continuing to provide protection against the introduction of quarantine pests.

DATES: Effective Date: January 20, 2009.

FOR FURTHER INFORMATION CONTACT: Shirley Wager Page, Branch Chief, Commodity Import Analysis and Operations, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1231; (301) 734–8758.

SUPPLEMENTARY INFORMATION:

Background

The regulations in ''Subpart-Fruits and Vegetables'' (7 CFR 319.56 through

319.56–47, referred to below as the regulations) prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests that are new to or not widely distributed within the United States.

On May 16, 2008, we published in the **Federal Register** (73 FR 28372–28377, Docket No. APHIS–2007–0144) a proposal [1] to amend the fruits and vegetables regulations to allow the importation into the continental United States of baby squash and baby courgettes from Zambia. As a condition of entry, we proposed to require that both commodities be produced in accordance with a systems approach that would include requirements for pest exclusion at the production site, fruit fly trapping inside and outside the production site, and pest-excluding packinghouse procedures. We also proposed to require that both commodities be accompanied by a phytosanitary certificate with an additional declaration stating that the baby squash or baby courgettes have been produced in accordance with the proposed requirements.

We solicited comments concerning our proposal for 60 days ending July 15, 2008. We received one comment by that date, from a representative of a State government. The issues raised in that comment are discussed below.

The systems approach we proposed was designed to mitigate, among other quarantine pests, three moths, *Diaphania indica, Helicoverpa armigera,* and *Spodoptera littoralis.* The commenter stated that, because these pests are internal feeders, inspection and detection at origin and destination are problematic, and reliance on inspection places the commenter's State at high risk of introduction of these pests. The commenter further stated that the two pests that have the highest unmitigated risk, *H. armigera* and *S. littoralis,* are of great concern in the commenter's State. Yet, the commenter stated, there are no real mitigative measures to exclude these pests other than insect-exclusionary greenhouses; there is no trapping requirement or specific inspection regime to assure there have been no breaches of greenhouses.

Under the final rule, the greenhouses and packinghouses will have to be approved jointly by the Zambian national plant protection organization (NPPO) and APHIS and designed to be pest-free. In addition, inspection will not be performed solely on the commodities; the greenhouses themselves will be inspected monthly for the presence of the pests. If any quarantine pests are found in a greenhouse, that greenhouse will be prohibited from exporting until corrective action is taken. Thus, we are employing more mitigations than simple commodity inspection to prevent baby squash and baby courgettes imported from Zambia from being infested with these pests.

We have employed measures similar to the ones we proposed to mitigate the risk associated with *H. armigera* and *S. littoralis* in other import programs. For example, the regulations in § 319.56–28(e), which allow the importation of tomatoes from Australia under certain conditions, require greenhouses to be registered with and approved by the Australian NPPO and to be inspected by the Australian NPPO to establish freedom from *H. armigera* and *S. littoralis.* Similar measures are used to mitigate the risk associated with *H. armigera* and *S. littoralis* in the regulations governing the importation of peppers from Korea in § 319.56–42. These measures have been effective at preventing the introduction of *H. armigera* and *S. littoralis* into the United States via the importation of those commodities. We have determined that they will be equally effective when employed to prevent the introduction of these pests via baby squash and baby courgettes from Zambia.

We proposed that the Zambian NPPO or its approved designee be authorized to carry out certain functions. The commenter asked who would be the designee and who would approve the designee.

As discussed in the proposed rule, an approved designee is an entity with which the NPPO creates a formal agreement that allows that entity to certify that the appropriate procedures have been followed. Thus, the NPPO approves an approved designee. The approved designee can be a contracted entity, a coalition of growers, or the growers themselves. APHIS authorizes NPPOs to use designees to perform certain phytosanitary functions in other import programs, such as the cut flower import program described in § 319.74–2.

The commenter stated that the proposal indicates APHIS can monitor the production sites before and during harvest. The commenter further stated that the word ''can'' is meaningless and recommended that the text in question read ''APHIS will monitor the production sites.''

The proposed language specifically stated that APHIS must be allowed to inspect or monitor the greenhouses. We consider this language to be appropriate, as it may not be necessary for APHIS to inspect or monitor the greenhouses in all cases. We will inspect or monitor the greenhouses if we have reason to believe that the risks associated with the quarantine pests might not be effectively mitigated in the greenhouses.

The commenter stated that the use of McPhail traps as a detection tool is problematic, as they have very limited sensitivity in detecting low-level fruit fly populations.

We have determined that McPhail traps are the appropriate type to use for the trapping due to their capacity to catch important fruit fly species of quarantine significance for which no specific lures exist, such as the *Dacus* spp. fruit flies identified as quarantine pests in the pest risk assessment. Accordingly, the risk management document provided along with the proposed rule reflects this. However, the regulations specifically require the use of traps approved by APHIS, meaning that we can change the type of fruit fly trap used if a trap better suited to *Dacus* spp. fruit flies becomes available.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, without change.

Executive Order 12866 and Regulatory Flexibility Act

This final rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

In accordance with the Regulatory Flexibility Act, we have analyzed the potential economic effects of this action on small entities.

This analysis examines potential impacts for U.S. small entities from the importation of baby squash and baby courgettes (zucchini) from Zambia into the United States. The analysis is set forth in terms of squash generally. As background, we provide a brief overview of squash production and trade by the United States. This is followed with an estimate of price and welfare effects of the rule based on assumed levels of squash imports from Zambia. Finally, we describe the expected impact on small entities.

[1] To view the proposed rule and the comment we received, go to *http://www.regulations.gov/fdmspublic/component/main?main=DocketDetail&d=APHIS-2007-0144.*

U.S. Squash Production and Trade

The United States is a major squash producer and importer.[2] The United States produced 430,100 metric tons (MT) of squash valued at $229 million in 2006, while imports that year totaled 240,590 MT. Squash production occurs in many States. However, the top 10 States (Georgia, Florida, California, New York, Michigan, Ohio, Texas, North Carolina, Oregon, and New Jersey) accounted for 98 percent of total cash receipts in 2006.[3]

As shown in table 1, U.S. squash production increased from 398,800 MT in 2002 to 430,100 MT in 2006, an annual growth rate of about 1.6 percent. Similarly, consumption increased from 605,970 MT to 665,730 MT. During the same period, U.S. squash imports increased from 210,930 MT in 2002 to 240,590 MT in 2006. Mexico accounted by far for the largest share of U.S. imports (95.6 percent), followed distantly by Costa Rica (1.6 percent), and Canada (1.1 percent). Other minor suppliers include Honduras, Panama, New Zealand, Guatemala, and Nicaragua. The United States was a net importer throughout this period, with average annual imports (over 234,000 MT) dwarfing exports (less than 4,300 MT). Imports from Zambia will be small compared to an already large import base.[4]

TABLE 1—U.S. SQUASH PRODUCTION, CONSUMPTION, PRICE, EXPORTS AND IMPORTS, 2002–2006

Year	Production (MT)	Consumption (MT)	Price per MT	Exports in MT	Imports in MT
2002	398,800	605,970	$882	3,770	210,930
2003	365,650	602,880	1,047	3,810	241,040
2004	401,330	637,650	992	4,090	240,410
2005	378,030	611,090	1,047	4,820	237,880
2006	430,100	665,730	1,157	4,960	240,590
5-year average (2002–2006)	394,780	624,670	1,025	4,290	234,170

Sources: USDA/NASS, Vegetables 2006 Summary, January 2007; wholesale prices are from USDA/NASS, Fresh market vegetables prices and yield data, 2002–2006; trade data are from USDA/Foreign Agricultural Service, The Global Trade Atlas: Global Trade Information Services, Inc., Country Edition, August 2007.

Impact of Potential Fresh Squash Imports

We estimate the impact of baby squash and baby courgettes imports from Zambia on U.S. production, consumption, and prices using a net trade welfare model. The data used were obtained from the Foreign Agricultural Service (FAS); The Global Trade Atlas: Global Trade Information Services, Inc., Country Edition, August 2007; and United Nations' Food and Agriculture Organization FAOstat data (*http://faostat.fao.org*). The demand and supply elasticities used are −0.66 and 0.12, respectively.[5]

Our analysis is in terms of the overall squash industry of the United States. If data were available that would allow us to estimate the impact of this rule only in terms of the markets for baby squash and baby courgettes, we would expect the effects to be somewhat larger than those reported here, but still insignificant.

We model three levels of squash exports to the United States from Zambia: (1) 260 MT, average annual global exports of squash by Zambia (2004–2006); (2) 400 MT, the amount of squash that the Government of Zambia has projected would be exported to the United States; and (3) 1,000 MT, a quantity that is 2½ times Zambia's projected exports to the United States.

Table 2 presents the changes that we estimate could result from the final rule. These include annual changes in U.S. consumption, production, wholesale price, consumer welfare, producer welfare, and net welfare. The medium level of assumed squash exports to the United States of 400 MT (as projected by the Government of Zambia) would result in a decline of $0.89 per MT in the wholesale price of squash and a fall in U.S. production of 41 MT. Consumption would increase by 359 MT. Producer welfare would decline by $347,180 and consumer welfare would increase by $558,240, yielding an annual net benefit of about $211,060. Other results are as shown in table 2 below.

TABLE 2—ESTIMATED IMPACT OF SQUASH IMPORTS FROM ZAMBIA ON THE UNITED STATES ECONOMY FOR THREE IMPORT SCENARIOS

	[1] 260	[2] 400	[3] 1,000
Assumed annual squash imports, MT	260	400	1,000
Change in U.S. consumption, MT	234	359	898
Change in U.S. production, MT	−26	−41	−102
Change in wholesale price of squash, dollars per MT	−$0.58	−$0.89	−$2.22
Change in consumer welfare	$362,820	$558,240	$1,396,210
Change in producer welfare	−$225,670	−$347,180	−$867,890

[2] Squash can be classified depending on whether it is harvested as immature fruit (summer squash) or mature fruit (winter squash). Summer squash, such as zucchini (also known as courgette), pattypan, and yellow crookneck are harvested and consumed during the growing season, while the skin is still tender and the fruit relatively small. Winter squash such as butternut, hubbard, buttercup, ambercup, acorn, spaghetti squash, and pumpkin are harvested at maturity, generally the end of summer, cured to further harden the skin, and stored in a cool place for eating later. They generally require longer cooking time than summer squash.

[3] USDA/National Agricultural Statistics Service (NASS), Vegetables 2006 Summary, January 2007.

[4] Reliable production data are not available for Zambia. Squash exported to the United States are to be grown in insect-proof, pest-free greenhouses at approved production sites. These sites are in the process of being constructed. The Zambian Government expects to export around 400 MT of fresh squash to the United States annually. It is not clear whether some additional amount would be produced for export to other countries.

TABLE 2—ESTIMATED IMPACT OF SQUASH IMPORTS FROM ZAMBIA ON THE UNITED STATES ECONOMY FOR THREE IMPORT SCENARIOS—Continued

Annual net benefit	$137,150	$211,060	$528,330

Note: The baseline data used are 5-year annual averages for production, consumption, prices, exports, and imports, as reported in the last row of table 1. The demand and supply elasticities used are −0.66 and 0.12, respectively (Jaime E. Malaga, Gary W. Williams, and Stephen W. Fuller, ''U.S.-Mexico fresh vegetable trade: the effects of trade liberalization and economic growth,'' *Agricultural Economics,* Vol. 26 (October 2001): 45–55).

[1] Three-year (2004 to 2006) average total squash exports by Zambia.

[2] Annual exports of fresh baby squash and baby courgettes to the United States, as projected by the Government of Zambia.

[3] Two-and-one-half times the projected level of exports of baby squash and baby courgettes by Zambia to the United States.

In all three scenarios, consumer welfare gains would outweigh producer welfare losses. Even in the third scenario, in which we assume imports would total 2½ times the level projected by the Government of Zambia, the decline in producer welfare would represent only about two-tenths of 1 percent of cash receipts received from the sale of domestic squash products. The price decline in this third scenario also would be only about two-tenths of 1 percent. Thus, our analysis indicates that U.S. entities will be unlikely to be significantly affected by this rule.

Impact on Small Entities

The Small Business Administration (SBA) has established guidelines for determining which types of firms are considered to be small entities under the Regulatory Flexibility Act. This rule could affect U.S. producers of fresh vegetables (North American Industry Classification System 111219) and some importers of fresh squash. Vegetable-producing establishments are classified as small if their annual receipts are not more than $750,000.[6] According to the 2002 Census of Agriculture, there were 11,035 squash operations with production valued at $288 million. These facilities are considered to be small if their annual receipts are not more than $750,000. Over 98.6 percent of these operations (10,883) are considered to be small while the rest (152) are considered large. Based on share of acreage (nearly 60 percent of the total), the small operations had combined annual cash receipts of about $168 million and an average income of about $15,500, while the large operations had combined sales of about $120 million with an average income of about $787,900. As shown in table 3, the impact of potential squash imports on U.S. producers as a result of this rule will be small. The decrease in producer welfare per small entity is less than $47, or about 0.30 percent of average annual sales of small entities, when we assume 1,000 MT of squash are exported to the United States from Zambia (2½ times Zambia's projected annual exports).

TABLE 3—ECONOMIC IMPACT OF POTENTIAL SQUASH IMPORTS FROM ZAMBIA ON U.S. SMALL ENTITIES, ASSUMING ANNUAL EXPORTS OF 1,000 MT TO THE UNITED STATES, 2006 DOLLARS

Total decline in producer welfare [1]	−$867,890
Decrease in welfare incurred by small entities [2]	−$506,850
Average decrease per acre, small entities [3]	−$12.18
Average decrease per small entity [4]	−$46.50
Average decrease as percentage of average sales, small entities [5]	−0.30 percent

[1] From table 2.

[2] Change in producer welfare multiplied by 58.4 percent, the percentage of total acreage planted by producers with annual revenues of not more than $750,000, that is, small entities. We assume that the change in producer welfare would be proportional to acreage share.

[3] Decrease in producer welfare for small entities divided by 41,619, the number of acres planted by small entities.

[4] Average decrease per acre multiplied by 3.82, the average number of acres per small entity.

[5] Average decrease per small entity divided by $15,500, the average annual revenue per small entity.

Again, table 3 considers a level of importation that is 2½ times the projected imports of baby squash and baby courgettes; at expected levels of importation, the expected economic impacts would be even smaller. In addition, this analysis assumes that gains to Zambian exporters do not come at the expense of any exporting countries; if any displacement occurs, the impact of the rule would be reduced further.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This final rule allows baby squash and baby courgettes to be imported into the United States from Zambia. State and local laws and regulations regarding baby squash and baby courgettes imported under this rule will be preempted while the fruit is in foreign commerce. Fresh vegetables are generally imported for immediate distribution and sale to the consuming public, and remain in foreign commerce until sold to the ultimate consumer. The question of when foreign commerce ceases in other cases must be addressed on a case-by-case basis. No retroactive effect will be given to this rule, and this rule will not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this rule have been approved by the Office of Management and Budget (OMB) under OMB control number 0579–0347.

E-Government Act Compliance

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to

[6] SBA, Small business size standards matched to the North American Industry Classification System 2002, effective October 2007 (*http://www.sba.gov/size/sizetable2002.html*).

provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this rule, please contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851–2908.

List of Subjects in 7 CFR Part 319

Coffee, Cotton, Fruits, Imports, Logs, Nursery stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

■ Accordingly, we are amending 7 CFR part 319 as follows:

PART 319—FOREIGN QUARANTINE NOTICES

■ 1. The authority citation for part 319 continues to read as follows:

Authority: 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

■ 2. A new § 319.56–48 is added to read as follows:

§ 319.56–48 Conditions governing the entry of baby squash and baby courgettes from Zambia.

Baby squash (*Curcurbita maxima* Duchesne) and baby courgettes (C. pepo. L.) measuring 10 to 25 millimeters (0.39 to 0.98 inches) in diameter and 60 to 105 millimeters (2.36 to 4.13 inches) in length may be imported into the continental United States from Zambia only under the conditions described in this section. These conditions are designed to prevent the introduction of the following quarantine pests: *Aulacaspis tubercularis, Dacus bivitattus, Dacus ciliatus, Dacus frontalis, Dacus lounsburyii, Dacus punctatifrons, Dacus vertebratus, Diaphania indica, Helicoverpa armigera,* and *Spodoptera littoralis.*

(a) *Approved greenhouses.* The baby squash and baby courgettes must be grown in Zambia in insect-proof, pest-free greenhouses approved jointly by the Zambian national plant protection organization (NPPO) and APHIS.

(1) The greenhouses must be equipped with double self-closing doors.

(2) Any vents or openings in the greenhouses (other than the double self-closing doors) must be covered with 1.6 mm screening in order to prevent the entry of pests into the greenhouse.

(3) The greenhouses must be inspected periodically by the Zambian NPPO or its approved designee to ensure that sanitary procedures are employed to exclude plant pests and diseases and to verify that the screening is intact.

(4) The greenhouses also must be inspected monthly for the quarantine pests listed in the introductory text of this section by the Zambian NPPO or its approved designee, beginning 2 months before harvest and continuing for the duration of the harvest. APHIS must be allowed to inspect or monitor the greenhouses during this period as well. If, during these inspections, any of the quarantine pests listed in the introductory text of this section is found inside the greenhouse, the Zambian NPPO will immediately prohibit that greenhouse from exporting baby squash or baby courgettes to the United States and notify APHIS of the action. The prohibition will remain in effect until the Zambian NPPO and APHIS agree that the risk has been mitigated.

(b) *Trapping for Dacus spp. fruit flies.* Trapping for *Dacus bivitattus, Dacus ciliatus, Dacus frontalis, Dacus lounsburyii, Dacus punctatifrons,* and *Dacus vertebratus* (referred to in paragraph (b) of this section, collectively, as *Dacus* spp. fruit flies) is required both inside and outside the greenhouse. Trapping must be conducted beginning 2 months before harvest and continue for the duration of the harvest.

(1) *Inside the greenhouse.* Approved fruit fly traps with an approved protein bait must be placed inside the greenhouses at a density of four traps per hectare, with a minimum of at least two traps per greenhouse. The traps must be serviced at least once every 7 days. If a *Dacus* spp. fruit fly is found in a trap inside the greenhouse, the Zambian NPPO will immediately prohibit that greenhouse from exporting baby squash or baby courgettes to the United States and notify APHIS of the action. The prohibition will remain in effect until the Zambian NPPO and APHIS agree that the risk has been mitigated.

(2) *Outside the greenhouse.* (i) Approved fruit fly traps with an approved protein bait must be placed inside a buffer area 500 meters wide around the greenhouse at a density of 1 trap per 10 hectares, with a total of at least 10 traps. At least one of these traps must be placed near the greenhouse. These traps must be serviced at least once every 7 days.

(ii) No shade trees are permitted within 10 meters of the entry door of the greenhouse, and no fruit fly host plants are permitted within 50 meters of the entry door of the greenhouse. While trapping is being conducted, no fruit fly host material (such as fruit) may be brought into the greenhouse or be discarded within 50 meters of the entry door of the greenhouse. Ground applications of an approved protein bait spray for the *Dacus* spp. fruit flies must be used on all shade trees and host plants within 200 meters surrounding the greenhouse every 6 to 10 days starting at least 30 days before and during harvest.

(iii) *Dacus* spp. fruit fly prevalence levels lower than 0.7 flies per trap per week (F/T/W) must be maintained outside the greenhouse for the duration of the trapping. If the F/T/W is 0.7 or greater outside the greenhouse, the Zambian NPPO will immediately prohibit that greenhouse from exporting baby squash or baby courgettes to the United States and notify APHIS of the action. The prohibition will remain in effect until the Zambian NPPO and APHIS agree that the risk has been mitigated.

(3) *Records and monitoring.* The Zambian NPPO or its approved designee must maintain records of trap placement, trap servicing, and any *Dacus* spp. captures. The Zambian NPPO must maintain an APHIS-approved quality control program to audit the trapping program. APHIS must be given access to review 1 year's worth of trapping data for any approved greenhouse upon request.

(c) *Packinghouse procedures.* Baby squash and baby courgettes must be packed within 24 hours of harvest in a pest-exclusionary packinghouse. No shade trees are permitted within 10 meters of the entry door of the packinghouse, and no fruit fly host plants are permitted within 50 meters of the entry door of the packinghouse. In addition, during packing, no fruit fly host material other than the baby squash and baby courgettes may be brought into the packinghouse, and no fruit fly host material may be discarded within 50 meters of the entry door of the packinghouse. The baby squash or baby courgettes must be safeguarded by a pest-proof screen or plastic tarpaulin while in transit to the packinghouse and while awaiting packing. The baby squash or baby courgettes must be packed in insect-proof cartons for shipment to the United States. These cartons must be labeled with the identity of the greenhouse. While packing the baby squash or baby courgettes for export to the United States, the packinghouse may only accept baby squash or baby courgettes from approved greenhouses. These safeguards must remain intact until the arrival of the baby squash or baby courgettes in the United States. If the safeguards do not remain intact, the

consignment will not be allowed to enter the United States.

(d) *Commercial consignments.* Baby squash and baby courgettes from Zambia may be imported in commercial consignments only.

(e) *Phytosanitary certificate.* Each consignment of baby squash and baby courgettes must be accompanied by a phytosanitary certificate of inspection issued by the Zambian NPPO with an additional declaration reading as follows: ''These baby squash or baby courgettes were produced in accordance with 7 CFR 319.56–48.''

(Approved by the Office of Management and Budget under control number 0579–0347)

Done in Washington, DC, this 12th day of December 2008.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 400, 407, and 457

RIN 0563–AB73

General Administrative Regulations; Administrative Remedies for Non-Compliance

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) finalizes the General Administrative Regulations; Administrative Remedies for Non-Compliance to add additional administrative remedies that are available as a result of the enactment of section 515(h) of the Federal Crop Insurance Act (Act) (7 U.S.C. 1515(h)), make such other changes as are necessary to implement the provisions of section 515(h) of the Act, and to clarify existing administrative remedies.

DATES: *Effective Date:* This rule is effective January 20, 2009.

FOR FURTHER INFORMATION CONTACT: For further information, contact Cynthia Simpson, Director, Appeals, Litigation and Legal Liaison Staff, Risk Management Agency, United States Department of Agriculture, 1400 Independence Avenue, SW., Room 4619, Stop 0806, Washington, DC 20250, telephone (202) 720–0642.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

The Office of Management and budget (OMB) has determined that this rule is non-significant for the purposes of Executive Order 12866 and, therefore, it has not been reviewed by OMB.

Paperwork Reduction Act of 1995

This rule does not constitute a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35).

E-Government Act Compliance

FCIC is committed to complying with the E-Government Act of 2002, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. This rule contains no Federal mandates (under the regulatory provisions of title II of the UMRA) for State, local, and tribal governments or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

Executive Order 13132

It has been determined under section 1(a) of Executive Order 13132, Federalism, that this rule does not have sufficient implications to warrant consultation with the States. The provisions contained in this rule will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Regulatory Flexibility Act

FCIC certifies that this regulation will not have a significant economic impact on a substantial number of small entities. All similarly situated participants are required to comply with the same standard of conduct contained in the Act, the regulations published at 7 CFR chapter IV, the crop policies, and the applicable procedures. For example, any producer, whether growing 10 acres or 10,000 acres, submits the same documentation for insurance and for a claim. All agents, whether selling and servicing five policies or a hundred and five policies, are required to perform the same tasks for each. The consequences for failure to comply with the standards of conduct are also the same for all participants and other persons regardless of the size of their business. A Regulatory Flexibility Analysis has not been prepared since this regulation does not have a significant impact on a substantial number of small entities, and, therefore, this regulation is exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 605).

Federal Assistance Program

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

Executive Order 12988

This proposed rule has been reviewed in accordance with Executive Order 12988 on civil justice reform. The provisions of this rule will not have a retroactive effect. The provisions of this rule will preempt State and local laws to the extent such State and local laws are inconsistent herewith.

Environmental Evaluation

This action is not expected to have a significant economic impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Background

This rule finalizes changes made to 7 CFR part 400, subpart R, Administrative Remedies for Non-Compliance that was published by FCIC on May 18, 2007, as a notice of proposed rulemaking in the **Federal Register** at 72 FR 27981–27988. In the Administrative Remedies for Non-Compliance, FCIC proposed to include provisions in its regulation that were enacted with the passage of the Agricultural Rick Protection Act of 2000 (ARPA). Through the enactment of section 515(h) of the Act in ARPA, Congress significantly strengthened FCIC's ability to combat fraud, waste and abuse by establishing a strong system of administrative actions that are now applicable to all participants in the Federal crop insurance program.

Now, producers, agents, loss adjusters, insurance providers and their employees and contractors, and any

other persons who willfully and intentionally provide any false or inaccurate information to FCIC or to an approved insurance provider with respect to a policy or plan of insurance or willfully and intentionally failed to comply with a requirement of FCIC are subject to remedial administrative remedies. In addition to disqualification from participating in the Federal crop insurance program, producers will be disqualified from receiving benefits under other various United States Department of Agriculture programs. In addition, civil fines have been increased. Now a civil fine can be imposed for each violation and the civil fine is the greater of $10,000 or the amount of pecuniary gain obtained as a result of the false or inaccurate information provided or the noncompliance with a requirement of FCIC.

The public was afforded 30 days to submit written comments after the regulation was published in the **Federal Register**. A total of 128 comments were received from 17 commenters. The commenters were seven insurance services organizations, one grower association, four insurance providers, two law firms, one public citizen, one agent, and one government employee. The comments received and FCIC's responses are as follows:

Comment: One commenter stated that FCIC has taken significant actions since the implementation of the Act in 2000 to reduce fraud, waste and abuse of the crop insurance program. The commenter strongly supports FCIC's efforts to combat waste, abuse and fraud in FCIC programs and believes that those who knowingly and willfully abuse the program must be punished.

Response: FCIC will continue to take such actions as are necessary to improve program integrity.

Length of Comment Period

Comment: Several commenters stated that the thirty-day comment period was inadequate. The commenters asked that the comment period be extended by sixty days because of the serious nature of the proposed rule and in order for other affected individuals to comment and to fully understand the legal exposure they could face under the proposed rule.

Response: FCIC usually gives 30 or 60 day comment period depending on the rule. Because this rule is implementing a law that has been in effect since June 2000, FCIC made the decision not to extend the comment period.

Section 400.451 General

Comment: A commenter stated that ''waste'' and ''abuse'' are neither offenses defined by statute or regulation and that FCIC never has defined in a regulation, contract, policy, or procedure, the conduct or actions that constitute ''waste'' and ''abuse.'' The commenter asked that FCIC define ''waste'' and ''abuse.''

Response: Combating fraud, waste and abuse are the obligation of all Government agencies. The imposition of these sanctions is one means to combat fraud, waste and abuse. However, there are numerous other actions taken by FCIC to combat fraud, waste and abuse. However, in the context of this rule, fraud, waste and abuse are not grounds for the imposition of sanctions. Sanctions are imposed for violations of section 515(h) of the Act and other relevant statutory provisions. The terms fraud, waste and abuse are not used except in the context of a policy statement. Therefore, inclusion of separate definitions may confuse persons into believing that sanctions can be imposed for allegations of fraud, waste and abuse. This is supported by many of the following comments which suggest that fraud must be proven before a sanction under section 515(h) of the Act can be imposed. No change has been made.

Comment: A commenter stated that a person may abuse the crop insurance program without providing false information or violating FCIC procedures.

Response: The crop insurance program may still be abused by a person without providing false information or violating FCIC procedures. Abuse can occur in any number of ways and FCIC continuously reviews the program to tighten program requirements to prevent other types of abuse. However, this rule is intended to preclude the specific abuses associated with the providing of false or inaccurate information and failure to comply with a requirement of FCIC.

Comment: A commenter stated § 400.451(b) is overbroad as it expands the rule to persons outside of the crop insurance program. For example, an accountant knowingly falsifies an insured's Schedule F and an insurance provider overpays on an Adjusted Gross Revenue claim based on that Schedule F, the commenter asked whether the accountant is subject to the sanctions of § 400.454. The commenter asked that FCIC precisely identify the persons to be covered by subpart R.

Response: Section 515(h) of the Act specifically refers to a producer, agent, loss adjuster, insurance provider or ''other person'' that intentionally provides false or inaccurate information to FCIC or to an approved insurance provider with respect to a policy. In the example given, an accountant who knowingly provides false information on a Schedule F may be subject to sanction under § 400.454. However, unless the accountant is otherwise participating in the crop insurance program, disqualification would not be applicable. However, the accountant could be subject to civil fines. Section 515(h) of the Act was intended to sanction anyone who willfully and intentionally provides false or inaccurate information, not just direct participants. Therefore, its scope could encompass any person. For example, an elevator operator who provides false weight receipts or the seed dealer who falsifies a sales receipt would also be subject to sanctions under section 515(h) of the Act.

Comment: A commenter stated that by making the proposed rule applicable to ''any other persons who may provide information to a program participant,'' the FCIC was improperly expanding the scope of persons subject to administrative sanctions beyond what is authorized in the Act. In addition, the phrase, ''any other persons who may provide information'' was imprecise and, therefore, subject to ambiguous construction.

Response: As stated above, section 515(h) of the Act authorizes the scope of the sanction to apply to other than just producers, agents, loss adjusters or insurance providers. Congress expressly refers to ''other persons.'' Therefore, the scope of this rule is authorized and can apply to virtually anyone who may provide information that is false or inaccurate. Therefore, there is no ambiguity. However, as stated above, persons who may not be participating in the crop insurance program or other United States Department of Agriculture (USDA) programs would likely be subject to civil fines instead of disqualification.

Comment: A commenter is concerned that the proposed rule exposes too many innocent persons to the threat of civil fines and sanctions without focusing on the real wrong-doers. The rule proposes to cover a vast number of ''participants in the federal crop insurance program'' as well as any other persons who may provide information to a program participant. In addition, the definitions of affiliate, participant, person, and principal are broad and far reaching and may subject innocent persons to the threat of civil fines and sanctions. The commenter recommends these

definitions exclude those not actively involved in the submission, purchase or receipt of benefits of crop insurance policies.

Response: In order to be subject to the sanctions under section 515(h) of the Act, FCIC must be able to prove that the person willfully and intentionally provided false or inaccurate information or willfully and intentionally failed to comply with a requirement of FCIC. Therefore, it is not possible for the sanctions to be imposed on innocent persons. Further, the standards for the imputing of improper conduct are the same as that applied in debarments and ensures that only those persons responsible for the violation are sanctioned. As an additional check and balance, persons have the right to contest any sanction before it is imposed before an Administrative Law Judge. This will ensure that the burden of proof has been met.

Comment: Several commenters stated that the proposed rule made the rule retroactive in effect. In the preamble, FCIC states, ''the provisions of this rule will not have a retroactive effect.'' However, the proposed rule at § 400.451(d) states that the ''failure to comply with a requirement'' is applicable as of the date the proposed rule become effective. But, the rule with respect to a false or inaccurate statement is applicable to any act or omission occurring after June 20, 2000. The rule and FCIC's explanation of it are inconsistent as to its retroactivity. Because Congress did not grant FCIC the authority to promulgate retroactive rules, they can only be applied prospectively. To impose penalties for past conduct is improper and unlawful. Because it is unclear as to its retroactivity, the rule violates Executive Order 12988. The proposed rule should be changed so that the regulation clearly has no retroactive effect. The commenters asked that the rule become effective on the date rule becomes final.

Response: FCIC has clarified when the provisions of this rule become effective. There is confusion because section 515(h) of the Act, which contains the sanction provisions applicable to false or inaccurate information that are the subject of this rule, have been in effect since June 2000. Further, since that date, those statutory provisions have been used to impose sanctions against persons that have provided false or inaccurate information after June 2000 because the statutory provisions were not in conflict with the regulation sanction provisions that existed during that time. Therefore, false or inaccurate information provided between June 20, 2000, and the date this rule becomes effective will continue to be processed under section 515(h) of the Act and the regulations in effect prior to the date this rule becomes effective. For false or inaccurate information provided after the date this rule is effective will be processed under this rule.

Section 400.452 Definitions

A. In General

Comment: A commenter stated that the proposed rule expanded the definition of ''person'' and added 17 more definitions which apply only to this subpart. FCIC does not describe the sources of many of the definitions.

Response: FCIC expanded § 400.452 to include terms used in the proposed rule. Most of the definitions will refer to terms and definitions contained in other regulations, such as the Common Crop Insurance Policy Basic Provisions to ensure consistency. With respect to the other definitions, FCIC has defined the terms in such a manner as to achieve the purpose of this rule. The rulemaking procedures do not require that administrative agencies document the source of all of its information.

Comment: Several commenters make statements regarding removing (1) vague and ambiguous language, and (2) defining terms FCIC normally or routinely uses but has failed to define, such as ''benefit,'' ''fraud,'' ''waste and abuse,'' ''wrongdoing,'' and ''knows or has reason to know.'' A commenter stated that the word ''benefit'' is used in the regulation but not defined. The proposed rule suggests benefit is not limited to monetary gains. The commenters also stated that if FCIC intends to impose sanctions for persons engaged in ''waste and abuse,'' the terms must be adequately defined to provide notice of the prohibited conduct. One commenter also stated that FCIC should add the definition of ''knows or has reason to know'' contained in 7 CFR 1.302(o) to the proposed rule and make conforming changes to the balance of the proposed rule consistent with the text of this added definition.

Response: FCIC has revised the rule to add definitions of ''benefit,'' and ''knows or has reason to know.'' ''Benefit'' is defined as any advantage, preference, privilege or favorable consideration a person receives from another person in exchange for certain acts or considerations. A benefit may be monetary or non-monetary. The definition of ''knows or should have known'' will be the same as that contained in 7 CFR 1.302(o). Further, this rule does not sanction persons for ''fraud, waste or abuse.'' This rule imposes sanctions for violations of section 515(h) of the Act and other statutory provisions. To the extent that such statutory provision includes some elements of fraud, waste and abuse, the prohibited conduct will be specified therein.

B. Revisions to Specific Definitions

1. Affiliate

Comment: A commenter stated that FCIC's definition of ''affiliate'' is inconsistent with the Standard Reinsurance Agreement's (SRA) definition of ''affiliate.'' The commenter stated that the definition should be amended to mirror the SRA's focus on the control of management of the book of business.

Response: While the narrower definition is appropriate for the SRA, such a narrow definition is not appropriate for this rule, which is intended to determine who a person is for the purposes of this rule. Under the definition of ''person'' affiliates are also considered as part of the person if the requirements are met. The main reason for defining the term ''affiliate'' in this rule is to put everyone on notice that the term may be used differently in this rule than it is in other rules or agreements. No change has been made.

Comment: A commenter stated that the definition of ''affiliate'' is broad and ambiguous because it uses the term ''same or similar management'' when describing a presumably affiliated business entity. The commenter suggested that the ambiguity can be cured by using either the accepted definition under federal banking and securities law or alternatively by substituting the term ''identical or substantially identical management'' for ''same or similar management.''

Response: The definition was obtained from the definition of ''affiliate'' in USDA's suspension and debarment regulations published at 7 CFR part 3017. Since a disqualification has a similar effect to a debarment, it was determined that the treatment of affiliates and the definition should be the same for both remedial sanctions. No change has been made.

2. Participant

Comment: A commenter stated that the definition of ''participant'' was unduly broad in that it contained no materiality or other threshold test for determining the extent of benefit that makes a person a participant. As written, someone who does not have a substantial beneficial interest for purposes of the crop insurance policy could be subject to a sanction.

Response: Any person, regardless of his interest for purposes of the crop

insurance policy, who willfully and intentionally makes a false statement or fails to comply with a requirement of FCIC, may be subject to sanction. As stated above, such person may have no connection to the crop insurance program other than to provide certain information that is then provided to FCIC or the insurance provider. If such person willfully and intentionally provides false or inaccurate information, such person can be subject to the sanctions provided in this rule even if they derive no benefit from the crop insurance program. Materiality does not require monetary damages. The false information can be material if it adversely affects program integrity, including damage to the program's reputation. Since the gravity must be considered in determining whether to impose a sanction, FCIC has revised the provision to include a materiality requirement and added a definition of ''material.''

Comment: A commenter suggested that a materiality test, percent interest or monetary level of benefit be used as a threshold for defining ''participant.''

Response: As stated above, materiality does not require monetary damages or benefits. The false information can be material if it adversely affects program integrity, including damage to its reputation. Further, FCIC has revised the provisions to include a materiality requirement when the gravity of the violation is taken into consideration and defined the term ''material.''

3. Preponderance of the Evidence

Comment: A commenter stated that intentional, willful conduct and fraud are subject to special rules regarding proof in civil litigation. Fraud requires ''clear and convincing proof to establish liability.'' This is a higher standard than that required under the proposed rule by a preponderance of the evidence. Because fraud connotes intentional misconduct the party charging that conduct is required to prove it to a greater certainty. The commenter stated further that it is improper to reduce the burden of proof by the government when alleging fraud. No justification has been given that alters longstanding rules applicable to civil litigation. Furthermore, intentional and willful acts should be defined to make clear that the person knew the falsity of the statement when made and intended that FCIC act on the basis of the intentional and willful misstatements. Intent and willfulness also must be established by clear and convincing evidence.

Response: Section 515(h) of the Act does not require a showing of fraud. The standard is whether a person willfully and intentionally provided false or inaccurate information. The standard of proof was derived from USDA's suspension and debarment regulations because of the similarity of the effects of disqualification and debarment. Further, debarment must also show evidence of willfulness and knowingly, which is similar to the standards contained in section 515(h) of the Act. The causes for debarment need only be established by a preponderance of the evidence. In addition, this is not a civil litigation. This is an administrative action taken to protect the integrity of the program and misuse of taxpayer dollars. Further, this has been the standard of proof that has been applied since the application of these sanctions in 1993. Section 515(h) of the Act does not contain any requirement that the person who provides the false information intended for FCIC to rely on such information. FCIC does not have to prove fraud. FCIC only needs to prove that a person willfully and intentionally provided false or inaccurate information or failed to comply with a requirement of FCIC.

Comment: A commenter stated that the definition of ''preponderance of the evidence'' needs to be revised or clarified to clearly state that FCIC has the burden of proof to produce evidence to meet its preponderance of the evidence.

Response: FCIC has revised § 400.454(a) to clarify that FCIC bears the burden of proving that the person willfully and intentionally provided false or inaccurate information or failed to comply with a requirement of FCIC.

4. Principal

Comment: A commenter stated that the definition of ''principal'' was broad, and includes persons whom the law does not recognize as a principal. In addition, while the concept of ''control'' is defined by case law, the concept of ''critical influence'' is not. Theoretically, a data processor has ''critical influence'' because the incorrect entry of data may have a significant impact on liability. The commenter asked whether FCIC contends that such persons are ''principals'' under the rule. The commenter also questioned who is a ''key employee'' and what are the indicia of a ''key employee.'' The commenter asked who will determine whether an employee is a ''key employee''—the insurance provider or FCIC?

Response: The definition of principal has been broadened in this rule because insurance providers have routinely delegated many of their obligations and responsibilities to persons who would not normally have the ability to direct the activities of the business. The definition of ''principal'' is intended to encompass such persons who may not have the title, but who have functional influence or control over some activities of the insurance provider. This delegation is not unique to the insurance providers. Insureds may also delegate their obligations to other persons, such as farm managers. The use of the term ''key employee'' is intended to be a catch-all term for employees that have primary management or supervisory responsibilities or have the ability to direct activities or make decisions regarding the crop insurance program. FCIC would initially decide whether an employee is a key employee based upon the person's responsibilities in the entity when determining whether to file a complaint. However, it would be an Administrative Law Judge that will ultimately decide whether the employee is subject to sanction under this rule.

Comment: A commenter said that the definition of ''principal'' was broad and ambiguous. This problem is magnified by the use of ''key employee'' (an undefined term with no commonly accepted legal understanding) and ''critical influence on or substantive control over the activities of the entity'' (also undefined and not susceptible to common legal interpretations from other bodies of law). The commenter suggested that FCIC could cure the ambiguity to defining ''principal'' by citing position names commonly used in business and limiting the scope of the definition to only certain functions with the organization. The commenter suggested the following definition for ''principal'': ''A person who is an officer, director, owner or partner within an entity with primary management or supervisory responsibilities over the entity's Federal crop insurance activities.''

Response: FCIC is attempting to avoid being locked into titles because they do not fit all the business entities that can be involved directly or indirectly with the crop insurance program. This is why the term ''key employee'' has been added. This definition is trying to identify those persons who perform or exert some type of management or control or decision making over at least some activities related to the crop insurance program. Those are the persons who will be treated as principals. Given the practice of delegation that occurs in the insurance and farming industries, the definition would be too limiting to name the specific titles.

5. Requirement of FCIC

Comment: Several commenters stated that the definition of ''requirement of FCIC'' is overly board, ambiguous, and vague. As written, the rule could include informal communications, such as e-mails, from RMA personnel writing without actual approval by supervisory or managerial personnel with the agency. The definition does not define the form in which the written communication must take. Thus, a requirement of FCIC could take the form of any writing, including an e-mail. The commenter asked what types of communications are included in ''other written communications.''

Response: FCIC has revised the definition to specify that requirements will be contained in formal communications such as regulations, procedures, policy provisions, reinsurance agreements, memorandums, bulletins, handbooks, manuals, findings, directives or letters signed or issued by persons who have been provided the authority to issue such communications on behalf of FCIC. The definition is also revised to clarify that e-mails are not formal communications although they can be used to transmit formal communications.

Comment: Several commenters stated that the definition of ''Requirement of FCIC'' does not specify from whom within the FCIC the written communication may come. The written communication could come from any FCIC employee, regardless of status or level, to anyone associated with the insurance provider.

Response: As stated above, the provision as been revised to specify that written communications that will qualify as a ''requirement of FCIC'' will be originated by a FCIC employee that has been delegated the authority to issue such communications on behalf of FCIC. The current delegations are found at *http://www.rma.usda.gov/news/managers/2000/PDF/mgr-00–016–1.pdf, http://www.rma.usda.gov/news/managers/2000/PDF/mgr-00–016–2.pdf, http://www.rma.usda.gov/news/managers/2000/PDF/mgr-00–016–3.pdf*, and these delegations include documents that would qualify as ''requirements of FCIC.'' To the extent that other persons may also receive delegated authority, other bulletins containing such delegation will be issued.

Comment: A commenter stated that no ''other written communication from FCIC'' should qualify as a ''Requirement of FCIC'' unless FCIC has sent the communication to the insurance provider's designated recipients. The commenter pointed out that the SRA, in Appendix II, paragraph 6, requires each insurance provider to designate persons with authority to receive written communications from FCIC.

Response: To the extent that the ''requirement of FCIC'' is in the form of letters and other individual communications, such documents will be provided to the designated recipients of the insurance providers. However, documents such as regulations, procedures, bulletins, reinsurance agreements, etc. may also be considered requirements of FCIC under certain circumstances. Such documents will continue to be released in the customary manner.

Comment: A commenter suggested the phrase ''other written communications from FCIC'' be removed or at least restricted to require that the FCIC official sending the ''other written communication'' have express authority to send the communication and require that the communication be sent to the insurance provider's designee for the specifically stated type of communication.

Response: As stated above, FCIC has previously delegated persons to provide written communication on behalf of FCIC. FCIC will issue other bulletins if other persons will be delegated this authority. Further, as stated above, to the extent that such communication is a letter or other such individual communication, such communication will be sent to the insurance provider's designee. However, all other communications will be released in the customary manner.

Comment: One commenter questioned whether the Common Crop Insurance Policy falls within the definition of requirement of FCIC. The commenter asked if the Common Crop Insurance Policy is a requirement of FCIC only for agents, adjusters, and producers because the SRA's remedy applies only to insurance providers. This same conundrum exists for various handbooks and manuals.

Response: As stated in the rule, documents such as the Common Crop Insurance Policy are considered a requirement of FCIC unless such documents contain their own sanctions for violations. Further, even if such documents contain sanctions, they may still be considered a requirement of FCIC if there are multiple violations of the same provision or multiple violations of different provisions. FCIC has clarified that the remedial sanction is in addition to any other remedy contained in such document. The requirement of FCIC will only apply the persons to whom the document applies. For example, all regulations, including the Common Crop Insurance Policy, are applicable to insurance providers, agents, loss adjusters, and producers. However, the SRA is only applicable to insurance providers. The question will be whether the person is legally obligated to comply with the document through the force of law or contract.

Comment: One commenter asked: (1) Who is the arbiter of whether the ''breach rises to the level where remedial action is appropriate;'' (2) what standard is used to make a determination that a breach occurred under ''requirement of FCIC;'' and (3) whether materiality of the breach or injury to FCIC is a consideration for ''requirement of FCIC.''

Response: FCIC will initially determine whether a breach rises to the level where remedial action should be taken when it issues the complaint. However, persons have the ability to contest any proposed sanction before an Administrative Law Judge, who will be the ultimate arbiter. Further, as stated above, the rule states the standards applicable. For a document that has its own remedy for a violation, such document will only be considered a requirement of FCIC when there are multiple violations of the same or different provisions. If the document is directed to a specific person or group of persons, or does not contain a remedy for a violation, and requires such person or persons to take or cease from taking a specific action, the document is considered a requirement of FCIC. As stated above, FCIC has revised the provisions to include materiality, which applies to both false or inaccurate statements and failing to comply with a requirement of FCIC. However, as stated above materiality does not require monetary damages. The false information or the failure to comply can be material if it adversely affects program integrity, including damage to the crop insurance program's reputation.

Comment: One commenter stated that definition of ''requirement of FCIC'' states that a breach will not be considered a requirement of FCIC unless the breach rises to the level where remedial action is appropriate. The proposed rule imposes a subjective standard of reviewing conduct. The commenter asked at what level does conduct rise to ''the level where remedial action is appropriate.''

Response: The rule makes it clear that when the communication has its own remedy there must be multiple violations before the conduct arises to the level where remedial action, in addition to the remedy contained in the

communication, is necessary. With respect to other communications, there is a subjective element. However, as stated above, the gravity of the violation must be taken into consideration when determining whether to impose a sanction, which would include whether conduct arises to the level where remedial action is appropriate. In addition, the ultimate decision maker regarding whether the conduct arises to the level where remedial action is necessary will be the Administrative Law Judge. For the purpose of clarity, FCIC has used the term ''violation'' in place of ''breach'' because breach may mistakenly imply that the definition only applies to contracts or agreements when the definition clearly refers to other types of documents.

Comment: A few commenters stated that the definition of ''requirement of FCIC'' includes not only regulations and policy provision, but also procedures and other written communications from FCIC. The proposed rule does not address the potential conflicting nature of these requirements. It also imposes the same sanctions for violating non-binding informal procedures and communications as for violating binding rules and regulations. Neither the law nor the Administrative Procedures Act gives the same type of formality, equality or deference to these types of agency decisions.

Response: To the extent that there is a conflict between the regulations, policy provisions, and procedures, the regulations resolve such conflict in the order of priority. To the extent that other written communications may be in conflict, any provision that has the force of law, such as statutory or regulatory provisions, would take precedence. Further, neither the Act nor the Administrative Procedures Act precludes the use of any particular form of communication to impose requirements on a person. If FCIC has the authority to require that certain action be done or ceased, the Act provides the authority to provide sanctions for non-compliance. The nature of the crop insurance program makes it impractical to put all requirements in regulations or reinsurance agreements. Circumstances may arise during the year that requires immediate action and FCIC must have the means to ensure such action is taken. In determining whether to impose a sanction, FCIC must look at the nature of the violation. If the person fails to take a specific action required by FCIC or FCIC mandates that it cease a specific action, it does not matter the form of the communication. The person is required to comply and failure to comply can result in the imposition of sanctions.

Comment: One commenter is concerned that a person without access to FCIC's regulations, policies, procedures or other written communications and those who may have misinterpreted those regulations, policies and procedures, may be subject to sanctions. The commenter stated that the definition should include regulations, policies, procedures or other written communications the person knew or should have known or had received a specific notice of alleged violation.

Response: As stated above, sanctions can only be imposed for a violation of requirement of FCIC if such requirement is applicable to the person. If applicable, the person should have notice of the requirement. For example, bulletins are not applicable to producers unless such bulletin is provided to the producer or directs the agent or insurance provider to provide such bulletin to the producer. In addition, the gravity of the violation will be taken into consideration before imposing any sanction. No change has been made.

Comment: One commenter stated that, as proposed, the FCIC has virtually unlimited discretion in determining what constitutes a ''requirement.'' Insurance providers are often forced to make on the spot interpretations of ambiguous regulations without any guidance from FCIC, only to have FCIC later determine that the insurance provider's interpretation was incorrect. Allowing FCIC to go one step further and disqualify an insurance provider because it disagrees with the insurance provider's interpretation of an ambiguous ''requirement,'' is unreasonable, unworkable, and unfair.

Response: FCIC does not disqualify an insurance provider because it disagrees with the FCIC. If FCIC determines that an insurance provider has made an incorrect interpretation, it would notify the insurance provider of its misinterpretation and request that any actions taken based on the misinterpretation be corrected. Sanction would only be considered if the insurance provider does not comply with FCIC's request. Further, if the insurance provider believes that FCIC's interpretation is incorrect or that it does not have the authority to require the specific action, it can always appeal FCIC's action to the Civilian Board of Contract Appeals. No sanction could be imposed during this appeal process.

6. Violation

Comment: One commenter stated that the definition of ''violation'' leaves far too much room for interpretation as to what constitutes a single violation and what results in multiple violations. For example, assume that a farmer submits a single claim under his policy, but that the claim involves three separate units of insurance. The farmer submits three false production worksheets in connection with the one claim. The commenter asked whether the farmer committed one violation or three violations.

Response: To be subject to a sanction, the person must have willfully and intentionally provided false or inaccurate information. Each false or inaccurate piece of information would constitute a violation. Therefore, if in the acreage report the producer falsely reports the number of acres in the unit and the share, this would be two violations. In the example given, the farmer has committed four violations. The proposed rule defines violation as ''each act or omission'' made by a person that satisfies all required elements for a sanction is a violation. The farmer signed his name on three separate production worksheets and one claim, four times he ''certified'' the information provided, to the best of his knowledge to be true and complete; when in fact, he knew the information was false.

7. Willful and Intentional

Comment: One commenter stated that ''willful and intentional'' acts should be defined to make clear that the person knew the falsity of the statement when made and intended that FCIC act on that misstatement.

Response: A ''willful and intentional'' act is providing information by a person who had ''knowledge that the statement was false or inaccurate at the time.'' The requirement that the person ''intended that FCIC act on that misstatement'' is an element of fraud. However, under section 515(h) of the Act, to impose a sanction, the person only needs to have willfully and intentionally provided false or inaccurate information. The term ''fraud'' is not found in section 515(h) of the Act and if Congress wanted to require reliance by FCIC as an element, it could have so required. No change has been made.

Comment: One commenter stated that the definition ''Willful and intentional'' is incomplete and inaccurate as a standard of proof for the conduct under the proposed rule. Intent and willfulness must be established by clear and convincing evidence.

Response: The general standard of proof in administrative cases is preponderance of the evidence. This is consistent with USDA's suspension and

debarment regulations, which serve a similar purpose. Further, this has been the standard of proof that has been applied since the application of these sanctions in 1993. No change has been made.

Comment: One commenter stated that FCIC should clearly require that scienter must be proven with respect to willful and intentional statements prosecuted under the rule to ensure that prosecutions are confined to fraudulent statements or acts or omissions, rather than non-malicious acts or omissions.

Response: In the definition of ''willful and intentional,'' FCIC has included the requirement that the person know that the statement was false or inaccurate at the time the statement was made or the person know that the act or omission was not in compliance with a requirement of FCIC at the time the act or omission occurred. Therefore, sanctions will not be imposed for innocent mistakes. However, maliciousness is not a standard required by the Act. FCIC has structured these provisions to fully comply with the requirements imposed in the Act. No change has been made.

Comment: One commenter stated that the definition of ''willful and intentional'' deviates from the common law meaning of those terms, and specifically nullifies a showing of malicious intent, an element of common law fraud. The commenter further states that fraud is the very target of 7 U.S.C. 1515(h) and that FCIC may lack the authority to expand the definition of willful and intentional to include conduct outside the common understanding of fraud and to impute knowledge from one individual to another.

Response: Section 515(h) only requires that the person willfully and intentionally provide a false or inaccurate statement or fail to comply with a requirement of FCIC before a sanction can be imposed. Section 515(h) does not use the term ''fraud'' and that term's other connotations. FCIC has studiously attempted to stay within the requirements of the Act. To that end, FCIC has used the common definitions and common law to determine the meaning of ''willful and intentional.'' This rule contained the same meaning as has been given the term since FCIC began doing disqualifications after the enactment of the Federal Crop Insurance Reform Act of 1994. With respect to the imputation of knowledge, FCIC has used the Department's debarment regulations as guidance because the burdens and consequences are similar.

Comment: One commenter stated that for the definition of ''willful and intentional'' FCIC does not specifically define the words separately, and FCIC does not state the source of this definition. FCIC also excludes the showing of malicious intent as unnecessary. FCIC includes ''the failure to correct the false or inaccurate statement when its nature becomes known to the person who made it'' and includes acts of omission. These additions force agents and agencies to review information for past years, or they may be subject to sanctions.

Response: Defining the words separately would not change the meaning or bring more clarity. The terms will be given their common meaning. The dictionary defines ''willful'' as ''intentional, or knowing, or voluntary.'' ''Intentional'' is defined as ''done purposely.'' FCIC has also looked to the body of established law regarding the meaning of the terms for the purposes of this rule. There is no requirement in the Act for maliciousness intent. The Act only requires that a person willfully or intentionally provide false or inaccurate information. Therefore, requiring a person to know the information was false or misleading and electing to provide it anyways satisfies the common meaning of the terms. Further, agents are not required to review information for past years. Agents will only be subject to sanctions if they knew the information was false or inaccurate at the time it was provided or if they discover it later and they fail to do anything about it. No change has been made.

Comment: One commenter stated that the definition of ''Willful and intentional'' should be defined to make clear that the actor knew the falsity of the statement when made and intended that FCIC act on the basis of the intentional misstatements.

Response: As stated above, there is no requirement that the person intended FCIC to act on the false information in section 515(h) of the Act. To be subject to sanctions, the person only needs to have willfully and intentionally provided false or inaccurate information to FCIC or an approved insurance provider. Reliance of the misstatement is an element of fraud, which as stated above, is a term that is not found in section 515(h) of the Act.

Comment: One commenter stated that FCIC must establish a clear indication of how intent will be established with respect to demonstrating whether a statement, act or omission is willful and intentional. A false or inaccurate statement or a noncompliant act or omission alone does not rise to willful and intentional and additional evidence that clearly establishes that a person had sufficient knowledge is necessary before imposing sanctions.

Response: The definition of ''willful and intentional'' makes it clear that the person must have knowledge of the falseness or inaccuracy of the information. Unless FCIC can establish the person has such knowledge no sanction under section 515(h) of the Act can be imposed. Further, FCIC is not alone in making these decisions. Any person subject to a proposed sanction has a right to contest the sanction before an Administrative Law Judge. The Administrative Law Judge will determine whether FCIC has met its burden before any sanction is imposed.

Comment: One commenter stated that with no showing of intent coupled with the provision that sanctions may be imposed regardless of whether FCIC or the insurance provider sustained monetary losses places all parties in jeopardy of severe punishment for seemingly innocuous mistakes that may have caused little to no harm.

Response: Sanctions cannot be imposed for innocuous mistakes. There must be evidence of willfulness and intent. Further, the fact that no monetary losses may occur does not excuse the improper conduct. All false or inaccurate statements have the capacity to adversely affect program integrity.

Comment: One commenter stated that while the definition may be clear in regards to willful, it is not clear from the definition that there is actually a requirement of intention at all. The commenter suggested that the definition should include knowledge of the inaccuracy and that an intent, malicious or otherwise be associated with the inaccuracy. The definition should be confined to ''material'' misrepresentations or omissions.

Response: ''Intentional'' is defined as ''done purposely.'' FCIC's definition of ''willful and intentional'' is consistent with that definition in that it requires the person to have provided the information to FCIC or an approved insurance provider even though the person had knowledge that the information was false or inaccurate at the time that the statement was made and still elected to provide the information to FCIC or the approved insurance provider. However, as stated above materiality has been added to the rule but it does not require monetary damages.

Section 400.454 Disqualification and Civil Fines

A. In General

Comment: One commenter stated that ARPA required that each policy or plan of insurance to provide notice of the sanctions that could be imposed under ARPA for willfully and intentionally providing false or inaccurate information to FCIC or failing to comply with a requirement of FCIC. FCIC has failed to comply with 1515(h)(5).

Response: Section 27 of the Common Crop Insurance Policy Basic Provisions (Basic Provisions) (7 CFR 457.8) states that if the producer, or someone assisting the producer, has intentionally concealed or misrepresented a material fact, the producer could be subject to the remedial sanctions in 7 CFR part 400, subpart R, which includes disqualification and civil fines. However, FCIC has revised this rule to include more specific language in section 27 of the Basic Provisions and added a new section 22 to the Group Risk Plan Common Policy (7 CFR 407.9) (GRP policy).

B. Section 400.454(a)

Comment: One commenter has concerns that FCIC is not providing producers with the appropriate notice of sanctions as stated under section 515(h)(5). The commenter stated that section 454(a) lacks the required notice to policyholders. Specifically, the commenter stated that the proposed language in section 454(a) does not appear to provide producers the required notice of the sanctions available under 7 U.S.C. 1515(h)(3) as required by 7 U.S.C. 1515(h)(5). That in its present form section 454(a) does not notify producers that they can be disqualified for up to five years from specific programs or that the potential fine could be greater than $10,000.

Response: It is not the specific intent of § 400.454(a) to provide producers notice of sanctions available under section 515(h)(3) of the Act. It is intended to provide all persons of the possible consequences of willfully and intentionally provided false or inaccurate information or willfully and intentionally failing to comply with a requirement of FCIC. As stated above, FCIC has revised the Basic Provisions and the GRP policy to ensure that producers receive the required notice.

Comment: Several commenters stated that the decision to initiate administrative sanctions should not rest solely with the FCIC Manager, but that it should require a determination by the FCIC Board of Directors.

Response: Section 515(h) of the Act confers the authority to impose sanctions on the Secretary, who has subsequently authorized the Manager of FCIC to initiate the process when the rule was originally promulgated in 1993 (58 FR 53110). Since this process has been in place since 1993 and there have not been any allegations that the Manager has abused this authority, the Secretary has elected to allow the authority to initiate sanctions to remain with the Manager of FCIC. In addition, although the Manager initiates the process, it is the Administrative Law Judge that ultimately decides whether there is sufficient evidence to impose a sanction under section 515(h) of the Act.

Comment: Several commenters stated that FCIC uses an inappropriate standard of proof, preponderance of the evidence, for the imposition of any penalty. One commenter stated that the standard of guilt should rest with the party alleging such violation. Instead of requiring a mere 'preponderance of evidence' the standard of proof should be clear and convincing evidence. There is no justification for holding the crop insurance industry to a lower standard of guilt.

Response: As stated above, this is the same standard applied by the Department for debarments. Because the effects are similar and both can require willful and intentional conduct, it is appropriate to apply that standard to sanctions under this rule. Further, this has been the standard of proof that has been applied since the application of these sanctions in 1993. No change has been made.

Comment: Several commenters stated that the proposed rule imposes a low evidentiary threshold for the imposition of sanctions. The burden of proof should be clear and convincing evidence as opposed to a preponderance of the evidence. The rule only authorizes sanctions for willful and intentional conduct. Such a standard connotes the elements of fraud. In almost every instance, liability for fraud cannot be predicated on a mere preponderance of the evidence; rather, a finding based on at least clear and convincing evidence is required. Therefore, the draft regulations should be amended to reflect a burden of proof of clear and convincing evidence. Commenters stated that FCIC may lack the authority to adopt a burden of proof lower than the clear and convincing standard of proof in fraud cases. One commenter stated that to establish a prima facie claim of fraud, the party alleging it must prove by clear and convincing evidence that there was a false representation or concealment of a material fact, calculated with the intent to deceive. One commenter stated that the rule potentially expands the liability of actions to a degree not enforceable in civil litigation.

Response: Section 515(h) of the Act does not require a finding of fraud. Sanctions can be imposed for willfully and intentionally providing false or inaccurate information. Further, as stated above, this is the same standard applied by the Department for debarments. Because the effects are similar and both can require willful and intentional conduct, it is appropriate to apply that standard to sanctions under this rule. Further, this has been the standard of proof that has been applied since the application of these sanctions in 1993. No change has been made.

C. Section 400.454(b)

Comment: One commenter stated FCIC needs to provide a clear indication of how intent will be established as to whether a statement, act or omission is willful and intentional. Further, scienter must also be established to a statement, act or omission that is willful and intentional.

Response: As stated above, FCIC has defined ''willful and intentional'' to be consistent with the common definition of these terms and case law. Scienter is not a specific requirement. No change has been made.

Comment: Several commenters stated that the proposed rule must be confined to material misrepresentation or omissions that cause financial loss. One commenter stated that it was the intent of Congress. A commenter stated that FCIC should confine the proposed rule to statements, acts or omissions that cause injury or damages, consistent with general principles of law relative to fraud.

Response: FCIC has revised the provisions to require consideration of materiality when considering whether to impose a sanction and defined the term ''material.'' However, as stated above materiality does not require monetary damages. The false information can be material if it adversely affects program integrity, including damage to the crop insurance program's reputation or providing or potentially providing benefits that would otherwise not be available. Further, as stated above, fraud is not required to be proven before a sanction can be imposed. There only needs to be a finding that a person willfully and intentionally provided false or inaccurate information or failed to comply with a requirement of FCIC.

D. Section 400.454(c)

Comment: One commenter stated that ''gravity'' is subjective and vague. It did not tell the public the standard to be applied by FCIC when measuring the severity of a violation. The commenter suggested that FCIC adopt the list of factors under 7 CFR 1.335(b) or develop its own list of mitigating factors to be applied when considering the gravity of a violation.

Response: FCIC has reviewed the list of factors used in the assessment of sanctions in 7 CFR 1.335(b), and has modified the list to be more applicable to the crop insurance program and included it in § 400.454(c).

Comment: One commenter has concerns that cumulative penalties could exceed the gravity of the violation. The commenter urged FCIC to establish appropriate penalties to violations that are always commensurate to the gravity of such violations.

Response: As stated above, FCIC has adopted factors, with modification, used by Department in assessing sanctions. However, Congress specifically revised section 515(h) of the Act to allow the imposition of a separate sanction for each violation. The gravity of each violation will be taken into consideration when imposing a sanction.

Comment: A commenter stated that increased penalties demand an equally elevated system of judgment process and identification of degree. The rule's definition of degree of offense and penalty extends to others who may be oblivious to the error of intention to submit false information. For example, the agent who forwards an actual production history (APH) which was completed and signed by an insured can be totally unaware of erroneous information provided by that insured, unless the submission is blatantly different from other producers in the area. Cumulative penalties could result in disproportionate fines in relation to the offense. Therefore, a minor infraction could have a major impact.

Response: An agent that transmits an APH that is false can only be sanctioned if the agent knew or should have known the information was false and transmitted it anyway. If the agent had no way to know the information was false, no sanction can be applied. However, the producer that provided the false APH may be sanctioned for providing the false information to the agent. In such case, the gravity of the violation will be considered based on the factors FCIC has added to the rule to ensure the sanction is commensurate with the violation. Further, FCIC will consider each person's conduct as it pertains to the provision of false or inaccurate information. Therefore, there should not be the possibility of disproportionate sanctions.

Comment: A few commenters stated that the rule should exclude penalties and suspensions for conduct that is already addressed in the SRA.

Response: There is nothing in the SRA or other contracts that specifically involves willfully and intentionally providing false or inaccurate information or failing to comply with a requirement of FCIC. Further, there may be circumstances where the improper conduct under the SRA is so egregious that the imposition of sanctions may be appropriate. The rule explains those situations. In such cases, the liquidated damage provisions may be inadequate given the gravity of the violation. Further, suspension or termination may not be viable options and the imposition of a civil fine may be more appropriate. However, with respect to any breach of the SRA, FCIC first will look to the remedies in the SRA. Because remedies are available under the SRA, sanctions can only be imposed if there are multiple violations of the same or different provisions.

Comment: Several commenters state that the proposed rule's cumulative penalties violate the excessive fines provision of the Eighth Amendment of the U.S. Constitution. Since its penalties would be cumulative, the proposed rule could result in disproportionate fines. Cumulative penalties are not allowed under the Act, in addition to those found in 7 U.S.C. 1515(h)(3). The commenters stated that the rule should also be clarified to make it clear that the penalties and fines are not cumulative and that if the FCIC chooses to enforce any existing contract-based or regulatory remedies, the rule should be expressly inapplicable. A commenter stated that while the sanctions in 7 U.S.C. 1515(h)(3) potentially are cumulative, there is no statutory basis for punishing the same conduct under other regulations or agreements. Accordingly, any fair reading of the FCIA precludes cumulative penalties in addition to those found at 7 U.S.C. 1515(h)(3). A commenter stated that FCIC should not treat the sanctions as cumulative relative to other sanctions, as this is not anywhere provided for in the plain language or legislative history of the statute.

Response: Section 515(h) of the Act expressly authorizes a separate civil fine for each violation. Therefore, this rule does not contain cumulative civil fines for the same conduct. It would not make sense to impose the same civil fine on a person who committed one violation compared to one who committed two or more violations. When determining the civil fine to apply for each violation, FCIC is to take into consideration the gravity of that violation. Therefore, this allows the sanctions to be proportional to the conduct. However, there is nothing in the Act that would preclude FCIC from enforcing section 515(h) of the Act along with any contractual remedies. When section 515(h) of the Act was enacted, Congress was aware that many contracts and agreements had remedies for a breach. If it wanted the sanctions under section 515(h) of the Act to be the sole remedy for the conduct it could have so required, but it did not do so. The application of any other remedy will be taken into consideration when assessing the sanction to be imposed under this rule so that the result is not disproportionate. Further, this is most likely to arise with respect to the willful and intentional failure to follow a requirement of FCIC, because there is no mention of willfully and intentionally providing false or inaccurate information in the contract or agreement. As stated above, there are situations when the conduct is so egregious, such as with multiple violations, that the imposition of sanctions is appropriate under this rule in addition to the remedies available in the contract or agreement. No change has been made in response to this comment.

Comment: One commenter states that the rule states that it is remedial in nature. However, the rule also states that fines and disqualifications are in addition to any other actions taken by FCIC or others under the terms of the crop insurance policies, other statutes and regulations. Recently the U.S. Supreme Court disregarded its own long-standing position on the remedial nature of the federal False Claims Act and labeled its treble damage provision as ''punitive.'' Adding additional sanctions on top of those recoverable under the False Claims Act, and other statutes will undoubtedly be punitive, and subject the rule to interpretation and construction consistent with its punitive aims.

Response: The provisions stating that the imposition of sanctions under this rule is in addition to any other sanctions provided in the agreement or contract is not new. It was included in § 400.451(c). Further, it is not FCIC's decision regarding whether other sanctions are imposed. FCIC can only enforce the sanctions available under the contract or agreement and section 515(h) of the Act.

FCIC will take into consideration any other sanctions that may have been previously imposed for the conduct to ensure that the sanctions are not disproportionate to the conduct. To the extent that FCIC imposes sanctions under section 515(h) of the Act, in addition to the remedies available under the contract or agreement, the person is able to challenge such imposition before the Administrative Law Judge.

Comment: One commenter stated that because the definition of willful and intentional is broad and sanctions can be applied without resulting monetary damages, it appears that cumulative penalties could easily result from simple mistakes that resulted in little to no damages. Thus, cumulative penalties could be unconstitutional as it may constitute excessive fines under the Eighth Amendment.

Response: Cumulative penalties cannot be applied for simple mistakes. Sanctions under section 515(h) of the Act can only be applied for willfully and intentionally providing false or inaccurate information or failing to comply with a requirement of FCIC. Further, materiality will be considered when determining whether to impose a sanction and a consideration of the gravity will also be done to determine the amount of sanction to apply. This should preclude the imposition of sanctions that is disproportionate to the conduct.

Comment: Two commenters stated that the $100,000 threshold in § 400.454(c)(2) may be appropriate for producers, agents, adjusters, or other program participants, but it is too low to impose on insurance providers. A $100,000 indemnity could represent only a few hundred thousandths of the total indemnities paid by insurance provider. A commenter stated that the proposed penalty is too harsh. Absent any intention on the part of Congress to impose such draconian penalties, the proposed regulations cannot stand. A commenter suggested that $500,000 may be a more appropriate benchmark for insurance providers.

Response: The $100,000 threshold in the aggregate may be low given the amount of indemnities each insurance provider pays out each year. However, on an individual basis, a $100,000 indemnity is a significant amount and the consequences are appropriate, especially given that insurance providers are required to review all claims in excess of $100,000 and annually report the results. The commenter is correct that in the case of multiple violations, a $500,000 threshold is more appropriate.

Comment: One commenter stated that the threshold amount for the imposition of maximum penalties is low and has no rational basis, especially when applied to an insurance provider. Without raising the threshold for imposing the maximum disqualification term or fine, the FCIC could run two serious risks. First, it easily could be imposing civil fines in amounts disproportionate to actual losses and will thus be excessive under the Eighth Amendment of the Constitution. Second, program disqualification for an insurance provider which overpays losses based on such a low threshold is disproportionate that this remedy, too, would violate the Eighth Amendment.

Response: The civil fine is no more than the amount of any pecuniary gain resulting from the improper conduct for which such sanction is sought or $10,000. The $10,000 civil fine is reasonably related to the amount of time and resources required to investigate whether false or inaccurate information was provided to FCIC or the insurance provider and whether such information was provided willfully and intentionally. The Supreme Court has held that civil fines reasonably related to the cost of investigation do not violate the Eighth Amendment. FCIC is unsure of the argument that ''program disqualification for an insurance provider which overpays losses based on such a low threshold is disproportionate that this remedy, too, would violate the Eighth Amendment.'' The Supreme Court has held that occupational debarments, even permanent ones, are traditionally not viewed as punishments. Therefore, it is difficult to see how an occupational disqualification for a limited term would be ''cruel and usual.'' Further, while FCIC has added a materiality requirement, it is not dependent on monetary damages. Further, these thresholds are related to the maximum sanctions that can be imposed. Based on the gravity of the violation, amounts smaller than the maximum may be appropriate. No change is made in response to this comment.

Comment: One commenter stated the monetary threshold in § 400.454(c)(2)(ii) (redesignated as 400.454(c)(3)(ii)) is less defensible when one recognizes that it is not tied to a single crop year's overpayments. Hypothetically, disqualification could occur based on more than $100,000 in errors over multiple crop years. An insurance provider could be barred from the program for errors amounting to less than 0.009 percent of indemnities paid. FCIC's approach violates the Eighth Amendment as applied to insurance providers.

Response: As stated above, FCIC has left the single violation at $100,000 but increased the threshold for multiple violations to $500,000 for the imposition of the maximum sanction against insurance providers. The commenter is correct that since insurance providers deal with much larger amounts of claims, the threshold should be higher for the imposition of the maximum sanction. However, as stated above, monetary damages are not required as a condition of imposing a sanction under this rule. Sanctions can be imposed for any willful and intentional providing of false or inaccurate information or willful and intentional failure to comply with a requirement of FCIC. This means that under the Act, a single willful and intentional providing of false or inaccurate information by an insurance provider can subject it to disqualification of a period up to one year. Although not required, FCIC has added a materiality requirement but it is still not conditioned on whether there is a monetary loss.

Comment: One commenter stated that the proposed rule states a single 'violation' can be the basis for the imposition of the maximum penalty if the violation results in an overpayment of more than $100,000. This $100,000 threshold is immaterial and statistically insignificant with regard to insurance providers.

Response: A single violation of $100,000 is not statistically insignificant. The average claim paid over the last three crop years is less than $5,300. Further, approved insurance providers have an obligation to verify all claims in excess of $100,000. Therefore, there is a heightened duty with respect to these policies. As a result, FCIC has not increased the single violation threshold. However, as stated above, FCIC has increased the multiple violation threshold for insurance providers to $500,000.

Comment: Several commenters stated that the parameters proposed for the maximum penalties under § 400.454(c)(2) (redesignated as 400.454(c)(3)) were too broadly worded. The commenter asked what constitutes ''multiple'' violations. If a single claim involves the submission of five fraudulent claims for indemnity, a commenter asked whether the participant has committed multiple violations.

Response: Multiple violations are the number of each willful and intentional false or inaccurate statement and each incident of failing to comply with a

requirement of FCIC. One false or inaccurate statement or one incidence of failing to comply with a requirement of FCIC is a single violation. More than one false or inaccurate statement, even if there is only one claim involved, or more than one incidence of failing to comply with a requirement of FCIC constitutes multiple violations. In the example given, each fraudulent claim for indemnity counts as a separate violation so that five fraudulent claims would constitute multiple violations.

Comment: One commenter asked if the multiple violations all have to be of the same nature, or whether they can be completely unrelated violations.

Response: Multiple violations do not all have to be of the same nature. Multiple violations may be completely unrelated. An example of multiple violations of the same nature may be an insured who falsely certified three separate production worksheets that the production was less than the guarantee. An example of multiple unrelated violations may be when a producer falsely reports acreage on an acreage report and then later falsely reports production for the unit and claims a loss.

Comment: One commenter asked how many years does ''several crop years'' entail.

Response: ''Several crop years'' is commonly defined as a number of more than two or three, but not many. ''Many'' is commonly defined as a large number to infinity. Use of the term ''several'' means that if the improper conduct occurred in more than three crop years, the maximum sanction can be imposed.

Comment: One commenter asked under § 400.454(c)(2) (redesignated as 400.454(c)(3)), how many years back can FCIC look to violations ''over several crop years.''

Response: The Act does not limit the number of years RMA can look at to discover fraud, waste or abuse.

Comment: One commenter stated that under the proposed rule one error, immaterial or not, which does not arise to negligence much less fraud, can be mistakenly repeated numerous times. The maximum penalty would appear to apply in the case of multiple violations without materiality or damages.

Response: Sanctions can only be imposed for proven willful and intentional acts that monetarily or non-monetarily harm the program. If the person knows that he or she is committing an error and continues to do so, then this would be willful and intentional conduct that could lead to the imposition of sanctions. In addition, as stated above, FCIC has added a provision regarding materiality although it does not require monetary damages.

Comment: One commenter asked whether there must have been an actual adjudication by FCIC or some other authority of a previous violation.

Response: There is no requirement for an adjudication of a previous violation. However, to be a factor in determining the appropriate length of disqualification or amount of civil fine there must be sufficient evidence to prove that there was a violation and that it was willful and intentional. The Administrative Law Judge will consider whether there is sufficient evidence to support that a previous violation occurred.

Comment: One commenter asked for examples of multiple acts of wrongdoing.

Response: FCIC has reconsidered this provision in light of the other provisions and comments received and realized that only conduct that is willful and intentional can be subject to sanctions and such improper conduct constitutes a violation. Since redesignated § 400.454(c)(3) already covers multiple violations, FCIC has removed the provisions relating to multiple acts of wrongdoing to avoid any ambiguity.

Comment: One commenter asked what is a wrongdoing. Wrongdoing is not a defined term in the proposed regulations. The commenter asked if wrongdoings equate to a violation.

Response: As stated above, this provision has been removed because multiple violations are already covered under redesignated § 400.454(c)(3)(i).

Comment: One commenter asked if multiple acts of wrongdoing span more than one crop year, and if so, how many crop years.

Response: As stated above, the provisions regarding wrongdoings have been removed. Redesignated § 400.454(c)(3) already covers multiple violations.

Comment: One commenter asked what would constitute ''multiple'' acts of wrongdoing. The commenter stated that ''wrongdoing'' should be a defined term. The commenter states that a similar problem of ''individual'' or ''multiple'' violations arises under § 400.454(f)(1).

Response: As stated above, the provisions regarding wrongdoings have been removed. The term ''individual'' and ''multiple'' are given their common usage meaning and, therefore, a definition is not necessary. Individual means one and multiple means more than one.

Comment: Several commenters stated that the phrase ''of so serious a nature'' provides no objective guidance as to what conduct rises to this level. The commenters suggested that FCIC clearly define precisely what conduct will result in the maximum penalties.

Response: Conduct ''of so serious a nature'' is one of the standards used in suspension and debarment proceedings and FCIC intends to use the history of the imposition of suspensions and debarments under this standard as guidance under this rule. Further, this standard still requires that the conditions of willful and intentional be met. However, it is not possible to define the actual conduct meeting this standard because each case is based on its own factual situation. No change has been made in response to this comment.

E. Section 400.454(d)

Comment: Several commenters objected to imputation of conduct between individuals and corporations. They claim that section 515(h) does not authorize the imputation of conduct between individuals and corporations. In addition, FCIC's proposed rule provides no evidence that its board of directors has authorized the Manager to impute liability as part of conducting the 'business' of FCIC. One commenter stated that the provisions for imputations of conduct of one person to another are unauthorized by the FCIA, inappropriate, legally improper, and both overly broad and vague. One commenter stated that the most troubling is the potential to impute conduct from an individual to an organization. This provision puts insurance providers at risk for unjustified sanctions. However, if RMA proceeds with its inclusion, the scope of potentially imputable conduct must be narrowed.

Response: The Act does not preclude the imputation of improper conduct. The purpose of section 515(h) is to protect the Government from doing business with persons who have willfully and intentionally made misrepresentations. Persons can include entities or individuals. However, all entities are operated by individuals who are responsible for the actions of the entity. Therefore, those individuals should be held responsible for those actions just as much as the entity itself. Conversely, entities that benefit from the improper conduct by its associates should similarly be held responsible. Without the ability to impute improper conduct too many people could find means to shield themselves from their conduct. Further, the factors that must be satisfied before the imputation of conduct should ensure that the truly innocent are not sanctioned. There must be knowledge, approval or acquiescence

before knowledge can be imputed. Further, as stated more fully below, FCIC has added provisions to clarify when improper conduct may be imputed and that the factors applicable to determining the gravity of the violation must also be considered with respect to the person upon whom improper conduct is imputed. No change has been made in response to this comment.

Comment: One commenter stated that FCIC cannot rely on 7 CFR part 3017 for the imputation of liability. FCIC cannot rely on 3017 because 3017 provides for imputation of liability by FCIC only for 'fraudulent, criminal, or other improper conduct.' The first problem with this concept is that part 3017 was not issued under the authority of FCIA. The second problem with relying on part 3017 is that FCIC has not cited the statutory authority for that set of regulations as authority for the proposed rule. Finally, the rule calls for the imputation of liability for any violation of § 400.454(b), which includes providing false or inaccurate statements and failing to adhere to a 'Requirement of FCIC.' A false statement would not be fraudulent unless made with the requisite intent. An inaccurate statement or failure to adhere to a requirement of FCIC could result simply from negligence. Thus, the severity of the conduct embraced by 3017.630 is significantly greater than the conduct covered by proposed § 400.454(b).

Response: Section 515(h) of the Act describes the conduct that is subject to sanctions under this rule, not 7 CFR 3017. The purpose of the imputation of conduct provisions is to preclude individuals from escaping responsibility for their actions by hiding behind entity structures. It is not intended to enlarge the scope of the sanctions or to apply to conduct that is otherwise not sanctionable under section 515(h). However, FCIC must employ all reasonable measures to protect the program from any person who has committed a violation subject to the sanctions in section 515(h). No change has been made in response to this comment.

Comment: One commenter stated that the proposed rule improperly expands, without providing a basis for doing so, the scope of the allowed imputation under 7 CFR 3017.630 to include omissions and failures to act as well as culpable acts performed with intent.

Response: Section 515(h) of the Act describes the conduct that is subject to sanctions under this rule. Section 400.454(d) only seeks to ensure that those persons involved in the conduct described in section 515(h) are held accountable. One way to do this is to preclude individuals from shielding themselves through the use of entities or from entities shielding themselves by claiming the conduct was caused by an individual associated with the entity even though the entity benefited from the conduct. No change has been made in response to this comment.

Comment: One commenter stated imputing conduct would be improved by two fundamental changes. First, conduct only should be imputed when the person to whom the conduct is imputed 'knows or has reason to know' of the conduct under the definition contained in 7 CFR 1.302(o). The standards contained in that definition should work for the Federal crop insurance program. Second, the imputation scheme could be improved by revising 400.454(f) to conform to 7 CFR 1.335(b). Providing a non-exhaustive list of aggravating and mitigating factors would create appropriate flexibility for dealing with situations where conduct is imputed.

Response: As stated above, FCIC has already included the definition of ''knows or has reason to know'' and used that term with respect to the imputation of conduct. Further, FCIC has added a provision that will require the review of the factors added to § 400.454(c)(2) when imposing a sanction on a person to whom conduct was imputed.

Comment: One commenter stated that to impute the improper conduct of a person to another person, such person must know or should have known of the improper conduct. This statement indicates that the government will assess what the knowledge level of an individual should be and prosecute them according to their supposed knowledge. There are many factors that can influence the knowledge level of an agent or insurance provider representative. Not every insured and agent has the same level of knowledge or access to every element of information.

Response: As stated above, imputation of improper conduct provides a means to ensure that those responsible for the improper conduct are held accountable. It is to prevent persons from using entities or other persons as shields against responsibility. Persons should not be permitted to turn a blind eye to what is occurring, while at the same time they are benefiting from the conduct. While acceptance of benefits of the improper conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. No change has been made in response to this comment.

Comment: One commenter stated that holding an organization responsible for the acts of an individual is only reasonable if that individual is a principal of that organization, and even then there are perimeters to be established.

Response: The commenter's view is too restrictive. There may be cases where an entity will allow a subordinate to commit violations or turn a blind eye to such conduct in order to obtain the benefits. For example, an agency may knowingly allow agents to falsify records in order to increase premiums and their commissions. The agents may not be a principal of the agency, but the agency by allowing the improper conduct, would be complicit and should be held accountable. There are sufficient parameters in the rule to ensure that persons who have no way of knowing of the improper conduct and have no involvement are not held accountable for the actions of others. No change has been made in response to this comment.

Comment: Two commenters stated it would appear that the rule would hold a person responsible for the acts of another even where such statements, acts or omissions are not fraudulent. The commenter feels that other persons could be held to a higher standard than the person making the statement or committing the act or omission. If there is to be any imputation of liability, it must pertain strictly to fraudulent statements, acts or omissions and require actual knowledge or a reason to know.

Response: Persons to whom conduct may be imputed are not held to a higher standard. The rule requires knowledge, approval or acquiescence before the conduct can be imputed from an individual to the organization. Further, knowledge of or a reason to know is required before conduct can be imputed from an entity to an individual. As stated above, FCIC has added a definition of ''knows or has reason to know'' obtained from 7 CFR 1.302. While acceptance of benefits of the improper conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the improper conduct, there may be no basis to impute the improper conduct. However, as stated above, fraudulent conduct is not required before a sanction may be imposed. Section

515(h) refers to willfully and intentionally providing false or inaccurate information or willfully and intentionally failing to comply with a requirement of FCIC. If such conduct occurs and the requirements for the imputation of such conduct have been met, these persons will be subject to the sanctions contained in the rule. No change has been made in response to this comment.

Comment: One commenter stated that FCIC is proposing to revise § 400.454(d) to allow FCIC to impute the improper conduct of a person to another person if the other person has the power to direct, manage, control or influence the activities of the person that is being cited for improper conduct. Since an insurance provider employs agents to sell policies, it follows the entire organization could potentially be cited for improper conduct of an agent. Both could be disqualified from selling crop insurance.

Response: An insurance provider could only be at risk of sanction if it is proven that the insurance provider had knowledge, approved of or acquiesced to the conduct of the agent that is the subject of the sanction. While acceptance of benefits of the improper conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. However, there have been instances in the past where insurance providers have allowed false information, such as backdated documents, to be provided by agents. In such cases, the insurance provider should be held accountable. No change has been made in response to this comment.

Comment: One commenter stated that the proposed rule seems to indicate that suspension and/or debarment may happen without the parties being fully aware of the reasoning behind the penalty. The commenter recommends that this provision be eliminated for 'participants' and FCIC fully explain the process.

Response: FCIC is unsure of the basis for the comment. FCIC must prove that a person willfully and intentionally provided false or inaccurate information or willfully and intentionally failed to comply with a requirement of FCIC. Such conduct cannot be imputed to another unless there was knowledge, approval or acquiescence. Further, the process of imposing disqualifications and civil fines has been in place since 1993 and, before any sanction is imposed, the person will have an opportunity to hear the evidence against them and provide evidence in their defense. An Administrative Law Judge will determine whether a sanction under this rule can be imposed. Therefore, there should never be a situation where a person would not be aware of the basis for the sanction. In addition, by statute, sanctions apply to participants. Therefore, there is no basis to remove them from this rule. No change has been made in response to this comment.

Comment: One commenter stated that at a minimum, the scope of potentially imputable conduct must be narrowed to only impute conduct of officers, directors and conduct of employees that is specifically ratified or endorsed by the entity. Moreover, the entity must be given 'credit' for having practices that attempt to prevent rule violations and encourage 'whistleblower complaints' of suspected violations. Thus, if an entity addresses the allegedly 'bad' conduct by its employee or independent contractor after its officers have been made aware of the situation, it should not be subject to any of the penalties under the rule.

Response: The rule requires the knowledge, approval or acquiescence of the entity before improper conduct can be imputed. Unless these standards are met, no conduct can be imputed to the entity. However, it is not practical to limit the imputation of conduct to when such conduct is ''ratified'' or ''endorsed'' by the entity. Such actions suggest the need for an affirmative action on the part of the entity. However, in most cases, there is a failure of the entity to act when it knew or should have known of the improper conduct. If the safeguards put in place by the entity are working there should be no risk of the imputation of conduct to it. Further, one of the factors to be considered in determining the gravity is the internal controls in place. However, FCIC does not know what the commenter meant by ''addressing'' the alleged bad improper conduct. Once the entity becomes aware of the improper conduct that is subject to sanction, it must be reported to FCIC so it can take the appropriate action against the wrongdoer. Failure to report such improper conduct can make the entity at least appear complicit in the conduct. If the person rejects the improper conduct and any benefit derived therefrom, such as refusal to accept documents that are backdated, etc., then there may not be a basis for the imputation of conduct.

Comment: One commenter stated that clarification concerning imputation of liability to other persons is needed. It must be proven that the third party had actual knowledge or at least a reason to know of the fraudulent statement, act or omission of another.

Response: As stated above, this rule does require knowledge or at least a reason to know before conduct can be imputed. While acceptance of benefits of the conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. However, fraudulent is not the standard. If a person willfully and intentionally provides a false or inaccurate statement, the person is subject to the sanctions contained in this rule.

Comment: One commenter stated that FCIC has the authority to sanction, even debar an insurance provider as a result of the violation of a low level employee.

Response: An insurance provider cannot be disqualified or assessed a civil fine unless it is proven that it had knowledge of or reason to know of the willful and intentional violation by the low level employee. While acceptance of benefits of the improper conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. However, there have been instances in the past where the insurance provider has turned a blind eye to misconduct it knew about, such as backdated documents, and in such cases the insurance provider should be held accountable.

Comment: One commenter objects to imputing the conduct of an 'individual associated with an organization,' as FCIC has not defined what it means to be 'associated with an organization.' The commenter asks whether a contractor is 'associated with' an insurance provider or whether that contractor's subcontractor is associated with an insurance provider.

Response: Any person that performs work on behalf of the organization can be found to be associated with the organization. However, that does not necessarily mean that conduct will be imputed to the organization. The organization must know or have reason to know of the improper conduct. While acceptance of benefits of the improper conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the conduct, there may be

no basis to impute the conduct. No change has been made in response to this comment.

Comment: One commenter stated that a corporation's receipt of a benefit from an individual's violation does not 'evidence knowledge, approval or acquiescence' unless the corporation knows or should know of either the violation or that the benefit resulted from the violation.

Response: While acceptance of benefits of the improper conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct.

Comment: One commenter stated (1) the imputation appears to be automatic if the 'conduct occurred in connection with the individual's performance of duties for or on behalf of that organization.' The commenter stated a reasonable approach would be to make conduct by a 'principal,' no presumed imputation should exist with respect to any person who is not a principal. (2) While receipt of a benefit can be 'evidence of knowledge, approval or acquiescence,' it only should be rebuttable evidence. (3) The proposed rule gives no recognition of the extent to which the organization's practices attempted to preclude such conduct. USDA elsewhere has recognized the relevance of this factor. See for example, 7 CFR 1.335(b)(11). (4) Imputing knowledge in the severe fashion proposed could chill internal investigative efforts by insurance providers and ultimately cooperation with FCIC in identifying and punishing misconduct. FCIC should not adopt a rule that might chill such efforts.

Response: (1) The commenter's view is too restrictive. There may be cases where an entity will allow a subordinate to commit violations or turn a blind eye to such conduct in order to obtain the benefits. For example, an agency may knowingly allow agents to falsify records in order to increase premiums and their commissions. The agents would not be a principal of the agency, but the agency by allowing the improper conduct would be complicit and should be held accountable. (2) While acceptance of benefits of the improper conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the person can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. (3) As stated above, having internal controls in place is one of the factors to be considered when determining the gravity of the violation. (4) This rule should not chill the investigative efforts of the entity. If the entity discovers improper conduct subject to sanction under this rule, the entity can shield itself from any imputation of such conduct by not accepting the benefits from the conduct and promptly reporting the improper conduct to FCIC. No change has been made as a result of the comment.

Comment: One commenter stated that an insurance provider can be sanctioned based simply upon the fact that the conduct occurred in connection with the individual's performance of duties for or on behalf of that organization. If an insurance provider did not actively participate in the agent's or adjuster's violation, the agent's or adjuster's conduct should not be imputed to the insurance provider and the insurance provider should not be sanctioned under this rule.

Response: An insurance provider that did not actively participate in an agent's or adjuster's violation and it is proven that the insurance provider did not know or have reason to know of the violation, the insurance provider should not be sanctioned. As stated above, the entity can shield itself from any imputation of such conduct by not accepting the benefits from the improper conduct and promptly reporting the conduct to FCIC. No change has been made as a result of this comment.

Comment: One commenter stated that whether a person had reason to know of a particular course of conduct is a very subjective analysis. The commenter asked how FCIC plans to determine whether one person had a reason to know of the conduct of another.

Response: Acceptance of the benefits of the conduct subject to the sanction is evidence of knowledge. However, as stated above, that evidence is rebuttable. There are other ways to establish a reason to know, such as an obligation to review documents that contain the false statements, etc. In all cases, the person will have the opportunity to provide evidence in defense and the issue will be decided by an independent Administrative Law Judge.

Comment: Two commenters, citing 41 AM JUR 2d, Independent Contractors section 2 (2007), stated that liability of an independent contractor may not be imputed to a corporation, but it imposes a virtually impossible standard on large insurance providers. Under the proposed regulations, a corporation with thousands of lower-level employees and independent contractors can be held liable and subject to disqualification for the rogue actions of a single independent contractor [or any other individual 'associated' with the insurance provider], even if that individual acts in violation of insurance provider policy unbeknownst to the insurance provider.

Response: As stated above, the corporation can only be subject to sanctions under this rule if it knew of or could reasonably have known of the improper conduct. While acceptance of benefits of the conduct can be considered evidence of knowledge, approval or acquiescence of the improper conduct, a person can still rebut such evidence. If the corporation can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. Therefore, the corporation is not liable for the rogue acts of a single independent contractor that is unknown or could not have been known by the corporation. No change has been made in response to this comment.

Comment: One commenter citing Federal law stated that absent evidence that Congress intended to impose such harsh strict liability standards on corporations, of which there is none, the proposed rule cannot stand.

Response: This rule is not imposing strict liability on corporations. Conduct can only be imputed if the corporation knew or reasonably should have known of the improper conduct. While acceptance of benefits of the conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the corporation can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. No change is made in response to this comment.

Comment: One commenter stated that whether an individual had 'reason to know' a specific fact is not equivalent to whether an individual 'should have known' of the fact and FCIC should amend the rule to clarify the applicable standard. USDA's civil fraud regulations, under 7 CFR 1.302(o), already define the phrase 'knows or has reason to know' in the context of fraud and false statements. Another commenter stated that the language 'reason to know' should be defined to make clear that this does not create a 'should have known' standard. The commenter stated that the 'reason to know' requires that a person draw reasonable inferences from information already 'known to him' and does not give rise to the duty of inquiry that is

created by a 'should have known' standard.

Response: As stated above, FCIC has added a definition ''knows or has reason to know'' for clarity and used the definition contained in 7 CFR 1.302(o). However, also as stated above, fraud is not a prerequisite to the imposition of sanctions under this rule. Section 515(h) of the Act only requires that a person willfully and intentionally provide a false or inaccurate statement or willfully or intentionally fail to follow a requirement of FCIC.

Comment: The commenter, citing federal law, stated that imputation from an organization to another organization is contrary to existing law. The mere existence of a partnership, joint venture, joint application, association, or similar arrangement does not automatically give rise to shared liability. The commenter stated that the proposed rule must be clarified to include additional prerequisites for imputed liability such as actual knowledge or reason to know of the culpable acts.

Response: The issue is not shared liability. The question is whether a person can be held accountable for the actions on another. As stated above, the rule requires that there be knowledge or reason to know of the improper conduct. While acceptance of benefits of the conduct can be considered evidence of knowledge, approval or acquiescence of the conduct, a person can still rebut such evidence. If the corporation can prove they were uninvolved and had no way of knowing of the conduct, there may be no basis to impute the conduct. No change has been made in response to this comment.

F. Section 400.454(e)

Comment: One commenter stated that the Agricultural Market Transition Act cited in § 400.454(e)(1)(i)(B) was replaced by the Farm Security and Rural Investment Act of 2002.

Response: The reference to the Agricultural Market Transition Act in § 400.454(e)(1)(i)(B) will be deleted and replaced with the Farm Security and Rural Investment Act of 2002 or a successor statute.

Comment: One commenter stated that the prohibition contained in § 400.454(e)(1)(ii) is neither discussed in nor implied by section 515(h), therefore it is an impermissible expansion of the penalties authorized by ARPA.

Response: FCIC does not understand this comment. Section 515(h)(1) of the Act refers to ''producer, agent, loss adjuster, approved insurance provider, or any other person.'' This means that the sanctions in section 515(h) can apply to any person who willfully and intentionally provides false or inaccurate information or willfully and intentionally fails to comply with a requirement of FCIC. However, section 515(h) provides for different consequences depending on whether the person is a producer or other person. This distinction is carried over into § 400.454(e)(1)(ii). That fact that § 400.454(e)(1)(ii) refers to participant is not an expansion of the available sanction since a participant, as defined in the rule, just delineates a group of persons already included under section 515(h). No change is made in response to this comment.

Comment: One commenter asked if § 400.454(e)(1)(i)(I) (redesignated § 400.454(e)(1)(i)(H)) applied only to federal assistance laws and if so, the rule should be worded to reflect that fact.

Response: Section 515(h) of the Act refers to ''any law that provides assistance to the producer of an agricultural commodity affected by a crop loss or decline in the prices of agricultural commodities.'' It does not make any distinction between federal or any other laws but as a practical matter, disqualification can only apply to programs under the auspices of the Federal Government. Therefore, redesignated § 400.454(e)(1)(i)(H) will be revised to read: ''Any federal law that provides assistance to the producer of an agricultural commodity affected by a crop loss or decline in the prices of agricultural commodities.''

Comment: One commenter stated that the requirements were far too broad and overreaching to be fair and enforceable and that an insurance provider could be subject to sanctions even if it strictly complied with the rule to periodically check the Ineligible Tracking System (ITS) and Excluded Parties List System (EPLS). An insurance provider could be required to check the ITS and EPLS daily for not only prospective business partners, but also for its current employees, adjusters, and agents. In an example given, insurance provider A contracts with an adjuster. Insurance provider A checks ITS and EPLS and the adjuster is cleared. The same adjuster later contracts with insurance provider B. The adjuster is then disqualified for conduct associated with his work for insurance provider B. However, prior to insurance provider A's next periodic check of ITS and EPLS, the adjuster works several claims for insurance provider A.

Response: The burden imposed by this rule is no different than the burden that exists with respect to suspended or debarred persons. The Government wants to preclude such persons from circumventing their disqualification by hiding under the auspices of another person. Participants in the program have the responsibility to periodically review EPLS and ITS to determine whether the persons it does business with are included on such lists. FCIC will examine the reasonableness of the reviews to determine whether it is appropriate to disqualify the participant who does business with a disqualified person. Such disqualification is not automatic. No change is made in response to this comment.

Comment: One commenter stated that the rule's requirement to periodically review the ITS and EPLS to determine persons who are disqualified from participation in the Federal crop insurance program directly contravenes the statutory requirement that the relevant sanctions under the proposed rule be confined to 'willful and intentional' acts.

Response: There is no contravention of the statute by imposing disqualification on persons who elect to do business with a person that has been disqualified. Without this requirement, disqualified persons will be able to hide their participation by hiding under another person. FCIC has the authority to prevent such circumvention and has elected to adopt the same remedies as is applicable to persons who do business with suspended and debarred persons. Disqualification is not automatic and FCIC will consider the circumstances on a case-by-case basis. No change is made in response to this comment.

Comment: Two commenters stated that insurance providers have greater access than individual agencies to monitor ITS and that agencies don't have the system to do an effective job. Although the insurance providers monitor ITS, the agency may not receive notification of ineligibility until several months have passed or until after an initial application was accepted and was detected only when a loss was submitted.

Response: Persons who are disqualified are also reported to the General Services Administration for inclusion on the EPLS. EPLS is available to everyone. Therefore, all participants have the ability to timely determine whether the persons with whom they are doing business have been disqualified. No change is made in response to this comment.

Comment: One commenter asked if entity ABC is ineligible, and new entity DEF is set up, how will agents discover the new entity, without some elaborate system. It would appear that FCIC could have a system which would automatically detect, in a timely manner

before insurance attaches, by cross referencing social security number.

Response: There is no foolproof method to prevent disqualified persons from trying to hide their involvement. The participants' responsibility is to review ITS and EPLS to determine whether it is doing business with a person listed. If a person is not listed because it has changed its name, participants cannot be held accountable for the knowledge. However, if the person is required to provide its social security number or other identification number in connection with its participation in the program or affiliation with the participant, such persons should be identifiable on ITS or EPLS. No change is made in response to this comment.

Comment: One commenter stated that spousal tracking would be tedious to track as there may be multiple entries for a given last name. The commenter asked whether this means that it will have to go through all insureds with that last name. What if a person retains their maiden name and their spouse is ineligible? The commenter asks how this will be tracked.

Response: If the spouse is disqualified under this rule, the spouse should be separately listed in ITS and EPLS. Therefore, there should be no difficulty in tracking such persons.

Comment: One commenter was concerned that an agency could become a victim if an insured were to testify that he knowingly took a false report when, in fact he didn't; it would be the agent's word against the insured's word. The commenter asks where the burden of proof lies.

Response: The burden of proof lies with FCIC, who must establish that the agent willfully and intentionally provided a false or inaccurate statement. Testimony can provide evidence, but the agent will have the opportunity to provide a defense, which will all be considered by a neutral Administrative Law Judge.

Comment: One commenter stated that agents should not be involved in any aspect of production fact finding as it could be interpreted as a conflict of interest. The commenter suggested that this could be remedied by FCIC making production fact finding by agents a conflict of interest.

Response: Agents are precluded from participating in any aspect of the loss adjustment process under the conflict of interest provisions in the SRA. It is the loss adjuster that would be determining production. Further, it is the loss adjuster that should be providing the production information to the insurance provider, not the agent. However, if the agent knows that false information has been provided and does nothing, the agent can be held responsible. No change is made in response to this comment.

Comment: One commenter is concerned that a mistake could be turned into a ''willful and intentional'' act due to a person's misinterpretation.

Response: It is difficult to see how this could happen. FCIC bears the burden of proving willful and intentional conduct and the person will be provided an opportunity to provide a defense. The evidence will be considered by a neutral Administrative Law Judge, who will determine whether FCIC has met its burden. This due process should protect against misinterpretations. No change is made in response to this comment.

Comment: One commenter is concerned about the imposition of multiple penalties of $100,000 per occurrence for multiple events. The commenter recommends that participants should not be punished for simple errors or misinterpretation of a rule, but participants should be punished for willful and intentional abuses.

Response: Simple errors or misinterpretation of a rule are not the basis for sanctions. There must be willful and intentional conduct, which is defined in the rule. Further, the civil fine is $10,000 per violation, not $100,000. No change is made in response to this comment.

Comment: One commenter suggests if an agent submits an acreage report with false information it appears to be shifting the responsibility of acreage reporting from the insured to the agent. The agent should not be expected to act as a law enforcement official. Agents are not authorized to require hard copy records from the insured unless the records are specifically requested by the insurance provider.

Response: The proposed rule is not shifting the responsibility of acreage reporting from the insured to the agent. The insured is responsible for the accuracy of the provided information. However, agents should not provide any documentation with information it knows or has reason to know is false. At a minimum the agent should ask the insured if the information provided is correct. If an agent does not know nor has no reason to know that the information is false, there is no basis to sanction the agent. No change is made in response to this comment.

Comment: One commenter is concerned about the rule's reference to proving willful and intentional error versus unintentional error. Unintentional errors can occur; the most experienced operator, agent or adjuster with years of training or coverage, can make a mistake on a report. Months or years after the unintentional error, these mistakes may be construed as intentional omissions. Specific and defined consideration of the values and variables used to determine guilt or innocence is needed.

Response: Unintentional errors are not the basis for sanctions. FCIC bears the burden of proving that the error was willful and intentional at the time it was made and the person will have the opportunity to provide evidence in the defense. An independent Administrative Law Judge will decide whether FCIC has met its burden. No change is made in response to this comment.

Comment: One commenter stated that the prohibition contained in § 400.454(e)(3)(ii) is neither discussed in nor implied by section 515(h) and therefore, is an impermissible expansion of the penalties authorized by ARPA.

Response: Section 400.454(e)(3)(ii) precludes participants from conducting business directly related to crop insurance with disqualified persons or conducting any other business if such business would permit the disqualified person from receiving a benefit under a program administered under the Act. Under section 515(h) of the Act, FCIC is expressly authorized to exclude persons from participating in the crop insurance program. Ancillary to this express authority is the authority to take such actions as are necessary to ensure that disqualified persons do not continue to participate in, or receive benefits from, the crop insurance program. FCIC exercised this authority in § 400.454(e)(3)(ii). Without this provision, persons could avoid their disqualification by affiliating with other persons. Further, as learned in the suspension and debarment process, the only meaningful way to prevent persons from doing business with disqualified persons is to make them also subject to disqualification. No change is made in response to this comment.

Comment: One commenter stated that the penalty imposed under § 400.454(e)(3)(iii) is inequitable and overly broad. For example, if a disqualified agent also is a chemical supplier, it is unreasonable for FCIC to prohibit insureds from purchasing chemicals from that individual.

Response: Doing business with a disqualified person does not automatically subject the participant to disqualification. The purpose of § 400.454(e)(3)(iii) is to preclude persons from circumventing their

disqualification. FCIC will have to evaluate whether the business is related to the crop insurance program, the disqualified person will be able to receive benefits under the crop insurance program as a result of the business relationship, or the disqualified person is using the business relationship to obtain benefits not otherwise entitled to because of the disqualification. No change is made in response to this comment.

Comment: One commenter asked what occurs in a situation in which a participant is unaware that the person with whom he or she is doing business was disqualified. The commenter asks whether a participant has an obligation to inquire of a prospective business partner as to its status in the crop insurance program.

Response: A participant has an obligation to review ITS and EPLS to discover whether a person with whom they are doing business is disqualified. Therefore, unless there is some subterfuge on the part of the disqualified person, such as using different names, social security numbers, etc., there should not be any situation where the participant is unaware they are doing business with a disqualified person.

Comment: One commenter stated that the phrase in § 400.454(e)(3)(iii), 'may be subject to disqualification' seems selective. The commenter asks what criteria FCIC will apply in determining whether to disqualify a participant for doing business with a disqualified person.

Response: The purpose of the provision is to prevent disqualified persons from circumventing their disqualification. There may be situations where the participant does not know and has no reason to know that a person has been disqualified, such as using a slightly different name or social security number. Under these circumstances, it is unlikely disqualification could be imposed on the participant. There may also be situations where the business conducted is in no way related to the crop insurance program. However, there may also be situations where the participant knows the person is disqualified and elects to do business with them anyway. Under such circumstances, disqualification of the participant may be appropriate. Each case will have to be considered on its own merits. This may seem selective, but all cases will ultimately be determined by a neutral Administrative Law Judge who will determine whether FCIC has met its burden.

Comment: One commenter stated that § 400.454 refers to a person as an insurance provider and the disqualification of an insurance provider is also broad and ambiguous. The commenter asks if the entire insurance provider, the individual, or both are penalized if a qualifying error occurs. Clarification is needed to explain the process used when an insurance provider is disqualified because of an error.

Response: Insurance providers cannot be disqualified because of an error unless such error was committed willfully and intentionally. If the person named in the disqualification is the insurance provider, then the insurance provider as a business entity is disqualified. If an individual affiliated with the insurance provider is disqualified, the disqualification applies to the individual, not the insurance provider unless specifically named. The process used for disqualification is the same for all persons, including individuals and insurance providers. A complaint is filed seeking disqualification and the person can mount a defense before a neutral Administrative Law Judge.

Comment: One commenter stated that § 400.454(e)(3)(ii) states that 'no participant may conduct business with a disqualified participant or other person * * * if, through the business relationship, the disqualified participant or other person will derive any monetary or non-monetary benefit from a program administered under the Act.' It is not clear what 'program administered under the Act' means.

Response: ''Program administered under the Act'' means any program authorized under the Federal Crop Insurance Act. This would include all crop insurance programs, education programs, research and development programs, expert reviews, etc. It would not include any program not authorized under the Act, such as private hail insurance or other lines of business.

Comment: One commenter stated that the rule is overbroad in that it could be interpreted to apply to contractual, statutory, or other pre-existing legal rights and obligations that an insurance provider might have with 'other persons,' i.e., its employees subject to future disqualification. For example, if an employee is disqualified for violating 'FCIC requirements' and is terminated for cause, under federal law the insurance provider must continue to honor its existing ERISA obligations to its former employee. As the rule is written, allowing the disqualified participant to continue to derive these monetary benefits, as mandated by ERISA, could subject the insurance provider to disqualification. Another commenter stated that contractual and statutory rights that precede disqualification should not be affected. If an employee is disqualified, the employer is still obligated to honor these pre-existing obligations. The rule should clarify that honoring contractual and statutory obligations that precede the date of disqualification does not subject an entity to potential disqualification because of indirectly providing a 'monetary or non-monetary benefit from a program administered under the FCIA.'

Response: As stated above, the purpose of this provision is to prevent disqualified persons from circumventing their disqualification by affiliating with other participants. In the scenario presented, once the participant severs the relationship with the disqualified person, FCIC recognizes that there may be legal obligations that the participant must continue to fulfill, such as ERISA. However, such arrangements may be subject to scrutiny to ensure that they are not a subterfuge to continue to channel benefits to a disqualified person. FCIC has added provisions to clarify that simply fulfilling a previous contractual or statutory obligation after termination of the relationship with a disqualified person is not doing business with such person unless the arrangement is determined to provide a means of circumventing the disqualification, for example, a severance agreement executed at the time of termination that provides payments or benefits similar to what the person was previously receiving.

Comment: One commenter stated that the rule has no limitation with respect to the type of business relationship that a participant or other person has with a 'disqualified participant or other person.' Thus, the business activity could be completely unrelated to any business transaction subject to the FCIA or to the receipt of any benefit from the USDA under another Federal program. Second, such a proposed provision creates a serious risk of blacklisting individuals.

Response: There is no limitation with respect to the type of business because FCIC does not want to create loopholes for disqualified persons to be able to create business opportunities to circumvent their disqualification. However, § 400.454(e)(3) expressly states that the business must directly relate to the Federal crop insurance program or allow the person to receive a benefit from a program administered under the Act. As stated above, such

programs would include the contracts, cooperative agreements and partnerships for research and development, educations, etc. Therefore, there is no possibility of ''blacklisting'' individuals. FCIC has the right to elect not to permit disqualified persons to circumvent their disqualification by preventing their ability to obtain benefits related to crop insurance or another program administered under the Act. No change is made in response to this comment.

Comment: One commenter stated that the proposed rule proposes routine review of the ITS and EPLS to ensure FCIC is not doing business with a disqualified person. Each insurance provider handles the flow of information from RMA systems in a different manner. This commenter does not use ITS or EPLS. Agents are notified if an insured is ineligible, however the manner and timing of the notification varies with each insurance provider. The proposed rule would hold agents accountable for review of systems of which they have little or no knowledge. The commenter recommends that RMA systems not accept data for ineligible producers.

Response: The commenter's suggestion presupposes that the disqualified person is an agent or a producer and this may not be the case. Therefore, FCIC would have no means to identify when participants are doing business with disqualified persons. Further, all participants are already under an obligation to check the ITS and ELPS with respect to persons who may be suspended or debarred. That would include agents, loss adjusters, producers, and any other persons. Therefore, this rule does not add a new obligation; it simply reaffirms the existing obligation and places participants on notice to also check for disqualified persons. No change is made in response to this comment.

Comment: One commenter stated that, as the rule is written, an agent and agency could be disqualified from selling crop insurance for an error that was not willful or intentional on their part.

Response: It is difficult to see how continuing to do business with a disqualified person is not willful or intentional unless there is some deceit on the part of the disqualified person. The participant has a duty to check the ITS and ELPS to identify disqualified persons. The participant knows that it is precluded from doing business with such persons. Therefore, the participant's continuance of business with a disqualified person under the circumstances can be considered willful and intentional.

G. Section 400.454(f)

Comment: One commenter stated that the civil fines were too miniscule and suggested that the minimum fine should be $50,000, civil fines should be imposed against all individuals who participated in the entire scheme, and jail time of five years minimum for all offenders involved in the loan process.

Response: FCIC cannot impose a civil fine in any amount greater than that authorized in section 515(h) of the Act. Further, nothing in the Act authorizes the imposition of incarceration. However, to the extent that the conduct that subjects a person to disqualification may violate any criminal statutes, there is no impediment to the prosecution of such persons. Further, any individual who participated in the conduct that is subject to disqualification is also subject to disqualification provided their conduct meets the standards contained in this rule.

Comment: One commenter stated that although § 400.454(c) requires FCIC to consider the ''gravity'' of an offense when imposing a civil fine, FCIC should amend subsection (f) to recognize the concept of materiality.

Response: As stated above, FCIC has amended the provisions in § 400.454(c) regarding whether to impose a civil fine and the amount to include materiality.

Comment: One commenter stated that the rule improperly fails to recognize any concept of materiality. The absence of a materiality test is contrary to FCIA, which only authorizes sanctions for material violations. Because the proposed rule applies to reinsurance agreements, it clearly sets up a situation where immaterial conduct is punished beyond the levels contemplated in the SRA. The commenter suggested that this section could be improved by including the non-exhaustive list of aggravating and mitigating factors found under 7 CFR 1.335(b).

Response: As stated above, FCIC has amended the provisions in § 400.454(c) regarding whether to impose a civil fine and the amount to include materiality. Further, FCIC has also added the list of aggravating and mitigating factors found in 7 CFR 1.335(b) to § 400.454(c).

Comment: Two commenters stated that § 400.454(f)(1) imposes a separate civil fine for each individual action. It was suggested that FCIC should fully explain what constitutes an 'individual action'.

Response: FCIC has revised the provision to refer to ''each violation.'' FCIC has also revised the definition of ''violation'' in § 400.452 to specifically refer to the elements for disqualification or civil fines contained in § 400.454.

Comment: One commenter asked what would constitute an individual or multiple violations.

Response: As stated above, each willful and intentional false or inaccurate statement or each act that would be considered a willful and intentional failure to comply with a requirement of FCIC would be considered an individual violation. For example, each document that contains a back-dated date would be an individual violation. If there is more than one such document or there are different false statements on more than one document, there would be multiple violations.

Comment: One commenter stated that FCIC proposes to eliminate current § 400.454(f), which requires the hearings to be governed by the Rules of Practice Governing Formal Adjudicatory Proceedings Instituted by the Secretary. Without this section, it is unclear what rules apply to the hearings. The commenter suggested that FCIC state what rules of practice apply to these proceedings.

Response: The provisions from current § 400.454(f) that provide for the rules of practice have not been eliminated. They were moved to § 400.454(a).

Comment: One commenter suggested that the last sentence of 400.454(f)(3)(i) should end with the period inside the end parenthesis and the preceding sentence should end with a period of its own; '* * * the specified due date. (If * * * signed by FCIC.)' instead of '* * * the specified due date (if * * * signed by FCIC).'

Response: Given that these are independent sentences, FCIC has removed the parenthesis and added periods at the end of each sentence.

H. Section 400.454(g)

Comment: Two commenters stated that the language about insurance providers' assumption of the book of business introduces ambiguity and is absolutely unnecessary. As a matter of both fact and law, policies written by an agent or an agency on behalf of an insurance provider are already the direct liability of the insurance provider, so no assumption would be required. Adding this provision simply introduces confusion to an otherwise clear situation. On the other hand, it is appropriate for this provision to require the insurance provider to assign policies written by a disqualified agent or agency to a different agent or agency.

Response: The commenter is correct that when an agent writes a policy for a particular insurance provider, that

insurance provider has already assumed the liability for such policy. Therefore, this provision is removed. The requirement that the insurance provider assign the policies to a different agent or agency will be retained. However, ultimately it is the producer that has the right of selection of which agent will service their business and may move their policy to any agent of their choice that is not disqualified. Therefore, the provision is revised to allow for this election.

Comment: One commenter stated that the proposed rule appears to suggest that an agent rightfully found in violation can have his entire business confiscated, in addition to disqualification and other pecuniary fines. This could lead to constitutional problems.

Response: The agent is precluded from selling or servicing any policies or receiving any benefits from the sale or service of such policies during the period of disqualification. However, as the insurer, the insurance provider has an obligation to ensure that the policies are sold and serviced in accordance with the approved policies and procedures of FCIC. As stated above, it is the producer that has the right to elect which agent will sell and service his or her policy. If the producer fails to make this election, under the rule, the insurance provider must assign the policy to another agent but the assignment of any policy will only last for as long as the period of disqualification. After the disqualification period, subject to the election of the producer, the agent is entitled to get the book of business back. The provision has been revised to clarify that after the period of disqualification, policies that were assigned by the insurance provider revert back to the previously disqualified agent unless the producer elects another agent.

Comment: One commenter stated that it appears if an agent is disqualified, the agency employing the agent would be subject to disqualification as well. The rule also states that the insurance provider would be required to assign the book to another agent or agency. The commenter suggests the inclusion of language that, in the case of one agent in an agency being sanctioned, would leave the book of business within the same agency if that is the agency's choice or if one agency within an organization is sanctioned, would leave the business within the same organization if that is the organization's choice, unless the agency also committed a willful and intentional violation of FCIC requirement.

Response: If an agent is disqualified, the agency employing the agent may only be disqualified if the agency has been named in a disqualification, it continues to do business with the agent or provides any benefits to the agent under the crop insurance program or any other program authorized under the Act during the period of disqualification. As stated above, it is the producer that has the first right to determine who will sell and service his or her policy. If no such election is made, it is the responsibility of the insurance provider to ensure that the policies are properly serviced. There is nothing in this rule that would preclude the insurance provider from electing to keep the policies in the same agency. However, there is nothing in the Act that provides an agency with the right to take over policies sold and serviced by one of its agents. The transfer of policies under such circumstances should be a contractual matter between the agent, agency and insurance provider. No change is made in response to this comment.

Comment: One commenter had great concern that an insurance provider could somehow assign a violating agent's book of business to someone else. The commenter suggested that it may be legally impossible for an insurance provider to seize an agent's book of business.

Response: Once the agent is disqualified, that agent can no longer sell or service the policies in its book of business or receive any benefits from the same or service of such policies. As stated above, the provision has been revised to provide the producer with the right to elect a different agent. However, if no such election is made, as the insurer of these policies, the insurance provider has an obligation to sell and service the policies under the SRA. FCIC is leaving it to the insurance provider and agent to determine how the book of business will be serviced during the period of disqualification. However, FCIC has added a provision clarifying that after the period of disqualification, the policies that were assigned by the insurance provider revert back to the previously disqualified agent unless the producer elects another agent.

Comment: One commenter stated the requirement that the insurance provider assign them to a different agent or agency to service during the period of ineligibility is unfair and is a threat to the rights of the agent and agency. Agents and agencies own their books of business; it is an asset of the agent and the agency just like any other asset. The reassignment of that book of business would be the transferring of an agent's physical assets to another party.

Response: While agents and agencies may consider the book of business to be an asset, it is the producer that controls who sells and services the policy. Therefore, as stated above, the provision was revised to give the producer the election to cancel and rewrite the policy with another agent or agency. If the producer does not transfer the policy, it is the insurance provider that has a contractual obligation to ensure that the policies are serviced. As stated above, FCIC is leaving it to the agent, agency and insurance provider to determine to whom policies are moved once the agent is disqualified. This rule simply reiterates that such an assignment of the policies must occur. Further, as stated above, FCIC has added provisions clarifying that after the period of disqualification, the policies that were assigned by the insurance provider revert back to the previously disqualified agent unless the producer elects another agent.

Comment: One commenter stated that if a disqualification for an insurance provider results in a 'time out of new sales and renewals, but the ability for continued service of existing policies,' they believe that the same standard should be held to agents and agencies, and not simply a confiscation of an agent's or agency's book of business.

Response: Given the large number of policies in an insurance provider's book of business, it may not be feasible for them to be disqualified in the middle of a crop year without great disruption to the crop insurance program. All of the policies must be cancelled and rewritten with another insurance provider and for some insurance providers it could amount to hundreds of thousands of policies. At the end of the crop year, policies must be cancelled and rewritten with another insurance provider. Therefore, this rule does not allow the insurance provider to continue doing business, it simply provides for the orderly transition of the business. There is not such a large disruption to the program when an agent's or an agency's book of business must be moved. Policies do not have to be cancelled and rewritten because they will remain insured with the same insurance provider. However, as stated above, the agent's or agent's book of business is not confiscated. During the period of disqualification, the producer can elect to move to another agent and only if such election is not made will the insurance providers assign policies to fulfill its contractual obligation under the SRA. The contract between the agent and insurance provider can determine

how the business is sold and serviced if the agent is disqualified and such arrangements will not be disturbed by FCIC unless they violate the provisions of this rule by permitting the agent to continue to benefit from the crop insurance program during the period of disqualification. The provisions have also been revised to clarify that after the period of disqualification, the policies that were assigned by the insurance provider revert back to the previously disqualified agent unless the producer elects another agent.

I. Section 400.454(h)

Comment: One commenter stated that 400.454(h) contains the risk of improperly cumulative and excessive penalties.

Response: There is nothing in section 515(h) of the Act that states that the administrative remedies contained therein are the only remedies for the proscribed conduct. There are other civil, criminal and possibly administrative remedies available. If multiple remedies are applied to a person, that person has the right to challenge the application of those remedies as unconstitutional.

Section 400.457 Program Fraud Civil Remedies Act

Comment: One commenter stated that although the rule does not revise § 400.457(a), the proposed rule renders this section inaccurate. This section is not in accordance with the Program Fraud Civil Remedies Act of 1986, because the standards set forth in 400.454 differ from those set forth in 7 CFR 1.302 and 1.335.

Response: As stated above, FCIC has revised this rule to make it consistent with 7 CFR 1.302 and 1.335 to the maximum extent practicable. In any case, before sanctions can be imposed under both sections 515(h) of the Act and the Program Fraud Civil Remedies Act, all the requirements for the imposition of sanctions under each must be met.

Comment: Several commenters stated that the rule must be clear so that ordinary people can understand what conduct is prohibited and provides sufficient guidance to those who may be subject to the penalties. Several commenters expressed concern with the broad and ambiguous language of the rule. Unintentional errors can occur. Specific and defined consideration of the factors used to determine guilt or innocence is needed to be fair to alleged offenders. One commenter stated that FCIC must clear up any and all ambiguities under the proposed rule so all covered persons receive proper notice of their legal responsibilities. One commenter stated that the rule does not adequately define certain key terms that will provide adequate notice of prohibited conduct in the future. For example, the rule provides sanctions against persons who 'submit' or 'provide' false information related to the Federal crop insurance program. These terms do not provide adequate notice of prohibited conduct to agents or others who merely forward information or forms supplied or completed by others, but who submit the information and forms to insurance provider.

Response: In response to these and other comments, FCIC has added definitions and revised provisions to increase the clarity of the rule. Responses to these comments will also provide guidance. With respect to the terms ''submit'' and ''provide,'' the term submit is not used in the rule. The rule only refers to willfully and intentionally providing false or inaccurate information, consistent with section 515(h) of the Act, which uses the term ''provides.'' However, FCIC has revised the rule to add a definition of ''provides'' but without other specific examples, FCIC is unsure of what ambiguities the commenters are referring to.

List of Subjects in 7 CFR Parts 400, 407, and 457

Administrative practice and procedures; Administrative remedies for non-compliance.

Final Rule

■ Accordingly, as set forth in the preamble, the Federal Crop Insurance Corporation amends 7 CFR parts 400, 407 and 457, as follows:

PART 400—GENERAL ADMINISTRATIVE REGULATIONS

■ 1. The authority citation for 7 CFR 400, subpart R is revised to read as follows:

Authority: 7 U.S.C. 1506(l), 1506(o), and 7 U.S.C. 1515(h)

Subpart R—Administrative Remedies for Non-Compliance

■ 2. Revise the heading for subpart R to read as set forth above.

■ 3. Revise § 400.451 to read as follows:

§ 400.451 General.

(a) FCIC has implemented a system of administrative remedies in its efforts to ensure program compliance and prevent fraud, waste, and abuse within the Federal crop insurance program. Such remedies include civil fines and disqualifications under the authority of section 515(h) of the Act (7 U.S.C. 1515(h)); government-wide suspension and debarment under the authority of 48 CFR part 9, 48 CFR part 409, and 7 CFR part 3017; and civil fines and assessments under the authority of the Program Fraud Civil Remedies Act (31 U.S.C. 3801–3812).

(b) The provisions of this subpart apply to all participants in the Federal crop insurance program, including but not limited to producers, agents, loss adjusters, approved insurance providers and their employees or contractors, as well as any other persons who may provide information to a program participant and meet the elements for imposition of one or more administrative remedies contained in this subpart.

(c) Any remedial action taken pursuant to this subpart is in addition to any other actions specifically provided in applicable crop insurance policies, contracts, reinsurance agreements, or other applicable statutes and regulations.

(d) This rule is applicable to any violation occurring on and after January 20, 2009.

(e) The purpose of the remedial actions authorized in this subpart are for the protection of the public interest from potential harm from persons who have abused the Federal crop insurance program, maintaining program integrity, and fostering public confidence in the program.

■ 4. Revise § 400.452 to read as follows:

§ 400.452 Definitions.

For purposes of this subpart:

Act. Has the same meaning as the term in section 1 of the Common Crop Insurance Policy Basic Provisions (7 CFR 457.8).

Affiliate. Persons are affiliates of each other if, directly or indirectly, either one controls or has the power to control the other, or, a third person controls or has the power to control both. Indicia of control include, but are not limited to: interlocking management or ownership, identity of interests among family members, shared facilities and equipment, common use of employees, or a business entity organized following the disqualification, suspension or debarment of a person which has the same or similar management, ownership, or principal employees as the disqualified, suspended, debarred, ineligible, or voluntarily excluded person.

Agency. The person authorized by an approved insurance provider, or its designee, to sell and service a crop

insurance policy under the Federal crop insurance program.

Agent. Has the same meaning as the term in 7 CFR 400.701.

Agricultural commodity. Has the same meaning as the term in section 1 of the Common Crop Insurance Policy Basic Provisions (7 CFR 457.8).

Approved insurance provider. Has the same meaning as the term in 7 CFR 400.701.

Benefit. Any advantage, preference, privilege, or favorable consideration a person receives from another person in exchange for certain acts or considerations. A benefit may be monetary or non-monetary.

FCIC. Has the same meaning as the term in 7 CFR 400.701.

Key employee. Any person with primary management or supervisory responsibilities or who has the ability to direct activities or make decisions regarding the crop insurance program.

Knows or has reason to know. When a person, with respect to a claim or statement:

(1)(i) Has actual knowledge that the claim or statement is false, fictitious, or fraudulent;

(ii) Acts in deliberate ignorance of the truth or falsity of the claim or statement; or

(iii) Acts in reckless disregard of the truth or falsity of the claim or statement; and

(2) No proof of specific intent is required.

Managing General Agent. Has the same meaning as the term in 7 CFR 400.701.

Material. A violation that causes or has the potential to cause a monetary loss to the crop insurance program or it adversely affects program integrity, including but not limited to potential harm to the program's reputation or allowing persons to be eligible for benefits they would not otherwise be entitled.

Participant. Any person who obtains any benefit that is derived in whole or in part from funds paid by FCIC to the approved insurance provider or premium paid by the producer. Participants include but are not limited to producers, agents, loss adjusters, agencies, managing general agencies, approved insurance providers, and any person associated with the approved insurance provider through employment, contract, or agreement.

Person. An individual, partnership, association, corporation, estate, trust or other legal entity, any affiliate or principal thereof, and whenever applicable, a State or political subdivision or agency of a State. ''Person'' does not include the United States Government or any of its agencies.

Policy. Has the same meaning as the term in section 1 of the Common Crop Insurance Policy Basic Provisions (7 CFR 457.8).

Preponderance of the evidence. Proof by information that, when compared with the opposing evidence, leads to the conclusion that the fact at issue is probably more true than not.

Principal. A person who is an officer, director, owner, partner, key employee, or other person within an entity with primary management or supervisory responsibilities over the entity's federal crop insurance activities; or a person who has a critical influence on or substantive control over the federal crop insurance activities of the entity.

Producer. A person engaged in producing an agricultural commodity for a share of the insured crop, or the proceeds thereof.

Provides. Means to make available, supply or furnish with. The term includes any transmission of the information from one person to another person. For example, a producer writes information on forms and gives it to the agent and the agent transmits that information to the insurance provider. In both instances, the information is ''provided'' for the purpose of this rule.

Reinsurance agreement. Has the same meaning as the term in 7 CFR 400.161, except that such agreement is only between FCIC and the approved insurance provider.

Requirement of FCIC. Includes, but is not limited to, formal communications, such as a regulation, procedure, policy provision, reinsurance agreement, memorandum, bulletin, handbook, manual, finding, directive, or letter, signed or issued by a person authorized by FCIC to provide such communication on behalf of FCIC, that requires a particular participant or group of participants to take a specific action or to cease and desist from a taking a specific action (e-mails will not be considered formal communications although they may be used to transmit a formal communication). Formal communications that contain a remedy in such communication in the event of a violation of its terms and conditions will not be considered a requirement of FCIC unless such violation arises to the level where remedial action is appropriate. (For example, multiple violations of the same provision in separate policies or procedures or multiple violations of different provisions in the same policy or procedure.)

Violation. Each act or omission by a person that satisfies all required elements for the imposition of a disqualification or a civil fine contained in § 400.454.

Willful and intentional. To provide false or inaccurate information with the knowledge that the information is false or inaccurate at the time the information is provided; the failure to correct the false or inaccurate information when its nature becomes known to the person who made it; or to commit an act or omission with the knowledge that the act or omission is not in compliance with a ''requirement of FCIC'' at the time the act or omission occurred. No showing of malicious intent is necessary.

■ 5. Revise § 400.454 to read as follows:

§ 400.454 Disqualification and civil fines.

(a) Before any disqualification or civil fine is imposed, FCIC will provide the affected participants and other persons with notice and an opportunity for a hearing on the record in accordance with 7 CFR part 1, subpart H.

(1) Proceedings will be initiated when the Manager of FCIC files a complaint with the Hearing Clerk, United States Department of Agriculture.

(2) Disqualifications become effective:

(i) On the date specified in the order issued by the Administrative Law Judge or Judicial Officer, as applicable, or if no date is specified in the order, the date that the order was issued.

(ii) With respect to a settlement agreement with FCIC, the date contained in the settlement agreement or, if no date is specified, the date that such agreement is executed by FCIC.

(3) Disqualification and civil fines may only be imposed if a preponderance of the evidence shows that the participant or other person has met the standards contained in § 400.454(b). FCIC has the burden of proving that the standards in § 400.454(b) have been met.

(4) Disqualification and civil fines may be imposed regardless of whether FCIC or the approved insurance provider has suffered any monetary losses. However, if there is no monetary loss, disqualification will only be imposed if the violation is material in accordance with § 400.454(c).

(b) Disqualification and civil fines may be imposed on any participant or person who willfully and intentionally:

(1) Provides any false or inaccurate information to FCIC or to any approved insurance provider with respect to a policy or plan of insurance authorized under the Act either through action or omission to act when there is knowledge that false or inaccurate information is or will be provided; or

(2) Fails to comply with a requirement of FCIC.

(c) When imposing any disqualification or civil fine:

(1) The gravity of the violation must be considered when determining:

(i) Whether to disqualify a participant or other person;

(ii) The amount of time that a participant or other person should be disqualified;

(iii) Whether to impose a civil fine; and

(iv) The amount of a civil fine that should be imposed.

(2) The gravity of the violation includes consideration of whether the violation was material and if it was material:

(i) The number or frequency of incidents or duration of the violation;

(ii) Whether there is a pattern or prior history of violation;

(iii) Whether and to what extent the person planned, initiated, or carried out the violation;

(iv) Whether the person has accepted responsibility for the violation and recognizes the seriousness of the misconduct that led to the cause for disqualification or civil fine;

(v) Whether the person has paid all civil and administrative liabilities for the violation;

(vi) Whether the person has cooperated fully with FCIC (In determining the extent of cooperation, FCIC may consider when the cooperation began and whether the person disclosed all pertinent information known to that person at the time);

(vii) Whether the violation was pervasive within the organization;

(viii) The kind of positions held by the persons involved in the violation;

(ix) Whether the organization took prompt, appropriate corrective action or remedial measures, such as establishing ethics training and implementing programs to prevent recurrence;

(x) Whether the principals of the organization tolerated the offense;

(xi) Whether the person brought the violation to the attention of FCIC in a timely manner;

(xii) Whether the organization had effective standards of conduct and internal control systems in place at the time the violation occurred;

(xiii) Whether the organization has taken appropriate disciplinary action against the persons responsible for the violation;

(xiv) Whether the organization had adequate time to eliminate the violation that led to the cause for disqualification or civil fine;

(xv) Other factors that are appropriate to the circumstances of a particular case.

(3) The maximum term of disqualification and civil fines will be imposed against:

(i) Participants and other persons, except insurance providers who:

(A) Commit multiple violations in the same crop year or over several crop years; or

(B) Commit a single violation but such violation results in an overpayment of more than $100,000;

(ii) Approved insurance providers who:

(A) Commit a single violation resulting in an overpayment in excess of $100,000; and

(B) Commit multiple acts of violations resulting in an overpayment in excess of $500,000; and

(iii) Any participant or person who commits such other action or omission of so serious a nature that imposition of the maximum is appropriate.

(d) With respect to the imputing of conduct:

(1) The conduct of any officer, director, shareholder, partner, employee, or other individual associated with an organization, in violation of § 400.454(b) may be imputed to that organization when such conduct occurred in connection with the individual's performance of duties for or on behalf of that organization, or with the organization's knowledge, approval or acquiescence. The organization's acceptance of the benefits derived from the violation is evidence of knowledge, approval or acquiescence.

(2) The conduct of any organization in violation of § 400.454(b) may be imputed to an individual, or from one individual to another individual, if the individual to whom the improper conduct is imputed either participated in, knows, or had reason to know of such conduct.

(3) The conduct of one organization in violation of § 400.454(b) may be imputed to another organization when such conduct occurred in connection with a partnership, joint venture, joint application, association or similar arrangement, or when the organization to whom the improper conduct is imputed has the power to direct, manage, control or influence the activities of the organization responsible for the improper conduct. Acceptance of the benefits derived from the conduct is evidence of knowledge, approval or acquiescence.

(4) If such conduct is imputed, the person to whom the conduct is imputed to may be subject to the same disqualification and civil fines as the person from whom the conduct is imputed. The factors contained in § 400.454(c)(2) will be taken into consideration with respect to the person to whom the conduct is being imputed.

(e) With respect to disqualifications:

(1) If a person is disqualified and that person is a:

(i) Producer, the producer will be precluded from receiving any monetary or non-monetary benefit provided under all of the following authorities, or their successors:

(A) The Act;

(B) The Farm Security and Rural Investment Act of 2002 (7 U.S.C. 7333 *et seq.*) or any successor statute;

(C) The Agricultural Act of 1949 (7 U.S.C. 1421 *et seq.*) or any successor statute;

(D) The Commodity Credit Corporation Charter Act (15 U.S.C. 714 *et seq.*) or any successor statute;

(E) The Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 *et seq.*) or any successor statute;

(F) Title XII of the Food Security Act of 1985 (16 U.S.C. 3801 *et seq.*) or any successor statute;

(G) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921, *et seq.*) or any successor statute; and

(H) Any federal law that provides assistance to the producer of an agricultural commodity affected by a crop loss or decline in the prices of agricultural commodities.

(ii) Participant or other person, other than a producer, such participant or person will be precluded from participating in any way in the Federal crop insurance program and receiving any monetary or non-monetary benefit under the Act.

(2) With respect to the term of disqualification:

(i) The minimum term will be not less than one year from the effective date determined in § 400.454(a)(2);

(ii) The maximum term will be not more than five years from the effective date determined in § 400.454(a)(2); and

(iii) Disqualification is to be imposed only in one-year increments, up to the maximum five years.

(3) Once a disqualification becomes final, the name, address, and other identifying information of the participant or other person shall be entered into the Ineligible Tracking System (ITS) maintained by FCIC in accordance with 7 CFR part 400, subpart U, and this information along with a list of the programs that the person is disqualified from shall be promptly reported to the General Services Administration for listing in the Excluded Parties List System (EPLS) in accordance with 7 CFR part 3017, subpart E.

(i) It is a participant's responsibility to periodically review the ITS and EPLS to

determine those participants and other persons who have been disqualified.

(ii) No participant may conduct business with a disqualified participant or other person if such business directly relates to the Federal crop insurance program, or if, through the business relationship, the disqualified participant or other person will derive any monetary or non-monetary benefit from a program administered under the Act.

(iii) If a participant or other person does business with a disqualified participant or other person, such participant may be subject to disqualification under this section.

(iv) Continuing to make payments to a disqualified person to fulfill pre-existing contractual or statutory obligations after the business relationship is terminated will not be considered as doing business with a disqualified person unless such payment is used as a means to circumvent the disqualification process.

(f) With respect to civil fines:

(1) A civil fine may be imposed for each violation.

(2) The amount of such civil fine shall not exceed the greater of:

(i) The amount of monetary gain, or value of the benefit, obtained as a result of the false or inaccurate information provided, or the amount obtained as a result of noncompliance with a requirement of FCIC; or

(ii) $10,000.

(3) Civil fines are debts owed to FCIC.

(i) A civil fine that is either imposed under with this subpart, or agreed to through an executed settlement agreement with FCIC, must be paid by the specified due date. If the due date is not specified in the order issued by the Administrative Law Judge or Judicial Officer, as applicable, or the settlement agreement, it shall be 30 days after the date the order was issued or the settlement agreement signed by FCIC.

(ii) Any civil fine imposed under this section is in addition to any debt that may be owed to FCIC or to any approved insurance provider, such an overpaid indemnity, underpaid premium, or other amounts owed.

(iii) FCIC, in its sole discretion, may reduce or otherwise settle any civil fine imposed under this section whenever it considers it appropriate or in the best interest of the USDA.

(4) The ineligibility procedures established in 7 CFR part 400, subpart U are not applicable to ineligibility determinations made under this section for nonpayment of civil fines.

(5) If a civil fine has been imposed and the person has not made timely payment for the total amount due, the person is ineligible to participate in the Federal crop insurance program until the amount due is paid in full.

(g) With respect to any person that has been disqualified or is otherwise ineligible due to non-payment of civil fines in accordance with § 400.454(f):

(1) With respect to producers:

(i) All existing insurance policies will automatically terminate as of the next termination date that occurs during the period of disqualification and while the civil fine remains unpaid;

(ii) No new policies can be purchased, and no current policies can be renewed, between the date that the producer is disqualified and the date that the disqualification ends; and

(iii) New application for insurance cannot be made for any agricultural commodity until the next sales closing date after the period of disqualification has ended and the civil fine is paid in full.

(2) With respect to all other persons:

(i) Such person may not be involved in any function related to the Federal crop insurance program during the disqualification or ineligibility period (including the sale, service, adjustment, data transmission or storage, reinsurance, etc. of any crop insurance policy) or receive any monetary or non-monetary benefit from a program administered under the Act.

(ii) If the person is an agent or insurance agency, the producers may cancel their policies sold and serviced by the disqualified agent and rewrite the policy with another agent. If the producer does not cancel and rewrite the policy with another agent, the approved insurance provider must assign the policies to a different agent or agency to service during the period of disqualification or ineligibility. Policies that have been assigned to another agent or agency by the insurance provider will revert back to the disqualified agent or agency after the period of disqualification has ended provided all civil fines are paid in full and the producer does not cancel and rewrite the policy with a different agent or agency;

(iii) If the person is an approved insurance provider, the approved insurance provider shall not sell, or authorize to be sold, any new policies or may not renew, or authorize the renewal of, existing policies, as determined by FCIC, during the period of disqualification or ineligibility. Nothing in this provision affects the approved insurance provider's responsibilities with respect to the service of existing policies.

(h) Imposition of disqualification or a civil fine under this section is in addition to any other administrative or legal remedies available under this section or other applicable law including, but not limited to, debarment and suspension.

■ 6. Revise § 400.455 to read as follows:

§ 400.455 Governmentwide debarment and suspension (procurement).

(a) For all transactions undertaken pursuant to the Federal Acquisition Regulations, FCIC will proceed under 48 CFR part 9, subpart 9.4 or 48 CFR part 409 when taking action to suspend or debar persons involved in such transactions, except that the authority to suspend or debar under these provisions will be reserved to the Manager of FCIC, or the Manager's designee.

(b) Any person suspended or debarred under the provisions of 48 CFR part 9, subpart 9.4 or 48 CFR part 409 will not be eligible to contract with FCIC or the Risk Management Agency and will not be eligible to participate in or receive any benefit from any program under the Act during the period of ineligibility. This includes, but is not limited to, being employed by or contracting with any approved insurance provider that sells, services, or adjusts policies offered under the authority of the Act. FCIC may waive this provision if it is satisfied that the person who employs the suspended or debarred person has taken sufficient action to ensure that the suspended or debarred person will not be involved, in any way, with FCIC or receive any benefit from any program under the Act.

■ 7. Revise § 400.456 to read as follows:

§ 400.456 Governmentwide debarment and suspension (nonprocurement).

(a) FCIC will proceed under 7 CFR part 3017 when taking action to suspend or debar persons involved in non-procurement transactions.

(b) Any person suspended or debarred under the provisions of 7 CFR part 3017, will not be eligible to contract with FCIC or the Risk Management Agency and will not be eligible to participate in or receive any benefit from any program under the Act during the period of ineligibility. This includes, but is not limited to, being employed by or contracting with any approved insurance provider, or its contractors, that sell, service, or adjust policies either insured or reinsured by FCIC. FCIC may waive this provision if it is satisfied that the approved insurance provider or contractors have taken sufficient action to ensure that the suspended or debarred person will not be involved in any way with the Federal crop insurance program or receive any benefit from any program under the Act.

(c) The Manager, FCIC, shall be the debarring and suspending official for all debarment or suspension proceedings undertaken by FCIC under the provisions of 7 CFR part 3017.

■ 8. Amend § 400.457 by adding a new paragraph (d) to read as follows:

§ 400.457 Program Fraud Civil Remedies Act.

* * * * *

(d) Civil penalties and assessments imposed pursuant to this section are in addition to any other remedies that may be prescribed by law or imposed under this subpart.

§ 400.458 [Amended]

■ 9. Amend § 400.458 by removing paragraph (b)(2), adding an ''or'' at the end of paragraph (b)(1) and redesignating paragraph (b)(3) as paragraph (b)(2).

§ 400.459 [Removed]

■ 10. Remove § 400.459.

PART 407—GROUP RISK PLAN OF INSURANCE REGULATIONS

■ 11. The authority citation for 7 CFR part 407 continues to read as follows:

Authority: 7 U.S.C. 1506(l), 1506(o).

■ 12. Amend § 407.9, Group Risk Plan Common Policy, by adding a new section 22 at the end to read as follows:

§ 407.9 Group risk plan common policy.

* * * * *

22. Remedial Sanctions

If you willfully and intentionally provide false or inaccurate information to us or FCIC or you fail to comply with a requirement of FCIC, in accordance with 7 CFR part 400, subpart R, FCIC may impose on you:

(a) A civil fine for each violation in an amount not to exceed the greater of:

(1) The amount of the pecuniary gain obtained as a result of the false or inaccurate information provided or the noncompliance with a requirement of this title; or

(2) $10,000; and

(b) A disqualification for a period of up to 5 years from receiving any monetary or non-monetary benefit provided under each of the following:

(1) Any crop insurance policy offered under the Act;

(2) The Farm Security and Rural Investment Act of 2002 (7 U.S.C. 7333 *et seq.*);

(3) The Agricultural Act of 1949 (7 U.S.C. 1421 *et seq.*);

(4) The Commodity Credit Corporation Charter Act (15 U.S.C. 714 *et seq.*);

(5) The Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 *et seq.*);

(6) Title XII of the Food Security Act of 1985 (16 U.S.C. 3801 *et seq.*);

(7) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 *et seq.*); and

(8) Any federal law that provides assistance to a producer of an agricultural commodity affected by a crop loss or a decline in the prices of agricultural commodities.

PART 457—COMMON CROP INSURANCE REGULATIONS

■ 13. The authority citation for 7 CFR part 457 is revised to read as follows:

Authority: 7 U.S.C. 1506(l), 1506(o).

■ 14. Amend § 457.8, Common Crop Insurance Policy Basic Provisions, by adding a new paragraph (e) at the end of section 27 to read as follows:

§ 457.8 The application and policy.

* * * * *

27. Concealment, Misrepresentation or Fraud.

* * * * *

(e) If you willfully and intentionally provide false or inaccurate information to us or FCIC or you fail to comply with a requirement of FCIC, in accordance with 7 CFR part 400, subpart R, FCIC may impose on you:

(1) A civil fine for each violation in an amount not to exceed the greater of:

(i) The amount of the pecuniary gain obtained as a result of the false or inaccurate information provided or the noncompliance with a requirement of this title; or

(ii) $10,000; and

(2) A disqualification for a period of up to 5 years from receiving any monetary or non-monetary benefit provided under each of the following:

(i) Any crop insurance policy offered under the Act;

(ii) The Farm Security and Rural Investment Act of 2002 (7 U.S.C. 7333 *et seq.*);

(iii) The Agricultural Act of 1949 (7 U.S.C. 1421 *et seq.*);

(iv) The Commodity Credit Corporation Charter Act (15 U.S.C. 714 *et seq.*);

(v) The Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 *et seq.*);

(vi) Title XII of the Food Security Act of 1985 (16 U.S.C. 3801 *et seq.*);

(vii) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 *et seq.*); and

(viii) Any federal law that provides assistance to a producer of an agricultural commodity affected by a crop loss or a decline in the prices of agricultural commodities.

* * * * *

Signed in Washington, DC on December 12, 2008.

Eldon Gould,

Manager, Federal Crop Insurance Corporation.

[FR Doc. E8–30073 Filed 12–17–08; 8:45 am]

BILLING CODE 3410–08–P

DEPARTMENT OF HOMELAND SECURITY

8 CFR Parts 214, 215 and 274a

[Docket No. USCIS–2007–0055; CIS No. 2428–07]

RIN 1615–AB65

Changes to Requirements Affecting H–2A Nonimmigrants

AGENCY: U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, DHS.

ACTION: Final rule.

SUMMARY: This final rule amends Department of Homeland Security regulations regarding temporary and seasonal agricultural workers, and their U.S. employers, within the H–2A nonimmigrant classification. The final rule removes certain limitations on H–2A employers and adopts streamlining measures in order to encourage and facilitate the lawful employment of foreign temporary and seasonal agricultural workers. The final rule also addresses concerns regarding the integrity of the H–2A program and sets forth several conditions to prevent fraud and to protect laborers' rights. The purpose of the final rule is to provide agricultural employers with an orderly and timely flow of legal workers, thereby decreasing their reliance on unauthorized workers, while protecting the rights of laborers.

The rule revises the current limitations on agricultural workers' length of stay including lengthening the amount of time an agricultural worker may remain in the United States after his or her employment has ended and shortening the time period that an agricultural worker whose H–2A nonimmigrant status has expired must wait before he or she is eligible to obtain H–2A nonimmigrant status again. This rule also provides for temporary employment authorization to agricultural workers seeking an extension of their H–2A nonimmigrant status through a different U.S. employer, provided that the employer is a registered user in good standing with the E-Verify employment eligibility verification program. In addition, DHS modifies the current notification and

payment requirements for employers when an alien fails to show up at the start of the employment period, an H–2A employee's employment is terminated, or an H–2A employee absconds from the worksite. To better ensure the integrity of the H–2A program, this rule also requires certain employer attestations and precludes the imposition of fees by employers or recruiters on prospective beneficiaries. Under this final rule, DHS also will revoke an H–2A petition if the Department of Labor revokes the petitioner's underlying labor certification. Also, this rule provides that DHS will publish in a notice in the **Federal Register** a list of countries that the Secretary of Homeland Security has designated, with the concurrence of the Secretary of State, as eligible for its nationals to participate in the H–2A program. These changes are necessary to encourage and facilitate the lawful employment of foreign temporary and seasonal agricultural workers.

Finally, this rule establishes criteria for a pilot program under which aliens admitted on certain temporary worker visas at a port of entry participating in the program must also depart through a port of entry participating in the program and present designated biographical information upon departure. U.S. Customs and Border Protection (CBP) will publish a Notice in the **Federal Register** designating which temporary workers must participate in the program, which ports of entry are participating in the program, and the types of information that CBP will collect from the departing workers.

DATES: This rule is effective January 17, 2009.

SUPPLEMENTARY INFORMATION: This supplementary information section is organized as follows:

Table of Contents

I. Background

A. Proposed Rule

The H–2A nonimmigrant classification applies to aliens seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States. Immigration and Nationality Act (Act or INA) section 101(a)(15)(H)(ii)(a), 8 U.S.C. 1101(a)(15)(H)(ii)(a); *see* 8 CFR 214.1(a)(2) (designation for H–2A classification). Despite the availability of the H–2A nonimmigrant classification, a high percentage of the agricultural workforce is comprised of aliens who have no immigration status and are unauthorized to work. In response to members of the public citing what they consider to be unnecessarily burdensome regulatory restrictions placed on the H–2A nonimmigrant classification and resulting limits on the utility of this nonimmigrant category to U.S. agricultural employers, the Department of Homeland Security (DHS) published a notice of proposed rulemaking on February 13, 2008, proposing to amend its regulations regarding the H–2A nonimmigrant classification. 73 FR 8230. On the same date, the Department of Labor (DOL) published a notice of proposed rulemaking to amend its regulations regarding the certification of H–2A employment and the enforcement of the contractual obligations applicable to H–2A employers. 73 FR 8538.

DHS, among other changes, proposed to:

- Relax the limitations on naming beneficiaries on the H–2A petition who are outside of the United States.
- Permit H–2A employers to file only one petition when petitioning for multiple H–2A beneficiaries from multiple countries.
- Deny or revoke any H–2A petition if the alien-beneficiary paid or agreed to pay any prohibited fee or other form of compensation to the petitioner, or, with the petitioner's knowledge, to a facilitator, recruiter, or similar employment service, in connection with the H–2A employment.
- Require H–2A petitioners: (a) To attest that they will not materially change the information provided on the Form I–129 and the temporary labor certification; (b) to attest that they have not received and do not intend to receive, any fee, compensation, or other form of remuneration from prospective H–2A workers; and (c) to identify any facilitator, recruiter, or similar employment service that they used to locate foreign workers.
- Require H–2A petitioners to provide written notification to DHS, or be subject to an imposition of $500 in liquidated damages, within forty-eight hours if: (a) An H–2A worker fails to report to work within five days of the date of the employment start date; (b) the employment terminates more than five days early; or (c) the H–2A worker has not reported for work for a period of five days without the consent of the employer.
- Clarify that DHS will not accord H–2A status to any alien who has violated any condition of H–2A nonimmigrant status within the previous five years.
- Immediately and automatically revoke an H–2A petition upon the revocation of the underlying labor certification by DOL.
- Refuse to approve H–2A petitions filed on behalf of beneficiaries from or to grant admission to aliens from countries determined by DHS to consistently deny or unreasonably delay the prompt return of their citizens, subjects, nationals, or residents who are subject to a final order of removal.
- Extend the H–2A admission period following the expiration of the H–2A petition from not more than 10 days to 30 days.
- Reduce from 3 months to 45 days the minimum period spent outside the United States that would interrupt the accrual of time toward the 3-year maximum period of stay where the accumulated stay is 18 months or less, and to reduce such minimum period from 1/6 of the period of accumulated stay to 2 months if the accumulated stay is longer than 18 months.
- Reduce from 6 months to 3 months the period that an individual who has held H–2A status for a total of 3 years must remain outside of the United States before he or she may be granted H–2A nonimmigrant status again.
- Extend H–2A workers' employment authorization for up to 120 days while they are awaiting an extension of H–2A status based on a petition filed by a new employer, provided that the new employer is a registered user in good standing in DHS's E-Verify program.
- Impose on sheepherders the departure requirement applicable to all H–2A workers.
- Establish a temporary worker exit program on a pilot basis that would require certain H–2A workers to register at the time of departure from the United States.

DHS initially provided a 45-day comment period in the proposed rule, which ended on March 31, 2008. DHS provided an additional 15-day comment

period from April 1, 2008 through April 14, 2008. During this 60-day comment period, DHS received 163 comments. DHS received comments from a broad spectrum of individuals and organizations, including various agricultural producers, agricultural trade associations, farm workers' labor unions, civil and human rights advocacy organizations, agricultural producers' financial cooperatives, farm management services companies, voluntary public policy organizations, private attorneys, state government agencies, a Member of Congress, and other interested organizations and individuals. During the public comment period, DHS officials, together with those from DOL, also met with stakeholders to discuss the proposed rule. Meeting participants were encouraged to submit written comments on the rule.

DHS considered the comments received and all other materials contained in the docket in preparing this final rule. The final rule does not address comments seeking changes in United States statutes, changes in regulations or petitions outside the scope of the proposed rule, or changes to the procedures of other DHS components or agencies.

All comments and other docket materials may be viewed at the Federal Docket Management System (FDMS) at *http://www.regulations.gov,* docket number USCIS–2007–0055.

B. Discussion of the Final Rule

The final rule adopts many of the regulatory amendments set forth in the proposed rule. The rationale for the proposed rule and the reasoning provided in the preamble to the proposed rule remain valid with respect to these regulatory amendments, and DHS adopts such reasoning in support of the promulgation of this final rule. Based on the public comments received in response to the proposed rule, however, DHS has modified some of the proposed changes for the final rule as follows.

1. Notification and Liquidated Damages Requirements

The final rule requires petitioners to notify DHS, within two workdays, beginning on a date and in a manner specified in a notice published in the **Federal Register**, of the following circumstances: (a) An H–2A worker's failure to report to work within five workdays of the employment start date on the H–2A petition or within five workdays of the start date established by his or her employer, whichever is later; (b) an H–2A worker's completion of agricultural labor or services 30 days or more before the date specified by the petitioner in its H–2A petition; or (c) an H–2A worker's absconding from the worksite or termination prior to the completion of the agricultural labor or services for which he or she was hired. New 8 CFR 214.2(h)(5)(vi)(B)(*1*). By ''workday,'' DHS means the period between the time on any particular day when such employee commences his or her principal activity and the time on that day at which he or she ceases such principal activity or activities.

a. Liquidated Damages

DHS has revisited the proposed increase in liquidated damages from $10 to $500 for an employer's failure to comply with the notification requirement. For the time being, DHS will retain the liquidated damages provision under 8 CFR 214.2(h)(5)(vi)(B)(*3*), and require an employer who fails to comply with the notification requirements, as revised under this final rule, to pay liquidated damages in the amount of $10.

b. Timeframes Triggering Notification Requirement

To minimize the impacts on petitioners, the final rule relaxes the notification requirement in response to commenters' concerns that the proposed timeframes were not workable within current business realities. The final rule allows an employer, in certain circumstances, to use a start date newly established by the employer as the notification trigger date. The final rule also clarifies that the H–2A worker must report to work within five ''workdays'' of the employment start date, rather than the proposed five days. If the H–2A worker does not timely report to the worksite, the H–2A employer must report this violation to DHS within two workdays, rather than the proposed 48 hours. The final rule adopts the term ''workdays'' to ensure that H–2A employers are clear on the reporting deadlines. The final rule also requires DHS notification where the work is completed 30 days early rather than the proposed five days. The rule relieves the employer of its obligation to notify DHS when the worker's employment terminates upon completion of the work (unless the work is completed more than 30 days early). The final rule also provides that, if the petitioner demonstrates in the notification itself that good cause exists for an untimely notification to DHS, then DHS, in its discretion, may waive the liquidated damages amount.

c. Remedy for Petitioners

While the notification provision furthers DHS's enforcement goals of locating aliens who have not met the terms of their nonimmigrant status, DHS recognizes that the current regulations do not provide a sufficient remedy to petitioners that ''lose'' H–2A workers before the completion of work in the instances covered in the notification provision. Under the current regulations, petitioners may replace H–2A workers whose employment was terminated before the work has been completed. 8 CFR 214.2(h)(5)(ix). Such petitioners must file a new H–2A petition using a copy of the previously approved temporary labor certification to request replacement workers. However, the current regulations do not cover situations where H–2A workers fail to show up at the worksite or abscond.

To minimize the adverse impact on petitioners who lose workers for these reasons, DHS has determined that petitioners should be permitted to seek substitute H–2A workers in these instances, as well, provided that petitioners comply with the notification requirements in 8 CFR 214.2(h)(5)(vi). Thus, the final rule allows a petitioner to file an H–2A petition using a copy of the previously-approved temporary labor certification to replace an H–2A worker where: (a) An H–2A worker's employment was terminated early (i.e., before the completion of work); (b) a prospective H–2A worker fails to report to work within five workdays of the employment start date on the previous H–2A petition or within five workdays of the date established by his or her employer, whichever is later; or (c) an H–2A worker absconds from the worksite. New 8 CFR 214.2(h)(5)(ix). These three instances parallel the instances that trigger the notification requirement in new 8 CFR 214.2(h)(5)(vi)(B)(1) (except where the work for which the petitioner needed H–2A workers has been completed).

d. Retention of Evidence of a Change in Employment Start Date

The final rule also adds to the provision requiring the petitioner to retain evidence of its notification to DHS a requirement that the petitioner also retain evidence of a different employment start date for one year if the start date has changed from that stated on the H–2A petition. New 8 CFR 214.2(h)(5)(vi)(B)(*2*). Since the notification provision allows for the petitioner to use a new start date that the petitioner has established rather than the start date stated in the H–2A

petition, DHS believes that it must require the employer to retain evidence of the change in the start date to protect against misrepresentations by the petitioner regarding the employment start date.

e. Response Period Upon Receipt of a Notice of Noncompliance With the Notification Requirement

The final rule extends from 10 days to 30 days the time period within which a petitioner must reply to a DHS notice of noncompliance with the notification requirement. New 8 CFR 214.2(h)(5)(vi)(C). Based upon comments received, DHS recognizes that small businesses may have difficulty in responding to a DHS notice within 10 days. Many do not have a human resources department to handle administrative tasks and may find it difficult to respond to a notice within 10 days, especially if the notice arrives during the petitioner's busiest season. DHS believes that a 30-day time period for responding to a notice is reasonable.

2. Payment of Fees by Aliens To Obtain H–2A Employment

To address some commenters' concerns about the proposed provisions addressing job placement-related fees paid by beneficiaries to obtain H–2A employment, the final rule makes several clarifications and changes.

First, the final rule specifies that the fees prohibited by the rule do not include the lower of the fair market value or the actual costs of transportation to the United States and any payment of government-specified fees required of persons seeking to travel to the United States (*e.g.*, fees required by a foreign government for issuance of passports, fees imposed by the U.S. Department of State for issuance of visas, inspection fees), except where the passing of such costs to the worker is prohibited by statute or the Department of Labor's regulations. See 20 CFR 655.104(h). Prospective H–2A workers may be required to pay such costs, unless the prospective employer has agreed with the alien to pay such fees and/or transportation costs. New 8 CFR 214.2(h)(5)(xi)(A). DHS determined that payment of these costs by the H–2A worker should not be prohibited since they are personal costs related to the alien's travel to the United States, rather than fees charged by a recruiter or employer for finding employment.

Second, to clarify the standard for the petitioner's knowledge of fees being paid by the alien, the final rule modifies the standard to include both knowledge by the petitioner and circumstances in which the petitioner should reasonably know that that worker has paid or has entered an agreement to pay the prohibited fees.

Third, the final rule offers petitioners a means by which to avoid denial or revocation (following notice to the petitioner) of the H–2A petition in cases where USCIS determines that the petitioner knows or reasonably should know that the worker has agreed to pay the prohibited fees as a condition of obtaining H–2A employment. In cases where prohibited fees were collected prior to petition filing, and in cases where prohibited fees were collected by the labor recruiter or agent after petition filing, USCIS will not deny or revoke the petition if the petitioner demonstrates that the beneficiary has been reimbursed in full for fees paid or, if the fees have not yet been paid, that the agreement to pay such fees has been terminated. Additionally, as an alternative to reimbursement in the case where the prohibition is violated by the recruiter or agent after the filing of the petition, the petitioner may avoid denial or revocation of the petition by notifying DHS of the improper payments, or agreement to make such payments, within two workdays of finding out about such payments or agreements. If the H–2A petition is denied or revoked on these grounds, then, as a condition of approval of future H–2A petitions filed within one year of the denial or revocation, the petitioner must demonstrate that the beneficiary has been reimbursed or that the beneficiary cannot be located despite the petitioner's reasonable efforts. New 8 CFR 214.2(h)(5)(xi)(C).

Fourth, the final rule does not include the requirement that the petitioner submit a separate document attesting to: The scope of the H–2A employment and the use of recruiters to locate H–2A workers, and the absence of any payment of prohibited recruitment fees by the beneficiary. Although petitioners will be required to attest to these factors, DHS is instead amending the Form I–129 to include those attestation provisions rather than requiring petitioners to submit a separate attestation document. DHS has determined that a separate attestation would increase petitioners' administrative burdens as well as duplicate much of the same information that petitioner must provide on the H–2A petition to establish eligibility.

3. Revocation of Labor Certification

The final rule addresses the effect of the revocation of temporary labor certifications by DOL on H–2A petitioners and their beneficiaries. This rule provides for the immediate and automatic revocation of the H–2A petition if the underlying temporary labor certification is revoked by DOL. New 8 CFR 214.2(h)(5)(xii). DHS believes that immediate and automatic revocation of the petition is a necessary consequence of a revocation of the temporary labor certification. The temporary labor certification is the basis for the petition, and DHS does not have the expertise to second-guess DOL's decision to revoke the temporary labor certification.

Because the denial or revocation of a petition based on the revocation of temporary labor certification will have a direct effect on an H–2A worker's status, DHS will authorize the alien beneficiary's period of stay for an additional 30-day period for the purpose of departure or extension of stay based upon a new offer of employment. *Id.* During this 30-day period, such alien will not be deemed to be unlawfully present in the United States. *Id.; see also* INA section 212(a)(9)(B), 8 U.S.C. 1182(a)(9)(B) (description of unlawful presence). Although DHS also proposed to require a petitioner to pay for the alien's reasonable transportation costs of return to his or her last place of foreign residence abroad after DHS revokes a petition for improper payment of fees, DHS has removed that requirement from this final rule.

4. Violations of H–2A Status

The final rule clarifies that DHS will deny H–2A nonimmigrant status based on a finding that the alien violated any condition of H–2A status within the past 5 years, unless the violation occurred through no fault of the alien. DHS has added this clarification to ensure that this provision will not adversely affect the aliens whose previous violations of status were caused by illegal or inappropriate conduct by their employers. New 8 CFR 214.2(h)(5)(viii)(A).

5. Permitting H–2A Petitions for Nationals of Participating Countries

The final rule modifies the proposal that would have precluded DHS from approving an H–2A petition filed on behalf of aliens from countries that consistently deny or unreasonable delay the prompt return of their citizens, subjects, nationals or residents who are subject to a final order of removal from the United States. DHS will now publish in a notice in the **Federal Register** a list of countries that the Secretary of Homeland Security has designated, with the concurrence of the Secretary of State, as eligible for its nationals to participate in the H–2A program. In designating countries to

allow the participation of their nationals in the H–2A program, DHS, with the concurrence of the Department of State, will take into account factors including, but not limited to, the following: (1) The country's cooperation with respect to the issuance of travel documents for citizens, subjects, nationals and residents of that country who are subject to a final order of removal; (2) the number of final and unexecuted orders of removal against citizens, subjects, nationals, and residents of that country; (3) the number of orders of removal executed against citizens, subjects, nationals, and residents of that country; and (4) such other factors as may serve the U.S. interest. Initially, the list will be composed of countries that are important for the operation of the H–2A program and are cooperative in the repatriation of their nationals. The countries included on the list are the countries whose nationals contributed the vast majority of the total beneficiaries of the H–2A program during the last three fiscal years. Additional details on how this list will be administered are included in the discussion in response to comments received on this proposed provision below.

6. Conforming Amendments and Non-Substantive Changes

The final rule makes conforming amendments to 8 CFR 214.2(h)(2)(B) and (C) by providing that the form instructions will contain information regarding appropriate filing locations for the H–1B, H–2A, H–2B, and H–3 classifications. The final rule also makes conforming amendments to 8 CFR 214.2(h)(5)(v)(B) and 8 CFR 214.2(h)(5)(v)(C) to clarify job qualification documentation requirements and the timing for such documents to be filed for named and unnamed beneficiaries. Finally, the final rule includes non-substantive structure or wording changes from the proposed rule for purposes of clarity and readability.

II. Public Comments on the Proposed Rule

A. Summary of Comments

Out of the 163 comments USCIS received on the proposed rule, several comments supported the proposals in the rule as a whole and welcomed DHS's recognition of the need for H–2A workers and for modifications to the current H–2A regulations. Agricultural employers submitted 115 of the total comments received.

Most commenters generally supported the streamlining measures in the proposed rule, such as: Removing the requirement to name the sole beneficiary and beneficiaries who are outside of the United States if the beneficiaries are named in the labor certification; permitting an employer to file only one petition for multiple beneficiaries from multiple countries; extending the admission period to 30 days after the conclusion of the H–2A employment; and reducing the required time abroad once an H–2A worker has reached the maximum period of stay before being able to seek H–2A nonimmigrant status again. However, many commenters were opposed to several changes that they believe will impose additional burdens and costs on farm businesses. They suggested that some of the proposed changes could lead to a decrease in usage of the H–2A program, such as the following proposals: Precluding the current practice of approving H–2A petitions that are filed with denied temporary labor certifications; authorizing USCIS to deny or revoke upon notice any H–2A petition if it determines that the beneficiary paid a fee in connection with or as a condition of obtaining the H–2A employment; modifying the current notification and liquidated damages requirements; providing for the immediate and automatic revocation of the petition upon the revocation of the labor certification; and imposing on sheepherders the same departure requirement applicable to all H–2A workers. Many commenters also were concerned about the proposals to authorize employment of H–2A workers while they are changing employers (if the new employer is a participant in good standing in E-Verify) and to institute a land-border exit system for certain H–2A workers on a pilot basis.

The concerns of the commenters summarized above and additional, more specific comments are organized by subject area and addressed below.

B. General Comments

1. Comments From the Dairy Industry

Comment: Several commenters expressed disappointment about what was described as the continued exclusion of the dairy industry from the H–2A program.

Response: DHS notes that most dairy farmer's needs are year-round and, therefore, may not be able to meet the requirements of the H–2A program. Dairy farmers that can demonstrate a temporary need for H–2A workers, however, are able to utilize the program. The applicable statute precludes DHS from extending the program to work that is considered permanent. *See* INA section 101(a)(15)(H)(ii)(a), 8 U.S.C. 1101(a)(15)(H)(ii)(a).

2. U.S. and Foreign Worker Protections

Comment: DHS received some comments that urged the withdrawal of the proposed rule entirely on the basis that the rule fails to reflect the critical balance between the nonimmigrant labor force and the U.S. workforce and undermines critical labor protections that serve as the foundation of the H–2A program. Some commenters also opined that the proposed rule would result in the exploitation of temporary foreign workers and the undermining of wages and working conditions of U.S. workers.

Response: DHS is aware of its responsibility to help maintain the careful balance between preserving jobs for U.S. workers and administering nonimmigrant programs designed to invite foreign workers to the United States. The final rule contains two major revisions to the regulations designed to protect U.S. workers: (1) Removal of DHS's authority to approve H–2A petitions filed with temporary labor certifications that have been denied by DOL (revised 8 CFR 214.2(h)(5)(i)(A)); and (2) the addition of a provision to provide for the immediate and automatic revocation of an H–2A petition upon the revocation of the temporary labor certification by DOL (new 8 CFR 214.2(h)(5)(xii)). DHS believes that a temporary labor certification process is required to protect U.S. workers.

In order to protect foreign workers from exploitation, the final rule requires petitioners to return any recruiter or finders' fees paid by alien beneficiaries as a condition of the H–2A employment if paid with the knowledge of the petitioner (or if the petitioner reasonably should have known about the payment). *See* new 8 CFR 214.2(h)(5)(xi)(A). Failure to return the prohibited fees to the beneficiaries will result in the denial or revocation of the H–2A petition.

3. Lack of Enforcement Against the Employment of Unauthorized Aliens

Comment: A few commenters criticized the lack of a sound method for strong enforcement against employers that obtain and maintain a workforce of unauthorized aliens while the rule proposed to impose stiffer fines, revocations, and increase in costs to those employers who are trying to obtain and maintain a legal workforce through the H–2A program.

Response: U.S. Immigration and Customs Enforcement (ICE) is charged with enforcing the laws against the

employment of unauthorized aliens, including the applicable provisions at section 274A of the INA, 8 U.S.C. 1324a. Enforcement of these provisions is outside the scope of this rulemaking. The purpose of this rule is to strengthen the integrity of the H–2A program so that employers will be encouraged to obtain workers through the H–2A program rather than through unlawful means. The added authority to deny or revoke petitions, and any increase in costs to employers included in this rule reflect necessary anti-fraud and worker protection measures. Employers that follow the rules of the program will not be unreasonably affected by these measures.

C. Specific Comments

1. Consideration of Denied Temporary Agricultural Labor Certifications

Comment: Seventeen out of 24 commenters who discussed this issue objected to the removal of regulatory language permitting, in limited circumstances, the approval of H–2A petitions filed with temporary labor certifications that have been denied by DOL.

Response: After considering the commenters' objections, DHS nevertheless retains this proposal in this final rule as discussed in the comments and responses below. *See* new 8 CFR 214.2(h)(5)(i)(A).

Comment: Some commenters among those who objected to this proposal suggested that the INA vests the authority for making decisions on the H–2A workers' admission solely with DHS, not DOL.

Response: DHS's statutory authority is to determine whether or not to approve a petition for H–2A workers after consultation with DOL. INA section 214(c)(1), 8 U.S.C. 1184(c)(1). By no longer permitting the approval of H–2A petitions in instances where DOL has denied the temporary labor certification, DHS does not believe that it is abrogating its statutory responsibility in adjudicating H–2A petitions. Rather, DHS is recognizing that it does not have the expertise in evaluating the current U.S. labor market to make a determination independent from DOL's determination on the temporary labor certification. It is therefore in the best interests of U.S. workers and the public in general that DHS relinquish its ability to approve H–2A petitions in the absence of the grant of such labor certification by DOL.

Comment: A few commenters pointed out that the language of the INA requires an employer only to apply for, not obtain, a temporary labor certification from the Secretary of Labor. *See* INA section 218(a)(1), 8 U.S.C. 1188(a)(1).

Response: DHS disagrees with the commenters' interpretation of the statute. While the statutory language only refers to a petitioner's application for a temporary labor certification, DHS believes that its interpretation of this language requiring petitioners also to obtain a temporary labor certification as a condition of H–2A employment is reasonable. A temporary labor certification certifies that there are insufficient U.S. workers who are able, willing, and qualified, and who will be available at the time and place needed, to perform the labor or services involved in the petition, and that the employment of the alien in such labor or services will not adversely affect the wages and working conditions of U.S. workers who are similarly employed. INA section 218(a)(1), 8 U.S.C. 1188(a)(1). The statute includes the temporary labor certification requirement as a means to protect U.S. workers from losing jobs to foreign laborers. INA section 218(c)(3)(A), 8 U.S.C. 1188(c)(3)(A). Without requiring that the temporary labor certification actually be obtained by the petitioner, the temporary labor certification requirement would fail to offer such protection. Moreover, it is clear that the determinations as to the availability of U.S. workers and the effect on their wages and working conditions are within the expertise of DOL, not DHS. Without certification by the Secretary of Labor, DHS would not be well equipped to make a determination on the petition for an employer to import foreign workers. Additionally, section 214(a)(1) of the INA grants the Secretary of Homeland Security authority to establish by regulation the conditions for nonimmigrant admissions. 8 U.S.C. 1184(a)(1). This rule is establishing a requirement that employers obtain a temporary labor certification as a condition for an alien to be admitted as an H–2A nonimmigrant.

Comment: Many commenters who objected to this proposal suggested that this proposal and the lack of an expeditious process to make a new determination on the denied temporary labor certification will leave employers without recourse if U.S. workers do not report to work on the date of their need. They asserted that filing a petition without a temporary labor certification should be allowed in any circumstance where DOL denies certification or fails to act in a timely manner.

Response: In its final H–2A rule, DOL establishes a process for an employer to request re-determination of need if U.S. workers fail to report on the date of need. DHS believes that this DOL provision addresses these commenters' concerns. Therefore, under this final rule, DHS abrogates the process for approving H–2A petitions, in limited circumstances, that are filed with denied temporary labor certifications.

2. Unnamed Beneficiaries in the Petition

Comment: Ten commenters addressed and supported the proposal to allow H–2A petitions to include unnamed beneficiaries for those who are outside the United States regardless of the number of beneficiaries on the petition or whether the temporary labor certification named beneficiaries. They agreed that it would provide agricultural employers with more flexibility to recruit foreign workers months ahead of the actual date of stated need.

Response: Based on the support from the commenters, the final rule adopts this proposal with minor changes. The changes discussed below concern beneficiaries from countries that have not been designated as participating countries under the H–2A program as well as minor, nonsubstantive changes to improve the clarity of the text. The final rule revises 8 CFR 214.2(h)(2)(iii) and removes 8 CFR 214.2(h)(5)(i)(C). Also, as noted earlier, the final rule makes conforming amendments to 8 CFR 214.2(h)(5)(v)(B) and 8 CFR 214.2(h)(5)(v)(C) to clarify job qualification documentation requirements and the timing for such documents for named and unnamed beneficiaries. The final rule also maintains the requirement that the petition include the names of those beneficiaries who are present in the United States. It should be noted that, in the case of an alien who is already in the United States, an H–2A petition encompasses both an employer's request to classify its worker as H–2A nonimmigrant and the alien worker's request to change from a different nonimmigrant status to H–2A or to extend his or her H–2A status. If eligible, the approval of the H–2A petition and the related request for extension of stay or change of status will serve either to confer a new immigration status or to extend the status of a particular alien immediately upon approval. Since such an approval, unlike a nonimmigrant admission from outside the country, does not afford the U.S. Government the opportunity to first inspect and/or interview the H–2A beneficiary at a consular office abroad or at a U.S. port of entry, it is essential that DHS have the names of beneficiaries in the country.

3. Multiple Beneficiaries

Comment: Eleven out of 12 commenters supported the proposal to permit petitioners to file only one petition with DHS when petitioning for multiple H–2A beneficiaries from multiple countries. They stated that this change to the regulations would benefit the employer not only in terms of convenience but also financially.

Response: Based on the positive responses from commenters, the final rule retains the proposal. New 8 CFR 214.2(h)(5)(i)(B).

Comment: One commenter suggested that this change would unnecessarily complicate the visa issuance process.

Response: DHS disagrees with this commenter's concern. DHS proposed the change as a result of the implementation of the Petition Information Management System (PIMS) by the Department of State in 2007. PIMS effectively tracks visa issuance for specific petitions approved for multiple beneficiaries in real time regardless of the consulate location where a beneficiary may apply for a visa. Therefore, DHS does not believe that this proposed change would complicate the visa issuance process. A consular officer would have full and timely access to information regarding the exact number of beneficiaries who have been issued visas based on the approved H–2A petition at the time an alien applies for his or her H–2A visa based on that petition. The Department of State website provides more information about PIMS at *http://travel.state.gov/visa/laws/telegrams/telegrams_4201.html.*

Comment: The same commenter also stated that the proposal would result in an employer recruiting and hiring workers from different geographical regions of a country and/or from different nations. The commenter further suggested that such hiring process would increase the likelihood of problems for workers who feel isolated, decreasing the workers' ability to unite and communicate among themselves.

Response: DHS does not intend to change employers' recruiting processes as a result of this proposal. Under the current regulations, an employer may bring in H–2A workers from many different countries rather than from a single country or from one region within a country. The change made by this final rule merely would permit petitioners to file only one petition with DHS when petitioning for multiple H–2A beneficiaries from multiple countries instead of requiring multiple petitions.

4. Payment of Fees by Beneficiaries To Obtain H–2A Employment

a. Grounds for Denial or Revocation on Notice.

Comment: Eleven out of 83 commenters supported the proposal to authorize the denial or revocation of an H–2A petition if DHS determines that the alien beneficiary has paid or has agreed to pay any fee or other form of compensation, whether directly or indirectly, to the petitioner or that the petitioner is aware or reasonably should be aware that such payment was made to the petitioner's agent, or to any facilitator, recruiter, or similar employment service, in connection with or as a condition of obtaining the H–2A employment. Seventy-one commenters responded negatively to this proposal and one comment was neutral.

Response: After carefully considering the commenters' support and objections, for the reasons stated in the paragraphs below, the final rule provides DHS with the authority to deny or to revoke (following notice and an opportunity to respond) an H–2A petition if DHS determines that the petitioner has collected, or entered into an agreement to collect a fee or compensation as a condition of obtaining the H–2A employment, or that the petitioner knows or reasonably should know that the beneficiary has paid or agreed to pay any facilitator, recruiter, or similar employment service as a condition of H–2A employment. See new 8 CFR 214(h)(5)(xi)(A). DHS has determined that a prohibition on any payment made by a foreign worker in connection with the H–2A employment is more restrictive than necessary to address the problem of worker exploitation by unscrupulous employers, recruiters, or facilitators imposing costs on workers as a condition of selection for H–2A employment. Accordingly, DHS has not included in the final rule the prohibition on payments made in connection with the H–2A employment, but retains the prohibition on payments made to an employer, recruiter, facilitator, or other employment service by the foreign worker that are a condition of obtaining the H–2A employment.

DHS will not deny or revoke the petition if the petitioner demonstrates that (1) prior to the filing of the petition, the alien beneficiary has been reimbursed for the prohibited fees paid; (2) where the prohibited fees have not yet been paid, that the agreement to pay has been terminated; or (3) where the prohibition on collecting or agreeing to collect a fee is violated by a recruiter or agent after the filing of the petition, the petitioner notifies DHS about the prohibited payments, or agreement to make such payments, within 2 workdays of finding out about such payments or agreements.

Comment: The commenters who supported this proposal welcomed this addition to the regulations as a positive change to recognize worker abuses, such as human trafficking and effective indenture. They suggested that DHS should take further measures to deter future violations by implementing procedures to debar a violator from the program.

Response: DHS does not have the statutory authority to implement procedures to debar petitioners from the H–2A program. The statute provides DHS with the authority to deny petitions filed with respect to an offending employer under section 204 or 214(c)(1) of the INA (8 U.S.C. 1154 or 1184(c)(1)) for 1 to 5 years if it finds a significant failure to meet any of the conditions of an H–2B petition or a willful misrepresentation of a material fact in an H–2B petition. INA section 214(c)(14)(A)(ii), 8 U.S.C. 1184(c)(14)(A)(ii). However, there is no similar provision applicable to the H–2A nonimmigrant classification that provides such authority.

Comment: Most of the commenters supporting worker protections also suggested that DHS should take further measures to provide appropriate remedies to help the foreign workers receive the funds to which they were entitled.

Response: DHS agrees that the proposed rule, while offering some safeguards against the indenture of H–2A workers by providing a direct disincentive to employers and/or their recruiters to collect recruiting and similar fees from prospective and current H–2A workers, does not address fully the basic problem such workers face: They remain ''indentured'' until such time as they are relieved of this debt burden. While the proposed rule addresses this concern by providing an alien worker who has incurred such debt in connection with obtaining H–2A employment with the opportunity to change employers or return to his or her home country, it does not relieve the alien of his or her improperly imposed H–2A placement-related debt burden. DHS agrees with the commenters' concern in this regard and believes that it is in the interests of both the alien and legitimate H–2A employers to ensure the fair and even-handed administration of the H–2A program by providing a means to make such alien workers whole. Consistent with the expressed intent of the proposed rule to afford

adequate protections for alien agricultural workers seeking H–2A nonimmigrant classification and to remove unnecessary administrative burdens on legitimate employers seeking to hire such workers, the final rule, therefore, provides that an H–2A petitioner can avoid denial or revocation of the H–2A petition if the petitioner demonstrates that the petitioner or the employment service reimbursed the alien worker in full for the prohibited fees paid or that any agreement for future payment is terminated. New 8 CFR 214.2(h)(5)(xi)(A)(*1*), (*2*), and (*4*). However, the remedy of reimbursement would not apply if the petitioner collected the fees after the filing of the petition. New 8 CFR 214.2(h)(5)(xi)(A)(*3*). For a petitioner who discovers after the filing of the petition that the alien worker paid or agreed to pay an employment service the prohibited fees, the petitioner can avoid denial or revocation by notifying DHS within 2 workdays of obtaining this knowledge instead of reimbursing the worker or effecting termination of the agreement. New 8 CFR 214.2(h)(5)(xi)(A)(*4*). DHS will publish a notice in the **Federal Register** to describe the manner in which the notification must be provided.

DHS does not believe it appropriate to impose on petitioners who discover a post-filing violation by a labor recruiter the same adverse consequence—denial or revocation of the petition—that is imposed on more culpable petitioners who themselves violate the prohibition on collection of fees from H–2A workers after petition filing, nor should petitioners discovering such post-filing violations by a labor recruiter be put in a situation where the only way to avert denial or revocation of the petition might be for the petitioner to pay for the recruiter's violation by reimbursing the alien itself. Petitioners should be encouraged to come forward with information about post-filing wrongdoing by labor recruiters, even if reimbursement is not possible. In this way, DHS can help provide further protections to H–2A workers against unscrupulous recruiter practices.

Further, where the petitioner does not reimburse the beneficiary and USCIS denies or revokes the H–2A petition, the final rule provides that a condition of approval of subsequent H–2A petitions filed within one year of the denial or revocation is reimbursement of the beneficiary of the denied or revoked petition or a demonstration that the petitioner could not locate the beneficiary. New 8 CFR 214.2(h)(5)(xi)(C)(*1*). This requirement is intended to balance the commenters' concerns that an H–2A alien worker not be required to pay fees as a condition of obtaining his or her H–2A employment with the legitimate concern that petitioners who run afoul of 8 CFR 214.2(h)(5)(xi)(A) but who have reimbursed the alien worker in full or who, despite their reasonable efforts, are unable to locate such workers, continue to have access to participation in the H–2A program. Whether the petitioner will be able to demonstrate to the satisfaction of DHS that it has exercised reasonable efforts to locate the alien worker will depend on the specific facts and circumstances presented. In this regard, DHS would take into consideration the amount of time and effort the petitioner expended in attempting to locate the beneficiary, and would require, at a minimum, that the petitioner has attempted to locate the worker at every known address(es). The final rule also clarifies that the 1-year condition on petition approval will apply anew each time an H–2A petition is denied or revoked on the basis of new 8 CFR 214.2(h)(5)(xi)(A)(1)–(4). New 8 CFR 214.2(h)(5)(xi)(C)(*2*).

Comment: Many commenters further suggested that employers should be obligated to pay for aliens' subsistence costs while the workers are not permitted to work.

Response: DHS agrees that the revocation of a petition based on the payment of prohibited fees should not penalize H–2A workers. Accordingly, to minimize the adverse impact on workers, DHS will authorize the alien beneficiary's period of stay for an additional 30-day period for the purpose of departure or extension of stay based upon a new offer of employment. *Id.* During this 30-day period, such alien will not be deemed to be unlawfully present in the United States. *Id.; see also* INA section 212(a)(9)(B), 8 U.S.C. 1182(a)(9)(B) (description of unlawful presence).

DHS, however, will not be requiring employers to provide financial assistance to aliens adversely affected by the revocation of a petition. While we understand that certain H–2A workers will be adversely affected when DHS revoked H–2A petitions due to actions by the employer, we do not believe that DHS can require employers to cover expenses for workers without further notice and comment. This determination, however, does not impact any other legal remedy or claim that an affected worker may have against his or her employer.

Further, although DHS proposed to also require a petitioner to pay for the alien's reasonable transportation costs of return to his or her last place of foreign residence abroad after DHS revokes a petition for improper payment of fees, DHS has removed that requirement from this final rule. While section 214(c)(5)(A) of the INA (8 U.S.C. 1184(c)(5)(A)), requires petitioners to pay the workers' reasonable transportation expenses to return to their last place of foreign residence following revocation of a petition, that provision pertains solely to H–1B and H–2B nonimmigrant workers. 8 U.S.C. 1184(c)(5)(A). As there is no similar statutory requirement for employers of H–2A temporary workers to cover expenses for beneficiaries even when the petitioner's actions result in the revocation of the petition and thus require the alien to leave the United States, DHS does not believe that it may impose such costs onto the H–2A employer.

Comment: Several commenters suggested that employers should be required to ensure that workers' passports are not confiscated.

Response: Existing laws satisfactorily meet these commenters' concerns and they are not addressed by this final rule. For example, it is unlawful to conceal, remove or confiscate an immigration document in furtherance of peonage or involuntary servitude. *See* 18 U.S.C. 1592.

Comment: Some commenters suggested that the U.S. government should require H–2A employers to comply with Article 28 of Mexico's Federal Labor Law, which requires that employers recruiting Mexican citizens in Mexico for employment abroad comply with such requirements as registering with the applicable Board of Conciliation and Arbitration, submitting the employment contract to the Board, and posting a bond to ensure a fund to compensate workers for illegal employment practices. They further stated that the North American Agreement on Labor Cooperation (NAALC), which requires each signatory nation to cooperate to ensure compliance with all labor laws and improve conditions for workers, is a treaty that binds the United States.

Response: DHS does not enforce the labor law of a foreign country. As it is DOL's function to administer the U.S. government's responsibilities under the NAALC and to enforce federal labor laws, DHS is not in a position to reply to these comments and no changes were made to the final rule to respond to them.

Comment: One commenter suggested that the proposed rule contains no plan for dealing with unscrupulous, fraudulent recruiters in foreign

countries and that this change may result in DHS penalizing the victims rather than the perpetrators as workers lose jobs and employers lose workers. Some commenters made a variety of recommendations to enforce the methods to protect H–2A workers from abuses, such as requiring an H–2A employer to reach written agreements with labor contractors, recruiters, or facilitators to prohibit the imposition of job placement-related fees on prospective workers or limiting the use of recruiters and facilitators for H–2A purposes to those that maintain an office in the United States and are duly licensed to do business in the United States according to Federal and State laws.

Response: While DHS agrees that these precautions would further protect H–2A workers from abuses, including such precautions in this final rule would be outside DHS' authority. DHS cannot specifically regulate the business practices of recruiters in foreign countries or the agreements between private entities under existing authorities.

Comment: Some commenters who objected to this proposal suggested that this proposal would lead to a decrease in the usage of the H–2A program as it will make the program more costly.

Response: While DHS understands that this rule has the effect of requiring employers rather than H–2A workers to bear these costs, the H–2A program was never intended to encourage the importation of indebted workers. The intention of the final rule is to ensure that the actual wages paid to H–2A workers reflect those set forth in the labor certification; passing recruitment-related costs on to the alien worker would have the effect of reducing the alien worker's actual wages. Further, DHS does not believe that this rule would have a chilling effect on the recruitment of H–2A workers; demand for such workers is based on a prospective employer's need for workers. So too, the choice whether to use recruiters and/or facilitators is that of the employer and is presumably based on a determination that it makes economic sense to use such persons to assist in finding alien workers. Assuming that making the employer bear such recruitment costs would make the program more cost prohibitive, the solution is not to pass those costs on to economically disadvantaged alien workers but to leave to the free market the amount an employer is willing to agree to pay the recruiter, facilitator, or employment service.

Comment: A number of commenters who objected to this proposal asserted that there is no statutory authority in the INA for DHS to prohibit prospective workers from paying a recruiter or a facilitator for the services they receive in order to secure employment in the United States. They stated that it is a longstanding practice that foreign agents collect fees from those who wish to find work in the United States and need assistance with their visa applications and/or the admission process and, in fact, such services have become essential with constant changes in the visa application procedure at U.S. consulates abroad.

Response: DHS believes that these comments misinterpret the proposed change. The proposal would neither prohibit the use of such recruiters or facilitators during the recruitment or visa application process nor the collection of fees itself. Instead, the proposal would prohibit imposition of fees on prospective workers as a condition of selection for such employment. It would not preclude the payment of any finder's or similar fee by the prospective employer to a recruiter or similar service, provided that such payment is not assessed directly or indirectly against the alien worker. Under section 214(a) of the INA, 8 U.S.C. 1184(a), DHS has plenary authority to determine the conditions of admission of all nonimmigrants to the United States, including H–2A workers. It is within the authority of DHS to bar the payment by prospective workers of recruitment-related fees as a condition of an alien worker's admission to this country in H–2A classification.

DHS notes that this final rule is consistent with the Department of Labor's bar on the employer passing to prospective alien agricultural workers fees the employer incurs in recruiting U.S. workers in conjunction with obtaining a temporary agricultural worker labor certification. *See* new 20 CFR 655.105(o).

Comment: Many commenters asked DHS to specify what types of fees are prohibited by the rule. Several commenters argued that obtaining a passport and a visa for arriving H–2A workers should not be the employer's responsibility.

Response: DHS agrees that passport and visa fees should not be included in the types of fees prohibited by the rule, except where the passing of such costs to the worker is prohibited by statute or the Department of Labor's regulations. Generally, the types of fees that would be prohibited include recruitment fees, attorneys' fees, and fees for preparation of visa applications. So that the prohibition against impermissible fees remains general, covering any money paid by the beneficiary to a third party as a condition of the H–2A employment, the final rule does not provide a list of prohibited fees. However, as discussed earlier, the final rule provides that prohibited fees do not include the lesser of the fair market value or actual costs of transportation to the United States, or payment of any government-specified fees required of persons seeking to travel to the United States, such as, fees required by a foreign government for issuance of passports and by the U.S. Department of State for issuance of visas. As these costs would have to be assumed by any alien intending to travel to the United States, DHS believes that each alien should be responsible for them. New 8 CFR 214.2(h)(5)(i)(C)(*5*) and (h)(5)(xi)(A) and (C).

Comment: Many commenters expressed concerns about petition revocation based on an employer's knowledge of the payment of job placement-related fees by prospective workers. Many commenters requested that DHS clarify the standard by which an employer will be deemed to lack knowledge of the prohibited payment by the prospective worker.

Response: The final rule clarifies that an H–2A petition will be subject to denial or revocation only if DHS determines that the H–2A petitioner knew, or reasonably should have known, that the H–2A worker paid or agreed to pay a prohibited fee. New 8 CFR 214.2(h)(5)(xi)(A). For example, if a recruiter advertises to prospective H–2A petitioners that it can place temporary alien workers with such employers at no or minimal cost to the employers, it is reasonable for prospective petitioners to view these claims as suspect and question whether the recruiter has passed its recruitment costs to the prospective H–2A workers. A determination by DHS that the petitioner failed to make reasonable inquiries to ensure that prospective H–2A workers did not pay the recruiter any fees will subject the petition to denial or revocation. Similarly, if an H–2A petitioner learns, directly or indirectly, that a prospective H–2A worker has been asked to pay a fee or other thing of value as a condition of his or her employment with the U.S. employer, the H–2A petitioner will be deemed to be on notice that the prospective worker has paid a prohibited fee and reasonably can be expected to ascertain whether this is in fact true before petitioning for the worker.

Comment: Another comment stated that this proposal would make petitioners subject to liability by opening additional avenues for lawsuits

against the petitioners who may be held responsible for a third party's action.

Response: This provision is not intended to provide any party with the authority to engage in legal proceedings based on this decision by DHS.

Comment: Some commenters suggested that DHS should recognize that some assistance in recruiting and/or in the visa application and admission process could be conducted informally by friends or family members, not as a for-profit activity, and requested DHS to specify facilitators and recruiters that fall under these provisions.

Response: Since assistance in recruiting and in the visa application or admission process that is provided without charge is not precluded by this rule, DHS determined that it is not necessary for the final rule to reference such assistance.

Comment: There were additional suggestions to prevent fraud and to protect laborers' rights, as well as administrative recommendations.

Response: Because these comments exceeded the scope of the proposed rule, they are not addressed in this final rule.

b. Employer Attestation

Comment: One out of 8 commenters supported the proposed addition to require H–2A petitioners to attest that they will not materially change the information provided on the Form I–129 and the temporary labor certification; that they have not received, nor intend to receive, any fee, compensation, or other form of remuneration from prospective H–2A workers; and whether they used a facilitator, recruiter, or any other similar employment service, to locate foreign workers, and if so, to name such facilitators, recruiters, or placement services. Seven commenters wrote that the employer attestation would not reduce the amount of paperwork required by an employer nor streamline the process.

Response: DHS has carefully considered the attestation requirement, and has determined that a separate attestation requirement would be a duplicative addition to the regulations. However, an attestation relates to eligibility requirements that the petitioner must demonstrate on the H–2A petition which the petitioner must sign as being true and correct. DHS is instead amending the Form I–129 to include the attestation requirements.

Comment: Many commenters pointed out that there are some minor activities in the overall scope of work on an agricultural operation and the workers' secondary duties change from season to season. They suggested that the narrow and restrictive view of unchanging duties in the proposed rule could result in good-faith employers violating this portion of the rule.

Response: While the final rule does not contain a separate attestation requirement, these comments relate to the requirement that the petitioner notify DHS of any changes in the terms and conditions of employment of a beneficiary which may affect eligibility. 8 CFR 214.2(h)(11)(i)(A). DHS does not agree with these commenters' interpretations and understands that farm laborers generally perform several duties and their secondary duties may vary from season to season. For example, while a worker's main duty may be to harvest the crop, there may be a time when he or she is required to drive a tractor, to transport the crop to a processor, or to repair farm equipment. Incidental duties that are associated with the worker's main duty and are part of routine farm maintenance are not considered material changes and do not require the filing of a new petition. *See* 8 CFR 214.2(h)(2)(i)(E).

DOL also provides a clarification in its final rule to reflect that work activity of the type typically performed on a farm and incident to the agricultural labor or services for which an H–2A labor certification was approved may be performed by an H–2A worker. DHS is in agreement with DOL's clarification, which will ensure that H–2A workers can engage in minor amounts of other incidental farm work activity during periods when they are not performing the agricultural labor of services that is the subject of their application.

Comment: Commenters suggested that the listing of facilitators, recruiters, or placement services should only be required where workers were actually recruited, and not in the instances where workers were assisted with the visa application process.

Response: While the final rule does not include a separate attestation requirement where the listing of facilitators, recruiters, or placement services would be required, the revised H–2A petition will request the petitioner to include this information. DHS agrees with the commenters' concerns. DHS recognizes that listing all services used potentially may be overly burdensome and of limited utility to DHS. The revised H–2A petition instead will request the petitioner to provide the names of the facilitators, recruiters, or placement services that actually located the H–2A beneficiaries on the petition.

Comment: One commenter suggested that the attestation provision include an agreement by the employer agreeing to unhindered and unannounced inspections by U.S. Immigration and Customs Enforcement (ICE) and DOL.

Response: The final rule does not include the suggested addition. DHS has determined that it is not necessary to include such a provision because such inspections are separately authorized by law. *See* 8 CFR 214.2(h)(5)(vi)(A). Additionally, DOL authorities are within the jurisdiction of DOL, rather than DHS. As such, it is not necessary that an employer agree to inspections.

5. Petition Notification Requirements and Liquidated Damages

Comment: Seventy-three out of 74 commenters objected to the modified notification and liquidated damages provisions in the proposed rule.

Response: After careful consideration, and in response to the commenters' objections, DHS has modified the proposed notification requirements. DHS also has removed the increase in liquidated damages and, instead, will return to the current liquidated damages provision under 8 CFR 214.2(h)(5)(vi)(A).

Comment: Many commenters objected to the proposed requirements to notify DHS if an H–2A worker fails to report for work within 5 days after the employment start date stated on the petition or the worker's employment is terminated more than 5 days before the employment end date stated on the petition. For example, the commenters stated that the majority of late arrivals of H–2A workers to the worksite are caused by slow processing at U.S. government agencies or emergencies beyond the employer's control. In some cases, employers stagger workers' arrival at the consulate and at the worksite to accommodate logistical arrangements, such as transportation. Further, many commenters suggested that, given that work in agriculture is dependent upon weather, it is rare that an employer can accurately predict months in advance of the actual date when the growing season will end, and many agricultural employers use the latest likely ending date on a temporary labor certification.

Response: DHS believes that the notification requirements should be retained, but agrees with the commenters' concerns regarding the practical application of the proposal. Therefore, the final rule modifies the notification requirements to address the commenters' concerns. The final rule requires petitioners to provide notification to DHS in the following instances: Where an H–2A worker fails to report to work within five workdays of the employment start date on the H–2A petition or within five workdays of

the start date established by the employer, whichever is later; where the agricultural labor or services for which H–2A workers were hired is completed more than 30 days earlier than the end date stated on the H–2A petition; or where the H–2A worker absconds from the worksite or is terminated prior to the completion of agricultural labor or services for which he or she was hired. New 8 CFR 214.2(h)(5)(vi)(B)(*1*). DHS believes that the modified notification requirements are more workable for employers and are responsive to the commenters' concerns. Recognizing that there could be various reasons beyond the employer's control causing prospective employees' late arrival at the worksite, the final rule allows the petitioner to use a different employment start date than the start date stated in the H–2A petition to accommodate the employees' late arrival. It also changes the notification timeframes for employment that is terminated earlier than the end date stated on the petition, depending on whether the termination occurs before the work is completed or due to early completion of the work. In addition, the final rule amends 8 CFR 214.2(h)(11)(i)(A) to cross-reference the notification provision.

Where an employer establishes a different start date from that on the H–2A petition, the final rule adds the requirement that the employer retain evidence of the changed employment start date for a 1-year period. A retention period of 1 year was chosen to parallel the 1-year retention period for notifications. Such documentation must also be made available for inspection on request by DHS officers. New 8 CFR 214.2(h)(5)(vi)(B)(*2*). DHS is adding this requirement to ensure that providing a more flexible timeframe for the notification requirement will not result in misrepresentations regarding the employment start date.

Comment: Many commenters who objected to the modified notification requirements also stated that a notification within 48 hours would be difficult, if not impossible, because, in many circumstances, it may be impossible for the employer to know with certainty that the H–2A worker absconded from the worksite.

Response: DHS disagrees with the commenters concerns that the notification period would be too difficult to meet based on the speed with which an employer will gain knowledge of the worker's abscondment. An absconder is defined as a worker who has not reported to work for 5 workdays without the consent of the employer. The final rule clarifies that the time period is 5 consecutive workdays. New 8 CFR 214.2(h)(5)(vi)(E). The employer's obligation to notify DHS of an abscondment would thus not be triggered by the employer's subjective determination that the worker has indeed absconded, but rather by an objectively measured event: The passage of five consecutive workdays during which the alien has failed to report to work without the consent of the employer.

While DHS does not believe that the proposed notification period would be too onerous on employers, DHS recognizes that imposing a 48-hour time period for filing notifications may be difficult for those employers that do not conduct business 7 days of the week, such as those employers that are closed on weekends and holidays. Therefore, the final rule clarifies that the notification period is 2 workdays rather than the proposed 48 hours. New 8 CFR 214.2(h)(5)(vi)(B)(*1*).

Comment: Many comments suggested that the requirement to pay $500 in liquidated damages for failing to meet the notification requirement is excessive and will be a potential disincentive to use the H–2A program because the failure to comply with the notification requirement, an event triggering liquidated damages, could be merely a failure to notify within the required timeframe as opposed to failure to notify at all. Most of these comments suggested that DHS not increase the liquidated damages amount from the amount set forth in the current regulations ($10) or, at most, increase them only by a much smaller amount, to a level not exceeding $50 per instance.

Response: In response to public comments, DHS has decided to remove the proposed increase in liquidated damages to $500 and instead will retain the liquidated damages requirement under 8 CFR 214.2(h)(5)(vi)(B)(*3*). Under the current provision, an employer who fails to comply with the notification requirements, as revised under this final rule, must pay liquidated damages in the amount of $10.

Comment: With respect to the process following the failure to meet the notification requirements, some commenters suggested that the 10-day timeframe within which an employer is required to reply to a notice prior to being assessed liquidated damages would impose an unreasonable hardship on small employers who could be in their busy season when such a notice arrives. They recommended that employers be afforded 30 days to respond.

Response: The final rule adopts this suggestion and provides that the petitioner will be given written notice and 30 days to reply to such notice if DHS has determined that the petitioner has violated the notification requirements and it has not received the notification. New 8 CFR 214.2(h)(5)(vi)(C).

Comment: One comment suggested that the imposition of liquidated damages must include a provision for due process with such ''hefty'' amounts at stake.

Response: By including a notice requirement, as stated above, and an opportunity to reply within 30 days, DHS believes that new 8 CFR 214.2(h)(5)(vi)(C) provides sufficient due process.

Comment: Several commenters were concerned about the cost that employers will have to incur to send the notification to DHS by certified mail or similar means in order to comply with the notification requirements within 48 hours.

Response: In reply to these comments, DHS is not including in the final rule the requirement that the notification be in writing. *See* new 8 CFR 214.2(h)(5)(vi)(B)(1), (h)(5)(vi)(C), and (h)(11)(i)(A). A notice outlining the manner in which the notification may be made will be published in the **Federal Register**. DHS will provide a designated e-mail address for employers to send notifications. DHS believes that designating a dedicated e-mail address for employers' notification purpose will reduce the burden on employers. DHS will also provide a designated mailing address for employers without ready access to email.

Comment: A question was raised during a stakeholder meeting held during the comment period of the proposed rule as to what an H–2A employer needs to do in order to replace an H–2A worker whose employment is terminated or who has left the country.

Response: Upon further consideration, DHS agrees that an accommodation should be made for employers who lose H–2A workers before the work is completed. Under the current provision at 8 CFR 214.2(h)(5)(ix), an employer may file an H–2A petition to replace an H–2A worker whose employment was terminated early. However, the provision does not address the two additional situations covered by the notification provisions: When workers fail to show up at the worksite or abscond and leave the employer without a sufficient workforce to complete the work. Therefore, the final rule amends 8 CFR 214.2(h)(5)(ix) to allow an employer to file an H–2A petition to replace H–2A workers in the following

three instances: (a) Where an H–2A worker's employment was terminated prior to the completion of work and earlier than the date stated in the H–2A petition; (b) where a prospective H–2A worker has failed to report to work within five workdays of the employment start date on the temporary labor certification or within five workdays of the date established by their employer, whichever is later; or (c) where an H–2A worker absconds from the worksite. Under this revised provision, a petitioner would be able to file an H–2A petition using a copy of the previously approved temporary labor certification to replace the absent H–2A worker.

Comment: Some commenters suggested that the employer, who did not know of job placement-related fee payments made by prospective workers, should not be penalized and therefore should be able to quickly replace the worker with another H–2A worker.

Response: As discussed above, an H–2A petition will be denied or revoked if DHS determines that the employer knew or has reason to know that the H–2A worker paid or agreed to pay a job placement-related fee. If the employer did not know or have reason to know of such payment, the provision will not apply and the petition cannot be denied or revoked on this basis. Therefore, it is not necessary for the final rule to cover this possibility.

6. Violations of H–2A Status

Comment: Ten commenters objected to the proposal to revise 8 CFR 214.2(h)(5)(viii)(A) to provide that any violation of a condition of H–2A status within the 5 years prior to adjudication of a new H–2A petition would result in a denial of H–2A status. DHS did not receive any other comments on this proposal.

Response: Based on the objections of the commenters, DHS will modify the proposed rule as discussed below.

Comment: Most of the ten commenters suggested that some aliens may have unwittingly violated their previous H–2A status by absconding from their jobs as a result of their employer's illegal or inappropriate conduct, thereby causing them to engage in a protest leading to their termination or being forced to quit.

Response: DHS agrees that this situation should not trigger the consequences of 8 CFR 214.2(h)(5)(viii)(A). The final rule clarifies that an alien will be precluded from being granted H–2A status where he or she violated the conditions of H–2A status within the 5 years prior to adjudication of a new H–2A petition by DHS, except where the violation occurred through no fault of his or her own, such as where the alien absconded from the worksite as a result of the employer's illegal or inappropriate conduct. The prospective employer would have the opportunity to explain the circumstances surrounding the alien's previous status violation in its petition, as would the alien in conjunction with his or her application for H–2A status and/or an H–2A visa.

Comment: One comment arguing against the revision stated that DHS lacks the authority to impose additional or more restrictive grounds of inadmissibility than those provided in the INA.

Response: DHS does not find that this revision is an imposition of an additional ground of inadmissibility. This revision simplifies the current provision to apply to all violations of the H–2A status rather than to the two currently identified in the regulations, namely, remaining beyond the specific period of authorized stay and engaging in unauthorized employment. Further, section 214(a)(1) of the INA (8 U.S.C. 1184(a)(1)) provides authority for this requirement as a condition for H–2A admission. Under that section, the Secretary of Homeland Security is granted the authority to establish the conditions of nonimmigrant admission by regulation.

7. Revocation of Labor Certification

Comment: Twenty out of 21 commenters objected to the proposed revision to 8 CFR 214.2(h)(5)(11)(ii) providing for the immediate and automatic revocation of an H–2A petition upon the revocation of the temporary labor certification by DOL.

Response: After carefully considering the commenters' objections and discussing with DOL, the final rule adopts the proposal for the following reasons.

Comment: Many of these commenters objected to this change because a petition revocation will terminate the employment authorization of the workers and make it impossible for the employer to legally continue in business. They were concerned that DOL would make revocation of a labor certification immediate during the pendency of an employer's appeal of the revocation.

Response: In its final H–2A rule, DOL provides for a stay of revocation until the conclusion of any DOL administrative appeal. DHS believes that this DOL provision addresses these commenters' concerns. Therefore, under this final rule, DHS will revoke an H–2A petition as soon as DOL has adjudicated any administrative appeal that may have been filed and informs DHS of their decision to revoke the temporary labor certification.

Comment: A few commenters wrote that this proposed change will provide no relief for affected workers who stand to lose their jobs and their ability to earn sufficient wages that they had expected by taking H–2A employment. These commenters suggested that the former employer (whose petition was revoked) should be obligated to pay for subsistence costs for the aliens during the 30-day period.

Response: In response to these comments, the final rule provides a 30-day grace period for H–2A workers who are in the United States based on an approved petition that is later revoked because of DOL's revocation of the temporary labor certification. New 8 CFR 214.2(h)(5)(xii). During this 30-day period, such workers will be in an authorized period of stay. They may choose to find new employment and apply for an extension of stay or depart the United States. As discussed above, however, at this time, DHS does not believe that it may require employers to pay wages for workers who remain in the United States nor transportation expenses for those who chose to return to their country of origin.

8. Permitting H–2A Petitions for Nationals of Participating Countries

Comment: Five comments addressed the proposed rule to include a new provision at 8 CFR 214.2(h)(5)(i)(F) (and complementary provision at 8 CFR 214.2(h)(5)(viii)(D)) precluding DHS from approving an H–2A petition filed on behalf of one or more aliens from countries determined by the Secretary of Homeland Security to consistently deny or unreasonably delay the prompt return of their citizens, subjects, nationals, or residents who are subject to a final order of removal from the United States. One commenter supported this proposed change. Two commenters sought modification to the provision, while another sought additional time to comment on the provision. A final commenter disagreed that the proposal would improve the H–2A process generally.

Response: After reviewing all comments, DHS has modified this proposal in the final rule for the reasons and in the manner as discussed below.

Instead of publishing a list of countries that consistently deny or unreasonably delay the prompt return of their citizens, subjects, nationals or residents who are subject to a final removal order, DHS at this time will be publishing in a notice in the **Federal**

Register a list of countries that the Secretary of Homeland Security has designated, with the concurrence of the Secretary of State, as eligible for its nationals to participate in the H–2A temporary worker program. DHS is making this modification to the rule in consideration of public comments received recommending DHS rework the proposal in order to make the process more positive and to encourage countries to improve cooperation in the repatriation of their nationals.

In designating countries to allow the participation of their nationals in the H–2A program, DHS, with the concurrence of the Department of State, will take into account factors including, but not limited to, the following: (1) The country's cooperation with respect to the issuance of travel documents for citizens, subjects, nationals, and residents of that country who are subject to a final order of removal; (2) the number of final and unexecuted orders of removal against citizens, subjects, nationals, and residents of that country; (3) the number of orders of removal executed against citizens, subjects, nationals, and residents of that country; and (4) such other factors as may serve the U.S. interest.

Designation of countries on the list of eligible countries will be valid for one year from publication. The designation shall be without effect at the end of that one-year period. The Secretary, with the concurrence of the Secretary of State, expects to publish a new list prior to the expiration of the previous designation by publication of a notice in the **Federal Register**, considering a variety of factors including, but not limited to the four factors for the designation of a participating country described above.

Initially, the list will be composed of countries that are important for the operation of the H–2A program and are cooperative in the repatriation of their nationals. The countries included on the list are the countries whose nationals contributed the vast majority of the total beneficiaries of the H–2A and H–2B programs during the last three fiscal years.

The Secretary of Homeland Security may allow a national from a country not on the list to be named as a beneficiary on an H–2A petition and to participate in the H–2A program based on a determination that such participation is in the U.S. interest. The Secretary's determination of such a U.S. interest will take into account a variety of factors, including but not limited to consideration of: (1) Evidence from the petitioner demonstrating that a worker with the required skills is not available from among workers from a country currently on the list of eligible countries for participation in the program; (2) evidence that the beneficiary has been admitted to the United States previously in H–2A status and has complied with the terms of that status; (3) the potential for abuse, fraud, or other harm to the integrity of the H–2A visa program through the potential admission of a beneficiary from a country not currently on the list of eligible countries for participation in the program; and (4) such other factors as may serve the U.S. interest. Therefore, DHS is requiring petitioners for beneficiaries who are nationals of countries not designated as participating countries to name each beneficiary. Additionally, petitions for beneficiaries from designated countries and undesignated countries are to be filed separately. These changes will permit DHS to more easily adjudicate H–2A petitions involving nationals of countries not named on the list by permitting DHS to properly evaluate the factors used to make a determination of U.S. interest, discussed above, without slowing the adjudication of petitions for nationals of designated countries.

As discussed in the proposed rule, DHS expects that the provisions in this rule intended to increase the flexibility of the H–2A visa program, complemented by the streamlining proposals the Department of Labor is making in its H–2A rule, will increase the appeal of the H–2A program to U.S. agricultural employers. *See* 73 FR 8230, 8234–5 (Feb. 13, 2008). While a more efficient H–2A program is anticipated to reduce the number of aliens entering the country illegally to seek work, it also could lead to an increase in the number of H–2A workers that abscond from their workplace or overstay their immigration status. Therefore, the success of the program will depend significantly upon countries accepting the return of their nationals.

Petitions may only be filed and approved on behalf of beneficiaries who are citizens, subjects, nationals or residents of a country that is included in the list of participating countries published by notice in the **Federal Register** or, in the case of an individual beneficiary, an alien whose participation in the H–2A program has been determined by the Secretary of Homeland Security to be in the U.S. interest. *See* new 8 CFR 214.2(h)(5)(i)(F). Likewise, in order to be admitted as an H–2A, aliens must be nationals of countries included on the list of participating countries or, in the case of an individual beneficiary, an alien whose participation in the H–2A program has been determined by the Secretary of Homeland Security to be in the U.S. interest. *See* new 8 CFR 214.2(h)(5)(viii)(D). To ensure program integrity, such petitioners must state the nationality of all beneficiaries on the petition, even if there are beneficiaries from more than one country. *See* new 8 CFR 214.2(h)(2)(iii).

9. Period of Admission

Comment: Sixteen out of 18 commenters supported the proposal to revise 8 CFR 214.2(h)(5)(viii)(B) by extending the H–2A admission period following the expiration of the H–2A petition from 10 to 30 days. These commenters believed that it would make the H–2A program a more cost efficient program.

Response: Based on the support of these commenters, the final rule adopts this proposal. New 8 CFR 214.2(h)(5)(viii)(B).

Comment: Several commenters who supported this proposed change also suggested that employers should be obligated to pay for their former employees' subsistence costs during the 30-day period, as the aliens would not be permitted to work during that time.

Response: Because H–2A workers are not required to remain in the United States during the additional 30-day period, DHS does not think that employers should be responsible for subsistence costs during that period. In addition, as discussed above, DHS does not think that it may impose such costs at this time.

Comment: Two commenters opposed the proposal. One commenter did not provide a reason for the opposition. The other commenter stated that this change would create a period of too much downtime where the worker is not accounted for and does not seem to have any significant benefits.

Response: DHS disagrees with these concerns. DHS believes that the benefit of extending the H–2A admission period following the expiration of the H–2A petition to 30 days would be to provide the H–2A worker enough time to prepare for departure or apply for an extension of stay based on a subsequent offer of employment if the worker chooses to do so. Having a 30-day extension would facilitate the new benefit that the final rule provides for a worker to continue to be employment authorized while awaiting for an extension of H–2A status based on a petition filed by a new employer who is a registered user in good standing of USCIS' E-Verify program.

10. Interruptions in Accrual Towards 3-Year Maximum Period of Stay

Comment: Nine out of 12 commenters supported the proposed rule reducing

the length of time that interrupts an H–2A worker's accrual of time in H–2A status for purposes of calculating when the worker has reached the 3-year maximum period of stay. They supported this change because it would allow a worker to engage in a longer employment period, which would benefit both employers and employees.

Response: DHS agrees that this proposal would benefit both employers and H–2A workers. Accordingly, the final rule adopts the proposed revision, reducing the minimum period spent outside the United States that would be considered interruptive of accrual of time towards the 3-year limit, where the accumulated stay is 18 months or less, to 45 days. If the accumulated stay is longer than 18 months, the required interruptive period will be 2 months. *See* new 8 CFR 214.2(h)(5)(viii)(C).

Comment: One comment suggested that the existing exception for the H–1B, H–2B, and H–3 commuters under 8 CFR 214.2(h)(13)(v) be extended to the H–2A classification.

Response: The current regulation at 8 CFR 214.2(h)(13)(v) provides that the limitations on admission in H–1B, H–2B, and H–3 status do not apply to H–1B, H–2B, and H–3 individuals (1) who did not reside continually in the United States and whose employment was seasonal, intermittent, or for less than 6 months per year, and (2) who reside abroad and regularly commute to the United States. DHS does not believe that it is appropriate to extend this provision to H–2A commuters; therefore, the final rule does not include the suggested revision to 8 CFR 214.2(h)(13)(v). The H–2A classification is unique in that H–2A employment sites change from season to season. While some employment sites may be within reasonable commuting distance from the border, it cannot be anticipated that all of the alien's worksites will also be, particularly given the variabilities of growing seasons and work hours inherent in the agricultural industry. What may be reasonable commuting distance based on an 8-hour day may not be if the alien worker is required to work longer hours during the height of the growing season.

It is reasonable to assume that most aliens do not have ready access to transportation to and from their home country and the particular worksite where they are employed. As such, few H–2A workers will actually be able to commute from their homes abroad to the United States on a regular basis. Further, by statute, employers must guarantee many employee benefits such as housing, meals, tools, workers' compensation insurance, and return transportation. Section 218(c)(4) of the INA requires employers to provide housing to all H–2A workers in accordance with specific regulations. 8 U.S.C. 1188(c)(4). Employer-provided housing must meet the standards set forth under 29 CFR 1910.142 or 20 CFR 654.404–654.417. Since the statute does not contain any provision to release employers from their responsibility to provide housing to their employees, DHS does not think it appropriate to apply the commuter exception to the H–2A classification given the special nature and variabilities of H–2A agricultural work.

Comment: One commenter objected to this proposal stating that it would encourage more illegal aliens to come into the country and lead to illegal aliens who are already in the country to stay longer.

Response: DHS does not believe that reducing the time spent outside the United States to be interruptive of accrual of time towards the 3-year limit in H–2A status would encourage more illegal aliens to come to the U.S. or stay in the U.S. longer. This provision is meant to cause less disruptive breaks in the H–2A employment, benefiting both H–2A workers and their employers, and does not apply to those who attempt to enter the U.S. illegally or to those who are already here illegally.

Comment: One commenter stated that it would like to employ H–2A workers for 3 consecutive years.

Response: The current regulations provide that an alien worker's total period of stay in H–2A nonimmigrant status may last up to 3 years. A temporary need by a single employer for H–2A workers in excess of one year is possible where an H–2A employer satisfies DHS and DOL that such longer-term need is generated by ''extraordinary circumstances.'' See 8 CFR 214.2(h)(5)(iv)(A).

DHS believes that the reduction of the time to be spent outside the United States to be considered interruptive of accrual of time towards the 3-year limit in H–2A status provided in this final rule would benefit employers by reducing the amount of time that they are required to be without the services of needed workers. At the same time, this will not violate the temporary and seasonal nature of employment requirements under the H–2A program.

11. Post-H–2A Waiting Period

Comment: Twelve out of 15 commenters supported the proposed rule suggesting the reduction of the waiting period from 6 months to 3 months for an H–2A worker who has reached the 3-year ceiling on H–2A nonimmigrant status prior to seeking H–2A nonimmigrant status again (or any other nonimmigrant status based on agricultural activities). These commenters supported this proposal, stating that it will enhance the workability of the H–2A program for employers while not offending the fundamental temporary nature of employment under the H–2A program.

Response: DHS agrees with the comments in support of this proposal. Accordingly, the final rule adopts the proposed reduction in waiting time without change. New 8 CFR 214.2(h)(5)(viii)(C).

Comment: One commenter argued that this provision may lead to the displacement of U.S. workers and make some desirable year-round agricultural work unavailable to the domestic workforce. The commenter suggested that employers, including farm labor contractors, may string together several short-term job opportunities to offer job stability for a longer term, which would be desirable for many U.S. farm workers.

Response: DHS disagrees that a reduction in the waiting period will result in the displacement of U.S. farm workers. In order to protect U.S. workers, the law requires H–2A employers to obtain a temporary labor certification certifying that there are insufficient U.S. workers who are able, willing, qualified, and available to perform agricultural temporary labor or services, and that the H–2A employment will not adversely affect the wages and working conditions of similarly employed U.S. workers. If an employer is able to find U.S. workers by offering job stability for a longer period, it will not be allowed to or have no need to utilize the H–2A program. DHS believes that this streamlining measure will encourage employers who are unable to secure their workforce among U.S. workers to use the H–2A program instead of hiring individuals who have no legal immigration status and are unauthorized to work.

Comment: One commenter objected to this proposal, stating that it would encourage more illegal aliens to come into the country and lead illegal aliens who are already in the country to stay longer. Another commenter objected to the proposal but did not provide a reason.

Response: DHS adopts this proposal because it believes that a shorter waiting period would better meet the needs of employers in the time-sensitive agricultural industry. The H–2A program is for agricultural employers, who experience labor shortage among U.S. workers, to rely on alien workers to

perform agricultural labor or services of a temporary or seasonal nature. DHS does not agree that this provision would increase the presence of illegal aliens in the United States.

12. Extending Status With a New Employer and Participation in E-Verify

Comment: Two commenters supported the proposal to provide for employment authorization to H–2A workers awaiting an extension of H–2A status based on a petition filed by a new employer. Twelve out of 15 comments opposed conditioning employment authorization on the new employer's participation in the E-Verify program, but supported the proposal to provide for employment authorization to H–2A workers awaiting an extension of H–2A status based on a petition filed by a new employer.

Response: After considering the commenters' objections and concerns, the final rule adopts this proposal at new 8 CFR 274a.12(b)(21), as discussed below. Note that new 8 CFR 274a.12(b)(21) does not include a cross reference to 8 CFR 214.6. This cross reference relates to TN nonimmigrants and was erroneously included in the proposed rule.

Comment: Many commenters questioned the reliability of the E-Verify program. Some commenters suggested that E-Verify has high error rates that disproportionately affect foreign-born U.S. workers.

Response: DHS believes that these concerns are misplaced and factually inaccurate. The ''Findings of the Web Basic Pilot Evaluation'' reported that currently 99.5 percent of all work-authorized employees queried through E-Verify were verified without receiving a Tentative Non-Confirmation (TNC) or having to take any type of corrective action.[1] Over the past year, E-Verify has automated its registration process, instituted a system change to reduce the incidence of typographical errors, incorporated a photo screening tool to combat identity fraud, added Monitoring and Compliance staff to maintain system integrity, added new databases that are automatically checked by the system, and established a new process for employees to call DHS' toll-free number to address citizenship mismatches as an alternative to visiting the Social Security Administration (SSA). These changes have been implemented in an effort to establish efficient and effective verification. A series of enhancements that E-Verify has implemented reduces mismatch rates among newly naturalized citizens and newly arriving workers. Under DHS management and in partnership with SSA, the program is continuously improving its processes to decrease mismatch rates and ensure that E-Verify is fast, easy to use, and protects employees' rights.

Comment: Some commenters stated that some employers have little or no occasion to use the E-Verify program and probably little facility with it and argued that the provision is not fair to such employers.

Response: E-Verify is a free and voluntary program. This provision is not a requirement for employers to obtain H–2 employees, but rather is a condition for the alien obtaining an extension of status and employment authorization pending adjudication of a new H–2A petition filed by another employer. DHS continues to believe that the provision will provide a valuable incentive for employers to participate in the E-Verify program, thereby reducing opportunities for aliens without employment authorization to work in the agricultural sector.

Comment: One comment suggested that, assuming DHS has the authority to provide for portability without statutory authorization, DHS should fully use the H–1B portability provisions as the model to allow portability for the period the petition is pending.

Response: DHS has general authority to grant employment authorization. See INA section 274A(h), 8 U.S.C. 1324a(h). In an industry in which an estimated half of the 1.1 million workers in the United States are illegal aliens, DHS has determined that it is appropriate to restrict the benefit of portability during petition pendency to only those employers that have demonstrated good business/corporate citizenship through enrollment in E-Verify.

Comment: One commenter who objected to the proposal suggested that the provision to extend employment authorization would act as an inducement for a worker to breach his work contract and to change employers prior to fulfillment of the contractual obligations, which would be a violation of INA section 218(c)(3)(B), 8 U.S.C. 1188(c)(3)(B).

Response: DHS disagrees that this provision would act as such an inducement. While it is true that this provision would enable an alien to work for a new employer prior to approval of the new H–2A petition, the purpose of this provision is to enable agricultural workers to change worksites and employers as soon as they complete one agricultural job. Even if this provision acted as an inducement for some aliens to change employers before completion of the first job (e.g., to get a higher paying job), DHS believes that the overall benefit to the agricultural industry, the alien worker, and the U.S. public in allowing the alien worker to change job locations at the end of each job assignment without having to wait for the successor employer's petition to be approved outweighs the possibility of abuse of this privilege by the alien worker or the new petitioning employer.

Comment: This same commenter also suggested that the proposed change to 8 CFR 214.2(h)(2)(i)(D) would create the possibility that an extension for an H–2A employee within the three-year period of stay may not be granted for employment with the same employer.

Response: DHS disagrees with the commenter's interpretation of the proposed provision. The cited provision is specifically for change of employers. The provision for extensions of stay is governed by 8 CFR 214.2(h)(15); the rule does not amend this provision.

Comment: One commenter stated that this proposal conditioning employment authorization on the new employer's participation in the E-Verify program seems to be a waste of time because the state workforce agency (SWA) is required to verify workers' eligibility under the DOL's rule.

Response: The E-Verify program supplements the employer's obligation under section 274A(a) of the INA, 8 U.S.C. 1324a(a), to complete Forms I–9 (Employment Eligibility Verification) at the time of each new hire. The SWA's responsibility is to verify the employment authorization of applicants seeking referral under a job order. SWAs are encouraged, but not required, to enroll in E-Verify. Additionally, under INA Section 274A(a)(5), employers can rely on the SWA's verification of employment authorization only where the documentation complies with all statutory and regulatory requirements, including 8 CFR 274a.6. Incentivizing E-Verify enrollment by agricultural employers will thus reduce opportunities for unauthorized agricultural workers, not just in the situations where employers are not able to rely on a SWA's verification, but in other situations outside the SWA referral process where workers apply for employment.

13. Miscellaneous Changes to H–2A Program

a. Extensions of Stay Without New Temporary Labor Certifications

Comment: Two comments suggested changes to the proposal that would allow, in emergent circumstances, an

[1] *http://www.uscis.gov/files/article/WebBasicPilotRprtSept2007.pdf.*

application for an extension of stay for an H–2A nonimmigrant worker to not contain an approved temporary labor certification, under certain conditions.

Response: The final rule retains the provision as stated in the proposed rule. New 8 CFR 214.2(h)(5)(x).

Comment: One comment recommended that this provision continue to be automatically available upon request and that petitioners not be required to make a case for emergent circumstances.

Response: The proposed rule revised the provision at 8 CFR 214.2(h)(5)(x) to improve its readability, making no substantive changes to the provision. This provision originally was meant to allow H–2A employers to obtain a necessary workforce in case of emergencies over which employers have no control (*e.g.*, changed weather conditions), for up to two weeks. DHS does not believe that the provision should be extended beyond situations involving emergent circumstances. Many agricultural employers stated in their comments to other proposals that, due to the uncertainty as to when the growing season would end, they normally use the latest likely ending date when they apply for a temporary labor certification. Many employers further indicated that most work is completed before the date on the temporary labor certification. DHS believes that it is reasonable to provide an opportunity for an employer to file an H–2A petition without obtaining a new temporary labor certification only in emergent circumstances.

Comment: The other comment asked DHS to have the parameters of emergent circumstances include any instance that the employer could not have reasonably foreseen at the time that the petition was filed.

Response: DHS has determined that it will not include additional parameters to the provision. To do so would unnecessarily reduce the flexibility that the provision currently provides.

b. Filing Locations

Comment: Commenters were supportive of the proposed modifications to the general filing provision at 8 CFR 214.2(h)(2)(i)(A) applicable to H–1B, H–2A, H–2B, and H–3 classifications by removing specific reference to filing locations announced in the **Federal Register** and providing that the form instructions will contain information regarding appropriate filing locations for these nonimmigrant visa petitions.

Response: In the absence of negative comments on these revisions, and to maintain flexibility in the regulations to accommodate changing case management needs, the final rule adopts these modifications without change. New 8 CFR 214.2(h)(2)(i)(A). The final rule also makes conforming amendments to 8 CFR 214.2(h)(2)(i)(B) and 214.2(h)(2)(i)(C), replacing references to filing locations based on where the petitioner is located, will perform services, or receive training, or based on an established agent, with reference to the form instructions. In addition, revised 8 CFR 214.2(h)(2)(i)(B) replaces the reference to ''Service office,'' referring to the Immigration and Naturalization Service, with ''USCIS.''

Comment: DHS received one comment with respect to filing locations specific to logging employers who will need to begin using the H–2A classification once DOL's final rule making changes to the H–2A classification takes effect. Currently, such employers use the H–2B classification. 20 CFR part 655, subpart C. Under the DOL final rule, they instead would need to use the H–2A classification. The comment concerned the current filing location for H–2A petitions at USCIS' California Service Center, as announced in a notice published in the **Federal Register** on November 9, 2007. *See* 72 FR 63621. The comment requested that logging employers be allowed to continue to file their petitions at USCIS' Portland, Maine field office, the current filing location for H–2B petitions for loggers, because the Portland office is familiar with the unique characteristics and needs of the industry.

Response: At present, DHS has no plan to change its central filing location for H–2A petitions at the California Service Center. This central filing location ensures timely processing and consistent adjudication of H–2A petitions. Once DOL's final rule takes effect and requires logging employers to use the H–2A classification, and beginning on the effective date of this rule, logging employers will be required to file petitions on behalf of their prospective workers in accordance with the H–2A regulations and form instructions for H–2A petitions. As DHS monitors the processing of these petitions, if DHS determines that it is more prudent to change the filing location for logging employers to the Portland, Maine field office or any other DHS office, DHS may change the filing location via the form instructions for the H–2A petition. Note that within 30 days from the effective date of this rule (and the DOL rule), logging employers will be required to file change of status petitions for their workers who are present in the United States in H–2B status to ensure that logging workers will be classified as H–2A workers.

14. DHS Policy Applicable to H–2A Sheepherders

Comment: Ten out of 12 commenters objected to the proposal to impose on H–2A sheepherders the same departure requirement applicable to all H–2A workers.

Response: After carefully considering the commenters' objections, DHS has determined that it will change its policy regarding H–2A sheepherders as proposed for the reasons discussed below.

Comment: Many commenters who objected to this proposal suggested that the existing policy was developed based on the understanding that tending and caring for sheep over extensive expanses of open range for long periods of time is a skilled and exacting occupation that requires considerable training and experience.

Response: Although DHS recognizes the special nature of this unique type of agricultural work, it does not change the nonimmigrant nature of the H–2A classification. *See* INA section 101(a)(15)(H)(ii)(a), 8 U.S.C. 1101(a)(15)(H)(ii)(a). The statute provides that an H–2A worker is a nonimmigrant who has a residence in a foreign country that he has no intention of abandoning and who is coming temporarily to the United States to perform agricultural labor or services. Without a departure from the United States after reaching the 3-year maximum period of stay, an H–2A worker cannot be considered a nonimmigrant, and his or her stay cannot be considered temporary. All other H–2A workers must depart the United States after reaching the 3-year maximum period of stay, regardless of the employer's need or the degree of skill or experience required of those workers; the same rule should apply to H–2A sheepherders.

Comment: A few commenters also argued that the history of the sheep industry shows that its existing practice is in keeping with Congressional intent.

Response: DHS is aware that foreign workers skilled in sheepherding were admitted during the early 1950s for permanent employment under special laws enacted by Congress. However, Congress permitted the special laws to expire after the issuance of ''Spanish Sheepherders, Report of Subcommittee No. 1 of the Committee on the Judiciary, House of Representatives,'' a report by the House Judiciary Committee on February 14, 1957, which undertook an investigation during 1955 and 1956 to examine allegations that a number of

foreign sheepherders admitted under the special laws were leaving sheepherding shortly after arrival in the U.S. and were employed in other industries.[2] The report by the House Judiciary Committee substantiated many of these allegations. In the report, the Committee recommended ''that the practice of admitting alien sheepherders under special legislation should be discontinued and that the problem of supplying legitimate needs of the American sheep-raising and wool-growing industry, should be met administratively under existing general law, specifically under section 101(a)(15)(H)(ii), of the Immigration and Nationality Act.'' The report also states the following:

> [I]t is further believed that the employment in the sheep-raising and woolgrowing industry is not different in nature from the employment of foreign skilled workers in other branches of agriculture and industry. It is not believed that the sheepherders should benefit from a special preferential and privileged treatment and that they should be admitted as immigrants entering this country for permanent residence. Inquiries and studies have conclusively shown that the legitimate interest of American employers will be better served if workers for the sheep-raising and woolgrowing industry were admitted temporarily for appropriate periods of time, and that at the conclusion of such periods they were required to return to their country of origin and to their families, while other workers—from domestic labor sources, if available—or other foreign workers similarly skilled be given opportunity to accept temporary employment.

It was the Committee's opinion that no additional special legislation should be enacted to admit foreign sheepherders and the importation of foreign sheepherders should be governed by the H–2 temporary worker provision. DHS acknowledges that the aforementioned legislative history predates the policy established by the Immigration and Naturalization Service (INS) and now DHS to refrain from applying the three-year maximum period of stay to H–2A aliens who work as sheepherders. However, DHS has concluded that this policy is inconsistent with the temporary nature required by the statutory provisions governing H–2A program.

Comment: One commenter asked why such special procedures are available only for sheepherders. Another commenter suggested that DHS should adapt the special procedures for sheepherders to all occupations engaged in the range production of other livestock such as cattle and horses.

Response: It is believed that the policy regarding sheepherders was grandfathered from a series of bills enacted by Congress in the early 1950s to provide relief for the sheep-raising industry by making available special nonquota immigrant visas to skilled alien sheepherders. DHS disagrees that the special procedures should be extended to all occupations engaged in the range production of other livestock. DHS has determined that all H–2A occupations should be subject to the same statutory standard and that the special procedures should be curtailed rather than extended to other H–2A occupations. With the effective date of this final rule, DHS will begin to enforce on H–2A sheepherders the same departure requirement applicable to all other H–2A workers. However, DHS will not revoke any currently valid H–2A petitions that have been approved for sheepherders.

Comment: One commenter recommended that the time period required outside the country between periods of stay be reduced to two weeks for sheepherders.

Response: For the reasons stated above, DHS believes that the same statutory and regulatory standards for all other H–2A occupations should be applied to sheepherders.

15. Temporary Worker Visa Exit Program

On August 10, 2007, the Administration announced that it would establish a new land-border exit system for guest workers, starting on a pilot basis. The proposed rule included an exit system pilot program applicable to H–2A nonimmigrants. Under the proposed program, an alien admitted on an H–2A visa at a port of entry participating in the program must also depart through a port of entry participating in the program and present designated biographic and/or biometric information upon departure. Details of the program, such as designated ports of entry, would be announced in a notice published in the **Federal Register**.

Comments: A few comments generally supported the proposal or encouraged more strict measures to ensure foreign workers' departure within their authorized periods of stay. However, many commenters criticized this proposal for singling out the H–2A population and unfairly seeking to punish them by imposing an undue burden on them. They suggested that workers should be permitted to use all ports to enter the United States and should not be required to depart through the same ports of entry through which they entered because the original port of entry through which they entered may not be the most convenient if workers transfer to another employer. Some commenters pointed out that it would be difficult to effectively educate H–2A workers about the required method for exit, which will likely cause them to violate the requirement inadvertently. Many commenters expressed concerns about the unknown factors of the program such as the number and location of ports through which a worker can enter and return, timeliness of the process, and overall convenience or inconvenience for a worker. Others suggested that DHS should provide sufficient time and opportunities to answer stakeholders' concerns or questions.

Response: DHS has determined that it will adopt, with due consideration of commenters' concerns, the Temporary Worker Visa Exit Program Pilot for H–2A workers in this final rule. *See* new 8 CFR 215.9. DHS will inform H–2A workers of their obligations through an educational effort among the workers, foreign governments, agricultural industry, association leaders, and U.S. employers. Before implementation of the program, DHS will implement a comprehensive communications program that engages stakeholders and reaches travelers. This communications program may include giving walk-away materials to H–2A workers when they enter the country and utilizing outreach methods such as creating customer-focused products and proactive/reactive media relations program.

Under the H–2A land exit pilot program, DHS will explore ways that participating workers can register their final departure from the United States at select ports of entry. Only those workers who enter through these designated ports will be required to register their final departure for purposes of this pilot.

III. Rulemaking Requirements

A. Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Act of 1996. This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

[2] *http://www.foreignlaborcert.doleta.gov/fm/fm_24-01.htm.*

B. Executive Order 12866

This rule has been designated as significant under Executive Order 12866. Thus, under section 6(a)(3)(C) of the Executive Order, DHS is required to prepare an assessment of the benefits and costs anticipated to occur as a result of this regulatory action and provide the assessment to the Executive Office of the President, Office of Management and Budget, Office of Information and Regulatory Affairs.

1. Public Comments on the Estimated Costs and Benefits of the Proposed Rule

DHS invited the public to comment on the extent of any potential economic impact of this rule on small entities, the scope of these costs, or more accurate means for defining these costs. As a result, DHS received one comment directly related to the regulatory cost benefit analysis performed for the proposed rule which indicated that woolgrowers would have to hire double the number of employees as they currently do and that expenses would increase by at least 25 to 50 percent for each sheepherder employer. The comment provided no supporting data or calculations to explain exactly how this result would occur, and USCIS was unable to determine how the outcome of a requirement for an employee to go home for 3 months every 3 years would result in a doubling of the number of annual employees. Therefore, no changes were made as a result of the comment.

2. Summary of Final Rule Impacts

In summary, this rule makes several changes to the H–2A visa program that DHS believes are necessary to encourage and facilitate the lawful employment of foreign temporary and seasonal agricultural workers. A complete analysis has been performed in accordance with the Executive Order and is available for review in the rulemaking docket for this rule at *http://www.regulations.gov*. The results of the cost benefit analysis are summarized as follows:

i. Government Costs

The exit pilot program provided for in this rule will cost the Federal Government at least $2 million in labor costs per year to implement.

ii. Transferred Costs

A total cost of between $16.5 million and $55 million will be imposed on all H–2A petitioning firms for all H–2A workers each year as a result of this rule banning placement fee payments by employees. Those costs may range from an average of around $1,700 to almost $6,000 per employer, based on the average number of H–2A workers requested per employer petition. The total annual costs of the time for H–2A employees to comply with the exit requirements of this rule are estimated to be around $184,332, based on the opportunity cost of the time lost to the employer while registering.

The annual information collection costs imposed by the employer notification requirements in this rule are estimated to be $13,713.

The volume of applications is expected to increase from an average of 6,300 per year to around 9,900 per year. The burden of compliance both in time and fees per application will not increase above that currently imposed as a result of this rule.

iii. Benefits

This rule will benefit applicants by:

- Reducing delays caused by Interagency Border Inspection System (IBIS) checks holding up the petition application process.
- Reducing disruption of the life and affairs of H–2A workers in the United States.
- Protecting laborers' rights by precluding payment of some fees by the alien.
- Prevent the filing of requests for more workers than needed, visa selling, coercion of alien workers and their family members, or other practices that exploit workers and stigmatize the H–2A program.
- Encouraging employers who currently hire seasonal agricultural workers who are not properly authorized to work in the United States to replace those workers with legal workers.
- Minimizing immigration fraud and human trafficking.

C. Executive Order 13132

This rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

D. Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform,'' 61 FR 4729 (February 7, 1996), imposes on Executive agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. With regard to the review required by section 3(a), section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) Clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DHS has completed the required review and determined that, to the extent permitted by law, this final rule meets the relevant standards of Executive Order 12988.

E. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), requires Federal agencies to conduct a regulatory flexibility analysis which describes the impact of a rule on small entities whenever an agency is publishing a notice of proposed rulemaking. In accordance with the RFA, DHS certifies that this rule will not have a significant economic impact on a substantial number of small entities.

1. Number of Regulated Entities

The H–2A program is used mainly by farms engaged in the production of livestock, livestock products, field crops, row crops, tree crops, and various other enterprises. The affected industries do not include support activities for agriculture. Therefore, in accordance with the RFA, USCIS has identified the industry affected by this rule as described in the North American Industry Classification System (NAICS) as encompassing NAICS subsectors 111,

Crop Production, and 112, Animal Production.[3]

In fiscal year 2007, USCIS received 6,212 Form I–129 petitions for H–2A employees, approved petitions for 78,089 H–2A workers, and 71,000 new workers were hired. In fiscal year 2006, USCIS received 5,667 Form I–129 petitions and approved 5,448 of them for 56,183 workers. Also, in fiscal year 2006, 6,717 employers requested certification from the Department of Labor (DOL) for 64,146 H–2A workers, and for those workers, the Department of State (DOS) issued 37,149 H–2A visas. In fiscal year 2005, USCIS approved Form I–129 petitions for 49,229 workers, 6,725 employers requested certification from DOL for 50,721 employees, and 31,892 visas were issued by DOS. Thus, in recent years, USCIS has received approximately 6,300 petitions per year for an average of 70,000 total H–2A workers per year. This rule is projected to result in an approximately 40,000 additional H–2A workers and 3,600 new Form I–129 petitions per year, for a total of 9,900 petitions for a total of 110,000 workers. In 2006, there were 2,089,790 farms in the United States and about 752,000 workers employed in agricultural jobs. Thus, approximately 0.47 percent of all farmers are expected to use the H–2A program and 14.6 percent of all farm workers will be aliens employed under the H–2A program.

2. Size Categories of Affected Entities

The U.S. Small Business Administration (SBA) Small Business Size Regulations at 13 CFR part 121 provide that farms with average annual receipts of less than $750,000 qualify as a small business for Federal Government programs. According to the United States Department of Agriculture National Agricultural Statistics Service (NASS), 44,348, or 2.1 percent, of the 2,128,982 farms in 2002 in the U.S. had gross cash receipts of more than $500,000 and 97.9 percent of farms have sales of less than $500,000.[4] Based on these numbers, USCIS concludes that the majority of entities affected by this rule are categorized as small entities according to the SBA size standards.

The average of 11 foreign workers per year would require an expenditure of about $141,000 in annual labor expenses just for the farm's foreign workers, not including benefits. In the 2002 Census of Agriculture, 50,311 farms, or only 2.4 percent of all ''farms'' reported having any hired employees at all, and only 31,210 farms, or 1.5 percent of all farms, reported hired labor expenses in excess of $100,000 per year. Also, the 9,900 annual petitions that DHS projects it will receive after this rule takes effect represent only one-half of one percent of the 2,128,982 farms in 2002, and the 110,000 annual H–2A nonimmigrant workers account for only 14.6 percent of the 824,030 total hired farm workers reported in the 2002 Agricultural Census. Further, the 2002 Census reported that 53.3 percent of all farms reported a net loss, and only 329,490 farms reported annual net income of more than $25,000.[5] Taken together, these data indicate that for the farms that use the H–2A program to be viable, they are likely to be on the upper bounds of the small business size standard of $750,000 in gross cash receipts.

3. Other Firms That May Be Affected by This Change

A number of firms with headquarters or a significant presence in the United States recruit employees in the employees' home countries to come to the United States for temporary employment. Also, many farms hire an agent in the U.S. to help them locate workers and complete applications and petitions. Some agents collect an initial retainer from an employer and then charge additional fees based on the number of workers, the application fees, the advertising costs required, and other expenses. The total charges an employer pays the agent per H–2A employee ranges from around $500 to $4,000, including travel expenses and all application and petition fees. The actual cost depends on the home country, the skills needed for the position, and the general complexity of the worker's and employer's respective situations. This rule will not affect the ability of the recruiter or agent to collect a fee from the employer. This rule does not affect the fee agents may charge per employee to process the employer's DOL, DOS, and DHS certification, application, and petition. This rule would only affect recruiting firms to the extent that it would render the employee ineligible for H–2A employment by collecting a fee, as soon as the potential employer becomes aware that the recruiter or agent has charged the employee a fee.

4. Significance of Impact

DHS has determined that this rule will require affected employers to pay between $150 and $500 per employee because recruiter fees that are now being paid by employees will be shifted by recruiters from employees to employers. This rule will also add $13,713 in information collection costs for absconder reporting for an average cost per employee of $0.13. Based on an average of 11 employees hired by each H–2A petitioner, average costs added by this rule will be between $1,651 and $5,501 per affected entity. For the purpose of determining the significance of the impacts of this rule, this analysis uses the costs at the high end of the range of possible impacts, or $5,501 per employer, in order that any errors in determining the impacts on small entities be on the side of an over-estimation. Again, most of the affected entities are classified as small.

Guidelines suggested by the SBA Office of Advocacy provide that, to illustrate the impact could be significant, the cost of the proposed regulation may exceed 1 percent of the gross revenues of the entities in a particular sector or 5 percent of the labor costs of the entities in the sector.

The average duration of H–2A employment based on the difference between employment start and end dates for workers granted H–2A status in fiscal years 2007 and 2008 was 236 days. Thus, a new H–2A employee in 2008 worked an average of 33.7 weeks. Assuming that the typical employee worked an 8 hour workday and took two days per week off from work, the employee would have worked 169 days and accrued 1,352 hours. Using the U.S. Department of Labor hourly wage rate for the H–2A worker of $9.49, plus a multiplier of 1.4 to account for fringe benefits, DHS calculated the average hourly wage at approximately $13.29.[6] Multiplying the hourly compensation costs by the hours worked provides an average compensation cost for an H–2A employee for the period he or she is in the United States of about $17,968. If the employer is required to pay a recruiter or reimburse the employee $500 for a recruiting fee, and if that employee absconds requiring the employer to file a report, the added cost of $501 is only 2.78 percent of the $17,968 annual salary for only one H–2A worker. Since the cost increase per H–2A employee is less than 5 percent of

[5] Economic Class of Farms by Market Value of Agricultural Products Sold and Government Payments: 2002 *http://www.nass.usda.gov/census/census02/volume1/us/st99_1_003_003.pdf.*

[6] Available at: *http://www.dol.gov/compliance/topics/wages-foreign-workers.htm.*

the costs associated with hiring only an H–2A worker, it would not be possible for the average cost increase imposed by this rule to exceed 5 percent of the average labor costs of the sector, because, among other reasons, H–2A workers are not expected to make up the entire workforce of all petitioners.

Also, as stated above, guidelines provided by the SBA Office of Advocacy suggest that an added cost of more than one percent of the gross revenues of the affected entities in a particular sector may be a significant impact. USCIS believes that it is unlikely that an employer will incur costs of $5,501 due to this rulemaking, as it is the high end of the range of possible costs. Again, if each firm affected by this rule hires the average of 11 workers and all 11 are recruited by a firm that charges or causes the employer to reimburse all 11 employees $500, the additional cost of this rule could reach as high as $5,500 per employer.

The actual revenue of the typical H–2A employer is unknown. However, according to the SBA table of size standards in the Small Business Size Regulations (13 CFR part 121), the annual gross revenue threshold for farms is $750,000. USCIS believes that the farms that use the H–2A program are likely to be on the upper bounds of the small business size standard of $750,000 in gross cash receipts. If an employer hires 11 employees and incurs recruiting costs of $500 for every one of them, the $5,500 added cost represents only 0.73 percent of $750,000. To further illustrate, for $5,500 to exceed one percent of annual revenues, sales would have to be $550,000 per year or less. While 97.9 percent of all farms have annual sales of less than $500,000, only 36 percent of all farms hire any employees. USCIS believes that farms below annual sales of $500,000 would be very unlikely to hire 11 temporary seasonal employees and incur the $5,500 in added costs. Therefore, USCIS believes that the costs of this rulemaking to small entities will not exceed one percent of annual revenues.

Therefore, using both average annual labor costs and the percentage of the affected entities' annual revenue stream as guidelines, USCIS concludes that this rule will not have a significant economic impact on a substantial number of small entities.

5. Impact on U.S.-Based Recruiting Firms

As outlined above, recruiting firms' activities may be affected tangentially by this rule's provisions. Nonetheless, the effect of the fee prohibition on recruiting companies, staffing firms, or employment agents is not a new compliance requirement on regulated entities. Establishment of a non-immigrant temporary worker program was intended to alleviate seasonal labor shortages. The formation of firms that recruit workers in foreign countries is an unintended consequence of these programs since those firms are not the intended recipients of the benefits that are supposed to inure to participants in those programs. In any event, DHS does not believe the prohibition on charging aliens for H–2A job referrals will cause a significant economic impact on the affected placement, recruiting, or staffing firms because they may, and are expected to, transfer those costs to the employers, as analyzed above.

6. Certification

For these reasons, DHS certifies that this rule will not have a significant economic impact on a substantial number of small entities.

F. Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

G. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995, Public Law 104–13, 109 Stat. 163 (1995) (PRA), all Departments are required to submit to the Office of Management and Budget (OMB), for review and approval, any reporting or record-keeping requirements inherent in a rule. It is estimated that this rule will require employers to file 3,600 more petitions using Form I–129 (OMB Control No. 1615–0009) for H–2A workers. In addition, this rule will require revisions to the Form I–129 (H Classification Supplement to the Form I–129).

This is a final rule and the revision to this information collection was not previously submitted and approved by OMB. USCIS is now requesting comments under the emergency review and clearance procedures of the PRA on this revision no later than February 17, 2009. When submitting comments on the information collection, your comments should address one or more of the following four points:

1. Evaluate whether the collection of information is necessary for the proper performance of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of the information on those who are to respond, including through the use of any and all appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of Information Collection for Form I–129.

a. *Type of information collection:* Revision of currently approved collection.

b. *Title of Form/Collection:* Petition for Nonimmigrant Worker.

c. *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* Form I–129 (H Classification Supplement to the Form I–129), and U.S. Citizenship and Immigration Services.

d. *Affected public who will be asked or required to respond, as well as a brief abstract: Individuals or Households.* This form is used by an employer to petition for aliens to come to the U.S. temporarily to perform services, labor, and training or to request extensions of stay or changes in nonimmigrant status for nonimmigrant workers.

e. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 368,548 respondents at 2.75 hours per response.

f. *An estimate of the total of public burden (in hours) associated with the collection:* Approximately 1,013,507 burden hours.

All comments and suggestions or questions regarding additional information should be directed to the Department of Homeland Security, U.S. Citizenship and Immigration Services, Regulatory Management Division, 111 Massachusetts Avenue, NW., 3rd Floor, Washington, DC 20529, Attention: Chief, 202–272–8377.

In addition, this rule will allow employers of H–2A employees to employ H–2A workers for up to 120 days while they are awaiting an extension of status based on a new employer if the employer registers for E-Verify. It is estimated that 9,801 more firms will have to enroll in E-Verify so they may hire an employee under the

120-day extended authorization. Accordingly, USCIS will submit an OMB correction worksheet (OMB 83–C) to OMB increasing the number of respondents, burden hours and annual costs.

List of Subjects

8 CFR Part 214

Administrative practice and procedure, Aliens, Cultural exchange programs, Employment, Foreign officials, Health professions, Reporting and recordkeeping requirements, Students, Victims.

8 CFR Part 215

Administrative practice and procedure, Aliens.

8 CFR Part 274a

■ Accordingly, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 214—NONIMMIGRANT CLASSES

■ 1. The authority citation for part 214 is revised to read as follows:

Authority: 8 U.S.C. 1101, 1102, 1103, 1182, 1184, 1185, 1186a, 1187, 1221, 1253, 1281, 1282, 1301–1305 and 1372; section 643, Pub. L. 104–208, 110 Stat. 3009–708; Pub. L. 106–386, 114 Stat. 1477–1480; section 141 of the Compacts of Free Association with the Federated States of Micronesia and the Republic of the Marshall Islands, and with the Government of Palau, 48 U.S.C. 1901 note, and 1931 note, respectively; 8 CFR part 2.

■ 2. Section 214.2 is amended by:
■ a. Revising paragraphs (h)(2)(i)(A) through (D);
■ b. Revising paragraph (h)(2)(iii);
■ c. Revising paragraphs (h)(5)(i)(A) through (C);
■ d. Adding a new paragraph (h)(5)(i)(F);
■ e. Removing last sentence from (h)(5)(ii);
■ f. Revising paragraph (h)(5)(v)(B);
■ g. Revising paragraph (h)(5)(v)(C);
■ h. Revising paragraph (h)(5)(vi);
■ i. Revising paragraphs (h)(5)(viii)(A) through (C);
■ j. Revising paragraph (h)(5)(ix);
■ k. Revising paragraph (h)(5)(x);
■ l. Adding new paragraphs (h)(5)(xi) and (xii);
■ m. Adding a new sentence to the end of paragraph (h)(11)(i)(A); and by
■ n. Revising paragraph (h)(11)(ii).

The revisions and additions read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

(h) * * *

(2) * * *

(i) * * *

(A) *General.* A United States employer seeking to classify an alien as an H–1B, H–2A, H–2B, or H–3 temporary employee must file a petition on Form I–129, Petition for Nonimmigrant Worker, as provided in the form instructions.

(B) *Service or training in more than one location.* A petition that requires services to be performed or training to be received in more than one location must include an itinerary with the dates and locations of the services or training and must be filed with USCIS as provided in the form instructions. The address that the petitioner specifies as its location on the Form I–129 shall be where the petitioner is located for purposes of this paragraph.

(C) *Services or training for more than one employer.* If the beneficiary will perform nonagricultural services for, or receive training from, more than one employer, each employer must file a separate petition with USCIS as provided in the form instructions.

(D) *Change of employers.* If the alien is in the United States and seeks to change employers, the prospective new employer must file a petition on Form I–129 requesting classification and an extension of the alien's stay in the United States. If the new petition is approved, the extension of stay may be granted for the validity of the approved petition. The validity of the petition and the alien's extension of stay must conform to the limits on the alien's temporary stay that are prescribed in paragraph (h)(13) of this section. Except as provided by 8 CFR 274a.12(b)(21) or section 214(n) of the Act, 8 U.S.C. 1184(n), the alien is not authorized to begin the employment with the new petitioner until the petition is approved. An H–1C nonimmigrant alien may not change employers.

* * * * *

(iii) *Naming beneficiaries.* H–1B, H–1C, and H–3 petitions must include the name of each beneficiary. All H–2A and H–2B petitions must include the name of each beneficiary who is currently in the United States, but not the name of those beneficiaries who are not currently in the United States. However, a petitioner filing an H–2B petition on behalf of workers who are not present in the United States that is supported by a temporary labor certification requiring education, training, experience, or special requirements of the beneficiary, must name all the requested workers in the petition. Unnamed beneficiaries must be shown on the petition by total number. If all of the beneficiaries covered by an H–2A or H–2B temporary labor certification have not been identified at the time a petition is filed, multiple petitions for subsequent beneficiaries may be filed at different times but must include a copy of the same temporary labor certification. Each petition must reference all previously filed petitions for that temporary labor certification. All H–2A petitions on behalf of workers who are not from a country that has been designated as a participating country in accordance with paragraph (h)(5)(i)(F)(1) of this section must individually name all the workers in the petition who fall within this category. All H–2A petitions must state the nationality of all beneficiaries, whether or not named, even if there are beneficiaries from more than one country. H–2A petitions for workers from designated participating countries and non-designated countries should be filed separately.

* * * * *

(5) * * *

(i) * * *

(A) *General.* An H–2A petition must be filed on Form I–129 with a single valid temporary agricultural labor certification. The petition may be filed by either the employer listed on the temporary labor certification, the employer's agent, or the association of United States agricultural producers named as a joint employer on the temporary labor certification.

(B) *Multiple beneficiaries.* The total number of beneficiaries of a petition or series of petitions based on the same temporary labor certification may not exceed the number of workers indicated on that document. A single petition can include more than one beneficiary if the total number does not exceed the number of positions indicated on the relating temporary labor certification.

(C) [Reserved]

* * * * *

(F) *Eligible Countries.* (*1*)(*i*) H–2A petitions may only be approved for nationals of countries that the Secretary of Homeland Security has designated as participating countries, with the concurrence of the Secretary of State, in a notice published in the **Federal Register**, taking into account factors, including but not limited to:

(*A*) The country's cooperation with respect to issuance of travel documents for citizens, subjects, nationals and residents of that country who are subject to a final order of removal;

(*B*) The number of final and unexecuted orders of removal against

citizens, subjects, nationals and residents of that country;

(*C*) The number of orders of removal executed against citizens, subjects, nationals and residents of that country; and

(*D*) Such other factors as may serve the U.S. interest.

(*ii*) A national from a country not on the list described in paragraph (h)(5)(i)(F)(*1*)(*i*) of this section may be a beneficiary of an approved H–2A petition upon the request of a petitioner or potential H–2A petitioner, if the Secretary of Homeland Security, in his sole and unreviewable discretion, determines that it is in the U.S. interest for that alien to be a beneficiary of such petition. Determination of such a U.S. interest will take into account factors, including but not limited to:

(*A*) Evidence from the petitioner demonstrating that a worker with the required skills is not available either from among U.S. workers or from among foreign workers from a country currently on the list described in paragraph (h)(5)(i)(F)(*1*)(*i*) of this section;

(*B*) Evidence that the beneficiary has been admitted to the United States previously in H–2A status;

(*C*) The potential for abuse, fraud, or other harm to the integrity of the H–2A visa program through the potential admission of a beneficiary from a country not currently on the list; and

(*D*) Such other factors as may serve the U.S. interest.

(*2*) Once published, any designation of participating countries pursuant to paragraph (h)(5)(i)(F)(*1*)(*i*) of this section shall be effective for one year after the date of publication in the **Federal Register** and shall be without effect at the end of that one-year period.

* * * * *

(v) * * *

(B) *Evidence of employment/job training.* For petitions with named beneficiaries, a petition must be filed with evidence that the beneficiary met the certification's minimum employment and job training requirements, if any are prescribed, as of the date of the filing of the labor certification application. For petitions with unnamed beneficiaries, such evidence must be submitted at the time of a visa application or, if a visa is not required, at the time the applicant seeks admission to the United States. Evidence must be in the form of the past employer or employers' detailed statement(s) or actual employment documents, such as company payroll or tax records. Alternately, a petitioner must show that such evidence cannot be obtained, and submit affidavits from persons who worked with the beneficiary that demonstrate the claimed employment or job training.

(C) *Evidence of education and other training.* For petitions with named beneficiaries, a petition must be filed with evidence that the beneficiary met all of the certification's post-secondary education and other formal training requirements, if any are prescribed in the labor certification application as of date of the filing of the labor certification application. For petitions with unnamed beneficiaries, such evidence must be submitted at the time of a visa application or, if a visa is not required, at the time the applicant seeks admission to the United States. Evidence must be in the form of documents, issued by the relevant institution(s) or organization(s), that show periods of attendance, majors and degrees or certificates accorded.

(vi) *Petitioner consent and notification requirements*—(A) *Consent.* In filing an H–2A petition, a petitioner and each employer consents to allow access to the site by DHS officers where the labor is being performed for the purpose of determining compliance with H–2A requirements.

(B) *Agreements.* The petitioner agrees to the following requirements:

(*1*) To notify DHS, within 2 workdays, and beginning on a date and in a manner specified in a notice published in the **Federal Register** if:

(*i*) An H–2A worker fails to report to work within 5 workdays of the employment start date on the H–2A petition or within 5 workdays of the start date established by his or her employer, whichever is later;

(*ii*) The agricultural labor or services for which H–2A workers were hired is completed more than 30 days earlier than the employment end date stated on the H–2A petition; or

(*iii*) The H–2A worker absconds from the worksite or is terminated prior to the completion of agricultural labor or services for which he or she was hired.

(*2*) To retain evidence of such notification and make it available for inspection by DHS officers for a 1-year period beginning on the date of the notification. To retain evidence of a different employment start date if it is changed from that on the petition by the employer and make it available for inspection by DHS officers for the 1-year period beginning on the newly-established employment start date.

(*3*) To pay $10 in liquidated damages for each instance where the employer cannot demonstrate that it has complied with the notification requirements, unless, in the case of an untimely notification, the employer demonstrates with such notification that good cause existed for the untimely notification, and DHS, in its discretion, waives the liquidated damages amount.

(C) *Process.* If DHS has determined that the petitioner has violated the notification requirements in paragraph (h)(5)(vi)(B)(1) of this section and has not received the required notification, the petitioner will be given written notice and 30 days to reply before being given written notice of the assessment of liquidated damages.

(D) *Failure to pay liquidated damages.* If liquidated damages are not paid within 10 days of assessment, an H–2A petition may not be processed for that petitioner or any joint employer shown on the petition until such damages are paid.

(E) *Abscondment.* An H–2A worker has absconded if he or she has not reported for work for a period of 5 consecutive workdays without the consent of the employer.

* * * * *

(viii) * * *

(A) *Effect of violations of status.* An alien may not be accorded H–2A status who, at any time during the past 5 years, USCIS finds to have violated, other than through no fault of his or her own (e.g., due to an employer's illegal or inappropriate conduct), any of the terms or conditions of admission into the United States as an H–2A nonimmigrant, including remaining beyond the specific period of authorized stay or engaging in unauthorized employment.

(B) *Period of admission.* An alien admissible as an H–2A nonimmigrant shall be admitted for the period of the approved petition. Such alien will be admitted for an additional period of up to one week before the beginning of the approved period for the purpose of travel to the worksite, and a 30-day period following the expiration of the H–2A petition for the purpose of departure or to seek an extension based on a subsequent offer of employment. Unless authorized under 8 CFR 274a.12 or section 214(n) of the Act, the beneficiary may not work except during the validity period of the petition.

(C) *Limits on an individual's stay.* Except as provided in paragraph (h)(5)(viii)(B) of this section, an alien's stay as an H–2A nonimmigrant is limited by the term of an approved petition. An alien may remain longer to engage in other qualifying temporary agricultural employment by obtaining an extension of stay. However, an individual who has held H–2A status for a total of 3 years may not again be

granted H–2A status until such time as he or she remains outside the United States for an uninterrupted period of 3 months. An absence from the United States can interrupt the accrual of time spent as an H–2A nonimmigrant against the 3-year limit. If the accumulated stay is 18 months or less, an absence is interruptive if it lasts for at least 45 days. If the accumulated stay is greater than 18 months, an absence is interruptive if it lasts for at least 2 months. Eligibility under paragraph (h)(5)(viii)(C) of this section will be determined in admission, change of status or extension proceedings. An alien found eligible for a shorter period of H–2A status than that indicated by the petition due to the application of this paragraph (h)(5)(viii)(C) of this section shall only be admitted for that abbreviated period.

(ix) *Substitution of beneficiaries after admission.* An H–2A petition may be filed to replace H–2A workers whose employment was terminated earlier than the end date stated on the H–2A petition and before the completion of work; who fail to report to work within five days of the employment start date on the H–2A petition or within five days of the start date established by his or her employer, whichever is later; or who abscond from the worksite. The petition must be filed with a copy of the certification document, a copy of the approval notice covering the workers for which replacements are sought, and other evidence required by paragraph (h)(5)(i)(D) of this section. It must also be filed with a statement giving each terminated or absconded worker's name, date and country of birth, termination date, and the reason for termination, and the date that USCIS was notified that the alien was terminated or absconded, if applicable. A petition for a replacement will not be approved where the requirements of paragraph (h)(5)(vi) of this section have not been met. A petition for replacements does not constitute the notification required by paragraph (h)(5)(vi)(B)(*1*) of this section.

(x) *Extensions in emergent circumstances.* In emergent circumstances, as determined by USCIS, a single H–2A petition may be extended for a period not to exceed 2 weeks without an additional approved labor certification if filed on behalf of one or more beneficiaries who will continue to be employed by the same employer that previously obtained an approved petition on the beneficiary's behalf, so long as the employee continues to perform the same duties and will be employed for no longer than 2 weeks after the expiration of previously-approved H–2A petition. The previously approved H–2A petition must have been based on an approved temporary labor certification, which shall be considered to be extended upon the approval of the extension of H–2A status.

(xi) *Treatment of petitions and alien beneficiaries upon a determination that fees were collected from alien beneficiaries.* (A) *Denial or revocation of petition.* As a condition to approval of an H–2A petition, no job placement fee or other compensation (either direct or indirect) may be collected at any time, including before or after the filing or approval of the petition, from a beneficiary of an H–2A petition by a petitioner, agent, facilitator, recruiter, or similar employment service as a condition of H–2A employment (other than the lesser of the fair market value or actual costs of transportation and any government-mandated passport, visa, or inspection fees, to the extent that the payment of such costs and fees by the beneficiary is not prohibited by statute or Department of Labor regulations, unless the employer agent, facilitator, recruiter, or employment service has agreed with the alien to pay such costs and fees).

(*1*) If USCIS determines that the petitioner has collected, or entered into an agreement to collect, such prohibited fee or compensation, the H–2A petition will be denied or revoked on notice unless the petitioner demonstrates that, prior to the filing of the petition, the petitioner has reimbursed the alien in full for such fees or compensation, or, where such fee or compensation has not yet been paid by the alien worker, that the agreement has been terminated.

(*2*) If USCIS determines that the petitioner knew or should have known at the time of filing the petition that the beneficiary has paid or agreed to pay any facilitator, recruiter, or similar employment service such fees or compensation as a condition of obtaining the H–2A employment, the H–2A petition will be denied or revoked on notice unless the petitioner demonstrates that, prior to the filing of the petition, the petitioner or the facilitator, recruiter, or similar employment service has reimbursed the alien in full for such fees or compensation or, where such fee or compensation has not yet been paid by the alien worker, that the agreement has been terminated.

(*3*) If USCIS determines that the beneficiary paid the petitioner such fees or compensation as a condition of obtaining the H–2A employment after the filing of the H–2A petition, the petition will be denied or revoked on notice.

(*4*) If USCIS determines that the beneficiary paid or agreed to pay the agent, facilitator, recruiter, or similar employment service such fees or compensation as a condition of obtaining the H–2A employment after the filing of the H–2A petition and with the knowledge of the petitioner, the petition will be denied or revoked unless the petitioner demonstrates that the petitioner or facilitator, recruiter, or similar employment service has reimbursed the beneficiary in full or where such fee or compensation has not yet been paid by the alien worker, that the agreement has been terminated, or notifies DHS within 2 workdays of obtaining knowledge in a manner specified in a notice published in the **Federal Register**.

(B) *Effect of petition revocation.* Upon revocation of an employer's H–2A petition based upon paragraph (h)(5)(xi)(A) of this section, the alien beneficiary's stay will be authorized and the alien will not accrue any period of unlawful presence under section 212(a)(9) of the Act (8 U.S.C. 1182(a)(9)) for a 30-day period following the date of the revocation for the purpose of departure or extension of stay based upon a subsequent offer of employment.

(C) *Reimbursement as condition to approval of future H–2A petitions.* (*1*) *Filing subsequent H–2A petitions within 1 year of denial or revocation of previous H–2A petition.* A petitioner filing an H–2A petition within 1 year after the decision denying or revoking on notice an H–2A petition filed by the same petitioner on the basis of paragraph (h)(5)(xi)(A) of this section must demonstrate to the satisfaction of USCIS, as a condition of approval of such petition, that the petitioner or agent, facilitator, recruiter, or similar employment service has reimbursed the beneficiary in full or that the petitioner has failed to locate the beneficiary. If the petitioner demonstrates to the satisfaction of USCIS that the beneficiary was reimbursed in full, such condition of approval shall be satisfied with respect to any subsequently filed H–2A petitions, except as provided in paragraph (h)(5)(xi)(C)(*2*). If the petitioner demonstrates to the satisfaction of USCIS that it has made reasonable efforts to locate the beneficiary with respect to each H–2A petition filed within 1 year after the decision denying or revoking the previous H–2A petition on the basis of paragraph (h)(5)(xi)(A) of this section but has failed to do so, such condition of approval shall be deemed satisfied with respect to any H–2A petition filed 1 year or more after the denial or revocation. Such reasonable efforts shall

include contacting any of the beneficiary's known addresses.

(*2*) *Effect of subsequent denied or revoked petitions.* An H–2A petition filed by the same petitioner subsequent to a denial under paragraph (h)(5)(xi)(A) of this section shall be subject to the condition of approval described in paragraph (h)(5)(xi)(C)(*1*) of this section, regardless of prior satisfaction of such condition of approval with respect to a previously denied or revoked petition.

(xii) *Treatment of alien beneficiaries upon revocation of labor certification.* The approval of an employer's H–2A petition is immediately and automatically revoked if the Department of Labor revokes the labor certification upon which the petition is based. Upon revocation of an H–2A petition based upon revocation of labor certification, the alien beneficiary's stay will be authorized and the alien will not accrue any period of unlawful presence under section 212(a)(9) of the Act for a 30-day period following the date of the revocation for the purpose of departure or extension of stay based upon a subsequent offer of employment.

* * * * *

(11) * * *

(i) * * *

(A) * * * However, H–2A petitioners must send notification to DHS pursuant to paragraph (h)(5)(vi) of this section.

* * * * *

(ii) *Immediate and automatic revocation.* The approval of any petition is immediately and automatically revoked if the petitioner goes out of business, files a written withdrawal of the petition, or the Department of Labor revokes the labor certification upon which the petition is based.

* * * * *

PART 215—CONTROLS OF ALIENS DEPARTING FROM THE UNITED STATES

■ 3. The authority citation for part 215 continues to read as follows:

Authority: 8 U.S.C. 1104; 1184; 1185 (pursuant to Executive Order 13323, published January 2, 2004), 1365a note, 1379, 1731–32.

■ 4. Section 215.9 is added to read as follows:

§ 215.9 Temporary Worker Visa Exit Program.

An alien admitted on an H–2A visa at a port of entry participating in the Temporary Worker Visa Exit Program must also depart at the end of his or her authorized period of stay through a port of entry participating in the program and present designated biographic and/or biometric information upon departure. U.S. Customs and Border Protection will establish a pilot program by publishing a Notice in the **Federal Register** designating which H–2A workers must participate in the Temporary Worker Visa Exit Program, which ports of entry are participating in the program, which biographical and/or biometric information would be required, and the format for submission of that information by the departing designated temporary workers.

PART 274a—CONTROL OF EMPLOYMENT OF ALIENS

■ 5. The authority citation for part 274a continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1324a; 8 CFR part 2.

■ 6. Section 274a.12 is amended by:

■ a. Removing the word ''or'' at the end of paragraph (b)(19);

■ b. Removing the period at the end of paragraph (b)(20), and adding ''; or'' in its place; and by

■ c. Adding a new paragraph (b)(21). The addition reads as follows:

§ 274a.12 Classes of aliens authorized to accept employment.

* * * * *

(b) * * *

(21) A nonimmigrant alien within the class of aliens described in 8 CFR 214.2(h)(1)(ii)(C) who filed an application for an extension of stay pursuant to 8 CFR 214.2 during his or her period of admission. Such alien is authorized to be employed by a new employer that has filed an H–2A petition naming the alien as a beneficiary and requesting an extension of stay for the alien for a period not to exceed 120 days beginning from the ''Received Date'' on Form I–797 (Notice of Action) acknowledging receipt of the petition requesting an extension of stay, provided that the employer has enrolled in and is a participant in good standing in the E-Verify program, as determined by USCIS in its discretion. Such authorization will be subject to any conditions and limitations noted on the initial authorization, except as to the employer and place of employment. However, if the District Director or Service Center director adjudicates the application prior to the expiration of this 120-day period and denies the application for extension of stay, the employment authorization under this paragraph (b)(21) shall automatically terminate upon 15 days after the date of the denial decision. The employment authorization shall also terminate automatically if the employer fails to remain a participant in good standing in the E-Verify program, as determined by USCIS in its discretion.

Paul A. Schneider,

Deputy Secretary.

[FR Doc. E8–29888 Filed 12–12–08; 8:45 am]

BILLING CODE 4410–10–P

DEPARTMENT OF JUSTICE

Executive Office for Immigration Review

8 CFR Parts 1001, 1003, 1292

[Docket No. EOIR 160F; A.G. Order No. 3028–2008]

RIN 1125–AA59

Professional Conduct for Practitioners—Rules and Procedures, and Representation and Appearances

AGENCY: Executive Office for Immigration Review, Justice.

ACTION: Final rule.

SUMMARY: This final rule adopts, in part, the proposed changes to the rules and procedures concerning the standards of representation and professional conduct for practitioners who appear before the Executive Office for Immigration Review (EOIR), which includes the immigration judges and the Board of Immigration Appeals (Board). It also clarifies who is authorized to represent and appear on behalf of individuals in proceedings before the Board and the immigration judges. Current regulations set forth who may represent individuals in proceedings before EOIR and also set forth the rules and procedures for imposing disciplinary sanctions against practitioners who engage in criminal, unethical, or unprofessional conduct, or in frivolous behavior before EOIR. The final rule increases the number of grounds for discipline, improves the clarity and uniformity of the existing rules, and incorporates miscellaneous technical and procedural changes. The changes herein are based upon the Attorney General's initiative for improving the adjudicatory processes for the immigration judges and the Board, as well as EOIR's operational experience in administering the disciplinary program since the current process was established in 2000.

DATES: *Effective date:* This rule is effective January 20, 2009.

FOR FURTHER INFORMATION CONTACT: John N. Blum, Acting General Counsel, Executive Office for Immigration Review, 5107 Leesburg Pike, Suite 2600,

Falls Church, Virginia 22041, telephone (703) 305–0470 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

I. Public Participation

On July 30, 2008, the Attorney General published a proposed rule in the **Federal Register** (73 FR 44178). The comment period ended September 29, 2008. Comments were received from four commenters, including a local bar association, a national immigration lawyer association, and two attorneys. Because some comments overlap, and three of the commenters covered multiple topics, the comments are addressed by topic, rather than by reference to each specific comment and commenter. The provisions of the proposed rule on which the public did not comment are adopted without change in this final rule. Additional technical changes and changes made in *response* to public comments are discussed below.

II. Regulatory Background

This rule amends 8 CFR parts 1001, 1003, and 1292 by changing the present definitions and procedures concerning professional conduct for practitioners, which term includes attorneys and representatives, who practice before the Executive Office for Immigration Review (EOIR). This rule implements measures in *response* to the Attorney General's assessment of EOIR with respect to EOIR's authority to discipline and deter professional misconduct. The rule also aims to improve EOIR's ability to effectively regulate practitioner conduct by implementing technical changes with respect to the definition of attorney and clarifying who is authorized to represent and appear on behalf of individuals in proceedings before the Board of Immigration Appeals (Board) and the immigration judges. The regulations concerning representation and appearances were last promulgated on May 1, 1997 (62 FR 23634) (final rule). The regulations for the rules and procedures concerning professional conduct were last promulgated as a final rule on June 27, 2000 (65 FR 39513).

When it was part of the Department of Justice, the former Immigration and Naturalization Service (INS) incorporated by reference in its regulations EOIR's grounds for discipline and procedures for disciplinary proceedings. Since then, the functions of the former INS were transferred from the Department of Justice (Department) to the Department of Homeland Security (DHS). DHS's immigration regulations are contained in chapter I in 8 CFR, while 8 CFR chapter V now contains the regulations governing EOIR. The rules and procedures concerning professional conduct for representation and appearances before the immigration judges and the Board are now codified in 8 CFR part 1003, subpart G. The rules for representation and appearances before the immigration judges and the Board are codified in 8 CFR part 1292. The rules for representation and appearances and for professional conduct before DHS and its components remain codified in 8 CFR parts 103 and 292.

Both sets of rules provide a unified process for disciplinary hearings as provided in 8 CFR 1003.106, regardless whether the hearing is instituted by EOIR or by DHS. *See generally Matter of Shah,* 24 I&N Dec. 282 (BIA 2007) (imposing discipline on attorney who knowingly and willfully misled USCIS by presenting an improperly obtained certified Labor Condition Application in support of a nonimmigrant worker petition). Finally, both sets of rules provide for cross-discipline, which allows EOIR to request that discipline imposed against a practitioner for misconduct before DHS also be imposed with respect to that practitioner's ability to represent clients before the immigration judges and the Board, and vice versa. *See* 8 CFR 292.3(e)(2) (DHS) and 1003.105(b) (EOIR). Additional background information regarding professional conduct rules for immigration proceedings can be found in the proposed rule, 73 FR at 44178–180.

This rule amends only the EOIR regulations governing representation and appearances, and professional conduct under chapter V in 8 CFR. This rule does not make any changes to the DHS regulations governing representation and appearances or professional conduct.

Currently, the disciplinary regulations allow EOIR to sanction practitioners, including attorneys and certain non-attorneys who are permitted to represent individuals in immigration proceedings (''representatives''), when discipline is in the public interest; namely, when a practitioner has engaged in criminal, unethical, or unprofessional conduct or frivolous behavior. Sanctions may include expulsion or suspension from practice before EOIR and DHS, and public or private censure. EOIR frequently suspends or expels practitioners who are subject to a final or interim order of disbarment or suspension by their state bar regulatory authorities—this is known as ''reciprocal'' discipline.

The Attorney General completed a comprehensive review of EOIR's responsibilities and programs, and determined that, among other things, the immigration judges should have the tools necessary to control their courtrooms and protect the adjudicatory system from fraud and abuse. Accordingly, the Attorney General determined that the existing regulations, including those at 8 CFR 1003.101–109, should be amended to provide for additional sanction authority for false statements, frivolous behavior, and other gross misconduct. Additionally, the Attorney General found that the Board should have the ability to effectively sanction litigants and practitioners for defined categories of gross misconduct.

As a result, this rule seeks to preserve the fairness and integrity of immigration proceedings, and increase the level of protection afforded to aliens in those proceedings by defining additional categories of behavior that constitute misconduct.

In part, the rule responds to the Attorney General's findings and conclusions by adding substantive grounds of misconduct modeled on the American Bar Association Model Rules of Professional Conduct (2006) (ABA Model Rules) that will subject practitioners to sanctions if they violate such standards and fail to provide adequate professional representation for their clients. Specifically, the grounds for sanctionable misconduct have been revised to include language that is similar, and sometimes identical, to the language found in the ABA Model Rules, as such disciplinary standards are widely known and accepted within the legal profession. Although EOIR does not seek to supplant the disciplinary functions of the various state bars, this rule aims to strengthen the existing rules in light of the apparent gaps in the current regulation. *See Matter of Rivera-Claros*, 21 I&N Dec. 599, 604 (BIA 1996). In addition, these revisions will make the EOIR professional conduct requirements more consistent with the ethical standards applicable in most states.

This rule will also enhance the existing regulation by amending the current procedures and definitions through technical modifications that are more consistent with EOIR's authority to regulate practitioner misconduct. *See Koden* v. *U.S. Dep't of Justice*, 564 F.2d 228, 233 (7th Cir. 1977); 8 U.S.C. 1103, 1362. For example, the rule amends the definition of ''attorney'' at 8 CFR 1001.1(f) by adding language stating that an attorney is one who is eligible to practice law in a U.S. state or territory.

Additionally, this rule amends the language at 8 CFR 1292.1(a)(2) to clarify that law students and law graduates must be students and graduates of accredited law schools in the United States. Accordingly, the rule will allow EOIR to investigate and prosecute instances of misconduct more effectively and efficiently while ensuring the due process rights of both the client and the practitioner.

III. Responses to Comments

A. General Comments Concerning the Practitioner Discipline Regulations

Comment. One commenter raised concern about the ability of immigration judges to use these rules ''to commence retaliatory disciplinary proceedings against attorneys who complain of their * * * practices.''

Response. The comment misunderstands EOIR's disciplinary procedural structure. In 2000, the Department addressed the issue as to whether immigration judges had the authority to initiate disciplinary proceedings or impose disciplinary sanctions. *See* Professional Conduct for Practitioners—Rules and Procedures, 65 FR 39513, 39520–39521 (June 27, 2000). Under the current regulations, which have been in place since then, immigration judges have no authority to initiate disciplinary proceedings against a particular attorney. Immigration judges can file complaints about attorneys with EOIR's disciplinary counsel, just as aliens, attorneys, or others involved in an immigration proceeding may file such complaints. These complaints are independently reviewed by EOIR's disciplinary counsel, who then determines, after an independent investigation, whether to close the complaint, informally resolve it, or initiate formal disciplinary proceedings. If an attorney believes that an immigration judge improperly filed a complaint as a retaliatory action, the attorney may file a complaint against the immigration judge with the Office of the Chief Immigration Judge. *See www.usdoj.gov/eoir/sibpages/IJConduct.htm.*

Comment. One organization commented that EOIR should adjust the practitioner disciplinary procedures because EOIR is greatly expanding the scope of its grounds for discipline. The commenter stated that up until the proposed rule, EOIR mainly imposed discipline due to criminal convictions or reciprocally based on discipline imposed by other jurisdictions. The commenter was concerned that the current disciplinary structure is not adequate for the new independent disciplinary scheme that the proposed rule contemplated establishing.

Response. EOIR regularly cooperates with attorney disciplinary agencies at the state and federal levels to impose reciprocal discipline with regard to practitioners who have been suspended or disbarred in other jurisdictions. EOIR also takes prompt action to prohibit practitioners who have been convicted of serious crimes from practicing before EOIR. However, EOIR's practitioner disciplinary procedures were never intended to adjudicate matters involving only reciprocal discipline or criminal convictions. At its inception 50 years ago, the practitioner disciplinary regulations provided ten grounds for discipline that were original in nature. *See* 23 FR 2670, 2672–2673 (April 23, 1958). These regulations contemplated the possibility that practitioners would be charged with misconduct arising from practice before the Department, and that Department officials would need to adjudicate these charges without reference to another tribunal's findings as to misconduct, whether ethical or criminal in nature. As reflected in several published cases, these practitioner disciplinary procedures have been used to adjudicate original charges of professional misconduct. *See Matter of Sparrow,* 20 I&N Dec. 920 (BIA 1994) (case involving both reciprocal and original charges); *Matter of De Anda,* 17 I&N Dec. 54 (BIA, A.G. 1979); *Matter of Solomon,* 16 I&N Dec. 388 (BIA, A.G. 1977); *Matter of Koden,* 15 I&N Dec. 739 (BIA 1974, A.G. 1976). None of these cases reveals a deficiency in the procedures, and these procedures were upheld by a federal court of appeals. *See Koden U.S. Dep't of Justice*, 564 F.2d 228, 233–235 (7th Cir. 1977).

In 2000, the Department completely reviewed, revised, and expanded the practitioner disciplinary procedures. 65 FR at 39523. These regulations expressly created summary disciplinary procedures for cases based on reciprocal discipline and criminal convictions, which are not used in proceedings involving original charges of misconduct. *See* 8 CFR 1003.103–106. When the Department published these new procedures, it also consolidated and added additional grounds for discipline. The Department's major renovations in 2000 to the hearings and appeals procedures for original charges of misconduct were intended to be sufficient to adjudicate the eleven original grounds for discipline in the current regulations. The addition of several more grounds for discipline established in this final rule does not change the sufficiency or adequacy of these existing procedures.

Comment. One commenter stated that EOIR should define ''accredited representative'' and should issue identification cards to accredited representatives so that immigration judges will be able to verify that an individual appearing in court is accredited to practice before EOIR.

Response. The regulations at 8 CFR 1292.1 presently state that a person entitled to representation before EOIR may be represented by, among others, an accredited representative. This section cross-references 8 CFR 1292.2, which provides detailed information concerning accredited representatives. Because accredited representatives must go through a special process to receive accreditation, the regulations already provide more information about accredited representatives than they do about attorneys or any other type of representative. Further, 8 CFR 1003.102(a)(2) specifies the compensation that accredited representatives may receive for their services. Therefore, it is unnecessary to further define the term ''accredited representative.'' The Department also declines, at this time, to issue identification cards to accredited representatives. The regulations at 8 CFR 1292.2(d) require EOIR to maintain a roster of accredited representatives. This roster is available online at *http://www.usdoj.gov/eoir/statspub/accreditedreproster.pdf.* Immigration judges may easily refer to the roster to determine if an individual is an accredited representative. Thus, contrary to the commenter's concern, immigration judges are not ''forced to accept assertions of accredited representatives that they are, in fact, accredited.''

Comment. All of the commenters proposed that the Department apply the professional conduct regulations to government attorneys involved in immigration proceedings. Three commenters asserted that the practitioner disciplinary regulations should apply to both private practitioners and DHS attorneys who practice before EOIR. Further, two commenters indicated that immigration judge misconduct is a problem and one of those commenters argued that rules governing the conduct of immigration judges should be published contemporaneously with these final rules.

Response. As an initial matter, the Department would note for clarity that the ''rule'' of professional conduct for immigration judges referenced by the

commenter was not a proposed rule, but a notice published in the **Federal Register** seeking comment on draft ''Codes of Conduct for the Immigration Judges and Board Members.'' 72 FR 35510 (June 28, 2007). This notice did not include a process by which to discipline immigration judges or Board Members. Rather, this notice recognized certain ''canons'' of professional conduct. *Id.* at 35510–12. Attorneys concerned with an immigration judge's conduct may follow the procedures for filing a complaint regarding the conduct of an immigration judge. *See http://www.usdoj.gov/eoir/sibpages/IJConduct.htm.*

In 2000, the Department addressed the reasons why government attorneys, including immigration judges, are not subject to the same process used for disciplining practitioners. *See* 65 FR at 39522. The reasons stated in 2000 with respect to the current practitioner disciplinary process remain valid, notwithstanding the fact that the government is now represented in removal proceedings by attorneys working for DHS rather than the former INS.

Like the former INS attorneys who were subject to investigation by the Department's Inspector General and Office of Professional Responsibility, DHS's Office of the Inspector General and the Office of Professional Responsibility for Immigration and Customs Enforcement investigate DHS attorneys. Further, DHS attorneys are also required to comply with the Standards of Ethical Conduct for Employees of the Executive Branch, found at 5 CFR part 2635, and other standards applicable to government employees. In fact, DHS has adopted a formal disciplinary process for its employees that provides similar hearing and appeal rights as EOIR's practitioner disciplinary process, including removal or suspension from employment. *See* 5 CFR 9701.601–710. Moreover, applying this rule to DHS attorneys was not included in the proposed rule, and cannot be adopted in this final rule in the absence of prior notice and comment. Accordingly, the Department declines to adopt the comments requesting contemporaneous publication of the Code of Conduct for Immigration Judges and Board Members and a rule addressing professional conduct of government attorneys.

Comment. Two commenters indicated that there is a perception that an inherent conflict of interest exists when immigration judges adjudicate practitioner disciplinary cases. One of the commenters expressed the view that immigration judges do not have training in attorney discipline matters, private practice experience, or sufficient time to spare from their immigration case workload. The commenter argued that EOIR should constitute disciplinary hearing panels composed of private practice attorneys and members of the public to hear and decide practitioner discipline cases.

Response. The use of immigration judges as adjudicators in practitioner disciplinary cases was codified over twenty years ago, in 1987. *See* Executive Office for Immigration Review; Representation and Appearances, 52 FR 24980 (July 2, 1987). In 2000, the Department amended the practitioner disciplinary regulations to provide that both immigration judges and administrative law judges could be assigned to adjudicate practitioner disciplinary cases. When that final rule was published, the Department gave a detailed explanation concerning the use of immigration judges as adjudicating officials in practitioner disciplinary cases. *See* 65 FR at 39515–16. That explanation remains valid.

However, in recognition that these final rules significantly increase the regulation of practitioner conduct, EOIR has chosen to create a corps of adjudicating officials made up of immigration judges and administrative law judges who will receive specialized training in professional responsibility law, and who will hear and decide practitioner disciplinary cases as part of their normal caseload. Further, EOIR acknowledges the concern raised by the commenters and notes that the current regulations require that an immigration judge appointed to hear disciplinary cases is not the complainant and not one whom the practitioner regularly appears before. 8 CFR 1003.106(a)(1)(i).

B. Section 1003.102—Grounds of Misconduct

1. Section 1003.102(e)—Reciprocal Discipline

This rule sought to amend the existing rules that only allow the imposition of discipline where a practitioner resigns ''with an admission of misconduct'' to allow ''the imposition of discipline on an attorney who resigns while a disciplinary investigation or proceeding is pending.'' 73 FR at 44180. No comments were received regarding this part of the proposed rule. Accordingly, this rule will be adopted without change.

2. Section 1003.102(k)—Previous Finding of Ineffective Assistance of Counsel

Comment. Two organizations commented on the proposed amendment to 8 CFR 1003.102(k), which would expand the existing rule to sanction practitioners based on a finding of ineffective assistance of counsel by a federal court. One commenter questioned whether it was appropriate for a finding of ineffective assistance of counsel to serve as a ground for discipline. The commenter asserted that ineffective assistance of counsel is normally raised by aliens when seeking reopening of unfavorable decisions in their cases, and that because of this, allegations of ineffective assistance of counsel are ''rampant.'' The commenter thought that the circumstances under which ineffective assistance of counsel is raised can put well-intentioned and competent attorneys at risk of discipline. The other commenter appreciated that the proposed rule would expand consideration of ineffective assistance of counsel findings ''outside the parameters of the immigration courtroom.'' This commenter also suggested that the rule be revised to make clear that the ground of discipline must be based on a ''final order'' finding ineffective assistance of counsel, either by an immigration judge, the Board, or a federal court.

Response. The purpose of amending this rule is to permit EOIR to impose disciplinary sanctions on practitioners who have been found to have provided ineffective assistance of counsel in immigration proceedings before EOIR, regardless of whether that finding of ineffective assistance of counsel was made by an immigration judge, the Board, or a federal court. Although one of the commenters thought that practitioners would be placed at risk for discipline based on allegations of ineffective assistance of counsel that are made by aliens only seeking reopening of their immigration cases, EOIR has been administering this ground for discipline since 2000 without inappropriately disciplining a practitioner. As stated in the supplemental information for the rule that proposed ineffective assistance of counsel as a ground for discipline, an adjudicating official may determine not to impose disciplinary sanctions notwithstanding a finding of ineffective assistance of counsel in an immigration proceeding. *See* Executive Office for Immigration Review; Professional Conduct for Practitioners—Rules and Procedures, 63 FR 2901, 2902 (January

20, 1998) (proposed rule). Moreover, the EOIR disciplinary counsel does not automatically initiate disciplinary proceedings based on a finding of ineffective assistance of counsel. Rather, proceedings are initiated based on EOIR disciplinary counsel's independent review of the matter. Finally, if proceedings are initiated, practitioners receive a full and fair opportunity to dispute the underlying finding of ineffective assistance of counsel before being disciplined.

Another commenter agreed with the proposed amendment to this ground for discipline; however, the commenter misunderstood the scope of this amendment. The EOIR disciplinary process remains focused on disciplining practitioners based on a finding of ineffective assistance of counsel that occurred before EOIR in immigration proceedings (or before DHS in the case of charges brought by the DHS disciplinary counsel).

One commenter also suggested that EOIR limit discipline to matters in which the finding of ineffective assistance of counsel was made in a final order. We will not adopt this recommendation because the finding of ineffective assistance of counsel is usually not located in a final order by an immigration judge or the Board. This is because aliens most commonly assert ineffective assistance of counsel as a basis for getting their cases reopened. If an alien prevails in the ineffective assistance of counsel claim, the adjudicator who issues this determination will do so in an order that reopens the proceeding, and such an order granting reopening is itself not a final order because further proceedings will be held after the case is reopened. Therefore, for all of the reasons stated above, the Department adopts the proposed amendment to this ground for discipline as originally proposed.

3. Section 1003.102(l)—Failure To Appear in a Timely Manner

One commenter provided a comment agreeing with this change. No other comments were received. Accordingly, this rule is adopted without change.

4. Section 1003.102(m)—Assist in the Unauthorized Practice of Law

Comment. Two comments were received regarding section 1003.102(m). One comment stated that this is ''one of the most valuable rules proposed.'' The other commenter did not take a position on the rule, but suggested revising the rule to include a ''knowingly'' *mens rea* requirement to this ground of discipline that prohibits practitioners from assisting in the unauthorized practice of law.

Response. The Department did not propose a modification to this ground for discipline. This ground was only re-printed in the proposed rule to delete the period at the end of this provision and add a semi-colon. Accordingly, the Department declines to make any substantive amendments to this rule, such as including the word ''knowingly.'' Such a change is not necessary because practitioners should make certain that any other practitioner they work with is authorized to practice before EOIR. However, the Department believes that additional clarification of what constitutes the practice of law would be helpful to practitioners. Therefore, a clarifying statement will be added to this ground for discipline that will state that the practice of law before EOIR means engaging in *practice* or *preparation* as those terms are defined in 8 CFR 1001.1(i) and (k).

5. Section 1003.102(n)—Conduct Prejudicial to the Administration of Justice

Comment. Two commenters were concerned with the language used in this proposed provision. One commenter believed it was too vague. The other commenter, while acknowledging that this proposed provision is based on ABA Model Rule 8.4(d), stated that this rule was extremely broad and suggested that the Department narrow this ground by adding text from the supplemental information in the proposed rule or from the ABA's comments to Rule 8.4(d).

Response. This ground for discipline is based on ABA Model Rule 8.4(d). As such, it is a well-known ethical rule with which most attorneys must comply whenever representing parties before a tribunal. Therefore, we do not believe that additional language needs to be added to the proposed rule. The Attorney General expects that EOIR's disciplinary counsel, adjudicating officials, and the Board will consider the ABA's comments to ABA Model Rule 8.4(d), and how this rule has been applied in interpreting and applying this regulatory provision, so that this new ground for discipline would not be applied in a manner that is inconsistent with the prevailing interpretations with which attorneys are already familiar. Therefore, we are adopting the proposed rule without change.

6. Section 1003.102(o)—Competence

Comment. One commenter commended the addition of this provision, which is based on ABA Model Rule 1.1. The commenter suggested that the Department add additional text to the provision from the ABA's comments 1, 3, and 5 to Rule 1.1.

Response. As indicated in the proposed rule, this ground for discipline uses text that is nearly identical to ABA Model Rule 1.1. The proposed rule also included one sentence from the ABA's comment 5 to Rule 1.1. The Department has considered adding additional text to this ground for discipline from the ABA's comments 1, 3, and 5 to Rule 1.1. However, the Department believes that the proposed rule, as originally proposed, provides sufficient information for practitioners to be on notice of their duty to represent their clients competently. The Department's decision not to add additional text does not mean that the ABA's comments 1, 3, and 5 are not relevant to interpreting this provision. Because this ground for discipline is based on ABA Model Rule 1.1, relevant ABA comments concerning Rule 1.1, and relevant judicial interpretations, can be considered as an important aid in interpreting this ground for discipline.

7. Section 1003.102(p)—Scope of Representation

Comment. One commenter was concerned by this provision because the commenter believed that the provision would interfere with retainer agreements between attorneys and their clients, which are traditionally governed by state law. The commenter agreed that immigration judges should have a role in determining whether a practitioner can withdraw from a case; however, the commenter thought that this provision would require practitioners to continue to represent a client even when there is a conflict of interest. The commenter urged the Department to adopt standards governing whether immigration judges should permit the withdrawal of practitioners from cases. Finally, the commenter suggested that the Department permit limited appearances and allow practitioners to withdraw from cases in which clients have failed to pay fees. Another commenter views this change as ''an excellent proposal'' but suggests that the rule require clear contracts between attorneys and clients.

Response. Upon review, the Department has decided to remove the text from the proposed provision that is not based on ABA Model Rule 1.2(a) and add additional text from ABA Model Rule 1.2(a) concerning a practitioner's ability to ''take such action on behalf of the client as is impliedly authorized to carry out the representation.'' The Department is

making this change because this provision, which involves the scope of representation, should not include text discussing the withdrawal or the termination of employment of practitioners. The commenter's suggestion that the Department adopt standards governing whether immigration judges should permit the withdrawal of practitioners is outside the scope of this rule. This rule only involves practitioner disciplinary matters and does not include proposed amendments to procedures in immigration proceedings, such as 8 CFR 1003.17. Likewise, the suggestion that the Department permit limited appearances is an issue involving immigration proceedings that is not appropriately addressed in this final rule.

8. Section 1003.102(q)—Diligence

Comment. One commenter noted appreciation for this proposal but suggested that the Department add a good cause exception to the requirement that practitioners act with diligence and promptness. The commenter stated that there may always be unforeseen emergencies that occur. The commenter also suggested that the Department permit *nunc pro tunc* filings in immigration cases for good cause shown.

Response. The inclusion in this provision of a good cause exception is unnecessary. This provision requires ''reasonable'' diligence and promptness. Therefore, practitioners will not be expected to anticipate every possible contingency, such as a truly unforeseen emergency, in order to avoid discipline under this rule. However, practitioners should make an effort to prepare for foreseeable exigencies. As stated in *response* to a previous comment, this rule only involves practitioner disciplinary matters and does not include proposed amendments to procedures in immigration proceedings. Therefore, the Department will not adopt, as part of this final rule, a provision that permits late filings if there is good cause.

9. Section 1003.102(r)—Communication

Comment. Two commenters stated that this provision's requirement that practitioners communicate with aliens in their native language would be unduly burdensome. One commenter believes that the rule would transfer the expense of translation services from aliens to practitioners. Another commenter believes that the requirements in this provision would make it difficult for aliens who speak unusual foreign languages to obtain representation. The commenter asserted that aliens often rely on friends and family to translate for them, and practitioners should not be required to ensure that those translations are accurate. One commenter suggested that this provision should only require practitioners to make a diligent and reasonable effort to communicate in the alien's language. Finally, one commenter was concerned that the provision would require practitioners to locate their clients to communicate with them; the commenter suggested that the rule only require communication using the contact information provided to the practitioner from the client.

Response. The Department accepts the suggestions from the commenters and the final version of this provision has been modified to ensure that practitioners are not required to provide all translation services for their clients. However, practitioners must make reasonable efforts to communicate with clients in a language that the client understands. Further, the Department agrees that practitioners should not have to locate their clients and should be able to rely on the contact information provided by their clients. However, if a practitioner cannot locate his or her client, the practitioner is responsible for informing EOIR that the practitioner is unable to contact his or her client.

10. Section 1003.102(s)—Candor Toward the Tribunal

Comment. One commenter took issue with the explanation for this rule in the supplemental information and requested that the rule make clear that ''the duty of the lawyer is only to make reasonable disclosure of contrary authority known to him,'' not to assist DHS in preparing its brief against the lawyer's client.

Response. This provision is extremely narrow and will not require practitioners to seek out legal authority that is contrary to their client's cases just to disclose this information to EOIR. This provision only applies to controlling legal authority that is directly contrary to the client's position when this controlling legal authority is already known to the practitioner and the other party did not provide it to EOIR. In this regard, the commenter is correct that this rule does not view an alien's attorney as having a duty to also conduct research for the opposing party.

11. Section 1003.102(t)—Notice of Entry of Appearance

Comment. One commenter thought that the proposed provision was too broad because it subjects practitioners who provide pro bono services to discipline if they do not sign pleadings or submit a Form EOIR–27 or EOIR–28. The commenter suggested that disciplinary sanctions only be imposed when filings demonstrate a lack of competence or preparation, or the practitioner has undertaken ''full client services.'' Another commenter approved of this change, but suggested that pro se aliens be provided notice of this requirement in their own language and that immigration judges inform all who appear before the court of the requirement.

Response. The Department believes that all practitioners should submit Forms EOIR–27 and EOIR–28, and sign all filings made with EOIR, in cases where practitioners engage in ''practice'' or ''preparation'' as those words are defined in 8 CFR 1001.1(i) and (k). It is appropriate to require practitioners who engage in ''practice'' or ''preparation,'' whether it is for a fee or on a pro bono basis, to enter a notice of appearance and sign any filings submitted to EOIR. As stated in the supplemental information to the proposed rule, this provision is meant to advance the level of professional conduct in immigration matters and foster increased transparency in the client-practitioner relationship. Any practitioner who accepts responsibility for rendering immigration-related services to a client should be held accountable for his or her own actions, including the loss of the privilege of practice before EOIR, when such conduct fails to meet the minimum standards of professional conduct in 8 CFR 1003.102. It is difficult for EOIR to enforce those standards when practitioners fail to enter a notice of appearance or sign filings made with EOIR. However, in an effort to ensure clarity of this ground for discipline, a sentence will be added to this provision that makes it clear that a notice of appearance must be submitted and filings signed in all cases where practitioners engage in ''practice'' or ''preparation.'' If a practitioner provides pro bono services that do not meet these definitions, then a notice of appearance is not necessary.

As for the suggestions made by the second commenter, the Department declines to codify in the regulations a rule that requires notice to pro se aliens or anyone appearing before an immigration judge of an attorney's obligation to enter a Notice of Appearance. The scope of this rule is to provide notice to attorneys of their responsibilities when engaging in practice and preparation before EOIR and to provide grounds for discipline when an attorney fails to carry through on his or her responsibilities.

12. Section 1003.102(u)—Repeated Filings Indicating a Substantial Failure to Competently and Diligently Represent the Client

Comment. One commenter stated that the proposed rule fails to acknowledge that boilerplate language is sometimes appropriate where used in briefs where cases present common issues of law, analysis, and argument. The commenter was concerned that the proposed rule would punish the repeated use of briefing materials regardless of the material's relevance to the case at hand. The commenter proposed limiting the proposed rule's effect to filings that reflect incorporation of incorrect or irrelevant material. Another commenter agrees with this change, but questions how the ''repeated filings'' will be tracked such that the rule will be enforceable.

Response. The rule, as written, is sufficient to meet the concerns of the first commenter and is therefore adopted as the final rule. The rule makes it clear that conduct that will lead to sanctions only includes filings that use boilerplate language that reflect little or no attention to the specific factual or legal issues in a case and thereby show a lack of competence or diligence by the practitioner. As stated in the supplemental information to the proposed rule, EOIR seeks to deter practitioners from filing briefs that provide no recitation of the specific facts in the case and fail to explain how the cited law in the brief applies to the facts of the case. Therefore, this rule is sufficiently circumscribed to ensure that a practitioner's use of a legal argument in one case, which is copied from the practitioner's brief in another case, will not subject the practitioner to sanctions unless the argument fails to connect the legal issues raised in the brief with the specific facts in the case in a manner that shows a lack of competence and diligence.

As for the enforceability of the rule, the proposed rule explained that the Board has already experienced these situations. 73 FR at 44183. In light of this experience, the Board has already developed the means to identify cases where the same attorney is filing boilerplate briefs. Immigration judges, on the other hand, may be able to identify instances of concern based on their ongoing interaction with the practitioners who appear before them.

C. Section 1003.103—Immediate Suspension and Summary Disciplinary Proceedings

Comment. One commenter stated that a petition to immediately suspend a practitioner should not be filed until a final order is issued suspending, disbarring, or criminally convicting the practitioner in another jurisdiction.

Response. The regulations currently permit the imposition of an immediate suspension of a practitioner who has been suspended or disbarred on an interim basis. The proposed rule sought to clarify this authority; however, the proposed rule did not seek to broaden or change it. It is appropriate to immediately suspend a practitioner based on an interim suspension from a state licensing authority or a Federal court pending the issuance of a final order because any practitioner who is under a suspension from another jurisdiction does not meet the definition of an ''attorney'' under 8 CFR 1001.1(f). Such a practitioner is not qualified to practice before EOIR under 8 CFR 1292.1(a)(1). Further, it is beyond argument that it is appropriate to immediately suspend practitioners who have been convicted of serious crimes. The regulations protect practitioners because they require that all criminal appeals be completed before EOIR will issue a final order imposing a suspension or expulsion on a criminally convicted practitioner. *See* 8 CFR 1003.103(b).

Comment. One commenter was concerned that EOIR did not have a provision that would permit it to vacate an immediate suspension order imposed on a practitioner who later has an underlying state bar suspension vacated.

Response. The regulations expressly provide that upon a showing of good cause, the Board may set aside an immediate suspension if it is in the interests of justice to do so. 8 CFR 1003.103(a)(2). If an immediate suspension was solely predicated upon a state bar suspension that was vacated, it would be in the interests of justice for the Board to set aside its immediate suspension order.

Comment. One organization disagreed with the proposed change in the standard of proof in practitioner disciplinary proceedings from ''clear, unequivocal, and convincing evidence'' to ''clear and convincing evidence.'' The commenter stated that removing ''unequivocal'' makes lawyers more vulnerable to discipline without providing a corresponding benefit to the justice system and indicated that the standard of proof in practitioner disciplinary cases should not mirror those in removal proceedings.

Response. The proposed rule indicated the Department's intention to change the standard of proof in practitioner disciplinary cases to clear and convincing evidence because this is now the standard of proof used in removal proceedings adjudicated by the Board and immigration judges. This is appropriate given the reason why ''unequivocal'' was first adopted as part of the standard of proof in practitioner disciplinary proceedings. *See Matter of Koden*, 15 I&N Dec. 739, 748 (BIA 1974, A.G. 1976). In *Koden*, the Board decided that the standard of proof should be clear, convincing, and unequivocal evidence, rather than clear and convincing evidence as argued by the respondent, because many other jurisdictions used ''unequivocal'' as part of their disciplinary standard, and also because the Board and other immigration adjudicators were already familiar with applying the clear, convincing, and unequivocal evidence standard as that was the standard applicable in deportation proceedings. *See id.* It is appropriate for the standard of proof in practitioner disciplinary cases to be adjusted to the clear and convincing standard because that is now the standard that the ABA recommends for all jurisdictions to adopt in disciplinary cases, *see* Model Rules for Lawyer Disciplinary Enforcement R. 18 (2002), and also because that is the standard the Board and immigration judges now apply in removal proceedings. The latter reason is supported by both *Koden* and the regulations at 8 CFR 1003.106(a)(1)(v), which state: ''[d]isciplinary proceedings shall be conducted in the same manner as Immigration Court proceedings as is appropriate . * * *'' Further, while the concerns raised by the commenter were presumably directed at a reduction of the burden the government will bear in proving charges of misconduct, it is important to note that practitioners also receive a benefit to the change in the standard of proof. Practitioners have a reduced burden of proving affirmative defenses and proving that they are morally and professionally fit to be reinstated after being disciplined. *See* 8 CFR 1003.103(b)(2); 1003.105(a)(2); 1003.107(a)(1).

Comment. One commenter suggested that the regulations concerning reciprocal discipline be revised so that reciprocal discipline imposed by the Board will run concurrently with the discipline imposed by the practitioner's state bar. The commenter believed that the proposed revisions to 8 CFR 1003.103 would cause practitioners to be suspended or disbarred for periods of time that are different than that imposed by the state bar without any basis or finding as to why that result is appropriate.

Response. EOIR attempts to ensure in reciprocal disciplinary cases that a

suspension or expulsion before EOIR will be as contemporaneous as possible with discipline imposed by state bars. The regulations at 8 CFR 1003.103(a) permit the Board to impose an immediate suspension on a practitioner who has been suspended or disbarred, and the time served during the immediate suspension can be credited toward the term of suspension or expulsion in the final order. *Id.* However, the Board cannot issue an immediate suspension order against a practitioner contemporaneously with a state bar order of suspension or disbarment unless the practitioner complies with 8 CFR 1003.103(c) and informs EOIR of the suspension or disbarment in a timely fashion. In cases where practitioners fail to inform EOIR of state bar discipline, EOIR will have no alternative but to impose discipline at a later date after learning of the discipline. Even though Board precedent establishes that identical or comparable discipline is generally to be imposed in reciprocal disciplinary matters, *see Matter of Truong,* 24 I&N Dec. 52, 55 (BIA 2006); *Matter of Ramos,* 23 I&N Dec. 843, 848 (BIA 2005); *Matter of Gadda*, 23 I&N Dec. 645, 649 (BIA 2003), EOIR will not reward a practitioner's failure to comply with his or her duty to timely inform EOIR of state bar discipline by shortening the length of the reciprocal discipline imposed.

Further, while the Board generally subscribes to the concept of identical or comparable reciprocal discipline, there have been circumstances where the Board has imposed non-identical reciprocal discipline or denied reinstatement to a practitioner who has since been reinstated to practice before his state bar. *See Matter of Krivonos*, 24 I&N Dec. 292, 293 (BIA 2007) (denying reinstatement to practitioner who had been convicted of immigration-related fraud even though practitioner was reinstated by the state bar); *Matter of Jean-Joseph*, 24 I&N Dec. 295 (BIA 2007) (suspending practitioner for double the length of state bar suspension because practitioner violated the Board's immediate suspension order). Therefore, while identical or comparable reciprocal discipline is generally employed by the Board, the Board must have the flexibility to respond to the facts and circumstances presented in each case.

Comment. One commenter suggested that the rule allowing for public postings of immediate suspensions require that such postings be placed in the waiting rooms of the immigration courts.

Response. The regulatory language specifically states that ''the Board may require that notice of such suspension be posted at the Board, the Immigration Courts, or the DHS.'' In all immediate suspension orders issued by the Board to date, the Board has included a requirement that the immediate suspension be posted in a public area. In addition, such information is accessible to the public online at *http://www.usdoj.gov/eoir/profcond/chart.htm.*

D. Section 1003.105—Notice of Intent To Discipline and Section 1003.106—Hearing and Disposition

Comment. One commenter suggested that a Notice of Intent to Discipline should only be issued when there is a preliminary finding that the charges of misconduct could be sustained on clear and convincing evidence.

Response. This comment involves an existing regulation that was not subject to amendment in the proposed rule and, therefore, is outside the scope of the proposed rule. In 2000, the practitioner disciplinary regulations were amended to provide that a Notice of Intent to Discipline would only be issued when there is sufficient prima facie evidence to warrant charging a practitioner with misconduct. 8 CFR 1003.105(a). However, those charges would have to be proven by clear and convincing evidence. 8 CFR 1003.106(a)(1)(iv). Therefore, implicit in the filing of all charges is the belief by the EOIR disciplinary counsel that the charges can be proven by clear and convincing evidence.

Comment. One commenter took issue with the proposal to limit the circumstances under which a preliminary inquiry report will be served with a Notice of Intent to Discipline. The commenter understood the proposal to mean that the practitioner will no longer be informed of the basis for the charge of disciplinary action.

Response. The supplemental information and language of the proposed rule clearly state that this limitation applies only in summary proceedings because those proceedings will always be brought as a result of a disciplinary decision issued by a state licensing authority or a federal court, or a criminal conviction which will be set forth in the Notice of Intent to Discipline itself. Thus, a preliminary inquiry report would do nothing but repeat the basis of the charges already contained in the Notice. Accordingly, this final rule adopts this proposed rule without change.

Comment. One commenter disagreed with the proposed language for limiting a practitioner's eligibility for a hearing where the practitioner is subject to summary disciplinary proceedings.

Response. In light of the comment and upon further consideration of the proposed change to 8 CFR 1003.105 concerning the availability of in-person hearings in summary disciplinary proceedings, the Department has decided not to adopt the proposed language. Rather, the Department will codify in the regulations the prevailing standard in Board precedent concerning evidentiary hearings in summary discipline cases. In *Matter of Ramos,* 23 I&N Dec. 843, 848 (BIA 2005), the Board held that in summary disciplinary proceedings, a practitioner must show that there is a material issue of fact in dispute that necessitates an evidentiary hearing. *Id.* Therefore, the final regulations reflect this standard. The Department has also decided that this provision should appear in 8 CFR § 1003.106 because it relates to a practitioner's right to a hearing. 8 CFR § 1003.105 involves filing Notices of Intent to Discipline and answers to those notices. Therefore, it is more appropriate for this provision to be located in the section related to disciplinary hearings.

IV. Technical Amendments to Regulations

This final rule also includes technical changes to 8 CFR 1003.101–108 that were not included in the proposed rule. In 8 CFR 1003.101, 1003.103, 1003.104–105, and 1003.107, the words ''Immigration and Naturalization Service,'' ''the Service'' and ''the Office of the General Counsel of the Service'' are being replaced with the term ''DHS,'' which is defined at 8 CFR 1001.1(w). As discussed above, since the promulgation of the final rule concerning the practitioner disciplinary process in June of 2000, the functions of the former Immigration and Naturalization Service (INS) were transferred from the Department to DHS. These changes reflect the creation of DHS and the transfer of the former INS's functions.

The definition of the term ''practice'' in 8 CFR 1001.101(i) is being updated to reflect the fact that immigration judges, and not ''officers of the Service,'' are the adjudicators at the hearing level in immigration proceedings before EOIR. The definition has been unchanged since its adoption nearly forty years ago. *See* 34 FR 12213 (July 24, 1969). At that time, INS officers held hearings in immigration cases and the Board decided appeals from INS's decisions. However, those INS officers eventually became immigration judges employed by EOIR. Therefore, the Department is updating the definition to remove

reference to the ''Service'' and ''officer of the Service,'' and is replacing them with the terms ''DHS'' and ''immigration judge.''

In 8 CFR 1003.103–108, the term ''Office of the General Counsel of EOIR'' is being replaced with the term ''EOIR disciplinary counsel'' as it is used in 8 CFR 1003.0(e)(2)(iii). This change is made to more accurately reflect EOIR's practice of assigning an attorney within the Office of the General Counsel to serve as the chief prosecutor for practitioner disciplinary matters. The EOIR disciplinary counsel is responsible for the day-to-day management of the disciplinary program for attorneys and accredited representatives, and investigates allegations of misconduct against practitioners, including referrals from EOIR's anti-fraud officer concerning ''instances of fraud, misrepresentation, or abuse pertaining to an attorney or accredited representative.'' 8 CFR 1003.0(e)(1), (2)(iii). The EOIR disciplinary counsel determines when to dismiss complaints against practitioners, informally resolve those complaints, or initiate disciplinary proceedings.

The Department has also made technical changes to 8 CFR 1003.105–106 to replace the terms ''Office of the General Counsel for EOIR'' and ''Office of the General Counsel of the Service'' with ''counsel for the government.'' These changes are made to the provisions that relate directly to the litigation of practitioner disciplinary cases. Finally, 8 CFR 1003.106(a)(1)(iii) is being amended to clarify that both parties to a practitioner disciplinary case, and not just the practitioner, have the right to examine and object to evidence presented by the other party, to present evidence, and to cross-examine witnesses presented by the other party. Further, an additional sentence is being added to this provision to indicate that if a practitioner files an answer to the Notice of Intent to Discipline but does not request a hearing, the parties have the right to submit briefs and evidence to support or refute any of the charges or affirmative defenses.

Regulatory Requirements

Regulatory Flexibility Act

The Attorney General, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and, by approving it, certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule affects only those practitioners who practice immigration law before EOIR. This rule will not affect small entities, as that term is defined in 5 U.S.C. 601(6), because the rule is similar in substance to the existing regulatory process.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Act of 1996 (5 U.S.C. 804). This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

Executive Order 12866—Regulatory Planning and Review

The Attorney General has determined that this rule is a ''significant regulatory action'' under Executive Order 12866, section 3(f), Regulatory Planning and Review, and, accordingly, this rule has been submitted to the Office of Management and Budget for review.

Executive Order 13132—Federalism

This rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Executive Order 12988—Civil Justice Reform

This rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1995, Public Law 104–13, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this proposed rule because there are no new or revised recordkeeping or reporting requirements.

List of Subjects

8 CFR Part 1001

Administrative practice and procedures, Immigration, Legal services.

8 CFR Part 1003

Administrative practice and procedures, Immigration, Legal services, Organization and functions (Government agencies), Reporting and recordkeeping requirements.

8 CFR Part 1292

Administrative practice and procedures, Immigration, Reporting and recordkeeping requirements.

■ For the reasons set forth in the preamble, parts 1001, 1003, and 1292 of title 8 of the Code of Federal Regulations are amended as follows:

PART 1001—DEFINITIONS

■ 1. The authority citation for part 1001 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103.

■ 2. Amend § 1001.1 to revise paragraphs (f) and (i) to read as follows:

§ 1001.1 Definitions.

* * * * *

(f) The term *attorney* means any person who is eligible to practice law in and is a member in good standing of the bar of the highest court of any State, possession, territory, or Commonwealth of the United States, or of the District of Columbia, and is not under any order suspending, enjoining, restraining, disbarring, or otherwise restricting him in the practice of law.

* * * * *

(i) The term *practice* means the act or acts of any person appearing in any case, either in person or through the preparation or filing of any brief or other document, paper, application, or petition on behalf of another person or client before or with DHS, or any immigration judge, or the Board.

* * * * *

PART 1003—EXECUTIVE OFFICE FOR IMMIGRATION REVIEW

■ 3. The authority citation for part 1003 continues to read as follows:

Authority: 5 U.S.C. 301; 8 U.S.C. 1103; 1252 note, 1252b, 1324b, 1362; 28 U.S.C. 509, 510, 1746; sec. 2, Reorg. Plan No. 2 of 1950, 3 CFR, 1949–1953 Comp., p. 1002; section 203 of Pub. L. 105–100.

■ 4. Amend § 1003.1 by removing from paragraph (d)(5) the citation ''§ 1.1(j) of this chapter'' and adding in its place the citation ''§ 1001.1(j) of this chapter''.

Subpart G—Professional Conduct for Practitioners—Rules and Procedures

§ 1003.101 [Amended]

■ 5. Amend § 1003.101 by:
■ a. Removing from paragraph (a)(1) the words ''Immigration and Naturalization Service (the Service)'' and adding in its place ''DHS'';
■ b. Removing from paragraph (a)(2) the words ''the Service'' and adding in its place ''DHS'';
■ c. Removing from paragraph (b) the words ''the Service'' and adding in its place ''DHS''.

■ 6. Amend § 1003.102 by:
■ a. Removing from paragraph (j)(2) the citation ''§ 1003.1(d)(1–a)'' and adding in its place the citation ''§ 1003.1(d)'';
■ b. Revising paragraphs (e), (k), (l), and (m); and by
■ c. Adding paragraphs (n) through (t), to read as follows:

§ 1003.102 Grounds.

* * * * *

(e) Is subject to a final order of disbarment or suspension, or has resigned while a disciplinary investigation or proceeding is pending;

* * * * *

(k) Engages in conduct that constitutes ineffective assistance of counsel, as previously determined in a finding by the Board, an immigration judge in an immigration proceeding, or a Federal court judge or panel, and a disciplinary complaint is filed within one year of the finding;

(l) Repeatedly fails to appear for pre-hearing conferences, scheduled hearings, or case-related meetings in a timely manner without good cause;

(m) Assists any person, other than a practitioner as defined in § 1003.101(b), in the performance of activity that constitutes the unauthorized practice of law. The practice of law before EOIR means engaging in *practice* or *preparation* as those terms are defined in §§ 1001.1(i) and (k);

(n) Engages in conduct that is prejudicial to the administration of justice or undermines the integrity of the adjudicative process. Conduct that will generally be subject to sanctions under this ground includes any action or inaction that seriously impairs or interferes with the adjudicative process when the practitioner should have reasonably known to avoid such conduct;

(o) Fails to provide competent representation to a client. Competent representation requires the legal knowledge, skill, thoroughness, and preparation reasonably necessary for the representation. Competent handling of a particular matter includes inquiry into and analysis of the factual and legal elements of the problem, and use of methods and procedures meeting the standards of competent practitioners;

(p) Fails to abide by a client's decisions concerning the objectives of representation and fails to consult with the client as to the means by which they are to be pursued, in accordance with paragraph (r) of this section. A practitioner may take such action on behalf of the client as is impliedly authorized to carry out the representation;

(q) Fails to act with reasonable diligence and promptness in representing a client.

(1) A practitioner's workload must be controlled and managed so that each matter can be handled competently.

(2) A practitioner has the duty to act with reasonable promptness. This duty includes, but shall not be limited to, complying with all time and filing limitations. This duty, however, does not preclude the practitioner from agreeing to a reasonable request for a postponement that will not prejudice the practitioner's client.

(3) A practitioner should carry through to conclusion all matters undertaken for a client, consistent with the scope of representation as previously determined by the client and practitioner, unless the client terminates the relationship or the practitioner obtains permission to withdraw in compliance with applicable rules and regulations. If a practitioner has handled a proceeding that produced a result adverse to the client and the practitioner and the client have not agreed that the practitioner will handle the matter on appeal, the practitioner must consult with the client about the client's appeal rights and the terms and conditions of possible representation on appeal;

(r) Fails to maintain communication with the client throughout the duration of the client-practitioner relationship. It is the obligation of the practitioner to take reasonable steps to communicate with the client in a language that the client understands. A practitioner is only under the obligation to attempt to communicate with his or her client using addresses or phone numbers known to the practitioner. In order to properly maintain communication, the practitioner should:

(1) Promptly inform and consult with the client concerning any decision or circumstance with respect to which the client's informed consent is reasonably required;

(2) Reasonably consult with the client about the means by which the client's objectives are to be accomplished. Reasonable consultation with the client includes the duty to meet with the client sufficiently in advance of a hearing or other matter to ensure adequate preparation of the client's case and compliance with applicable deadlines;

(3) Keep the client reasonably informed about the status of the matter, such as significant developments affecting the timing or the substance of the representation; and

(4) Promptly comply with reasonable requests for information, except that when a prompt *response* is not feasible, the practitioner, or a member of the practitioner's staff, should acknowledge receipt of the request and advise the client when a *response* may be expected;

(s) Fails to disclose to the adjudicator legal authority in the controlling jurisdiction known to the practitioner to be directly adverse to the position of the client and not disclosed by opposing counsel;

(t) Fails to submit a signed and completed Notice of Entry of Appearance as Attorney or Representative in compliance with applicable rules and regulations when the practitioner:

(1) Has engaged in *practice* or *preparation* as those terms are defined in §§ 1001.1(i) and (k), and

(2) Has been deemed to have engaged in a pattern or practice of failing to submit such forms, in compliance with applicable rules and regulations. Notwithstanding the foregoing, in each case where the respondent is represented, every pleading, application, motion, or other filing shall be signed by the practitioner of record in his or her individual name; or

(u) Repeatedly files notices, motions, briefs, or claims that reflect little or no attention to the specific factual or legal issues applicable to a client's case, but rather rely on boilerplate language indicative of a substantial failure to competently and diligently represent the client.

* * * * *

■ 7. Amend § 1003.103 by:
■ a. Revising the first sentence in paragraph (a)(1);
■ b. Revising the first and second sentences in paragraph (a)(2);
■ c. Adding a new sentence after the second sentence in paragraph (a)(2);
■ d. Revising the first and second sentences in paragraph (b) introductory text;

■ e. Revising paragraph (b)(2) introductory text; and by

■ f. Revising the first sentence of paragraph (c).

The revisions and addition read as follows:

§ 1003.103 Immediate suspension and summary disciplinary proceedings; duty of practitioner to notify EOIR of conviction or discipline.

(a) *Immediate Suspension*—

(1) *Petition.* The EOIR disciplinary counsel shall file a petition with the Board to suspend immediately from practice before the Board and the Immigration Courts any practitioner who has been found guilty of, or pleaded guilty or nolo contendere to, a serious crime, as defined in § 1003.102(h), or any practitioner who has been suspended or disbarred by, or while a disciplinary investigation or proceeding is pending has resigned from, the highest court of any State, possession, territory, or Commonwealth of the United States, or the District of Columbia, or any Federal court, or who has been placed on an interim suspension pending a final resolution of the underlying disciplinary matter. A copy of the petition shall be forwarded to DHS, which may submit a written request to the Board that entry of any order immediately suspending a practitioner before the Board or the Immigration Courts also apply to the practitioner's authority to practice before DHS. Proof of service on the practitioner of DHS's request to broaden the scope of any immediate suspension must be filed with the Board.

(2) *Immediate suspension.* Upon the filing of a petition for immediate suspension by the EOIR disciplinary counsel, together with a certified copy of a court record finding that a practitioner has been found guilty of, or pleaded guilty or nolo contendere to, a serious crime, or has been disciplined or has resigned, as described in paragraph (a)(1) of this section, the Board shall forthwith enter an order immediately suspending the practitioner from practice before the Board, the Immigration Courts, and/or DHS, notwithstanding the pendency of an appeal, if any, of the underlying disciplinary proceeding, pending final disposition of a summary disciplinary proceeding as provided in paragraph (b) of this section. Such immediate suspension will continue until imposition of a final administrative decision. If an immediate suspension is imposed upon a practitioner, the Board may require that notice of such suspension be posted at the Board, the Immigration Courts, or DHS. * * *

* * * * *

(b) *Summary disciplinary proceedings.* The EOIR disciplinary counsel shall promptly initiate summary disciplinary proceedings against any practitioner described in paragraph (a) of this section by the issuance of a Notice of Intent to Discipline, upon receipt of a certified copy of the order, judgment, and/or record evidencing the underlying criminal conviction, discipline, or resignation, and accompanied by a certified copy of such document. However, delays in initiation of summary disciplinary proceedings under this section will not impact an immediate suspension imposed pursuant to paragraph (a) of this section. * * *

* * * * *

(2) In the case of a summary proceeding based upon a final order of disbarment or suspension, or a resignation while a disciplinary investigation or proceeding is pending (*i.e.*, reciprocal discipline), a certified copy of a judgment or order of discipline shall establish a rebuttable presumption of the professional misconduct. Disciplinary sanctions shall follow in such a proceeding unless the attorney can rebut the presumption by demonstrating clear and convincing evidence that:

* * * * *

(c) *Duty of practitioner to notify EOIR of conviction or discipline.* Any practitioner who has been found guilty of, or pleaded guilty or nolo contendere to, a serious crime, as defined in § 1003.102(h), or who has been disbarred or suspended by, or while a disciplinary investigation or proceeding is pending has resigned from, the highest court of any State, possession, territory, or Commonwealth of the United States, or the District of Columbia, or any Federal court, must notify the EOIR disciplinary counsel of any such conviction or disciplinary action within 30 days of the issuance of the initial order, even if an appeal of the conviction or discipline is pending.* * *

* * * * *

■ 8. Amend § 1003.104 by:

■ a. Revising paragraph (a);

■ c. Revising the first, third, and fourth sentences in paragraph (b);

■ d. Revising paragraph (c); and by

■ e. Revising paragraph (d), to read as follows:

§ 1003.104 Referral of Complaints

(a) *Filing complaints*—(1) *Practitioners authorized to practice before the Board and the Immigration Courts.* Complaints of criminal, unethical, or unprofessional conduct, or of frivolous behavior by a practitioner who is authorized to practice before the Board and the Immigration Courts shall be filed with the EOIR disciplinary counsel. Disciplinary complaints must be submitted in writing and must state in detail the information that supports the basis for the complaint, including, but not limited to, the names and addresses of the complainant and the practitioner, the date(s) of the conduct or behavior, the nature of the conduct or behavior, the individuals involved, the harm or damages sustained by the complainant, and any other relevant information. Any individual may file a complaint with the EOIR disciplinary counsel using the Form EOIR–44. The EOIR disciplinary counsel shall notify DHS of any disciplinary complaint that pertains, in whole or part, to a matter before DHS.

(2) *Practitioners authorized to practice before DHS.* Complaints of criminal, unethical, or unprofessional conduct, or frivolous behavior by a practitioner who is authorized to practice before DHS shall be filed with DHS pursuant to the procedures set forth in § 292.3(d) of this chapter.

(b) *Preliminary inquiry.* Upon receipt of a disciplinary complaint or on its own initiative, the EOIR disciplinary counsel will initiate a preliminary inquiry. * * * If the EOIR disciplinary counsel determines that a complaint is without merit, no further action will be taken. The EOIR disciplinary counsel may, in its discretion, close a preliminary inquiry if the complainant fails to comply with reasonable requests for assistance, information, or documentation. * * *

(c) *Resolution reached prior to the issuance of a Notice of Intent to Discipline.* The EOIR disciplinary counsel, in its discretion, may issue warning letters and admonitions, and may enter into agreements in lieu of discipline, prior to the issuance of a Notice of Intent to Discipline.

(d) *Referral of complaints of criminal conduct.* If the EOIR disciplinary counsel receives credible information or allegations that a practitioner has engaged in criminal conduct, the EOIR disciplinary counsel shall refer the matter to DHS or the appropriate United States Attorney and, if appropriate, to the Inspector General, the Federal Bureau of Investigation, or other law enforcement agency. In such cases, in making the decision to pursue

disciplinary sanctions, the EOIR disciplinary counsel shall coordinate in advance with the appropriate investigative and prosecutorial authorities within the Department to ensure that neither the disciplinary process nor criminal prosecutions are jeopardized.

* * * * *

■ 9. Amend § 1003.105 by:
■ a. Revising paragraph (a);
■ b. Revising the first and second sentences of paragraph (b);
■ c. Revising the third sentence of paragraph (c)(1); and by
■ d. Revising paragraph (d)(2) introductory text, to read as follows:

§ 1003.105 Notice of Intent to Discipline.

(a) *Issuance of Notice to practitioner.* (1) If, upon completion of the preliminary inquiry, the EOIR disciplinary counsel determines that sufficient prima facie evidence exists to warrant charging a practitioner with professional misconduct as set forth in § 1003.102, he or she will file with the Board and issue to the practitioner who was the subject of the preliminary inquiry a Notice of Intent to Discipline. Service of this notice will be made upon the practitioner by either certified mail to his or her last known address, as defined in paragraph (a)(2) of this section, or by personal delivery. Such notice shall contain a statement of the charge(s), a copy of the preliminary inquiry report, the proposed disciplinary sanctions to be imposed, the procedure for filing an answer or requesting a hearing, and the mailing address and telephone number of the Board. In summary disciplinary proceedings brought pursuant to § 1003.103(b), a preliminary inquiry report is not required to be filed with the Notice of Intent to Discipline.

(2) For the purposes of this section, the last known address of a practitioner is the practitioner's address as it appears in EOIR's case management system if the practitioner is actively representing a party before EOIR on the date that the EOIR disciplinary counsel issues the Notice of Intent to Discipline. If the practitioner does not have a matter pending before EOIR on the date of the issuance of a Notice of Intent to Discipline, then the last known address for a practitioner will be as follows:

(i) Attorneys in the United States: the attorney's address that is on record with a state jurisdiction that licensed the attorney to practice law.

(ii) Accredited representatives: the address of a recognized organization with which the accredited representative is affiliated.

(iii) Accredited officials: the address of the embassy of the foreign government that employs the accredited official.

(iv) All other practitioners: the address for the practitioner that appears in EOIR's case management system for the most recent matter on which the practitioner represented a party.

(b) *Copy of Notice to DHS; reciprocity of disciplinary sanctions.* A copy of the Notice of intent to Discipline shall be forwarded to DHS. DHS may submit a written request to the Board or the adjudicating official requesting that any discipline imposed upon a practitioner which restricts his or her authority to practice before the Board or the Immigration Courts also apply to the practitioner's authority to practice before DHS. * * *

(c) * * *

(1) * * * A copy of the answer and any such motion shall be served by the practitioner on the counsel for the government.

* * * * *

(d) * * *

* * * * *

(2) Upon such a default by the practitioner, the counsel for the government shall submit to the Board proof of service of the Notice of Intent to Discipline. The practitioner shall be precluded thereafter from requesting a hearing on the matter. The Board shall issue a final order adopting the proposed disciplinary sanctions in the Notice of Intent to Discipline unless to do so would foster a tendency toward inconsistent dispositions for comparable conduct or would otherwise be unwarranted or not in the interests of justice. With the exception of cases in which the Board has already imposed an immediate suspension pursuant to § 1003.103, any final order imposing discipline shall not become effective sooner than 15 days from the date of the order to provide the practitioner opportunity to comply with the terms of such order, including, but not limited to, withdrawing from any pending immigration matters and notifying immigration clients of the imposition of any sanction. A practitioner may file a motion to set aside a final order of discipline issued pursuant to this paragraph, with service of such motion on the EOIR disciplinary counsel, provided:

* * * * *

■ 10. Amend § 1003.106 by:
■ a. Revising the section heading to read as set forth below;
■ b. Revising the heading of paragraph (a);
■ c. Redesignating paragraphs (a)(1) and (a)(2) as paragraphs (a)(2) and (a)(3);
■ d. Adding a new paragraph (a)(1);
■ e. Revising the first and second sentences of newly redesignated paragraph (a)(2)(ii),
■ f. Revising paragraphs (a)(2)(iii) and (a)(2)(iv);
■ g. Revising the first sentence of paragraph (a)(2)(v) introductory text;
■ h. Revising paragraph (a)(3) introductory text;
■ i. Revising paragraph (a)(3)(ii);
■ j. Revising paragraphs (b) and (c); and by
■ k. Revising the first and third sentences of paragraph (d).

The revisions read as follows:

§ 1003.106 Right to be heard and disposition.

(a) *Right to be heard*—(1) *Summary disciplinary proceedings.* If a practitioner who is subject to summary disciplinary proceedings pursuant to § 1003.103(b) requests a hearing, he or she must make a prima facie showing to the Board in his or her answer that there is a material issue of fact in dispute with regard to the basis for summary disciplinary proceedings, or with one or more of the exceptions set forth in § 1003.103(b)(2)(i)–(iii). If the Board determines that there is a material issue of fact in dispute with regard to the basis for summary disciplinary proceedings, or with one or more of the exceptions set forth in § 1003.103(b)(2)(i)–(iii), then the Board shall refer the case to the Chief Immigration Judge for the appointment of an adjudicating official. Failure to make such a prima facie showing shall result in the denial of a request for a hearing. The Board shall retain jurisdiction over the case and issue a final order.

(2) * * *

(ii) Except as provided in § 1003.105(c)(3), upon the practitioner's request for a hearing, the adjudicating official may designate the time and place of the hearing with due regard to the location of the practitioner's practice or residence, the convenience of witnesses, and any other relevant factors. When designating the time and place of a hearing, the adjudicating official shall provide for the service of a notice of hearing, as the term ''service'' is defined in 8 CFR 1003.13, on the practitioner and the counsel for the government. * * *

(iii) The practitioner may be represented by counsel at no expense to the government. Counsel for the practitioner shall file a Notice of Entry of Appearance on Form EOIR–28 in accordance with the procedures set

forth in this part. Each party shall have a reasonable opportunity to examine and object to evidence presented by the other party, to present evidence on his or her own behalf, and to cross-examine witnesses presented by the other party. If a practitioner files an answer but does not request a hearing, then the adjudicating official shall provide the parties with the opportunity to submit briefs and evidence to support or refute any of the charges or affirmative defenses.

(iv) In rendering a decision, the adjudicating official shall consider the following: The complaint, the preliminary inquiry report, the Notice of Intent to Discipline, the answer, any supporting documents, and any other evidence, including pleadings, briefs, and other materials. Counsel for the government shall bear the burden of proving the grounds for disciplinary sanctions enumerated in the Notice of Intent to Discipline by clear and convincing evidence.

(v) The record of proceedings, regardless of whether an immigration judge or an administrative law judge is the adjudicating official, shall conform to the requirements of 8 CFR part 1003, subpart C and 8 CFR 1240.9. * * *

* * * * *

(3) *Failure to appear in proceedings.* If the practitioner requests a hearing as provided in section 1003.105(c)(3) but fails to appear, the adjudicating official shall then proceed and decide the case in the absence of the practitioner, in accordance with paragraph (b) of this section, based upon the available record, including any additional evidence or arguments presented by the counsel for the government at the hearing. In such a proceeding, the counsel for the government shall submit to the adjudicating official proof of service of the Notice of Intent to Discipline as well as the Notice of the Hearing. The practitioner shall be precluded thereafter from participating further in the proceedings. A final order of discipline issued pursuant to this paragraph shall not be subject to further review, except that the practitioner may file a motion to set aside the order, with service of such motion on the counsel for the government, provided:

* * * * *

(ii) His or her failure to appear was due to exceptional circumstances (such as serious illness of the practitioner or death of an immediate relative of the practitioner, but not including less compelling circumstances) beyond the control of the practitioner.

(b) *Decision.* The adjudicating official shall consider the entire record and, as soon as practicable, render a decision. If the adjudicating official finds that one or more of the grounds for disciplinary sanctions enumerated in the Notice of Intent to Discipline have been established by clear and convincing evidence, he or she shall rule that the disciplinary sanctions set forth in the Notice of Intent to Discipline be adopted, modified, or otherwise amended. If the adjudicating official determines that the practitioner should be suspended, the time period for such suspension shall be specified. Any grounds for disciplinary sanctions enumerated in the Notice of Intent to Discipline that have not been established by clear and convincing evidence shall be dismissed. The adjudicating official shall provide for the service of a written decision or a memorandum summarizing an oral decision, as the term ''service'' is defined in 8 CFR 1003.13, on the practitioner and the counsel for the government. Except as provided in paragraph (a)(2) of this section, the adjudicating official's decision becomes final only upon waiver of appeal or expiration of the time for appeal to the Board, whichever comes first, nor does it take effect during the pendency of an appeal to the Board as provided in § 1003.6.

(c) *Appeal.* Upon the issuance of a decision by the adjudicating official, either party or both parties may appeal to the Board to conduct a review pursuant to § 1003.1(d)(3). Parties must comply with all pertinent provisions for appeals to the Board, including provisions relating to forms and fees, as set forth in Part 1003, and must use the Form EOIR–45. The decision of the Board is a final administrative order as provided in § 1003.1(d)(7), and shall be served upon the practitioner as provided in 8 CFR 1003.1(f). With the exception of cases in which the Board has already imposed an immediate suspension pursuant to § 1003.103, any final order imposing discipline shall not become effective sooner than 15 days from the date of the order to provide the practitioner opportunity to comply with the terms of such order, including, but not limited to, withdrawing from any pending immigration matters and notifying immigration clients of the imposition of any sanction. A copy of the final administrative order of the Board shall be served upon the counsel for the government. If disciplinary sanctions are imposed against a practitioner (other than a private censure), the Board may require that notice of such sanctions be posted at the Board, the Immigration Courts, or DHS for the period of time during which the sanctions are in effect, or for any other period of time as determined by the Board.

(d) *Referral.* In addition to, or in lieu of, initiating disciplinary proceedings against a practitioner, the EOIR disciplinary counsel may notify an appropriate Federal or state disciplinary or regulatory authority of any complaint filed against a practitioner. * * * In addition, the EOIR disciplinary counsel shall transmit notice of all public discipline imposed under this rule to the National Lawyer Regulatory Data Bank maintained by the American Bar Association.

* * * * *

■ 11. Amend § 1003.107 by:

■ a. Revising the second and third sentences of paragraph (b) introductory text;

■ b. Revising paragraph (b)(1); and by

■ c. Adding a new paragraph (c), to read as follows:

§ 1003.107 Reinstatement after expulsion or suspension.

* * * * *

(b) Petition for reinstatement. * * * A copy of such a petition shall be served on the EOIR disciplinary counsel. In matters in which the practitioner was ordered expelled or suspended from practice before DHS, a copy of such petition shall be served on DHS.

(1) The practitioner shall have the burden of demonstrating by clear and convincing evidence that he or she possess the moral and professional qualifications required to appear before the Board and the Immigration Courts or DHS, or before all three authorities, and that his or her reinstatement will not be detrimental to the administration of justice. The EOIR disciplinary counsel and, in matters in which the practitioner was ordered expelled or suspended from practice before DHS, DHS may reply within 30 days of service of the petition in the form of a written *response* to the Board, which may include documentation of any complaints filed against the expelled or suspended practitioner subsequent to his or her expulsion or suspension.

* * * * *

(c) *Appearance after reinstatement.* A practitioner who has been reinstated to practice by the Board must file a new Notice of Entry of Appearance of Attorney or Representative in each case on the form required by applicable rules and regulations, even if the reinstated practitioner previously filed such a form in a proceeding before the practitioner was disciplined.

* * * * *

■ 12. Amend § 1003.108 by:

■ a. Revising the second sentence of paragraph (a) introductory text;

■ b. Revising paragraph (a)(1) introductory text;

■ c. Revising the second sentence of paragraph (a)(1)(i);

■ d. Revising paragraph (a)(1)(iv); and by

■ e. Revising paragraph (a)(2), to read as follows:

§ 1003.108 Confidentiality.

(a) *Complaints and preliminary inquiries.* * * * A practitioner whose conduct is the subject of a complaint or preliminary inquiry, however, may waive confidentiality, except that the EOIR disciplinary counsel may decline to permit a waiver of confidentiality if it is determined that an ongoing preliminary inquiry may be substantially prejudiced by public disclosure before the filing of a Notice of Intent to Discipline.

(1) *Disclosure of information for the purpose of protecting the public.* The EOIR disciplinary counsel may disclose information concerning a complaint or preliminary inquiry for the protection of the public when the necessity for disclosing information outweighs the necessity for preserving confidentiality in circumstances including, but not limited to, the following:

* * * * *

(i) * * * If disclosure of information is made pursuant to this paragraph, the EOIR disciplinary counsel may define the scope of information disseminated and may limit the disclosure of information to specified individuals and entities;

* * * * *

(iv) A practitioner is the subject of multiple disciplinary complaints and the EOIR disciplinary counsel has determined not to pursue all of the complaints. The EOIR disciplinary counsel may inform complainants whose allegations have not been pursued of the status of any other preliminary inquiries or the manner in which any other complaint(s) against the practitioner have been resolved.

(2) *Disclosure of information for the purpose of conducting a preliminary inquiry.* The EOIR disciplinary counsel, in the exercise of discretion, may disclose documents and information concerning complaints and preliminary inquiries to the following individuals and entities: * * *

* * * * *

PART 1292—REPRESENTATION AND APPEARANCES

■ 13. The authority citation for Part 1292 continues to read as follows:

Authority: 8 U.S.C. 1103, 1252b, 1362.

Michael B. Mukasey,

Attorney General.

[FR Doc. E8–30027 Filed 12–17–08; 8:45 am]

BILLING CODE 4410–30–P

DEPARTMENT OF JUSTICE

Executive Office for Immigration Review

8 CFR Parts 1240 and 1241

[EOIR Docket No. 163; AG Order No. 3027–2008]

RIN 1125–AA60

Voluntary Departure: Effect of a Motion To Reopen or Reconsider or a Petition for Review

AGENCY: Executive Office for Immigration Review, Justice.

ACTION: Final rule.

SUMMARY: The Department of Justice is publishing this final rule to amend the regulations regarding voluntary departure. This rule adopts, without substantial change, the proposed rule under which a grant of voluntary departure is automatically withdrawn upon the filing of a motion to reopen or reconsider with the immigration judge or the Board of Immigration Appeals (Board) or a petition for review in a federal court of appeals. This final rule adopts, with some modification, the proposed rule under which an immigration judge will set a presumptive civil monetary penalty of $3,000 if the alien fails to depart within the time allowed. However, this rule adopts only in part the proposals to amend the provisions relating to the voluntary departure bond. Finally, this rule adopts the notice advisals in the proposed rule and incorporates additional notice requirements in light of public comments.

DATES: This rule is effective January 20, 2009.

FOR FURTHER INFORMATION CONTACT: John Blum, Acting General Counsel, Executive Office for Immigration Review, 5107 Leesburg Pike, Suite 2600, Falls Church, Virginia 22041; telephone (703) 305–0470 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

I. Public Participation

The Attorney General published a proposed rule in the **Federal Register** on November 30, 2007 (72 FR 67674). The comment period ended on January 29, 2008. Comments were received from nine commenters, including public interest law and advocacy groups, a law firm, three non-attorneys, and one immigration bond agency. Since some comments overlap, and other commenters covered multiple topics, the comments are addressed by topic in sections III–VIII of this preamble, rather than by reference to each specific comment and commenter.

II. Introduction

A. Background

The Immigration and Nationality Act (INA or Act) provides that, as an alternative to formal removal proceedings and entry of a formal removal order, ''[t]he Attorney General may permit an alien voluntarily to depart the United States at the alien's own expense.'' INA 240B(a)(1), (b)(1) (8 U.S.C. 1229c(a)(1), (b)(1)). Voluntary departure ''is a privilege granted to an alien in lieu of deportation.'' *Iouri* v. *Aschroft,* 487 F.3d 76, 85 (2d Cir. 2007), cert. denied, 128 S.Ct. 2986 (2008) (citing *Ballenilla-Gonzalez* v. *INS,* 546 F.2d 515, 521 (2d Cir. 1976)). It is ''an agreed upon exchange of benefits between the alien and the government.'' *Banda-Ortiz* v. *Gonzales,* 445 F.3d 387, 389 (5th Cir. 2006), cert. denied, 127 S.Ct. 1874 (2007). This *quid pro quo* offers an alien ''a specific benefit—exemption from the ordinary bars to relief—in return for a quick departure at no cost to the government.'' *Id.* at 390 (quoting *Ngarurih* v. *Ashcroft,* 371 F.3d 182, 194 (4th Cir. 2004)). When choosing to seek voluntary departure, the alien agrees to take the benefits and burdens of the statute together. *Ngarurih,* 371 F.3d at 194. In order to obtain voluntary departure at the conclusion of removal proceedings, an alien must establish to the immigration judge by clear and convincing evidence that he or she is both willing and able

to depart voluntarily. 72 FR at 67674–75.

Section 240B of the Act provides that an alien who is granted voluntary departure at the conclusion of removal proceedings is allowed a period of no more than 60 days after the issuance of a final order in which the alien may voluntarily depart from the United States, and certain penalties apply to aliens who do not voluntarily depart within the time allowed. See INA 240B(b)(2), (d) (8 U.S.C. 1229c(b)(2), (d)). Another section of the Act provides that an alien has up to 90 days to file a motion to reopen or 30 days to file a motion to reconsider after entry of a final administrative order issued in removal proceedings. INA 240(c)(6), (7) (8 U.S.C. 1229a(c)(6), (7)). Under longstanding regulation, however, an alien's departure from the United States, including under a grant of voluntary departure, has the effect of withdrawing the motion. 8 CFR 1003.2(d), *Matter of Armendarez,* 24 I&N Dec. 646, 686 (BIA 2008) (noting that the current regulation bears a strong resemblance to the regulation first introduced in 1952).

B. Summary of Regulatory Changes From the Proposed Rule

The proposed rule explained that the amendments set forth therein were ''intended to allow an opportunity for aliens who have been granted voluntary departure to be able to pursue administrative motions and judicial review without risking the imposition of the voluntary departure penalties, to promote uniformity, and also to bring the voluntary departure process back to its statutory premises.'' 72 FR at 67679, 67682. The proposed rule provided an in-depth background discussion of voluntary departure and motions to reopen and reconsider. *Id.* at 67674–77. This final rule adopts, without change, the sections of the proposed rule providing that an alien's grant of voluntary departure will automatically terminate if the alien files a motion to reopen or reconsider with an immigration judge or the Board within the time period the alien was granted to depart voluntarily.

The proposed rule also sought to address divergent motions practice among the courts of appeals concerning the impact on the voluntary departure period when filing a petition for review. *See* 72 FR at 67681. This final rule adopts, without change, the sections of the proposed rule providing that an alien's grant of voluntary departure automatically terminates upon the filing of a petition for review.

The proposed rule provided for additional notice to aliens regarding the consequences of filing a motion to reopen or reconsider, or a petition for review after a grant of voluntary departure. This final rule adopts those amendments, without change, and includes additional notice requirements in light of public comments.

The rule also specified that an immigration judge shall set a specific dollar amount of less than $3,000 as a civil monetary penalty in the event that the alien fails to depart voluntarily within the time allowed. This final rule adopts modified language providing that an immigration judge will set a presumptive civil monetary penalty of $3,000 unless the immigration judge sets a higher or lower amount at the time of granting voluntary departure.

Further, the proposed rule revised the applicable bond provisions to clarify that an alien's failure to post a voluntary departure bond as required did not have the effect of exempting the alien from the penalties for failure to depart under the grant of voluntary departure. This was a reversal of the Board's decision in *Matter of Diaz-Ruacho,* 24 I&N Dec. 47 (BIA 2006). The final rule adopts without change the proposed rule regarding reversal of *Matter of Diaz-Ruacho.*

Finally, the proposed rule provided that the alien remained liable for the amount of the voluntary departure bond if he or she did not depart as agreed, and that failure to post the bond could be considered as a negative discretionary factor in determining whether the alien is a flight risk and in determining whether to grant a discretionary application for relief. Under certain circumstances, however, the proposed rule provided that an alien could get a refund of the bond amount upon proof that he or she was physically outside the United States or if the final administrative order was later overturned, reopened, or remanded. This final rule does not include the language of the proposed rule that an alien forfeits his or her bond upon automatic termination of voluntary departure due to the filing of a motion to reopen or reconsider or petition for review. That issue raises a question about the scope of the authority of the immigration judges and the Board, on the one hand, and the authority of the Department of Homeland Security (DHS) with respect to bond issues. Accordingly, the final rule takes no position at this time with respect to the forfeiture of bond, and language providing for forfeiture of the voluntary departure bond upon the filing of a motion to reopen or reconsider or the filing of a petition for review has been deleted. Because this final rule is not adopting the changes regarding forfeiture of the bond, there is no need to adopt the provisions for a refund upon proof of being physically outside the country. However, this final rule adopts, in part, the proposed rule regarding the circumstances under which an alien can obtain a refund of the bond amount where the final administrative order is overturned or remanded, and the rule that failure to post the bond could be considered as a negative discretionary factor in determining whether the alien is a flight risk or whether to grant a discretionary application for relief.

III. Relationship Between Voluntary Departure and Motions To Reopen or Reconsider

A. The Proposed Rule

While four courts of appeals had held that the alien's filing of a motion to reopen with the Executive Office for Immigration Review (EOIR) within the time allowed for voluntary departure automatically ''tolled'' the voluntary departure period, thereby allowing the alien to remain in the United States under the grant of voluntary departure until after the immigration judge or the Board had adjudicated the motion,[1] three other courts of appeals have held that the filing of a motion to reopen did not toll the period allowed for voluntary departure.[2]

The proposed rule sought to address this circuit split by amending the voluntary departure regulations to provide that an alien's timely filing of a motion to reopen or reconsider prior to the expiration of the voluntary departure period automatically terminates the grant of voluntary departure. Because the grant of voluntary departure would be terminated upon the filing of such a motion, there would be no remaining voluntary departure period and thus no tolling of the period allowed for voluntary departure upon the filing of the motion. In the Department's view, this course of action would protect aliens who file administrative motions within the voluntary departure period from facing the consequences of failing to depart pursuant to a voluntary departure order, such as the loss of eligibility for certain forms of relief.

B. Dada v. Mukasey and Related Changes to the Proposed Rule

On June 16, 2008, the Supreme Court decision in *Dada* v. *Mukasey,* ____ U.S. ____, 128 S.Ct. 2307 (2008), resolved the split among the courts of appeals concerning how the filing of a motion to reopen impacts a grant of voluntary departure. The alien in *Dada* had requested that an immigration judge continue his removal proceedings pending the adjudication of a second visa petition filed on his behalf by his United States citizen spouse. The immigration judge denied the request, and granted the alien a period of voluntary departure pursuant to section 240B(b) of the Act. The Board dismissed the alien's appeal and reinstated the grant of voluntary departure for a 30-day period. Two days before the end of the period allowed for voluntary departure, the alien filed a motion to reopen with the Board, asserting that he had new evidence to support the bona fides of his marriage, and requesting a continuance until his visa petition was adjudicated by DHS. The alien also sought to withdraw his request for voluntary departure. Several months later, the Board denied reopening and cited section 240B(d) of the Act, which bars an alien from adjustment of status and other relief when he or she fails to depart voluntarily within the permitted period. The Board did not address the respondent's request to withdraw his voluntary departure request.

The respondent subsequently filed a petition for review with the United States Court of Appeals for the Fifth Circuit, which affirmed the Board's decision, concluding that there was no automatic tolling of the voluntary departure period.

On certiorari, the Supreme Court considered the situation faced by an alien who abides by a voluntary departure grant and departs within the time allowed. If the alien had filed a timely motion before he or she departed under the grant of voluntary departure, the alien's departure, pursuant to regulation, would have the effect of withdrawing the motion to reopen. Alternatively, if the alien chose to remain in the United States to await a decision on the motion, he or she could then become ineligible for the relief sought in the motion because in most instances the motion would not be adjudicated until after the voluntary departure period had expired, exposing the alien to the bars under section 240B(d) of the Act. The Court framed the issue as ''whether Congress intended the statutory right to reopen to be qualified by the voluntary departure process.'' *Dada,* 128 S.Ct. at 2311. The Court concluded that, under the current regulations, an alien does not knowingly give up the right to file a motion to reopen once he or she accepts voluntary departure.

The Court rejected the alien's contention that there should be ''automatic tolling'' of the period of voluntary departure upon the filing of a motion to reopen or a motion to reconsider removal proceedings before the immigration judge or the Board. The Court concluded that such an interpretation ''would reconfigure the voluntary departure scheme in a manner inconsistent with the statutory design,'' and it found no ''statutory authority for this result.'' *Dada,* 128 S.Ct. at 2311, 2319.

In its decision, the Court held that ''[a]lthough a statute or regulation might be adopted to resolve the dilemma in a different manner, as matters now stand the appropriate way to reconcile the voluntary departure and motion to reopen provisions is to allow an alien to withdraw the request for voluntary departure before expiration of the departure period.'' *Id.* at 2311.

The Department has considered whether to adopt the Court's approach in *Dada* in this final rule, rather than the automatic termination approach set forth in the proposed rule. The Department has also considered whether to incorporate the Court's suggestion that ''[a] more expeditious solution to the untenable conflict between the voluntary departure scheme and the motion to reopen might be to permit an alien who has departed the United States to pursue a motion to reopen postdeparture.'' *Id.* at 2320. For the reasons explained below, the Department is adopting the automatic termination approach set forth in the proposed rule, and thereby is ''resolv[ing] the dilemma in a different manner.'' *Id.* at 2311.

C. Termination of Voluntary Departure Upon the Filing of a Motion To Reopen or Reconsider

The proposed rule provided that the filing of a motion to reopen or reconsider would have the effect of automatically terminating the grant of voluntary departure. Because voluntary departure is ''an agreed upon exchange of benefits between the alien and the Government [that] offers an alien 'a specific benefit—exemption from the ordinary bars to relief—in return for a quick departure at no cost to the government,' '' 72 FR at 67675 (internal citations omitted), the proposed rule took the position that an alien's decision to challenge a final administrative order through a post-decision motion or petition for review demonstrates that ''the alien is no longer willing to abide by the initial *quid pro quo.*'' *Id.* at 67679. Instead, an automatic termination of an alien's grant of voluntary departure upon the filing of a motion to reopen or reconsider would allow the alien to remain in the United States to pursue the motion or petition without becoming subject to the penalties for failure to voluntarily depart. *Id.* at 67680.

Several commenters challenge the Department's characterization of the *quid pro quo* aspect of voluntary departure in the proposed regulation and the proposal to automatically terminate voluntary departure upon the filing of a post-decision motion to reopen or reconsider. In addition, several of these commenters suggest, as an alternative to the proposed automatic termination rule, that the regulations be amended to provide for the tolling or administrative stay of voluntary departure during the filing of a motion to reopen or reconsider, or that the immigration judges and the Board be given the discretion to waive the automatic termination procedure and stay or reinstate voluntary departure when appropriate.[3] One commenter suggests that the voluntary departure time could be improved by changing the expiration date on the voluntary departure order to a suitable time, taking into account when the case can be reopened and when it will most likely be completed.

As the Supreme Court recognized in *Dada*, there is no statutory authority for tolling. *Id.* at 2311, 2319; *see also* section 240B(b)(2) of the Act (providing for no more than 60 days to voluntarily depart). To the extent the commenters were relying on previous appellate decisions to the contrary, those holdings have now been overruled. Further, as the proposed rule explained, tolling the period of voluntary departure deprives the government of an important element of the voluntary departure agreement—''a quick departure without the considerable expense of protracted litigation.'' 72 FR at 676814.[4] Thus, after

[3] With regard to reinstatement, the ability to reinstate voluntary departure is already covered under the current regulations in the context of permitting reinstatement of voluntary departure in a proceeding which has been reopened for another purpose if reopening was granted prior to the expiration of the original period of voluntary departure. 8 CFR 1240.26(f), (h).

[4] It is the considerable expense of protracted litigation that negates any savings to the government of avoiding the costs of removal. The Department has not ignored avoiding the costs of removal as a potential benefit for savings through

Continued

the issuance of a final order, immigration judges and the Board cannot stay the voluntary departure period, or extend the expiration of the voluntary departure period, beyond the amount of time provided by statute.

The Court's decision also discusses the *quid pro quo* benefits to the government and the alien in much the same way as the proposed rule. *Dada*, 128 S.Ct. at 2314. The Court found that allowing an alien to elect to withdraw voluntary departure before the expiration of the voluntary departure period ''preserve[d] the alien's right to pursue reopening while respecting the government's interest in the *quid pro quo* of the voluntary departure arrangement.'' *Dada* at 2319. Accordingly, this final rule retains the *quid pro quo* analysis of the proposed rule as a basis for these regulatory amendments. *See* 72 FR at 67675–76, 67679–80.

This final rule also retains the proposal that an alien's grant of voluntary departure will automatically terminate upon the filing of a motion to reopen or motion to reconsider. In *Dada*, the Court provided the alien with a different option: a unilateral right to withdraw from the voluntary departure agreement in connection with the filing of a motion to reopen or reconsider. *Dada*, 128 S.Ct. at 2319. The Department does not believe that this is the best approach to adopt by rule for the future, for several reasons.

First, the Department finds it preferable to adopt the proposed rule that was subject to a comment period, rather than delay finalizing this new rule for further consideration of the *Dada* approach. Second, allowing the option of withdrawal would seem to require an immigration judge to provide additional advisals to an alien regarding another aspect of the bargain to which the alien is agreeing. The Department is concerned that the growing number of advisals surrounding voluntary departure creates the potential for confusion and unnecessary complexity; this would be especially true for the many pro se aliens who appear before immigration judges. The Department is considering the use of an application form to request voluntary departure, which can then set forth all of the necessary advisals for voluntary departure. However, we do not want to delay publication of this final rule for development and implementation of a form. Further, even with a form that includes advisals, the option to withdraw might continue to be difficult to navigate.

Finally, allowing an alien the option to withdraw from voluntary departure carries the potential for confusion, inadvertent omissions of withdrawal requests, and collateral challenges over whether the alien actually intended, or should have sought, to withdraw voluntary departure in filing a motion. For instance, an alien filing a motion to reopen to seek adjustment of status might either intend to request withdrawal but fail to include the request, or not know to make the request. The alien might later argue that the motion should have been construed as a request for withdrawal since he or she would not otherwise be eligible for the relief sought if the voluntary departure bar applies. The automatic termination rule is more clear-cut and saves the Department from having to dedicate additional resources to a second round of collateral litigation.

This rule will apply to motions filed before immigration judges and the Board. For instance, some aliens file motions to reopen with immigration judges before seeking appeal with the Board. In this case, the alien's voluntary departure would be terminated upon the filing of the motion with the immigration judge. If, while the alien's motion is pending with the immigration judge, the alien subsequently files a Notice of Appeal with the Board, the Board assumes jurisdiction over the case, and the motion becomes nugatory. In this instance, the Board may reinstate the alien's voluntary departure, if the alien demonstrates, as set forth in the rule, that he or she properly posted the voluntary departure bond within the required time period. *See* Section VI, *infra*, for further discussion regarding notice to the immigration judge or the Board that the bond was posted.

Several commenters took issue with this automatic termination rule and asserted that if an alien is forced to give up voluntary departure to pursue a motion, the alien would be improperly discouraged from filing a motion to reopen. These comments note examples of applicants for asylum who benefit from voluntary departure by being able to choose the country to which they will depart, or by returning to their home countries without the ''high profile that accompanies deportation.''

The Department is cognizant of the various ways in which aliens benefit from voluntary departure. However, the Department must balance these considerations against the overriding responsibility to implement the voluntary departure process in accordance with its statutory premises. There is no statutory authority for tolling. *See Dada*, 128 S.Ct. at 2311, 2319; *see also* INA 240B(b)(2) (providing for no more than 60 days voluntary departure when granted at the conclusion of proceedings). Therefore, expiration of the voluntary departure period cannot be changed beyond the amount of time provided by statute.

Even the approach taken by the Supreme Court in *Dada* requires the alien to make a choice: ''As a result, the alien has the option either to abide by the terms, and receive the agreed-upon benefits of voluntary departure, or, alternatively, to forgo those benefits and remain in the United States to pursue an administrative motion.'' *Dada*, 128 S.Ct. at 2319. As the proposed rule recognized, ''it is often the case that an immigration judge or the Board cannot reasonably be expected to adjudicate a motion to reopen or reconsider during the voluntary departure period.'' 72 FR at 67677. Thus, even if the filing of a motion did not result in automatic termination of voluntary departure, an alien who was granted voluntary departure and later files a motion to reopen to apply for asylum is going to be faced with a choice because it is unlikely that the alien's motion would be adjudicated in enough time to allow the alien to depart within the limited time period permitted for voluntary departure if the motion is denied. *See Dada*, 128 S.Ct. at 2317 (''It is foreseeable, and quite likely, that the time allowed for voluntary departure will expire long before the BIA issues a decision on a timely filed motion to reopen.'') (citing the proposed rule). In any event, an applicant for asylum is not an appropriate example to use to illustrate the choice faced by aliens granted voluntary departure but seeking discretionary relief through a post-order motion because the consequences for overstaying the period of voluntary departure do not preclude an alien from receiving asylum. Section 240B(d) bars an alien from obtaining future voluntary departure grants, adjustment of status under INA section 245, cancellation of removal, change of nonimmigrant status, and registry. Section 240B(d) does not make an alien ineligible for asylum, withholding of removal under section 241(b)(3), protection under Article 3 of the Convention Against Torture, or adjustment of status for asylees and refugees under INA section 209.

The only other means by which aliens facing a choice between voluntary departure and filing a post-order motion might continue to benefit from voluntary departure and pursue a

a voluntary departure grant, as suggested by several commenters. Rather, the Department is equally deprived of this benefit where an alien fails to quickly depart in accordance with a voluntary departure order.

motion to reopen would be the Supreme Court's suggestion that ''[a] more expeditious solution to the untenable conflict between the voluntary departure scheme and the motion to reopen might be to permit an alien who has departed the United States to pursue a motion to reopen postdeparture.'' *Dada*, 128 S.Ct. at 2320. The Board recently discussed many of these issues in *Matter of Armendarez, supra.* As the Board stated, ''the physical removal of an alien from the United States is a transformative event that fundamentally alters the alien's posture under the law.'' 24 I&N Dec. at 656. While aliens who voluntarily depart may not be considered ''physically removed'' through execution of a removal order, the controlling regulatory provisions and the force of the Board's statement apply equally in both situations. An alien's departure from the United States, even under a grant of voluntary departure, may trigger a new ground of inadmissibility under section 212(a)(9)(B) or (C) of the Act (8 U.S.C. 1182(a)(9)(B), (C)). Under section 212(a)(9)(B)(i)(II), an alien is inadmissible for ten years from the date of departure (whether voluntary or removed) if he or she was unlawfully present in the United States for one year or more after April 1, 1997. Though this provision is inapplicable to several categories of aliens including, for example, minors and aliens who have filed a bona fide asylum application, many aliens will be subject to this ground of inadmissibility because of the period of unlawful presence they have already accrued. On the other hand, in order to be eligible for voluntary departure at the conclusion of proceedings, aliens must demonstrate that they have been ''physically present in the United States for a period of at least one year immediately preceding the alien's application for voluntary departure.'' INA 240B(b)(1) (8 U.S.C. 1229c(b)(1)). While some aliens may be able to satisfy this physical presence requirement through the time within which an alien may have been lawfully in the United States, in many other cases the period of physical presence includes the amount of time an alien was not lawfully present. Many aliens who depart the United States due to being subject to a removal proceeding have accrued one year or more of unlawful presence and would be inadmissible under section 212(a)(9)(B)(i)(II) of the Act if they depart and then seek admission to the United States. Similarly, under section 212(a)(9)(C)(i)(I), an alien who was unlawfully present in the United States for an aggregate period of more than 1 year, departs, and thereafter enters or attempts to enter the United States without being admitted is inadmissible.

Further, waivers of inadmissibility under section 212(a)(9)(B) of the Act are limited to ''an immigrant'' who is the spouse, son, or daughter of a United States citizen or legal permanent resident and can show that this qualifying relative would suffer ''extreme hardship'' if his or her admission were denied. For aliens inadmissible under section 212(a)(9)(C) of the Act, the alien must wait for ten years after the date of the alien's last departure before the alien may request that the Secretary of Homeland Security consent to an alien's reapplying for admission (with a narrow exception for aliens who have been battered or subjected to extreme cruelty).

In addition, there are issues with respect to aliens who voluntarily departed, if the immigration judge or the Board thereafter grants the motion to reopen or reconsider after the alien has departed from the United States. One possibility is that the alien might seek to be paroled back into the United States to pursue the benefits of reopening, but the granting of parole is not within the authority of the immigration judges or the Board. *Matter of Armendarez, supra* at 656–57, FN8 (recognizing that ''the Immigration Judges and the Board have been given no authority to compel the DHS to admit or parole such aliens into the United States''); *Matter of Conceiro,* 14 I&N Dec. 278 (BIA 1973), *aff'd, Conceiro* v. *Marks*, 360 F.Supp 454 (S.D.N.Y. 1973). Instead, DHS determines whether to grant parole for ''urgent humanitarian reasons or significant public benefit'' pursuant to section 212(d)(5) of the Act, 8 U.S.C 1182(d)(5).

With respect to aliens seeking adjustment of status, the same inadmissibility impediments discussed herein may exist since in general, in order to be eligible for adjustment, an alien must be ''admissible to the United States.'' INA 245(a) (8 U.S.C. 1255(a)). Moreover, allowing an alien to pursue a motion to reopen from outside the United States in order to obtain adjustment of status is in clear tension with the purpose of adjustment of status, which is to provide a means for aliens to obtain lawful permanent resident status from within the United States without the need to depart in order to obtain an immigrant visa from a consular officer abroad. For aliens outside the United States, Congress has designed the immigration system such that aliens seeking admission as immigrants are to obtain an immigrant visa from a consular officer abroad.

Further complicating matters is the fact that the alien would have departed voluntarily. This is significantly different than the situation where an alien is ordered removed, the removal order is executed, and a federal court of appeals later vacates the removal order. In the latter circumstance, if the court finds that the alien's removal was improper, the government may be required to return the alien to the United States. In the context of voluntary departure, there would be no improper voluntary departure that the government must rectify, since the alien departed after the issuance of the grant of voluntary departure as he or she had promised to do. In addition, unlike a federal court of appeals, EOIR does not have the authority to order the return of an alien upon the granting of a motion.

The foregoing demonstrates the complex issues raised by allowing an alien granted voluntary departure, or any alien, the ability to pursue an administrative motion after departing the United States. While the Department is not foreclosing the idea of adopting such an approach in the future, it has concluded that the present rulemaking does not provide an adequate basis for addressing and resolving these issues and concerns at this time, particularly in the absence of an opportunity for public comment on such a proposal and how it might be implemented.

This final rule does not adopt the proposed rule regarding forfeiture of the voluntary departure bond where an alien's voluntary departure is terminated upon the filing of a motion to reopen or reconsider. *See* section VI, *infra*, for further discussion.

Finally, no comments were received regarding the separate provision in the proposed rule providing ''that the granting of a motion to reopen or reconsider that was filed after the penalties under section 240B(d) of the Act had already taken effect does not have the effect of vitiating or vacating those penalties, except as provided in section 240B(d)(2) of the Act.'' 72 FR at 67680. This rule explicitly declines to follow an interpretation that may have been reflected in prior court decisions to the effect that the Board's grant of reopening would have the effect of vacating the underlying voluntary departure order and the penalties attributable to the alien's voluntary failure to depart during the time allowed. This rule will be adopted in this final rule, without change.

IV. Termination of Voluntary Departure Upon the Filing of a Petition for Review

Several commenters criticize the proposal to terminate voluntary departure upon the filing of a petition for review in a federal court of appeals, arguing that it is overreaching, beyond the scope of the Attorney General's authority, and would restrict access to judicial review. One of the commenters states that ''there is no role for EOIR to play in maintaining the uniformity of the courts of appeals' own procedures and practices,'' and the proposed rule ''takes discretion away from federal judges.''

The proposed rule clearly sets forth the Attorney General's authority to ''implement the voluntary departure provisions of the Act and to limit eligibility for voluntary departure for specified classes or categories of aliens, as provided in section 240B(e) of the Act.'' 72 FR at 67678. In this context, the Attorney General is not ''maintaining the uniformity of the courts of appeals' procedures and practices,'' or taking discretion away from federal judges. Rather, pursuant to section 240B(e) of the Act, the Attorney General is exercising his authority to limit eligibility for voluntary departure to ensure uniform application of the immigration laws.

The Supreme Court's decision did not resolve the separate issue of whether the courts of appeals have the authority to grant a motion to stay the period allowed for voluntary departure pending a petition for judicial review with the court of appeals. *See Dada*, 128 S.Ct. at 2314; *compare Thapa* v. *Gonzales*, 460 F.3d 323, 329–32 (2d Cir. 2006) (holding that the court may stay voluntary departure pending consideration of a petition for review on the merits), and *Obale* v. *Attorney General of United States,* 453 F.3d 151, 155–57 (3d Cir. 2006) (same), *with Ngarurih* v. *Ashcroft*, 371 F.3d 182, 194 (4th Cir. 2004) (holding that the court may not stay voluntary departure period pending consideration of a petition for review).

The divergent practice among the federal courts of appeals undermines the sound public policy reasons to ''promote a greater measure of uniformity and expedition in the administration of the immigration laws.'' *See* 72 FR at 67678. As the Supreme Court stated in *Dada*, the voluntary departure statute ''contains no ambiguity: The period within which the alien may depart voluntarily 'shall not be valid for a period exceeding 60 days.' '' *Dada*, 128 S.Ct. at 2316. Yet, an alien's ability to obtain a judicial stay in some circuits, but not others, provides certain aliens with a different rule than that recognized by the Supreme Court, that is, the ability to extend their voluntary departure periods well beyond 60 days. The grant of a stay of voluntary departure by a circuit court essentially tolls the voluntary departure period. Although not addressing voluntary departure in the circuit court context, the Supreme Court made clear that there is no statutory authority for tolling. *Dada*, at 2311, 2319; see also section 240B(b)(2) of the Act (providing for no more than 60 days to voluntarily depart). A stay deprives the government of the same principal considerations of the voluntary departure period—''a quick departure without the considerable expense of protracted litigation.'' 72 FR at 67681.

The concern expressed by the Department in the proposed rule regarding the granting of judicial stays continues to be significant. 72 FR at 67681–82. In practice, we have seen that those who seek judicial review do not adhere to the terms of the agreement and depart, despite the clear statutory authority for such aliens to continue to pursue judicial review even after they have departed from the United States. *See Mendez-Alcaraz* v. *Gonzales*, 464 F.3d 842, 844 n.8–13 (9th Cir. 2006) (holding that permanent rules under the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Public Law 104–208, Div. C, 110 Stat. 3009 (Sept. 30, 1996), effective April 1, 1997, ''do not include the old jurisdiction-stripping provision for excluded, deported, or removed aliens'' under former 8 U.S.C. 1105a(c); that the court retains jurisdiction over a petition for review after an alien has departed; and that a petitioner's removal does not render a case moot). Rather, aliens have sought to remain in the United States, which has resulted in this ''non-uniform, patchwork system of motions practice in the courts of appeals.'' 72 FR at 67681. Aliens granted stays are effectively allowed to remain in the United States for months and years after the statutorily required time to depart.

While the Supreme Court did not consider the effect of judicial stays of voluntary departure in *Dada* because the issue was not presented for decision in that case, the Court's analysis regarding the time allowed to voluntarily depart supports the Department's position that the time for an alien to voluntarily depart should be limited to that allowed by statute. *Dada*, 128 S.Ct. at 2319 (recognizing that there is no statutory authority for tolling, and finding that ''the alien when selecting voluntary departure is [under] the obligation to arrange for departure, and actually depart, within the 60-day period''); 72 FR at 67682 (''This [automatic termination rule for petitions for review] is consistent with the congressional intent, as expressed in the 1996 changes to the Act, that aliens may no longer remain in a period of voluntary departure for years, but instead are strictly limited to a discrete period of time for voluntary departure.'').

Because few aliens choose to use the authority granted by Congress to pursue judicial review after departing from the United States, and because the practice of granting stays has resulted in non-uniform application of the immigration laws, the Attorney General is exercising his statutory authority to limit eligibility for voluntary departure to those aliens who do not seek judicial review. Accordingly, this final rule adopts the automatic termination rule for an alien granted voluntary departure who files a petition for review in order to result in ''a uniform application of the effect of the voluntary departure period in all the circuit courts of appeals.'' 72 FR at 67682.

However, in an effort to provide an incentive for aliens to depart during their voluntary departure periods and pursue judicial review from their home countries, the proposed rule sought comment on ''whether or not it might be advisable (and the possible means for accomplishing such a result) to consider adopting a rule that those aliens who do depart the United States during the period of time specified in the grant of voluntary departure, after filing a petition for review, would not be deemed to have departed under an order of removal for purposes of section 212(a)(9)(A) of the Act.'' 72 FR at 67682.

One comment was submitted in response to this request. This comment suggests that the recommendation in the proposed rule regarding section 212(a)(9)(A) of the Act be adopted. Based on this favorable comment, and further consideration by the Department, this final rule adopts new 8 CFR 1240.26(i) to provide that if an alien who was granted voluntary departure files a petition for review any grant of voluntary departure shall terminate automatically upon the filing of the petition and the alternate order of removal shall immediately take effect, except that the alien will not be deemed to have departed under an order of removal if the alien (i) departs the United States no later than 30 days following the filing of a petition for review; (ii) provides to DHS such evidence of his or her departure as the ICE Field Office Director may require;

and (iii) provides evidence DHS deems sufficient that he or she remains outside of the United States.

The voluntary departure statutory provision states that an order granting voluntary departure is entered ''in lieu of removal.'' INA 240B(b)(1). It is by regulation, however, that the Attorney General requires immigration judges and the Board to enter an alternate order of removal upon granting voluntary departure. 8 CFR 1240.26(d). It is also by regulation that the Attorney General dictates when this alternate order of removal becomes effective. *See e.g.*, 8 CFR 1240.26(c)(3) (''If the bond is not posted within 5 business days, the voluntary departure order shall vacate automatically and the alternate order of removal will take effect on the following day''). In addition, immigration judge and Board orders state that ''if the respondent fails * * * to depart when and as required, the privilege of voluntary departure shall be withdrawn without further notice or proceedings and the following orders shall thereupon become immediately effective.'' In the proposed rule, the Attorney General further proposed that if an alien's voluntary departure terminates due to the filing of a post-order motion or petition for review, ''the alternate order of removal will take effect immediately.'' 72 FR at 67686. This final rule adopts an exception to the proposed rule. If an alien does depart and meets the conditions described above, the alien will not have departed under a removal order.

In order for an alien to take advantage of this opportunity to avoid the stigma of departing under an order of removal, it will be necessary for the alien to establish a contemporaneous record documenting the alien's departure from the United States by notice to DHS documenting his or her departure and to establish that he or she remains outside of the United States. Evidence sufficient to meet these requirements may include proof of the alien's intended departure and itinerary, and prompt presentation by the alien along with such evidence necessary to prove his or her timely departure to a United States consulate. DHS may determine other acceptable proof documenting the alien's time of departure or define the timely period as meeting the definition of prompt presentation.

A statement setting forth this rule will be added to the advisals regarding voluntary departure that are already included with Board decisions.

Finally, this final rule does not adopt the provisions of the proposed rule regarding forfeiture of the voluntary departure bond where an alien's voluntary departure is automatically terminated upon the filing of a petition for review. *See* Section VI, *infra* for further discussion.

V. Notice to the Alien Under the Rule

Several commenters state that the notice provisions set forth in the proposed rule are insufficient because they only provide notice of the consequences of accepting voluntary departure after an alien actually does accept voluntary departure. One commenter posits that the large majority of aliens who are unrepresented in immigration proceedings base their limited knowledge of penalties and obligations on the explanations given by immigration judges. In addition, this commenter suggests that the Board notify aliens when dismissing their appeals of aliens' right to file a petition for review in a federal court of appeals within 30 days. Another commenter states that the rule fails to include a requirement that the immigration judge notify aliens of their obligation to submit proof to the Board that the bond has been posted in order for the Board to reinstate their voluntary departure. This same commenter argues that the timeframe to submit this proof to the Board—''in connection with the filing of an appeal with the Board''—is ''unnecessarily restrictive.''

The Department agrees that timely notice to aliens regarding their rights, responsibilities, and the consequences associated with voluntary departure is an important issue. This final rule retains the proposed changes to 8 CFR 1240.11 to provide that the immigration judge will advise an alien that voluntary departure will be automatically terminated if the alien files a motion to reopen or reconsider during the pendency of the period in which to depart; and for the Board to inform aliens that voluntary departure will be automatically terminated if the alien files a motion to reopen or petition for review during the pendency of the period in which to depart. In addition, this final rule also amends 8 CFR 1240.26 to require immigration judges to inform aliens of the bond amount that will be set before allowing the alien to accept voluntary departure, as well as any other conditions the immigration judge may set in granting voluntary departure. The alien will then have an opportunity to accept the grant of voluntary departure, upon the conditions set forth, or in the alternative the alien may decline the voluntary departure if he or she is unwilling to accept the amount of the bond or other conditions.

Regarding the requirement to submit proof to the Board that the bond has been posted in order for the Board to reinstate voluntary departure, section 1240.26 is revised to require notice regarding the need to file proof of posting a bond with the Board in the immigration judge's decision, and the effect of failing to timely post the bond. Further, this rule revises the timeframe to submit this proof to the Board to ''within 30 days of filing of an appeal with the Board.'' After an immigration judge issues his or her decision, an alien has five business days to post the bond and thirty days to file an appeal with the Board. From the date the appeal is filed with the Board, the alien will have thirty days to submit proof to the Board that the bond was posted. Evidence that the bond was posted may include a copy of Form I–352, the Immigration Bond worksheet that will be provided to the obligor when the bond is posted with DHS Immigration and Customs Enforcement (ICE) Detention and Removal Office (DRO), or Form I–305, which is the fee receipt provided by DRO.

The Department has also considered the suggestion that the Board notify aliens of their right to file a petition for review within 30 days of the Board's dismissal of the alien's appeal. This advisal is beyond the scope of this rule, as it would require the Board to include such an advisal in every decision, not just those involving voluntary departure. However, such an advisal can be implemented administratively without the need for a regulation. The Board historically has not given such a notice, but the Department will give further consideration to the matter administratively.

VI. Issues Relating to the Voluntary Departure Bond

Four commenters provided comments regarding the voluntary bond provisions included in the proposed rule. The proposed rule provided for the following unless the alien departs within the time permitted to depart, or is successful in reopening or overturning the final administrative order: (1) Aliens who are granted voluntary departure but fail to post the bond within the required five business days remain liable for the bond amount regardless of whether voluntary departure is later terminated due to the filing of a motion or petition for review; (2) aliens who are granted voluntary departure and post bond will forfeit the bond if voluntary departure is later terminated due to the filing of a motion or petition; (3) an alien's failure to post bond does not relieve the alien of the

obligation to depart and the alien will be subject to the consequences for failure to depart if the alien does not depart within the permitted period (reversing the Board's decision in *Matter of Diaz-Ruacho,* 24 I&N Dec. 47 (BIA 2006)); (4) an alien's failure to post bond within the required five business days may be considered in determining whether the alien is a flight risk and as a negative discretionary factor with respect to discretionary forms of relief; (5) aliens who waive their administrative appeal at the conclusion of proceedings and fail to post bond within the required five business days will become subject to the final order of removal after the fifth business day; and (6) in order to have voluntary departure reinstated by the Board on appeal, the alien must provide proof to the Board at the time of the appeal that the bond was posted.

None of the comments took issue with the proposed rule that aliens who are granted voluntary departure and fail to post their bond remain liable for the bond. However, based on further discussion below, this final rule does not adopt the part of the proposed rule that imposed continuing liability for the bond ''regardless of whether voluntary departure is later terminated due to the filing of a motion or petition for review.'' Because issues relating to forfeiture of bond can be complex, and also implicate the authority of DHS as well as that of the immigration judge and the Board, the final rule does not include the provision that the alien will forfeit the bond if the alien's voluntary departure is later terminated upon the filing of a post-order motion or a petition for judicial review.

Three of the commenters describe the proposed rules as unduly burdensome, unfair, and punitive. Two of them state that these rules should not be adopted because notice to the alien of these rules is insufficient. As discussed in section IV, part C, this final rule requires that notice of the consequences of failing to depart voluntarily, the consequences of filing a post-decision motion, the amount of bond and any other conditions the immigration judge intends to impose, all be provided to aliens at the time they request voluntary departure.

One commenter posits that the rules appear to regulate enforcement related issues that are within the purview of DHS, not EOIR, because they involve bond and monetary penalties. This commenter, as well as one other, objects to the rules proposing forfeiture of the bond where voluntary departure is later terminated and the alien is no longer under an obligation to voluntarily depart. This commenter describes this rule as a due process violation precisely because the alien is no longer under an obligation to depart, and because in some cases the alien may be prevented from departing because he or she is detained pending execution of the removal order.

Pursuant to section 103(g)(2) of the Act, the Attorney General has the authority to ''establish such regulations, prescribe such forms of bond * * * and perform such other acts as the Attorney General determines to be necessary for carrying out this section.'' Further, section 240B(b)(3) of the Act states that the bond amount will ''be surrendered upon proof that the alien has departed the United States within the time specified,'' and does not, by its terms, provide exceptions for the circumstances of an alien who later decides that he or she does not wish to depart within the time specified. As explained in the proposed rule, ''the purpose of the bond [is] to ensure that the alien does depart during the time allowed, as the alien had promised to do at the time of the immigration judge's order granting voluntary departure.'' 72 FR 67683. The Department considers the bond akin to earnest money provided by the alien at the time the voluntary departure contract is entered. By posting the bond, the alien is manifesting the intent to follow through with the bargain under which he or she intends to depart the United States within the specific time period allotted at no cost to the government. While the alien may later change his or her mind, this does not extinguish the initial promise and the government's reliance on that promise.

On the other hand, the Department recognizes that issues relating to forfeiture of bond also implicate the authority of DHS. Public comments stated that aliens should not be penalized for filing a post-order motion or a petition for review. The Department has also considered the language of the Supreme Court's decision in *Dada* (''the alien who withdraws from a voluntary departure arrangement *is in the same position* as an alien who was not granted voluntary departure in the first instance''), *Id.* at 2320 (emphasis added), though it is worth noting that the Court's observation there was in the context of the option for withdrawal of a request for voluntary departure, an option that the Department has chosen not to follow in this final rule.

In light of the foregoing considerations, this final rule does not include the bond forfeiture rule previously proposed. Because this final rule is not adopting the changes regarding forfeiture of the bond, there is no need to adopt the provisions for a refund of the bond upon proof of being physically outside the country. These are issues that DHS will be able to address in carrying out its responsibilities relating to the posting and surrender of bonds.

However, this final rule adopts, in part, the proposed rule regarding the circumstances under which an alien can obtain a refund of the bond amount where the final administrative order is overturned or remanded. This rule allows for refund of the bond where an alien is granted voluntary departure by an immigration judge, posts the voluntary departure bond within the time required, appeals the immigration judge's decision to the Board, and obtains reversal or remand of the immigration judge's decision regarding the order of removal. If, pursuant to the Board's decision, the alien is no longer removable then the alien should obtain a refund of his or her bond. In that situation, the grant of voluntary departure did not take effect since the immigration judge's decision is stayed upon the filing of an appeal to the Board, and the Board's decision overturning or remanding the immigration judge's decision on the merits thereby renders issues relating to voluntary departure moot. Likewise, if, pursuant to a remand by the Board, the alien is not currently subject to an order of removal, the alien should obtain a refund of the bond amount.

Lastly, this commenter states that DHS should provide the Board with information regarding whether the alien actually posted bond, and that 30 days to provide this information to the Board is a restrictive amount of time. The commenter provides the example of a detained alien whose family member may have posted the bond. In this case, the commenter argues, the 30 days may not be enough time for the alien to gather the information needed regarding bond and provide it to the Board.

In light of the comments, the Department is revising this rule to allow an alien to provide proof to the Board of having posted the bond within 30 days of the filing of the Notice of Appeal. As for requiring DHS to provide the information, such a process would assume that every alien granted voluntary departure by the immigration judge would request reinstatement by the Board. Further, it is the alien's burden to demonstrate to the Board continuing eligibility for voluntary departure. *See* 8 CFR 1240.11(d); 72 FR 67685 (''the burden of proof is on the alien to establish eligibility for a discretionary form of relief'') (internal

citations omitted). Thus, it would be inappropriate to require DHS to be responsible for providing this information relating to the posting of the bond by the alien, as the alien had agreed to do.

Another commenter opposes the flight risk and negative discretion factors. This commenter argues that this categorical approach ignores individual circumstances and creates penalties for the small fraction of aliens who only qualify for voluntary departure due to their strong equities and characteristics in the first place. This rule does not mandate that aliens who do not post their voluntary departure bonds are flight risks or that they should be denied relief in the exercise of discretion. Rather, this rule provides guidance to adjudicators regarding particular factors they may consider in exercising discretion.

For instance, an alien's failure to post the bond ''may be considered'' a negative discretionary factor with regard to relief. 72 FR 67684, 67686. Specific inclusion of these potentially adverse factors in the voluntary departure regulations is appropriate to encourage aliens to adhere to the bond requirement within the required five business days, as they had specifically promised to do. If a rule carries no consequence for failure to comply, then the rule may be rendered effectively meaningless. The proposed rule that an alien's voluntary departure is terminated upon failure to post bond where the alien waived administrative appeal serves the same purpose. 72 FR 67684 (stating that ''this proposal ensures that aliens who waive appeal before the immigration judge still have an incentive to post bond as they agreed to do.''). Accordingly, the Department adopts without change the provisions of the proposed rule regarding the adverse factors for failure to post bond and termination of voluntary departure for failure to post bond by an alien who waives administrative appeal.

One commenter objects to the proposed rule changing the result in *Matter of Diaz-Ruacho,* 24 I&N Dec. 47 (BIA 2006). As noted in the proposed rule, the result in *Diaz-Ruacho* is not a sound policy approach because the alien's default should not exempt the alien from the penalties for failure to depart. 72 FR 67684. Moreover, the commenter does not state how the practical concerns of retaining *Diaz-Ruacho* might be avoided if *Diaz-Ruacho* were retained. *See Id.* (''using the failure to post a bond as the trigger that vitiates the grant of voluntary departure does not make practical sense because it is not an open, discrete, affirmative step and there is no ready process for highlighting the absence of a bond'').

The approach set forth in this final rule recognizes that aliens who request voluntary departure and enter into this agreement with the government may not simply back out of the agreement because they later realize that they actually have to depart or be subject to the consequences of failing to voluntarily depart. This rule is designed to address the conflict recognized in *Dada* for aliens whose circumstances have changed and want to pursue a motion to reopen, or who believe error exists in the administrative decision and want to pursue a motion to reconsider but cannot do so if they comply with the voluntary departure order. As for those aliens who file petitions for review, this rule is also designed to prevent the voluntary departure period from being extended beyond the statutorily permitted amount of time by the issuance of a judicial stay. Neither of these intended purposes of the rule allows for an alien unilaterally to change his or her mind after having been granted voluntary departure; which is what would occur if an alien's failure to post bond merely resulted in vitiating the original grant of voluntary departure.

None of the comments specifically object to the rule that an alien who waives appeal at the conclusion of proceedings and fails to post bond within the required five business days will immediately become subject to the final order of removal. The proposed rule also stated, however, that ''if the alien thereafter does depart within the voluntary departure period, the alien will not be subject to the penalties under 240B(d) of the Act (8 U.S.C. 1229a(c)(4)(B)) or inadmissibility under 212(a)(9)(A) of the Act.'' 72 FR at 67684. This final rule adopts this provision. However, in order to maintain consistency between this provision and the similar provision being adopted for the filing of petitions for review, this final rule revises the regulatory language to read: ''if the alien had waived appeal of the immigration judge's decision, the alien's failure to post the required voluntary departure bond within the period allowed means that the alternate order of removal takes effect immediately pursuant to 8 CFR 1241.1(f), except that an alien granted the privilege of voluntary departure under 8 CFR 1240.26(c) will not be deemed to have departed under an order of removal if the alien: (i) Departs the United States no later than 25 days following the failure to post bond; (ii) provides to DHS such evidence of his or her departure as the ICE Field Office Director may require; and (iii) provides evidence DHS deems sufficient that he or she remains outside of the United States.''

As explained above in the context of petitions for review, in order for an alien to take advantage of this opportunity to avoid the stigma of departing under an order of removal, it will be necessary for the alien to establish a contemporaneous record documenting the alien's departure from the United States by notice to DHS documenting his or her departure and to establish that he or she remains outside of the United States. Evidence sufficient to meet these requirements may include proof of the alien's intended departure and itinerary, and prompt presentation by the alien to a United States consulate along with such evidence necessary to prove his or her timely departure. DHS may determine other acceptable proof documenting the alien's time of departure or define the timely period as meeting the definition of prompt presentation.

Finally, one commenter asks whether the filing of a motion would terminate the voluntary departure bond. As explained earlier, issues relating to the cancellation of bond implicate the authority of DHS. Thus, the Department is not in a position to unilaterally respond to this comment in this rulemaking. However, the Department has consulted with DHS regarding this question and DHS is considering the appropriate way to respond and provide guidance for this and similar bond questions.

In addition, this commenter states that the bond should be raised to $5,000 because $500 is not enough leverage to ensure departure. Under the regulations, the specific bond amount is within the discretion of the immigration judge, to be set ''in an amount necessary to ensure that the alien departs within the time specified,'' except that it can be no less than $500. 8 CFR 1240.26(c)(3). The Department did not include an increase in the minimum bond amount in the proposed rule, and declines at this time to impose such a change by regulation. However, as explained in the previous discussion, this rule uses other means to implement the requirement that the bond set by the immigration judge is posted.

The proposed rule also sought comment on whether the rule should provide for additional sanctions for aliens who fail to post the required bond. 72 FR 67684. One commenter urged the Department to table consideration of such a provision because it would be punitive and hurt

individuals who would be least able to carry the additional financial burden. The Department is not adopting further changes in this final rule regarding posting of the bond. However, this issue may be revisited in the future, if necessary to address additional concerns.

VII. Amount of the Monetary Penalty for Failure To Depart Voluntarily

Two commenters object to the proposed rule to set a minimum $3,000 civil penalty for failure to depart pursuant to section 240B(d)(1)(A) of the Act. One of the commenters argues that if Congress had intended the minimum penalty to be $3,000, it would not have specifically set the minimum at $1,000. The commenter also states that immigration judges should have discretion to set the amount anywhere between the statutory range of $1,000 and $5,000. Finally, this commenter argues that it does not make sense to have the immigration judge set the penalty when factors relevant to overstaying the voluntary departure period in order to determine an appropriate fine would only arise during the voluntary departure period.

Congress has provided that failure to depart is subject to a civil penalty. Through this regulation, the Department is using the consequences provided by Congress to further encourage aliens to adhere to their voluntary departure orders. As stated in the proposed rule, the Department does not have authority to enforce or collect the penalty, but this rule deals only with the authority to set the amount of the penalty. 72 FR at 67685. There is nothing in the statute that precludes having the immigration judge set the penalty in advance prior to the granting of voluntary departure. Moreover, nothing in this rule precludes DHS from adopting a process that allows for mitigation of the amount of a civil penalty that it seeks to collect based on the particular circumstances of an alien's case. Finally, there is much to be said for providing the additional clarity for the alien, up front, in deciding whether to accept voluntary departure and in choosing ultimately to comply with the obligation to depart voluntarily, rather than facing an uncertain and unknowable penalty amount to be selected in the future within a broad monetary range.

The final rule does make one change to allow greater flexibility regarding the amount of the monetary penalty, within the allowable statutory range. Rather than setting a minimum amount of $3,000 as the civil penalty, the final rule will set a rebuttable presumption that the civil penalty amount should be $3,000. The immigration judge will have discretion to set a lower or higher amount based on an alien's individual circumstances, including a consideration of the likelihood that the alien will comply or fail to comply with the grant of voluntary departure. The final rule will adopt, without change, the proposed rule that failure to pay a required civil penalty may be a relevant discretionary factor in later applications for relief.

VIII. Effective Date

One commenter argues that the final rule regarding motions should apply retroactively to persons granted voluntary departure before the effective date of the rule. Because the Department did not present such retroactive application as an option in the proposed rule, and because aliens would not otherwise receive notice that the filing of their motions would automatically terminate their voluntary departure, the Department will not apply this rule retroactively.

Since the provisions of this rule are prospective only, this rule does not provide transition rules with respect to aliens who were granted voluntary departure and had motions pending before an immigration judge or the Board or a petition for review pending with a federal court of appeals on or after the date of the Supreme Court's decision in *Dada*, and before the effective date of this final rule. It is worth noting that an alien who was within a period of voluntary departure on the day *Dada* was issued could have relied on that decision to withdraw from the request of voluntary departure in order to pursue a motion without being subject to the consequences for failing to voluntarily depart.

There are no other reasons to apply this rule retroactively. Accordingly, the proposed rule to apply this final rule prospectively only will be adopted without change. This means that this rule will apply to all cases pending before EOIR, or adjudicated by EOIR, on the effective date of this rule and any cases that later come before it. For instance, an alien who receives a decision by an immigration judge granting voluntary departure on or after the effective date of this rule will be subject to the voluntary departure bond provisions of this rule as well as all other applicable provisions. An alien who receives a decision by the Board reinstating voluntary departure on or after the day of the effective date of this rule will be subject to the automatic termination rule if that alien decides to seek judicial review, as well as all other application provisions. Likewise, if an alien's case is pending before a circuit court, and the case is remanded to the Board on or after the day of the effective date of this rule, any subsequent grant of voluntary departure will be subject to this rule.

IX. Regulatory Requirements

A. Regulatory Flexibility Act

The Attorney General, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and, by approving it, certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule affects individual aliens and does not affect small entities as that term is defined in 5 U.S.C. 601(6).

B. Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector of $100 million or more in any one year and also will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

C. Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 804). This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

D. Executive Order 12866 (Regulatory Planning and Review)

The Attorney General has determined that this rule is a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and, accordingly, this rule has been submitted to the Office of Management and Budget for review.

E. Executive Order 13132 (Federalism)

This rule will not have substantial direct effects on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive

Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

F. Executive Order 12988 (Civil Justice Reform)

This rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988.

G. Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1995, Public Law 104–13, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this rule because there are no new or revised recordkeeping or reporting requirements.

List of Subjects

8 CFR Part 1240

Administrative practice and procedure, Aliens.

8 CFR Part 1241

Administrative practice and procedure, Aliens, Immigration.

■ Accordingly, for the reasons stated in the preamble, chapter V of title 8 of the Code of Federal Regulations is amended as follows:

PART 1240—PROCEEDINGS TO DETERMINE REMOVABILITY OF ALIENS IN THE UNITED STATES

■ 1. The authority citation for part 1240 continues to read as follows:

Authority: 8 U.S.C. 1103, 1182, 1186a, 1224, 1225, 1226, 1227, 1229(c)(e), 1251, 1252 note, 1252a, 1252b, 1362; secs. 202 and 203, Pub. L. 105–100, (111 Stat. 2160, 2193); sec. 902, Pub. L. 105–277 (112 Stat. 2681); 8 CFR part 2.

■ 2. Section 1240.11 is amended by adding a new sentence at the end of paragraph (b) to read as follows:

§ 1240.11 Ancillary matters, applications.

* * * * *

(b) * * * The immigration judge shall advise the alien of the consequences of filing a post-decision motion to reopen or reconsider prior to the expiration of the time specified by the immigration judge for the alien to depart voluntarily.

* * * * *

■ 3. Section 1240.26 is amended by:
■ a. Adding new paragraphs (b)(3)(iii) and (b)(3)(iv);
■ b. Revising paragraph (c)(3);
■ c. Adding new paragraphs (c)(4), (e)(1), and (e)(2);
■ d. Adding a new sentence at the end of paragraph (f); and by
■ e. Adding new paragraphs (i) and (j), to read as follows:

§ 1240.26 Voluntary Departure—authority of the Executive Office for Immigration Review.

* * * * *

(b) * * *

(3) * * *

(iii) If the alien files a post-decision motion to reopen or reconsider during the period allowed for voluntary departure, the grant of voluntary departure shall be terminated automatically, and the alternate order of removal will take effect immediately. The penalties for failure to depart voluntarily under section 240B(d) of the Act shall not apply if the alien has filed a post-decision motion to reopen or reconsider during the period allowed for voluntary departure. Upon the granting of voluntary departure, the immigration judge shall advise the alien of the provisions of this paragraph (b)(3)(iii).

(iv) The automatic termination of a grant of voluntary departure and the effectiveness of the alternative order of removal shall not affect, in any way, the date that the order of the immigration judge or the Board became administratively final, as determined under the provisions of the applicable regulations in this chapter.

(c) * * *

(3) *Conditions.* The immigration judge may impose such conditions as he or she deems necessary to ensure the alien's timely departure from the United States. The immigration judge shall advise the alien of the conditions set forth in this paragraph (c)(3)(i)–(iii). If the immigration judge imposes conditions beyond those specifically enumerated below, the immigration judge shall advise the alien of such conditions before granting voluntary departure. Upon the conditions being set forth, the alien shall be provided the opportunity to accept the grant of voluntary departure or decline voluntary departure if he or she is unwilling to accept the amount of the bond or other conditions. In all cases under section 240B(b) of the Act:

(i) The alien shall be required to post a voluntary departure bond, in an amount necessary to ensure that the alien departs within the time specified, but in no case less than $500. Before granting voluntary departure, the immigration judge shall advise the alien of the specific amount of the bond to be set and the duty to post the bond with the ICE Field Office Director within 5 business days of the immigration judge's order granting voluntary departure.

(ii) An alien who has been granted voluntary departure shall, within 30 days of filing of an appeal with the Board, submit sufficient proof of having posted the required voluntary departure bond. If the alien does not provide timely proof to the Board that the required voluntary departure bond has been posted with DHS, the Board will not reinstate the period of voluntary departure in its final order.

(iii) Upon granting voluntary departure, the immigration judge shall advise the alien that if the alien files a post-order motion to reopen or reconsider during the period allowed for voluntary departure, the grant of voluntary departure shall terminate automatically and the alternate order of removal will take effect immediately.

(iv) The automatic termination of an order of voluntary departure and the effectiveness of the alternative order of removal shall not impact, in any way, the date that the order of the immigration judge or the Board became administratively final, as determined under the provisions of the applicable regulations in this chapter.

(v) If, after posting the voluntary departure bond the alien satisfies the condition of the bond by departing the United States prior to the expiration of the period granted for voluntary departure, the alien may apply to the ICE Field Office Director for the bond to be canceled, upon submission of proof of the alien's timely departure by such methods as the ICE Field Office Director may prescribe.

(vi) The voluntary departure bond may be canceled by such methods as the ICE Field Office Director may prescribe if the alien is subsequently successful in overturning or remanding the immigration judge's decision regarding removability.

(4) *Provisions relating to bond.* The voluntary departure bond shall be posted with the ICE Field Office Director within 5 business days of the immigration judge's order granting voluntary departure, and the ICE Field Office Director may, at his or her discretion, hold the alien in custody until the bond is posted. Because the purpose of the voluntary departure bond is to ensure that the alien does depart from the United States, as promised, the failure to post the bond, when required, within 5 business days may be considered in evaluating whether the alien should be detained based on risk of flight, and also may be considered as a negative discretionary factor with respect to any discretionary form of relief. The alien's failure to post the required voluntary departure bond within the time required does not terminate the alien's obligation to depart within the period allowed or exempt the

alien from the consequences for failure to depart voluntarily during the period allowed. However, if the alien had waived appeal of the immigration judge's decision, the alien's failure to post the required voluntary departure bond within the period allowed means that the alternate order of removal takes effect immediately pursuant to 8 CFR 1241.1(f), except that an alien granted the privilege of voluntary departure under 8 CFR 1240.26(c) will not be deemed to have departed under an order of removal if the alien:

(i) Departs the United States no later than 25 days following the failure to post bond;

(ii) Provides to DHS such evidence of his or her departure as the ICE Field Office Director may require; and

(iii) Provides evidence DHS deems sufficient that he or she remains outside of the United States.

* * * * *

(e) * * *

(1) *Motion to reopen or reconsider filed during the voluntary departure period.* The filing of a motion to reopen or reconsider prior to the expiration of the period allowed for voluntary departure has the effect of automatically terminating the grant of voluntary departure, and accordingly does not toll, stay, or extend the period allowed for voluntary departure under this section. See paragraphs (b)(3)(iii) and (c)(3)(ii) of this section. If the alien files a post-order motion to reopen or reconsider during the period allowed for voluntary departure, the penalties for failure to depart voluntarily under section 240B(d) of the Act shall not apply. The Board shall advise the alien of the condition provided in this paragraph in writing if it reinstates the immigration judge's grant of voluntary departure.

(2) *Motion to reopen or reconsider filed after the expiration of the period allowed for voluntary departure.* The filing of a motion to reopen or a motion to reconsider after the time allowed for voluntary departure has already expired does not in any way impact the period of time allowed for voluntary departure under this section. The granting of a motion to reopen or reconsider that was filed after the penalties under section 240B(d) of the Act had already taken effect, as a consequence of the alien's prior failure voluntarily to depart within the time allowed, does not have the effect of vitiating or vacating those penalties, except as provided in section 240B(d)(2) of the Act.

(f) * * * The filing of a motion to reopen or reconsider does not toll, stay, or extend the period allowed for voluntary departure. The filing of a petition for review has the effect of automatically terminating the grant of voluntary departure, and accordingly also does not toll, stay, or extend the period allowed for voluntary departure.

* * * * *

(i) *Effect of filing a petition for review.* If, prior to departing the United States, the alien files a petition for review pursuant to section 242 of the Act (8 U.S.C. 1252) or any other judicial challenge to the administratively final order, any grant of voluntary departure shall terminate automatically upon the filing of the petition or other judicial challenge and the alternate order of removal entered pursuant to paragraph (d) of this section shall immediately take effect, except that an alien granted the privilege of voluntary departure under 8 CFR 1240.26(c) will not be deemed to have departed under an order of removal if the alien departs the United States no later than 30 days following the filing of a petition for review, provides to DHS such evidence of his or her departure as the ICE Field Office Director may require, and provides evidence DHS deems sufficient that he or she remains outside of the United States. The Board shall advise the alien of the condition provided in this paragraph in writing if it reinstates the immigration judge's grant of voluntary departure. The automatic termination of a grant of voluntary departure and the effectiveness of the alternative order of removal shall not affect, in any way, the date that the order of the immigration judge or the Board became administratively final, as determined under the provisions of the applicable regulations in this chapter. Since the grant of voluntary departure is terminated by the filing of the petition for review, the alien will be subject to the alternate order of removal, but the penalties for failure to depart voluntarily under section 240B(d) of the Act shall not apply to an alien who files a petition for review, and who remains in the United States while the petition for review is pending.

(j) *Penalty for failure to depart.* There shall be a rebuttable presumption that the civil penalty for failure to depart, pursuant to section 240B(d)(1)(A) of the Act, shall be set at $3,000 unless the immigration judge specifically orders a higher or lower amount at the time of granting voluntary departure within the permissible range allowed by law. The immigration judge shall advise the alien of the amount of this civil penalty at the time of granting voluntary departure.

* * * * *

PART 1241—APPREHENSION AND DETENTION OF ALIENS ORDERED REMOVED

■ 4. The authority citation for part 1241 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a; 8 U.S.C. 1103, 1182, 1223, 1224, 1225, 1226, 227, 1231, 1251, 1253, 1255, 1330, 1362; 18 U.S.C. 4002, 4013(c)(4).

■ 5. Section 1241.1 is amended by revising paragraph (f), to read as follows:

§ 1241.1 Final order of removal.

* * * * *

(f) If an immigration judge issues an alternate order of removal in connection with a grant of voluntary departure, upon overstay of the voluntary departure period, or upon the failure to post a required voluntary departure bond within 5 business days. If the respondent has filed a timely appeal with the Board, the order shall become final upon an order of removal by the Board or the Attorney General, or upon overstay of the voluntary departure period granted or reinstated by the Board or the Attorney General.

Dated: December 12, 2008.

Michael B. Mukasey,

Attorney General.

BILLING CODE 4410–30–P

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

12 CFR Parts 516 and 575

[OTS No. 2008–0023]

Technical Amendments

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Final rule.

SUMMARY: The Office of Thrift Supervision (OTS) is amending its regulations to incorporate technical and conforming amendments. They include clarifications and corrections of typographical errors.

DATES: *Effective Date:* December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Sandra E. Evans, Legal Information Assistant (Regulations), (202) 906–6076, or Marvin Shaw, Senior Attorney, (202) 906–6639, Regulations and Legislation Division, Chief Counsel's Office, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: OTS is amending its regulations to incorporate

technical and conforming amendments. OTS is making the following miscellaneous changes:

Section 516.40—Application Processing Procedures. The final rule revises the table in 12 CFR 516.40 to add contact information for the agency's Central region.

Sections 575.9 and 575.14—Optional Charter Provisions in Mutual Holding Company Structures. OTS permits certain MHC subsidiaries to adopt an optional charter provision that would prohibit any person from acquiring, or offering to acquire beneficial ownership of more than ten percent of the MHC subsidiary's minority stock (stock held by persons other than the subsidiary's MHC).[1] This final rule modifies the instruction contained in sections 12 CFR 575.9(c) and 575.14(c)(3) to read: ''[insert date within five years of a minority stock issuance] * * *.'' Today's change corrects the July final rule which inadvertently stated ''[insert date of minority stock issuance].''

Administrative Procedure Act; Riegle Community Development and Regulatory Improvement Act of 1994

OTS finds that there is good cause to dispense with prior notice and comment on this final rule and with the 30-day delay of effective date mandated by the Administrative Procedure Act.[2] OTS believes that these procedures are unnecessary and contrary to public interest because the rule merely makes technical changes to existing provisions. Because the amendments in the rule are not substantive, these changes will not affect savings associations.

Section 302 of the Riegle Community Development and Regulatory Improvement Act of 1994 provides that regulations that impose additional reporting, disclosure, or other new requirements may not take effect before the first day of the quarter following publication.[3] This section does not apply because this final rule imposes no additional requirements and makes only technical changes to existing regulations.

Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act,[4] the OTS Director certifies that this technical corrections regulation will not have a significant economic impact on a substantial number of small entities.

Executive Order 12866

OTS has determined that this rule is not a ''significant regulatory action'' for purposes of Executive Order 12866.

Unfunded Mandates Reform Act of 1995

OTS has determined that the requirements of this final rule will not result in expenditures by State, local, and tribal governments, or by the private sector, of $100 million or more in any one year. Accordingly, a budgetary impact statement is not required under section 202 of the Unfunded Mandates Reform Act of 1995.

List of Subjects

12 CFR Part 516

Administrative practice and procedure, Reporting and recordkeeping requirements, Savings associations.

12 CFR Part 575

Administrative practice and procedure, Capital, Holding companies, Reporting and recordkeeping requirements, Savings Associations, Securities.

■ Accordingly, the Office of Thrift Supervision amends title 12, chapter V of the Code of Federal Regulations, as set forth below.

PART 516—APPLICATION PROCESSING PROCEDURES

■ 1. The authority citation for part 516 continues to read as follows:

Authority: 5 U.S.C. 552, 559; 12 U.S.C. 1462a, 1463, 1464, 2901 *et seq.*

■ 2. Revise the table in § 516.40(a)(2) to read as follows:

§ 516.40 Where do I file my application?

(a) * * *

(2) * * *

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2008–1018; Airspace Docket No. 08–AAL–31]

Revocation of Class E Airspace; Metlakatla, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revokes Class E airspace at Metlakatla, AK. The privately funded special instrument approaches serving Metlakatla Airport have been removed. There is no longer a requirement for the controlled airspace. This action revokes existing Class E airspace surrounding the Metlakatla Airport, Metlakatla, AK.

DATES: *Effective Date:* 0901 UTC, March 12, 2009. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Gary Rolf, AAL–538G, Federal Aviation Administration, 222 West 7th Avenue, Box 14, Anchorage, AK 99513–7587; telephone number (907) 271–5898; fax: (907) 271–2850; e-mail: *gary.ctr.rolf@faa.gov*. Internet address: *http://www.faa.gov/about/office_org/headquarters_offices/ato/service_units/systemops/fs/alaskan/rulemaking/*.

SUPPLEMENTARY INFORMATION:

History

On Friday, October 17, 2008, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revoke the Class E airspace at Metlakatla, AK (73 FR 61752). The action was proposed in order to remove controlled airspace no longer necessary, due to the removal of the existing instrument approach procedure previously serving the Metlakatla Airport. Class E controlled airspace associated with the Metlakatla Airport area is revoked by this action.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received. The rule is adopted as proposed.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1,200 ft. transition areas are published in paragraph 6005 of FAA Order 7400.9S, *Airspace Designations and Reporting Points*, signed October 3, 2008, and effective October 31, 2008, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 revokes Class E airspace at the Metlakatla Airport, Alaska. This Class E airspace is revoked because there are no longer any instrument procedures at the Metlakatla Airport, and the airspace depiction will be removed from aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Because this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart 1, Section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it revokes Class E airspace no longer necessary for the Metlakatla Airport and represents the FAA's continuing effort to safely and efficiently use the navigable airspace.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9S, *Airspace Designations and Reporting Points*, signed October 3, 2008, and effective October 31, 2008, is amended as follows:

Paragraph 6005 Class E Airspace Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AAL AK E5 Metlakatla, AK [Revoked]

[Docket No. SSA–2008–0005]

RIN 0960–AG75

Clarification of Evidentiary Standard for Determinations and Decisions

AGENCY: Social Security Administration.

ACTION: Final Rules.

SUMMARY: We are amending our rules to clarify that we apply the preponderance of the evidence standard when we make determinations and decisions at all levels of our administrative review

process. These rules do not change our policy that the Appeals Council applies the substantial evidence standard when it reviews a decision by an administrative law judge (ALJ) to determine whether to grant a request for review. We are also adding definitions of the terms ''substantial evidence'' and ''preponderance of the evidence'' for use in applying these rules.

DATES: These final rules are effective on January 20, 2009.

FOR FURTHER INFORMATION CONTACT: Joshua Silverman, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235–6401, (410) 594–2128, for information about these rules. For information on eligibility or filing for benefits, call our national toll-free number, 1–800–772–1213 or TTY 1–800–325–0778, or visit our Internet site, Social Security Online, at *http://www.socialsecurity.gov.*

SUPPLEMENTARY INFORMATION:

Electronic Version

The electronic file of this document is available on the date of publication in the **Federal Register** at *http://www.gpoaccess.gov/fr/index.html.*

Explanation of Changes

Our Administrative Review Process

We currently decide claims for benefits using an administrative review process that consists of four levels: Initial determination, reconsideration, hearing before an ALJ, and Appeals Council review. See 20 CFR 404.900, 408.1000, and 416.1400. We make an initial determination at the first level. If a person is dissatisfied with the initial determination, he may request reconsideration.[1] If a person is dissatisfied with the reconsidered determination, he may request a hearing before an ALJ.[2] Finally, if a person is dissatisfied with the ALJ's decision,[3] he may request that the Appeals Council review that decision. Once a person has completed these administrative steps and received our final decision, the person may request judicial review of the final decision in Federal district court.

Each adjudicator reviewing a claim in the administrative process makes an independent (or de novo) determination or decision based on the evidence in the record.[4] For example, an ALJ would not simply review a State agency's initial and reconsideration disability determinations to determine whether they were correct. Rather, the ALJ would review the evidence in the record and make an independent decision.

In contrast, in deciding whether to grant a person's request for Appeals Council review of an ALJ's decision, the Appeals Council first considers the ALJ's decision and the evidence before the ALJ using the substantial evidence standard of review, which we discuss below. If the Appeals Council does not grant a request for review, the ALJ's decision becomes our final decision.[5] If the Appeals Council grants the request for review, it will usually either remand the case to an ALJ for additional proceedings and a new decision or issue its own decision.

Our Standard of Proof

A claimant has the burden of proving his claim with us. Adjudicators at each level of the administrative review process, including the Appeals Council, consider whether a claimant has proven his claim using an evidentiary standard called the ''preponderance of the evidence'' when they make a determination or decision. We define preponderance of the evidence as ''such relevant evidence that as a whole shows that the existence of the fact to be proven is more likely than not.'' 20 CFR 405.5.

The Social Security Act does not specify the standard of proof to use when we make a determination or decision. Courts and scholars have long recognized that the preponderance of the evidence standard is the traditional standard of proof in a civil or an administrative adjudicatory proceeding.[6] Our longstanding policy has been that the preponderance of the evidence standard applies to determinations or decisions on claims under parts 404, 408, and 416.[7] Prior to these final rules, we did not have regulations in parts 404, 408, and 416 that clearly stated that we use the preponderance of the evidence standard when we make a determination or decision. The absence of explicit language in these parts explaining the standards we use at each level of the administrative process caused some confusion about the applicable standard. By issuing these final rules, we intend to resolve any confusion about the applicable standard.

Our Standard of Review at the Appeals Council

When the Appeals Council considers whether to grant a request for review of an ALJ's decision, it does not use a preponderance of the evidence standard. Instead, it considers, among other things, whether the action, findings, or conclusions of the ALJ are supported by substantial evidence.[8] 20 CFR 404.970(a) and 416.1470(a). The definition of substantial evidence in these final rules is ''such relevant evidence as a reasonable mind might accept as adequate to support a conclusion.'' The substantial evidence standard of review gives deference to the findings of the ALJ rather than requiring a decision based on a new evaluation of the evidence.[9]

---

[1] For disability claims, there are ten States that are participating in a ''prototype'' test under 20 CFR 404.906 and 416.1406. In these States, the second step for people who are dissatisfied with their initial determinations in disability cases is a hearing before an ALJ. The ten States are: Alabama, Alaska, California (Los Angeles North and West Branches), Colorado, Louisiana, Michigan, Missouri, New Hampshire, New York, and Pennsylvania.

[2] In some cases, attorney advisors in our Office of Disability Adjudication and Review make wholly favorable decisions before an ALJ hearing is conducted. 20 CFR 404.942 and 416.1442.

[3] The words ''determination'' and ''decision'' are defined in 20 CFR 404.900 and 416.1400. At the initial and reconsideration levels of the administrative review process, we issue ''determinations.'' At the ALJ hearing and Appeals Council levels, we issue ''decisions.''

[4] In some States, adjudicators must consider, and sometimes adopt, certain findings made in prior disability adjudications under acquiescence rulings (ARs) that we have issued to address circuit court holdings. See AR 97–4(9), 62 FR 64038, available at: *http://www.socialsecurity.gov/OP_Home/rulings/ar/09/AR97-04-ar-09.html*; AR 98-3(6), 63 FR 29770, available at: *http://www.socialsecurity.gov/OP_Home/rulings/ar/06/AR98-03-ar-06.html*; AR 98-4(6), 63 FR 29771, corrected at 63 FR 31266, available at: *http://www.socialsecurity.gov/OP_Home/rulings/ar/06/AR98-04-ar-06.html*; and AR 00-1(4), 65 FR 1936, available at: *http://www.socialsecurity.gov/OP_Home/rulings/ar/04/AR2000-01-ar-04.html.*

[5] The Appeals Council may also dismiss the request for review either with or without first granting the request. Additionally, the Appeals Council may review a case on its own motion without an individual asking it to do so. See 20 CFR 404.967, 404.969, 404.984, 416.1467, 416.1469, and 416.1484. See also 20 CFR 408.1050, which incorporates the relevant provisions of 20 CFR 416.1467–416.1482 by reference.

[6] Federal courts apply a substantial evidence standard when they review our final decisions. 42 U.S.C. 405(g), 1009(b), and 1383(c)(3).

[7] A claimant must give us ''convincing'' evidence to prove that he meets certain requirements for eligibility, as described in subpart H of parts 404 and 416. Because these final rules address the appropriate standard of proof to be applied in making determinations or decisions rather than the burden of proving eligibility for benefits, these final rules are not applicable to subpart H of parts 404 and 416.

[8] The Appeals Council also reviews any new and material evidence under 20 CFR 404.970(b) and 416.1470(b).

[9] Our regulations also provide that the Associate Commissioner for Disability Determinations or his delegate may use the substantial evidence standard of review when reviewing a sample of disability hearing officers' reconsideration determinations. 20 CFR 404.918 and 416.1418. In general, disability hearing officers make reconsideration determinations in cases of beneficiaries who we have determined are no longer disabled. See 20 CFR 404.914–404.918 and 416.1414–416.1418.

As stated earlier, the Appeals Council uses the substantial evidence standard to decide whether to review an ALJ's decision. If it grants review and then issues its own decision, the Appeals Council uses the preponderance of the evidence standard when it issues its decision.

Explanation of Changes

We are revising several regulation sections in parts 404, 408, 416, and 422 to clarify that we use the preponderance of the evidence standard of proof to adjudicate claims at all levels of the administrative review process. We also are adding a definition of the term ''preponderance of the evidence'' in 20 CFR 404.901, 408.1001, and 416.1401, and a definition of the term ''substantial evidence'' in 20 CFR 404.901 and 416.1401. These are the same definitions we currently use in 20 CFR 405.5.

We are also making additional changes from the language proposed in the NPRM. None of these changes alter the meaning of these sections. First, we are revising several of the affected regulatory sections in these final rules to put them in active voice and to use consistent language. Second, we are making two changes to 20 CFR 422.203(c). We are adding a reference to attorney advisor decisions under 20 CFR 404.942 and 416.1142 and deleting the phrase ''under applicable provisions of the law and regulations and appropriate precedents.'' These changes make the language in section 20 CFR 422.203(c) consistent with the language in final 20 CFR 404.953(a) and 416.1453(a), and they acknowledge that, under certain circumstances, attorney advisors can make decisions instead of an ALJ under 20 CFR 404.942 and 416.1442.

We believe these clarifications will improve the accuracy and consistency of the decision-making process.

We have the authority to make these changes under 42 U.S.C. 405(a), 902(a)(5), 1010(a), and 1383(d)(1).

Public Comments

In the notice of proposed rulemaking published at 73 FR 33745 (June 13, 2008), we provided the public with a 60-day period in which to comment on the proposed changes. That comment period ended on August 12, 2008. We received comments from four people. We carefully considered each comment. Because some of the comments were long and quite detailed, we have condensed, summarized, and paraphrased them in the following discussions. However, we have tried to present all views adequately and to address carefully all of the significant issues raised by the commenters that are within the scope of the proposed rules. We generally have not addressed comments that are outside the scope of the rulemaking proceeding.

Comment: One commenter generally supported the proposed rules and said that there should be only one evidentiary standard used by our adjudicators at all levels of the adjudication process.

Response: We agree with the commenter that adjudicators at each level of the administrative review process, including the Appeals Council, should use the same evidentiary standard. These rules provide that they will all use the preponderance of the evidence standard of proof when they make determinations or decisions. As stated above, the Appeals Council only uses the substantial evidence standard of review when it considers whether to grant a request for review of an ALJ's decision. Although it is unclear from the commenter's letter, to the extent that the commenter suggested that the Appeals Council should apply the preponderance of the evidence standard of proof when it reviews an ALJ's decision, we are not adopting the comment. Our rules governing the Appeals Council's use of the substantial evidence standard to review ALJ decisions have worked well, and we do not believe that there is any reason to change them.

Comment: Two commenters were concerned that the proposed changes could create an ambiguity about who has the burden of proof. One of these commenters also said that our determinations and decisions should be made based on substantial evidence and that the burden of a party is to provide proof by a preponderance of the evidence. Both commenters expressed concern that the proposed changes could appear to shift the burden of proof in disability cases to us by requiring that we base our determinations and decisions on a preponderance of the evidence. One of these commenters suggested that we add regulatory text to explain who has the burden of proof at each of the five steps of the sequential evaluation process that we use to decide whether a person is disabled. See 20 CFR 404.1520 and 416.920.

Response: We are not adopting this comment. These final rules concern the appropriate standard of proof, not who has the burden of proof at any stage of our sequential evaluation process. Our current regulations explain the burden of proof in disability claims.[10] We previously explained the concept of how the burden of proof, a term traditionally associated with adversarial litigation, applies in the context of our nonadversarial system. 68 FR 51153, 51154–51155 (Aug. 26, 2003). We do not believe that it is appropriate to make the changes suggested by the commenters because these final rules do not change the allocation of the burden of proof in our adjudications.

Comment: One commenter said that our use of the word ''review'' in several of the proposed sections was ambiguous. The commenter thought that it was unclear whether we meant a review of the evidence or a review of the determination or decision. The commenter suggested that we use a phrase such as ''again look'' instead of ''review'' when we refer to reviewing evidence.

Response: We are not adopting this comment. In many sections of our rules, we use the word ''review'' to refer generally to a consideration of evidence. With regard to the Appeals Council's review of a decision or a dismissal, we use the word ''review'' as a term of art.[11] We believe that the plain meaning of the word is readily apparent in the context of the sections of the regulations in which we use it, and we are not aware that these longstanding usages have confused either adjudicators or the public.

Comment: One commenter suggested changes to our proposed language for 20 CFR 404.979, 404.984, 416.1479, and 416.1484. Specifically, the commenter suggested amending those sections to state that the Appeals Council uses the substantial evidence standard when it remands a case to an ALJ, and that the Appeals Council will remand a case it reviewed to an ALJ for further proceedings unless the decision being appealed is supported by substantial evidence.

Response: We are not adopting this comment because it is inconsistent with our existing regulations, which provide that the Appeals Council may grant a request for review and remand a case for reasons other than a lack of substantial evidence to support a decision. See 20

[10] See 20 CFR 404.1512, 404.1560(c)(2), 404.1566(c), 416.912, 416.960(c)(2), and 416.966(c). A claimant has the burden of providing proof of his disability under each of the first four steps in the sequential evaluation process. In the fifth and final step of the sequential evaluation process, we become responsible for providing evidence that demonstrates that other work exists in significant numbers in the national economy that the claimant can perform after considering the claimant's residual functional capacity, age, education, and work experience. However, a claimant must persuade us that he is disabled at each step of the sequential evaluation process. See *Bowen* v. *Yuckert*, 482 U.S. 137, 146 (1987).

[11] See, *e.g.*, 20 CFR 404.967 and 416.1467.

CFR 404.970 and 416.1470. The Appeals Council may also remand a case to an ALJ pursuant to a Federal court's instructions without conducting its own review. See 20 CFR 404.983 and 416.1483.

Comment: One commenter suggested that we change both of our proposed definitions. He also suggested that we adopt a new term— ''substantial evidence standard of review''— that would address when a reviewing body may remand a decision based on an adjudicator's failure to discuss evidence and that we amend 20 CFR 404.902 and 416.1492 accordingly.

Response: We are not adopting this comment. As we noted above, our definitions of the terms ''preponderance of the evidence'' and ''substantial evidence'' are taken directly from our existing rule in 20 CFR 405.5. The definitions in that rule are based on accepted definitions and are consistent with our longstanding usage. The commenter's proposed additions to these definitions would not appreciably clarify our rules, and some of the language the commenter proposed could raise questions among the public and our adjudicators. We also believe that our adjudicators and the public are familiar with the concept of substantial evidence because our subregulatory instructions have included a definition of ''substantial evidence'' for approximately 37 years. See SSR 71–53c.

The commenter's other proposals are beyond the scope of this rulemaking because they focus on how the Appeals Council or a Federal court can determine whether a decision is supported by substantial evidence. If we decide that it would be appropriate to adopt rules along the lines proposed by the commenter, we would first follow the Administrative Procedure Act's rulemaking procedures.

Regulatory Procedures

Executive Order 12866, as Amended

We have consulted with the Office of Management and Budget (OMB) and determined that these rules do not meet the criteria for a significant regulatory action under Executive Order 12866, as amended. Thus, they were not subject to OMB review.

Regulatory Flexibility Act

We certify that these rules will not have a significant economic impact on a substantial number of small entities as they affect individuals only. Therefore, a regulatory flexibility analysis as provided in the Regulatory Flexibility Act, as amended, is not required.

Paperwork Reduction Act

These rules will impose no additional reporting or recordkeeping requirements requiring OMB clearance.

Administrative practice and procedure, Aged, Blind, Disability benefits, Public assistance programs, Reporting and recordkeeping requirements, Supplemental Security Income (SSI).

20 CFR Part 422

Administrative practice and procedure, Organization and functions (Government agencies), Reporting and recordkeeping requirements, Social Security.

Dated: December 12, 2008.

Michael J. Astrue,

Commissioner of Social Security.

■ For the reasons set forth in the preamble, we are amending subpart J of part 404, subpart J of part 408, subpart N of part 416, and subparts B and C of part 422 of chapter III of title 20 of the Code of Federal Regulations as set forth below:

PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE (1950–)

Subpart J—[Amended]

■ 1. The authority citation for subpart J of part 404 continues to read as follows:

Authority: Secs. 201(j), 204(f), 205(a), (b), (d)–(h), and (j), 221, 223(i), 225, and 702(a)(5) of the Social Security Act (42 U.S.C. 401(j), 404(f), 405(a), (b), (d)–(h), and (j), 421, 423(i), 425, and 902(a)(5)); sec. 5, Pub. L. 97–455, 96 Stat. 2500 (42 U.S.C. 405 note); secs. 5, 6(c)–(e), and 15, Pub. L. 98–460, 98 Stat. 1802 (42 U.S.C. 421 note); sec. 202, Pub. L. 108–203, 118 Stat. 509 (42 U.S.C. 902 note).

■ 2. Amend § 404.901 by adding the definitions for *''Preponderance of the evidence''* and *''Substantial evidence''* in alphabetical order to read as follows:

§ 404.901 Definitions.

* * * * *

Preponderance of the evidence means such relevant evidence that as a whole shows that the existence of the fact to be proven is more likely than not.

* * * * *

Substantial evidence means such relevant evidence as a reasonable mind might accept as adequate to support a conclusion.

* * * * *

■ 3. Amend § 404.902 by revising the second sentence and adding a new sentence before the existing third sentence in the introductory text to read as follows:

§ 404.902 Administrative actions that are initial determinations.

* * * We will base our initial determination on the preponderance of the evidence. We will state the important facts and give the reasons for our conclusions in the initial determination. * * *

* * * * *

■ 4. Amend § 404.917 by revising the second sentence of paragraph (b) to read as follows:

§ 404.917 Disability hearing–disability hearing officer's reconsidered determination.

* * * * *

(b) * * * The disability hearing officer must base the reconsidered determination on the preponderance of the evidence offered at the disability hearing or otherwise included in your case file.

* * * * *

■ 5. Revise § 404.920 to read as follows:

§ 404.920 Reconsidered determination.

After you or another person requests a reconsideration, we will review the evidence we considered in making the initial determination and any other evidence we receive. We will make our determination based on the preponderance of the evidence.

■ 6. Amend § 404.941 by revising the second sentence of paragraph (a) to read as follows:

§ 404.941 Prehearing case review.

(a) * * * That component will decide whether it should revise the determination based on the preponderance of the evidence. * * *

* * * * *

■ 7. Amend § 404.942 by revising the second sentence of paragraph (a) to read as follows:

§ 404.942 Prehearing proceedings and decisions by attorney advisors.

(a) * * * If after the completion of these proceedings we can make a decision that is wholly favorable to you and all other parties based on the preponderance of the evidence, an attorney advisor, instead of an administrative law judge, may issue the decision. * * *

* * * * *

■ 8. Amend § 404.948 by revising the first sentence of paragraph (a) to read as follows:

§ 404.948 Deciding a case without an oral hearing before an administrative law judge.

(a) * * * If the evidence in the hearing record supports a finding in favor of you and all the parties on every issue, the administrative law judge may issue a hearing decision based on a preponderance of the evidence without holding an oral hearing. * * *

* * * * *

■ 9. Amend § 404.953 by revising the second sentence of paragraph (a), the first sentence of paragraph (b), and the first sentence of paragraph (c) to read as follows:

§ 404.953 The decision of an administrative law judge.

(a) * * * The administrative law judge must base the decision on the preponderance of the evidence offered at the hearing or otherwise included in the record. * * *

(b) * * * The administrative law judge may enter a wholly favorable oral decision based on the preponderance of the evidence into the record of the hearing proceedings. * * *

(c) * * * Although an administrative law judge will usually make a decision, the administrative law judge may send the case to the Appeals Council with a recommended decision based on a preponderance of the evidence when appropriate. * * *

■ 10. Amend § 404.979 by adding a new third sentence to read as follows:

§ 404.979 Decision of Appeals Council.

* * * If the Appeals Council issues its own decision, it will base its decision on the preponderance of the evidence. * * *

■ 11. Amend § 404.984 by revising the last sentence of paragraph (a), the second sentence of paragraph (b)(3), and the last sentence of paragraph (c) to read as follows:

§ 404.984 Appeals Council review of administrative law judge decision in a case remanded by a Federal court.

(a) * * * The Appeals Council will either make a new, independent decision based on the preponderance of the evidence in the record that will be the final decision of the Commissioner after remand, or it will remand the case to an administrative law judge for further proceedings.

(b) * * *

(3) * * * If the Appeals Council assumes jurisdiction, it will make a new, independent decision based on the preponderance of the evidence in the entire record affirming, modifying, or reversing the decision of the administrative law judge, or it will remand the case to an administrative law judge for further proceedings, including a new decision. * * *

(c) * * * After the Appeals Council receives the briefs or other written statements, or the time allowed (usually 30 days) for submitting them has expired, the Appeals Council will either issue a final decision of the Commissioner based on the preponderance of the evidence affirming, modifying, or reversing the decision of the administrative law judge, or remand the case to an administrative law judge for further proceedings, including a new decision.

* * * * *

PART 408—SPECIAL BENEFITS FOR CERTAIN WORLD WAR II VETERANS

Subpart J—[Amended]

■ 12. The authority citation for subpart J of part 408 continues to read as follows:

Authority: Secs. 702(a)(5) and 809 of the Social Security Act (42 U.S.C. 902(a)(5) and 1009).

■ 13. Amend § 408.1001 by adding the definition for *''Preponderance of the evidence''* in alphabetical order to read as follows:

§ 408.1001 Definitions.

* * * * *

Preponderance of the evidence means such relevant evidence that as a whole shows that the existence of the fact to be proven is more likely than not.

* * * * *

■ 14. Amend § 408.1002 by adding a new third sentence to read as follows:

§ 408.1002 What is an initial determination?

* * * We will base our initial determination on the preponderance of the evidence.

■ 15. Amend § 408.1020 by revising the second sentence to read as follows:

§ 408.1020 How do we make our reconsidered determination?

* * * We will make our determination based on the preponderance of the evidence in the record. * * *

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Subpart N—[Amended]

■ 16. The authority citation for subpart N of part 416 continues to read as follows:

Authority: Secs. 702(a)(5), 1631, and 1633 of the Social Security Act (42 U.S.C. 902(a)(5), 1383, and 1383b); sec. 202, Pub. L. 108–203, 118 Stat. 509 (42 U.S.C. 902 note).

■ 17. Amend § 416.1401 by adding the definitions for *''Preponderance of the evidence''* and *''Substantial evidence''* in alphabetical order to read as follows:

§ 416.1401 Definitions.

* * * * *

Preponderance of the evidence means such relevant evidence that as a whole shows that the existence of the fact to be proven is more likely than not.

* * * * *

Substantial evidence means such relevant evidence as a reasonable mind might accept as adequate to support a conclusion.

* * * * *

■ 18. Amend § 416.1402 by revising the second sentence and adding a new sentence before the existing third sentence in the introductory text to read as follows:

§ 416.1402 Administrative actions that are initial determinations.

* * * We will base our initial determination on the preponderance of the evidence. We will state the important facts and give the reasons for our conclusions in the initial determination. * * *

* * * * *

■ 19. Amend § 416.1417 by revising the second sentence of paragraph (b) to read as follows:

§ 416.1417 Disability hearing—disability hearing officer's reconsidered determination.

* * * * *

(b) * * * The disability hearing officer must base the reconsidered determination on the preponderance of the evidence offered at the disability

hearing or otherwise included in your case file.

* * * * *

■ 20. Revise § 416.1420 to read as follows:

§ 416.1420 Reconsidered determination.

After you or another person requests a reconsideration, we will review the evidence we considered in making the initial determination and any other evidence we receive. We will make our determination based on the preponderance of the evidence. The person who makes the reconsidered determination will have had no prior involvement with the initial determination.

■ 21. Amend § 416.1441 by revising the second sentence of paragraph (a) to read as follows:

§ 416.1441 Prehearing case review.

(a) * * * That component will decide whether it should revise the determination based on the preponderance of the evidence. * * *

* * * * *

■ 22. Amend § 416.1442 by revising the second sentence of paragraph (a) to read as follows:

§ 416.1442 Prehearing proceedings and decisions by attorney advisors.

(a) * * * If after the completion of these proceedings we can make a decision that is wholly favorable to you and all other parties based on the preponderance of the evidence, an attorney advisor, instead of an administrative law judge, may issue the decision. * * *

* * * * *

■ 23. Amend § 416.1448 by revising the first sentence of paragraph (a) to read as follows:

§ 416.1448 Deciding a case without an oral hearing before an administrative law judge.

(a) * * * If the evidence in the hearing record supports a finding in favor of you and all the parties on every issue, the administrative law judge may issue a hearing decision based on a preponderance of the evidence without holding an oral hearing. * * *

* * * * *

■ 24. Amend § 416.1453 by revising the second sentence of paragraph (a), the first sentence of paragraph (b), and the first sentence of paragraph (d) to read as follows:

§ 416.1453 The decision of an administrative law judge.

(a) * * * The administrative law judge must base the decision on the preponderance of the evidence offered at the hearing or otherwise included in the record. * * *

(b) * * * The administrative law judge may enter a wholly favorable oral decision based on the preponderance of the evidence into the record of the hearing proceedings. * * *

* * * * *

(d) * * * Although an administrative law judge will usually make a decision, the administrative law judge may send the case to the Appeals Council with a recommended decision based on a preponderance of the evidence when appropriate. * * *

■ 25. Amend § 416.1479 by adding a new third sentence to read as follows:

§ 416.1479 Decision of Appeals Council.

* * * If the Appeals Council issues its own decision, it will base its decision on the preponderance of the evidence. * * *

■ 26. Amend § 416.1484 by revising the last sentence of paragraph (a), the second sentence of paragraph (b)(3), and the last sentence of paragraph (c) to read as follows:

§ 416.1484 Appeals Council review of administrative law judge decision in a case remanded by a Federal court.

(a) * * * The Appeals Council will either make a new, independent decision based on the preponderance of the evidence in the record that will be the final decision of the Commissioner after remand, or it will remand the case to an administrative law judge for further proceedings.

(b) * * *

(3) * * * If the Appeals Council assumes jurisdiction, it will make a new, independent decision based on the preponderance of the evidence in the entire record affirming, modifying, or reversing the decision of the administrative law judge, or it will remand the case to an administrative law judge for further proceedings, including a new decision. * * *

(c) * * * After the Appeals Council receives the briefs or other written statements, or the time allowed (usually 30 days) for submitting them has expired, the Appeals Council will either issue a final decision of the Commissioner based on the preponderance of the evidence affirming, modifying, or reversing the decision of the administrative law judge, or remand the case to an administrative law judge for further proceedings, including a new decision.

* * * * *

PART 422—ORGANIZATION AND PROCEDURES

Subpart B—[Amended]

■ 27. The authority citation for subpart B of part 422 continues to read as follows:

Authority: Secs. 205, 232, 702(a)(5), 1131, and 1143 of the Social Security Act (42 U.S.C. 405, 432, 902(a)(5), 1320b–1, and 1320b–13), and sec. 7213(a)(1)(A) of Pub. L. 108–458.

■ 28. Amend § 422.130 by revising the first sentence of paragraph (c) to read as follows:

§ 422.130 Claim procedure.

* * * * *

(c) * * * In the case of an application for benefits, the establishment of a period of disability, a lump-sum death payment, a recomputation of a primary insurance amount, or entitlement to hospital insurance benefits or supplementary medical insurance benefits, after obtaining the necessary evidence, we will determine, based on the preponderance of the evidence (see §§ 404.901 and 416.1401 of this chapter) as to the entitlement of the individual claiming or for whom is claimed such benefits, and will notify the applicant of the determination and of his right to appeal. * * *

Subpart C—[Amended]

■ 29. The authority citation for subpart C of part 422 continues to read as follows:

Authority: Secs. 205, 221, and 702(a)(5) of the Social Security Act (42 U.S.C. 405, 421, and 902(a)(5)); 30 U.S.C. 923(b).

■ 30. Revise the last sentence of § 422.203(c) to read as follows:

§ 422.203 Hearings.

* * * * *

(c) * * * The administrative law judge, or an attorney advisor under §§ 404.942 or 416.1442 of this chapter, must base the hearing decision on the preponderance of the evidence offered at the hearing or otherwise included in the record.

[FR Doc. E8–30056 Filed 12–17–08; 8:45 am]

BILLING CODE 4191–02–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2008–N–0039]

21 CFR Parts 520 and 558

New Animal Drugs; Tylosin

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of two supplemental new animal drug applications (NADAs) filed by Elanco Animal Health. The supplemental NADAs provide for use of tylosin tartrate soluble powder in drinking water of swine followed by tylosin phosphate in medicated swine feed for the treatment and control of swine dysentery and the control of porcine proliferative enteropathies.

DATES: This rule is effective December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Cindy L. Burnsteel, Center for Veterinary Medicine (HFV–130), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 240–276–8341, e-mail: *cindy.burnsteel@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: Elanco Animal Health, A Division of Eli Lilly & Co., Lilly Corporate Center, Indianapolis, IN 46285, filed a supplement to NADA 12 491 for use of TYLAN (tylosin phosphate) Type A medicated article. The supplement provides for use of tylosin tartrate in medicated drinking water for swine for 3 to 10 days followed by administration of tylosin phosphate in medicated swine feed for 2 to 6 weeks for the control of porcine proliferative enteropathies (PPE, ileitis) associated with *Lawsonia intracellularis*.

Under section 512(c)(2)(F)(iii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(iii)), this supplemental approval qualifies for 3 years of marketing exclusivity beginning on the date of approval.

In accordance with the freedom of information provisions of 21 CFR part 20 and 21 CFR 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

Elanco Animal Health also filed a supplement to NADA 13 076 for use of TYLAN (tylosin tartrate) Soluble. The supplement provides for use of tylosin tartrate in medicated drinking water for swine for 3 to 10 days followed by administration of tylosin phosphate in medicated swine feed for 2 to 6 weeks for the treatment and control of swine dysentery associated with *Brachyspira hyodysenteriae* and for the control of porcine proliferative enteropathies (PPE, ileitis) associated with *Lawsonia intracellularis*.

Under section 512(c)(2)(F)(iii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(iii)), this supplemental approval qualifies for 3 years of marketing exclusivity beginning on the date of approval. This period of marketing exclusivity applies only to the claim for the control of porcine proliferative enteropathies (PPE, ileitis) associated with *Lawsonia intracellularis*.

The supplemental NADAs are approved as of November 13, 2008, and the regulations in 21 CFR 520.2640 and 558.625 are amended to reflect the approval.

The agency has determined under 21 CFR 25.33(a)(1) that these actions are of a type that do not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of ''rule'' in 5 U.S.C. 804(3)(A) because it is a rule of ''particular applicability.'' Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects

21 CFR Part 520

Animal drugs.

21 CFR Part 558

Animal drugs, Animal feeds.

■ Therefore, under the Federal Food, Drug, and Cosmetic Act and under the authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 520 and 558 are amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

■ 1. The authority citation for 21 CFR part 520 continues to read as follows:

Authority: 21 U.S.C. 360b.

■ 2. In § 520.2640, remove paragraph (c); redesignate paragraphs (d) and (e) as paragraphs (c) and (d); and revise paragraphs (a) and newly redesignated paragraphs (d)(1), (d)(2), and (d)(3) to read as follows:

§ 520.2640 Tylosin.

(a) *Specifications*. Each jar contains tylosin tartrate equivalent to 100 grams tylosin base.

* * * * *

(d) * * *

(1) *Chickens*—(i) *Amount*. 2 grams per gallon for 1 to 5 days as the sole source of drinking water. Treated chickens should consume enough medicated drinking water to provide 50 milligrams (mg) tylosin per pound of body weight per day.

(ii) *Indications for use*. As an aid in the treatment of chronic respiratory disease (CRD) associated with *Mycoplasma gallisepticum* sensitive to tylosin in broiler and replacement chickens. For the control of chronic respiratory disease (CRD) associated with *M. gallisepticum* sensitive to tylosin at time of vaccination or other stress in chickens. For the control of chronic respiratory disease (CRD) associated with *Mycoplasma synoviae* sensitive to tylosin in broiler chickens.

(iii) *Limitations*. Prepare a fresh solution every 3 days. Do not use in layers producing eggs for human consumption. Do not administer within 24 hours of slaughter.

(2) *Turkeys*—(i) *Amount*. 2 grams per gallon for 2 to 5 days as the sole source of drinking water. Treated turkeys should consume enough medicated drinking water to provide 60 mg tylosin per pound of body weight per day.

(ii) *Indications for use*. For maintaining weight gains and feed efficiency in the presence of infectious sinusitis associated with *Mycoplasma gallisepticum* sensitive to tylosin.

(iii) *Limitations*. Prepare a fresh solution every 3 days. Do not use in layers producing eggs for human consumption. Do not administer within 5 days of slaughter.

(3) *Swine*—(i) *Amount*. 250 mg per gallon as the only source of drinking water for 3 to 10 days, depending on the severity of the condition being treated.

(ii) *Indications for use*. For the control and treatment of swine dysentery associated with *Brachyspira hyodysenteriae* and for the control of porcine proliferative enteropathies (PPE, ileitis) associated with *Lawsonia intracellularis*.

(iii) *Limitations*. Prepare a fresh solution daily. Do not administer within 48 hours of slaughter. Follow with tylosin phosphate medicated feed as in § 558.625(f)(1)(vi)(*c*) of this chapter.

* * * * *

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

■ 3. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: 21 U.S.C. 360b, 371.

■ 4. In § 558.625, revise paragraphs (a), (f)(1)(vi)(*c*)(*1*), (f)(1)(vi)(*c*)(*2*), and (f)(1)(vi)(*e*)(*1*) to read as follows:

§ 558.625 Tylosin.

(a) *Specifications.* Type A medicated articles containing tylosin phosphate.

* * * * *

(f) * * *

(1) * * *

(vi) * * *

(*c*) * * *

(*1*) *Indications for use.* For the treatment and control of swine dysentery associated with *Brachyspira hyodysenteriae* and for the control of porcine proliferative enteropathies (PPE, ileitis) associated with *Lawsonia intracellularis.*

(*2*) *Limitations.* Administer as tylosin phosphate in feed for 2 to 6 weeks, immediately after treatment with tylosin tartrate in drinking water as in § 520.2640(d)(3) of this chapter.

* * * * *

(*e*) * * *

(*1*) *Indications for use.* For the control of porcine proliferative enteropathies (PPE, ileitis) associated with *Lawsonia intracellularis.*

* * * * *

Dated: December 10, 2008.

Revisions to the California State Implementation Plan, South Coast Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is finalizing approval of revisions to the South Coast Air Quality Management District portion of the California State Implementation Plan (SIP). These revisions were proposed in the **Federal Register** on July 24, 2008 and concern the District's analysis of whether its rules met reasonably available control technology (RACT) under the 8-hour ozone National Ambient Air Quality Standards (NAAQS). We are approving the analysis under the Clean Air Act as amended in 1990 (CAA or the Act).

DATES: *Effective Date:* This rule is effective on January 20, 2009.

ADDRESSES: EPA has established docket number EPA–R09–OAR–2008–0537 for this action. The index to the docket is available electronically at *http://www.regulations.gov* and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (*e.g.,* copyrighted material), and some may not be publicly available in either location (*e.g.,* CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Stanley Tong, EPA Region IX, (415) 947–4122, *tong.stanley@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to EPA.

Table of Contents

I. Proposed Action

On July 24, 2007 (73 FR 43186), EPA proposed to approve the following document into the California SIP.

Local agency	Document	Adopted	Submitted
SCAQMD	Reasonably Available Control Technology Analysis	07/14/06	01/31/07

We proposed to approve these rules because we determined that they complied with the relevant CAA requirements. Our proposed action contains more information on the submitted RACT analysis and our evaluation.

II. Public Comments and EPA Responses

EPA's proposed action provided a 30-day public comment period. During this period, no comments were received.

III. EPA Action

No comments were submitted that change our assessment that the submitted RACT analysis complies with the relevant CAA requirements under the 8-hour ozone NAAQS. Therefore, as authorized in section 110(k)(3) of the Act, EPA is fully approving this document into the California SIP.

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement

Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 17, 2009. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: September 24, 2008.

Wayne Nastri,

Regional Administrator, Region IX.

■ Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraph (c)(358) to read as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(358) The 8–Hour Ozone Reasonable Available Control Technology State Implementation Plans (RACT)(SIP) for the following Air Quality Management Districts (AQMDs)/Air Pollution Control Districts (APCDs) were submitted on January 31, 2007, by the Governor's designee.

(i) Incorporation by reference.

(A) South Coast Air Quality Management District.

(*1*) Resolution 06–24 (A Resolution of the South Coast Air Quality Management District (SCAQMD) Board certifying that the SCAQMD's current air pollution rules and regulations fulfill the 8-hour Reasonably Available Control Technology (RACT) requirements, and adopting the RACT SIP revision, dated July 14, 2006.

(*2*) South Coast Air Quality Management District (SCAQMD) Staff Report, SCAQMD 8–Hour Ozone Reasonably Available Control Technology (RACT) State Implementation Plan (SIP) Demonstration, including appendices, dated June 2006.

(*3*) Notice of Exemption from the California Environmental Quality Act, SCAQMD 8–Hour Ozone Reasonably Available Control Technology (RACT) State Implementation Plan (SIP), dated June 2, 2006.

(*4*) EPA comment letter to South Coast Air Quality Management District dated June 28, 2006, on 8-hour Ozone Reasonably Available Control Technology—State Implementation Plan (RACT SIP) Analysis, draft staff report dated May 2006, from Andrew Steckel, Chief, Rulemaking Office, U.S. EPA to Mr. Joe Cassmassi, Planning and Rules Manager, South Coast Air Quality Management District.

CERCLA/EPCRA Administrative Reporting Exemption for Air Releases of Hazardous Substances From Animal Waste at Farms

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This final rule provides an administrative reporting exemption from particular notification requirements under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended. In addition, this final rule provides a limited administrative reporting exemption in certain cases from requirements under the Emergency Planning and Community Right-to-Know Act, also known as Title III of the Superfund Amendments and Reauthorization Act. Specifically, the administrative reporting exemption applies to releases of hazardous substances to the air that meet or exceed their reportable quantity where the source of those hazardous substances is animal waste at farms.

Nothing in this final rule changes the notification requirements if hazardous substances are released to the air from any source other than animal waste at farms (*e.g.*, ammonia tanks), or if any hazardous substances from animal waste are released to any other environmental media, (*e.g.*, soil, ground water, or surface water) when the release of those hazardous substances is at or above its reportable quantity. Also, the administrative reporting exemption under section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act, does not limit any of the Agency's other authorities under the Comprehensive Environmental Response, Compensation, and Liability Act sections 104 (response authorities), 106 (abatement actions), 107 (liability), or any other provisions of the Comprehensive Emergency Response, Compensation, and Liability Act or the

Emergency Planning and Community Right to Know Act.

Accordingly, EPA believes this administrative reporting exemption not only leaves in place important Agency response authorities that can be used to protect human health and the environment if needed, but also is consistent with the Agency's goal to reduce reporting burden, particularly considering that Federal, State or local response officials are unlikely to respond to notifications of air releases of hazardous substances from animal waste at farms.

DATES: This final rule is effective on January 20, 2009.

ADDRESSES: EPA has established a docket for this action under Docket ID No. [EPA–HQ–SFUND–2007–0469]. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *e.g.*, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Superfund Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Superfund Docket is (202) 566–0276.

FOR FURTHER INFORMATION CONTACT: Lynn Beasley, Regulation and Policy Development Division, Office of Emergency Management (5104A), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564–1965; fax number: (202) 564–2625; e-mail address: *Beasley.lynn@epa.gov.*

SUPPLEMENTARY INFORMATION: The contents of this preamble are listed in the following outline:

I. General Information

A. Does This Action Apply to Me?

Type of entity	Examples of affected entities
Industry	NAICS Code 111—Crop Production. NAICS Code 112—Animal Production.
State and/or Local Governments	State Emergency Response Commissions, and Local Emergency Planning Committees.
Federal Government	National Response Center.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. This table lists the types of entities that EPA is currently aware could potentially be affected by this action; however, other types of entities not listed in the table could also be affected. To determine whether your facility is affected by this action, you should carefully examine the criteria in section III.A of this final rule and the applicability criteria in § 302.6 of title 40 of the Code of Federal Regulations (CFR) and 40 CFR Part 355, Subpart C-Emergency Release Notification.[1] If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

B. What Is the Statutory Authority for This Rulemaking?

Section 104 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9601 *et seq.*, as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986, gives the Federal government broad authority to respond

[1] On November 3, 2008, EPA published a final rule, ''Emergency Planning and Community Right-to-Know Act; Amendments to Emergency Planning and Notification; Emergency Release Notification and Hazardous Chemical Reporting'' (''EPCRA rule''). (*See* 73 FR 65452.) That rule included revisions to the Emergency Planning Notification, Emergency Release Notification and Hazardous Chemical Reporting regulations. One of the revisions included reorganizing the Code of Federal Regulations (CFR) so that it follows a plain language format. This final rule uses the CFR citations of the EPCRA rule.

Subpart C—Emergency Release Notification includes regulations for, ''Who Must Comply'' (355.30—What facilities must comply with the emergency release notification requirements? 355.31—What types of releases are exempt from the emergency release notification requirements of this subpart?, 355.32—Which emergency release notification requirements apply to continuous releases?, and 355.33—What release quantities of EHSs and CERCLA hazardous substances trigger the emergency release notification requirements of this subpart?) ''How to Comply'' (355.40—What information must I provide?, 355.41—In what format should the information be submitted?, 355.42—To Whom Must I Submit the Information?, and 355.43—When Must I Submit the Information?).

to releases or threats of releases of hazardous substances from vessels and facilities. The term *hazardous substance* is defined in section 101(14) of CERCLA primarily by reference to other Federal environmental statutes. Section 102 of CERCLA gives the Environmental Protection Agency (EPA or the Agency) authority to designate additional hazardous substances. Currently, there are approximately 760 CERCLA hazardous substances, exclusive of Radionuclides, F-, K-, and Unlisted Characteristic Hazardous Wastes.

CERCLA section 103(a) calls for immediate notification to the National Response Center (NRC) when the person in charge of a facility has knowledge of a release of a hazardous substance equal to or greater than the reportable quantity (RQ) established by EPA for that substance. In addition to the notification requirements established pursuant to CERCLA section 103, section 304 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), 42 U.S.C. 11001 *et seq.*, requires the owner or operator of certain facilities to immediately report to State and local authorities releases of CERCLA hazardous substances or any extremely hazardous substances (EHSs) if they exceed their RQ (see 40 CFR 355.33). This final rule only applies to CERCLA section 103 notification requirements, including the provisions that allow for continuous release reporting found in paragraph (f)(2) of CERCLA section 103, and EPCRA section 304 notification requirements.

The Agency has previously granted such administrative reporting exemptions (AREs) under the CERCLA section 103 and EPCRA section 304 notification requirements where the Agency has determined that a Federal response to such a release is impracticable or unlikely. For example, on March 19, 1998, the Agency issued a final rule (see 63 FR 13459) that granted exemptions for releases of naturally occurring radionuclides. The rule, entitled Administrative Reporting Exemptions for Certain Radionuclide Releases (''Radionuclide ARE''), granted exemptions for releases of hazardous substances that pose little or no risk or to which a Federal response is infeasible or inappropriate (see 63 FR 13461).

The Agency relies on CERCLA sections 102(a), 103, and 115 (the general rulemaking authority under CERCLA) as authority to issue regulations governing section 103 notification requirements. The Agency relies on EPCRA section 304 as authority to issue regulations governing EPCRA section 304 notification requirements, and EPCRA section 328 for general rulemaking authority. The Agency will continue to require certain reports under EPCRA section 304, specifically for those facilities that meet the size thresholds in 40 CFR 355.31(g) and outlined below in section III.B.ii of this preamble.

C. Which Hazardous Substances Are We Exempting From the Notification Requirements of CERCLA and EPCRA?

EPA is exempting certain releases of hazardous substances to the air from the notification requirements of CERCLA and to a limited extent EPCRA emergency notifications, as implemented in 40 CFR 302.6 and 40 CFR Part 355, Subpart C-Emergency Notification Requirement, respectively. Specifically, we are exempting those hazardous substance releases that are emitted to the air from animal waste at farms. The exemption to the CERCLA section 103 notification requirements will apply to all releases of hazardous substances to the air from animal waste at farms. However, to respond to comments expressing the desire to receive information regarding releases from large concentrated animal feeding operations (CAFOs), EPA is bifurcating these administrative reporting exemptions in order to continue to require EPCRA section 304 emergency notifications for those CAFO operations that confine the large CAFO threshold of an animal species or above, as defined in the National Pollutant Discharge Elimination System (NPDES) program regulations. As such, the exemption to EPCRA section 304 emergency notification requirements will apply to air releases of hazardous substances from animal waste at farms that are below the thresholds in 40 CFR 355.31(g) and for those farms that have animals that are not stabled or confined. (See 40 CFR 355.31(h)) For the purposes of this rule, EPA considers animals (*i.e.*, cattle) that reside primarily outside of an enclosed structure (*i.e.*, a barn or a feed lot) and graze on pastures, not to be stabled or confined, and thus are exempted from the reporting requirements under EPCRA Section 304.

Section 324 of EPCRA requires that the follow-up emergency notice shall be made available to the general public; thus emergency notifications filed under EPCRA section 304 will be available to the public. Farms that are required to report their releases under EPCRA section 304 emergency notifications may continue to use continuous release reporting as described in 40 CFR 355.32.

Ammonia and hydrogen sulfide are the most recognized hazardous substances that are emitted from animal waste. Specifically, ammonia is a by-product of the breakdown of urea and proteins that are contained in animal waste, while hydrogen sulfide is another by-product of the breakdown of animal waste under anaerobic conditions. However, other hazardous substances, such as nitrogen oxide (NO) and certain volatile organic compounds (VOCs) may also be released from animal waste. This rule extends the administrative reporting exemption to all hazardous substances emitted to the air from animal waste at farms.

These hazardous substances can be emitted when animal waste is contained in a lagoon or stored in under-floor manure pits in some animal housing, manure stockpiles, or where animals are stabled or confined.

II. Background

Under CERCLA section 103(a), the person in charge of a vessel or facility from which a CERCLA hazardous substance has been released into the environment in a quantity that equals or exceeds its RQ must immediately notify the NRC of the release. A release is reportable if an RQ or more is released into the environment within a 24-hour period (see 40 CFR 302.6). This reporting requirement serves as a trigger for informing the Federal government of a release so that Federal personnel can evaluate the need for a response in accordance with the National Contingency Plan (NCP) and undertake any necessary response action in a timely fashion.

The NRC is located at the United States Coast Guard (USCG) headquarters and is the national communications center for the receipt of all pollution incidents reporting. The NRC is continuously staffed for processing activities related to receipt of the notifications. The NCP regulations, 40 CFR 300.125, require that notifications of discharges and releases be made by telephone and state that the NRC will immediately relay telephone notices of discharges or releases to the appropriate predesignated Federal on-scene coordinator (OSC). The NRC receives an average of approximately 34,000 notifications of releases or discharges per year, 99 percent of which are relayed to EPA.

Under EPCRA section 304(a), three release scenarios require notification.

- First, if a release of an extremely hazardous substance occurs from a facility at which a hazardous chemical is produced, used, or stored, and such release requires a notification under section 103(a) of CERCLA, the owner or operator of a facility shall immediately provide notice to the community emergency coordinator for the local

emergency planning committees (LEPC) for any area likely to be affected by the release and to the State emergency response commission (SERC) of any State likely to be affected by the release. (EPCRA section 304(a)(1))

- EPCRA section 304(a) also requires the owner or operator of the facility to immediately provide notice under EPCRA section 304(b) for either of the following two scenarios:
  - If the release is an extremely hazardous substance, but not subject to the notifications under section 103(a) of CERCLA. (EPCRA section 304(a)(2))
  - If the release is not an extremely hazardous substance and only subject to the notifications under section 103(a) of CERCLA. (EPCRA section 304(a)(3))

EPCRA notification is to be given to the community emergency coordinator for each LEPC for any area likely to be affected by the release, and the SERC of any state likely to be affected by the release. Through this notification, state and local officials can assess whether a response action to the release is appropriate. EPCRA section 304 notification requirements apply only to releases that have the potential for off-site exposure and that are from facilities that produce, use, or store a ''hazardous chemical,'' as defined by regulations promulgated under the Occupational Safety and Health Act of 1970 (OSHA) (29 CFR 1910.1200(c)) and by section 311 of EPCRA.

Owners and operators of farms, like all other facilities, are required to report the release of hazardous substances into the environment in accordance with CERCLA section 103 and EPCRA section 304 when it meets or exceeds the RQ of the hazardous substance. For example, releases into the environment of ammonia or any other hazardous substance, from tanks located on a farm, at or above an RQ are required to be reported under CERCLA section 103 and EPCRA section 304.

In 2005, EPA received a petition (poultry petition) from the National Chicken Council, National Turkey Federation, and U.S. Poultry & Egg Association, seeking an exemption from the CERCLA and EPCRA reporting requirements for ammonia emissions from poultry operations. The Agency published a notice in the **Federal Register** on December 27, 2005 (70 FR 76452), that acknowledged receipt of the poultry petition and requested public comment. The comment period closed on March 27, 2006. This final rule does not address that petition. EPA will respond to the petition in a separate action.

Also, in 2005, EPA offered the owners and operators of animal agricultural operations an opportunity to participate in the National Air Emissions Monitoring Study (air monitoring study), that is being conducted by an independent, non-profit organization and overseen by EPA, through a consent agreement with the Agency. The purpose of the air monitoring study is to develop emissions estimating methodologies for all animal agricultural operations. Over 2,600 animal feeding operations, representing over 14,000 farms, signed up to participate in the study. The monitoring study, which began in the spring of 2007 includes 25 representative sites (lagoons or barns) on 21 different farms in ten states (NC, NY, IA, WI, CA, KY, TX, WA, IN, and OK). The sites will be monitored for a period of two years, allowing the Agency to account for emissions variability by season, and for the effect of any seasonal operational changes (such as pumping out lagoons), that could have an effect on emission levels.

The consent agreement also requires that within 120 days after receiving an executed copy of the consent agreement, for any farm that confines more than ten times the large CAFO threshold of animal species, as defined in the NPDES program regulations, the animal feeding operation provide to the NRC and to the relevant State and local emergency response authorities written notice describing its location and stating substantially as follows:

> ''This operation raises [species] and may generate routine air emissions of ammonia in excess of the reportable quantity of 100 pounds per 24 hours. A rough estimate of those emissions is [ ] pounds per 24 hours, but this estimate could be substantially above or below the actual emission rate, which is being determined through an ongoing monitoring study in cooperation with the U.S. Environmental Protection Agency. When that emission rate has been determined by this study, we will notify you of any reportable releases pursuant to CERCLA section 103 or EPCRA section 304. In the interim, further information can be obtained by contacting [insert contact information for a person in charge of the operation].''

The requirement that these very large animal feeding operations (AFOs) immediately report estimated releases of ammonia was solely for the purposes of the air compliance agreement and not for purposes of reporting under CERCLA or EPCRA. (*See* 70 FR 4958, Jan. 31, 2005.)

At the end of the monitoring study, EPA will use the data along with other relevant available data to develop emissions estimating methodologies. The monitoring study results will be publicly available upon completion of the study. In addition, EPA will publish the emissions estimating methodologies based on these results within 18 months of the study's conclusion. Thus, such information will be widely available to the public. Further details on the air monitoring study are available at *http://www.epa.gov/oecaagct/airmonitoringstudy.html.*

III. Summary of This Action

A. What Is the Scope of This Final Rule?

The scope of this rule is limited to releases of hazardous substances to the air from animal waste at farms. Specifically, the Agency is issuing an administrative reporting exemption from the CERCLA section 103 notification requirements to the NRC (Federal government) as implemented in 40 CFR 302.6 and a limited administrative reporting exemption from the EPCRA section 304 notification requirements as implemented in 40 CFR Part 355, Subpart C—Emergency Notification Requirement. (*See* Section III.B.ii. for the thresholds that limit the administrative reporting exemption for EPCRA section 304.) The scope of this rule is intended to include all hazardous substances that may be emitted to the air from animal waste at farms that would otherwise be reportable under those sections. The Agency is not, in this rule, defining facility, normal application of fertilizer, or routine agricultural operations.

B. How Does This Rule Differ From the Proposed Rule?

On December 28, 2007, the Agency proposed an administrative reporting exemption from the CERCLA section 103 notification requirements and the EPCRA section 304 emergency notification requirements for air releases of hazardous substances that meet or exceed their RQ from animal waste at all farms. The public comment period lasted 90 days and closed on March 27, 2008. Through the public comment process, the Agency received approximately 12,900 comments. A substantial number of those comments (about 11,600) came in the form of 15 mass mail campaigns that either supported or opposed the proposed rule. We also received many comments from people who appear to have misunderstood the proposed rule, or assumed that the proposed rule was a response to the poultry petition. Our response to significant comments are generally addressed below in Section III.G of this preamble, with all comments addressed in a response to comment document, which is in the

docket (EPA–HQ–SFUND–2007–0469) to this final rule.[2]

i. Exemption From CERCLA Section 103 Reporting

This rule finalizes the administrative reporting exemption from the CERCLA section 103 notification requirements as proposed, but limits the administrative reporting exemption to EPCRA section 304 emergency notification requirements by adding a size threshold. That is, at or above the threshold adopted in this final rule, farms that generate animal waste that release hazardous substances to the air at or above the RQ must still report under EPCRA section 304, using the existing notification procedures, including the use of continuous release reporting. EPCRA section 304 notification requirements apply only to releases that have the potential for off-site exposure.

The Agency is finalizing the administrative reporting exemption from the CERCLA section 103 notification requirements because EPA continues to believe that Federal on-scene coordinators are unlikely to respond to notifications of air releases of hazardous substances from animal waste at farms.

The Agency also believes that State or local emergency response authorities are unlikely to respond to notifications of air releases of hazardous substances from animal waste at farms. However, the Agency did receive comments from the public, as well as from environmental groups, a coalition of family farmers and others expressing the desire for information regarding emissions of hazardous substances to the air from large animal feeding operations. Accordingly, EPA decided to bifurcate the administrative reporting exemption for EPCRA section 304 so as to retain certain emergency notifications for large CAFOs. In addition, we sought comment on possible alternative definitions for *farm*, indicating EPA might take factors such as size into account. Although not specifically addressing the definition of a *farm*, we did receive many comments asserting that very large farms are no different than other industrial sources and should be regulated as such. We believe that our threshold approach addresses those concerns.

ii. Thresholds for Exemption From EPCRA Section 304 Reporting

A *farm* is above the threshold if it stables or confines [3] animals in numbers equal to or more than the numbers of animals specified for each category given in the NPDES program regulations for large CAFOs. These thresholds are discussed further in section II*I.E.* below.

(1) 700 mature dairy cows, whether milked or dry.

(2) 1,000 veal calves.

(3) 1,000 cattle other than mature dairy cows or veal calves. Cattle includes but is not limited to heifers, steers, bulls and cow/calf pairs.

(4) 2,500 swine each weighing 55 pounds or more.

(5) 10,000 swine each weighing less than 55 pounds.

(6) 500 horses.

(7) 10,000 sheep or lambs.

(8) 55,000 turkeys.

(9) 30,000 laying hens or broilers, if the farm uses a liquid manure handling system.

(10) 125,000 chickens (other than laying hens), if the farm uses other than liquid manure handling system.

(11) 82,000 laying hens, if the farm uses other than a liquid manure handling system.

(12) 30,000 ducks (if the farm uses other than a liquid manure handling system).

(13) 5,000 ducks (if the farm uses a liquid manure handling system).

iii. Continuous Release Reporting

Continuous release reporting is available for those farms that are at or above the threshold described above in section II.B.ii. In general, the Agency believes that emissions from animal waste into the air are usually continuous and stable in quantity and rate to qualify as continuous releases pursuant to 40 CFR 302.8. The regulations implementing EPCRA section 304 are found in 40 CFR Part 355, Subpart C—Emergency Release Notification and describe the information required for the EPCRA emergency notifications. At the present time, EPA has not adopted conversion factors from which to derive quantities of common hazardous substances from numbers of particular species of farm animals. One purpose of the air monitoring study is to develop estimating methodologies. In the meantime, when reports are submitted pursuant to EPCRA section 304 for animal waste from farms, the Agency expects reports to reflect good faith estimates from reporting entities. In addition, EPA intends to issue guidance to assist those farms that are required to submit reports under EPCRA section 304 with continuous release reporting, as provided in 40 CFR 355, Subpart C—Emergency Release Notification.

C. Definitions

The Agency believes it is important to provide clarity with respect to the scope of the reporting exemption. Therefore, the Agency is providing definitions for *animal waste* and *farm* that only pertain to regulations promulgated pursuant to CERCLA section 103 and EPCRA section 304, specifically 40 CFR 302.3. and 40 CFR 355.61. These definitions are not promulgated to apply for any other purpose.

i. Animal Waste

Animal Waste—means manure (feces, urine, and other excrement produced by livestock), digestive emissions, and urea. The definition includes animal waste when mixed or commingled with bedding, compost, feed, soil, and other materials typically found with animal waste.

We sought comment on our proposed definition for *animal waste*, and whether an alternative definition may be more appropriate. A few commenters asked that we clarify that compost includes composted manure and manure-based compost. EPA agrees that the definition of *animal waste* does include such compost and to lend further clarity to the definition, we made a slight change. Other comments on our proposed definition for *animal waste*, along with our responses are addressed below in section III.G.v.1 of this preamble and in the response to comment document available in the docket (EPA–HQ–SFUND–2007–0469) to this rule.

ii. Farm

The Agency is limiting the reporting exemption to animal waste that is generated on farms, and is using a specific definition for *farm* for this administrative reporting exemption. For the purpose of this administrative reporting exemption only, EPA defines farm by using the same definition as that found in the National Agricultural Statistics Service (NASS) Census of Agriculture, and adopting it.

Farm—means a facility on a tract of land devoted to the production of crops or raising of animals, including fish, which produced and sold, or normally would have produced and sold, $1,000 or more of agricultural products during a year.

[2] The docket for EPA–HQ–SFUND–2007–0469 can be accessed through *www.regulations.gov.*

[3] Animals that reside primarily outside of an enclosed structure (*i.e.*, a barn or a feed lot) and graze on pastures are not stabled or confined. Animals that are not stabled or confined at concentrated animal feeding operations are not counted toward the threshold. Any emissions to the air of hazardous substances from the waste of such animals while they are not stabled or confined are not counted towards the calculation of a reportable quantity at a farm that is above the threshold and subject to reporting, unless such waste is consolidated into a storage unit.

We sought comment on our proposed definition for a *farm*, and whether an alternative definition may be more appropriate. Based on the comments received, we concluded that the proposed definition for *farm* was not consistent with other Agency uses for the term; that is, we realized that the definition proposed had deviated from the NASS definition, as well as the definition used by the Agency in its Spill Prevention, Control and Countermeasure (SPCC) rule. As a result, the definition for this rule has now been modified. Other comments on our proposed definition for *farm*, along with our responses are addressed below in section III.G.v.2 of this preamble and in the response to comment document available in the docket (EPA–HQ–SFUND–2007–0469) to this rule.

D. What Is Not Included Within the Scope of This Rule?

As noted previously, the administrative reporting exemption from the CERCLA section 103 notification requirements is limited in scope to those releases of hazardous substances to the air that meet or exceed their RQ from animal waste at farms and in the case of Section 304 of EPCRA, only those releases of hazardous substances to the air from animal waste at farms that are below the thresholds in 40 CFR 355.31(g) are exempt. EPA is not exempting from the CERCLA section 103 or EPCRA section 304 notification requirements releases of hazardous substances from animal waste that meet or exceed the RQ to any other environmental media or at any other facilities other than farms (*i.e.*, meat processing plants, slaughter houses, tanneries). Thus, notifications must still be submitted if, for example, there was a release of any hazardous substances that meet or exceed the RQ from animal waste into water (*e.g.*, a lagoon burst) or if there was a release of any hazardous substances that meets or exceeds the RQ from animal waste into the air or water at a slaughter house or meat processing plant. Likewise, EPA is not exempting from the CERCLA section 103 or EPCRA section 304 notification requirements any release of hazardous substances to the air that meets or exceeds the RQ from any source other than animal waste at farms. Thus, for example, EPA is not proposing to exempt ammonia releases from ammonia storage tanks at farms.

The Agency believes that in these situations, the release of hazardous substances that meets or exceeds the RQ should continue to be reported because it is less clear that they will not result in a response action from Federal, State or local governments. That is, such notifications would alert the government to a situation that could pose serious environmental consequences if not immediately addressed.

Finally, it should be noted that no CERCLA or EPCRA statutory requirements, other than the emergency hazardous substance notification requirements under CERCLA section 103 and EPCRA section 304, are included within this rule. The rule also does not limit the Agency's authority under CERCLA sections 104 (response authorities), 106 (abatement actions), 107 (liability), or any other provisions of CERCLA and EPCRA to address releases of hazardous substances from animal waste at farms.

E. What Is EPA's Rationale for This Administrative Reporting Exemption?

EPA's rationale for this administrative reporting exemption is based on the purpose of notifying the NRC, and SERCs and LEPCs when a hazardous substance is released, and then the likelihood that a response to that notification would be taken by any government agency.

Upon receipt of a notification from the NRC, EPA determines whether a response is appropriate. See 40 CFR 300.130(c). If it is determined that a response is appropriate, the NCP regulations describe the roles and responsibilities for responding to the release. Thus, EPA considered whether the Agency would ever take a response action, as a result of such notification, for releases of hazardous substances to the air that meet or exceed their RQ from animal waste at farms. Based on our experience, the Agency believes that Federal on-scene coordinators are unlikely to respond to such notifications. Specifically, to date, EPA has not initiated a response to any NRC notifications of ammonia, hydrogen sulfide, or any other hazardous substances released to the air where animal waste at farms is the source of that release. Moreover, we can not foresee a situation where the Agency would initiate a response action as a result of such notification. Under this rule, however, EPA retains its authority to respond to citizen complaints or requests for assistance from State or local government agencies to investigate releases of hazardous substances from animal waste at farms and respond if appropriate. Furthermore, the Agency does not need to receive such notifications in order to enforce applicable Clean Water Act (CWA), Clean Air Act (CAA), Resource Conservation and Recover Act (RCRA), and/or other applicable CERCLA and EPCRA regulations at farms. EPA retains the enforcement authority to address threats to human health and the environment.

Several States and localities also indicated that such response actions are unlikely to be taken as a result of a notification of releases of hazardous substances from animal waste at farms. Specifically, EPA received 13 comment letters from State and/or local emergency response agencies in response to our proposed rule, as well as comments from 10 state agricultural departments that agreed with the proposal to not require such notifications.[4] These commenters all affirmed EPA's belief that a response to a notification of air emissions of hazardous substances from animal wastes is highly unlikely. In fact, while we also received comment letters from government officials and others, including environmental groups, that the proposed rule is not appropriate due to potential harmful effects of air pollution emanating from animal feeding operations, we received no comments from any government official suggesting a response action should or would be taken.

The Agency did receive comments expressing a concern that air emissions of hazardous substances from animal waste at the largest animal feeding operations may pose a risk and therefore State and local governments and the public should continue to receive reports of such emissions. CERCLA and EPCRA do not require release reports under section 103 of CERCLA and 304 of EPCRA, respectively, to be made publicly available. However, section 324 of EPCRA does require the LEPC and the SERC to make publicly available each follow-up emergency notice provided under section 304(c).

Based on these comments, the Agency has bifurcated the final rule and is promulgating an administrative reporting exemption in order to maintain the EPCRA section 304 reporting requirements for the largest farms, that is, those farms that meet or exceed the thresholds described in section III.B.ii, above. For this rule, the threshold that will trigger reporting requirements is the same as the numbers of animals specified in the categories regulated by the NPDES program for

[4] The Agency also received 23 comment letters from State and/or local emergency response agencies in response to the December 2005 **Federal Register** notice that acknowledged receipt of the rulemaking petition from the National Chicken Council, the National Turkey Federation, and the U.S. Poultry and Egg Association which also agreed that such notifications were not necessary.

large CAFOs. Comments regarding the elimination of the reporting requirements are discussed below in section III.G.i.

F. What Are the Economic Impacts of This Administrative Reporting Exemption?

This administrative reporting exemption will reduce the costs to farms that release hazardous substances to the air that meet or exceed their RQ from animal waste. Entities that are expected to experience a reduction in burden and cost include both the farms that are no longer required to report those releases, as well as the Federal government. The economic analysis completed for this rule is available in the docket for this rulemaking and is based on the underlying economic analyses that were completed for the regulations that established the notification requirements. We estimate that this final rule will reduce burden on farms associated with making notifications under CERCLA section 103 and EPRCRA section 304 by approximately 1,290,000 hours over the ten-year period beginning in 2009 and associated costs by approximately $60,800,000 over the same period. We estimate that this rule will also reduce burden on government (including Federal, State and local governments) for receipt and processing of the notifications under CERCLA section 103 and EPCRA section 304 by approximately 161,000 hours over the ten-year period beginning in 2009 and associated costs by approximately $8,110,000 over the same period. In evaluating the potential burden and cost savings to those farms that would no longer be required to make notifications under CERCLA section 103 and EPCRA section 304 and for the government entities that are no longer required to receive and process such notifications, we used the same universe as used in the 2008 CAFO Rule (see 73 FR 70417, Nov. 20, 2008).

G. Response to Comments

The Agency received comments on: (1) The elimination of the reporting requirement; (2) the risk, harm, and exposure related to air emissions from animal waste at farms; and (3) the Agency's statutory authority to issue this rulemaking. Some comments also indicated a misunderstanding of the proposed rule. Lastly, the Agency sought specific comments in four areas. *Those were:* (1) Definitions (animal waste and farm); (2) whether it is appropriate to expand the reporting exemption to other facilities where animal waste is generated (*i.e.*, zoos and circuses); (3) whether there might be a situation where a response would be triggered by such a notification of the release of hazardous substances to the air from animal waste at farms; and (4) if so, what an appropriate response would be. The following is our response to those substantive comments received. Comments not addressed in this preamble are addressed in the response to comment document that can be found in the Agency's docket for this rule (EPA–HQ–SFUND–2007–0469).

i. Comments Regarding Elimination of Reporting Requirement

We received mixed comments on whether it is appropriate for the Agency to eliminate the notification requirements under CERCLA section 103 and EPCRA section 304 for hazardous substances released to the air at farms where the source of those hazardous substances is animal waste.

Many commenters expressed general support for the proposed elimination of the reporting requirements under CERCLA section 103 and EPCRA section 304. Many of these commenters, including some local emergency response agencies, stated that reporting emissions of hazardous substances to the air that meet or exceed their RQ from animal waste is of little value as it is common knowledge that agricultural operations release ammonia on an ongoing basis and receipt of such notifications could prove to be a hindrance in performing their mission by overwhelming the system with notifications that will not be responded to. Many commenters supporting the elimination of the reporting requirements, particularly commenters representing the agricultural community, also stated that emissions reporting is costly and could put them out of business should they have to adhere to such a regulation. Moreover, these same commenters defended the proposal by pointing out that information about the location and emissions of CAFOs is already publicly available. For example, one could readily determine the number of laying hens there are in a particular county through county specific data published by the U.S. Department of Agriculture's (USDA's) National Agricultural Statistical Service. According to these commenters, CERCLA/EPCRA reporting does not add in any meaningful way to this knowledge base.

On the other hand, the Agency received many comments that were opposed to the elimination of the notification requirements under CERCLA section 103 and EPCRA section 304. Many commenters opposed the proposed elimination of these reporting requirements on the grounds that reports provide good documentation, even if the content is not reviewed and no response is appropriate. Several commenters stated that reporting information about emissions enables citizens to hold companies and local governments accountable in terms of how toxic chemicals are managed and even allows agencies to identify a facility's proximity to schools where children may be at higher risk of adverse health effects due to exposure.

In addition, many commenters asserted that the proposed rule interferes with the public's right to know about large releases of toxic chemicals. Others stated that factory farms should not be protected from the laws that affect all other industries. Several commenters asserted that CAFOs are not family farms, arguing that they are industries that produce high amounts of pollutants and should be treated as such.

Finally, a commenter suggested that farms should be exempt from the monitoring and reporting of pollutant releases until measuring and testing procedures become more accurate and that the exemptions should apply until there are more feasible monitoring practices enacted. The commenter argued that it was unfair to require such reporting when the science surrounding ammonia releases is uncertain.

The Agency appreciates the perspectives of both sides of the reporting issue. We understand that the regulated community and some SERCs and LEPCs believe that, in general, the release reports are unnecessary, burdensome, and would not likely result in ''new'' information regarding emissions from farms. The Agency agrees. However, many commenters also argued that reporting, especially for large CAFOs, is important. Therefore, we have adopted a final rule that seeks to address both concerns. As such, farms would be exempt from reporting under CERCLA section 103 for the reporting of air releases of hazardous substances from animal waste to the NRC; but, at the same time, those farms that exceed the threshold established in 40 CFR 355.31(g), and described above in section III.B.ii of this preamble, will still be required to notify the community emergency coordinator for the LEPC for any area likely to be affected by the release and to the SERC of any State likely to be affected by the release under EPCRA section 304(b). We believe the threshold is appropriate to continue to make available information regarding large CAFOs sought by commenters. In accordance with 40 CFR 355.31(h), farms that have animals that

are not stabled or confined are also exempt from reporting under EPCRA section 304. For the purposes of this rule, EPA considers animals (*i.e.*, cattle) that reside primarily outside of an enclosed structure (*i.e.*, a barn) and graze on pastures not to be stabled or confined.

In addition, after completion of the Air Monitoring Study and the development and publication of emission estimating methodologies, the Agency intends to review the results and consider if the threshold for the EPCRA exemption is appropriate.

ii. Comments Regarding Risk, Harm, and Exposure

EPA's rationale for the proposed rule is based on the purpose of notifying the NRC, and SERCs and LEPCs when a hazardous substance is released, and then the likelihood that a response to that release would be taken by any government agency. The comments that cited risk, harm, and exposure were used to either support or oppose the proposed rule.

In supporting the proposed rule, many commenters provided general statements to the effect that emissions from CAFOs pose no threat to public health or the environment. Many other commenters also argued that there is no evidence or studies that emissions pose any public health risks or have environmental impacts that would warrant emergency release reports from farms to the Federal level.

In opposing the proposed rule, a number of commenters submitted studies to support their conclusion that emissions from some farms pose levels of risk, harm, and exposure that should be taken into consideration by the Agency. Several commenters specifically cited a 2002 study entitled, ''Iowa Concentrated Animal Feeding Operations Air Quality Study,'' conducted by Iowa State University and the University of Iowa Study Group.[5]

Several commenters suggested delaying any decisions on finalizing the proposal until the Agency's air monitoring study is complete. These commenters argued that EPA may find that these airborne contaminants are more dangerous to human health than thought. Many of the commenters who opposed the proposed rule also provided information pertaining to the health impacts associated with CAFOs. Some provided anecdotal evidence, while others cited published literature drawing a causal link. Additional information regarding the anecdotal evidence and published literature is provided in the response to comment document available in the docket (HQ–EPA–SFUND–2007–0469) to this rule. Finally, a number of commenters suggested that the adverse health effects that have been demonstrated should be sufficient to continue to mandate CERCLA and EPCRA reporting of ''toxic air emissions'' and step up enforcement, as well.

EPA appreciates the information provided by commenters, especially those who submitted study information indicating the potential health issues associated with the emissions from animal waste at farms. We would first note that a number of the studies or information provided addressed risk or health issues for workers on the farm; reporting under section 304 of EPCRA addresses releases that are off-site of the facility. In addition, as we noted previously, EPA is currently overseeing a comprehensive study of CAFO air emissions (air monitoring study) that is being conducted by an independent, non-profit organization. The purpose of the air monitoring study is to develop emissions estimating methodologies for all animal agricultural operations. Over 2,600 agreements, representing over 14,000 farms, signed up for the study. The monitoring study, which began in the spring of 2007, includes 25 representative sites (lagoons or barns) on 21 different farms in ten states (NC, NY, IA, WI, CA, KY, TX, WA, IN, and OK). The sites will be monitored for a period of two years, allowing the Agency to account for emissions variability by season, and for the effect of any seasonal operational changes (such as pumping out lagoons), that could have an effect on emission levels. At the conclusion of the air monitoring study, EPA will use the data along with any other relevant, available data to develop emissions estimating methodologies. The air monitoring study results will be publicly available upon completion of the study. In addition, EPA will publish the emissions estimating methodologies based on these results, within 18 months of the study's conclusion. The notification requirements under CERCLA section 103 would not provide the type of data required in order to draw the same conclusions that the more comprehensive air monitoring study can provide. This rule does not address how air emissions from CAFOs should be controlled.

As we have discussed, EPA believes that a response to a notification about an air release of a hazardous substance from animal waste at a farm is unlikely and impracticable. We are therefore exempting those notifications from CERCLA section 103 notification requirements and to a limited extent EPCRA section 304 emergency notification requirements. As discussed above, EPA does recognize that the public may have a separate use for the notifications, and therefore, the reporting exemption under Section 304 of EPCRA is limited to farms that fall below the threshold discussed in III.B.ii. Moreover, EPA is not limiting any of its response authorities in this rule (should a State or local agency request assistance), nor are we limiting any of our other authorities under CERCLA and EPCRA.

iii. Comments Regarding the Agency's Statutory Authority To Issue This Rulemaking

A number of commenters challenged EPA's legal authority to grant these exemptions by stating that CERCLA and EPCRA do not give EPA the authority to grant reporting exemptions. Another commenter argues that EPA may not rest its basis for the exemption solely on evidence that a Federal response to animal waste releases is unlikely.

EPA disagrees with the commenters that challenge our authority to provide administrative reporting exemptions. First, we would note that EPA has on two other occasions exercised its authority to extend administrative reporting exemptions to certain well-defined release scenarios. Specifically, on March 19, 1998, the Agency issued a final rule (see 63 FR 13459) that granted exemptions for releases of naturally occurring radionuclides. The rule entitled, Administrative Reporting Exemptions for Certain Radionuclide Releases (''Radionuclide ARE''), granted exemptions for releases of hazardous substances that pose little or no risk or to which a Federal response is infeasible or inappropriate (see 63 FR 13461). Moreover, on October 4, 2006, the Agency issued a final rule (see 71 FR 58525) that broadened the existing reporting exemptions to include releases of less than 1,000 pounds of nitrogen oxide (NO) and less than 1,000 pounds of nitrogen dioxide (NO_2) to the air in 24 hours (''NO_X ARE'') that are the result of combustion. The NO and NO_2 exemptions were granted for releases of hazardous substances at levels for which the CAA regulates nitrogen oxides that are considerably higher than ten pounds.

EPA also disagrees that it is barred from basing its exemption on evidence that a Federal response to a notification of a release of hazardous substances to the air from animal waste releases is unlikely. Rather, for this rule, EPA has

[5] This study is available in the Superfund Docket at: EPA–HQ–SFUND–2007–0469–0531.8.

made a determination that these reports are unnecessary because, in most cases, a federal response is impractical and unlikely (*i.e.*, we would not respond to them since there is no reasonable approach for the response). We also believe that because this administrative reporting exemption is narrowly focused to the source (animal waste) and location (at farms) of the hazardous substance emissions, it is appropriate to base our rationale for this rule on the unlikelihood and inappropriateness of a response.

iv. Comments Indicating a Misunderstanding of the Proposed Rule

A number of the commenters seem to misunderstand what the Agency was proposing. For example, commenters expressed general opposition to removing air quality and clean air standards; removing clean air protections; reducing pollution or emission standards; exemptions to clean air standards; allowing farms to emit more pollutants; deregulation of hazardous emissions; and an exemption from the CAA and CWA. This rule would do none of this. Rather, this rule addresses only the notification requirements under CERCLA section 103 and in a limited manner, EPCRA section 304. EPA retains all other authorities under both CERCLA and EPCRA, and the CAA and CWA standards also are unaffected by this action.

v. Comments Regarding Definitions

In order to provide clarity with respect to the scope of the proposed reporting exemption, the Agency proposed definitions for *animal waste* and *farm.* The definitions, as proposed, would be limited in application to the regulations promulgated pursuant to CERCLA section 103 specifically 40 CFR 302.3 and 40 CFR 355.61. We solicited comment on those definitions.

(1) Animal Waste

Because the Agency does not have an existing definition for *animal waste*, EPA proposed to add a definition for *animal waste* to the Code of Federal Regulations. The definition for *animal waste* in the proposed rule was, ''manure (feces, urine, other excrement, and bedding, produced by livestock that has not been composted), digestive emissions, and urea. The definition includes animal waste when mixed or commingled with bedding, compost, feed, soil and other materials typically found with animal waste.'' We sought comment from the public on the appropriateness, clarity and completeness of the definition.

In general, the public was generally supportive of our proposed definition of *animal waste,* as long as it is understood that this definition is used solely for the purposes of CERCLA and EPCRA reporting; however, there were a few requests for further clarification. In particular, several commenters requested clarification regarding the treatment of compost material, and specifically whether composted manure is included in the definition of *animal waste*. Similarly, other commenters suggested that EPA clarify that manure-based compost is included in the definition of *animal waste.* We have clarified in the discussion in section III.C.i., above, that such composted manure and manure-based compost is included in the definition of *animal waste.* Furthermore, we made a small change to the definition of *animal waste* to help clarify this point.

Several other commenters submitted alternative definitions. For example, to reflect the need for controlling emissions of dangerous and toxic emissions, a commenter suggested that *animal waste* be defined as ''manure (livestock produced feces, urine, other excrement, and bedding that has not been composted), digestive emissions, and urea, which emit dangerous and/or toxic gases in any quantity. This definition includes animal waste when mixed or commingled with bedding, compost, feed, soil and other materials typically found in animal waste.'' Another commenter suggested an alternate definition which would define *animal waste* as ''all constituents and byproducts of the decomposition of manure (feces, urine, other excrement, and bedding, produced by livestock or poultry that has not been composted), digestive emissions, and urea.'' This suggested definition would also include ''animal waste when mixed or commingled with water, bedding, compost, feed, soil and other materials typically found with animal waste.'' Still another commenter suggested the following definition for *animal waste,* ''manure (feces, urine, or other excrement produced by livestock, and including bedding), and any other livestock digestive emissions, regardless of how stored, handled, composted or otherwise stockpiled. The definition includes animal waste used in biogas production or other treatment processes, or when mixed or commingled with bedding, compost, feed, soil, and other materials typically found with animal waste.''

While the Agency appreciates the suggestions provided by the commenters, we believe that the proposed definition of *animal waste* is broad enough to serve the purpose of defining the source of hazardous substances emitted from farms for this administrative reporting exemption, with the one clarification noted above. The definitions proposed by the commenters do not offer additional clarity and in the case of ''animal waste used in biogas production or other treatment processes,'' suggest a broader use of manure that would extend to facilities other than farms, and thus, beyond the scope of the final rule.

(2) Farm

EPA proposed a definition for *farm* by slightly modifying the definition found in the National Agricultural Statistics Service (NASS) Census of Agriculture, as well as included Federal and State research farms that utilize farm animals subject to the conditions experienced on other farms (*e.g.*, poultry, swine, dairy, and livestock research farms). However, in the proposal, we incorrectly stated that the proposed definition was used by USDA. Thus, the proposed definition for *farm* was ''(a) any place whose operation is agricultural and from which $1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year. Operations receiving $1,000 or more in Federal government payments are counted as farms, even if they have no sales and otherwise lack the potential to have $1,000 or more in sales; or, (b) a Federal or state poultry, swine, dairy or livestock research farm.'' The purpose of specifying that Federal and State research farms that utilize farm animals subject to the conditions experienced on other farms was to respond to concerns that Federal and State research farms were included in the exemption. The Agency sought comment on the proposed definition, and whether an alternative definition may be more appropriate.

Commenters generally expressed support for the definition of *farm* because they understood it to be the definition used by USDA and because it promotes consistency in definitions between agencies; however, one commenter pointed out that the proposed definition is inconsistent with the definition of *farm* used by EPA in its SPCC rule (see 71 FR 77266, December 26, 2006) and therefore the Agency has two differing definitions that could place a hardship on the regulated community and gives the impression that the Agency is picking and choosing definitions without considering the regulatory implications of its decisions. The Agency agrees with this commenter and thus, EPA has decided to use for this rule the same

definition of *farm* as the definition used in the SPCC rule. This definition is also now the same definition found in the NASS Census of Agriculture. Although not specifically stated in the definition, this definition is broad and includes Federal or State poultry, swine, dairy or livestock research farms that were included in the proposed definition.

Another definition suggested by a commenter was to expand the definition to include ''[any] operation that produces eggs, poultry, swine, dairy, or other livestock in any amount,'' as well as all production areas and land application areas. Another commenter suggested that the definition be expanded to include non-Federal or State research facilities. EPA disagrees with the commenters that suggested an expanded definition of farm. We believe that the definition in this rule encompasses the universe of operations that the commenters are suggesting without adding confusion to the regulated facilities, especially in light of the SPCC regulations.

vi. Comments Regarding Other Facilities

The Agency is aware that animal waste is also generated at other facilities, such as zoos and circuses. Because the focus of the proposal was on animal waste generated or found at farms, EPA did not propose to expand the reporting exemption beyond such facilities. However, because the potential for release to the air of hazardous substances from animal waste at other such facilities may present the same issues that are presented by animal waste at farms, we did specifically request comment on whether the administrative reporting exemption should be expanded to include other types of facilities that also generate animal waste, and if so, what other types of facilities should be included in the reporting exemption.

There was general support by the commenters for including within the exemption other types of facilities (besides farms) that produce animal waste. That is, while commenters generally agreed that the rule should stay narrowly focused, they also argued that other types of facilities that produce animal waste should also be included within the exemption. Several other commenters stated that because the generation of animal waste is a normal biological process, all animals' waste should be administratively excluded from reporting.

EPA appreciates the commenters' arguments that all animals' waste should be excluded; however, we have decided to limit the final rule to animal waste generated or produced at farms, and not include other types of facilities, because the Agency has not looked sufficiently at these other types of facilities to determine the likelihood that the Agency would take a response action, if there was such a release to the air of hazardous substances that meet or exceed their RQ from animal waste.

vii. Comments Regarding Possible Situations That Would Necessitate a Response

EPA specifically sought comment on whether there might be a situation where a response would be triggered by such a notification of the release of hazardous substances to the air that meet or exceeds the RQ from animal waste at farms, and if so, what an appropriate response would be to such notifications. Several commenters responded that there are no circumstances where a manure-related release of emissions would trigger an emergency response.

On the other hand, there were some commenters that offered scenarios that described the importance of receiving the notifications. Specifically, one commenter noted that extreme weather fluctuations and various pit pumping techniques may cause emissions to exceed reportable quantities. Such fluctuations (*e.g.*, differences in temperature, rainfall frequency and intensity, wind speed, topography and soils) could impact the amount of air emissions released from farms. Another commenter cited a 2004 study entitled, Concentrated Animal Feeding Operations: Health Risks from Air Pollution Institute for Agriculture and Trade Policy,[6] which noted that ''when pits are agitated for pumping, some or all of these gases are rapidly released from the manure and may reach toxic levels or displace oxygen, increasing the risk to humans and livestock.''

With respect to responses, one commenter stated that responses may be needed to protect children who live in nearby homes and communities from elevated levels of airborne ammonia and/or the fine particulates that result from the ammonia releases. The commenter suggests that adequate monitoring will provide facility operators with sufficient warning to take remedial actions that will reduce ammonia formation and release before regulatory thresholds are exceeded.

Finally, one commenter stated that EPA has not examined such situations that may arise when maintaining feeding operations and that the Agency has not proven that emergency personnel would not benefit from continuous release reports of hazardous substances from these operations when attempting to save lives or prevent injury quickly in the future.

From a CERCLA section 104 response perspective, based on EPA's experience, the Agency would rarely respond to such scenarios. In any event, we retain our response authorities and would assist State and local officials in their response, if requested. State or local agencies (*i.e.*, SERCs and LEPCs) also may require information for emergency planning purposes under section 303(d) of EPCRA and make this information available to the public under section 324 of EPCRA.

IV. Statutory and Regulatory Reviews

A. Executive Order 12866 (Regulatory Planning and Review)

Under Executive Order (EO) 12866 (58 FR 51735, October 4, 1993), this action is a ''significant regulatory action'' because it has been determined that it raises novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. Accordingly, EPA submitted this action to the Office of Management and Budget (OMB) for review under EO 12866 and any changes made in response to OMB recommendations have been documented in the docket for this action.

B. Paperwork Reduction Act

This action does not impose any new information collection burden. Rather, this final rule represents a reduction in burden for both industry and the government by administratively exempting the reporting requirement for releases of hazardous substances to the air that meet or exceed their RQ from animal waste at farms from the CERCLA section 103 notification requirements and to a limited extent, the EPCRA section 304 emergency notification requirements.

However, the Office of Management and Budget (OMB) has previously approved the information collection requirements contained in the existing regulation 40 CFR 302 under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* and has assigned OMB control number 2050–0046, EPA ICR number 1049.11 for 40 CFR 302.6 (Episodic releases of oil and hazardous substances), OMB control number 2050–0086, EPA ICR number 1445.07 for 40 CFR 302.8 (Continuous release reporting requirements) (pending approval) and OMB control

[6] This document is available on line at: *http://www.healthobservatory.org/library.cfm?refID=37388.*

number 2050–0092, EPA ICR number 1395.06 for 40 CFR 355 (Emergency planning and notification). The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

We estimate that this final rule will reduce burden on farms associated with the notification requirements under CERCLA section 103 and EPCRA section 304 by approximately 1,290,000 hours over the ten year period beginning in 2009 and associated costs by approximately $60,800,000 over the same period. We estimate that this rule will also reduce burden on government (including Federal, State and local governments) for receipt and processing of the notifications under CERCLA section 103 and EPCRA section 304 by approximately 161,000 hours over the ten year period beginning in 2009 and associated costs by approximately $8,110,000 over the same period. In evaluating the potential burden and cost savings to those farms that would no longer be required to make notifications under CERCLA section 103 and EPCRA section 304 and for the government entities that are no longer required to receive and process such notifications, we used the same universe as used in the 2008 CAFO Rule (see 73 FR 70417, Nov. 20, 2008).

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of this rule on small entities, *small entity* is defined as: (1) A small business as defined by the Small Business Administration's (SBA) regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

Under the statutory and regulatory analyses of the Regulatory Flexibility Act for the proposed rule, we concluded that EPA expects the net reporting and recordkeeping burden associated with reporting air releases of hazardous substances that meet or exceed their RQ from animal waste at farms under CERCLA section 103 and EPCRA section 304 to decrease. We stated that this reduction in burden will be realized by businesses of all sizes. Although we concluded that the rule will relieve regulatory burden for all affected small entities as the statute requires, EPA requested comment on the potential impacts of the proposed rule on small entities and on issues related to such impacts.

One commenter explicitly concurred with EPA's analysis and conclusion that the proposed rule will provide relief from regulatory burden for small entities, stating that: ''Small farms should not be affected even if the reporting requirements stay in place because these farms do not generally have a large enough herd of animals to reach the requisite levels of toxins.'' EPA appreciates the commenter's perspective that small farms would probably not be affected by the reporting requirements, even if we did not issue this administrative reporting exemption.

After considering the economic impacts of this final rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. This final rule will not impose any additional requirements on small entities. Rather, this rulemaking will relieve regulatory burden because we are eliminating the reporting requirement for releases of hazardous substances to the air that meet or exceed their RQ from animal waste at farms under the CERCLA section 103 notification requirements and for those entities below the large CAFO threshold of animal species, as defined under the NPDES program regulations, under the EPCRA section 304 notification requirements. We expect the net reporting and recordkeeping burden associated with reporting air releases of hazardous substances from animal waste at farms under CERCLA section 103 and EPCRA section 304 to decrease. This reduction in burden will be realized by both small and large businesses. We have therefore concluded that this final rule will relieve regulatory burden for all affected small entities.

D. Unfunded Mandates Reform Act

This action contains no Federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for State, local, or tribal governments or the private sector.

This action is also not subject to the requirements of section 203 of UMRA because it contains no regulatory requirements that might significantly or uniquely affect small governments. That is, the final rule imposes no enforceable duty on any State, local or tribal governments or the private sector; rather, this final rule will result in burden reduction in the receipt of notifications under section 103 of CERCLA and for those entities below the large CAFO threshold of animal species, as defined under the NPDES program regulations, under section 304 of EPCRA notification requirements of the release to the air of hazardous substances, primarily ammonia and hydrogen sulfide, that meet or exceed their RQ from animal waste at farms.

Additionally, EPA has determined that this final rule contains no regulatory requirements that might significantly or uniquely affect small governments. This final rule reduces regulatory burden and the private sector is not expected to incur costs exceeding $100 million. Thus, the final rule is not subject to the requirements of Sections 202 and 205 of UMRA.

E. Executive Order 13132 (Federalism)

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' Policies that have federalism implications are defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

This final rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. There are no State and local government bodies that incur direct compliance costs by this final rule. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). This rule does not significantly or uniquely affect the communities of Indian tribal governments, nor would it impose substantial direct compliance

costs on them. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045 (Protection of Children From Environmental Health & Safety Risks)

EPA interprets EO 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the EO has the potential to influence the regulation. This action is not subject to EO 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211 (Actions That Significantly Affect Energy Supply, Distribution, or Use)

This action is not a ''significant energy action'' as defined in Executive Order 13211 (66 FR 28355 (May 22, 2001)), because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. This final rule will reduce the burden associated with the notification of releases to air of hazardous substances that meet or exceed their RQ from animal waste at farms.

I. National Technology Transfer Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (''NTTAA''), Public Law 104–113, 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This action does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations)

Executive Order (EO) 12898 (59 FR 7629 (Feb. 16, 1994)) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. As discussed in the Background section of the preamble for this final rule, the requirement to notify the government under CERCLA section 103 or EPCRA section 304 does not require the notifying entity to take any specific action to address the release. Therefore, because EPA has determined that a response action would be unlikely, EPA does not believe that exempting these releases from CERCLA section 103 notification requirements or to a limited extent EPCRA section 304 emergency notification requirements will have a disproportionately high and adverse human health or environmental effect on minority or low-income populations, especially since the Agency is not limiting any of its other authorities under CERCLA, such as CERCLA sections 104 (response authorities), 106 (abatement actions), 107 (liability), or any other provisions of CERCLA or EPCRA. The Agency also retains its authority to apply existing statutory provisions in its efforts to prevent minority and or low-income communities from being subject to disproportionately high and adverse impacts and environmental effects. We therefore have determined that this final rule does not have disproportionately high and adverse human health or environmental effects on minority or low-income populations.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2). This rule will be effective January 20, 2009.

List of Subjects

Stephen L. Johnson,

Administrator.

■ For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 302—DESIGNATION, REPORTABLE QUANTITIES, AND NOTIFICATION

■ 1. The authority citation for part 302 continues to read as follows:

Authority: 42 U.S.C. 9602, 9603, 9604; 33 U.S.C. 1321 and 1361.

■ 2. Section 302.3 is amended by adding in alphabetical order the definitions of ''Animal waste'' and ''Farm'' to read as follows:

§ 302.3 Definitions.

* * * * *

Animal Waste means manure (feces, urine, and other excrement produced by livestock), digestive emissions, and urea. The definition includes animal waste when mixed or commingled with bedding, compost, feed, soil and other typical materials found with animal waste.

* * * * *

Farm means a facility on a tract of land devoted to the production of crops or raising of animals, including fish, which produced and sold, or normally would have produced and sold, $1,000 or more of agricultural products during a year.

* * * * *

■ 3. Section 302.6 is amended by adding paragraph (e)(3) to read as follows:

§ 302.6 Notification requirements.

* * * * *

(e) * * *

(3) Releases to the air of any hazardous substance from animal waste at farms.

PART 355—EMERGENCY PLANNING AND NOTIFICATION

■ 4. The authority citation for part 355 continues to read as follows:

Authority: 42 U.S.C. 11002, 11003, 11004, 11045, 11047, 11048 and 11049.

■ 5. Section 355.31 is amended by adding paragraphs (g) and (h) to read as follows:

§ 355.31 What types of releases are exempt from the emergency release notification requirements of this subpart?

* * * * *

(g) Any release to the air of a hazardous substance from animal waste at farms that stable or confine fewer than the numbers of animal specified in any of the following categories.

(1) 700 mature dairy cows, whether milked or dry.

(2) 1,000 veal calves.

(3) 1,000 cattle other than mature dairy cows or veal calves. Cattle includes but is not limited to heifers, steers, bulls and cow/calf pairs.

(4) 2,500 swine each weighing 55 pounds or more.

(5) 10,000 swine each weighing less than 55 pounds.

(6) 500 horses.

(7) 10,000 sheep or lambs.

(8) 55,000 turkeys.

(9) 30,000 laying hens or broilers, if the farm uses a liquid manure handling system.

(10) 125,000 chickens (other than laying hens), if the farm uses other than liquid manure handling system.

(11) 82,000 laying hens, if the farm uses other than a liquid manure handling system.

(12) 30,000 ducks (if the farm uses other than a liquid manure handling system).

(13) 5,000 ducks (if the farm uses a liquid manure handling system).

(h) Any release to the air of a hazardous substance from animal waste at farms from animals that are not stabled or otherwise confined.

■ 6. Section 355.61 is amended by adding in alphabetical order the definitions of ''Animal waste'' and ''Farm'' to read as follows:

§ 355.61 How are key words in this part defined?

Animal Waste means manure (feces, urine, and other excrement produced by livestock), digestive emissions, and urea. The definition includes animal waste when mixed or commingled with bedding, compost, feed, soil and other typical materials found with animal waste.

* * * * *

Farm means a facility on a tract of land devoted to the production of crops or raising of animals, including fish, which produced and sold, or normally would have produced and sold, $1,000 or more of agricultural products during a year.

* * * * *

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 144

[ASPE:LTCI–F]

RIN 0991–AB44

State Long-Term Care Partnership Program: Reporting Requirements for Insurers

AGENCY: Office of the Assistant Secretary for Planning and Evaluation (OASPE), HHS.

ACTION: Final rule.

SUMMARY: This final rule sets forth reporting requirements for private insurers that issue qualified long-term care insurance policies in States participating in the State Long-Term Care Partnership Program established under the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171). Section 6021 of the DRA requires that the Secretary of Health and Human Services (the Secretary) specify a set of reporting requirements and collect data from insurers on qualified long-term care insurance policies issued under the program and the subsequent use of the benefits under these policies. Under a State Long-Term Care Partnership Program, an amount equal to the benefits received under the long-term care insurance policy is disregarded in determining the assets of an individual for purposes of Medicaid eligibility and estate recovery.

DATES: *Effective Date:* This final rule is effective on April 17, 2009.

ADDRESSES: *Electronic Access:* This **Federal Register** document is also available from the **Federal Register** online database through *GPO Access,* a service of the U.S. Government Printing Office. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents' home page address is *http://www.gpoaccess.gov/,* by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required).

FOR FURTHER INFORMATION, CONTACT: Hunter McKay, (202) 205–8999.

SUPPLEMENTARY INFORMATION:

I. Issuance of a Proposed Rule

On May 23, 2008 (73 FR 30030), the Department of Health and Human Services (the Department) published in the **Federal Register** a proposed rule with a 60-day comment period that described the reporting requirements that we proposed to require of all insurers that issue qualified long-term care insurance policies under the State Long-Term Care Partnership Program. We received three timely pieces of correspondence in response to the proposed rule. Each piece of correspondence addressed multiple issues relating to the provisions of the proposed rule. We summarize these public comments and present the Department's responses to them under the applicable subject-area headings below. In addition, we have posted, for reviewers' convenience, all of the public comments received on the following Web site: *http://www.regulations.gov.*

II. Scope of the Proposed Rule and This Final Rule

The proposed rule and this final rule describe the reporting requirements that the Department is requiring of all insurers that issue long-term care insurance policies under a State Long-Term Care Partnership Program for a State with as Medicaid State plan amendment approved after May 14, 1993. We point out that neither the proposed rule nor this final rule requires participating insurers to report data from States with a Partnership Medicaid State plan amendment approved as of May 14, 1993. In addition to the promulgation of the proposed rule and this final rule, the Department anticipates taking other actions to further the implementation of the Long-Term Care Partnership Program. One such action is publication of a separate **Federal Register** notice containing Partnership State Reciprocity Standards. These standards outline an agreement whereby States can provide Medicaid asset disregards for

Partnership policies purchased in other States.

Comment: One commenter suggested that language be added in the final rule to make clear that insurers are not required by the regulation to report Partnership data to the Department for States with a Partnership Medicaid State plan amendment approved as of May 14, 1993.

Response: We have added language above and in other applicable sections of this final rule, as the commenter suggested, to make clear the nonapplicability of the reporting requirements for submission of Partnership data by insurers in States with a Partnership Medicaid State plan amendment approved as of May 14, 1993.

III. Background

A. Historical Overview of State Long-Term Care Partnership Programs

1. Initial Development of Programs

In the late 1980's, a number of State Medicaid programs began to work with private insurance companies to create a bridge between Medicaid and insurance for long-term care. The goal of these collaborations was to create private insurance policies that were more affordable and provide better financial protection to consumers against large liabilities for long-term care costs than the policies generally available at that time. The result of these collaborations was the establishment of the State Long-Term Care Partnership Program that provided for expanded access to Medicaid by allowing applicants who use long-term care insurance policies to have higher assets and still be eligible for Medicaid, as long as they meet all other Medicaid eligibility criteria. The first four States that implemented Partnership programs, in 1993 (California, Connecticut, Indiana, New York), used two different methods for determining the amount of assets a participant was allowed to keep. Three States allowed participants to keep an amount equivalent to the amount paid by the insurance policy on his or her behalf (known as the ''dollar-for-dollar approach''). The other State required the purchase of a more comprehensive policy and, in exchange, allowed participants to keep all of their assets (known as the ''total assets approach''). Over time, one State combined these models to create a hybrid approach in which participants purchasing and using a policy that would cover fewer than 4 years of benefits would be allowed to keep one dollar for every dollar of paid benefits and those participants purchasing and using a policy that would cover 4 or more years of benefits would be allowed to keep all of their assets. These State partnership programs provided an incentive for insurers to offer affordable, high-quality benefits and for consumers to protect themselves against the high cost of long-term care through the purchase of insurance policies that can be used in conjunction with benefits provided under Medicaid.

As part of the implementation process, each of the four States that initially implemented Partnership programs in 1993 outlined a set of data reporting requirements for participating insurers. The data that were to be collected were intended to allow each State to monitor program activities and evaluate the impact of the Partnership Program on Medicaid long-term care expenditures. The insurers who participated in these partnerships recommended, as part of the design of the data collection requirements, that the participating States use a unified set of reporting requirements to streamline the reporting burden on the participating insurers. The participating insurers believed that if each State designed its own reporting requirements, the administrative costs for the program would be prohibitive. The four States agreed with the participating insurers and adopted a uniform set of reporting criteria.

The four initial States launched their Partnership programs using existing State authority through amendments to their State Medicaid plans (Partnership Medicaid State plan amendments). Each State requested a change in the treatment of assets in the Medicaid financial eligibility test. No other Federal authority was necessary at that time to operate the programs.

Comment: One commenter suggested that language be added to the Background section of the final rule to make clear that consumers who take advantage of the Partnership Program must also meet all other Medicaid eligibility requirements. Two commenters suggested that the discussion of the amount of asset protection offered under the original Partnership Programs be expanded in the final rule to reflect the differences between the ''dollar-for-dollar model'' and the ''total assets model.''

Response: We have added language above in this final rule, as the commenters suggested, to specify that consumers who take advantage of the Partnership Program must also meet all other Medicaid eligibility requirements and to explain the differences between the ''dollar-for-dollar model'' and the ''total assets model.''

Comment: One commenter suggested that language indicating that the regulations do not require insurers to report Partnership data to the Department for States with a Partnership Medicaid State plan amendment approved as of May 14, 1993, be added to the section of the final rule discussing the agreement reached by the original four States pertaining to a unified data reporting structure.

Response: The section in which the commenter is requesting a change relates to the history of the Partnership programs and is not an appropriate place to discuss the scope of the new regulations. However, we have incorporated the language in section II. (Scope) of this final rule, as well as in other applicable sections, to address the nonapplicability of the reporting requirements for Partnership data for States with a Partnership Medicaid State plan amendment approved as of May 14, 1993.

2. Omnibus Budget Reconciliation Act of 1993

The Omnibus Budget Reconciliation Act of 1993 (OBRA 1993), Public Law 103–66, contained language that changed the conditions under which Medicaid State plan amendments relating to asset disregards for private long-term care insurance could be approved. OBRA 1993 allowed California, Connecticut, Indiana, and New York, as well as Iowa and Massachusetts, to continue their initial Long-Term Care Partnership Programs. However, OBRA 1993 specified a set of requirements for any additional States that chose to operate a Partnership Program. Any State, other than the initial four partnership States, that sought a Medicaid State plan amendment on or after May 14, 1993, was required to abide by the following additional conditions:

a. Estate Recovery

States establishing Long-Term Care Partnership Programs on or after May 14, 1993, were required to recover from the estates of Medicaid recipients in States with partnership agreements expenses incurred for the provision of long-term health care under Medicaid. Assets that were disregarded in the initial financial eligibility process were also exempt from estate recovery in the initial four States with Partnership Programs. States establishing new Partnership Programs were only allowed to disregard assets in the initial eligibility process but not in the estate recovery process. After a Medicaid recipient who had a long-term care insurance policy issued under a State

Long-Term Partnership Program died, the State was required to recover an amount equivalent to what Medicaid spent on his or her behalf from the deceased recipient's estate, including any protected assets under the State Long-Term Care Partnership Program.

b. No Waiver of Estate Recovery

States establishing Long-Term Care Partnership Programs on or after May 14, 1993, were precluded from waiving the estate recovery requirement for Medicaid recipients who had obtained long-term care insurance policies under a State Long-Term Care Partnership Program.

c. Expanded Definition of Estate

States establishing Long-Term Care Partnership Program on or after May 14, 1993, were also required to use a specific definition of ''estate'' for recovery purposes when recovery of Medicaid expenditures was against the estates of Medicaid recipients who had obtained long-term care insurance policies issued under a State Long-Term Care Partnership Program. This definition was more expansive than the definition that was generally used by States.

While OBRA 1993 did not forbid additional States from attempting to establish new Long-Term Care Partnership Programs under the new conditions, the impact was essentially the same as a ban. A few States tried unsuccessfully to launch partnership programs under the new conditions. Other interested States passed enabling legislation with contingency language that allowed the State to proceed if the OBRA 1993 partnership provisions were repealed. No subsequent Federal legislation related to the Long-Term Care Partnership Programs was enacted until the Deficit Reduction Act of 2005 (DRA) Public Law 109–171. As discussed in detail under section II.A.3. of this proposed rule and under section III.A.3. of this final rule, the DRA included provisions that allow States to offer specific asset disregards for Medicaid eligibility purposes under a new set of conditions.

3. Deficit Reduction Act of 2005

Section 6021(a)(1) of the DRA amended section 1917(b)(1)(C)(i) of the Act and added new sections 1917(b)1)(C)(iii) through (vi) to the Act that provide for an expansion of the State Long-Term Care Insurance Partnership Program through a new set of conditions. These conditions pertain to States with Partnership Medicaid State plan amendments approved after May 14, 1993. Under this provision, States may establish ''qualified State long-term care insurance partnerships'', defined in the Act as an approved Medicaid State plan amendment under Title XIX of the Act that provides for the disregard of any assets or resources in an amount equal to the insurance benefit payments that are made to or on behalf of an individual who is a beneficiary under a long-term care insurance policy if certain requirements specified in sections 1917(b)(1)(C)(iii)(I) through (VII) of the Act are met. In other words, States establishing new Partnership programs must offer a dollar of asset disregard for every dollar paid out under a long-term care insurance policy issued under that State's long-term care partnership program.

Section 1917(b)(1)(C)(iii)(II) of the Act provides that the insurance policy must be a qualified long-term care insurance policy as defined in section 7702B(b) of the Internal Revenue Code of 1986, that is issued not earlier than the effective date of the State plan amendment. (If an individual has an existing long-term care insurance policy that does not qualify as a qualified partnership policy due to the issue date of the policy, and that policy is exchanged for another policy, the State insurance commissioner or other State authority must determine the issue date for the policy that is received in exchange. Under this provision, a long-term care insurance policy includes a certificate issued under a group insurance contract.)

Among other requirements specified in the statute for qualified long-term care insurance partnerships—

- The long-term care insurance policy must (1) be issued to an insured individual who is a resident of the State in which coverage first became effective under the policy (sections 1917(b)(1)(C)(iii)(I) of the Act); (2) be certified by the State insurance commissioner or other appropriate authority that the policy meets specific provisions of the National Association of Insurance Commissioners (NAIC) October 2000 Model Regulation and Model Act (sections 1917(b)(1)(C)(iii)(III) and 1917(b)(5)(B) of the Act); and (3) include certain protections against inflation on an annual basis (section 1917(b)(1)(C)(iii)(IV) of the Act).
- The State Medicaid agency must provide information and technical assistance to the State insurance department on the insurance department's role of assuring that any individual who sells a long-term care insurance policy under the partnership receives training and demonstrates evidence of an understanding of such policies and how they relate to other public and private coverage of long-term care (section 1917(b)(1)(C)(iii)(V) of the Act).
- Issuers of long-term care insurance policies under a State qualified long-term care insurance partnership must provide regular reports to the Secretary, in accordance with regulations of the Secretary, that include notification regarding when benefits provided under the policy have been paid and the amount of such benefits paid, notification regarding when the policy otherwise terminates, and such other information as the Secretary determines may be appropriate to the administration of State long-term care insurance partnerships (section 1917(b)(1)(C)(iii)(VI) of the Act). Section 1917(b)(1)(C)(v) of the Act provides that the regulations required under section 1917(b)(1)(C)(iii)(VI) of the Act shall be promulgated after consultation with the NAIC, issuers of long-term care insurance policies, States with experience with long-term care insurance partnership plans, other States, and representatives of consumers of long-term care insurance policies, and shall specify the type and format of the data to be reported and the frequency with which such reports are to be made. In addition, the Secretary, as appropriate, shall provide copies of the reports provided in accordance with that clause to the State involved.
- The State may not impose any requirement affecting the terms of benefits of a policy under the partnership program unless the State imposes such requirement on long-term care insurance policies without regard to whether the policy is covered under the partnership or is offered in connection with such a partnership (section 1917(b)(1)(C)(iii)(VII) of the Act).

Section 1917(b)(1)(C)(iv) of the Act provides that a State that had a State plan amendment approved as of May 14, 1993, satisfies the requirements of the statute under clause (II) and may continue operating as originally implemented if the Secretary determines that the State Medicaid plan amendment provides for consumer protection standards that are no less stringent than the consumer protection standards that applied under such a State plan amendment as of December 31, 2005.

Comment: One commenter requested that the language that describes the impact of the DRA of 2005 be modified in the final rule to clearly indicate that the conditions set forth in sections 6021(a) through (c) of the DRA of 2005 pertain only to States with Partnership

Medicaid State plan amendments approved after May 14, 1993. One commenter suggested that the description of the ''grandfathered'' States also make clear that the regulations do not pertain to States with a Partnership Medicaid State plan amendment approved as of May 14, 1993.

Response: We have added language above and in other applicable sections in this final rule, to make these clarifications, as suggested by the commenters.

B. Implementing Regulations

Currently, there are no Federal regulations directly related to State operation of State Long-Term Care Partnership Programs. In 2006, the Department provided guidance to States, through a letter to Medicaid Directors, on the implementation of State long-term care partnership programs under the DRA. In areas in which the program coordinates benefits with Medicaid coverage of long-term care, the existing Medicaid regulations at 42 CFR Chapter IV, Subchapter C, are applicable. In 2006, States were provided with guidance on the implementation of State Long-Term Care Partnership Programs under the DRA of 2005.

To implement section 1917(b)(1)(C)(iii)(VI) and 1917(b)(1)(C)(v) of the Act, as directed by the statute, in the May 23, 2008 proposed rule (73 FR 30033), we proposed to set forth in regulations the requirements for reporting information and data on qualified long-term care insurance policies issued under State Long-Term Care Partnership Programs under an approved State plan amendment. In this final rule, we are adopting the regulations as final with some technical changes, as discussed below.

C. States Currently Operating Long-Term Care Partnership Programs

California, Connecticut, Indiana, Iowa, Massachusetts, and New York had approved State Long-Term Partnership Programs under an approved State plan amendment as of May 14, 1993. They were ''grandfathered'' as satisfying the statutorily imposed requirements when, pursuant to section 1917(b)(1)(C)(iv) of the Act, the Secretary determined that the State plan amendments of these States provide protection no less stringent than that applied under their State plan amendments as of December 31, 2005.

At the time we issued the proposed rule, we stated that, as of December 2007, seven other States offered State Long-Term Care Partnership policies for sale under the DRA provisions: Florida, Idaho, Kansas, Minnesota, Nebraska, South Dakota, and Virginia. Nine States had approved State plan amendments for qualified State Long-Term Care Partnership Programs although policies had not yet been issued pursuant to those programs: Colorado, Florida, Georgia, Iowa, Minnesota, Missouri, North Dakota, Nevada, Ohio, and Oregon. Four States had submitted State plan amendments for which approval is pending: Arizona, New Hampshire, Oklahoma, and Pennsylvania. Ten other States were in the process of developing Partnership Programs: Illinois, Maine, Maryland, Michigan, Montana, New Jersey, Rhode Island, Texas, Vermont, and Wisconsin.

As of August 2008, Partnership policies are still for sale in the four States that first implemented a Partnership program, as well as in 13 additional States. Nine States have approved Medicaid State plan amendments, although policies are not yet for sale. Three other States have Medicaid State plan amendments pending approval from the Centers for Medicare and Medicaid, HHS.

IV. Provisions of the Proposed Rule and This Final Rule

A. Legislative Authority

As stated earlier, the DRA of 2005 requires insurers participating in State long-term care partnership programs to provide regular reports to the Secretary in a manner in accordance with regulations of the Secretary. The reports must include notification regarding when benefits provided under the policy have been paid and the amount of the benefits paid, notification regarding when the policy otherwise terminates, and any other information as the Secretary determines may be appropriate to the administration of State long-term care insurance partnerships. Section 1917(b)(1)(C)(v) of the Act provides that the regulations required under section 1917(b)(1)(C)(iii)(VI) of the Act must be promulgated after consultation with the NAIC, issuers of long-term care insurance policies, States with experience with long-term care insurance partnership plans, other States, and representatives of consumers of long-term care insurance policies, and must specify the type and format of the data to be reported and the frequency with which the reports are to be made. In addition, the Secretary, as appropriate, must provide copies of the reports provided in accordance with that clause to the State involved.

B. Collaboration With States, Insurers, Insurance Regulators, and Consumers in the Development of Reporting Requirements

In accordance with section 1917(b)(1)(C)(v) of the Act, as added by the DRA of 2005, as we discussed in the proposed rule, we have consulted with numerous stakeholders in the development of the reporting requirements presented in this rule. In addition to one-on-one consultations with stakeholders representing States, insurers, consumers, and regulators, we have established a Technical Expert Panel to provide a forum for the exchange of ideas, perspectives, and expertise regarding the specification of individual data items. The Technical Expert Panel consists of approximately 25 members representing insurers, States, consumer organizations, the NAIC, the Federal Government, and the policy research community. The panel members were selected in January 2007, from responses to invitations sent by HHS along with an initial draft of the reporting requirements. We held numerous meetings and teleconferences with the panel members to discuss and further develop the draft reporting requirements and to obtain further input on partnership implementation. The reporting requirements presented in the proposed rule and finalized in this final rule represent the product of this ongoing stakeholder input process. We plan to continue ongoing work with the Technical Expert Panel.

C. Incorporation of Reporting Requirements in the Code of Federal Regulations

In the proposed rule, the Department proposed to establish under Title 45, Part 144 of the Code of Federal Regulations a new Subpart B to incorporate the requirements for the reporting of data by insurers on qualified long-term care insurance policies issued under State Long-Term Care Partnership Programs that are established under an approved Medicaid State plan amendment. Specifically—

Proposed § 144.200, which contained the basis for the regulations.

Proposed § 144.202, which included the definitions used throughout the subpart.

Proposed § 144.204, which specified the applicability of the regulations under the subpart.

Proposed § 144.206, which specified the requirements for reporting of long-term care partnership program data and the frequency with which insurers must report the data.

Proposed § 144.208, which specified the deadlines for submission of reports.

Proposed § 144.210, which specified the format and manner in which the data are to be reported.

Proposed § 144.212, which specified the confidentiality of information requirements that will be applied.

Proposed § 144.214, which specified the action that the Secretary will take if an insurer fails to report the required data by the specified deadlines.

Under proposed § 144.202, Definitions, we included the following definitions:

Partnership qualified policy refers to a qualified long-term insurance policy issued under a qualified State long-term care insurance partnership.

Qualified long-term insurance care policy means an insurance policy that has been determined by a State insurance commissioner to meet the requirements of sections 1917(b)(1)(C)(iii)(I) through (IV) and 1917(b)(5) of the Act. It includes a certificate issued under a group insurance contract.

Qualified State long-term care insurance partnership means an approved Medicaid State plan amendment that provides for the disregard of any assets or resources in an amount equal to the insurance benefit payments that are made to or on behalf of an individual who is a beneficiary under a long-term care insurance policy that has been determined by a state insurance commissioner to meet the requirements of section 1917(b)(1)(C)(iii) of the Act [incorrectly cited in the proposed rule as section 1917(b)(a)(C)(iii)]. It includes any Medicaid State plan amendment approved as of May 14, 1993 [incorrectly stated in the proposed rule as May 4, 1993], that meets the requirements of section 1917(b)(1)(C)(iii) of the Act and for which the Secretary determined that the State plan amendments provides for consumer protection standards that are no less stringent than the consumer protection standards that applied under the State plan amendment as of December 31, 2005.

Comment: The commenter suggested that the word ''care'' be inserted into the definition of ''Partnership qualified policy.'' One commenter pointed out that we had reversed the order of two words and therefore incorrectly labeled the definition of ''qualified long-term care insurance policy'' as ''qualified long-term insurance care policy''

Response: We agree with the first commenter's suggestion and have revised the definition of ''Partnership qualified policy'' in this final rule to refer to a qualified long-term care insurance policy issued under a qualified State long-term care insurance partnership. We thank the commenter for bringing to our attention the inadvertent mislabeling of the definition of ''qualified long-term care insurance policy'' and have made the correction in this final rule.

Comment: One commenter suggested that the definition of a ''Qualified State long-term care insurance partnership'' be modified to clarify that the regulations do not require insurers to report Partnership data to the Department for States with a Partnership Medicaid State plan amendment approved as of May 14, 1993.

Response: In response to the commenter's suggestions, we have revised the proposed definition for ''Qualified State long-term care insurance partnership'', by removing the last sentence of the definition, to clarify that the regulations do not require insurers to report Partnership data to the Department for States with a Partnership Medicaid State plan amendment approved as of May 14, 1993.

After consideration of the public comments received, we are adopting as final proposed §§ 144.200, 144.202, and 144.204, with the following modifications. We have revised the definition of ''Partnership qualified policy'' by adding the word ''care'' in the definition. We have corrected the inadvertent mislabeling of the definition of ''Qualified long-term care insurance policy.'' We have revised the definition of ''Qualified State long-term care partnership'' by removing the last sentence of the proposed definition.

Each of the additional proposed regulatory requirements is discussed in detail in the sections below.

D. Specific Reporting Requirements

As discussed in the proposed rule, in consultation with stakeholders and the Technical Expert Panel, we developed requirements for insurers for reporting data under the State Long-Term Care Partnership Program under two categories: (1) Registry data; and (2) claims data (proposed § 144.206).

We proposed that these two categories would require the submission of data in four distinct file types. Generally, participating long-term care insurers will report under only two of these files. For all four file types, as we proposed, we are requiring insurers to report on only those insured individuals, policyholders, and claimants who have active qualified long-term care insurance partnership policies or certificates. The reporting requirements will not apply to insurance policies or certificates that are not partnership qualified.

Insurer reporting specifications are detailed in an HHS document entitled ''State Long-Term Care Partnership Insurer Reporting Requirements'' which we expect will be available via the Internet at the Web site at: *http://aspe.hhs.gov/daltcp/reports/2008/PartRepReq.pdf* no later than October 1, 2008. (We noted in the proposed rule that we expected that this document would be available by June 1, 2008. However, the release date has been delayed.) We are in the process of developing an integrated database through which insurers will submit these data. As we proposed, we are requiring that data be submitted through a secure Web site that meets all current Health Insurance Portability and Accountability Act requirements for security of personal health information.

1. Registry Data

In the proposed rule (73 FR 30034), we proposed to require insurers to report data, on a semiannual basis, on all insured individuals who have been issued qualified long-term care insurance policies or certificates under qualified State Long-Term Care Partnership Programs; that is, for the 6-month reporting periods of January 1 through June 30 and July 1 through December 31 of each year (proposed § 144.206(b)(1)(ii)). We proposed that the reports must include data on qualified long-term care insurance partnership policies sold on either an individual basis or a group basis, as long as individual-level data are available to the insurer. Under proposed § 144.206(b)(1)(iii), these data would include, but are not limited to, the following:

- Current identifying information on each insured individual.
- The name of the insurance company and the issuing State.
- The effective date and terms of coverage under the policy.
- The coverage period and benefits.
- The annual premium.
- Other information as specified by the Secretary in ''State Long-Term Care Insurance Partnership Insurer Reporting Requirements.''

Comment: One commenter pointed out that we used different terminology in the proposed rule to describe the instruction document we would issue for reporting data.

Response: We thank the commenter for bringing this inconsistency to our attention. In the proposed rule, we inconsistently used the term ''Reporting

Instructions'' when referring to the title of this document; rather, we should have used ''Reporting Requirements.'' Throughout this final rule, we have standardized references to the document containing the detail instructions for insurers on how to report data to the Department under the title ''State Long-Term Care Partnership Insurer Reporting Requirements.''

After consideration of the public comments received, we are adopting as final our proposed § 144.206 with one technical change to the title of the instruction document, as discussed above.

2. Claims Data

In the proposed rule, we proposed to require insurers to report data, for each quarter of the calendar year, on all benefit claims paid for all insured individuals who have been issued qualified long-term care insurance policies or certificates (individual policies or under group coverage plans) under qualified State Long-Term Care Partnership Programs (proposed § 144.206(b)(2)). Under proposed § 144.206(b)(2)(ii), these data would include, but are not limited to, the following:

- Current identifying information on the insured individual.
- The type and cash amount of the benefits paid during the reporting period and lifetime to date.
- Remaining lifetime benefits.
- Other information as specified by the Secretary in ''State Long-Term Care Insurance Partnership Insurer Reporting Requirements.''

We did not receive any public comments on this section other than the notification that we had used different titles for the instruction document discussed above. Therefore, we are adopting as final the proposed provisions of § 144.206 with the technical change noted above.

3. Frequency of Reports and Deadlines for Submission

In the proposed rule, we proposed to require insurers to submit data for different reporting periods, depending upon the file type.

We proposed to require insurers to submit the required registry data to the Secretary on a semiannual basis; that is, for the 6-month reporting period of January 1 through June 30 and July 1 through December 31 of each year under proposed § 144.206(b)(1)(ii). The proposed deadline for submittal of registry data reports was 30 days after the end of the reporting period (proposed § 144.208(b)).

Comment: One commenter stated that the discussion of frequency of reports in the preamble of the proposed rule failed to list the frequency of the reports on insurance claims.

Response: The commenter is correct. Even though we specified the frequency of the reports on insurance claims data in the regulation text under proposed § 144.208(c), we did not include a detailed discussion in the preamble. The description of the submission of the claims data along with a reference to the detailed documentation of the reporting requirements is as follows:

We are requiring insurers to submit the required claims data to the Secretary on a quarterly basis; that is, for the 3-month reporting period of January 1 through March 30, April 1 through June 30, July 1 through September 30, and, October 1 through December 31 of each year under § 144.206(b)(2)(i). The deadline for submittal of claims data reports is 30 days after the end of the reporting period (§ 144.208(c)). Detailed reporting instructions can be found on the Internet at the Web site: *http://aspe.hhs.gov/daltcp/reports/2008/PartRepReq.pdf.*

After consideration of the public comments received, we are adopting as final proposed §§ 144.208(b) and (c) without modification.

4. Transition Provision

For insurers who have issued or exchanged a qualified Partnership policy prior to the effective date of the final regulations we issue, we proposed a transition provision under § 144.208(a). We proposed that the first reports required for these insurers would be the reports that pertain to the reporting period that begins no more than 120 days after the effective date of the final regulations.

We did not receive any public comments on the proposed § 144.208(a). Therefore, we are adopting it as final without modification in this final rule.

5. Format and Manner of Reporting Data

In the proposed rule, we proposed to require that insurers submit the required data in the format and manner specified by the Secretary in the HHS-issued insurer reporting specifications document, ''State Long-Term Care Insurance Partnership Insurer Reporting Requirements'' (proposed § 144.210). As we mentioned earlier, we are in the process of developing an integrated database that would be accessible through a secure Web site, and we plan to issue instructions as to how insurers will access and input the required data into the HHS reporting system.

We did not receive any public comments on the proposed § 144.210. Therefore, we are adopting it as final without modification in this final rule.

6. Use of Submitted Reports

As we discussed in the proposed rule, the overall purpose of the data is twofold: First, to be used in efforts to monitor program performance at both the State and Federal level; and second, to provide data for a longer term evaluation of the effectiveness of the Partnership Program. The Department and the States participating in the State Long-Term Care Partnership Program will use the information provided by insurers in compliance with the reporting requirements for analytical studies and for program monitoring. The data provided by insurers will reflect the combined experience of all State Long-Term Care Partnership Programs in terms of policies sold and benefits used. We plan to use the data to produce reports for Congress and other interested stakeholders on the implementation of the State Long-Term Care Partnership Program. In addition, we plan to use the data to generate individual State-level reports that will be used by the States to track the implementation of the Partnership Program at the State level. The Department may also use the data to examine public policy issues related to long-term care insurance in general as opportunities arise.

HHS does not intend to use the data to determine asset disregard levels for individuals who participate in the State Long-Term Care Partnership Program and eventually apply for Medicaid coverage. We will not collect data on ''point in time'' information regarding the amount of insurance benefits used by claimants, nor exact information on when private insurance benefits may be exhausted, which clearly would depend upon how claimants use benefits to purchase long-term care services. The computation of asset disregard levels and the determination of Medicaid eligibility coverage are matters that will be dealt with among the insurer, the insured individual, and the State Medicaid eligibility office. We expect that when insured individuals exhaust their insurance coverage (or otherwise become eligible for Medicaid prior to the exhaustion of benefits), insurers will provide them with documentation of their participation in the State Long-Term Care Partnership Program and of the amount of benefits that the insured received. This documentation will become part of the entire documentation provided by the insured individual at the time he or she applies for Medicaid.

The Medicaid eligibility office will then determine, based upon the documentation provided by the applicant, the asset disregard level that will be applied.

It is possible that State Medicaid programs may wish to access the collected data for monitoring purposes, to help them anticipate the number of insured individuals who may become eligible for Medicaid asset disregards over a projected time period. For example, through reports provided to each State from the integrated database, States would know how many partnership policyholders are ''in claim'' during any 3-month reporting period. States would also know, approximately, to what extent policyholders who are in claim have utilized the insurance benefits for which they are eligible and the amount of benefits remaining under their policy maximums. However, once an insured individual uses his or her insurance benefits under the policy, his or her eligibility for Medicaid will still depend upon the amount of available assets he or she retains, relative to his or her asset disregard, as well as other Medicaid eligibility criteria. For example, an insured individual may be eligible for an asset disregard of $150,000, but still retains $250,000 in countable assets. In this case, he or she would have to spend down $100,000 of his or her available assets before applying for Medicaid coverage. Thus, in general terms, States will be able to use the data to project future applications for Medicaid (and their potential budgetary impacts) but, at the individual level, the specific financial circumstances of each insured individual would determine his or her eligibility for Medicaid coverage.

Comment: One commenter suggested that the Department consider a broader use of the data to investigate a number of issues related to long-term care insurance in general as well as issues related to the Partnership Program.

Response: The Department will explore using the Partnership data to examine other issues related to long-term care insurance, to the extent possible. We have modified the preamble discussion above to indicate this.

Comment: One commenter suggested that the language included in this section of the preamble of the proposed rule could imply that participants must exhaust their benefits before they can take advantage of the Partnership Program.

Response: The commenter is correct in asserting that exhaustion of benefits is not required by the DRA of 2005. Participants may apply for a Medicaid asset disregard before they have exhausted their insurance benefits. We have modified the preamble language in this final rule to reflect the possibility that someone may apply for Medicaid and seek an asset disregard before they have exhausted their insurance benefits.

E. Additional State-Mandated Reporting Requirements

The DRA of 2005 explicitly states that there is nothing in the statute that prohibits States from imposing additional reporting requirements on insurers participating in the Long-Term Care Partnership Program, beyond the Federal reporting requirements that we proposed in the proposed rule and are finalizing in this final rule. This regulation does not require insurers to report Partnership data to the Department for States with a Partnership Medicaid State plan amendment as May 14, 1993. However, we believe that the information that will be made available to the Secretary and to the States participating in the Long-Term Care Partnership Program through these mandated reporting requirements will be sufficient to meet the policy analysis and program monitoring needs of the States. We, as well as the stakeholders participating in the development of these reporting requirements, attempted to achieve a proper balance between the legitimate needs of the Federal Government and State governments to monitor the implementation and operation of the State Long-Term Care Partnership Program, and the desire not to impose undue cost burdens on participating insurers, to the point where they may consider it not economically beneficial to participate in the Partnership Program.

Comment: One commenter suggested that the discussion of State-mandated reporting in the final rule be revised to clarify that nothing in the regulation prohibits any State (including grandfathered States) from requiring data from participating Partnership insurers. The commenter further suggested that the section describe the motivations of States for requiring State-specific data. The commenter also suggested that all references to costs of data collection on the part of insurers be deleted. The commenter stated that the costs of reporting are ''often minimal or nonexistent.''

Response: We are not modifying the language in this section as the commenter suggested. The balance between the Government's need for data and the cost burden on participating insurers is, in our view, a real issue, especially given the varying size of different participating States. Finding a balance between the need for data and the cost burden was part of the charge given to the stakeholder group mandated by the DRA. We believe the discussion of the costs of data collection in this section is appropriate and that its presence does not diminish States' ability to negotiate for State-specific data.

F. Confidentiality of Information

In the proposed rule, we proposed to provide in the regulations that the data collected and reported under the requirements of the regulations would be subject to the confidentiality of information requirements specified in regulations under 42 CFR Part 401, Subpart B, and 45 CFR Part 5, Subpart F and any other applicable confidentiality statute or regulation (proposed § 144.212).

We did not receive any public comments on this section. Therefore, we are adopting as final the proposed § 144.212 without modification in this final rule.

G. Actions for Noncompliance With Reporting Requirements

In the proposed rule, we proposed under § 144.214 that if an insurer of a qualified long-term care insurance policy does not submit the required reports by the due dates specified in the new subpart B of 45 CFR Part 144, the Secretary notifies the appropriate State insurance commissioner within 45 days after the deadline for submission of the information and data specified in § 144.208.

We did not receive any comments on this proposed section. Therefore, we are adopting as final the proposed § 144.214 without modification.

H. Provision of Reports to Partnership States

Section 1917(b)(1)(C)(v) of the Act provides that the Secretary, as appropriate, must provide copies of the reports provided by insurers to the State involved. We plan to make reports containing the reported data available to States in a timely and efficient manner.

V. Collection of Information Requirements

The Department of Health and Human Services has determined that this notice of proposed rulemaking contains information collections that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520). In compliance with the requirement of section 3506(c)(2)(A) of the PRA , the Office of the Secretary

(OS), Department of Health and Human Services, published in the May 23, 2008, proposed rule the following summary of a proposed information collection request for public comment. Interested persons were invited to send comments regarding the burden estimate or any other aspect of the collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Individuals were given the opportunity to request and obtain copies of the supporting statement and any related forms for the proposed paperwork collections described below. Written comments and recommendations for the proposed information collections were due within 60 days of publication of the proposed rule.

Further, the Department acknowledges that this regulation is covered under the Privacy Act and that this collection of data constitutes a System of Records. The Department is publishing elsewhere in this issue of the **Federal Register** a System of Records Notice for this collection of data.

Title: Partnership for Long Term Care Data Set.

Description: This information collected under the final rule is intended for insurers participating in the State Long-Term Care Partnership Program as authorized by the DRA of 2005. Insurers will provide data in the prescribed format to the Department on Partnership certified long-term care insurance policies for partnership participants in states with Partnership Medicaid state plan amendments approved after May 14, 1993. The requirements include the identity of the policy holder, the type of coverage purchased, and the amount of insurance benefits used. Data from this submission will be provided to State Medicaid agencies to assist in determining the amount of asset protection earned by program participants.

Comment: One commenter brought to our attention two technical errors in the narrative portion of the instruction document and another error in the detailed data element specifications.

Response: We have made the appropriate changes to the instruction document, which is now listed as Version 1.1. This instruction document is available on the Web site at: *http://aspe.hhs.gov/daltcp/reports/2008/PartRepReg.pdf.*

It is estimated that insurers participating in the Partnership Program will be able to provide the necessary reports from data currently within their insurance operations systems. Fulfilling the reporting requirements will require that they write programs to extract the data in the manner specified by the Department. There are no costs to the respondents, other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS AND BURDEN COSTS

CFR Section	Type of respondent	Number of respondents	Number of responses per respondents	Average response per respondent (in hours)	Total burden hours
45 CFR 144.206	Insurers	30	6	45/60	135

We indicated that public comments addressed as a result of the notice in the proposed rule would be taken into account in the formal OMB request for clearance for this data collection. The new information collection provisions in this final rule have been approved by OMB under OMB control number 0990–0333, effective through December 31, 2011.

VI. Regulatory Impact Analysis

A. Overall Impact

We have examined the impacts of this final rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review) and the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), and Executive Order 13132.

B. Executive Order 12866

Executive Order 12866 (as amended by Executive Order 13258, which merely reassigns responsibility of duties) directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year).

While we have determined that this final rule is not economically significant, it is, however, a significant regulatory action. We estimate that the aggregate cost to participating private insurers of implementing the reporting requirements in this final rule will be approximately $1.5 million.

C. Regulatory Flexibility Act (RFA)

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and government agencies. Most insurance companies are not considered to be small entities because they generally have revenues of more than $29 million in any 1 year. (For details, see the Small Business Administration's final rule that sets forth size standards for industries at 65 FR 69432, November 17, 2000.) For purposes of the RFA, all insurance companies are not considered to be small entities. Individuals and States are not included in the definition of a small entity. However, we solicited comments on our estimates and analysis of the impact on insurers of the proposed rule.

There are approximately 100 insurance companies located nationwide that issue long-term care insurance policies. We expect that, of these 100 companies, approximately 30 insurance companies will participate in qualified State Long-Term Care Partnership Programs. Currently, there are 15 to 20 companies operating in States that are selling or have issued qualified long-term care insurance policies under the State Long-Term Care Partnership Programs. As of December 2007, approximately 300,000 policies have been sold. We believe this represents approximately 80 percent of the policies that might be sold when the Partnership Programs are established nationwide. We anticipate that the number of insurance companies selling qualified long-term care insurance

partnership policies might increase by about 10 as more States obtain approved State plan amendments to operate State Long-Term Care Partnership Programs.

As we stated earlier, insurers participating in the original four Partnership Programs have been reporting data on policies sold and benefits used in the program for more than a decade. The reporting requirements in this final rule were designed to take advantage of data already available in insurer data sets. Insurers will not be asked to collect new data, but simply to recode existing data into a common format for submission to the Secretary. It is estimated that participating insurers will have to make a one-time investment to produce the computer programs necessary to compile the reports. Should the reporting requirement change in the future, there will also be a cost to make the necessary changes. We are estimating that the programming will require 400 hours of labor on average (this number will vary widely by company depending on the type of systems used) to create the necessary changes. We also estimate an average cost per hour of programming time of $125. The cost per company is estimated at $50,000 and the total estimate for all companies is estimated at $1.5 million.

Subsequently, there will be a much smaller investment to run the quarterly and semi-annually reports. The data submissions were designed to be primarily snapshots of data elements in the insurers' files with very little tabulation or summary reporting. We note that all of the currently participating insurers participated in the development of the reporting requirements in this final rule and have given their consensus to the requirements.

D. Small Rural Hospitals

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis for any proposed rule (and subsequent final rule) that may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. This final rule does not affect small rural hospitals.

E. Unfunded Mandates

Section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. That threshold level is currently approximately $120 million. This final rule will not mandate any requirements for State, local, or tribal governments. However, it will affect private sector costs to insurance companies who sell qualified long-term care insurance partnership policies. We note that participation by insurers in the Partnership Program is voluntary. We have also determined that the costs of reporting the required data are not significant.

F. Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. As stated above, this final rule will not have a substantial effect on State and local governments.

List of Subjects in 45 CFR Part 144

Health care, Health insurance, Reporting and recordkeeping.

■ For the reasons stated in the preamble of this final rule, we are amending 45 CFR Subtitle A, Subchapter B, Part 144 as set forth below:

Subchapter B—Requirements Relating to Health Care Access

PART 144—REQUIREMENTS RELATING TO HEALTH INSURANCE COVERAGE

■ 1. The authority citation for Part 144 is revised to read as follows:

Authority: Secs. 2701 through 2763, 2791, and 2792 of the Public Health Service Act (42 U.S.C. 300gg through 300gg–63, 300gg–91, 300gg–92 as amended by HIPAA (Pub. L. 104–191, 110 Stat. 1936), MHPA (Pub. L. 104–204, 110 Stat. 2944, as amended by Pub. L. 107–116, 115 Stat. 2177), NMHPA (Pub. L. 104–204, 110 Stat. 2935), WHCRA (Pub. L. 105–227, 112 Stat. 2681–436)) and section 103(c)(4) of HIPAA; and secs. 1102 and 1917(b)(1)(C)(iii)(VI) of the Social Security Act (42 U.S.C. 1302 and 1396p(b)(1)(C)(iii)(VI)).

■ 2. A new Subpart B is added to read as follows:

Subpart B—Qualified State Long-Term Care Insurance Partnerships: Reporting Requirements for Insurers

Sec.

Subpart B—Qualified State Long-Term Care Insurance Partnerships: Reporting Requirements for Insurers

§ 144.200 Basis.

This subpart implements—

(a) Section 1917(b)(1)(C) (iii)(VI) of the Social Security Act, (Act) which requires the issuer of a long-term care insurance policy issued under a qualified State long-term care insurance partnership to provide specified regular reports to the Secretary.

(b) Section 1917(b)(1)(C)(v) of the Act, which specifies that the regulations of the Secretary under section 1917(b)(1)(C)(iii)(VI) of the Act shall be promulgated after consultation with the National Association of Insurance Commissioners, issuers of long-term care insurance policies, States with experience with long-term care insurance partnership plans, other States, and representatives of consumers of long-term care insurance policies, and shall specify the type and format of the data to be reported and the frequency with which such reports are to be made. This section of the statute also provides that the Secretary provide copies of the reports to the States involved.

§ 144.202 Definitions.

As used in this Subpart—

Partnership qualified policy refers to a qualified long-term care insurance policy issued under a qualified State long-term care insurance partnership.

Qualified long-term care insurance policy means an insurance policy that has been determined by a State insurance commissioner to meet the requirements of sections 1917(b)(1)(C)(iii)(I) through (IV) and 1917(b)(5) of the Act. It includes a certificate issued under a group insurance contract.

Qualified State long-term care insurance partnership means an approved Medicaid State plan amendment that provides for the disregard of any assets or resources in an amount equal to the insurance benefit payments that are made to or on behalf of an individual who is a beneficiary under a long-term care insurance policy that has been determined by a State insurance commissioner to meet the requirements of section 1917(b)(1)(C)(iii) of the Act.

§ 144.204 Applicability of regulations.

The regulations contained in this subpart for reporting data apply only to those insurers that have issued qualified

long-term care insurance policies to individuals under a qualified State long-term care insurance partnership. They do not apply to the reporting of data by insurers for States with a Medicaid State plan amendment that established a long-term care partnership on or before May 14, 1993.

§ 144.206 Reporting requirements.

(a) *General requirement.* Any insurer that sells a qualified long-term care insurance policy under a qualified State long-term care insurance partnership must submit, in accordance with the requirements of this section, data on insured individuals, policyholders, and claimants who have active partnership qualified policies or certificates for a reporting period.

(b) *Specific requirements.* Insurers of qualified long-term care insurance policies must submit the following data to the Secretary by the deadlines specified in paragraph (c) of this section:

(1) *Registry of active individual and group partnership qualified policies or certificates.* (i) Insurers must submit data on—

(A) Any insured individual who held an active partnership qualified policy or certificate at any point during a reporting period, even if the policy or certificate was subsequently cancelled, lost partnership qualified status, or otherwise terminated during the reporting period; and

(B) All active group long-term care partnership qualified insurance policies, even if the identity of the individual policy/certificate holder is unavailable.

(ii) The data required under paragraph (b)(1)(i) of this section must cover a 6-month reporting period of January through June 30 or July 1 through December 31 of each year; and

(iii) The data must include, but are not limited to—

(A) Current identifying information on the insured individual;

(B) The name of the insurance company and issuing State;

(C) The effective date and terms of coverage under the policy.

(D) The annual premium.

(E) The coverage period.

(F) Other information, as specified by the Secretary in ''State Long-Term Care Partnership Insurer Reporting Requirements.''

(2) *Claims paid under partnership qualified policies or certificates.* Insurers must submit data on all partnership qualified policies or certificates for which the insurer paid at least one claim during the reporting period. This includes data for employer-paid core plans and buy-up plans without individual insured data. The data must—

(i) Cover a quarterly reporting period of 3 months;

(ii) Include, but are not limited to—

(A) Current identifying information on the insured individual;

(B) The type and cash amount of the benefits paid during the reporting period and lifetime to date;

(C) Remaining lifetime benefits;

(D) Other information, as specified by the Secretary in ''State Long-Term Care Partnership Insurer Reporting Requirements.''

§ 144.208 Deadlines for submission of reports.

(a) Transition provision for insurers who have issued or exchanged a qualified partnership policy prior to the effective date of these regulations.

The first reports required for these insurers will be the reports that pertain to the reporting period that begins no more than 120 days after the effective date of the final regulations.

(b) All reports on the registry of qualified long-term care insurance policies issued to individuals or individuals under group coverage specified in § 144.206(b)(1)(ii) must be submitted within 30 days of the end of the 6-month reporting period.

(c) All reports on the claims paid under qualified long-term care insurance policies issued to individual and individuals under group coverage specified in § 144.206(b)(2)(i) must be submitted within 30 days of the end of the 3-month quarterly reporting period.

§ 144.210 Form and manner of reports.

All reports specified in § 144.206 must be submitted in the form and manner specified by the Secretary.

§ 144.212 Confidentiality of information.

Data collected and reported under the requirements of this subpart are subject to the confidentiality of information requirements specified in regulations under 42 CFR Part 401, Subpart B, and 45 CFR Part 5, Subpart F.

§ 144.214 Notifications of noncompliance with reporting requirements.

If an insurer of a qualified long-term care insurance policy does not submit the required reports by the due dates specified in this subpart, the Secretary notifies the appropriate State insurance commissioner within 45 days after the deadline for submission of the information and data specified in § 144.208.

Dated: August 15, 2008.

Mary M. McGeein,

Principal Deputy Assistant Secretary for Planning and Evaluation.

Dated: August 21, 2008.

Michael O. Leavitt,

Secretary.

Editorial Note: This document was received in the Office of the Federal Register on November 24, 2008.

48 CFR Part 212

RIN 0750–AG15

Defense Federal Acquisition Regulation Supplement; Payment Protections for Subcontractors and Suppliers—Deletion of Duplicative Text (DFARS Case 2008–D021)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to update the list of laws inapplicable to contracts and subcontracts for the acquisition of commercial items. The rule removes a law addressing payment protections for subcontractors and suppliers from the DFARS list, since this law has been added to the FAR list of laws inapplicable to contracts and subcontracts for the acquisition of commercial items.

DATES: *Effective Date:* December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Ms. Angie Sawyer, Defense Acquisition Regulations System, OUSD (AT&L) DPAP (DARS), IMD 3D139, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone 703–602–8384; facsimile 703–602–7887. Please cite DFARS Case 2008–D021.

SUPPLEMENTARY INFORMATION:

A. Background

FAR 12.503 and 12.504 list the laws that are inapplicable to Executive agency contracts and subcontracts for the acquisition of commercial items. The DFARS supplements the FAR listing with those laws unique to DoD at 212.503 and 212.504.

This final rule removes Section 806 of Public Law 102–190, Payment Protections for Subcontractors and Suppliers, from the lists at DFARS 212.503 and 212.504, since this law was added to the lists at FAR 12.503 and 12.504 in the final rule published at 73 FR 54007 on September 17, 2008. This rule also amends DFARS 212.504 to remove the paragraphs that were designated as ''Reserved.''

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

This rule will not have a significant cost or administrative impact on contractors or offerors, or a significant effect beyond the internal operating procedures of DoD. Therefore, publication for public comment under 41 U.S.C. 418b is not required. However, DoD will consider comments from small entities concerning the affected DFARS subpart in accordance with 5 U.S.C. 610. Such comments should cite DFARS Case 2008–D021.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply, because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 212

Government procurement.

Michele P. Peterson,

Editor, Defense Acquisition Regulations System.

■ Therefore, 48 CFR Part 212 is amended as follows:

PART 212—ACQUISITION OF COMMERCIAL ITEMS

■ 1. The authority citation for 48 CFR Part 212 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

212.503 [Amended]

■ 2. Section 212.503 is amended by removing paragraph (a)(i) and redesignating paragraphs (a)(ii) through (xi) as paragraphs (a)(i) through (x) respectively.

212.504 [Amended]

■ 3. Section 212.504 is amended as follows:

■ a. By removing paragraphs (a)(i) and (ii) and (a)(xix) through (xxi);

■ b. By redesignating paragraphs (a)(iii) through (xviii) as paragraphs (a)(i) through (xvi) respectively; and

■ c. By redesignating paragraphs (a)(xxii) and (xxiii) as paragraphs (a)(xvii) and (xviii) respectively.

RIN 0750–AG13

Defense Federal Acquisition Regulation Supplement; Para-Aramid Fibers and Yarns Manufactured in a Qualifying Country (DFARS Case 2008–D024)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Interim rule with request for comments.

SUMMARY: DoD has issued an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement a determination made by the Under Secretary of Defense for Acquisition, Technology, and Logistics with regard to the acquisition of items containing para-aramid fibers and yarns manufactured in a foreign country. The determination authorizes DoD to acquire articles containing para-aramid fibers and yarns manufactured in foreign countries that have entered into a defense memorandum of understanding with the United States.

DATES: *Effective date:* December 18, 2008.

Comment date: Comments on the interim rule should be submitted in writing to the address shown below on or before February 17, 2009, to be considered in the formation of the final rule.

ADDRESSES: You may submit comments, identified by DFARS Case 2008–D024, using any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *E-mail: dfars@osd.mil.* Include DFARS Case 2008–D024 in the subject line of the message.
- *Fax:* 703–602–7887.
- *Mail:* Defense Acquisition Regulations System, Attn: Ms. Amy Williams, OUSD (AT&L) DPAP (DARS), IMD 3D139, 3062 Defense Pentagon, Washington, DC 20301–3062.
- *Hand Delivery/Courier:* Defense Acquisition Regulations System, Crystal Square 4, Suite 200A, 241 18th Street, Arlington, VA 22202–3402.

Comments received generally will be posted without change to *http://www.regulations.gov*, including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Ms. Amy Williams, 703–602–0328.

SUPPLEMENTARY INFORMATION:

A. Background

10 U.S.C. 2533a restricts DoD procurement of foreign synthetic fabric or coated synthetic fabric, including textile fibers and yarns for use in such fabrics. Section 807 of the National Defense Authorization Act for Fiscal Year 1999 (Pub. L. 105–261) provides authority for DoD to waive the restriction at 10 U.S.C. 2533a with regard to para-aramid fibers and yarns. On February 12, 1999, the Under Secretary of Defense for Acquisition and Technology waived the restriction at 10 U.S.C. 2533a for para-aramid fibers and yarns manufactured in the Netherlands. On August 15, 2008, the Under Secretary of Defense for Acquisition, Technology, and Logistics expanded the existing waiver to permit the acquisition of para-aramid fibers and yarns manufactured in any qualifying country listed in DFARS 225.872–1.

This interim rule amends DFARS text addressing the acquisition of para-aramid fibers and yarns to implement the Under Secretary's August 15, 2008 determination. In addition, the rule clarifies the definition of ''qualifying country'' at DFARS 225.003 and 252.225–7012 by including a list of the qualifying countries within the definition instead of referring to the list at DFARS 225.872–1.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD does not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* because small entities normally are not involved in the production of para-aramid fibers and yarns. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subparts in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2008–D024.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply, because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

D. Determination to Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense that urgent and compelling reasons exist to publish an interim rule prior to affording the public an opportunity to comment. This interim rule implements the determination made by the Under Secretary of Defense for Acquisition, Technology, and Logistics on August 15, 2008, that procuring articles that contain only domestic para-aramid fibers and yarns would result in sole-source contracts or subcontracts for such fibers and yarns; such sole-source contracts or subcontracts would not be in the best interest of the Government, except as specifically justified and approved consistent with 10 U.S.C. 2304; and all qualifying countries listed at DFARS 225.872–1 permit the United States firms that manufacture para-aramid fibers and yarns to compete with foreign firms for the sale of para-aramid fibers and yarns in that country. Comments received in response to this interim rule will be considered in the formation of the final rule.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

RIN 0648–XM15

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason retention limit adjustment.

SUMMARY: NMFS has determined that the Atlantic tunas General category daily Atlantic bluefin tuna (BFT) retention limit should be adjusted for the January 2009 time period, based on consideration of the determination criteria regarding inseason adjustments.

DATES: Effective January 1, 2009, through January 31, 2009.

FOR FURTHER INFORMATION CONTACT: Sarah McLaughlin or Brad McHale, 978–281–9260.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) and the Magnuson–Stevens Fishery Conservation and Management Act (Magnuson–Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing categories, per the allocations established in the Consolidated Highly Migratory Species Fishery Management Plan (Consolidated HMS FMP) (71 FR 58058, October 2, 2006).

The 2009 BFT fishing year, which is managed on a calendar year basis and subject to an annual calendar year quota, begins January 1, 2009. Starting on January 1, 2009, the General category daily retention limit (§ 635.23(a)(2)), is scheduled to revert back to the default retention limit of one large medium or giant BFT (measuring 73 inches (185 cm) CFL) or greater per vessel per day/trip. This scheduled retention limit applies to General category permitted vessels and HMS Charter/Headboat category permitted vessels (when fishing commercially for BFT).

Each of the General category time periods (January, June–August, September, October–November, and December) is allocated a portion of the annual General category quota, thereby ensuring extended fishing opportunities in years when catch rates are high and quota is available. In August, NMFS adjusted the General category limit for September through December 2008 from the default level of one large medium or giant BFT to three (thus maintaining a three fish limit for all of the 2008 season). However, NMFS decided not to make an adjustment for January 2009 until after the 2009 western Atlantic BFT Total Allowable Catch (TAC) and resulting U.S. quota were set at the November 2008 ICCAT meeting (73 FR 50885, August 29, 2008).

The 2008 ICCAT recommendation reduced the TAC (currently 2,100 mt) to 1,900 mt for 2009, resulting in a 2009 U.S. quota of 1,034.9 mt. Consistent with the allocation scheme established in the Consolidated HMS FMP, the baseline General category share of the 2009 U.S. quota would be 475.7 mt, and the baseline January 2009 General category subquota would be 25.2 mt.

In order to implement the ICCAT recommendation, NMFS is planning to publish proposed quota specifications in the beginning of 2009 to set BFT quotas for each of the established domestic fishing categories and to set effort controls for the General category and Angling category. In the meantime, the General category BFT fishery remains active into the winter, with substantial landings reported in November and December.

Adjustment of General Category Daily Retention Limits

Under § 635.23(a)(4), NMFS may increase or decrease the daily retention limit of large medium and giant BFT over a range of zero to a maximum of three per vessel based on consideration of the criteria provided under § 635.27(a)(8), which include: the usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock; the catches of the particular category quota to date and the likelihood of closure of that segment of the fishery if no adjustment is made; the projected ability of the vessels fishing under the particular category quota to harvest the additional amount of BFT before the end of the fishing year; the estimated amounts by which quotas for other gear categories of the fishery might be exceeded; effects of the adjustment on BFT rebuilding and overfishing; effects of the adjustment on accomplishing the objectives of the fishery management plan; variations in seasonal distribution, abundance, or migration patterns of BFT; effects of catch rates in one area precluding vessels in another area from having a reasonable opportunity to harvest a portion of the category's quota; and a review of dealer reports, daily landing trends, and the availability of the BFT on the fishing grounds.

NMFS has considered the set of criteria cited above and their applicability to the General category BFT retention limit for the 2009 fishing year. For example, January 2008 catch rates were high, and under a 3–fish limit, the January subquota was exceeded. Based on these considerations, and the reduced 2009 quota and subquotas, NMFS has determined that the General category retention limit should be adjusted to allow for retention of the anticipated 2009 General category quota, but that an approach more conservative than used for January 2008 is warranted. Therefore, NMFS increases the General category retention limit from the default

limit to two large medium or giant BFT, measuring 73 inches CFL or greater, per vessel per of one day/trip, effective January 1, 2009, through January 31, 2009. Regardless of the duration of a fishing trip, the daily retention limit applies upon landing. For example, whether a vessel fishing under the General category limit takes a two-day trip or makes two trips in one day, the daily limit of two fish may not be exceeded upon landing. This General category retention limit is effective in all areas, except for the Gulf of Mexico, and applies to those vessel permitted in the General category as well as to those HMS Charter/Headboat permitted vessels fishing commercially for BFT.

This adjustment is intended to provide a reasonable opportunity to harvest the U.S. landings quota of BFT without exceeding it, while maintaining an equitable distribution of fishing opportunities, to help achieve optimum yield in the General category BFT fishery, to collect a broad range of data for stock monitoring purposes, and to be consistent with the objectives of the Consolidated HMS FMP.

Monitoring and Reporting

NMFS selected the daily retention limit and the duration after examining an array of data as it pertains to the determination criteria. These data included, but were not limited to, current and previous catch and effort rates, quota availability, previous public comments on inseason management measures, stock status, etc. NMFS will continue to monitor the BFT fishery closely through the mandatory dealer landing reports, which NMFS requires to be submitted within 24 hours of a dealer receiving BFT. Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional retention limit adjustments are necessary to ensure available quota is not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas.

Closures or subsequent adjustments to the daily retention limits, if any, will be published in the **Federal Register**. In addition, fishermen may call the Atlantic Tunas Information Line at (888) 872–8862 or (978) 281–9260, or access the internet at *www.hmspermits.gov*, for updates on quota monitoring and retention limit adjustments.

Classification

The Assistant Administrator for NMFS (AA), finds that it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on, this action for the following reasons:

The regulations implementing the Consolidated HMS FMP provide for inseason retention limit adjustments to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Affording prior notice and opportunity for public comment to implement these retention limits is impracticable as it would preclude NMFS from acting promptly to allow harvest of BFT that are available on the fishing grounds. Analysis of available data shows that the General category BFT retention limits may be increased with minimal risks of exceeding the ICCAT–allocated quota.

Delays in increasing these retention limits would adversely affect those General and Charter/Headboat category vessels that would otherwise have an opportunity to harvest more than the default retention limit of one BFT per day and may exacerbate the problem of low catch rates and quota rollovers. Limited opportunities to harvest the respective quotas may have negative social and economic impacts to U.S. fishermen that either depend upon catching the available quota within the time periods designated in the Consolidated HMS FMP. Adjustment to the retention limit needs to be effective January 1, 2009, to minimize any unnecessary disruption in fishing patterns and for the impacted sectors to benefit from the adjustments so as to not preclude fishing opportunities from fishermen who only have access to the fishery during this time period.

Therefore, the AA finds good cause under 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment. For all of the above reasons, and because this action relieves a restriction (i.e., the default retention limit is one fish per vessel/trip but this action increases that limit and allows retention of more fish), there is also good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

This action is being taken under 50 CFR 635.23(a)(4) and (b)(3) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: December 15, 2008.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–S

Proposed Rules

Federal Register
Vol. 73, No. 244
Thursday, December 18, 2008

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2008–1318; Directorate Identifier 2008–NM–155–AD]

RIN 2120–AA64

Airworthiness Directives; Bombardier Model CL–600–2B19 (Regional Jet Series 100 & 440) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above that would supersede an existing AD. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

* * * * ** *

The Bombardier CL–600–2B19 airplanes have had a history of flap failures at various positions for several years. Flap failure may result in a significant increase in required landing distances and higher fuel consumption than planned during a diversion. * * *

* * * * *

The proposed AD would require actions that are intended to address the unsafe condition described in the MCAI.

DATES: We must receive comments on this proposed AD by January 20, 2009.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–40, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Dan Parrillo, Aerospace Engineer, Systems and Flight Test Branch, ANE–171, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone (516) 228–7305; fax (516) 794–5531.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2008–1318; Directorate Identifier 2008–NM–155–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On January 3, 2008, we issued AD 2008–01–04, Amendment 39–15329 (73 FR 1964, January 11, 2008), which superseded AD 2007–17–07, Amendment 39–15165 (72 FR 46555, August 21, 2007). That AD required actions intended to address an unsafe condition on the products listed above.

Since we issued AD 2008–01–04, we received a report that the AD was not effective in reducing the number of flap failures on Model CL–600–2B19 airplanes. Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued Canadian Airworthiness Directive CF–2007–10R1, dated August 18, 2008 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

* * * * *

The Bombardier CL–600–2B19 airplanes have had a history of flap failures at various positions for several years. Flap failure may result in a significant increase in required landing distances and higher fuel consumption than planned during a diversion. * * *

* * * * *

This proposed AD would supersede AD 2008–01–04 and would retain the requirements of that AD, *i.e.*, revising the airplane flight manual (AFM) to incorporate a temporary revision into the AFM, adding operational procedures into the AFM, training flight crewmembers and operational control/dispatch personnel on the operational procedures, and doing corrective maintenance actions.

This proposed AD would also add corrective maintenance actions that include a pressure test of the flexible drive-shaft and corrective actions (which include replacing any flexible drive-shaft that exhibits leakage (any sign of bubbles within one minute during the pressure test in water) with a serviceable flexible drive-shaft), and a low temperature torque test of the flap actuators and corrective actions (which include installing a serviceable actuator if torque test results are not satisfactory).

This proposed AD would also require revising the AFM to incorporate a new temporary revision (TR) into the AFM. The TR adds maximum flaps operating speed data and clarifies maximum flaps extended speeds. This proposed AD would also modify the Operational Limitations and the annual simulator training for ''Flap Zero Landing'' events.

In addition, this proposed AD also would require certain maintenance actions (including checking flap system components and repairing or replacing components of the flap system) following a flap fail event and installing

a cockpit placard that specifies new flap operating limitations. This proposed AD would also allow installing modified flap actuators, which would terminate certain sections of the operational procedures.

This proposed AD also re-identifies the airplanes affected by paragraph (g)(3) of the existing AD. The accumulated time on the actuators specified in paragraphs (g)(3)(i) and (g)(3)(ii) of this AD has been extended from ''2,000 flight hours'' to ''5,000 flight cycles.'' This proposed AD would also require repetitive low temperature torque tests of the flap actuators.

You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

Bombardier has issued the following service information:

- Service Bulletin 601R–11–090, dated August 15, 2008;
- Service Bulletin 601R–27–150, dated July 12, 2007;
- Service Bulletin 601R–27–151, Revision B, dated June 12, 2008;
- Canadair Regional Jet TR RJ/165–1, dated August 7, 2008, to the Canadair Regional Jet Airplane Flight Manual CSP A–012; and
- Canadair Regional Jet TR 05–035, dated July 13, 2007, to the Canadair Regional Jet Aircraft Maintenance Manual; and Section 27–50–00, Revision 38, dated January 10, 2008, of the Canadair Regional Jet Fault Isolation Manual.

The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

Clarification of Part Number Reference

In paragraph (g)(3) of AD 2008–01–04, we referred only to the vendor part numbers 852D100–19/–21, 853D100–19/–20, and 854D100–19/–20. In paragraph (g)(3) of this proposed AD, we have added the corresponding Bombardier part numbers 601R93101–19/–21, 601R93103–19/–20, and 601R93104–19/–20.

Method of Compliance With AD 2006–12–21

Installing flap actuators in accordance with paragraph (h)(5) of the proposed AD is acceptable for compliance with the installation of Number 3 and Number 4 flap actuators required by paragraph (h) of AD 2006–12–21, Amendment 39–14647 (71 FR 34793, June 16, 2006), for that actuator only. The remaining requirements of paragraph (h) of AD 2006–12–21 remain in effect.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have proposed different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a NOTE within the proposed AD.

Costs of Compliance

Based on the service information, we estimate that this proposed AD would affect about 684 products of U.S. registry. We also estimate that it would take about 18 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is $80 per work-hour. Required parts would cost a negligible amount per product. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these costs. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be $984,960, or $1,440 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by removing Amendment 39–15329 (73 FR 1964, January 11, 2008) and adding the following new AD:

Bombardier, Inc. (Formerly Canadair): Docket No. FAA–2008–1318; Directorate Identifier 2008–NM–155–AD.

Comments Due Date

(a) We must receive comments by January 20, 2009.

Affected ADs

(b) The proposed AD supersedes AD 2008–01–04, Amendment 39–15329.

Applicability

(c) This AD applies to Bombardier Model CL–600–2B19 (Regional Jet Series 100 & 440) airplanes, certificated in any category, serial numbers 7003 through 7990 and 8000 and subsequent.

Subject

(d) Air Transport Association (ATA) of America Code 27: Flight controls.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

* * * * *

The Bombardier CL–600–2B19 airplanes have had a history of flap failures at various positions for several years. Flap failure may result in a significant increase in required landing distances and higher fuel consumption than planned during a diversion. * * *

* * * * *

This AD supersedes AD 2008–01–04 and retains the requirements of that AD, *i.e.*, revising the airplane flight manual (AFM) to incorporate a temporary revision into the AFM, adding operational procedures into the AFM, training flight crewmembers and operational control/dispatch personnel on the operational procedures, and doing corrective maintenance actions. This AD also adds corrective maintenance actions that include a pressure test of the flexible drive-shaft and corrective actions, and a low temperature torque test of the flap actuators and corrective actions. This AD also requires revising the AFM to incorporate a new temporary revision (TR) into the AFM. The TR adds maximum flaps operating speed data and clarifies maximum flaps extended speeds. This AD also modifies the Operational Limitations and the annual simulator training for ''Flap Zero Landing'' events. In addition, this AD also requires certain maintenance actions following a flap fail event and installing a cockpit placard that specifies new flap operating limitations. This AD also allows installing modified flap actuators, which would terminate certain sections of the operational procedures. This AD also requires repetitive low temperature torque tests of the flap actuators.

Requirements of AD 2007–17–07, Amendment 39–15165: Actions and Compliance

(f) Unless already done, do the following actions.

(1) Part I. Airplane Flight Manual (AFM) Change: Within 30 days after September 5, 2007 (the effective date of AD 2007–17–07), revise the Canadair Regional Jet Airplane Flight Manual CSP A–012, by incorporating the information in Canadair Regional Jet Temporary Revision (TR) RJ/165, dated July 6, 2007, into the AFM. Accomplishing the requirements of paragraph (h)(1) of this AD terminates the requirements of this paragraph and the AFM revision required by this paragraph may be removed from the AFM.

Note 1: The actions required by paragraph (f)(1) of this AD may be done by inserting a copy of Canadair Regional Jet TR RJ/165, dated July 6, 2007, into the Canadair Regional Jet Airplane Flight Manual CSP A–012. When this TR has been included in general revisions of the AFM, the general revisions may be inserted in the AFM.

(2) Part II. Operational Procedures: Within 30 days after September 5, 2007, revise the Limitations Section of the Canadair Regional Jet Airplane Flight Manual CSP A–012, to include the following statement. This may be done by inserting a copy of paragraph (f)(2) of this AD in the AFM. Accomplishing the requirements of paragraph (h)(2) of this AD terminates the requirements of this paragraph and the AFM revision required by this paragraph may be removed from the AFM.

''1. Flap Extended Diversion

Upon arrival at the destination airport, an approach shall not be commenced, nor shall the flaps be extended beyond the 0 degree position, unless one of the following conditions exists:

a. When conducting a precision approach, the reported visibility (or RVR) is confirmed to be at or above the visibility associated with the landing minima for the approach in use, and can be reasonably expected to remain at or above this visibility until after landing; or

b. When conducting a non-precision approach, the reported ceiling and visibility (or RVR) are confirmed to be at or above the ceiling and visibility associated with the landing minima for the approach in use, and can be reasonably expected to remain at or above this ceiling and visibility until after landing; or

c. An emergency or abnormal situation occurs that requires landing at the nearest suitable airport; or

d. The fuel remaining is sufficient to conduct the approach, execute a missed approach, divert to a suitable airport with the flaps extended to the landing position, conduct an approach at the airport and land with 1000 lb (454 kg) of fuel remaining.

Note 1: The fuel burn factor (as per AFM TR/165) shall be applied to the normal fuel consumption for calculation of the flaps extended missed approach, climb, diversion and approach fuel consumption.

Note 2: Terrain and weather must allow a minimum flight altitude not exceeding 15,000 feet along the diversion route.

Note 3: For the purpose of this AD, a ''suitable airport'' is an airport that has at least one usable runway, served by an instrument approach if operating under Instrument Flight Rules (IFR), and the airport is equipped as per the applicable regulations and standards for marking and lighting. The existing and forecast weather for this airport shall be at or above landing minima for the approach in use.

2. Flap Failure After Takeoff

When a takeoff alternate is filed, terrain and weather must allow a minimum flight altitude not exceeding 15,000 feet along the diversion route to that alternate, or other suitable airport. The fuel at departure shall be sufficient to divert to the takeoff alternate or other suitable airport with the flaps extended to the takeoff position, conduct an approach and land with 1000 lb (454 kg) of fuel remaining.

Note: The fuel burn factor (as per AFM TR/165) shall be applied to the normal fuel consumption for calculation of the flaps extended, climb, diversion and approach fuel consumption.

3. Flap Zero Landing

Operations where all useable runways at the destination and alternate airports are forecast to be wet or contaminated (as defined in the AFM) are prohibited during the cold weather season (December to March inclusive in the northern hemisphere) unless one of the following conditions exists:

a. The flap actuators have been verified serviceable in accordance with Part C (Low Temperature Torque Test of the Flap Actuators) of SB 601R–27–150, July 12, 2007, or

b. The flight is conducted at a cruise altitude where the SAT is −60 deg C or warmer. If the SAT in flight is colder than −60 deg C, descent to warmer air shall be initiated within 10 minutes, or

c. The Landing Distance Available on a useable runway at the destination airport is at least equal to the actual landing distance required for flaps zero. This distance shall be based on Bombardier performance data, and shall take into account forecast weather and anticipated runway conditions, or

d. The Landing Distance Available on a useable runway at the filed alternate airport, or other suitable airport is at least equal to the actual landing distance for flaps zero. This distance shall be based on Bombardier performance data, and shall take into account forecast weather and anticipated runway conditions.

Note 1: If the forecast destination weather is less than 200 feet above DH or MDA, or less than 1 mile (1500 meters) above the authorized landing visibility (or equivalent RVR), as applied to the usable runway at the destination airport, condition 3.a., 3.b., or 3.d. above must be satisfied.

Note 2: When conducting No Alternate IFR (NAIFR) operations, condition 3.a., 3.b., or 3.c. above must be satisfied.''

(3) Part III. Training: As of 30 days after September 5, 2007, no affected airplane may be operated unless the flight crewmembers of that airplane and the operational control/dispatch personnel for that airplane have received training that is acceptable to the Principal Operations Inspector (POI) on the operational procedures required by paragraph (f)(2) of this AD. Accomplishing the requirements of paragraph (h)(3)(i) of this AD terminates the requirements of this paragraph.

(4) Part IV. Maintenance Actions: Within 120 days after September 5, 2007, do the cleaning and lubrication of the flexible shafts, installation of metallic seals in the flexible drive-shafts, and all applicable related investigative and corrective actions by doing all the applicable actions specified

in ''PART A'' of the Accomplishment Instructions of Bombardier Service Bulletin 601R–27–150, dated July 12, 2007; except if torque test results are not satisfactory, before further flight, install a serviceable actuator in accordance with the service bulletin or, if no serviceable actuators are available, contact the Manager, New York Aircraft Certification Office, FAA, for corrective action. Do all applicable related investigative and corrective actions before further flight.

Requirements of AD 2008–01–04: Actions and Compliance With Revised Affected Airplanes for Paragraph (g)(3)

(g) Unless already done, do the following actions.

(1) As of November 30, 2008, no affected airplane may be operated unless the flight crewmembers of that airplane have received simulator training on reduced or zero flap landing that is acceptable to the POI. Thereafter, this training must be done during the normal simulator training cycle, at intervals not to exceed 12 months. Accomplishing the requirements of paragraph (h)(3)(ii) of this AD terminates the requirements of this paragraph.

(2) Within 24 months or 4,000 flight hours after February 15, 2008 (the effective date of AD 2008–01–04), whichever occurs first: Do a pressure test of the flexible drive-shaft, and do all applicable corrective actions, by doing all the applicable actions specified in ''PART B'' of the Accomplishment Instructions of Bombardier Service Bulletin 601R–27–150, dated July 12, 2007. Do all applicable corrective actions before further flight.

(3) For airplanes having flap actuators, part numbers (P/Ns), 852D100–19/–21, 853D100–19/–20, and 854D100–19/–20 (Bombardier P/Ns 601R93101–19/–21, 601R93103–19/–20, and 601R93104–19/–20), specified in paragraphs (g)(3)(i) and (g)(3)(ii) of this AD: Within 24 months after February 15, 2008, do a low temperature torque test of the flap actuators, and do all applicable corrective actions, by doing all the applicable actions specified in ''PART C'' of the Accomplishment Instructions of Bombardier Service Bulletin 601R–27–150, dated July 12, 2007. Do all applicable corrective actions before further flight.

(i) Airplanes having actuators that have not been repaired and that have accumulated more than 5,000 flight cycles since new.

(ii) Airplanes having actuators that have been repaired and that have accumulated more than 5,000 flight cycles on the inboard pinion shaft seals, P/Ns 853SC177–1/–2.

New Requirements of This AD: Actions and Compliance

(h) Unless already done, do the following actions.

(1) Part I. New AFM Change: Within 30 days after the effective date of this AD, revise the Canadair Regional Jet Airplane Flight Manual (AFM) CSP A–012, by incorporating the information in Canadair Regional Jet Temporary Revision (TR) RJ/165–1, dated August 7, 2008, into the airplane flight manual. Accomplishing this action terminates the requirements of paragraph (f)(1) of this AD and after this action has been done, the AFM revision required by paragraph (f)(1) of this AD may be removed from the AFM.

Note 2: The actions required by paragraph (h)(1) of this AD may be done by inserting a copy of Canadair Regional Jet TR RJ/165–1, dated August 7, 2008, into the Canadair Regional Jet AFM CSP A–012. When this TR has been included in general revisions of the AFM, the general revisions may be inserted in the AFM.

(2) Part II. New Operational Procedures: Within 30 days after the effective date of this AD, revise the Limitations Section of the Canadair Regional Jet AFM CSP A–012, to include the following statement. This may be done by inserting a copy of paragraph (h)(2) of this AD into the AFM. Accomplishing this action terminates the requirements of paragraph (f)(2) of this AD and after this action has been done, the AFM revision required by paragraph (f)(2) of this AD may be removed from the AFM.

''1. Flap Extended Diversion

Upon arrival at the destination airport, an approach shall not be commenced, nor shall the flaps be extended beyond the 0 degree position, unless one of the following conditions exists:

a. When conducting a precision approach, the reported visibility (or RVR) is confirmed to be at or above the visibility associated with the landing minima for the approach in use, and can be reasonably expected to remain at or above this visibility until after landing; or

b. When conducting a non-precision approach, the reported ceiling and visibility (or RVR) are confirmed to be at or above the ceiling and visibility associated with the landing minima for the approach in use, and can be reasonably expected to remain at or above this ceiling and visibility until after landing; or

c. An emergency or abnormal situation occurs that requires landing at the nearest suitable airport; or

d. The fuel remaining is sufficient to conduct the approach, execute a missed approach, divert to a suitable airport with the flaps extended to the landing position, conduct an approach at the airport and land with 1000 lb (454 kg) of fuel remaining.

Note 1: The fuel burn factor (as per AFM TR/165) shall be applied to the normal fuel consumption for calculation of the flaps extended missed approach, climb, diversion and approach fuel consumption.

Note 2: Terrain and weather must allow a minimum flight altitude not exceeding 15,000 feet along the diversion route.

Note 3: For the purpose of this AD, a ''suitable airport'' is an airport that has at least one usable runway, served by an instrument approach if operating under Instrument Flight Rules (IFR), and the airport is equipped as per the applicable regulations and standards for marking and lighting. The existing and forecast weather for this airport shall be at or above landing minima for the approach in use.

2. Flap Failure After Takeoff

When a takeoff alternate is filed, terrain and weather must allow a minimum flight altitude not exceeding 15,000 feet along the diversion route to that alternate, or other suitable airport. The fuel at departure shall be sufficient to divert to the takeoff alternate or other suitable airport with the flaps extended to the takeoff position, conduct an approach and land with 1000 lb (454 kg) of fuel remaining.

Note: The fuel burn factor (as per AFM TR/165) shall be applied to the normal fuel consumption for calculation of the flaps extended, climb, diversion and approach fuel consumption.

3. Flap Zero Landing

Operations where all useable runways at the destination and alternate airports are forecast to be wet or contaminated (as defined in the AFM) are prohibited during the cold weather season (December to March inclusive in the northern hemisphere) unless one of the following four conditions (a. through d.) exists:

a. Each installed flap actuator meets one of the following three conditions:

(i) Actuators have less than 5000 flight cycles (FC) since new or overhaul and/or the actuators have been verified serviceable in accordance with Part C (Low Temperature Torque Test of the Flap Actuators) of Bombardier Service Bulletin (SB) 601R–27–150, issued July 12, 2007, or

(ii) Actuators have P/N 601R93101–19/–21 (Vendor P/N 852D100–19/–21), P/N 601R93103–19/–20 (Vendor P/N 853D100–19/–20), or P/N 601R93104–19/–20 (Vendor P/N 854D100–19/–20), and have less than 5000 FC since repair (where it can be shown that the actuator inboard pinion seals, Eaton P/Ns 853SC177–1 and –2, were replaced), or

(iii) Actuators have P/N 601R93101–23/–25 (Vendor P/N 852D100–23/–25) installed at all inboard flap positions, P/N 601R93103–23/–24 (Vendor P/N 853D100–23/–24) installed at outboard flap No.3 position, and P/N 601R93104–23/–24 (Vendor P/N 854D100–23/–24) installed at outboard flap No.4 position.

b. Pre-dispatch forecast ground temperature at the time of arrival at destination airport is above − 25 deg C, utilizing a reliable weather forecast service acceptable to the principal operations inspector (POI).

c. The Landing Distance Available on a useable runway at the destination airport is at least equal to the actual landing distance required for flaps zero. This distance shall be based on Bombardier performance data, and shall take into account forecast weather and anticipated runway conditions.

d. The Landing Distance Available on a useable runway at the filed alternate airport, or other suitable airport is at least equal to the actual landing distance for flaps zero. This distance shall be based on Bombardier performance data, and shall take into account forecast weather and anticipated runway conditions.

Note 1: If the forecast destination weather is less than 200 feet above DH or MDA, or less than 1 mile (1500 meters) above the authorized landing visibility (or equivalent RVR), as applied to the usable runway at the destination airport, condition 3.a., 3.b., or 3.d. above must be satisfied.

Note 2: When conducting No Alternate IFR (NAIFR) operations, condition 3.a., 3.b., or 3.c. above must be satisfied.''

4. Dispatch Following a Flap Failed Event

If normal flap system operation can be restored after an on-ground system reset, continued revenue operation of that airplane is permitted, provided conditions a., and b., and c. or d., below are satisfied:

a. Prior to dispatch following an on-ground circuit breaker reset, the flaps must be operated for five full extension/retraction cycles by the flight crew with no subsequent failures.

b. Prior to dispatch following an on-ground circuit breaker reset, the thrust reversers, ground spoilers and brake system are verified operational prior to each flight.

c. The Landing Distance Available on a useable runway at the destination airport is at least equal to the actual landing distance required for flaps zero. This distance shall be based on Bombardier performance data, and shall take into account forecast weather and anticipated runway conditions.

d. The Landing Distance Available on a useable runway at the filed alternate airport, or other suitable airport is at least equal to the actual landing distance for flaps zero. This distance shall be based on Bombardier performance data, and shall take into account forecast weather and anticipated runway conditions.

Note 1: If the forecast destination weather is less than 200 feet above DH or MDA, or less than 1 mile (1500 meters) above the authorized landing visibility (or equivalent RVR), as applied to the usable runway at the destination airport, condition 4.d. above must be satisfied.

Note 2: When conducting No Alternate IFR (NAIFR) operations, condition 4.c. above must be satisfied.''

(3) Part III. New Training: Do the requirements specified in paragraphs (h)(3)(i) and (h)(3)(ii) of this AD.

(i) As of 30 days after the effective date of this AD, no affected airplane may be operated unless the flight crewmembers of that airplane and the operational control/dispatch personnel for that airplane have received training that is acceptable to the Principal Operations Inspector (POI) on the operational procedures required by paragraph (h)(2) of this AD. Accomplishing this action terminates the requirements specified in paragraph (f)(3) of this AD.

(ii) As of September 30, 2009, no affected airplane may be operated unless the flight crewmembers of that airplane have received simulator training on reduced or zero flap landing that is acceptable to the Principal Operations Inspector (POI). Thereafter, this training must be done during the normal simulator training cycle, at intervals not to exceed 12 months. Accomplishing this action terminates the requirements specified in paragraph (g)(1) of this AD.

(4) Part IV. New Maintenance Action: For airplanes on which the low temperature torque test of the flap actuators is required by paragraph (g)(3) of this AD: Within 12 months after doing the low temperature torque test specified in paragraph (g)(3) of this AD, do a low temperature torque test of the flap actuators, and do all applicable corrective actions specified in Part C of the Accomplishment Instructions of Bombardier Service Bulletin 601R–27–150, dated July 12, 2007. Do all applicable corrective actions before further flight. For airplanes identified in paragraphs (h)(4)(i) and (h)(4)(ii) of this AD, repeat the low temperature torque test thereafter at intervals not to exceed 12 months.

(i) Airplanes having actuators that have not been repaired and that have accumulated more than 5,000 flight cycles since new.

(ii) Airplanes having actuators that have been repaired and that have accumulated more than 5,000 flight cycles on the inboard pinion shaft seals, P/Ns 853SC177–1/–2.

(5) Part IV. New Optional Maintenance Action: Installation of actuators having P/N 601R93101–23/–25 (Vendor P/N 852D100–23/–25), P/N 601R93103–23/–24 (Vendor P/N 853D100–23/–24), and P/N 601R93104–23/–24 (Vendor P/N 854D100–23/–24) in accordance with Bombardier Service Bulletin 601R–27–151, Revision B, dated June 12, 2008, terminates the requirements of paragraph ''3. Flap Zero Landing,'' of the statement required by paragraph (h)(2) of this AD. After doing the installation specified in this paragraph, paragraph ''3. Flap Zero Landing,'' specified in paragraph (h)(2) of this AD, may be removed from the limitations section of the AFM.

(6) Part V. Dispatch following a flap fail event: For airplanes on which a flap fail message occurs, prior to further flight, do all applicable maintenance actions in accordance with Section 27–50–00 of the Bombardier CRJ100/200/440 Fault Isolation Manual (FIM) CSP A–009, Revision 38, dated January 10, 2008; except if maintenance actions cannot be done and normal flap system operation can be restored after an on-ground circuit breaker reset operation, then continued revenue operation is permitted without further maintenance action for up to 10 flight cycles, subject to the operating limitations specified by the procedure titled ''4. Dispatch Following a Flap Failed Event,'' specified in paragraph (h)(2) of this AD; except as provided by paragraphs (h)(6)(i) and (h)(6)(ii) of this AD. The circuit breaker reset operation can be performed by the flightcrew when authorized by the operator's maintenance control organization.

(i) Within 10 flight cycles following the initial on-ground circuit breaker reset operation, do the maintenance actions specified in paragraph (h)(6) of this AD.

(ii) If another flap fail event occurs any time after the initial circuit breaker reset operation, do the maintenance actions specified in paragraph (h)(6) of this AD before further flight.

(7) Part V. Operators are required to report all fault data, including flaps electronic control unit (FECU) codes, to Bombardier within 30 days after each failure occurrence, or 30 days after the effective date of this AD, in accordance with Task 05–51–50–980–801 as introduced in the Canadair Regional Jet TR 05–035, dated July 13, 2007, to the Canadair Regional Jet Aircraft Maintenance Manual (AMM).

(8) Part VI. Cockpit Placard: Within 120 days after the effective date of this AD, install a flight compartment placard in accordance with Bombardier Service Bulletin 601R–11–090, dated August 15, 2008.

Method of Compliance With AD 2006–12–21

(i) Installing flap actuators in accordance with paragraph (h)(5) of this AD is acceptable for compliance with the installation of Number 3 and Number 4 flap actuators required by paragraph (h) of AD 2006–12–21, Amendment 39–14647. All other requirements of paragraph (h) of AD 2006–12–21 are still applicable and must be complied with.

FAA AD Differences

Note 3: This AD differs from the MCAI and/or service information as follows:

(1) The maintenance tasks specified in the first row of the table in ''Part IV. Maintenance Actions'' of the MCAI do not specify a corrective action if an actuator is not serviceable (*i.e.*, torque test results are not satisfactory). However, this AD requires contacting the FAA or installing a serviceable actuator before further flight if torque test results are not satisfactory. (Reference paragraph (f)(4) of this AD.)

(2) Although paragraph 2. of ''Part III. Training'' of the MCAI recommends accomplishing the new training within 1 year, this AD requires accomplishing the training before September 30, 2009, in order to ensure that the actions are completed prior to the onset of cold weather operations.

(3) For the Flaps Zero Landing Requirements of Part II 3.a (i), the MCAI refers to actuators with less than 5,000 flight cycles. We have clarified sub-paragraph 3.a.(i) of paragraph ''3. Flap Zero Landing,'' of the statement specified in paragraph (h)(2) of this AD that the 5,000 flight cycles is since new or overhauled.

(4) For the Flaps Zero Landing requirements of Part II.3 c., the MCAI requires a pre-dispatch forecast ground temperature at the time of arrival at the destination airport to be above −25 deg C. This AD clarifies sub-paragraph 3.b. of paragraph ''3. Flap Zero Landing,'' of the statement specified in paragraph (h)(2) of this AD that the source of the forecast is to be a reliable weather forecast service acceptable to the principal operations inspector.

Other FAA AD Provisions

(j) The following provisions also apply to this AD:

(1)(i) Alternative Methods of Compliance (AMOCs): The Manager, New York Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Dan Parrillo, Aerospace Engineer, Systems and Flight Test Branch, ANE–171, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone (516) 228–7305; fax (516) 794–5531. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(ii) AMOCs approved previously in accordance with AD 2008–01–04 are

approved as AMOCs for the corresponding provisions of this AD.

(2) Airworthy Product: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) Reporting Requirements: For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act, the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(k) Refer to MCAI Canadian Airworthiness Directive CF–2007–10R1, dated August 18, 2008, and the service information identified in Table 1 of this AD for related information.

RIN 2120–AA64

Airworthiness Directives; Cessna Aircraft Company Models 208 and 208B Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Cessna Aircraft Company (Cessna) Models 208 and 208B airplanes. This proposed AD would require you to modify the aileron carry-through cable attachment to the aileron upper quadrant with parts of improved design. This proposed AD results from reports of a ''catch'' in the aileron control system when the control yoke is turned. We are proposing this AD to prevent the cable attach fitting on the aileron upper quadrant assembly from rotating and possibly contacting or interfering with the aileron lower quadrant assembly, which could result in limited roll control and reduced handling capabilties.

DATES: We must receive comments on this proposed AD by February 17, 2009.

ADDRESSES: Use one of the following addresses to comment on this proposed AD:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Cessna Aircraft Company, P.O. Box 7704, Wichita, Kansas 67277; telephone: (800) 423–7762 or (316) 517–6056; Internet: *http://www.cessna.com*.

FOR FURTHER INFORMATION CONTACT: Ann Johnson, Aerospace Engineer, FAA, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone: 316–946–4105; fax: 316–946–4107; e-mail address: *ann.johnson@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments regarding this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include the docket number, ''FAA–2008–1319; Directorate Identifier 2008–CE–071–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments received by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive concerning this proposed AD.

Discussion

We have reports of a ''catch'' in the aileron control system when the control yoke is turned on a Cessna Aircraft Company (Cessna) Model 208 airplane.

The ''catch'' is caused by the cable end fitting, part number (P/N) 2660033, rotating out of its normal position and rubbing against the lower aileron quadrant assembly, P/N 2660032–7.

The reason that the cable end fitting rotates is unknown. Tension on the cable is what has been keeping the fitting flat and preventing rotation.

Cessna Aircraft Company has reconfigured the design of the existing nut on the cable fitting with two jam nuts, a spring washer, and safety wire to prevent rotation of the cable end.

This condition, if not corrected, could result in limited roll control and reduced handling capabilties.

Relevant Service Information

We have reviewed Cessna Caravan Service Bulletin CAB08–6, dated October 27, 2008.

The service information describes procedures for modifying the aileron carry-through cable attachment to the aileron upper quadrant.

FAA's Determination and Requirements of the Proposed AD

We are proposing this AD because we evaluated all information and determined the unsafe condition

described previously is likely to exist or develop on other products of the same type design. This proposed AD would require you to modify the aileron carry-through cable attachment to the aileron upper quadrant with parts of improved design.

Costs of Compliance

We estimate that this proposed AD would affect 794 airplanes in the U.S. registry.

We estimate the following costs to do the proposed modification:

Labor cost	Parts cost	Total cost per airplane	Total cost on U.S. operators
2 work-hours × $80 per hour = $160	Not applicable	$160	$127,040

We estimate the following costs to do any necessary repairs and replacements that would be required based on doing the proposed modification. We have no way of determining the number of airplanes that may need these repairs or replacements.

We estimate the following costs to do possible damage repair to the aileron lower quadrant assembly, if necessary:

Labor cost	Parts cost	Total cost per airplane
.5 work-hours × $80 per hour = $40	Not applicable	$40

We estimate the following costs to do possible removal and installation of the aileron lower quadrant assembly, if necessary:

Labor cost	Parts cost	Total cost per airplane
2 work-hours × $80 per hour = $160	Not applicable	$160

We estimate the following costs to do possible removal and installation of the headliner, if necessary:

Labor cost	Parts cost	Total cost per airplane
16 work-hours × $80 per hour = $1,280	Not applicable	$1,280

Warranty credit will be given for parts and labor to the extent specified in the manufacturer's service bulletin.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket that contains the proposed AD, the regulatory evaluation, any comments received, and other information on the Internet at *http://www.regulations.gov*; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone (800) 647–5527) is located at the street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new AD:

Cessna Aircraft Company: Docket No. FAA–2008–1319; Directorate Identifier 2008–CE–071–AD.

Comments Due Date

(a) We must receive comments on this airworthiness directive (AD) action by February 17, 2009.

Affected ADs

(b) None.

Applicability

(c) This AD applies to the following airplane models and serial numbers that are certificated in any category:

Model	Serial Nos.
208	20800001 through 20800415 and 20800417 through 20800419.
208B	208B0001 through 208B1081, 208B1083 through 208B1215, 208B1217 through 208B1257, 208B1259 through 208B1305, 208B1307, and 208B1309 through 208B1310.

Unsafe Condition

(d) This AD results from reports of a ''catch'' in the aileron control system when the control yoke is turned. We are issuing this AD to prevent the cable attach fitting on the aileron upper quadrant assembly from rotating and possibly contacting or interfering with the aileron lower quadrant assembly, which could result in limited roll control and reduced handling capabilties.

Compliance

(e) To address this problem, you must do the following, unless already done:

Actions	Compliance	Procedures
Modify the aileron carry-through cable attachment to the aileron upper quadrant with parts of improved design.	Within the next 100 hours time-in-service after the effective date of this AD or within the next 6 months after the effective date of this AD, whichever occurs first.	Follow the Accomplishment Instructions in Cessna Caravan Service Bulletin CAB08–6, dated October 27, 2008.

Alternative Methods of Compliance (AMOCs)

(f) The Manager, Wichita Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Ann Johnson, Aerospace Engineer, FAA, Wichita ACO, 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone: 316–946–4105; fax: 316–946–4107; e-mail address: *ann.johnson@faa.gov*. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

Related Information

(g) To get copies of the service information referenced in this AD, contact Cessna Aircraft Company, P.O. Box 7704, Wichita, Kansas 67277; telephone: (800) 423–7762 or (316) 517–6056; Internet: *http://www.cessna.com*. To view the AD docket, go to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, or on the Internet at *http://www.regulations.gov*.

Issued in Kansas City, Missouri, on December 12, 2008.

Kim Smith,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[Docket No. FAA–2008–1291; Airspace Docket No. 08–AGL–20]

Proposed Amendment of Class E Airspace; Milwaukee, WI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to amend Class E airspace for the Milwaukee, WI, area. Controlled airspace is necessary to accommodate new Standard Instrument Approach Procedures (SIAPs) at Waukesha County Airport, Waukesha, WI. The FAA is taking this action to enhance the safety and management of Instrument Flight Rules (IFR) aircraft operations at Waukesha County Airport. Also, a technical amendment is being made changing the name of John H. Batten Field to John H. Batten Airport.

DATES: 0901 UTC. Comments must be received on or before February 2, 2009.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001. You must identify the docket number FAA–2008–1291/Airspace Docket No. 08–AGL–20, at the beginning of your comments. You may also submit comments on the Internet at *http://www.regulations.gov*. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1–800–647–5527), is on the ground floor of the building at the above address.

FOR FURTHER INFORMATION CONTACT: Scott Enander, Central Service Center, Operations Support Group, Federal Aviation Administration, Southwest Region, 2601 Meacham Blvd., Fort Worth, TX 76193–0530; telephone: (817) 222–5582.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic,

environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2008–1291/Airspace Docket No. 08–AGL–20.'' The postcard will be date/time stamped and returned to the commenter.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at *http://www.regulations.gov*. Recently published rulemaking documents can also be accessed through the FAA's Web page at *http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace_amendments/*.

Additionally, any person may obtain a copy of this notice by submitting a request to the Federal Aviation Administration (FAA), Office of Air Traffic Airspace Management, ATA–400, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–8783. Communications must identify both docket numbers for this notice. Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking (202) 267–9677, to request a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by amending Class E airspace for the Milwaukee, WI, area. Specifically, additional controlled airspace is needed for SIAPs operations at Waukesha County Airport, Waukesha, WI. Also, John H. Batten Field would be changed to John H. Batten Airport. The area would be depicted on appropriate aeronautical charts.

Class E airspace areas are published in Paragraph 6005 of FAA Order 7400.9S, dated October 3, 2008, and effective October 31, 2008, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend controlled airspace for the Milwaukee, WI area.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (Air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9S, Airspace Designations and Reporting Points, dated October 3, 2008, and effective October 31, 2008, is amended as follows:

Paragraph 6005 Class E Airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AGL WI E5 Milwaukee, WI [Amended]

Milwaukee, General Mitchell International Airport, WI
(Lat. 42°56′50″ N., long. 87°53′48″ W.)
Racine, John H. Batten Airport, WI
(Lat. 42°45′40″ N., long. 87°48′50″ W.)
Waukesha, Waukesha County Airport, WI
(Lat. 43°02′28″ N., long. 88°14′13″ W.)
Milwaukee, Lawrence J. Timmerman Airport, WI
(Lat. 43°06′37″ N., long. 88°02′04″ W.)

That airspace extending upward from 700 feet above the surface within a 8.4-mile radius of General Mitchell International Airport, and within an 8.1-mile radius of John H. Batten Airport, and within a 7.5-mile radius of the Waukesha County Airport, and within 2 miles each side of the 282° bearing from the Waukesha County Airport extending from the 7.5-mile radius to 10.5 miles west of the Waukesha County Airport, and within an 8.9-mile radius of Lawrence J. Timmerman Airport.

Additionally, any person may obtain a copy of this notice by submitting a request to the Federal Aviation Administration (FAA), Office of Air Traffic Airspace Management, ATA–400, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–8783. Communications must identify both docket numbers for this notice. Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking (202) 267–9677, to request a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by amending Class E airspace for SIAPs operations at Taylor County Airport, Medford, WI. The area would be depicted on appropriate aeronautical charts.

Class E airspace areas are published in Paragraph 6005 of FAA Order 7400.9S, dated October 3, 2008, and effective October 31, 2008, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend controlled airspace at Taylor County Airport, Medford, WI.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2008–1108; Airspace Docket No. 08–AWP–11]

Proposed Modification of Class E Airspace; Reno, NV

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to modify the existing Class E airspace at Reno/Tahoe International Airport, Reno, NV. Additional controlled airspace is necessary to accommodate aircraft using the Localizer (LOC) Z Runway 16R approach at Reno/Tahoe International Airport, Reno, NV. The FAA is proposing this action to enhance the safety and management of aircraft operations at Reno/Tahoe International Airport, Reno, NV.

DATES: Comments must be received on or before February 2, 2009.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590. Telephone (202) 366–9826. You must identify FAA Docket No. FAA–2008–1108; Airspace Docket No. 08–AWP–11, at the beginning of your comments. You may also submit comments through the Internet at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Richard Roberts, Federal Aviation Administration, Operations Support Group, Western Service Area, 1601 Lind Avenue, SW., Renton, WA 98057; telephone (425) 203–4517.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA 2008–1108 and Airspace Docket No. 08–AWP–11) and be submitted in triplicate to the Docket Management System (see **ADDRESSES** section for address and phone number). You may also submit comments through the Internet at *http://www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2008–1108 and Airspace Docket No. 08–AWP–11''. The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at *http://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's Web page at *http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9 a.m. and 5 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Area, Operations Support Group, 1601 Lind Avenue, SW., Renton, WA 98057.

Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying Class E airspace at Reno/Tahoe International Airport, Reno, NV. Additional controlled airspace is necessary to allow aircraft to complete a procedure turn while using the LOC Z Runway 16R approach at Reno/Tahoe International Airport, Reno, NV. This modification will also include a name change from LOC 2 Runway 16R approach to LOC Z Runway 16R approach at Reno/Tahoe International Airport, Reno, NV. This action would enhance the safety and management of aircraft operations at Reno/Tahoe International Airport, Reno, NV.

Class E airspace designations are published in paragraph 6005 of FAA

Order 7400.9S, signed October 3, 2008, and effective October 31, 2008, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes additional controlled airspace at Reno/Tahoe International Airport, Reno, NV.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the FAA Order 7400.9S, Airspace Designations and Reporting Points, signed October 3, 2008, and effective October 31, 2008, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

BILLING CODE 4910–13–P

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 4

RIN 1024–AD72

Vehicles and Traffic Safety

AGENCY: National Park Service, Interior.

ACTION: Proposed Rule.

SUMMARY: This rule proposes to amend current regulations for designating bicycle use on National Park Service (NPS) lands. The proposed rule authorizes park superintendents to open existing trails to bicycle use within park units in accordance with appropriate park plans and compliance documents under the National Environmental Policy Act (NEPA), the National Historic Preservation Act, the NPS Organic Act, and the park's enabling legislation, and other applicable law. The proposed rule continues to require promulgation of a special regulation to build a new trail for bicycle use outside developed areas, or to open an existing trail to bicycle use if such action triggers one of the existing regulatory criteria requiring rulemaking in Section 1.5 of Title 36 of the Code of Federal Regulations.

DATES: Comments must be received by February 17, 2009.

ADDRESSES: You may submit comments, identified by the number 1024–AD72, by any of the following methods:

—Federal rulemaking portal: *http://www.regulations.gov*. Follow the instructions for submitting comments.

—Mail: National Park Service, Attn. Regulations Program Manager, 1849 C St., NW., MS–3122, Washington, DC 20240.

All submissions received must include the agency name and RIN 1024–AD72. For additional information see ''Public Participation'' under **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: Philip Selleck, Regulations Program Manager, 1849 C St., NW., Washington, DC 20240, (202) 208–4206.

SUPPLEMENTARY INFORMATION:

Background

Current regulations provide for the use of bicycles on park roads, parking areas and routes designated for bicycle use. A special regulation, specific to the individual park, must be adopted if bicycles are to be used in areas outside developed areas and special use zones. The NPS promulgated the current bicycle use regulation in 1987 and adopted the special regulation

requirement as a way of ensuring maximum public input on decisions to allow bicycle use outside developed areas.

Promulgation of special regulations requires various types of analyses and approval by the NPS Director and the Assistant Secretary for Fish and Wildlife and Parks, a process that takes more than two years on average. The proposed rule achieves a primary benefit of the special regulations process, notice and public comment, while eliminating the other steps of rulemaking deemed unnecessary in certain circumstances for designating areas for bicycle use.

For existing trails, the proposed rule provides for public notice and participation but does not require the promulgation of special regulations unless the trail designation has the type of significant effect that triggers rulemaking under the NPS' general regulation governing public use in units of the National Park System (*see* 36 CFR 1.5(b)). The NPS would continue to require the promulgation of special regulations for bicycle trails outside developed areas involving new trail construction.

As a general matter, the proposed rule provides park superintendents with a more efficient and effective way to determine whether opening existing trails to bicycles would be appropriate in the park unit they manage. The NPS Management Policies emphasize that ''(t)he Service must ensure that [park] uses are appropriate to the park in which they occur,'' and establish a process for determining whether a particular use is appropriate in a park unit. *See* NPS Management Policies 2006, p. 97 and ¶ 8.1.2.

Whether or not bicycle use is an appropriate activity in a unit of the National Park System should be considered through an individual park planning process that involves environmental compliance and input from the public. In addition, any particular trail use should be considered as part of a comprehensive plan for trail use in a park area. Parks that don't currently address bicycle use in existing planning documents could accomplish this comprehensive plan as either a specific plan for bicycle use in the park or as part of another plan, such as a recreation use plan.

The planning process can help determine, for example, if opportunities for bicycling will offer the potential to increase overall visitation, generate new youth interest in parks, or expand appreciation for our national parks. Proper planning with public participation also provides the opportunity to consider a range of alternatives to avoid or minimize impacts on natural, historic and cultural resources and reduce conflicts with other user groups. No matter what type of planning is conducted, ''(i)n its role as steward of park resources, the National Park Service must ensure that park uses that are allowed would not cause impairment of, or unacceptable impacts on, park resources and values.'' NPS Management Policies 2006 ¶ 1.5.

In addition to the park planning activities described above, the intent of the proposed rule is to take advantage of the public outreach aspects of the NEPA process. The proposed rule does this by requiring, at a minimum, preparation of an Environmental Assessment (EA) for any decision to open existing hiking or horse trails to bicycles. In other words, the proposed rule precludes use of any applicable ''categorical exclusions'' from NEPA analysis for opening trails to bicycle use. Further, the proposed rule requires a minimum of 30 days for public comment on EAs on bicycle use. The proposed rule also requires that the notice requesting public comment be published in the **Federal Register**, in addition to any other manner of notice used by the park, consistent with the public participation objectives set out in the Management Policies. ''Where there is strong public interest in a particular use, opportunities for civic engagement and cooperative conservation should be factored into the decision-making process.'' NPS Management Policies 2006 ¶ 1.4.3.1. By adopting these requirements, the proposed rule would meet the broad public participation objectives of the NPS without the requirement for a special regulation.

In addition, the proposed rule requires **Federal Register** notice of the superintendent's determination that bicycle use is consistent with the protection of the park area's natural, scenic and aesthetic values, safety considerations and management objectives and will not disturb wildlife or park resources. If the determination itself is not published in full, then the notice should include information on where to view the determination, or how to obtain a copy of the determination. This **Federal Register** notice must provide the public a 30-day period to give the public an opportunity to consider and comment on the determination prior to action by the park to open any trails for bicycle use. This comment period would be particularly important when there is a period of time between the public comment period for the EA or EIS and the decision to designate a trail for bicycle use. It would allow for public comment on the decision to implement the earlier planning process. However, if there is significant change or new information since the completion of the planning and NEPA documents, then the NPS will have to consider the need to supplement or revise the documents.

An area of particular concern for park managers involves the designation of ''new trails'' in park areas. In the 1987 rulemaking on bicycle use, NPS decided to limit the authority of the superintendent to designate bicycle use without notice and comment rulemaking to designations within developed areas of the park, ''which are land management and use categories established pursuant to a park area's Statement for Management and General Management Plan. Developed areas include lands within development and historic zones; these areas are generally impacted to a certain degree by structures, facilities or other improvements which reflect the fact the primary purpose or management objective for the use these lands is other than the preservation of their natural resources.'' 52 FR 10670, 10681 (Apr. 2, 1987). There is a similar definition for developed areas found in the NPS general regulations at 36 CFR 1.4.

In contrast, the 1987 rulemaking described the designation process outside of developed areas:

> The NPS has determined that the designation of a bicycle route outside of such developed areas, in areas whose primary purpose and land uses are related more to the preservation of natural resources and values, would have a much greater potential to result in adverse resource impacts or visitor use conflicts. This paragraph therefore provides for a much more stringent decision-making process for such a proposal by requiring a formal rulemaking. Such a process will provide for a thorough review of all environmental and visitor use considerations and assure the superintendent of having had the benefit of public review and comment before making a decision on any proposed designation. 52 FR at 10681.

The proposed rule continues this approach for new trails designated outside developed areas in any unit of the National Park System, i.e. special regulations would still be required for the construction of new bicycle trails outside developed areas.

The proposed rule would not affect other existing statutory or regulatory protections for the preservation and enhancement of park resources and visitor experiences. For example, the proposed rule would not affect the statutory ban on bicycles in wilderness areas. In addition, special regulations would still be required when an action to open existing trails to bicycles would

result in the degree of change or controversy described in 36 CFR 1.5(b).

A new section has been added to address the issue of bicycle use on administrative roads. The proposed rule clarifies that administrative roads that are closed to motor vehicle use by park visitors are also closed to bicycle use unless designated open by the superintendent. The superintendent may find it necessary to impose certain limits or restrictions on the use in order to provide for safety considerations, to avoid visitor use conflicts, or to protect park resources and values. The proposed rule also clarifies that the superintendent has authority to close any area designated as open for bicycle use, not just park roads and parking areas.

Finally, the proposed rule eliminates the term ''special use zone'' because this term is no longer used in NPS planning documents and as a result has created confusion in interpreting its meaning within the context of this regulation. For purposes of park planning the term ''special use zone'' meant ''non-federal lands within the exterior boundaries of a park area * * * used for non-park purposes but over which the NPS exerts some degree of administrative control.'' 52 FR at 10681. For example, the NPS has authority to enter into a written agreement with a landowner within the boundaries of a park area to administer the non-federal lands for public recreation purposes. Because the NPS no longer uses the term ''special use zones'' for planning purposes, and NPS regulations now make clear to which lands its regulations apply (*see* 36 CFR 1.2), the proposed rule deletes the term ''special use zones.''

Compliance With Other Laws

Regulatory Planning and Review (Executive Order 12866)

This document is not a significant rule and is not subject to review by the Office of Management and Budget (OMB) under Executive Order 12866.

(1) This rule would not have an effect of $100 million or more on the economy. It would not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

(2) This rule would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency.

(3) This rule does not alter the budgetary effects of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients.

(4) This rule does not raise novel legal or policy issues.

Regulatory Flexibility Act

The Department of the Interior certifies that this document would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This certification is based on information contained in the report titled, ''Benefit-Cost/Unfunded Mandates Act Analysis Small business and Regulatory Flexibility Act Analysis'' (U.S. Department of the Interior, Office of Policy Analysis, Office of the Secretary).

Small Business Regulatory Enforcement Fairness Act (SBREFA)

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

a. Does not have an annual effect on the economy of $100 million or more.

b. Would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

c. Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or tribal governments or the private sector of more than $100 million per year. The rule does not have a significant or unique effect on State, local, or tribal governments or the private sector.

Takings (Executive Order 12630)

In accordance with Executive Order 12630, the rule does not have significant takings implications.

Federalism (Executive Order 13132)

In accordance with Executive Order 13132, the rule does not require the preparation of a federalism assessment.

Civil Justice Reform (Executive Order 12988)

This regulation meets the applicable standards set forth in Sections 3(a) and 3(b)(2) of Executive Order 12988 Civil Justice Reform.

Paperwork Reduction Act

This regulation does not require an information collection under the Paperwork Reduction Act.

National Environmental Policy Act

The NPS is performing the NEPA analysis for this rule concurrently with the process of accepting comments

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994, ''Government to Government Relations with Native American Tribal Governments'' (59 FR 22951) and 512 DM 2, we have evaluated potential effects on federally recognized Indian tribes and have determined that there are no potential effects.

Clarity of This Regulation

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in the **ADDRESSES** section. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Public Participation

You may submit comments online at: *http://www.regulations.gov*. Follow the instructions for submitting comments. You may also mail or hand deliver comments to: Mail: National Park Service, Attn. Regulations Program Manager, 1849 C St., NW., MS–3122, Washington, DC 20240.

Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

List of Subjects in 36 CFR Part 4

National Parks.

For the reasons stated in the preamble we propose to amend 36 CFR Part 4 as follows:

PART 4—VEHICLES AND TRAFFIC SAFETY

1. The authority for part 4 continues to read as follows:

Authority: 16 U.S.C. 1, 3, 9a, 460(q), 462(k); Sec. 7.96 also issued under D.C. Code 8–137 (1981) and D.C. Code 40–721 (1981).

2. Section 4.30 is revised to read as follows:

§ 4.30 Bicycles

(a) *Park roads.* The use of a bicycle is permitted on park roads and in parking areas that are otherwise open for motor vehicle use by the general public.

(b) *Existing trails.* Except when rulemaking publication in the **Federal Register** is required by § 1.5(b) of this Chapter, a hiking or horse trail that currently exists on the ground and does not require any construction or significant modification to accommodate bicycles may be designated for bicycle use only if:

(1) The park has or will complete a park planning document addressing bicycle use on existing trails in the park; and

(2) The park has completed either an environmental assessment (EA) or an environmental impact statement (EIS) evaluating bicycle use. In addition to the requirements otherwise applicable to the preparation of an EA or EIS, the park will publish a notice in the **Federal Register** providing the public at least thirty (30) days for review and comment on an EA issued under this section; and

(3) A written determination is signed by the superintendent stating that the addition of bicycle use on existing hiking or horse trails is consistent with the protection of the park area's natural, scenic and aesthetic values, safety considerations and management objectives and will not disturb wildlife or park resources. The park will publish in the **Federal Register** a notice of the determination and provide at least thirty (30) days for public review and comment before implementing that decision for bicycle use.

(c) *New Trails.* Trails that do not exist on the ground, and therefore would require trail construction activities (such as clearing brush, cutting trees, excavation, or surface treatment), may be developed and designated for bicycle use only after:

(1) The park has completed the requirements set forth in paragraphs (b)(1) and (2) of this section; and

(2)(i) For new trails located outside of a park's developed areas, as identified in the relevant park plan, the park has promulgated a special regulation authorizing bicycle use; or

(ii) For new trails located within a park's developed areas, as identified in the relevant park plan, the park has completed the requirements set forth in paragraph (b)(3) of this section.

(d) *Administrative roads.* Administrative roads closed to motor vehicle use by the public, but open to motor vehicles use for administrative purposes, may be designated for bicycle use by the superintendent pursuant to the criteria and procedures of §§ 1.5 and 1.7 of this chapter.

(e) *Closures.* A superintendent may close any park roads, parking areas, administrative roads, existing trails, or new trails to bicycle use pursuant to the criteria and procedures of §§ 1.5 and 1.7 of this chapter.

Dated: December 9, 2008.

Lyle Laverty,

Assistant Secretary, Fish and Wildlife and Parks.

Endangered and Threatened Wildlife and Plants; 90-Day Finding on a Petition To Change the Listing Status of the Canada Lynx

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of 90-day petition finding.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a 90-day finding on a petition to revise the listing of the Canada lynx (*Lynx canadensis*) as threatened under the Endangered Species Act of 1973, as amended (Act), to include New Mexico. We find that the petition presents substantial scientific or commercial information indicating that changing the listing status of the contiguous United States Distinct Population Segment of Canada lynx to include New Mexico may be warranted. Therefore, with the publication of this notice, we are initiating a further review in response to the petition, and we will issue a 12-month finding to determine if the petitioned action is warranted. To ensure that our review is comprehensive, we are soliciting feedback from the public regarding this species.

DATES: To allow us adequate time to conduct this review, we request that we receive information on or before February 17, 2009.

ADDRESSES: You may submit information by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: FWS–R6–ES–2008–0088; Division of Policy and Directives Management; U.S. Fish and Wildlife Service; 4401 N. Fairfax Drive, Suite 222; Arlington, VA 22203.

We will not accept e-mail or faxes. We will post all information provided to us at *http://www.regulations.gov.* This generally means that we will post any personal information you provide us (see the Information Solicited section below for more details).

ADDRESSES: This finding is available on the Internet at *http://www.regulations.gov.* Supporting documentation we used in preparing this finding is available for public inspection, by appointment, during normal business hours at the Montana Ecological Services Field Office, 585 Shepard Way, Helena, MT 59601. Please submit any new information, materials, comments, or questions concerning this finding to the above address.

FOR FURTHER INFORMATION CONTACT: Mark Wilson, Field Supervisor, Montana Ecological Services Field Office (see **ADDRESSES** section), telephone 406–449–5225. If you use a telecommunications device for the deaf (TDD), call the Federal Information Relay Service (FIRS) at 800–877–8339.

SUPPLEMENTARY INFORMATION:

Information Solicited

When we make a finding that a petition presents substantial information to indicate that listing a species may be warranted, or in this case, to revise the listing of a species, we are required to promptly commence further review. To ensure that the review is complete and based on the best available scientific and commercial information, we are soliciting information from the public, other concerned governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning the status of the lynx. We are seeking information regarding the species' historical and current status and distribution, its

biology and ecology, and threats to the species and its habitat.

Please note that submissions merely stating support or opposition to the action under consideration without providing supporting information, although noted, will not be considered in making a determination, as section 4(b)(1)(A) of the Act directs that determinations shall be made ''solely on the basis of the best scientific and commercial data available.'' At the conclusion of the review, we will issue the 12-month finding on the petition, as provided in section 4(b)(3)(B) of the Act (16 U.S.C. 1533(b)(3)(B)).

You may submit your information concerning this 90-day finding by one of the methods listed in the **ADDRESSES** section. We will not accept comments sent by e-mail or fax or to an address not listed in the **ADDRESSES** section. Finally, we may not consider comments that we do not receive by the date specified in the **DATES** section.

If you submit information via *http://www.regulations.gov,* your entire submission—including any personal identifying information—will be posted on the Web site. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on *http://www.regulations.gov.*

Information and materials we receive, as well as supporting documentation we used in preparing this 90-day finding, will be available for public inspection on *http://www.regulations.gov,* or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Montana Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Background

Section 4(b)(3)(A) of the Endangered Species Act requires that we make a finding on whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information indicating that the petitioned action may be warranted. We must base this finding on information contained in the petition and supporting information readily available in our files at the time of the petition review. To the maximum extent practicable, we are to make this finding within 90 days of our receipt of the petition, and publish our notice of this finding promptly in the **Federal Register**.

Our standard for ''substantial information'' in the Code of Federal Regulations (CFR) regarding a 90-day petition finding is ''that amount of information that would lead a reasonable person to believe that the measure proposed in the petition may be warranted'' (50 CFR 424.14(b)). If we find that the petition presented substantial information, we are required to promptly commence a review of the status of the species.

We received a petition from Forest Guardians and six other organizations, dated August 1, 2007, requesting that we revise the listing status of the contiguous United States Distinct Population Segment of Canada lynx (lynx) (*Lynx canadensis*) to include the mountains of north-central New Mexico. We acknowledged receipt of the petition in a letter dated August 24, 2007. In that letter we advised the petitioners that we could not address their petition at that time because existing court orders and settlement agreements for other listing actions required nearly all of our listing funding. We also concluded that emergency listing of the lynx in New Mexico was not warranted.

We received a 60-day notice of intent to sue from Forest Guardians on January 24, 2008, and on April 17, 2008, (the newly-named) WildEarth Guardians *et al.* filed a complaint against the Service in the U.S. District Court in the District of Columbia for failing to make a 90-day finding on their August 1, 2007, petition. We anticipate that completion of this finding will moot the litigation filed in the U.S. District Court.

In making this finding, we relied on information provided by the petitioners, as well as information readily available in our files. We evaluated the information in accordance with 50 CFR 424.14(b). Our process for making this 90-day finding under section 4(b)(3)(A) of the Act and section 424.14(b) of our regulations is limited to a determination of whether the information in the petition meets the ''substantial scientific and commercial information'' threshold.

Regulatory History

For more information on previous Federal actions concerning the lynx, refer to the final listing rule published in the **Federal Register** on March 24, 2000 (65 FR 16052), and the clarifications of findings published in the **Federal Register** on July 3, 2003 (68 FR 40075), and January 10, 2007 (72 FR 1186). The final listing rule designated lynx as threatened in the contiguous United States as a Distinct Population Segment (DPS), including the States of Colorado, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New York, Oregon, Utah, Vermont, Washington, Wisconsin, and Wyoming. The 2003 clarification addressed listing status, issues related to the DPS determinations, threats, and definitions of resident populations and dispersers. The 2007 clarification addressed whether any significant portion of the range of the lynx exists in the contiguous United States.

The final rule designating critical habitat for lynx published in the **Federal Register** on November 9, 2006 (71 FR 66008). On July 20, 2007, the Service announced that we would review the November 9, 2006, final rule after questions were raised about the integrity of scientific information used and whether the decision made was consistent with the appropriate legal standards. Based on our review of the final critical habitat designation, we determined that it was necessary to revise critical habitat. On January 15, 2007, the U.S. District Court for the District of Columbia issued an order stating the Service's deadline for a proposed rule for revised critical habitat was February 15, 2008, and for a final rule for revised critical habitat was February 15, 2009. We published a proposed rule to revise critical habitat for the lynx in the **Federal Register** on February 28, 2008 (73 FR 10860).

The special rule developed under section 4(d) of the Act (65 FR 16084, March 24, 2000) defines section 9 prohibitions to lynx, as provided for under 50 CFR 17.31. The special rule applies general take prohibitions for threatened wildlife to the wild population of lynx in the contiguous United States, and addresses captive lynx, and Convention on International Trade in Endangered Species (CITES) export requirements.

Species Information

Canada lynx are medium-sized cats, generally measuring 30 to 35 inches (75 to 90 centimeters) long and weighing 18 to 23 pounds (8 to 10.5 kilograms) (Quinn and Parker 1987, Table 1). They have large, well-furred feet and long legs for traversing snow; tufts on the ears; and short, black-tipped tails.

Lynx are highly specialized predators of snowshoe hare (*Lepus americanus*) (McCord and Cardoza 1982, p. 744; Quinn and Parker 1987, pp. 684–685; Aubry *et al.* 2000, pp. 375–378). Lynx and snowshoe hares are strongly associated with what is broadly described as boreal forest (Bittner and Rongstad 1982, p. 154; McCord and Cardoza 1982, p. 743; Quinn and Parker 1987, p. 684; Agee 2000, p. 39; Aubry *et al.* 2000, pp. 378–382; Hodges 2000a, pp. 136–140 and 2000b, pp. 183–191; McKelvey *et al.* 2000b, pp. 211–232). The predominant vegetation of boreal forest is conifer trees, primarily species

of spruce (*Picea* spp.) and fir (*Abies* spp.) (Elliot-Fisk 1988, pp. 34–35, 37–42). In the contiguous United States, the boreal forest types transition to deciduous temperate forest in the Northeast and Great Lakes and to subalpine forest in the west (Agee 2000, pp. 40–41). Lynx habitat can generally be described as moist boreal forests that have cold, snowy winters and a snowshoe hare prey base (Quinn and Parker 1987, p. 684–685; Agee 2000, pp. 39–47; Aubry *et al.* 2000, pp. 373–375; Buskirk *et al.* 2000b, pp. 397–405; Ruggiero *et al.* 2000, pp. 445–447). In mountainous areas, the boreal forests that lynx use are characterized by scattered moist forest types with high hare densities in a matrix of other habitats (*e.g.*, hardwoods, dry forest, non-forest) with low hare densities. In these areas, lynx incorporate the matrix habitat (non-boreal forest habitat elements) into their home ranges and use it for traveling between patches of boreal forest that support high hare densities where most foraging occurs.

Snow conditions also determine the distribution of lynx (Ruggiero *et al.* 2000, pp. 445–449). Lynx are morphologically and physiologically adapted for hunting snowshoe hares and surviving in areas that have cold winters with deep, fluffy snow for extended periods. These adaptations provide lynx a competitive advantage over potential competitors, such as bobcats (*Lynx rufus*) or coyotes (*Canis latrans*) (McCord and Cardoza 1982, p. 748; Buskirk *et al.* 2000a, pp. 86–95; Ruediger *et al.* 2000, p. 1–11; Ruggiero *et al.* 2000, pp. 445, 450). Bobcats and coyotes have a higher foot load (more weight per surface area of foot), which causes them to sink into the snow more than lynx. Therefore, bobcats and coyotes cannot efficiently hunt in fluffy or deep snow and are at a competitive disadvantage to lynx. Long-term snow conditions presumably limit the winter distribution of potential lynx competitors such as bobcats (McCord and Cardoza 1982, p. 748) or coyotes.

Lynx Habitat Requirements

Because of the patchiness and temporal nature of high-quality snowshoe hare habitat, lynx populations require large boreal forest landscapes to ensure that sufficient high quality snowshoe hare habitat is available and to ensure that lynx may move freely among patches of suitable habitat and among subpopulations of lynx. Populations that are composed of a number of discrete subpopulations, connected by dispersal, are called metapopulations (McKelvey *et al.* 2000c, p. 25). Individual lynx maintain large home ranges (reported as generally ranging between 12 to 83 miles^2 (31 to 216 kilometers^2)) (Koehler 1990, p. 847; Aubry *et al.* 2000, pp. 382–386; Squires and Laurion 2000, pp. 342–347; Squires *et al.* 2004b, pp. 13–16, Table 6; Vashon *et al.* 2005a, pp. 7–11). The size of lynx home ranges varies depending on abundance of prey, the animal's gender and age, the season, and the density of lynx populations (Koehler 1990, p. 849; Poole 1994, pp. 612–616; Slough and Mowat 1996, pp. 951, 956; Aubry *et al.* 2000, pp. 382–386; Mowat *et al.* 2000, pp. 276–280; Vashon *et al.* 2005a, pp. 9–10). When densities of snowshoe hares decline, for example, lynx enlarge their home ranges to obtain sufficient amounts of food to survive and reproduce.

In the contiguous United States, the boreal forest landscape is naturally patchy and transitional because it is the southern edge of the distributional range of the boreal forest. This generally limits snowshoe hare populations in the contiguous United States from achieving densities similar to those of the expansive northern boreal forest in Canada (Wolff 1980, pp. 123–128; Buehler and Keith 1982, pp. 24, 28; Koehler 1990, p. 849; Koehler and Aubry 1994, p. 84). Additionally, the presence of more snowshoe hare predators and competitors at southern latitudes may inhibit the potential for high-density hare populations (Wolff 1980, p. 128). As a result, lynx generally occur at relatively low densities in the contiguous United States compared to the high lynx densities that occur in the northern boreal forest of Canada (Aubry *et al.* 2000, pp. 375, 393–394) or the densities of species such as the bobcat, which is a habitat and prey generalist.

Lynx are highly mobile and generally move long distances (greater than 60 miles (100 kilometers)) (Aubry *et al.* 2000, pp. 386–387; Mowat *et al.* 2000, pp. 290–294). Lynx disperse primarily when snowshoe hare populations decline (Ward and Krebs 1985, pp. 2821–2823; O'Donoghue *et al.* 1997, pp. 156, 159; Poole 1997, pp. 499–503). Subadult lynx disperse even when prey is abundant (Poole 1997, pp. 502–503), presumably to establish new home ranges. Lynx also make exploratory movements outside their home ranges (Aubry *et al.* 2000, p. 386; Squires *et al.* 2001, pp. 18–26).

The boreal forest landscape is naturally dynamic. Forest stands within the landscape change as they undergo succession after natural or human-caused disturbances such as fire, insect epidemics, wind, ice, disease, and forest management (Elliot-Fisk 1988, pp. 47–48; Agee 2000, pp. 47–69). As a result, lynx habitat within the boreal forest landscape is typically patchy because the boreal forest contains stands of differing ages and conditions, some of which are suitable as lynx foraging or denning habitat (or will become suitable in the future due to forest succession) and some of which serve as travel routes for lynx moving between foraging and denning habitat (McKelvey *et al.* 2000a, pp. 427–434; Hoving *et al.* 2004, pp. 290–292).

Snowshoe hares comprise a majority of the lynx diet (Nellis *et al.* 1972, pp. 323–325; Brand *et al.* 1976, pp. 422–425; Koehler 1990, p. 848; Apps 2000, pp. 358–359, 363; Aubry *et al.* 2000, pp. 375–378; Mowat *et al.* 2000, pp. 267–268; von Kienast 2003, pp. 37–38; Squires *et al.* 2004b, p. 15, Table 8). When snowshoe hare populations are low, female lynx produce few or no kittens that survive to independence (Nellis *et al.* 1972, pp. 326–328; Brand *et al.* 1976, pp. 420, 427; Brand and Keith 1979, pp. 837–838, 847; Poole 1994, pp. 612–616; Slough and Mowat 1996, pp. 953–958; O'Donoghue *et al.* 1997, pp. 158–159; Aubry *et al.* 2000, pp. 388–389; Mowat *et al.* 2000, pp. 285–287). Lynx prey opportunistically on other small mammals and birds, particularly during lows in snowshoe hare populations, but alternate prey species may not sufficiently compensate for low availability of snowshoe hares, resulting in reduced lynx populations (Brand *et al.* 1976, pp. 422–425; Brand and Keith 1979, pp. 833–834; Koehler 1990, pp. 848–849; Mowat *et al.* 2000, pp. 267–268).

In northern Canada, lynx populations fluctuate in response to the cycling of snowshoe hare populations (Hodges 2000a, pp. 118–123; Mowat *et al.* 2000, pp. 270–272). Although snowshoe hare populations in the northern portion of their range show strong, regular population cycles, these fluctuations are generally much less pronounced in the southern portion of their range in the contiguous United States (Hodges 2000b, pp. 165–173). In the contiguous United States, the degree to which regional local lynx population fluctuations are influenced by local snowshoe hare population dynamics is unclear. However, it is anticipated that because of natural fluctuations in snowshoe hare populations, there will be periods when lynx densities are extremely low.

Because lynx population dynamics, survival, and reproduction are closely tied to snowshoe hare availability, snowshoe hare habitat is a component of lynx habitat. Lynx generally concentrate their foraging and hunting activities in areas where snowshoe hare

populations are high (Koehler *et al.* 1979, p. 442; Ward and Krebs 1985, pp. 2821–2823; Murray *et al.* 1994, p. 1450; O'Donoghue *et al.* 1997, pp. 155, 159–160 and 1998, pp. 178–181). Snowshoe hares are most abundant in forests with dense understories that provide forage, cover to escape from predators, and protection during extreme weather (Wolfe *et al.* 1982, pp. 665–669; Litvaitis *et al.* 1985, pp. 869–872; Hodges 2000a, pp. 136–140 and 2000b, pp. 183–195). Generally, hare densities are higher in regenerating, earlier successional forest stages because they have greater understory structure than mature forests (Buehler and Keith 1982, p. 24; Wolfe *et al.* 1982, pp. 665–669; Koehler 1990, pp. 847–848; Hodges 2000b, pp. 183–195; Homyack 2003, p. 63, 141; Griffin 2004, pp. 84–88). However, snowshoe hares can be abundant in mature forests with dense understories (Griffin 2004, pp. 53–54).

Within the boreal forest, lynx den sites are located where coarse woody debris, such as downed logs and windfalls, provides security and thermal cover for lynx kittens (McCord and Cardoza 1982, pp. 743–744; Koehler 1990, pp. 847–849; Slough 1999, p. 607; Squires and Laurion 2000, pp. 346–347; Organ 2001). The amount of structure (*e.g.*, downed, large, woody debris) appears to be more important than the age of the forest stand for lynx denning habitat (Mowat *et al.* 2000, pp. 10–11).

The 14-State Canada Lynx DPS

Lynx were listed in 2000 within what was determined to be the contiguous United States DPS, which included the known current and historical range of the lynx (68 FR 40080). This range included the States of Colorado, Idaho, Maine, Minnesota, Montana, New Hampshire, New York, and Washington, and also areas that could support dispersers—portions of Michigan, Oregon, Utah, Vermont, Wisconsin, and Wyoming (68 FR 40099). Other areas outside of boreal forest, where dispersing lynx had only been sporadically documented, were not considered to be within the range of the lynx, because they were deemed incapable of supporting lynx; these areas included Connecticut, Indiana, Iowa, Massachusetts, Nebraska, Nevada, North Dakota, Ohio, Pennsylvania, South Dakota, and Virginia (68 FR 40099). New Mexico was not included in this list of States because no lynx occurred there, and no lynx had ever been documented there, even sporadically, and it therefore was not considered in the then current or historical range of the species (68 FR 40083). In addition, no review of potential habitat in New Mexico was conducted; we did not consider lynx recently released into Colorado that strayed into New Mexico as sufficient reason to include New Mexico within the range of lynx because there was no evidence that habitat in New Mexico historically supported lynx (68 FR 40083, July 3, 2003).

In 1998, when the Service proposed to list the lynx in the United States, no wild (or reintroduced) lynx were known to exist in Colorado, which represented the extreme southern edge of the species' range (65 FR 16059, March 24, 2000). Boreal forest habitat in Colorado and southeastern Wyoming, the Southern Rocky Mountain Region, is isolated from boreal forest in Utah and northwestern Wyoming, and is naturally highly fragmented (65 FR 16059, March 24, 2000). It was uncertain whether Colorado had ever supported a small self-sustaining lynx population, or whether historical records were of dispersers that arrived during high population cycles of lynx. Some of these dispersers may have remained for a period of years if hare populations were high enough to support residents and reproduction, but eventually succumbed to a lack of consistent, high quality habitat and food sources.

In 1999, the Colorado Department of Wildlife reintroduced 22 wild lynx from Canada and Alaska into southwestern Colorado (Shenk 2007, p. 20). By 2003, when we clarified the listing rule (68 FR 40076, July 3, 2003), no data indicated that the lynx released could be supported by the habitat available in Colorado. In her 2007 Wildlife Research Report, Shenk continued to conclude that ''what is yet to be determined is whether current conditions in Colorado can support the recruitment necessary to offset annual mortality in order to sustain the population'' (Shenk 2007, p. 18). Colorado was included in the 14-state DPS in 2000, because records indicated that lynx habitat occurred there historically; however, it was not known to sustain lynx populations. No information existed in 2000 when the final rule was published to indicate that lynx existed in New Mexico, that it was ever occupied historically, or that it could sustain lynx, therefore it was not included in the listing rule or special rule concerning lynx in the contiguous 14-State DPS. We now have documentation that lynx reintroduced in Colorado have dispersed in many directions, primarily into New Mexico, Utah, and Wyoming, but also into eight other States (Shenk 2007, pp. 6, 9). No reproduction has been documented in New Mexico or Utah, but one den was found in Wyoming (Shenk 2007, p. 15).

We included an analysis in the final lynx listing rule (68 FR 40081) on whether lynx were both discrete and significant in each of the four regions of the contiguous United States where it exists (the Northeast, Great Lakes, Southern Rocky Mountains, and Northern Rocky Mountains/Cascades). We determined that none of the regions individually constitute significantly unique or unusual ecological setting and, therefore, did not individually meet the DPS criteria. Therefore, the lynx was listed as a single contiguous United States DPS defined by 14 States.

The Petition

The August 1, 2007, petition requests that we ''update and amend the lynx's listing status to include the mountains of north-central New Mexico.'' Their petition presents information with respect to three topic areas: (A) Compliance with the ESA, our 1996 ''Policy Regarding the Recognition of Distinct Vertebrate Population Segments under the Endangered Species Act'' (DPS Policy, 61 FR 4722), and the special listing rule and preamble to the final listing rule; (B) use of best scientific and commercial data available; and (C) the necessity for lynx in New Mexico to be listed to ensure the survival and recovery of lynx in the southern Rockies.

The petition seeks modification of the currently listed 14-state DPS in light of the following factors:

1. The petitioners indicate that the Service:

(a) Listed a single contiguous United States DPS;

(b) Determined that, as a Federal agency, it is responsible for coordinating recovery for a species that crosses State boundaries;

(c) Discussed 14 individual States only in the context of describing lynx historical range, and not as a limitation on the species' listing status; and

(d) Developed language in the special listing rule for lynx (50 CFR 17.40(k)) applying prohibitions to all lynx found in the contiguous United States.

2. The petitioners indicate that:

(a) The DPS Policy prohibits the Service from using political boundaries below the international level when listing DPSs;

(b) The Service cannot use the boundary between States to subdivide a single biological population; and

(c) Use of a species' known historical range to define its listing status is inconsistent with the policy because it deems portions of the current range to be markedly separate without actual discreteness analysis.

3. The petitioners present information that the Act authorizes the listing of a species, subspecies, or DPS; the Service listed a United States DPS based on the international boundary with Canada, and no further distinctions (*e.g.*, limiting to specific States) can be made.

4. The petitioners discuss and provide information to support their assessment that the lynx should be listed in New Mexico (Ruediger *et al.* 2000; Frey 2006; Frey 2003; Malaney 2003; Malaney and Frey 2005; BISON 2003; Checklist 2003; and Shenk 2001, 2005a, 2005b, 2006, 2007). The petitioners indicate that the Southern Rockies include high elevation, mountainous habitat that extends into north-central New Mexico. They indicate that, although no known historical occurrence records of lynx in New Mexico exist (Frey 2006, p. 20), we should carefully review the forest zones in New Mexico to ascertain whether suitable habitat exists.

5. The petitioners discuss why the lynx final listing rule is not logical and is contrary to the purpose and goals of the Act that include conserving ecosystems upon which species depend. The petitioners indicate that lynx traveling into New Mexico could be legally shot and hunted, and that this is contrary to the purpose of the Act, which is to provide a means whereby the ecosystems upon which threatened and endangered species depend may be conserved.

Finding

We reviewed the petition, supporting information provided by the petitioners, and information in our files.

We find that the petition presents substantial scientific or commercial information indicating that changing the listing status of Canada lynx to include New Mexico in the threatened contiguous United States Distinct Population Segment may be warranted. Therefore, we will initiate a review of the specific points raised by the petitioners and the best available information, and present our analysis and determination in our 12-month finding.

It is important to note that the ''substantial information'' standard for a 90-day finding is in contrast to the Act's ''best scientific and commercial data'' standard that applies to a 12-month finding as to whether a petitioned action is warranted. A 90-day finding is not a status assessment of the species and does not constitute a status review under the Act. Our final determination as to whether a petitioned action is warranted is not made until we have completed a thorough review of issues raised in the petition that are substantial, which is conducted following a substantial 90-day finding. Because the Act's standards for 90-day and 12-month findings are different, as described above, a substantial 90-day finding does not mean that the 12-month finding will result in a warranted finding.

Migratory Bird Subsistence Harvest in Alaska; Harvest Regulations for Migratory Birds in Alaska During the 2009 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service or we) proposes migratory bird subsistence harvest regulations in Alaska for the 2009 season. The proposed regulations would enable the continuation of customary and traditional subsistence uses of migratory birds in Alaska and prescribe regional information on when and where the harvesting of birds may occur. These proposed regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives. The rulemaking is necessary because the regulations governing the subsistence harvest of migratory birds in Alaska are subject to annual review. This rulemaking proposes region-specific regulations that would go into effect on April 2, 2009, and expire on August 31, 2009.

DATES: We will accept comments received or postmarked on or before January 20, 2009. We must receive requests for public hearings, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by February 2, 2009.

ADDRESSES: You may submit comments by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: RIN 1018–AW29, Division of Policy and Directives Management, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Suite 222, Arlington, VA 22203.

We will not accept e-mail or faxes. We will post all comments on *http://www.regulations.gov.* This generally means that we will post any personal information you provide us (see the Public Comments section below for more information).

FOR FURTHER INFORMATION CONTACT: Fred Armstrong, (907) 786–3887, or Donna Dewhurst, (907) 786–3499, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Mail Stop 201, Anchorage, AK 99503.

SUPPLEMENTARY INFORMATION:

Public Comments

You may submit your comments and materials concerning this proposed rule by one of the methods listed in the **ADDRESSES** section. We will not accept comments sent by e-mail or fax or to an address not listed in the **ADDRESSES** section. We will not consider hand-delivered comments that we do not receive, or mailed comments that are not postmarked, by the date specified in the **DATES** section.

We will post your entire comment—including your personal identifying information—on *http://www.regulations.gov.* If you provide personal identifying information in your comment, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on *http://www.regulations.gov,* or by

appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Office of the Alaska Migratory Bird Co-management Council, 1011 E. Tudor Rd., Anchorage, AK 99503, (877) 229–2344.

Why Is This Current Rulemaking Necessary?

This current rulemaking is necessary because, by law, the migratory bird harvest season is closed unless opened by the Secretary of the Interior, and the regulations governing subsistence harvest of migratory birds in Alaska are subject to public review and annual approval. The Alaska Migratory Bird Co-management Council (Co-management Council) held a meeting in April 2008 to develop recommendations for changes effective for the 2009 harvest season. These recommendations were presented to the Service Regulations Committee (SRC) on July 30 and 31, 2008, and were approved.

This rule proposes regulations for the taking of migratory birds for subsistence uses in Alaska during 2009. This rule lists migratory bird season openings and closures by region.

How Do I Find the History of These Regulations?

Background information, including past events leading to this action, accomplishments since the Migratory Bird Treaties with Canada and Mexico were amended, and a history addressing conservation issues can be found in the following **Federal Register** documents:

Date	Federal Register citation
August 16, 2002	67 FR 53511
July 21, 2003	68 FR 43010
April 2, 2004	69 FR 17318
April 8, 2005	70 FR 18244
February 28, 2006	71 FR 10404
April 11, 2007	72 FR 18318
March 14, 2008	73 FR 13788

These documents, which are all final rules setting forth the annual harvest regulations, are available at *http://alaska.fws.gov/ambcc/regulations.htm.*

Who Is Eligible To Hunt Under These Regulations?

Eligibility to harvest under the regulations established in 2003 was limited to permanent residents, regardless of race, in villages located within the Alaska Peninsula, Kodiak Archipelago, the Aleutian Islands and in areas north and west of the Alaska Range (50 CFR 92.5). These geographical restrictions opened the initial subsistence migratory bird harvest to only about 13 percent of Alaska residents. High-population areas such as Anchorage, the Matanuska-Susitna and Fairbanks North Star boroughs, the Kenai Peninsula roaded area, the Gulf of Alaska roaded area, and Southeast Alaska were excluded from the eligible subsistence harvest areas.

Based on petitions requesting inclusion in the harvest, in 2004, we added 13 additional communities based on criteria set forth in 50 CFR 92.5(c). These communities were Gulkana, Gakona, Tazlina, Copper Center, Mentasta Lake, Chitina, Chistochina, Tatitlek, Chenega, Port Graham, Nanwalek, Tyonek, and Hoonah, with a combined population of 2,766. In 2005, we added three additional communities for glaucous-winged gull egg gathering only, based on petitions requesting inclusion. These southeastern communities were Craig, Hydaburg, and Yakutat, with a combined population of 2,459.

In 2007, we enacted the Alaska Department of Fish and Game's request to expand the Fairbanks North Star Borough excluded area to include the Central Interior area. This action excluded the following communities from participation in this harvest: Big Delta/Fort Greely, Healy, McKinley Park/Village and Ferry, with a combined population of 2,812. These removed communities reduced the percentage of the State population included in the subsistence harvest to 13 percent.

How Will the Service Ensure That the Subsistence Harvest Will Not Raise Overall Migratory Bird Harvest or Threaten the Conservation of Endangered and Threatened Species?

We have monitored subsistence harvest for the past 15 years through the use of annual household surveys in the most heavily used subsistence harvest areas, e.g., the Yukon-Kuskokwim Delta. Continuation of this monitoring enables tracking of any major changes or trends in levels of harvest and user participation after legalization of the harvest. The Service has an emergency closure provision (50 CFR 92.21), so that if any significant increases in harvest are documented for one or more species in a region, an emergency closure can be requested and implemented.

The Service will institute emergency harvest closures in 2009 if deemed necessary to prevent an imminent threat to the conservation of Steller's eiders. Steller's eiders are divided into Atlantic and Pacific populations; the Pacific population is further divided into the Russia-breeding population along the Russian eastern arctic coastal plain, and the Alaska-breeding population. In 1997, the Alaska-breeding population of Steller's eiders was listed as threatened based on a substantial decrease in the species' breeding range in Alaska and the resulting increased vulnerability of the remaining Alaska-breeding population to extirpation (62 FR 31748; June 11, 1997).

The Alaska-breeding population of Steller's eiders now nests primarily only on the Alaska Coastal Plain, particularly around Barrow and at very low densities from Wainwright to at least as far east as Prudhoe Bay. A few pairs also apparently remain on the Yukon-Kuskokwim Delta. The apparent reduction in breeding range in Alaska was a major reason for listing the Alaska-breeding population as threatened. Although the cause of the original decline is not known with certainty, current threats to the recovery of Steller's eiders likely include mortality from hunting, exposure to lead shot and other contaminants such as oil, changes in marine habitat, and nest failure and possibly adult mortality from avian and mammalian predators associated with human settlements and development. While we have made progress working to reduce predation, substituting steel shot for lead, and instituting eider conservation outreach programs, mortality from hunting appears to be the greatest current threat.

A computer-based statistical model was developed by scientists to predict the prognosis for recovery or extinction of the Alaska-breeding population of Steller's eider. Although there is uncertainty surrounding the population size, survival rate, and reproductive rate estimates used to develop this model, results indicate that the Alaska-breeding population of Steller's eiders has a very high probability of becoming extirpated within 10 years without immediate concerted actions designed to reduce adult mortality. For years with available harvest survey data, it appears that possibly 10 percent or more of the Alaska-breeding population of Steller's eiders has been lost due to mortality from hunting. Regulatory and collaborative actions focused on this threat will be necessary to ensure that take is reduced in 2009. The Service will institute emergency closures if the Alaska subsistence harvest of migratory birds is deemed to cause an imminent threat to Steller's eiders in a specific geographic area during the spring migration or the summer breeding period.

What Is Proposed for Change in the Region-Specific Regulations for 2009?

Yellow-Billed Loons

At the request of the North Slope Borough Fish and Game Management Committee, the Co-management Council recommended continuing into 2009 the provisions originally established in 2005 to allow subsistence use of yellow-billed loons inadvertently entangled in subsistence fishing (gill) nets on the North Slope. Yellow-billed loons are culturally important for the Inupiat Eskimo of the North Slope for use in traditional dance regalia. A maximum of 20 yellow-billed loons may be caught in 2009 under this provision. The intent of this provision is not to harvest yellow-billed loons, but to allow use of those loons inadvertently entangled during normal subsistence fishing activities. Individual reporting to the North Slope Borough Department of Wildlife is required by the end of each season. The North Slope Borough has asked fishermen, through announcements on the radio and through personal contact, to report inadvertent entanglements of loons to better estimate the level of mortality caused by gill nets. In 2007, 14 yellow-billed loons were reported taken in fishing nets and an additional 2 were released alive. This provision, to allow subsistence possession and use of yellow-billed loons caught in fishing gill nets, is subject to annual review and renewal by the SRC.

Aleutian and Arctic Terns

We are proposing to open a season May 15–June 30 for harvesting Aleutian and arctic tern eggs in the Yakutat Harvest area, from Icy Bay (Icy Cape to Pt. Riou) and the coastal islands bordering the Gulf of Alaska from Pt. Manby southeast to and including Dry Bay. The Yakutat Tlingit Tribe requested this proposal, stating that this regulation would legalize a traditional gathering of tern eggs that has occurred for hundreds of years. The Tlingit refer to the terns as ''sea pigeons'' and gather eggs for sustenance during the salmon fishing season. ''Pigeon eggs'' are considered a highly desired food by many Native households in Yakutat. Harvested eggs are shared extensively throughout the community and especially with local Native elders. The Yakutat Tlingit Tribe has agreed to monitor the harvest of tern eggs and this summer would conduct a recall survey of the spring harvest. The Yakutat Ranger Station, U.S. Forest Service, in cooperation with the Service's Alaska Office of Migratory Bird Management is developing methods for monitoring the Aleutian and arctic tern populations in the Yakutat area. Work on this project is under way.

Steller's Eiders

We are proposing to add local migratory bird hunting restrictions for the four communities of Barrow, Wainwright, Point Lay, and Point Hope along the North Slope of Alaska. These proposed restrictions include instituting shooting hours, an inspection requirement, a road closure, and clarification of a possession restriction. We are proposing these restrictions in response to the recent mortality of Steller's eiders on the North Slope, the loss of nests and eggs during breeding, and mortality likely associated with crippling due to hunting. We are not proposing to authorize incidental take of Steller's eiders.

The Service has concerns that harvest pursuant to regulations from previous subsistence seasons would pose an imminent threat to the threatened Steller's eider. It is estimated that 19 (9–37, 95% Confidence Limits) Steller's eiders were harvested on the North Slope during the 2005 subsistence season; the actual reported take was 9 Steller's eiders (Co-Management Council unpublished data, 2006). In 2008, 27 Steller's eiders were found dead at Barrow between June and August 2008; of these, 74 percent were shot. The number of Steller's eiders killed from Barrow to Point Hope during the spring and summer subsistence hunt during 2004–08 requires the Service to develop and implement new regulations. The Service concludes that the subsistence hunt has resulted in an unknown amount of shooting and disturbance that has caused the direct loss of nests, eggs, young, and adults in breeding years. The Service must attempt to eliminate the take of Steller's eiders resulting from the recognition and continuation of the spring and summer subsistence migratory bird hunting in order to conserve and eventually recover this species.

Of the regulations we are proposing, the shooting hours restriction parallels that found in 50 CFR 20.102. This regulation will help eliminate hunting under poor visibility to improve species identification and reduce the probability of mistaken shooting and crippling of Steller's eiders. We are proposing to require that hunters in the field, when asked, must present their take for species identification to enable the Service to monitor the harvest for take of closed and protected species. Because of the critical status of the Alaska-breeding Steller's eiders (the listed population), we need real-time, reliable information about the take of any Steller's eiders during the subsistence season. We are proposing to clarify, reinforce, and ensure that no person may possess migratory bird species that are not open for subsistence harvest. In Barrow, we are proposing to close a 1-mile buffer zone to migratory bird hunting around specific rural roads to protect birds from harvest and disturbance in the primary nesting area around Barrow. If there had been a 1-mile closed buffer zone for the 2008 breeding period, it would have protected 91 percent of Steller's eider nests documented.

The goal of these proposed restrictions is to eliminate or significantly reduce the potential impact of the subsistence migratory bird hunt to Steller's eiders. In addition to the regulations, the Service is developing and implementing more effective hunter training on eider identification, harvest monitoring, law enforcement, and outreach. In the event that some or all of the conservation measures and regulations are unsuccessful, and the existing harvest is deemed to pose an imminent threat to the conservation of Steller's eiders, we will apply the emergency closure provision provided in 50 CFR 92.21. In addition, as discussed under ''Endangered Species Act Consideration,'' we will consult on these proposed regulations under Section 7 of the Endangered Species Act to ensure that they are not likely to jeopardize the continued existence of Steller's eiders or any other listed species.

Statutory Authority

We derive our authority to issue these regulations from the Migratory Bird Treaty Act of 1918, 16 U.S.C. 712(1), which authorizes the Secretary of the Interior, in accordance with the treaties with Canada, Mexico, Japan, and Russia, to ''issue such regulations as may be necessary to assure that the taking of migratory birds and the collection of their eggs, by the indigenous inhabitants of the State of Alaska, shall be permitted for their own nutritional and other essential needs, as determined by the Secretary of the Interior, during seasons established so as to provide for the preservation and maintenance of stocks of migratory birds.''

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in the **ADDRESSES** section. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Required Determinations

Regulatory Planning and Review (Executive Order 12866)

The Office of Management and Budget (OMB) has determined that this rule is not significant and has not reviewed this rule under Executive Order 12866 (E.O. 12866). OMB bases its determination upon the following four criteria:

(a) Whether the rule will have an annual effect of $100 million or more on the economy or adversely affect an economic sector, productivity, jobs, the environment, or other units of the government.

(b) Whether the rule will create inconsistencies with other Federal agencies' actions.

(c) Whether the rule will materially affect entitlements, grants, user fees, loan programs, or the rights and obligations of their recipients.

(d) Whether the rule raises novel legal or policy issues.

Regulatory Flexibility Act

The Department of the Interior certifies that this rule will not have a significant economic impact on a substantial number of small entities as defined under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). An initial regulatory flexibility analysis is not required. Accordingly, a Small Entity Compliance Guide is not required. The rule legalizes a pre-existing subsistence activity, and the resources harvested will be consumed by the harvesters or persons within their local community.

Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

(a) Will not have an annual effect on the economy of $100 million or more. It will legalize and regulate a traditional subsistence activity. It will not result in a substantial increase in subsistence harvest or a significant change in harvesting patterns. The commodities being regulated under this rule are migratory birds. This rule deals with legalizing the subsistence harvest of migratory birds and, as such, does not involve commodities traded in the marketplace. A small economic benefit from this rule derives from the sale of equipment and ammunition to carry out subsistence hunting. Most, if not all, businesses that sell hunting equipment in rural Alaska would qualify as small businesses. We have no reason to believe that this rule will lead to a disproportionate distribution of benefits.

(b) Will not cause a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. This rule does not deal with traded commodities and, therefore, does not have an impact on prices for consumers.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. This rule deals with the harvesting of wildlife for personal consumption. It does not regulate the marketplace in any way to generate effects on the economy or the ability of businesses to compete.

Unfunded Mandates Reform Act

We have determined and certified under the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*) that this rule will not impose a cost of $100 million or more in any given year on local, State, or tribal governments or private entities. The rule does not have a significant or unique effect on State, local, or tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act is not required. Participation on regional management bodies and the Co-management Council will require travel expenses for some Alaska Native organizations and local governments. In addition, they will assume some expenses related to coordinating involvement of village councils in the regulatory process. Total coordination and travel expenses for all Alaska Native organizations are estimated to be less than $300,000 per year. In the Notice of Decision (65 FR 16405; March 28, 2000), we identified 12 partner organizations (Alaska Native nonprofits and local governments) to administer the regional programs. The Alaska Department of Fish and Game will also incur expenses for travel to Co-management Council and regional management body meetings. In addition, the State of Alaska will be required to provide technical staff support to each of the regional management bodies and to the Co-management Council. Expenses for the State's involvement may exceed $100,000 per year, but should not exceed $150,000 per year. When funding permits, we make annual grant agreements available to the partner organizations and the Alaska Department of Fish and Game to help offset their expenses.

Takings (Executive Order 12630)

Under the criteria in Executive Order 12630, this rule does not have significant takings implications. This rule is not specific to particular land ownership, but applies to the harvesting of migratory bird resources throughout Alaska. A takings implication assessment is not required.

Federalism (Executive Order 13132)

Under the criteria in Executive Order 13132, this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. We discuss effects of this proposed rule on the State of Alaska in the Executive Order 12866 and Unfunded Mandates Reform Act sections above. We worked with the State of Alaska to develop these proposed regulations. Therefore, a Federalism Assessment is not required.

Civil Justice Reform (Executive Order 12988)

The Department, in promulgating this rule, has determined that it will not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of Executive Order 12988.

Government-to-Government Relations With Native American Tribal Governments

In accordance with the President's memorandum of April 29, 1994, ''Government-to-Government Relations With Native American Tribal Governments'' (59 FR 22951), and Executive Order 13175 (65 FR 67249; November 6, 2000), concerning consultation and coordination with Indian Tribal Governments, we have consulted with Alaska tribes and evaluated the rule for possible effects on tribes or trust resources, and have determined that there are no significant effects. The rule will legally recognize the subsistence harvest of migratory birds and their eggs for tribal members,

as well as for other indigenous inhabitants.

Paperwork Reduction Act

This rule has been examined under the Paperwork Reduction Act of 1995 and has been found to contain no information collection requirements. We have, however, received OMB approval of associated voluntary annual household surveys used to determine levels of subsistence take. The OMB control number for the information collection is 1018–0124, which expires on January 31, 2010. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Endangered Species Act Consideration

Prior to issuance of annual spring and summer subsistence regulations, we will consult under section 7 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531–1543; hereinafter the Act), to ensure that the 2009 subsistence harvest is not likely to jeopardize the continued existence of any species designated as endangered or threatened, or modify or destroy its critical habitats, and that the regulations are consistent with conservation programs for those species. Consultation under section 7 of the Act for the annual subsistence take regulations may cause us to change these regulations. Our biological opinion resulting from the section 7 consultation is a public document available from the person listed under **FOR FURTHER INFORMATION CONTACT**.

National Environmental Policy Act Consideration

The annual regulations and options were considered in the Environmental Assessment, ''Managing Migratory Bird Subsistence Hunting in Alaska: Hunting Regulations for the 2009 Spring/Summer Harvest,'' issued December 12, 2008. Copies are available from the person listed under **FOR FURTHER INFORMATION CONTACT**.

Energy Supply, Distribution, or Use (Executive Order 13211)

On May 18, 2001, the President issued Executive Order 13211 on regulations that significantly affect energy supply, distribution, and use. Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. This is not a significant regulatory action under Executive Order 12866; it would allow only for traditional subsistence harvest and would improve conservation of migratory birds by allowing effective regulation of this harvest. Further, this rule is not expected to significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action under Executive Order 13211 and no Statement of Energy Effects is required.

List of Subjects in 50 CFR Part 92

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Subsistence, Treaties, Wildlife.

For the reasons set out in the preamble, we propose to amend title 50, chapter I, subchapter G, of the Code of Federal Regulations as follows:

PART 92—MIGRATORY BIRD SUBSISTENCE HARVEST IN ALASKA

1. The authority citation for part 92 continues to read as follows:

Authority: 16 U.S.C. 703–712.

Subpart D—Annual Regulations Governing Subsistence Harvest

2. In subpart D, add § 92.31 to read as follows:

§ 92.31 Region-specific regulations.

The 2009 season dates for the eligible subsistence harvest areas are as follows:

(a) *Aleutian/Pribilof Islands Region.*

(1) Northern Unit (Pribilof Islands):

(i) Season: April 2–June 30.

(ii) Closure: July 1–August 31.

(2) Central Unit (Aleut Region's eastern boundary on the Alaska Peninsula westward to and including Unalaska Island):

(i) Season: April 2–June 15 and July 16–August 31.

(ii) Closure: June 16–July 15.

(iii) Special Black Brant Season Closure: August 16–August 31, only in Izembek and Moffet lagoons.

(iv) Special Tundra Swan Closure: All hunting and egg gathering closed in units 9(D) and 10.

(3) Western Unit (Umnak Island west to and including Attu Island):

(i) Season: April 2–July 15 and August 16–August 31.

(ii) Closure: July 16-August 15.

(b) *Yukon/Kuskokwim Delta Region.*

(1) Season: April 2–August 31.

(2) Closure: 30-day closure dates to be announced by the Service's Alaska Regional Director or his designee, after consultation with local subsistence users, field biologists, and the Association of Village Council President's Waterfowl Conservation Committee. This 30-day period will occur between June 1 and August 15 of each year. A press release announcing the actual closure dates will be forwarded to regional newspapers and radio and television stations and posted in village post offices and stores.

(3) Special Black Brant and Cackling Goose Season Hunting Closure: From the period when egg laying begins until young birds are fledged. Closure dates to be announced by the Service's Alaska Regional Director or his designee, after consultation with field biologists and the Association of Village Council President's Waterfowl Conservation Committee. A press release announcing the actual closure dates will be forwarded to regional newspapers and radio and television stations and posted in village post offices and stores.

(c) *Bristol Bay Region.*

(1) Season: April 2–June 14 and July 16–August 31 (general season); April 2–July 15 for seabird egg gathering only.

(2) Closure: June 15–July 15 (general season); July 16–August 31 (seabird egg gathering).

(d) *Bering Strait/Norton Sound Region.*

(1) Stebbins/St. Michael Area (Point Romanof to Canal Point):

(i) Season: April 15–June 14 and July 16–August 31.

(ii) Closure: June 15–July 15.

(2) Remainder of the region:

(i) Season: April 2–June 14 and July 16–August 31 for waterfowl; April 2–July 19 and August 21–August 31 for all other birds.

(ii) Closure: June 15–July 15 for waterfowl; July 20–August 20 for all other birds.

(e) *Kodiak Archipelago Region,* except for the Kodiak Island roaded area, which is closed to the harvesting of migratory birds and their eggs. The closed area consists of all lands and waters (including exposed tidelands) east of a line extending from Crag Point in the north to the west end of Saltery Cove in the south and all lands and water south of a line extending from Termination Point along the north side of Cascade Lake extending to Anton Larson Bay. Waters adjacent to the closed area are closed to harvest within 500 feet from the water's edge. The offshore islands are open to harvest.

(1) Season: April 2–June 30 and July 31–August 31 for seabirds; April 2–June 20 and July 22–August 31 for all other birds.

(2) Closure: July 1–July 30 for seabirds; June 21–July 21 for all other birds.

(f) *Northwest Arctic Region.*

(1) Season: April 2–June 9 and August 15–August 31 (hunting in general); waterfowl egg gathering May 20–June 9 only; seabird egg gathering May 20–July 12 only; hunting molting/non-nesting waterfowl July 1–July 31 only.

(2) Closure: June 10–August 14, except for the taking of seabird eggs and molting/non-nesting waterfowl as

provided in paragraph (f)(1) of this section.

(g) *North Slope Region.*

(1) Southern Unit (Southwestern North Slope regional boundary east to Peard Bay, everything west of the longitude line 158°30′W and south of the latitude line 70°45′N to the west bank of the Ikpikpuk River, and everything south of the latitude line 69°45′N between the west bank of the Ikpikpuk River to the east bank of Sagavinirktok River):

(i) Season: April 2–June 29 and July 30–August 31 for seabirds; April 2–June 19 and July 20–August 31 for all other birds.

(ii) Closure: June 30–July 29 for seabirds; June 20–July 19 for all other birds.

(iii) Special Black Brant Hunting Opening: From June 20–July 5. The open area would consist of the coastline, from mean high water line outward to include open water, from Nokotlek Point east to longitude line 158°30′W. This includes Peard Bay, Kugrua Bay, and Wainwright Inlet, but not the Kuk and Kugrua river drainages.

(2) Northern Unit (At Peard Bay, everything east of the longitude line 158°30′W and north of the latitude line 70°45′N to west bank of the Ikpikpuk River, and everything north of the latitude line 69°45′N between the west bank of the Ikpikpuk River to the east bank of Sagavinirktok River):

(i) Season: April 6–June 6 and July 7–August 31 for king and common eiders; April 2–June 15 and July 16–August 31 for all other birds.

(ii) Closure: June 7–July 6 for king and common eiders; June 16–July 15 for all other birds.

(iii) Special Hunting Restrictions for Barrow: Migratory bird hunting is not permitted within 1 mile of either side or end of Cakeeater/Gaswell, Nunavak and Freshwater Lake roads and any spur roads.

(3) Eastern Unit (East of eastern bank of the Sagavanirktok River):

(i) Season: April 2–June 19 and July 20–August 31.

(ii) Closure: June 20–July 19.

(4) All Units: yellow-billed loons. Annually, up to 20 yellow-billed loons total for the region may be inadvertently entangled in subsistence fishing nets in the North Slope Region and kept for subsistence use. Individuals must report each yellow-billed loon inadvertently entangled while subsistence gill net fishing to the North Slope Borough Department of Wildlife Management by the end of the season.

(5) North Coastal Zone (Cape Thompson north to Point Hope and east along the Arctic Ocean coastline around Point Barrow to Ross Point, including Iko Bay, and 5 miles inland).

(i) Migratory bird hunting is permitted from one-half hour before sunrise until sunset.

(ii) No person shall at any time, by any means, or in any manner, possess or have in custody any migratory bird or part thereof, taken in violation of subpart C and D of this part.

(iii) Upon request from a Service law enforcement officer, hunters taking, attempting to take, or transporting migratory birds taken during the subsistence harvest season must present them to the officer for species identification.

(h) *Interior Region.*

(1) Season: April 2–June 14 and July 16–August 31; egg gathering May 1–June 14 only.

(2) Closure: June 15–July 15.

(i) *Upper Copper River Region* (Harvest Area: Units 11 and 13) (Eligible communities: Gulkana, Chitina, Tazlina, Copper Center, Gakona, Mentasta Lake, Chistochina and Cantwell).

(1) Season: April 15–May 26 and June 27–August 31.

(2) Closure: May 27–June 26.

(3) The Copper River Basin communities listed above also documented traditional use harvesting birds in Unit 12, making them eligible to hunt in this unit using the seasons specified in paragraph (h) of this section.

(j) Gulf of Alaska Region.

(1) Prince William Sound Area (Harvest area: Unit 6 [D]), (Eligible Chugach communities: Chenega Bay, Tatitlek).

(i) Season: April 2–May 31 and July 1–August 31.

(ii) Closure: June 1–30.

(2) Kachemak Bay Area (Harvest area: Unit 15[C] South of a line connecting the tip of Homer Spit to the mouth of Fox River) (Eligible Chugach Communities: Port Graham, Nanwalek).

(i) Season: April 2–May 31 and July 1–August 31.

(ii) Closure: June 1–30.

(k) *Cook Inlet* (Harvest area: portions of Unit 16[B] as specified below) (Eligible communities: Tyonek only).

(1) Season: April 2–May 31—That portion of Unit 16(B) south of the Skwentna River and west of the Yentna River, and August 1–31—That portion of Unit 16(B) south of the Beluga River, Beluga Lake, and the Triumvirate Glacier.

(2) Closure: June 1–July 31.

(l) *Southeast Alaska.*

(1) Community of Hoonah (Harvest area: National Forest lands in Icy Strait and Cross Sound, including Middle Pass Rock near the Inian Islands, Table Rock in Cross Sound, and other traditional locations on the coast of Yakobi Island. The land and waters of Glacier Bay National Park remain closed to all subsistence harvesting [50 CFR 100.3].

(i) Season: Glaucous-winged gull egg gathering only: May 15–June 30.

(ii) Closure: July 1–August 31.

(2) Communities of Craig and Hydaburg (Harvest area: Small islands and adjacent shoreline of western Prince of Wales Island from Point Baker to Cape Chacon, but also including Coronation and Warren islands).

(i) Season: Glaucous-winged gull egg gathering only: May 15–June 30.

(ii) Closure: July 1–August 31.

(3) Community of Yakutat (Harvest area: Icy Bay [Icy Cape to Pt. Riou], and coastal lands and islands bordering the Gulf of Alaska from Pt. Manby southeast to Dry Bay).

(i) Season: Glaucous-winged gull, aleutian and arctic tern egg gathering: May 15–June 30.

(ii) Closure: July 1–August 31.

3. In subpart D, add § 92.32 to read as follows:

§ 92.32 Emergency regulations to protect Steller's eiders.

Upon finding that continuation of these subsistence regulations would pose an imminent threat to the conservation of threatened Steller's eiders, the U.S. Fish and Wildlife Service Alaska Regional Director, in consultation with the Co-management Council, will immediately under § 92.21 take action as is necessary to prevent further take. Regulation changes implemented could range from a temporary closure of duck hunting in a small geographic area to large-scale regional or State-wide long-term closures of all subsistence migratory bird hunting. Such closures or temporary suspensions will remain in effect until the Regional Director, in consultation with the Co-management Council, determines that the potential for additional Steller's eiders to be taken no longer exists.

Dated: December 10, 2008.

Lyle Laverty,

Assistant Secretary for Fish and Wildlife and Parks.

Notices

Federal Register
Vol. 73, No. 244
Thursday, December 18, 2008

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Notice of Funds Availability: Inviting Applications for the Emerging Markets Program

Announcement Type: New.

Catalog of Federal Domestic Assistance (CFDA) Number: 10.603.

SUMMARY: The Commodity Credit Corporation (CCC) announces that it is inviting proposals for the FY 2009 Emerging Markets Program (EMP). The intended effect of this notice is to solicit additional applications from the private sector and from government agencies for FY 2009. The EMP is administered by personnel of the Foreign Agricultural Service (FAS).

DATES: All proposals must be received by 5 p.m. Eastern Standard Time, January 20, 2009. Applications received after this time will be considered only if funds are still available.

FOR FURTHER INFORMATION CONTACT: Entities wishing to apply for funding should contact the Grants Management Branch, Foreign Agricultural Service, phone: (202) 720–5306, fax: (202) 690–0193, e-mail: *emo@fas.usda.gov*. Information is also available on the Foreign Agricultural Service Web site at *http://www.fas.usda.gov/mos/em-markets/em-markets.asp*.

SUPPLEMENTARY INFORMATION:

I. Funding Opportunity Description

Authority: The EMP is authorized by section 1542(d)(1) of the Food, Agriculture, Conservation and Trade Act of 1990 (The Act), as amended. The EMP regulations appear at 7 CFR part 1486.

1. Purpose. The EMP is designed to assist U.S. entities in developing, maintaining, or expanding exports of U.S. agricultural commodities and products by providing partial funding for technical assistance activities that promote U.S. products in emerging foreign markets. The EMP is intended primarily to support export market development efforts of the private sector, but EMP resources may also be used to assist public organizations.

All U.S. agricultural commodities, except tobacco, are eligible for consideration. Agricultural product(s) should be comprised of at least 50 percent U.S. origin content by weight, exclusive of added water, to be eligible for funding. Proposals that seek support for multiple commodities are also eligible. EMP funding may only be used to support exports of U.S. agricultural commodities and products through generic activities.

2. *Appropriate Activities.* Following are types of project activities that may be funded under the EMP:

—Projects designed specifically to improve market access in emerging foreign markets. Example: Activities intended to mitigate the impact of political or economic events;

—Projects that specifically address various constraints to U.S. exports, including sanitary and phytosanitary issues and other non-tariff barriers. Examples: Seminars on U.S. food safety standards and regulations; and assessing and addressing pest and disease problems that inhibit U.S. exports;

—Short-term training in broad aspects of agriculture and agribusiness trade that will benefit U.S. exporters. Examples: Retail training or transportation and distribution seminars;

—Projects that help foreign governments collect and use market information and develop free trade policies that benefit U.S. exporters as well as the target country or countries. Examples: Agricultural statistical analysis or development of market information systems;

—Assessments and follow-up activities designed to improve country-wide food and business systems or to determine potential use of general export credit guarantees. Examples: Product needs assessments and market analysis;

—Studies of food distribution channels in emerging markets, including infrastructural impediments to U.S. exports. Examples: Grain storage handling and inventory systems; and distribution infrastructure development; and

—Marketing and distribution of value-added products. Example: Market research on the potential for consumer-ready foods or new uses of a product.

EMP funds may not be used to support normal operating costs of individual organizations, nor as a source to recover pre-award costs or prior expenses from previous or ongoing projects. Proposals that counter national strategies or duplicate activities planned or underway by U.S. non-profit agricultural commodity or trade associations (''cooperator'') organizations will not be considered. Other ineligible expenditures include branded product promotions (in-store, restaurant advertising, labeling, etc.); advertising, administrative, and operational expenses for trade shows; Web site development; equipment purchases; and the preparation and printing of brochures, flyers, and posters (except in connection with specific technical assistance activities such as training seminars). For a more complete description of ineligible expenditures, please refer to the EMP regulations.

3. *Eligible Markets.* The Act defines an emerging market as any country that the Secretary of Agriculture determines:

(a) Is taking steps toward a market-oriented economy through the food, agriculture, or rural business sectors of the economy of the country; and

(b) Has the potential to provide a viable and significant market for U.S. agricultural commodities or products of U.S. agricultural commodities.

Because EMP funds are limited and the range of potential emerging market countries is worldwide, consideration will be given to proposals which target countries or regional groups with per capita income less than $11,455 (the current ceiling on upper middle income economies as determined by the World Bank [World Development Indicators; July 2008, *http://siteresources.worldbank.org/DATASTATISTICS/Resources/CLASS.XLS*]) and populations of greater than one million.

Income limits and their calculation can change from year to year with the result that a given country may qualify under the legislative and administrative criteria one year but not the next. Therefore, CCC has not established a

fixed list of ''emerging market'' countries.

A few countries technically qualify as emerging markets but may require a separate determination before funding can be considered because of political sensitivities.

II. Award Information

In general, all qualified proposals received before the application deadline will compete for EMP funding. Priority consideration will be given to proposals that identify and seek to address specific problems or constraints to agricultural exports in emerging markets through technical assistance activities that are intended to expand or maintain U.S. agricultural exports. Priority will also be given to proposals that directly support or address at least one of the goals and objectives in the USDA and FAS Strategic Plans. The applicants' willingness to contribute resources, including cash, or goods and services will be a critical factor in determining which proposals are funded under the EMP. Proposals will also be judged on the potential benefits to the industry represented by the applicant and the degree to which the proposal demonstrates industry support.

The limited funds and the range of eligible emerging markets worldwide generally preclude CCC from approving large budgets for individual projects. While there is no minimum or maximum amount set for EMP-funded projects, most are funded at a level of less than $500,000 and for a duration of approximately one year. Private entities may submit multi-year proposals requesting higher levels of funding that may be considered in the context of a detailed strategic plan of implementation. Funding in such cases is generally limited to three years and provided one year at a time, with commitments beyond the first year subject to interim evaluations and funding availability. Federal government entities are not eligible for multi-year funding.

Funding for successful proposals will be provided through specific agreements. The CCC, through FAS, will be kept informed of the implementation of approved projects through the requirement to provide quarterly progress reports and final performance reports. Changes in the original project time lines and adjustments within project budgets must be approved by FAS.

Note: EMP funds awarded to federal government agencies must be expended or otherwise obligated by close of business, September 30, 2009.

III. Eligibility and Qualification Information

1. Eligible Applicants. Any United States private or Government entity with a demonstrated role or interest in exports of U.S. agricultural commodities or products may apply to the program. Government organizations consist of federal, state, and local agencies. Private organizations include non-profit trade associations, universities, agricultural cooperatives, state regional trade groups (SRTGs), profit-making entities, and consulting businesses. Proposals from research and consulting organizations will be considered if they provide evidence of substantial participation in and financial support by the U.S. industry. For-profit entities are also eligible, but may not use program funds to conduct private business, promote private self-interests, supplement the costs of normal sales activities or promote their own products or services beyond specific uses approved by CCC in a given project.

U.S. market development cooperators and SRTGs may seek funding to address priority, market specific issues and to undertake activities not suitable for funding under other marketing programs, e.g., the Foreign Market Development Cooperator (Cooperator) Program and the Market Access Program (MAP). Foreign organizations, whether government or private, may participate as third parties in activities carried out by U.S. organizations, but are not eligible for funding assistance from the program.

2. Cost Sharing. No private sector proposal will be considered without the element of cost-share from the applicant and/or U.S. partners. The EMP is intended to complement, not supplant, the efforts of the U.S. private sector. There is no minimum or maximum amount of cost-share, though the range in recent successful proposals has been between 35 and 75 percent. The degree of commitment to a proposed project, represented by the amount and type of private funding, is used in determining which proposals will be approved for funding. Cost-share may be actual cash invested or professional time of staff assigned to the project. Proposals for which private industry is willing to commit cash, rather than in-kind contributions such as staff resources, will be given priority consideration.

Cost-sharing is not required for proposals from U.S. Government agencies, but is mandatory for all other eligible entities, even when they may be party to a joint proposal with a U.S. Government agency. Contributions from USDA or other U.S. Government agencies or programs may not be counted toward the stated cost-share requirement. Similarly, contributions from foreign (non-U.S.) organizations may not be counted toward the cost-share requirement, but may be counted in the total cost of the project.

3. Other. Proposals should include a justification for funding assistance from the program—an explanation as to what specifically could not be accomplished without Federal funding assistance and why the participating organization(s) would be unlikely to carry out the project without such assistance. Applicants may submit more than one proposal.

IV. Application and Submission Information

1. Address To Request Application Package. EMP applicants have the opportunity to utilize the Unified Export Strategy (UES) application process, an online system which provides a means for interested applicants to submit a consolidated and strategically coordinated single proposal that incorporates funding requests for any or all of the market development programs administered by FAS.

Organizations are encouraged to submit their application to FAS through the UES application Internet Web site. However, applicants are not required to use the UES format. The Internet-based format reduces paperwork and expedites the FAS processing and review cycle. Applicants planning to use the on-line UES system must contact the Program Policy Staff at (202) 720–4327 to obtain site access information, including a user ID and password. The Internet-based application, including step-by-step instructions for its use, is located at the following URL address: *http://www.fas.usda.gov/cooperators.html*. A Help file is available to assist applicants with the process. Applicants using the online system should also provide by hand delivery, promptly after the deadline for submitting the online application, a printed or e-mailed version of each proposal (using Word or compatible format) to the following address:

Hand Delivery (including FedEx, DHL, UPS, etc.): U.S. Department of Agriculture, Foreign Agricultural Service, Grants Management Branch, Portals Office Building, Suite 400, 1250 Maryland Avenue, SW., Washington, D.C. 20024, or e-mail to *emo@fas.usda.gov*.

Applicants electing not to use the on-line system must submit both (1) two printed copies of their application to the address above and (2) an electronic

version (using Word or a compatible format) to *emo@fas.usda.gov*.

2. Content and Form of Application Submission. To be considered for the EMP, an applicant must submit to the FAS information required by the EMP regulations 7 CFR part 1486. EMP regulations and additional information are available at the following URL address: *http://www.fas.usda.gov/mos/em-markets/em-markets.asp*.

In addition, in accordance with the Office of Management and Budget's issuance of a policy directive (68 FR 38402) regarding the need to identify entities that are receiving government awards, all applicants must submit a Dun and Bradstreet Data Universal Numbering System (DUNS) number. An applicant may request a DUNS number at no cost by calling the dedicated toll-free DUNS number request line on 1–866–705–5711.

Applications should be no longer than ten (10) pages and include the following information:

(a) Date of proposal;

(b) Name of organization submitting proposal;

(c) Organization address, telephone and fax numbers;

(d) Tax ID number;

(e) DUNS number;

(f) Primary contact person;

(g) Full title of proposal;

(h) Target market(s);

(i) Current conditions in the target market(s) affecting the intended commodity or product;

(j) Description of problem(s), i.e., constraint(s), to be addressed by the project, such as inadequate knowledge of the market, insufficient trade contacts, lack of awareness by foreign officials of U.S. products and business practices, impediments (infrastructure, financing, regulatory or other non-tariff barriers), etc.;

(k) Project objectives;

(l) Performance measures: benchmarks for quantifying progress in meeting the objectives;

(m) Rationale: Explanation of the underlying reasons for the project proposal and its approach, the anticipated benefits, and any additional pertinent analysis;

(n) Clear demonstration that successful implementation will benefit a particular industry as a whole, not just the applicant(s);

(o) Explanation as to what specifically could not be accomplished without federal funding assistance and why the participating organization(s) would be unlikely to carry out the project without such assistance;

(p) Specific description of activity/activities to be undertaken;

(q) Timeline(s) for implementation of activity, including start and end dates;

(r) Information on whether similar activities are or have previously been funded with USDA resources in target country or countries (e.g., under MAP and/or Cooperator programs); and

(s) Detailed line item activity budget:

—Cost items should be allocated separately to each participating organization; and

—Expense items constituting a proposed activity's overall budget (e.g., salaries, travel expenses, consultant fees, administrative costs, etc.), with a line item cost for each, should be listed, clearly indicating:

(1) Which items are to be covered by EMP funding;

(2) Which by the participating U.S. organization(s); and

(3) Which by foreign third parties (if applicable).

Cost items for individual consultant fees should show calculation of daily rate and number of days. Cost items for travel expenses should show number of trips, destinations, cost, and objective for each trip. Qualifications of applicant(s) should be included as an attachment.

3. Submission Dates and Times. All applications must be received by 5 p.m. Eastern Standard Time, January 20, 2009 in the Grants Management Branch either electronically or hand delivered. Applications received after this time will be considered only if funds are still available.

4. Funding Restrictions. Certain types of expenses are not eligible for reimbursement by the program, and there are limits on other categories of expenses such as indirect overhead charges, travel expenses, and consulting fees. CCC will also not reimburse unreasonable expenditures or expenditures made prior to approval of a proposal. Full details of the funding restrictions are available in the EMP regulations.

5. Other Submission Requirements and Considerations. All Internet-based applications must be properly submitted by 5 p.m. Eastern Standard Time, January 20, 2009.

All applications on compact disc (using Word or compatible format, with two accompanying paper copies) and any other form of application must be received by 5 p.m. Eastern Standard Time, January 20, 2009, at the following address:

Hand Delivery (including FedEx, DHL, UPS, etc.): U.S. Department of Agriculture, Foreign Agricultural Service, Grants Management Branch, Portals Office Building, Suite 400, 1250 Maryland Avenue, SW., Washington, DC 20024.

V. Application Review Information

1. Criteria. Key criteria used in judging proposals include:

—Appropriateness of the activities for the targeted market(s) and the extent to which the project identifies market barriers, e.g., a fundamental deficiency in the market, and/or a recent change in market conditions;

—Potential of the project to expand U.S. market share, increase U.S. exports or sales, and/or improve awareness of U.S. agricultural commodities and products;

—Quality of the project's performance measures, and the degree to which they relate to the objectives, deliverables, and proposed approach and activities;

—Justification for federal funding;

—Overall cost of the project and the amount of funding provided by the applicant and any partners; and

—Evidence that the organization has the knowledge, expertise, ability, and resources to successfully implement the project, including timeliness and quality of reporting on past EMP activities.

Please see 7 CFR part 1486 for additional evaluation criteria.

2. Review and Selection Process. All applications undergo a multi-phase review within FAS, by appropriate FAS field offices, and as needed, by the private sector Advisory Committee on Emerging Markets to determine the qualifications, quality, appropriateness of projects, and reasonableness of project budgets.

VI. Award Administration Information

1. Award Notices. FAS will notify each applicant in writing of the final disposition of its application. FAS will send an approval letter and project agreement to each approved applicant. The approval letter and agreement will specify the terms and conditions applicable to the project, including the levels of EMP funding and cost-share contribution requirements.

2. Administrative and National Policy Requirements. Interested parties should review the EMP regulations which are available at the following URL address: *http://www.fas.usda.gov/mos/em-markets/em-markets.asp*.

3. Reporting. Quarterly progress reports for all programs one year or longer in duration are required. Projects of less than one year generally require a mid-term progress report. Final performance reports are due 90 days

after completion of each project. Content requirements for both types of reports are contained in the Project Agreement. Final financial reports are also due 90 days after completion of each project as attachments to the final reports.

VII. Agency Contact(s)

For additional information and assistance, contact the Grants Management Branch, Foreign Agricultural Service, U.S. Department of Agriculture, phone: (202) 720–5306, fax: (202) 690–0193, e-mail: *emo@fas.usda.gov*.

Signed at Washington, DC, on this 10th day of December 2008.

Michael W. Yost,

Administrator, Foreign Agricultural Service and Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2008–0041]

Codex Alimentarius Commission: Meeting of the Codex Committee on Fats and Oils

AGENCY: Office of the Under Secretary for Food Safety, USDA.

ACTION: Notice of public meeting and request for comments.

SUMMARY: The Office of the Under Secretary for Food Safety, U.S. Department of Agriculture (USDA), and the Food and Drug Administration (FDA), U.S. Department of Health and Human Services (HHS), are sponsoring a public meeting on January 26, 2009. The objective of the public meeting is to provide information and receive public comments on agenda items and draft United States positions that will be discussed at the 21st Session of the Codex Committee on Fats and Oils (CCFO) of the Codex Alimentarius Commission (Codex), which will be held in Kota Kinabalu, Malaysia, from February 16–20, 2009. The Under Secretary for Food Safety and FDA recognize the importance of providing interested parties the opportunity to obtain background information on the 21st Session of the CCFO and to address items on the agenda.

DATES: The public meeting is scheduled for Wednesday, January 26, 2009, 1–4 p.m.

ADDRESSES: The public meeting will be held in the rear of the cafeteria, South Agriculture Building, USDA, 1400 Independence Avenue, SW., Washington, DC 20250. Documents related to the 21st Session of the CCFO will be accessible via the World Wide Web at the following address: *http://www.codexalimentarius.net/current.asp.*

The U.S. Delegate to the 21st Session of the CCFO, Dr. Dennis Keefe of FDA, invites U.S. interested parties to submit their comments electronically to the following e-mail address (*Dennis.Keefe@fda.hhs.gov*).

Registration

There is no need to pre-register for this meeting. To gain admittance to this meeting, individuals must present a photo ID for identification. When arriving for the meeting, please enter the South Agriculture Building through the second wing entrance on C Street, SW.

For Further Information About the 21st Session of the CCFO Contact: Dr. Dennis Keefe, U.S. Delegate to the CCFO, FDA, Center for Food Safety and Applied Nutrition, Harvey W. Wiley Federal Building, 5100 Paint Branch Parkway, College Park, MD 20740–3835, Phone: (301) 436–1284, Fax: (301) 436–2972, e-mail: *Dennis.Keefe@fda.hhs.gov*.

For Further Information About the Public Meeting Contact: Amjad Ali, International Issues Analyst, U.S. Codex Office, Food Safety and Inspection Service, Room 4861, South Agriculture Building, 1400 Independence Avenue, SW., Washington, DC 20250, Phone: (202) 205–7760, Fax: (202) 720–3157.

SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius (Codex) was established in 1963 by two United Nations organizations, the Food and Agriculture Organization and the World Health Organization. Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices are used in trade.

The CCFO was established to elaborate codes, standards and related texts for fats and oils. The Committee is being hosted by Malaysia.

Issues To Be Discussed at the Public Meeting

The following items on the agenda for the 21st Session of the CCFO will be discussed during the public meeting:

- Matters referred to the Committee from the other Codex bodies.
- Draft Amendment to the Standard for Named Vegetable Oils: Inclusion of Rice Bran Oil.
- Draft Amendment to the Standard for Named Vegetable Oils: Amendment to Total Carotenoids in Unbleached Palm Oil.
- Proposed Draft Criteria for Acceptable Previous Cargoes to the Code of Practice for Storage and Transport of Edible Fats and Oils in Bulk.
- Draft List of Acceptable Previous Cargoes at Step 6.
- Proposed Draft List of Acceptable Previous Cargoes at Step 3.
- Consideration of the Linolenic Acid and Campesterol Levels in Section 3.9 of the Standard for Olive Oils and Olive Pomace Oils.
- Consideration of Proposals for Amendments to the Standard for Named Vegetable Oils: Palm Kernel Stearin and Palm Kernel Olein.
- Criteria for the Revision of the Standard for Named Vegetable Oils.

Each issue listed will be fully described in documents distributed, or to be distributed, by the Secretariat prior to the meeting. Members of the public may access copies of these documents (see **ADDRESSES**).

Public Meeting

At the January 26, 2009, public meeting, draft U.S. positions on the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to the U.S. Delegate for the 21st Session of the CCFO, Dr. Dennis Keefe (see **ADDRESSES**). Written comments should state that they relate to activities of the 21st Session of the CCFO.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce it online through the FSIS Web page located at *http://www.fsis.usda.gov/regulations/2008_Notices_Index/*.

FSIS will also make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to constituents and stakeholders. The Update is communicated via Listserv, a free electronic mail subscription service for

industry, trade groups, consumer interest groups, health professionals, and other individuals who have asked to be included. The Update is also available on the FSIS Web page. Through the Listserv and Web page, FSIS is able to provide information to a much broader and more diverse audience. In addition, FSIS offers an e-mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at *http://www.fsis.usda.gov/news_and_events/email_subscription/*. Options range from recalls to export information to regulations, directives and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

Done at Washington, DC on December 12, 2008.

Paulo Almeida,

Associate U.S. Manager for Codex Alimentarius.

[FR Doc. E8–30004 Filed 12–17–08; 8:45 am]

BILLING CODE 3410–DM–P

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Firms for Determination of Eligibility To Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration, Department of Commerce

ACTION: Notice and Opportunity for Public Comment.

Pursuant to Section 251 of the Trade Act of 1974 (19 U.S.C. 2341 *et seq.*), the Economic Development Administration (EDA) has received petitions for certification of eligibility to apply for Trade Adjustment Assistance from the firms listed below. EDA has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to the total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

LIST OF PETITIONS RECEIVED BY EDA FOR CERTIFICATION OF ELIGIBILITY TO APPLY FOR TRADE ADJUSTMENT 10/30/2008 THROUGH 12/11/2008

Firm	Address	Date accepted for filing	Products
Iceberg Enterprises, LLC	1300 W. Higgins Road, Park Ridge, IL 60068.	10/30/2008	Plastic tables, chairs, cabinets and related office products.
Thorock Metals, Inc.	435 Weber Avenue, Compton, CA	12/9/2008	Alloyed aluminum ingots (RSI, or Recycled Secondary Ingots).
TechniQuip Corp.	5653 Stoneridge Drive, Pleasanton, CA 94588–90223.	12/11/2008	Fiber optic illumination devices and fluorescent ring lights.
Misty Mountain Threadworks, Inc.	718 Burma Road, Banner Elk, NC 28604	12/11/2008	Recreational mountain climbing gear, including waist/body harnesses, boulder pads, slings, chalk bags and tool bags.

Any party having a substantial interest in these proceedings may request a public hearing on the matter. A written request for a hearing must be submitted to the Office of Performance Evaluation, Room 7009, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than ten (10) calendar days following publication of this notice. Please follow the procedures set forth in Section 315.9 of EDA's final rule (71 FR 56704) for procedures for requesting a public hearing. The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: December 12, 2008.

William P. Kittredge,

Program Officer for TAA.

Brake Rotors From the People's Republic of China: Notice of Extension of Time Limit for Preliminary Results of the Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Brian Smith or Terre Keaton Stefanova, AD/CVD Operations, Office 2, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone; (202) 482–1766 or (202) 482–1280, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 4, 2008, the Department of Commerce (the Department) published in the **Federal Register** a notice of initiation of the administrative review of the antidumping duty order on brake rotors from the People's Republic of China (PRC) covering the period April 1, 2007, through March 31, 2008. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 73 FR 31813 (June 4, 2008). On June 25, 2008, the Department published a notice of revocation of the antidumping duty order on brake rotors from the PRC effective August 14, 2007 (*see Brake Rotors From the People's Republic of China: Revocation of Antidumping Duty Order Pursuant to Second Five-year (Sunset) Review*, 73 FR 36039 (June 25, 2008)). As a result of the revocation of the order, the period of review (POR) was changed from April 1, 2007, through March 31, 2008, to April 1, 2007, through August 13, 2007 (*see* June 27, 2009 Memorandum to The File titled ''Change in the Period of Review'').

On July 29, 2008, we selected Longkou Haimeng Machinery Co., Ltd (Longkou Haimeng) and Yantai Winhere Auto–Part Manufacturing (Yantai Winhere) as the mandatory respondents

in this administrative review. *See* the July 29, 2008, Memorandum from The Team to James Maeder, Office Director, titled ''2007 Antidumping Duty Administrative Review of Brake Rotors from the People's Republic of China: Selection of Respondents for Individual Review.''

In July and August 2008, several companies, including Longkou Haimeng, timely withdrew their requests for review. We partially rescinded the review with respect to these companies. *See Brake Rotors From the People's Republic of China: Notice of Partial Rescission of Antidumping Duty Administrative Review*, 73 FR 53193 (September 15, 2008).

Extension of Time Limit of Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to make a preliminary determination in an administrative review within 245 days after the last day of the anniversary month of an order or finding for which a review is requested. If it is not practicable to complete the review within this time period, section 751(a)(3)(A) of the Act allows the Department to extend this deadline to a maximum of 365 days. The deadline for the preliminary results of this review is currently December 31, 2008.

In this review, the interested parties have not submitted publicly available information (PAI) for consideration in valuing the factors of production in the preliminary results. Moreover, we have requested and received documentation from U.S. Customs and Border Protection (CBP) for certain entries made by exporter/producer combinations which are also included in this review to determine whether those entries are non–subject merchandise. Therefore, the Department requires additional time to obtain updated PAI and analyze the entry data from CBP. Thus, it is not practicable to complete this review within the original time limit. Therefore, the Department is partially extending the time limit for completion of the preliminary results from 245 days to 306 days, in accordance with section 751(a)(3)(A) the Act. The preliminary results are now due no later than March 2, 2009. The final results continue to be due 120 days after the publication of the preliminary results.

We are issuing and publishing this notice in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

Dated: December 11, 2008.

Stephen J. Claeys,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

International Trade Administration

(A–122–840)

Carbon and Certain Alloy Steel Wire Rod from Canada: Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On July 10, 2008, the Department of Commerce (Department) published the preliminary results of the administrative review of the antidumping duty order on carbon and certain alloy steel wire rod from Canada. *See Notice of Preliminary Results of Antidumping Duty Administrative Review: Carbon and Certain Alloy Steel Wire Rod From Canada*, 73 FR 39646 (July 10, 2008) (*Preliminary Results*). This review covers the period October 1, 2006, through September 30, 2007, for Ivaco Rolling Mills 2004 L.P. and Sivaco Ontario, a division of Sivaco Wire Group 2004 L.P. (referred to collectively as Ivaco).

EFFECTIVE DATE: December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Steve Bezirganian or Robert James, AD/CVD Operations, Office 7, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–1131 or (202) 482–0649, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 10, 2008, the Department published the preliminary results of this administrative review of the antidumping duty order on carbon and certain alloy steel wire rod from Canada. *See Preliminary Results*, 73 FR 39646. Ivaco submitted its case brief on August 11, 2008, and petitioners, ISG Georgetown Inc., Gerdau Ameristeel U.S. Inc., Nucor Steel Connecticut Inc., Keystone Consolidated Industries, Inc., and Rocky Mountain Steel Mills, submitted their rebuttal brief on August 18, 2008. No hearing was requested. The Department extended the deadline for completion of the final results by 35 days, to December 12, 2008. *See Carbon and Certain Alloy Steel Wire Rod From Canada: Extension of Time Limit for Final Results of Antidumping Duty Administrative Review*, 73 FR 63134 (October 23, 2008).

Period of Review

The period of review is October 1, 2006 through September 30, 2007.

Scope of the Order

The merchandise subject to the order is certain hot–rolled products of carbon steel and alloy steel, in coils, of approximately round cross section, 5.00 mm or more, but less than 19.00 mm, in solid cross-sectional diameter.

Specifically excluded are steel products possessing the above–noted physical characteristics and meeting the Harmonized Tariff Schedule of the United States (''HTSUS'') definitions for (a) stainless steel; (b) tool steel; (c) high nickel steel; (d) ball bearing steel; and (e) concrete reinforcing bars and rods. Also excluded are (f) free machining steel products (i.e., products that contain by weight one or more of the following elements: 0.03 percent or more of lead, 0.05 percent or more of bismuth, 0.08 percent or more of sulfur, more than 0.04 percent of phosphorus, more than 0.05 percent of selenium, or more than 0.01 percent of tellurium).

Also excluded from the scope are 1080 grade tire cord quality wire rod and 1080 grade tire bead quality wire rod. Grade 1080 tire cord quality rod is defined as: (i) Grade 1080 tire cord quality wire rod measuring 5.0 mm or more but not more than 6.0 mm in cross-sectional diameter; (ii) with an average partial decarburization of no more than 70 microns in depth (maximum individual 200 microns); (iii) having no non–deformable inclusions greater than 20 microns and no deformable inclusions greater than 35 microns; (iv) having a carbon segregation per heat average of 3.0 or better using European Method NFA 04–114; (v) having a surface quality with no surface defects of a length greater than 0.15 mm; (vi) capable of being drawn to a diameter of 0.30 mm or less with 3 or fewer breaks per ton, and (vii) containing by weight the following elements in the proportions shown: (1) 0.78 percent or more of carbon, (2) less than 0.01 percent of aluminum, (3) 0.040 percent or less, in the aggregate, of phosphorus and sulfur, (4) 0.006 percent or less of nitrogen, and (5) not more than 0.15 percent, in the aggregate, of copper, nickel and chromium.

Grade 1080 tire bead quality rod is defined as: (i) Grade 1080 tire bead quality wire rod measuring 5.5 mm or more but not more than 7.0 mm in

cross-sectional diameter; (ii) with an average partial decarburization of no more than 70 microns in depth (maximum individual 200 microns); (iii) having no non–deformable inclusions greater than 20 microns and no deformable inclusions greater than 35 microns; (iv) having a carbon segregation per heat average of 3.0 or better using European Method NFA 04–114; (v) having a surface quality with no surface defects of a length greater than 0.2 mm; (vi) capable of being drawn to a diameter of 0.78 mm or larger with 0.5 or fewer breaks per ton; and (vii) containing by weight the following elements in the proportions shown: (1) 0.78 percent or more of carbon, (2) less than 0.01 percent of soluble aluminum, (3) 0.040 percent or less, in the aggregate, of phosphorus and sulfur, (4) 0.008 percent or less of nitrogen, and (5) either not more than 0.15 percent, in the aggregate, of copper, nickel and chromium (if chromium is not specified), or not more than 0.10 percent in the aggregate of copper and nickel and a chromium content of 0.24 to 0.30 percent (if chromium is specified).

For purposes of the grade 1080 tire cord quality wire rod and the grade 1080 tire bead quality wire rod, an inclusion will be considered to be deformable if its ratio of length (measured along the axis—that is, the direction of rolling—of the rod) over thickness (measured on the same inclusion in a direction perpendicular to the axis of the rod) is equal to or greater than three. The size of an inclusion for purposes of the 20 microns and 35 microns limitations is the measurement of the largest dimension observed on a longitudinal section measured in a direction perpendicular to the axis of the rod.

The designation of the products as ''tire cord quality'' or ''tire bead quality'' indicates the acceptability of the product for use in the production of tire cord, tire bead, or wire for use in other rubber reinforcement applications such as hose wire. These quality designations are presumed to indicate that these products are being used in tire cord, tire bead, and other rubber reinforcement applications, and such merchandise intended for the tire cord, tire bead, or other rubber reinforcement applications is not included in the scope. However, should petitioners or other interested parties provide a reasonable basis to believe or suspect that there exists a pattern of importation of such products for other than those applications, end–use certification for the importation of such products may be required. Under such circumstances, only the importers of record would normally be required to certify the end use of the imported merchandise.

All products meeting the physical description of subject merchandise that are not specifically excluded are included in this scope. The products subject to this order are currently classifiable under subheadings 7213.91.3011, 7213.91.3015, 7213.91.3092, 7213.91.4500, 7213.91.6000, 7213.99.0030, 7213.99.0090, 7227.20.0000, 7227.90.6010, and 7227.90.6080 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this order is dispositive.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to this administrative review are addressed in the Issues and Decision Memorandum from Gary Taverman, Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, dated December 11, 2008 (Decision Memorandum), which is hereby adopted by this notice. A list of the issues parties have raised and to which we have responded, all of which are in the Decision Memorandum (and, for the level of trade issue, in a separate proprietary document referenced in the Decision Memorandum), is attached to this notice as an appendix. Parties can find a discussion of all public issues raised in this review and the corresponding recommendations in this public memorandum, which is on file in the Central Records Unit in room 1117 of the main Department building. In addition, a complete version of the Decision Memorandum can be accessed directly via the Internet at http://ia.ita.doc.gov/frn. The paper copy and electronic version of the Decision Memorandum are identical in content.

Changes Since the Preliminary Results

Based on our analysis of the comments received, we have not made any changes to the calculations in our preliminary results.

Final Results of Review

We determine the following weighted–average percentage margin exists for the period October 1, 2006, through September 30, 2007:

Manufacturer/Exporter	Weighted Average Margin
Ivaco Rolling Mills 2004 L.P. / Sivaco Ontario, a division of Sivaco Wire Group 2004 L.P.	2.33 percent

Assessment

The Department will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries, pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.212(b). The Department calculated an assessment rate for each importer of the subject merchandise covered by the review. Upon issuance of the final results of this review, for the importer–specific assessment rate calculated in the final results that is above *de minimis (i.e.*, at or above 0.50 percent), we will issue assessment instructions directly to CBP to assess antidumping duties on appropriate entries by applying the assessment rate to the entered value of the merchandise. Pursuant to 19 CFR 356.8(a), the Department intends to issue assessment instructions to CBP 41 days after the date of publication of these final results of review.

The Department clarified its ''automatic assessment'' regulation on May 6, 2003. *See Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003). This clarification will apply to entries of subject merchandise during the period of review produced by Ivaco for which Ivaco did not know the merchandise was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the 8.11 percent all–others rate if there is no company–specific rate for an intermediary involved in the transaction. *See id.*

Cash Deposit Requirements

The Department has revoked this order, effective October 29, 2007. *See Revocation of Antidumping Duty Order on Carbon and Certain Alloy Steel Wire Rod from Canada*, 73 FR 44223 (July 30, 2008). Therefore, there is no need to issue new cash deposit instructions for this administrative review.

Notification to Interested Parties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

This notice also serves as a reminder to parties subject to administrative

protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: December 11, 2008.

Ronald K. Lorentzen,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Policy and Negotiations.

International Trade Administration

(A–588–046)

Polychloroprene Rubber From Japan: Final Results of Changed Circumstances Review and Determination To Revoke Antidumping Duty Finding, in Part

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On September 29, 2008, the Department of Commerce (the Department) published a notice of initiation and preliminary results of a changed circumstances review with intent to revoke, in part, the antidumping duty (AD) finding on polychloroprene rubber from Japan. *See Polychloroprene Rubber From Japan: Initiation and Preliminary Results of Changed Circumstances Review, and Intent to Revoke Antidumping Duty Finding, in Part*, 73 FR 56548 (September 29, 2008) (*Initiation and Preliminary Results*). On October 27, 2008, the **Federal Register** corrected certain errors it made in publishing the Initiation and Preliminary Results. *See Polychloroprene Rubber From Japan: Initiation and Preliminary Results of Changed Circumstances Review, and Intent to Revoke Antidumping Duty Finding, in Part*, 73 FR 63687 (October 27, 2008) (*Initiation Correction*).

In the *Initiation and Preliminary Results* and *Initiation Correction*, the Department invited interested parties to comment on the *Initiation and Preliminary Results* and no comments were received. Accordingly, we are now revoking this AD finding, in part, with regard to certain polychloroprene rubber products from Japan, as described in the ''Scope of Changed Circumstances Review'' section of this notice, based on the fact that domestic parties have expressed no further interest in the relief provided by the AD finding with respect to the imports of such products.

EFFECTIVE DATE: December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Summer Avery, AD/CVD Operations, Office 6, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington DC 20230; telephone: (202) 482–4052.

SUPPLEMENTARY INFORMATION:

Background

On August 4, 2008, the Department received a request on behalf of the petitioner, DuPont Performance Elastomers L.L.C. (DPE),[1] for revocation, in part, of the AD finding on polychloroprene rubber from Japan pursuant to sections 751(b)(1) and 782(h) of the Tariff Act of 1930, as amended (the Act). DPE requested partial revocation of the AD finding with respect to certain polychloroprene rubber products, listed below in the section entitled ''Scope of Changed Circumstances Review.'' In its August 4, 2008 submission, DPE stated that it no longer has any interest in antidumping relief from imports of such polychloroprene rubber from Japan. On September 29, 2008, the Department published a notice of initiation and preliminary results of a changed circumstances review with intent to revoke, in part, the AD finding on polychloroprene rubber from Japan. *See Initiation and Preliminary Results*. In preparing the notice for publication, the **Federal Register** made a number of substantive errors during its technical preparation of the *Initiation and Preliminary Results* for publication. On October 27, 2008, the **Federal Register** published corrections of these errors. *See Initiation Correction*. The Department provided interested parties with a deadline to submit written comments no later than 30 days after the date of the *Initiation Correction*. The Department did not receive any comments from interested parties.

Scope of Changed Circumstances Review

The merchandise subject to DPE's request and covered by this changed circumstances review is polychloroprene rubber from Japan with aqueous dispersions of 2–chlorobutadiene–1,3 homopolymers, where the polymer content of the dispersion is between 55 weight percent and 61 weight percent and the dispersed homopolymer contains less than 10 weight percent of a tetrahydrofuran–insoluble fraction. This changed circumstances review covers polychloroprene rubber from Japan meeting the specifications as described above. Effective upon publication of these final results of changed circumstances review in the **Federal Register**, the amended scope of the AD finding will read as identified in the ''Scope of the Finding (As Amended By These Final Results of Changed Circumstances)'' section below.

Scope of the Finding (As Amended By These Final Results of Changed Circumstances)

The merchandise covered are shipments of polychloroprene rubber, an oil resistant synthetic rubber also known as polymerized chlorobutadiene or neoprene, currently classifiable under items 4002.41.00, 4002.49.00, and 4003.00.00 of the Harmonized Tariff Schedule of the United States (HTSUS). Although HTSUS item numbers are provided for convenience and customs purpose, the Department's written description of the scope remains dispositive.

The following types of polychloroprene rubber from Japan are excluded from the scope: (1) aqueous dispersions of polychloroprenes that are dipolymers of chloroprene and methacrylic acid, where the dispersion has a pH of 8 or lower (this category is limited to aqueous dispersions of these polymers and does *not* include aqueous dispersions of these polychloroprenes that contain comonomers other than methacrylic acid); (2) aqueous dispersions of polychloroprenes that are dipolymers of chloroprene and 2,3–dichlorobutadiene–1,3 modified with xanthogen disulfides, where the

[1] DPE is the sole petitioner in this antidumping proceeding. *See Polychloroprene Rubber From Japan: Final Results of the Expedited Sunset Review of the Antidumping Duty Finding*, 69 FR 64276 (November 4, 2004). DPE has been the sole U.S. producer of polychloroprene rubber since 1998, when Bayer Group closed its polychloroprene rubber plant in Houston, Texas. *See* Polychloroprene Rubber from Japan, Inv. No. AA-1921-129 (Second Review), U.S. ITC Pub. 3786 (June 2005), at 4-5.

dispersion has a solids content of greater than 59 percent (this category is limited to aqueous dispersions of these polymers and does *not* include aqueous dispersions of polychloroprenes that contain comonomers other than 2,3–dichlorobutadiene–1,3); and (3) solid polychloroprenes that are dipolymers of chloroprene and 2,3–dichlorobutadiene–1,3 having a 2,3–dichlorobutadiene–1,3 content of 15 percent or greater (this category is limited to polychloroprenes in solid form and does not include aqueous dispersions).

In addition, the following types of polychloroprene rubber are excluded from the scope: 1) solid polychloroprenes that are dipolymers of chloroprene and methacrylic acid having methacrylic acid comonomer content in the 0.2 percent to 5.0 percent range (this category does not include aqueous chloroprene/methacrylic acid diploymer dispersion products or solvent solutions of chloroprene/methacrylic acid dipolymers),[2] and 2) aqueous dispersions of 2–chlorobutadiene–1,3 homopolymers, where the polymer content of the dispersion is between 55 weight percent and 61 weight percent and the dispersed homopolymer contains less than 10 weight percent of a tetrahydrofuran–insoluble fraction.

Final Results of Review: Partial Revocation of Antidumping Duty Finding

The affirmative statement of no interest by the petitioner concerning certain polychloroprene rubber from Japan, as described herein, constitutes changed circumstances sufficient to warrant revocation of the AD finding in part. Therefore, the Department is revoking, in part, the AD finding on polychloroprene rubber from Japan with regard to products which meet the specifications detailed above, in accordance with sections 751(b) and (d) and 782(h) of the Act and 19 CFR 351.216(d) and 351.222(g). We will instruct U.S. Customs and Border Protection to terminate the suspension of liquidation of entries of certain polychloroprene rubber, meeting the specifications indicated above, entered, or withdrawn from warehouse, for consumption on or after the date of publication in the **Federal Register** of the final results of this changed circumstances review, in accordance with 19 CFR 351.222. Entries of subject merchandise prior to the effective date of revocation will continue to be subject to suspension of liquidation and antidumping duty deposit requirements.

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.306. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply is a violation of the APO which may be subject to sanctions.

The Department is issuing this changed circumstances review, partial revocation of the AD finding, and this notice in accordance with sections 751(b) and (d), 777(i), and 782(h) of the Act and 19 CFR 351.216(e) and 351.222(g).

Dated: December 11, 2008.

Stephen J. Claeys,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Highly Migratory Species Tournament Registration and Reporting

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and the respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before February 17, 2009.

ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 7845, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Randy Blankinship, (727) 824–5399 or *Randy.Blankinship@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

Under the authorization of the Magnuson-Stevens Fishery Management and Conservation Act, National Marine Fisheries Service (NMFS) would like to renew its requirement that operators of fishing tournaments involving Highly Migratory Species (HMS), specifically Atlantic tunas, swordfish, billfish, and sharks, provide advance identification of the tournament date(s), location, operator, and target species. Also, after the tournament, provide information on the HMS that are caught, whether they were kept or released, the length and weight of the fish, and other information. Most of the data required for post-tournament reporting are already collected in the course of routine tournament operations. The data collected are needed by NMFS to estimate the total annual catch of these species and to evaluate the impact of tournament fishing in relation to other types of fishing.

II. Method of Collection

Completed paper forms are returned to NMFS, at an address or FAX number designated by NMFS on the forms.

III. Data

OMB Control Number: 0648–0323.
Form Number: None.
Type of Review: Regular submission.
Affected Public: Business or other for-profit organizations; not-for-profit institutions.
Estimated Number of Respondents: 300.
Estimated Time per Response: 2 minutes for a registration form; and 20 minutes for a tournament summary report.
Estimated Total Annual Burden Hours: 83.
Estimated Total Annual Cost to Public: $161.20 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information

on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of this information collection; they also will become a matter of public record.

Dated: December 15, 2008.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of applications for scientific research permits; request for comments.

SUMMARY: Notice is hereby given that NMFS has received applications for scientific research from Natural Resource Scientists, Incorporated (NRS), in Red Bluff, CA (14077), and from the U.S. Geological Services (USGS) in Sacramento, CA (14150). These permits would affect the federally endangered Sacramento River winter-run Chinook salmon and the threatened Central Valley spring-run Chinook salmon Evolutionarily Significant Units (ESUs), the federally threatened Central Valley steelhead Distinct Population Segment (DPS), and the federally threatened southern Distinct Population of North American green sturgeon (southern DPS of green sturgeon). This document serves to notify the public of the availability of the permit applications for review and comment.

DATES: Written comments on the permit applications must be received no later than 5 p.m. Pacific Standard Time on January 20, 2009.

ADDRESSES: Comments submitted by e-mail must be sent to the following address *FRNpermitsSAC@noaa.gov*. The applications and related documents are available for review by appointment, for permits : Protected Resources Division, NMFS, 650 Capitol Mall, Suite 8–300, Sacramento, CA 95814 (ph: 916–930–3600, fax: 916–930–3629).

FOR FURTHER INFORMATION CONTACT: Shirley Witalis telephone 916–930–3606, or e-mail: *Shirley.Witalis@noaa.gov*.

SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531 1543) (ESA), is based on a finding that such permits/modifications: (1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222–226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice

This notice is relevant to federally-listed endangered Sacramento River winter-run Chinook salmon (*Oncorhynchus tshawytscha*) ESU, threatened Central Valley spring-run Chinook salmon (*O. tshawytscha*) ESU, threatened Central Valley steelhead (*O. mykiss*) DPS, threatened Central California Coast steelhead (*O. mykiss*), and threatened southern DPS of North American green sturgeon (*Acipenser medirostris*).

Applications Received

NRS requests a 2–year permit (14077) for take of juvenile Sacramento River winter-run Chinook salmon, Central Valley spring-run Chinook salmon, Central Valley steelhead, and southern DPS of green sturgeon to conduct site-specific research at three irrigation diversion sites off the Sacramento River, California. This research is part of an on-going investigation into developing criteria for prioritizing fish screening projects, and will correlate fish entrainment with the physical, hydraulic, and habitat variables at each diversion site. All fish will be identified as to species/race, enumerated, measured for length, and placed back into the canals; all entrained live fish will be returned to the river. Sampling at each diversion site will be performed daily from April 1 through October 31, 2009, and April 1 through October 31, 2010. NRS requests authorization for an estimated annual non-lethal take of 1,466 juvenile Sacramento River winter-run Chinook salmon, 1,307 Central Valley juvenile spring-run Chinook salmon, and 155 Central Valley juvenile steelhead, for a total of 2,928 salmonids per year. NRS estimates the annual non-lethal take of 184 juvenile southern DPS of green sturgeon. Estimates of take for the two year study are 5,856 salmonids and 368 green sturgeon.

USGS, in co-sponsorship with the California Department of Water Resources, California Bay-Delta Authority, and the U.S. Bureau of Reclamation, requests a 5–year permit (14150) for take of juvenile Sacramento River winter-run Chinook salmon and Central Valley spring-run Chinook salmon associated with researching the mechanisms that control out-migration pathways and survival of endangered juvenile salmon in the Sacramento-San Joaquin Delta, California (Delta) from the interaction between seasonal timescale variations in upstream hydrology and strong tidal forcing effects from water management actions. The goals of the study are two-fold: (1) to determine the factors (channel geometry, velocity structure, and behavior) that control entrainment in the Delta Cross Channel and Georgiana Slough; and (2) to determine routes and survival of out-migrating juvenile salmon throughout the north, west and centralDelta. The primary source of study fish will be 5500 Central Valley late-fall subyearling Chinook salmon (*O. tshawytscha*) from Coleman National Fish Hatchery (CNFH). To investigate differences of behavioral response between hatchery and wild fish, an admixture of 250 juvenile winter-, spring-, fall- and late fall-run Chinook salmon will be collected from

U.S. Fish and Wildlife Service or California Department of Fish and Game rotary screw trap monitoring efforts in the Sacramento River at river mile (RM) 242 and RM 205 and transported directly to a shoreline research location or the California-Nevada Fish Health Center at the CNFH complex and held prior to being transported to shoreline research locations for surgical insertion of acoustic transmitters; a tissue sample will be collected from wild juvenile

salmon for genetic analysis. Shoreline research locations will include: (1) the Tower Bridge in Sacramento, California; and (2) the city of Ryde, California (RM 24); and Georgiana Slough. Hatchery and wild salmon will then be transported and/or released for tracking by acoustic telemetry receivers in place throughout the Delta. Fish capture and transport will begin in mid-October and continue until early February of the following year; all field activities will be completed by March of each sampling season. USGS requests authorization for an estimated take of 100 wild Sacramento River winter-run Chinook salmon and 38 Central Valley spring-run Chinook salmon, including no more than 15 percent unintentional mortality resulting from handling, transporting and holding, tissue-sampling, invasive tagging, and releasing for tracking by hydroacoustic telemetry arrays.

Dated: December 12, 2008.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN: 0648–XM29

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council will convene a public meeting of the Shrimp Advisory Panel (AP).

DATES: The Shrimp AP meeting is scheduled to begin at 8:30 a.m. on Thursday, January 8, 2009 and end by 2 p.m.

ADDRESSES: The meeting will be held at the Spring Hill Suites, 7922 Mosley Road, Houston, TX 77061.

Council address: Gulf of Mexico Fishery Management Council, 2203 North Lois Avenue, Suite 1100, Tampa, FL 33607.

FOR FURTHER INFORMATION CONTACT: Dr. Richard Leard, Interim Executive Director; telephone: (813) 348–1630.

SUPPLEMENTARY INFORMATION: The Shrimp AP will receive a presentation of the ''Biological Review of the 2008 Texas Closure and Percent Change in Yield'' and consider recommendations for a cooperative closure with Texas in 2009. The Shrimp AP will also receive presentations of the ''Status and Health of the Shrimp Stocks for 2007'', the ''Stock Assessment Report 2007'', ''A Biological Review of the Tortugas Pink Shrimp Fishery Through December 2007'', and a Report on the Number of Moratorium Permits Issued and Preliminary Effort Estimates for 2008. The Shrimp AP may make recommendations regarding these reports.

Although other non-emergency issues not on the agenda may come before the Shrimp AP for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during these meetings. Actions of the Shrimp AP will be restricted to those issues specifically identified in the agenda and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take action to address the emergency.

Copies of the agenda can be obtained by calling (813) 348–1630.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Tina O'Hern at the Council (see **ADDRESSES**) at least 5 working days prior to the meeting.

Dated: December 15, 2008.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Pacific Fishery Management Council; Public Meetings and Hearings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of reports; public meetings, and hearings.

SUMMARY: The Pacific Fishery Management Council (Council) has begun its annual preseason management process for the 2009 ocean salmon fisheries. This document announces the availability of Council documents as well as the dates and locations of Council meetings and public hearings comprising the Council's complete schedule of events for determining the annual proposed and final modifications to ocean salmon fishery management measures. The agendas for the March and April 2009 Council meetings will be published in subsequent **Federal Register** documents prior to the actual meetings.

DATES: Written comments on the salmon management options must be received by March 31, 2009, at 4:30 p.m. Pacific Time.

ADDRESSES: Documents will be available from, and written comments should be sent to, Mr. Donald Hansen, Chairman, Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384, telephone: (503) 820–2280 (voice) or (503) 820–2299 (fax). Comments can also be submitted via e-mail at *PFMC.comments@noaa.gov*. address, or through the internet at the Federal eRulemaking Portal: *http://www.regulations.gov*. Follow the instructions for submitting comments, and include the I.D. number in the subject line of the message. For specific meeting and hearing locations, see **SUPPLEMENTARY INFORMATION**.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT: Mr. Chuck Tracy, telephone: (503) 820–2280.

SUPPLEMENTARY INFORMATION:

Schedule for Document Completion and Availability

February 26, 2009: ''Review of 2008 Ocean Salmon Fisheries'' and ''Preseason Report I-Stock Abundance Analysis for 2009 Ocean Salmon Fisheries'' will be mailed to the public and posted on the Council website at *http://www.pcouncil.org*.

March 22, 2009: ''Preseason Report II-Analysis of Proposed Regulatory Options for 2009 Ocean Salmon Fisheries'' and public hearing schedule will be mailed to the public and posted on the Council website at *http://www.pcouncil.org*. The report will include a description of the adopted salmon management options and a summary of their biological and economic impacts.

April 24, 2009: ''Preseason Report III-Analysis of Council-Adopted Ocean

Salmon Management Measures for 2009 Ocean Salmon Fisheries'' will be mailed to the public and posted on the Council website at *http://www.pcouncil.org*.

May 1, 2009: Federal regulations for 2009 ocean salmon regulations will be published in the **Federal Register** and implemented.

Meetings and Hearings

January 20–23, 2009: The Salmon Technical Team (STT) will meet at the Council office in a public work session to draft ''Review of 2008 Ocean Salmon Fisheries'' and to consider any other estimation or methodology issues pertinent to the 2009 ocean salmon fisheries.

February 17–20, 2009: The STT will meet at the Council office in a public work session to draft ''Preseason Report I-Stock Abundance Analysis for 2009 Ocean Salmon Fisheries'' and to consider any other estimation or methodology issues pertinent to the 2009 ocean salmon fisheries.

March 30–31, 2009: Public hearings will be held to receive comments on the proposed ocean salmon fishery management options adopted by the Council. All public hearings begin at 7 p.m. at the following locations:

March 30, 2009: Chateau Westport, Beach Room, 710 W Hancock, Westport, WA 98595, telephone: (360) 268–9101;

March 30, 2009: Red Lion Hotel, Umpqua Room, 1313 N Bayshore Drive, Coos Bay, OR 97420, telephone: (541) 269–4099; and

March 31, 2009: Red Lion Eureka, Evergreen Room, 1929 Fourth Street, Eureka, CA 95501, telephone: (707) 445–0844.

Although non emergency issues not contained in the STT meeting agendas may come before the STT for discussion, those issues may not be the subject of formal STT action during these meetings. STT action will be restricted to those issues specifically listed in this document and to any issues arising after publication of this document requiring emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the STT's intent to take final action to address the emergency.

Special Accommodations

The meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Ms. Carolyn Porter at (503) 820–2280 (voice), or (503) 820–2299 (fax) at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 et. seq.

Dated: December 15, 2008.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Small Takes of Marine Mammals Incidental to Specified Activities; Seabird and Pinniped Research Activities in Central California

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with provisions of the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that an Incidental Harassment Authorization (IHA) to PRBO Conservation Science (PRBO) to take small numbers of marine mammals, by Level B behavioral harassment only, incidental to conducting seabird and pinniped research in central California.

DATES: This authorization is effective from December 12, 2008, through December 11, 2009.

ADDRESSES: A copy of the IHA and the application are available by writing to P. Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910–3225, or by contacting one of the individuals listed here (**FOR FURTHER INFORMATION CONTACT**), or online at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm*. Documents cited in this notice may be viewed, by appointment, during regular business hours, at the aforementioned address and at the Southwest Region, NMFS, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802.

FOR FURTHER INFORMATION CONTACT: Jeannine Cody or Jaclyn Daly, Office of Protected Resources, NMFS, (301) 713–2289, or Monica DeAngelis, Southwest Regional Office, NMFS, (562) 980–4023.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by United States citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, notice of a proposed authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), and will not have an unmitigable adverse impact on the availability of the species or stock(s) for certain subsistence uses, and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring, and reporting of such taking are set forth.

NMFS has defined ''negligible impact'' in 50 CFR 216.103 as:

> ..an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the United States can apply for an authorization to incidentally take small numbers of marine mammals by harassment. Except for certain categories of activities not pertinent here, the MMPA defines ''harassment'' as:

> any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [''Level A harassment'']; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [''Level B harassment''].

Section 101(a)(5)(D) establishes a 45–day time limit for NMFS' review of an application followed by a 30–day public notice and comment period on any proposed authorizations for the incidental harassment of small numbers of marine mammals. Within 45 days of the close of the comment period, NMFS must either issue or deny the authorization.

Summary of Request

On July 28, 2008, NMFS received an application from PRBO requesting an authorization for the harassment of small numbers of California sea lions (*Zalophus californianus*), Pacific harbor seals (*Phoca vitulina richardsi*), northern elephant seals (*Mirounga angustirostris*), and Steller sea lions (*Eumetopias jubatus*) incidental to

conducting seabird and pinniped research operations on Southeast Farallon Island, Ano Nuevo Island, and Point Reyes National Seashore in central California. A detailed description of the activity is provided in the September 29, 2008, **Federal Register** notice (73 FR 56556), therefore, it is not repeated here.

Comments and Responses

A notice of receipt and request for 30–day public comment on the application and proposed authorization was published on September 29, 2008 (73 FR 56556). During the 30–day public comment period, NMFS received comments from the Marine Mammal Commission (Commission).

Comment: The Commission recommends that any authorization issued specify that, if a mortality or serious injury of a marine mammal occurs that appears to be related to the research, PRBO must suspend research activities while NMFS determines whether steps can be taken to avoid further injuries or mortalities or until NMFS would potentially authorize such taking by regulations promulgated under section 101(a)(5)(A) of the MMPA.

*Response:*NMFS agrees with the Commission that research activities must be suspended immediately if a dead or injured marine mammal is found in the vicinity of the project area and the death or injury of the animal could be attributable to the applicant's activities. This requirement is a condition in the IHA.

Description of the Marine Mammals Potentially Affected by the Activity

The marine mammals most likely to be harassed incidental to conducting seabird research at the proposed research areas on Southeast Farallon Island, Ano Nuevo Island, and Point Reyes National Seashore are primarily California sea lions, northern elephant seals, Pacific harbor seals, and to a lesser extent Steller sea lions.

The marine mammals most likely to be harassed incidental to conducting pinniped research conducted under NMFS Scientific Research Permit (SRP) 373–1868–00 are harbor seals, northern elephant seals, California sea lions, Steller sea lions and northern fur seals. However, directed take of elephant seals, harbor seals, California sea lions, and northern fur seals is authorized by SRP 373–1868–00.

General information of these species can be found in Caretta et al. (2008) and is available at the following URL: *http://www.nmfs.noaa.gov/pr/pdfs/sars/po2007.pdf*. Additional information on these species is provided in the September 29, 2008, **Federal Register** notice (73 FR 56556). Refer to these documents for information on these species.

Potential Effects on Marine Mammals

The only anticipated impacts would be temporary disturbances caused by the appearance of researchers near the pinnipeds. Incidental harassment may occur as researchers approach the haul-out sites with vessels, pedestrian approach to bird nesting sites, and during capture and sampling activities of harbor seals and northern elephant seals. The potential disturbance might alter pinniped behavior and may cause animals to flush from the area. Animals may return to the same site once researchers have left or go to an alternate haul out site, which usually occurs within 30 minutes (Allen *et al.*, 1985).

Long-term effects of this disturbance are unlikely, as the activities are not conducted in breeding areas for marine mammals and very few breeding animals will be present in the vicinity of the proposed seabird and pinniped research areas. No research would occur on pinniped rookeries; therefore, mother and pup separation or crushing of pups is not a concern.

Potential Impacts on Habitat

NMFS has designated critical habitat for the Steller sea lion around Southeast Farallon Island and Ano Nuevo Island, extending from these two rookeries to 3,000 feet offshore. Neither the proposed seabird research, nor the proposed pinniped research would result in the physical altering of marine mammal habitat. The proposed action will not impact any habitat on the islands and is not likely to result in the destruction or adverse modification of Steller sea lion critical habitat or to the food sources that they use. This project will have negligible impacts to any haul-out sites, rafting sites, forage sites, or food resources in the action area and therefore is not likely to adversely affect designated critical habitat.

Incidental marine mammal takes will not result in the physical altering of major breeding habitat. No survey or sampling equipment will be left in habitat areas; no toxic chemicals will be present; and all state and federal marine regulations, including those from National Marine Sanctuaries, will be followed in regards to boat emissions.

Potential Impacts to Subsistence Harvest of Marine Mammals

There is no subsistence harvest of marine mammals in the proposed research area; therefore, there will be no impact of the activity on the availability of the species or stocks of marine mammals for subsistence uses.

Number of Marine Mammals Expected to Be Taken

It is estimated that approximately 2,242 California sea lions, 418 harbor seals, 253 northern elephant seals, and 20 Steller sea lions could be potentially affected by Level B behavioral harassment. This estimate is based on previous research experiences, with the same activities conducted in the proposed research area, and on marine mammal research activities in these areas. These incidental harassment take numbers represent approximately one percent of the U.S. stock of California sea lion, 1.2 percent of the California stock of Pacific harbor seal, less than one percent of the California breeding stock of northern elephant seal, and 0.04 percent of the eastern U.S. stock of Steller sea lion. All of the potential takes are expected to be Level B behavioral harassment only. No injury or mortality to pinnipeds is expected or requested.

Mitigation Measures

PRBO researchers would take all possible measures to reduce marine mammal disturbance for the activities described in the Summary of Request and in the **Federal Register** notice of receipt (73 FR 56556, September 29, 2008).

To reduce the potential for disturbance from visual and acoustic stimuli associated with seabird and pinniped research activities, PRBO proposes to undertake the following mitigation measures: (1) abide by the Terms and Conditions of the Biological Opinion's Incidental Take Statement; (2) continue to abide by the Terms and Conditions of Scientific Research Permit 373–1868–00; (3) plan to minimize the potential for disturbance (to the lowest level practicable) near known pinniped haul-outs by boat travel and pedestrian approach during pinniped and seabird research operations; (4) conduct research activities during the planned dates stated in the application; (5) to the extent possible, be careful in the route of approach during beach landings; (6) attempt beach landings on Ano Nuevo Island only after any pinnipeds that might be present on the landing beach have entered the water; (7) select a pathway of approach to research sites that minimizes the number of marine mammals harassed, with the first priority being avoiding the disturbance of Steller sea lions at haul outs; (8) monitor for offshore predators and not approach hauled out Stellar sea lions if

great white sharks or killer whales are seen in the area, and if predators are seen, eastern Steller sea lions must not be disturbed until the area is free of predators; (9) keep voices hushed and bodies low in the visual presence of pinnipeds; (10) conduct seabird observations at North Landing on Southeast Farallon Island within an observation blind to remain shielded from the view of hauled out pinnipeds; (11) crawl slowly towards seabird nesting boxes on Ano Nuevo Island if pinnipeds are within the researchers' field of vision; (12) coordinate visits for seabird and pinniped research to intertidal areas of Southeast Farallon Island to reduce potential take; (13) coordinate all research goals on Ano Nuevo Island to minimize the number of trips to the island and coordinate monitoring schedules so that areas near any pinnipeds would be accessed only once per visit; and (14) the lead biologist will serve as an observer to evaluate incidental take and halt any research activities should the potential for incidental take become too great.

Monitoring

PRBO researchers, and their designees would: (1) record the date, time, and location (or closest point of ingress) of each visit; (2) record marine mammal behavior patterns observed before, during, and after the activities; (3) record the number of Steller sea lions present at each location; (4) if applicable, note the presence of any offshore predators (date, time, number, species).

Reporting

PRBO, and its designees, will submit a draft final report to NMFS within 90 days after the expiration of the IHA and will submit a final report to NMFS within 30 days after receiving comments from NMFS on the draft final report.

National Environmental Policy Act (NEPA)

In 2007, NMFS prepared a draft Environmental Assessment (EA) on the issuance of an IHA to PRBO to take marine mammals by Level B behavioral harassment incidental to conducting seabird research in central California. The draft EA was released for public review and comment along with the application and the proposed IHA (72 FR 41294, July 27, 2007). All comments were addressed in full in the **Federal Register** Notice of Issuance of an IHA for PRBO (72 FR 71121, December 14, 2007). At that time, NMFS determined that conducting the seabird research would not have a significant impact on the quality of the human environment and issued a Finding of No Significant Impact (FONSI).

For this proposed action, PRBO has requested to incidentally harass 20 Steller sea lions, (i.e., 4 more than what was analyzed in the 2007 EA, which expands the scope of the previously analyzed action) during the conduct of pinniped and seabird research. Thus, NMFS has prepared a supplemental EA (SEA) to address new available information regarding the effects of PRBO's seabird and pinniped research activities that may have cumulative impacts to the physical and biological environment. NMFS has issued a FONSI for the SEA regarding PRBO's activities. The analysis in the 2007 EA and 2008 SEA concluded that issuance of an IHA would not significantly affect the quality of the human environment. In addition, all beneficial and adverse impacts of the action have been addressed to reach the conclusion of no significant impacts. Accordingly, preparation of an Environmental Impact Statement for this action is not necessary.

Endangered Species Act (ESA)

NMFS Headquarters' Office of Protected Resources, Permits, Conservation, and Education Division conducted a section 7 consultation under the ESA with the NMFS Headquarters' Office of Protected Resources, Endangered Species Division. On November 18, 2008, NMFS issued a Biological Opinion and concluded that the issuance of an IHA is likely to affect, but not likely to jeopardize the continued existence of Steller sea lions. NMFS has also issued an incidental take statement (ITS) for Steller sea lions pursuant to section 7 of the ESA. The ITS contains reasonable and prudent measures for implementing terms and conditions to minimize the effects of this take.

Determinations

For the reasons discussed in this document and in the identified supporting documents, NMFS has determined that the impact of seabird and pinniped research operations on Southeast Farallon Island, Ano Nuevo Island, and Point Reyes National Seashore in central California would result in Level B behavioral harassment only, of small numbers of California sea lions, Pacific harbor seals, northern elephant seals, and Steller sea lions hauled out in the vicinity of the research area; and would have a negligible impact on the affected species. The provision requiring that the activities not have an unmitigable adverse impact on the availability of the affected species or stock for subsistence uses does not apply for this proposed action.

In addition, no take by Level A harassment (injury) or death is anticipated and harassment takes should be at the lowest level practicable due to incorporation of the mitigation measures described in this document.

Authorization

NMFS has issued an IHA to PRBO, and its designees, for the potential harassment of small numbers of California sea lions, harbor seals, northern elephant seals, and Steller sea lions incidental to conducting of seabird and pinniped research on Southeast Farallon Island, Ano Nuevo Island, and Point Reyes National Seashore, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Dated: December 15, 2008.

RIN 0648–AX32

Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to the Port of Anchorage Marine Terminal Redevelopment Project

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for rulemaking and subsequent letter of authorization; request for comments and information.

SUMMARY: NMFS has received a request from the Port of Anchorage (Port) and the U.S. Department of Transportation Maritime Administration (MARAD) for authorization to take marine mammals incidental to the Port's Marine Terminal Redevelopment Project (Project) for the period of July 2009 through July 2014. Pursuant to Marine Mammal Protection Act (MMPA) implementing regulations, NMFS is announcing receipt of the Port's request for the development and implementation of regulations governing the incidental taking of marine mammals and inviting information, suggestions, and comments on the Port's application and request.

DATES: Comments and information must be received no later than January 20, 2009.

ADDRESSES: Comments on the application should be addressed to P. Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3225. The mailbox address for providing email comments is *PR1.0648-AX32@noaa.gov*. Comments sent via e-mail, including all attachments, must not exceed a 10-megabyte file size.

FOR FURTHER INFORMATION CONTACT: Jaclyn Daly, Office of Protected Resources, NMFS, (301) 713–2289.

SUPPLEMENTARY INFORMATION:

Availability

A copy of the Port's application may be obtained by writing to the address specified above (see **ADDRESSES**), telephoning the contact listed above (see **FOR FURTHER INFORMATION CONTACT**), or visiting the internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm#application*.

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 et seq.) direct the Secretary of Commerce (Secretary) to allow, upon request, the incidental, but not intentional taking of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) if certain findings are made and regulations are issued or, if the taking is limited to harassment, notice of a proposed authorization is provided to the public for review.

Authorization for incidental takings may be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for certain subsistence uses, and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such taking are set forth.

NMFS has defined ''negligible impact'' in 50 CFR 216.103 as:

an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.Summary of Request

Summary of Request

On November 20, 2008, NMFS received an application from the Port and MARAD requesting authorization for the take of four species of marine mammals incidental to construction activities related to Port expansion, over the course of 5 years. According to the application, the existing dock can no longer be widened nor salvaged due to its advanced age and state of disrepair. The dock supporting the three cranes today was completed in 1961 and its projected life expectancy was 25-30 years. Construction necessitates use of impact and vibratory pile drivers to install open cell sheet, 36 inch steal, and H- piles to construct the waterfront bulkhead structure that will facilitate increased dock space and the fendering system. In-water pile driving would occur during spring, summer, and fall months, annually, until the new port is completed. Demolition involving a chipping hammer is the likely method for removing the present dock; however, blasting may also be required.

The new dock face will include 7,430 ft (2,265 m) of vertical sheet pile wharf and 470 ft (143 m) for a dry barge berth; however, the entire sheet pile wall will extend 9,893 ft (3,015 m) parallel to the shore. The completed marine terminal will include seven modern dedicated ship berths; two dedicated barge berths; rail access; modern shore-side facilities; equipment to accommodate cruise passengers, cement bulk, roll on/roll off and load on/load off cargo, containers, general cargo, Stryker Brigade Combat Team deployments, general cargo on barges, and petroleum, oils, and lubricants; and additional land area to support expanding military and commercial operations.

Harassment to marine mammals could occur from in-water pile driving and during demolition of the existing dock. In 2008, NMFS issued the Port and MARAD a one-year Incidental Harassment Authorization (IHA) authorizing harassment of Cook Inlet beluga whales (*Delphinapterus leucas*), harbor porpoises (*Phocoena phocoena*), killer whales (*Orcinus orca*), and harbor seals (*Phoca vitulina*). Included in the conditions are mitigation and monitoring measures. Monitoring reports collected under this IHA will provide valuable marine mammal, specifically beluga whale, presence/absence, temporal, group size and composition, and behavioral data as well as any observed effects from exposure to pile driving noise.

NMFS prepared an *Environmental Assessment on the Issuance of an Incidental Harassment Authorization and Subsequent Rulemaking for Take of Small Numbers of Marine Mammals Incidental to the Port of Anchorage Terminal Redevelopment Project, Anchorage, Alaska* for its issuance of the 2008 IHA, which analyzes and discusses potential impacts on marine mammals and their habitat from the specified activity. In summary, harassment from pile driving associated with the Project may result in short-term, mild to moderate behavioral and physiological responses but will not exceed Level B harassment due to animals' natural reaction to avoid loud sounds and implementation of mitigation measures (e.g., mandatory shut downs). Anticipated behavioral reactions of marine mammals include altered headings, fast swimming, changes in dive, surfacing, respiration, and feeding patterns, and changes in vocalizations. Physiologically, increased stress hormone production may occur. In its analysis for issuance of the IHA, NMFS determined harassment would be limited to Level B, will have a negligible impact on affected marine mammal species or stocks, and will not have an unmitigable adverse impact on the availability of such species or stock for taking for subsistence purposes. To date, monitoring reports have indicated no adverse reactions or abrupt change in behavior of beluga whales to in-water pile driving operations.

Demolition activities will also be subject to monitoring and mitigation measuresthat are likely to be similar to those for pile driving (e.g., establishment of safety zones, shut down procedures, etc.). NMFS intends to prepare a supplemental EA to analyze impacts from demolition and establishment of modified, extended safety and harassment isopleths, as determined from the 2008 acoustic study conducted by the Port.

A detailed description of the Project can be found in the application and the NMFS prepared EA. These documents can be found at *http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications*

Information Solicited

Interested persons may submit information, suggestions, and comments concerning the Port's and MARAD's request (see **ADDRESSES**). All information, suggestions, and comments related to the request and NMFS' development and implementation of regulations governing the incidental taking of marine mammals by the Port will be considered by NMFS in developing, if appropriate, regulations governing the issuance of letters of authorization.

Dated: December 15, 2008.

BILLING CODE 3510–22–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Limitation of Duty-free Imports of Apparel Articles Assembled in Haiti under the Haitian Hemispheric Opportunity Through Partnership for Encouragement Act (HOPE)

December 12, 2008.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notification of Annual Quantitative Limit on Certain Apparel under HOPE

EFFECTIVE DATE: December 18, 2008.

FOR FURTHER INFORMATION CONTACT: Maria Dybczak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-3651.

SUPPLEMENTARY INFORMATION:

Authority: The Caribbean Basin Recovery Act (''CBERA''), as amended by the Haitian Hemispheric Opportunity Through Partnership for Encouragement Act of 2006 (collectively, ''HOPE''), Title V of the Tax Relief and Health Care Act of 2006 and the Food, Conservation, and Energy Act of 2008 (''HOPE II''); and Presidential Proclamation No. 8114, 72 Fed. Reg. 13655, 13659 (March 22, 2007) (''Proclamation'').

HOPE provides for duty-free treatment for certain apparel articles imported directly from Haiti. Section 213A (b)(1)(B) of HOPE outlines the requirements for certain apparel articles to qualify for duty-free treatment under a ''value-added'' program. In order to qualify for duty-free treatment, apparel articles must be wholly assembled, or knit-to-shape, in Haiti from any combination of fabrics, fabric components, components knit-to-shape, and yarns, as long as the sum of the cost or value of materials produced in Haiti or one or more countries, as described in HOPE, or any combination thereof, plus the direct costs of processing operations performed in Haiti or one or more countries, as described in HOPE, or any combination thereof, is not less than an applicable percentage of the declared customs value of such apparel articles. For the period December 20, 2008 through December 19, 2009, the applicable percentage is 50 percent.

For every twelve month period following the effective date of HOPE, duty-free treatment under the value-added program is subject to a quantitative limitation, HOPE provides that the quantitative limitation will be recalculated for each subsequent 12-month period. Section 213A (b)(1)(C) of HOPE, as amended by HOPE II, requires that, for the twelve-month period beginning on December 20, 2008, the quantitative limitation for qualifying apparel imported from Haiti under the value-added program will be an amount equivalent to 1.25 percent of the aggregate square meter equivalent of all apparel articles imported into the United States in the most recent 12-month period for which data are available.

For purposes of this notice, the most recent 12-month period for which data are available as of December 20, 2008 is the 12-month period ending on October 31, 2008. Therefore, for the one-year period beginning on December 20, 2008 and extending through December 19, 2009, the quantity of imports eligible for preferential treatment under the value-added program is 305,093,845 square meters equivalent. Apparel articles entered in excess of these quantities will be subject to otherwise applicable tariffs.

These quantities are calculated using the aggregate square meters equivalent of all apparel articles imported into the United States, derived from the set of Harmonized System lines listed in the Annex to the World Trade Organization Agreement on Textiles and Clothing (''ATC''), and the conversion factors for units of measure into square meter equivalents used by the United States in implementing the ATC.

Janet E. Heinzen,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DS

COMMODITY FUTURES TRADING COMMISSION

Order: (1) Pursuant to Section 4(c) of the Commodity Exchange Act (a) Permitting Eligible Swap Participants To Submit for Clearing and ICE Clear U.S., Inc. and Futures Commission Merchants To Clear Certain Over-The-Counter Agricultural Swaps and (b) Determining Certain Floor Brokers and Traders To Be Eligible Swap Participants; and (2) Pursuant to Section 4d of the Commodity Exchange Act, Permitting Certain Customer Positions in the Foregoing Swaps and Associated Property To Be Commingled With Other Property Held in Segregated Accounts

AGENCY: Commodity Futures Trading Commission.

ACTION: Order.

SUMMARY: On December 7, 2007, the Commodity Futures Trading Commission (''CFTC'' or ''Commission'') published for public comment requests (a) to permit ICE Clear U.S., Inc. (''ICE Clear'') to clear certain over-the-counter (''OTC'') swap contracts and (b) to determine that certain ICE Futures U.S., Inc. (''ICE Futures'') floor brokers and traders are Eligible Swap Participants (''ESPs'') for the purpose of trading those OTC swaps (''Notice.'').[1] On January 7, 2008, the comment period was extended to February 6, 2008.[2] ICE Clear also filed a request for an order pursuant to Section 4d of the Commodity Exchange Act (''CEA'' or ''Act'') to allow ICE Clear and Futures Commission Merchants (''FCMs'') clearing through ICE Clear to commingle positions in those cleared OTC swap contracts and property supporting those positions with property and positions otherwise required to be held in customer segregated accounts. That request was published on the CFTC's Web site for public comment during the same timeframe with the same comment deadline. The Commission has reviewed the comments made in response to the requests for comment and the entire record in this matter and has determined to issue an order granting the requests.

DATES: *Effective Date:* December 12, 2008.

FOR FURTHER INFORMATION CONTACT: Lois J. Gregory, Special Counsel, 816–960–7719, *lgregory@cftc.gov,* or Robert B. Wasserman, Associate Director, 202–418–5092, *rwasserman@cftc.gov*, Division of Clearing and Intermediary Oversight; or Duane C. Andresen, Senior Special Counsel, 202–418–5492, *dandresen@cftc.gov*, Division of Market Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1151 21st Street, NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. The ICE Clear 4(c) Petition

ICE Clear, the clearing organization for ICE Futures, sought to offer ESPs who enter into certain bilateral swap transactions involving coffee, sugar, or cocoa the opportunity to submit them to ICE Clear for clearing. ICE Clear represented that swap transactions in various agricultural products, including coffee, sugar, and cocoa, currently trade in OTC markets exempt from provisions of the CEA pursuant to Part 35 of the Commission's regulations,[3] that these swap agreements are commonly entered

[1] 72 FR 68862 (December 7, 2007).

[2] 73 FR 1205 (January 7, 2008).

[3] 17 CFR Part 35.

into by participants exchanging fixed for floating reference prices, and that participants in these markets include trade houses, commodity lenders, producers, end users, and large speculators.

Part 35 of the Commission's regulations exempts, subject to conditions, swap agreements and eligible persons entering into these agreements from most provisions of the CEA.[4] The term ''swap agreement'' is defined to include, among other types of agreements, ''a * * * commodity swap,'' [5] which latter term includes swaps on agricultural products.[6] Part 35 was promulgated pursuant to authority provided to the Commission in Section 4(c) of the Act to exempt certain transactions in order to explicitly permit certain off-exchange derivative transactions, and thus to promote innovation and competition.[7] In the Commodity Futures Modernization Act of 2000,[8] Congress enacted a number of exemptions and exclusions from the CEA for contracts traded outside of Designated Contract Markets (''DCMs''), but none apply to agricultural contracts.[9]

Part 35 requires, *inter alia*, that a swap agreement not be part of a fungible class of agreements that are standardized as to their material economic terms,[10] that the agreement be solely between ESPs,[11] and that the creditworthiness of any party having an interest under the agreement be a material consideration in entering into or negotiating the terms of the agreement.[12] Under the arrangement that ICE Clear seeks to establish, OTC contracts would be submitted for clearing, a process that would extinguish the original OTC contract and replace it with an equivalent number of cash-settled ''cleared-only'' contracts, with the clearinghouse interposed as central counterparty.[13] A cleared-only contract could be offset by another cleared-only contract. Thus, clearing of these OTC contracts would result in contracts that were fungible with other cleared-only contracts with approximately equivalent terms. In addition, due to the clearing guarantee, the creditworthiness of the counterparty would no longer be a consideration. Accordingly, the OTC contracts ICE Clear clears in this fashion would not fulfill all of the conditions of Part 35.

ICE Clear also requested an order under CEA Section 4d so that ICE Clear and its clearing members can hold the cleared-only contracts and property supporting them in the customer segregated account along with exchange-listed futures contracts and associated property, resulting in improved collateral management and other benefits.

II. The ICE Futures Petition

ICE Futures, a U.S. DCM, sought to permit floor traders and floor brokers (collectively, floor members) who are registered with the Commission, when trading for their own accounts, to enter into the OTC swap transactions discussed above. Part 35, however, defines the term ESP to include floor members only as follows: (1) Floor members generally who are other than natural persons or proprietorships; (2) floor members who are natural persons, provided they have total assets exceeding at least $10,000,000; or (3) floor members who are proprietorships, provided they have total assets exceeding at least $10,000,000, or have the obligations under the swap agreement guaranteed or otherwise supported by certain other ESPs, or have a net worth of $1,000,000 and enter into the swap agreement in connection with the conduct of their business or to manage the risk of an asset or liability owned or incurred in the conduct of their business or reasonably likely to be owned or incurred in the conduct of their business.[14] Therefore, ICE Futures petitioned the Commission for an order pursuant to Section 4(c) of the CEA that would permit all ICE Futures floor members who are registered with the Commission, when trading for their own accounts, to be ESPs for the purpose of entering into bilateral swap transactions involving agricultural commodities as described above.

ICE Futures represented that all floor members entering into the swap transactions would be sophisticated and knowledgeable in the relevant products and markets and would be fully capable of evaluating the transactions. Further, because the transaction results in a cleared-only futures contract, floor members would not be subject to counterparty credit risk and would rely on the credit of ICE Clear and their clearing FCMs.

The Commission stated that it anticipated that any Section 4(c) order issued in response to ICE Futures' request would be subject to the following conditions:

(1) The contracts, agreements, or transactions would have to be executed pursuant to the requirements of Part 35, as modified by the order.

(2) The ICE Futures floor member would have to obtain a financial guarantee for the OTC swap transactions from an ICE Futures clearing member that:

(i) Is registered with the Commission as an FCM; and

(ii) clears the OTC swap transactions thus guaranteed.

(3) Permissible OTC swap transactions would be limited to cleared-only contracts in the eligible products identified in the order.

(4) Permissible OTC swap transactions would have to be submitted for clearance by an ICE Futures clearing member to ICE Clear pursuant to ICE Clear rules.

(5) An ICE Futures floor member could not enter into OTC swap transactions with another ICE Futures floor member as the counterparty for ICE Clear cleared-only contracts.

(6) ICE Futures would maintain appropriate compliance systems in place to monitor the OTC swap transactions of its floor members.[15]

III. Sections 4(c) and 4d of the CEA

A. Permitting the OTC Contracts To Be Cleared

Section 4(c)(1) of the CEA empowers the CFTC to ''promote responsible

---

[4] Jurisdiction is retained for, *inter alia*, provisions of the CEA proscribing fraud and manipulation. *See* Commission Reg. § 35.2, 17 CFR 35.2 (Commission regulations are hereinafter cited as ''Reg. § ____'').

[5] Reg. § 35.1(b)(1)(i).

[6] ''Commodity'' is defined in Section 1a(4) of the CEA to include a variety of specified agricultural products, ''and all other goods and articles, except onions * * * and all services, rights and interests in which contracts for future delivery are presently or in the future dealt in.''

[7] *See* 58 FR 5587 (January 22, 1993). Section 4(c) of the CEA was added by section 502(a) of the Futures Trading Practices Act of 1992, Pub. L. 102–546, 106 Stat. 3590.

[8] Pub. L. 06–554, 114 Stat. 2763 (2000).

[9] *See, e.g.*, CEA section 2(d), (g), and (h).

[10] Reg. § 35.2(b).

[11] Reg. § 35.2(a).

[12] Reg. § 35.2(c).

[13] The OTC transaction would be required to involve the coffee, sugar, or cocoa underlying the corresponding cleared-only contract. The unit size, quality, and other specifications for the OTC coffee, sugar, or cocoa transaction would be approximately equivalent to the unit size, quality, and other specifications of the corresponding physical delivery futures contract listed on ICE Futures.

[14] Reg. § 35.1(b)(2)(x).

[15] The Commission noted that these conditions are substantially similar to the conditions included in two previously issued Commission orders that permit floor members to be Eligible Contract Participants (''ECPs'') pursuant to Section 1a(12)(C) of the Act, 7 U.S.C. 1a(12)(C). On March 14, 2006, the Commission issued an order that permitted Chicago Mercantile Exchange (''CME'') floor members to be ECPs with respect to OTC transactions in excluded commodities entered into pursuant to Section 2(d)(1) of the Act. On August 3, 2006, the Commission issued a second order (the first was issued February 4, 2003) that permitted New York Mercantile Exchange (''NYMEX'') floor members to be ECPs with respect to OTC transactions in exempt commodities entered into pursuant to Section 2(h)(1) of the Act.

economic or financial innovation and fair competition'' by exempting any transaction or class of transactions from any of the provisions of the CEA (subject to exceptions not relevant here) where the Commission determines that the exemption would be consistent with the public interest.[16] The Commission may grant such an exemption by rule, regulation, or order, after notice and opportunity for hearing, and may do so on application of any person or on its own initiative.

In enacting Section 4(c), Congress noted that the goal of the provision ''is to give the Commission a means of providing certainty and stability to existing and emerging markets so that financial innovation and market development can proceed in an effective and competitive manner.'' [17] The Commission requested comment on whether it should permit the OTC transactions in coffee, sugar, and cocoa to be cleared through ICE Clear as described above. The Commission also requested comment on whether it should determine ICE Futures floor members, subject to certain conditions, to be ESPs for the purpose of entering into the OTC transactions in coffee, sugar, and cocoa.

Section 4(c)(2) provides that the Commission may grant exemptions from Section 4(a) of the CEA only when the Commission determines that the requirements for which an exemption is being provided should not be applied to the agreements, contracts, or transactions at issue, and the exemption is consistent with the public interest and the purposes of the CEA; that the agreements, contracts or transactions will be entered into solely between appropriate persons; and that the exemption will not have a material adverse effect on the ability of the Commission or any contract market or derivatives transaction execution facility to discharge its regulatory or self-regulatory responsibilities under the CEA.[18]

Section 4(c)(3) includes within the term ''appropriate persons'' a number of specified categories of persons deemed appropriate under the Act for entering into transactions exempt by the Commission under Section 4(c). This includes persons the Commission determines to be appropriate in light of their financial or other qualifications, or the applicability of appropriate regulatory protections. ESPs, as defined in Part 35 of the Commission's regulations, will be eligible to submit for clearing to ICE Clear the OTC transactions described above. That definition includes many of the classes of persons explicitly referred to in CEA Section 4(c)(3) (*e.g.*, a bank or trust company) as well as some classes of persons who are included under the category of Section 4(c)(3)(K) (''[s]uch other persons that the Commission determines to be appropriate in light of their financial or other qualifications, or the applicability of appropriate regulatory protections''). ICE Futures has requested that the Commission expand this list of appropriate persons to include ICE Futures floor members. The Commission requested comment on this determination. The Commission also requested comment as to whether these exemptions will affect its ability to discharge its regulatory responsibilities under the CEA, or with the self-regulatory duties of any contract market or Derivatives Clearing Organization (''DCO'').

B. Segregation of Customer Funds

CEA Section 4d(a)(2) prohibits commingling customer positions executed on a contract market and property supporting such positions together with any property not required to be so segregated. Section 4d(a)(2) provides that the Commission may grant exceptions to this prohibition by order. In this case, the OTC coffee, sugar, and cocoa contracts are not executed on a contract market and thus holding them together with customer property and positions required to be segregated would, absent a Commission order, violate Section 4d. As discussed further below, the Commission has analyzed the risks and benefits associated with commingling the cleared-only positions and associated customer funds with positions and customer funds otherwise required to be segregated, and has determined that the benefits of the proposal outweigh the risks and that the proposal, along with conditions set forth by the Commission, will provide for a sufficient level of safeguards to address the risks adequately.

IV. Comment Letters

The Commission received eleven letters in response to its request for comment. An initial comment letter from the CME Group Inc. (''CME Group'') requested an extension of the comment period and listed various concerns CME Group suggested might have to be addressed in order for the Commission to act on ICE Clear's request for an extension of the swaps exemption of Part 35. However, a subsequent comment letter from CME Group took the position that the Commission should permit the clearing of OTC agricultural swap contracts but pursuant to appropriate conditions to protect the market and market participants in a manner that would establish a level playing field for all DCOs.

Brief comments from two individuals expressed concerns related to their belief that the OTC transactions would be undertaken primarily by large traders, such as hedge funds, to the detriment of smaller traders who use the markets for hedging. Neither of these comments provided any evidence that would support the conclusion that smaller traders would be adversely affected by the requested relief. One of the comments did note that there was no mention of the application of speculative limits. As discussed further below, the order will require ICE Futures to apply position accountability levels to the cleared-only contracts that are appropriate in light of the position accountability levels applicable to the underlying futures contracts.

The remaining seven comment letters are from two futures exchanges and five commodity trading firms, all of which

---

[16] Section 4(c)(1) of the CEA, 7 U.S.C. 6(c)(1), provides in full that:

In order to promote responsible economic or financial innovation and fair competition, the Commission by rule, regulation, or order, after notice and opportunity for hearing, may (on its own initiative or on application of any person, including any board of trade designated or registered as a contract market or derivatives transaction execution facility for transactions for future delivery in any commodity under section 7 of this title) exempt any agreement, contract, or transaction (or class thereof) that is otherwise subject to subsection (a) of this section (including any person or class of persons offering, entering into, rendering advice or rendering other services with respect to, the agreement, contract, or transaction), either unconditionally or on stated terms or conditions or for stated periods and either retroactively or prospectively, or both, from any of the requirements of subsection (a) of this section, or from any other provision of this chapter (except subparagraphs (c)(ii) and (D) of section 2(a)(1) of this title, except that the Commission and the Securities and Exchange Commission may by rule, regulation, or order jointly exclude any agreement, contract, or transaction from section 2(a)(1)(D) of this title), if the Commission determines that the exemption would be consistent with the public interest.

[17] House Conf. Report No. 102–978, 1992 U.S.C.C.A.N. 3179, 3213.

[18] Section 4(c)(2) of the CEA, 7 U.S.C. 6(c)(2), provides in full that:

The Commission shall not grant any exemption under paragraph (1) from any of the requirements of subsection (a) of this section unless the Commission determines that—

(A) The requirement should not be applied to the agreement, contract, or transaction for which the exemption is sought and that the exemption would be consistent with the public interest and the purposes of this Act; and

(B) The agreement, contract, or transaction—

(i) will be entered into solely between appropriate persons; and

(ii) Will not have a material adverse effect on the ability of the Commission or any contract market or derivatives transaction execution facility to discharge its regulatory or self-regulatory duties under this Act.

support ICE Clear's and ICE Futures' requests for exemption.

With respect to the ICE Futures request that floor members be deemed ESPs, NYMEX commented regarding the Commission's assertion that the proposed conditions pertaining to the determination were substantially similar to the conditions included in two previously issued Commission orders that permit floor members to be ECPs pursuant to Section 1a(12)(C) of the CEA.[19] Specifically, NYMEX stated that the Commission previously has required that the clearing member providing a financial guarantee to a floor member deemed to be an ECP must maintain capitalization of a certain size to be able to issue such a guarantee, that the financial requirement was not included in the list of conditions to be applied to ICE Futures clearing members guaranteeing floor members deemed to be ESPs, and that the Notice did not provide any policy rationale for imposing different financial standards for clearing member guarantors.

On February 4, 2003, the Commission issued to NYMEX the first order determining that floor members could be ECPs. Due to the order's novel nature and the concern that a trader entering into OTC transactions could create financial difficulty for the guarantor FCM, the clearing entity, or other clearing firms, the order required clearing members that guaranteed and cleared OTC transactions to meet specified minimum capital requirements, and for NYMEX to submit a report to the Commission not later than 30 days after the order was in effect for 18 months.[20]

CME subsequently petitioned the Commission for an order that would permit CME floor members to be deemed ECPs. After reviewing the impact of the NYMEX order upon NYMEX and its floor members, and noting the lack of problems associated with it, the Commission issued an order to CME that did not include a special guarantor capitalization requirement.[21] Immediately thereafter, Commission staff advised NYMEX that it could petition for a new or amended order that would not include a special guarantor capitalization requirement, but NYMEX to date has not so petitioned.

V. Findings and Conclusions

After considering the complete record in this matter, including the comments received, the Commission finds that the requirements of CEA Section 4(c) have been met with respect to the requests for an order permitting the clearing of certain OTC transactions and determining that certain floor brokers and floor traders qualify as ESPs.

First, permitting the clearing of these transactions is consistent with the public interest and with the purposes of the CEA. The purposes of the CEA include ''promot[ing] responsible innovation and fair competition among boards of trade, other markets, and market participants.'' [22] The purpose of exemptions is ''to promote economic or financial innovation and fair competition.'' [23] Permitting the clearing of OTC coffee, sugar, and cocoa transactions by ICE Clear, as well as permitting ICE Futures floor members to trade such products, would appear to foster both financial innovation and competition. It could benefit the marketplace by providing ESPs the ability to bring together flexible negotiation with central counterparty guarantees and capital efficiencies. Clearing also may increase the transparency of the OTC market.

Second, the bilateral transactions in the OTC agricultural swaps would be entered into solely between appropriate persons. These would be limited to those persons qualifying as ESPs under Part 35 and those floor brokers and traders deemed ESPs herein by the Commission. ICE Futures floor brokers or traders that entered into the swap would be registered with the Commission and would have the requisite skills, experience, and market expertise to trade for their own accounts. Each such floor member would be financially backed by the ICE Clear clearing member that submits the swap for clearing, and all of its activity in the OTC agricultural swaps, limited only to coffee, sugar, or cocoa, will be closely monitored by ICE Futures.

Third, the exemption would not have a material adverse effect on the ability of the Commission or any DCM to carry out its regulatory responsibilities under the CEA. ICE Clear will use the same systems, procedures, people, and processes to clear the bilateral agricultural swap contracts in coffee, sugar, and cocoa as it currently employs with respect to all of the other transactions it clears.

With respect to ICE Clear's request for an order pursuant to Section 4d permitting ICE Clear and FCMs clearing through ICE Clear to commingle funds supporting positions in the cleared-only contracts resulting from these agricultural swaps with customer funds required to be segregated under CEA Section 4d, the Commission has considered whether the additional risk to customers presented by such commingling can be adequately addressed and mitigated. Additional risk is presented to customers as a result of the risk of default involving the commingled cleared-only contracts. However, the carrying FCM should have adequate means to address a default by a customer trading these contracts. Since each cleared-only contract will have identical economic terms as its underlying corresponding contract listed on ICE Futures and will settle on both a daily and final basis to that corresponding listed contract, the carrying FCM (or, if necessary, ICE Clear) economically could hedge any contracts that are the subject of a default by entering into the offsetting underlying exchange-listed contract. Therefore, the additional risk would be mitigated. The order requires that ICE Clear review its members' risk management capabilities to verify that all members participating in the program maintain sufficient operational capability to engage in such offsetting transactions. The order also requires that ICE Futures (1) maintain a coordinated market surveillance program that encompasses the cleared-only contracts and the underlying futures contracts, and (2) adopt position accountability levels for each of the cleared-only contracts subject to the order that are appropriate in light of the position accountability levels applicable to the underlying futures contracts. These measures should mitigate market risk.

Accordingly, the Commission has determined that ICE Clear will be able to employ reasonable safeguards to protect customer funds, and that it will be able to measure, monitor, manage, and account for risks associated with transactions and open interest in the bilateral swap contracts as it does for other contracts it clears. The Commission believes that ICE Clear has demonstrated sufficiently that it will continue to comply with all of the core principles in CEA Section 5b of the Act in connection with holding customer positions in OTC agricultural swaps with property held in segregated accounts pursuant to CEA Section 4d.

[19] *See supra* note 15.

[20] The order required that, as part of the report, NYMEX review its experiences and the experiences of its floor members and clearing members under the order during those 18 months.

[21] The floor member must have a guarantee from, and the trades must be cleared by, a CME clearing member FCM. That FCM must have adjusted net capital that equals or exceeds the greater of $2,500,000, CFTC requirements as computed pursuant to Reg. § 1.17, or Securities and Exchange Commission requirements.

[22] CEA section 3(b), 7 U.S.C. 5(b).

[23] CEA section 4(c)(1), 7 U.S.C. 6(c)(1).

VI. Related Matters

A. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (''PRA'')[24] imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. The exemption will not require a new collection of information from any entities that would be subject to the exemption.

B. Cost-Benefit Analysis

Section 15(a) of the CEA,[25] requires the Commission to consider the costs and benefits of its action before issuing an order under the CEA. By its terms, Section 15(a) does not require the Commission to quantify the costs and benefits of an order or to determine whether the benefits of the order outweigh its costs. Rather, Section 15(a) simply requires the Commission to ''consider the costs and benefits'' of its action.

Section 15(a) of the CEA further specifies that costs and benefits shall be evaluated in light of five broad areas of market and public concern: protection of market participants and the public; efficiency, competitiveness, and financial integrity of futures markets; price discovery; sound risk management practices; and other public interest considerations. Accordingly, the Commission could in its discretion give greater weight to any one of the five enumerated areas and could in its discretion determine that, notwithstanding its costs, a particular order was necessary or appropriate to protect the public interest or to effectuate any of the provisions or to accomplish any of the purposes of the CEA.

The Commission has considered the costs and benefits of this exemptive order in light of the specific provisions of Section 15(a) of the CEA, as follows:

1. *Protection of market participants and the public.* The contracts that are the subject of the exemptive requests will only be entered into by persons who are ''appropriate persons'' as set forth in Section 4(c) of the Act. Only ESPs and those floor brokers and traders deemed ESPs pursuant to ICE Futures' request herein will enter into transactions in the OTC agricultural swaps that are the subject of ICE Clear's request. Allowing the commingling of funds supporting positions in the resulting cleared-only contracts with customer funds required to be segregated under CEA Section 4d will benefit ESP market participants by facilitating clearing and the reduction of credit risk for contracts that meet market participants' specific risk-management requirements. ESP customers holding positions in cleared-only contracts also would benefit from having their property held in segregated accounts in the event of the insolvency of an FCM. In addition, the order is premised on ICE Clear maintaining a number of existing risk management and other safeguards.

2. *Efficiency and competition.* Allowing these swap agreements to be cleared appears likely to promote liquidity and transparency in the markets for OTC derivatives on coffee, sugar, and cocoa, as well as on futures on those commodities. Determining ICE Futures floor members to be ESPs will likely increase the flow of trading information between markets, increase the pool of potential counterparties for participants trading OTC, and provide additional trading expertise to the market. The commingling of funds supporting cleared-only positions with customer funds supporting exchange-traded positions should result in improved, more efficient, collateral management and lower administrative costs since risk-offsetting positions will be held together in the same account rendering a more precise estimation of the risk posed by the account. These types of efficiencies also generally support competition.

3. *Financial integrity of futures markets and price discovery.* Price discovery is likely to be enhanced through market competition. The extended exemption also may promote financial integrity by providing the benefits of clearing to these OTC markets. As discussed above, the risks associated with commingling funds supporting cleared-only positions with customer funds supporting exchange-traded positions are appropriately mitigated.

4. *Sound risk management practices.* Clearing of OTC transactions is likely to foster risk management by the participant counterparties. ICE Clear's risk management practices in clearing these transactions are subject to the Commission's supervision and oversight.

5. *Other public interest considerations.* The granted exemptions are likely to encourage market competition in agricultural derivatives products without unnecessary regulatory burden.

The Commission requested comment on its application of these factors in the proposing release. No comments were received.

VII. Order

After considering the above factors and the comment letters received in response to its request for comments on its application of these factors in the proposing release, the Commission has determined to issue the following:

Order

(1) The Commission, pursuant to its authority under CEA Section 4(c) and subject to the conditions below, hereby:

(A) Permits ESPs to submit for clearing, and FCMs and ICE Clear to clear, OTC agricultural swap contracts in coffee, sugar, or cocoa; and

(B) Permits all ICE Futures floor members that are registered with the Commission, when trading for their own accounts, to be deemed ESPs for the purpose of entering into bilateral swap transactions involving coffee, sugar, or cocoa agricultural commodities to be cleared on ICE Clear.

(2) The Commission, pursuant to its authority under CEA Section 4d and subject to the conditions below, hereby permits ICE Clear and its clearing members that are registered FCMs and acting pursuant to this order to hold money, securities, and other property, used to margin, guarantee, or secure transactions in OTC agricultural swap contracts involving coffee, sugar, or cocoa and belonging to customers that are ESPs (including customers that are deemed ESPs in accordance with this order) with other customer funds used to margin, guarantee, or secure trades or positions in commodity futures or commodity option contracts executed on or subject to the rules of a contract market designated pursuant to Section 5 of the Act in a segregated account or accounts maintained in accordance with Section 4d of the CEA (including any orders issued pursuant to Section 4d(a)(2) of the CEA) and the Commission's regulations thereunder, and all such customer funds shall be accounted for and treated and dealt with as belonging to the customers of the ICE Clear clearing member consistently with CEA Section 4d and the regulations thereunder.

(3) This order is subject to the following conditions:

(A) The contracts, agreements, or transactions subject to this order must be executed pursuant to the requirements of Part 35 of the Commission's regulations, as modified herein, and are limited to cleared-only contracts in the following agricultural products: coffee, sugar, or cocoa;

[24] 44 U.S.C. 3507(d).

[25] 7 U.S.C. 19(a).

(B) The economic terms and the daily settlement prices of each contract, agreement, or transaction subject to this order must be analogous to the economic terms, and equal to the daily settlement prices, respectively, of a corresponding futures contract listed for trading on ICE Futures;

(C) All contracts, agreements, or transactions subject to this order must be submitted for clearing by an ICE Futures clearing member to ICE Clear pursuant to ICE Clear rules;

(D) Each ICE Futures floor member acting as an ESP pursuant to this order must be the subject of a financial guarantee from a member of ICE Clear covering the trading of the OTC swap contracts, agreements, or transactions subject to this order. The clearing member must be registered with the Commission as an FCM and must clear for the floor member the contracts, agreement, or transactions covered by the financial guarantee;

(E) An ICE Futures floor member is prohibited from entering into a transaction in a cleared-only contract subject to this order with another ICE Futures floor member as the counterparty;

(F) ICE Clear and its clearing members will mark to market each cleared-only contract subject to this order on a daily basis in accordance with ICE Clear rules;

(G) ICE Clear will apply its margining system and calculate margin rates for each cleared-only contract subject to this order in accordance with its normal and customary practices;

(H) ICE Futures must maintain appropriate compliance systems in place to monitor the transactions of its floor members in the OTC swap transactions permitted pursuant to this order;

(I) ICE Clear will apply appropriate risk management procedures with respect to transactions and open interest in the cleared-only contracts subject to this order. ICE Clear will conduct financial surveillance and oversight of its members clearing the cleared-only contracts, and will conduct oversight sufficient to assure ICE Clear that each such member has the appropriate operational capabilities necessary to manage defaults in such contracts. ICE Clear and its clearing members acting pursuant to this order will take all other steps necessary and appropriate to manage risk related to clearing cleared-only contracts;

(J) ICE Clear will make available open interest and settlement price information for the cleared-only contracts in the eligible products (coffee, sugar, and cocoa) on a daily basis in the same manner as for contracts listed on ICE Futures;

(K) ICE Futures shall establish and maintain a coordinated market surveillance program that encompasses the cleared-only contracts subject to this order and the underlying futures contracts listed by ICE Futures on its designated contract market. ICE Futures shall adopt position accountability levels for each of the cleared-only contracts subject to this order that are appropriate in light of the position accountability levels applicable to the underlying futures contracts.

(L) Cleared-only contracts subject to this order shall not be treated as fungible with any contract listed for trading on ICE Futures.

(M) Each FCM acting pursuant to this order shall keep the types of information and records that are described in CEA Section 4g and Commission regulations thereunder, including but not limited to Reg. § 1.35, with respect to all cleared-only contracts in eligible products subject to this order. Such information and records shall be produced for inspection in accordance with the requirements of Reg. § 1.31;

(N) ICE Futures shall provide to the Commission the types of information described in Part 16 of the Commission's regulations in the manner described in Parts 15 and 16 of the Commission's regulations with respect to all cleared-only contracts;

(O) ICE Clear will apply large trader reporting requirements to cleared-only contracts in accordance with its rules, and each FCM acting pursuant to this order shall provide to the Commission the types of information described in Part 17 of the Commission's regulations in the manner described in Parts 15 and 17 of the Commission's regulations with respect to all cleared-only contracts in which it participates; and

(P) ICE Clear and ICE Futures shall at all times fulfill all representations made in their requests for relief under CEA Sections 4(c) and 4d and all supporting materials thereto.

This order is based upon the representations made and supporting material provided to the Commission by ICE Clear and ICE Futures in their requests. Any material change or omissions in the facts and circumstances pursuant to which this order is granted might require the Commission to reconsider its finding that the exemptions set forth herein are appropriate. Further, in its discretion, the Commission may condition, modify, suspend, terminate, or otherwise restrict the exemptions granted in this order, as appropriate, on its own motion.

Issued in Washington, DC, on December 12, 2008 by the Commission.

David A. Stawick,

Secretary of the Commission.

DoDEA FY 2009 Grant Competition Announcement

AGENCY: Department of Defense Education Activity, DoD.

ACTION: Notice of grant competition announcement; amendment.

SUMMARY: The Department of Defense Education Activity (DoDEA) is amending the Promoting Student Achievement at Schools Impacted by Military Force Structure Changes grant competition announcement, which appeared in the **Federal Register** on November 18, 2008 (73 FR 68423–68425). The amendments include a change in the expected dates, the elimination of the letter of intent, and the addition of Web site information where questions and answers will be posted.

Expected Dates and Procedures

Concept Paper Application Available: 16 Jan 09.

Deadline for Submission of Concept Papers: 06 Mar 09, 5 p.m. (EST).

Full Applications Available (by invitation only): 13 Apr 09.

Deadline for Submission of Full Proposals: 25 May 09, 5 p.m. (EST).

Deadline for Intergovernmental Review: 01 Jul 09.

Letter of Intent

There will be no letter of intent.

Posted Questions and Answers

DoDEA will post questions and answers on its Educational Partnerships' Web site: *http://www.militaryk12partners.dodea.edu.*

DoDEA Point of Contact

Department of the Navy

Notice of Intent To Grant Exclusive Patent License: Vytral Systems Co. Ltd, LLC

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant to Vytral Systems Co. Ltd, LLC a revocable, nonassignable, partially exclusive license to practice throughout the United States the Government-owned inventions described in U.S. Patent App. No. 11/086,737 (Navy Case Number 95819): Wireless Serial Data Transmission Method and Apparatus and all patents or patent applications: (i) To which any of the above mentioned patents directly claims priority, (ii) for which any of the above mentioned patents directly forms a basis for priority, (iii) that were co-owned applications that directly incorporate by reference, or are incorporated by reference into, any of the above mentioned patents; (iv) reissues, reexaminations, extensions, continuations, continuing prosecution applications, requests for continuing examinations, divisions, and registrations of any of the above mentioned patents; and (v) foreign patents, patent applications and counterparts relating to any of the above mentioned Patents, including, without limitation, certificates of invention, utility models, industrial design protection, design patent protection, and other governmental grants or issuances.

DATES: Anyone wishing to object to the grant of this license has fifteen (15) days from the date of this notice to file written objections along with supporting evidence, if any.

ADDRESSES: Written objections are to be filed with the Naval Undersea Warfare Center Division, Newport, 1176 Howell St., Bldg 990, Code 07TP, Newport, RI 02841.

FOR FURTHER INFORMATION CONTACT: Dr. Theresa A. Baus, Head, Technology Partnership Enterprise Office, Naval Undersea Warfare Center Division, Newport, 1176 Howell St., Bldg 990, Code 07TP, Newport, RI 02841, telephone: 401–832–8728, or E-Mail: *Theresa.Baus@navy.mil.*

Authority: 35 U.S.C. 207, 37 CFR part 404.

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before January 20, 2009.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Education Desk Officer, Office of Management and Budget, 725 17th Street, NW., Room 10222, New Executive Office Building, Washington, DC 20503 or faxed to (202) 395–6974.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The IC Clearance Official, Regulatory Information Management Services, Office of Management, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: December 12, 2008.

Stephanie Valentine,

Acting IC Clearance Official, Regulatory Information Management Services, Office of Management.

Office of Elementary and Secondary Education

Type of Review: Extension.

Title: 21st Century Community Learning Centers Annual Performance Report.

Frequency: Annually.

Affected Public: Not-for-profit institutions; State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 1,400.

Burden Hours: 36,400.

Abstract: Originally authorized under Title X, Part I, of the Elementary and Secondary Education Act, the program was initially administered through the U.S. Department of Education, which provided grants directly to over 1,825 grantees. With the reauthorization of the program under the No Child Left Behind Act, direct administration of the program was transferred to state education agencies (SEA) to administer their own grant competitions. Preliminary data shows that states have awarded approximately 1,400 grants to support more than 4,700 centers in every state in the country. The purpose of the 21st Century Community Learning Centers (21st CCLC) program, as reauthorized under Title IV, Part B, of the No Child Left Behind Act of 2001, 4201 *et seq.*, (20 U.S.C. 7171 *et seq.*), is to provide expanded academic enrichment opportunities for children attending low-performing schools. To reflect the changes in the authorization and administration of the 21st CCLC program and to comply with its reporting requirements, the Education Department (ED) is requesting authorization for the collection of data through Web-based, data-collection modules, the Annual Performance Report, the Grantee Profile, the Competition Overview, and the State Activities module, which collectively will be housed in an application called the 21st CCLC Profile and Performance Information Collection System (PPICS). The data will continue to be used to fulfill ED's requirement under the Government Performance and Results Act (GPRA) to report to Congress annually on the implementation and progress of 21st CCLC projects and the use of state administrative and technical assistance funds allocated to the states to support the program. The data collection will also provide SEA liaisons with needed descriptive data

about their grantees and allow SEA liaisons to conduct performance monitoring and identify areas of needed technical assistance.

This information collection is being submitted under the Streamlined Clearance Process for Discretionary Grant Information Collections (1890–0001). Therefore, the 30-day public comment period notice will be the only public comment notice published for this information collection.

Requests for copies of the information collection submission for OMB review may be accessed from *http://edicsweb.ed.gov,* by selecting the ''Browse Pending Collections'' link and by clicking on link number 3860. When you access the information collection, click on ''Download Attachments'' to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to the Internet address *ICDocketMgr@ed.gov* or faxed to 202–401–0920. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to *ICDocketMgr@ed.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

DEPARTMENT OF THE TREASURY

OFFICE OF MANAGEMENT AND BUDGET

Federal Family Education Loan Program (FFELP)

AGENCY: Department of Education, Department of the Treasury, Office of Management and Budget.

ACTION: Notice of terms and conditions of purchase of loans under the Ensuring Continued Access to Student Loans Act of 2008; correction.

SUMMARY: On December 2, 2008, the Department of Education, the Department of the Treasury, and the Office of Management and Budget (collectively, ''Secretaries and Director'') jointly published a notice in the **Federal Register** (73 FR 73263) announcing the terms and conditions under which the Department will purchase loans pursuant to section 459A of the Higher Education Act of 1965, as amended (HEA), enacted by the Ensuring Continued Access to Student Loans Act of 2008 (Pub. L. 110–227) and amended by Public Law 110–315 and Public Law 110–350 (December 2 Notice). The terms and conditions announced in the December 2 Notice apply to the purchase of Federal Family Education Loan Program (''FFELP'') loans made for the 2007–2008 academic year (the ''Short-term Purchase Program''). Included as an appendix to the December 2 Notice was the Master Loan Sale Agreement under which these purchases will be made. This notice makes three corrections to the December 2 Notice.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Education, Office of Federal Student Aid, Union Center Plaza, 830 First Street, NE., room 113F1, Washington, DC 20202. Telephone: (202) 377–4401 or by e-mail: *ffel.agreementprocess@ed.gov.*

If you use a telecommunications device for the deaf (TDD), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or computer diskette) on request to the contact listed in this section.

SUPPLEMENTARY INFORMATION:

Correction

Under the Short-term Purchase Program, the Department will purchase loans made under sections 428 (subsidized Stafford loans), 428B (PLUS loans), or 428H (unsubsidized Stafford loans) of the HEA for the 2007–2008 academic year (''Eligible 2007–2008 Loans''). The December 2 Notice described the method the Department uses to determine the amount of loans it will purchase in a week from each lender that offers to sell loans during that week. The December 2 Notice makes clear that the Department will spend up to $500 million to purchase loans in each week of the Short-term Purchase Program. As noted in the December 2 Notice, if $500 million is not sufficient to purchase all loans offered for sale during a week, the Department must determine that portion of the available funds which it will use to purchase loans offered by each seller that submitted an offer for that week.

The December 2 Notice included an error in its explanation of how the Department will determine the portion of the $500 million that is available each week that it will use to purchase loans offered by each seller that submitted an offer for that week if there are not sufficient funds to purchase all loans offered. Specifically, in the second full paragraph, second column on page 73264 of the December 2 Notice, and in the second full paragraph in section 1 of the Master Loan Sale Agreement, which appears on page 73272 of the December 2 Notice, we incorrectly state that the Department will purchase from each seller that portion of the loans it offers to sell equal to each seller's percentage of all Eligible 2007–2008 Loans held by all sellers that submitted offers for that week. This is not an accurate description of the method the Department uses.

To determine the amount it will spend to purchase loans from each seller, the Department will first determine the total outstanding principal amount of Stafford and PLUS loans made for the 2007–2008 academic year that are held by all sellers that submitted offers for that week (without regard to the amount of those loans offered for sale by a seller for that week), and the percentage of that total that is held by each of those sellers.[1] The Department will then multiply $500 million by each seller's percentage of that total to determine the amount it will spend to purchase loans offered for sale by that seller for that week.

To correct this error, the Secretaries and the Director make the following corrections to the December 2 Notice:

1. In the second full paragraph, second column of page 73264, the first sentence is deleted and replaced with the following:

> If the amount needed to purchase all loans in qualifying offers in a given week exceeds $500 million, the Department will first determine the total outstanding principal amount of subsidized and unsubsidized Stafford loans and PLUS loans made for the 2007–2008 academic year held by all lenders that submit qualifying offers to sell loans for that week, and the percentage of that total held by each of those lenders. The Department will then multiply $500 million by each lender's percentage. To purchase loans from each lender, the Department will spend the resulting amount, or such lesser amount as may be needed to purchase all loans offered for sale by that lender.

2. In the second full paragraph on page 73272 of the December 2 Notice (73 FR 73272), the sentence that reads ''If the amount needed to purchase all Eligible Loans in qualifying offers exceeds $500 million, the Department will purchase, from each Lender, an amount up to the total outstanding

[1] The Department will make this determination using data showing amounts held as of November 19, 2008.

balances of the Loans offered by such Lender multiplied by the percentage which the Lender's FFELP Loan volume originated in the 2007–2008 academic year bears to the FFELP Loan volume originated in the 2007–2008 academic year by all Lenders that submitted qualifying offers to sell Loans in the same week.'' is deleted and replaced with the following:

If the amount needed to purchase all Eligible Loans in qualifying offers in a given week exceeds $500 million, the Department will determine the total outstanding principal amount of Stafford and PLUS loans made for the 2007–2008 academic year that are held by all Lenders that submit qualifying offers to sell loans for that week, and the percentage of that total amount held by each of those Lenders. The Department will then multiply $500 million by each Lender's percentage of that total. To purchase Eligible Loans offered for sale by a Lender, the Department will spend the resulting amount determined for that Lender, or such lesser amount as needed to purchase all Eligible Loans offered for sale by that Lender.

3. The first sentence of section 5B(iii)(4) of the Master Loan Sale Agreement on page 73282 of the December 2 Notice is revised by adding, after the words ''to provide Loan Documents'' the words ''described in section 3Q(xi), (xii), and (xiii)''.

Applicable Program Regulations: 34 CFR part 682.

Program Authority: 20 U.S.C. 1087i–1.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 13305–000]

Whitestone Power and Communications; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

December 11, 2008.

On October 20, 2008, Whitestone Power and Communications filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Microturbine Hydrokinetic River-In-Stream Energy Conversion Power Project, located in the Tanana River, within the Unorganized Borough, near Delta Junction, Alaska. The project uses no dam or impoundment.

The proposed project would consist of: (1) 1 hydrokinetic turbine generating unit, with a total installed capacity of 25 kilowatts, (2) a proposed 3000-foot-long, 12.47-kilovolt transmission line, and (3) appurtenant facilities. The project is estimated to have an annual generation of 65 megawatt-hours, which would be used by the applicant.

Applicant Contact: Mr. Steven Selvaggio, Whitestone Community Association, Whitestone Power and Communications, PO Box 1630, Delta Junction, Alaska 99737, phone: (907) 895–4938.

FERC Contact: Kelly T. Houff (202) 502–6393.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Comments, motions to intervene, notices of intent, and competing applications may be filed electronically via the Internet. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the ''e-Filing'' link. If unable to be filed electronically, documents may be paper-filed. To paper-file, an original and eight copies should be mailed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. For more information on how to submit these types of filings please go to the Commission's Web site located at *http://www.ferc.gov/filing-comments.asp.* More information about this project can be viewed or printed on the ''eLibrary'' link of Commission's Web site at *http://www.ferc.gov/docs-filing/elibrary.asp.* Enter the docket number (P–13305) in the docket number field to access the document. For assistance, call toll-free 1–866–208–3372.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER09–352–000]

West Valley Holdings, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

December 11, 2008.

This is a supplemental notice in the above-referenced proceeding of West Valley Holdings, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR Part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR Part 34, of future issuances of securities and assumptions of liability, is December 30, 2008.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic

service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St. NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–8754–1]

Office of Research and Development; Ambient Air Monitoring Reference and Equivalent Methods: Designation of a New Reference Method

AGENCY: Environmental Protection Agency.

ACTION: Notice of the designation of a new reference method for monitoring ambient air quality.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has designated, in accordance with 40 CFR Part 53, a new reference method for measuring mass concentrations of coarse particulate matter ($PM_{10–2.5}$) in the ambient air.

FOR FURTHER INFORMATION CONTACT: Surender Kaushik, Human Exposure and Atmospheric Sciences Division (MD–D205–03), National Exposure Research Laboratory, U.S. EPA, Research Triangle Park, North Carolina 27711. Phone: (919) 541–5691, e-mail: *Kaushik.Surender@epa.gov*.

SUPPLEMENTARY INFORMATION: In accordance with regulations at 40 CFR Part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQSs) as set forth in 40 CFR Part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either reference methods or equivalent methods (as applicable), thereby permitting their use under 40 CFR Part 58 by States and other agencies for determining attainment of the NAAQSs.

The EPA hereby announces the designation of a new reference method for measuring mass concentrations of coarse particulate matter ($PM_{10–2.5}$) in the ambient air. This designation is made under the provisions of 40 CFR Part 53, as amended on December 18, 2006 (71 FR 61271).

The new reference method for $PM_{10–2.5}$ is a manual method that utilizes a pair of FRM samplers that has already been designated as $PM_{2.5}$ (RFPS–0498–116) and PM_{10C} (RFPS–1298–125), and the requirements specified in Appendix O of 40 CFR Part 50. The newly designated $PM_{10–2.5}$ reference method is identified as follows:

RFPS–1208–173, ''BGI Incorporated Model PQ200 $PM_{10–2.5}$ sampler pair for the determination of coarse particulate matter as $PM_{10–2.5}$ consisting of a pair of BGI Model PQ200 samplers, with one configured for sampling $PM_{2.5}$ (RFPS–0498–116) and the other configured for sampling PM_{10c} (RFPS–1298–125) with the $PM_{2.5}$ separator replaced with a BGI WINS Eliminator and operated in accordance with the Model PQ200 Instruction manual supplement Appendix O.

An application for a reference method determination for the candidate method was received by the EPA on July 31, 2008. The sampler pair is commercially available from the applicant, BGI Incorporated, 58 Guinan Street, Waltham, MA 02451, USA (*http://www.bgiusa.com*).

After reviewing the information submitted by the applicant in the application, EPA has determined, in accordance with CFR Parts 53 (as amended on October 17, 2006), that this method should be designated as a reference method. The information submitted by the applicant in the application will be kept on file, either at EPA's National Exposure Research Laboratory, Research Triangle Park, North Carolina 27711 or in an approved archive storage facility, and will be available for inspection (with advance notice) to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR Part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any specifications and limitations (e.g., configuration or operational settings) specified in the applicable designation method description (see the identifications of the method above).

Use of the method should also be in general accordance with the guidance and recommendations of applicable sections of the ''Quality Assurance Handbook for Air Pollution Measurement Systems, Volume I,'' EPA/600/R–94/038a and ''Quality Assurance Handbook for Air Pollution Measurement Systems, Volume II, Part 1,'' EPA–454/R–98–004 (available at *http://www.epa.gov/ttn/amtic/qabook.html*). Vendor modifications of a designated reference method used for purposes of Part 58 are permitted only with prior approval of the EPA, as provided in Part 53. Provisions concerning modification of such methods by users are specified under Section 2.8 (Modifications of Methods by Users) of Appendix C to 40 CFR Part 58.

In general, a method designation applies to any sampler or analyzer which is identical to the sampler or analyzer described in the application for designation. In some cases, similar samplers or analyzers manufactured prior to the designation may be upgraded or converted (e.g., by minor modification or by substitution of the approved operation or instruction manual) so as to be identical to the designated method and thus achieve designated status. The manufacturer should be consulted to determine the feasibility of such upgrading or conversion.

Part 53 requires that sellers of designated reference or equivalent method analyzers or samplers comply with certain conditions. These conditions are specified in 40 CFR 53.9 and are summarized below:

(a) A copy of the approved operation or instruction manual must accompany the sampler or analyzer when it is delivered to the ultimate purchaser.

(b) The sampler or analyzer must not generate any unreasonable hazard to operators or to the environment.

(c) The sampler or analyzer must function within the limits of the applicable performance specifications

given in 40 CFR Parts 50 and 53 for at least one year after delivery when maintained and operated in accordance with the operation or instruction manual.

(d) Any sampler or analyzer offered for sale as part of a reference or equivalent method must bear a label or sticker indicating that it has been designated as part of a reference or equivalent method in accordance with Part 53 and showing its designated method identification number.

(e) If such an analyzer has two or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(f) An applicant who offers samplers or analyzers for sale as part of a reference or equivalent method is required to maintain a list of ultimate purchasers of such samplers or analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the method has been canceled or if adjustment of the sampler or analyzer is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(g) An applicant who modifies a sampler or analyzer previously designated as part of a reference or equivalent method is not permitted to sell the sampler or analyzer (as modified) as part of a reference or equivalent method (although it may be sold without such representation), nor to attach a designation label or sticker to the sampler or analyzer (as modified) under the provisions described above, until the applicant has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified, or until the applicant has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the sampler or analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Human Exposure and Atmospheric Sciences Division (MD–E205–01), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this new reference method is intended to assist the States in establishing and operating their air quality surveillance systems under 40 CFR Part 58. Questions concerning the commercial availability or technical aspects of the method should be directed to the applicant.

Jewel F. Morris,

Acting Director, National Exposure Research Laboratory.

BILLING CODE 6560–50–P

FEDERAL ELECTION COMMISSION

Sunshine Act Notices

AGENCY: Federal Election Commission.

DATE AND TIME: Thursday, December 18, 2008, at 10 a.m.

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor).

STATUS: This meeting will be open to the public.

ITEMS TO BE DISCUSSED:

Correction and Approval of Minutes.

Draft Final Rules—Repeal of Millionaires' Amendment Regulations.

Draft Final Rules—Reporting Contributions Bundled by Lobbyists, Registrants and the PACs of Lobbyists and Registrants.

Report of the Audit Division on Karen Carter for Congress.

Report of the Audit Division on Texans for Henry Cuellar Congressional Campaign.

Report of the Audit Division on Christine Jennings for Congress.

Report of the Audit Division on Friends of Weiner.

Election of Officers.

Future Meeting Dates.

Management and Administrative Matters.

Individuals who plan to attend and require special assistance, such as sign language interpretation or other reasonable accommodations, should contact Mary Dove, Commission Secretary, at (202) 694–1040, at least 72 hours prior to the hearing date.

PERSON TO CONTACT FOR INFORMATION: Robert Biersack, Press Officer, Telephone: (202) 694–1220.

Mary W. Dove,

Secretary the Commission.

BILLING CODE 6715–01–M

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at *www.ffiec.gov/nic/*.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 12, 2009.

A. Federal Reserve Bank of New York (Ivan Hurwitz, Bank Applications Officer) 33 Liberty Street, New York, New York 10045–0001:

1. New York Private Bank & Trust Corporation and Emigrant Bancorp, Inc., both of New York, New York, to acquire 100 percent of the voting shares of DollarSavingsDirect.com (in formation), Ossining, New York.

B. Federal Reserve Bank of Chicago (Burl Thornton, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. Glenwood Bancorporation, Glenwood, Iowa, to acquire 100 percent of the voting shares of Tabor Enterprises, Inc., and thereby indirectly acqurie voting shares of First State Bank, both of Tabor, Iowa.

Board of Governors of the Federal Reserve System, December 15, 2008.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Toxicology Program (NTP); Office of Liaison, Policy and Review; Meeting of the NTP Board of Scientific Counselors Technical Reports Review Subcommittee

AGENCY: National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH).

ACTION: Meeting announcement and request for comments.

SUMMARY: Pursuant to Public Law 92–463, notice is hereby given of a meeting of the NTP Board of Scientific Counselors (BSC) Technical Reports Review Subcommittee (TRR Subcommittee). The primary agenda topic is the peer review of the findings and conclusions presented in six draft NTP Technical Reports of rodent toxicology and carcinogenicity studies in conventional rats and mice. The TRR Subcommittee meeting is open to the public with time scheduled for oral public comment. The NTP also invites written comments on the draft reports (see ''Request for Comments'' below). The TRR Subcommittee deliberations on the draft reports will be reported to the NTP BSC at a future meeting.

DATES: The TRR Subcommittee meeting will be held on February 25, 2009. All individuals who plan to attend are encouraged to register online by February 18, 2009, at the NTP Web site (*http://ntp.niehs.nih.gov/go/15833*). The draft reports should be posted by January 14, 2009. Written comments on the draft reports should be received by February 11, 2009. Persons needing interpreting services in order to attend should contact 301–402–8180 (voice) or 301–435–1908 (TTY). For other accommodations while on the NIEHS campus, contact 919–541–2475 or e-mail *niehsoeeo@niehs.nih.gov*. Requests should be made at least 7 days in advance of the event.

ADDRESSES: The TRR Subcommittee meeting will be held in the Rodbell Auditorium, Rall Building at the NIEHS, 111 T. W. Alexander Drive, Research Triangle Park, NC 27709. Public comments and any other correspondence should be submitted to Dr. Barbara Shane, Executive Secretary for the NTP BSC (NTP Office of Liaison, Policy and Review, NIEHS, P.O. Box 12233, MD A3–01, Research Triangle Park, NC 27709; courier address: 530 Davis Drive, Durham, NC 27713; telephone: 919–541–4253, fax: 919–541–0295; or e-mail: *shane@niehs.nih.gov*).

SUPPLEMENTARY INFORMATION:

Background

The primary agenda topic is the peer review of the findings and conclusions of six draft NTP Technical Reports of rodent toxicology and carcinogenicity studies (see Preliminary Agenda below).

Attendance and Registration

The meeting is scheduled for February 25, 2009, from 8:30 a.m. to adjournment and is open to the public with attendance limited only by the space available. Individuals who plan to attend are encouraged to register online at the NTP Web site by February 18, 2009 (*http://ntp.niehs.nih.gov/go/15833*) to facilitate access to the NIEHS campus. A photo ID is required to access the NIEHS campus. The NTP is making plans to videocast the meeting through the Internet at *http://www.niehs.nih.gov/news/video/live.*

Availability of Meeting Materials

A copy of the preliminary agenda, committee roster, and any additional information, when available, will be posted on the NTP Web site (*http://ntp.niehs.nih.gov/go/15833*) or may be requested in hardcopy from the Executive Secretary (see **ADDRESSES** above). The draft reports should be posted on the NTP Web site by January 14, 2009. Following the meeting, summary minutes will be prepared and made available on the NTP Web site.

Request for Comments

The NTP invites written comments on the draft reports, which should be received by February 11, 2009, to enable review by the TRR Subcommittee and NTP staff prior to the meeting. Persons submitting written comments should include their name, affiliation, mailing address, phone, e-mail, and sponsoring organization (if any) with the document. Written comments received in response to this notice will be posted on the NTP Web site, and the submitter will be identified by name, affiliation, and/or sponsoring organization.

Public input at this meeting is also invited and time is set aside for the presentation of oral comments on the draft reports. Each organization is allowed one time slot per draft report. At least 7 minutes will be allotted to each speaker, and if time permits, may be extended to 10 minutes at the discretion of the chair. Persons wishing to make an oral presentation are asked to notify Dr. Barbara Shane via online registration at *http://ntp.niehs.nih.gov/go/15833*, phone, or e-mail (see **ADDRESSES** above) by February 18, 2009, and if possible, to send a copy of the statement or talking points at that time. Written statements can supplement and may expand the oral presentation. Registration for oral comments will also be available at the meeting, although time allowed for presentation by on-site registrants may be less than that for pre-registered speakers and will be determined by the number of persons who register on-site.

Background Information on the NTP Board of Scientific Counselors

The NTP BSC is a technical advisory body comprised of scientists from the public and private sectors who provide primary scientific oversight to the overall program and its centers. Specifically, the BSC advises the NTP on matters of scientific program content, both present and future, and conducts periodic review of the program for the purposes of determining and advising on the scientific merit of its activities and their overall scientific quality. The TRR Subcommittee is a standing subcommittee of the BSC. BSC members are selected from recognized authorities knowledgeable in fields such as toxicology, pharmacology, pathology, biochemistry, epidemiology, risk assessment, carcinogenesis, mutagenesis, molecular biology, behavioral toxicology and neurotoxicology, immunotoxicology, reproductive toxicology or teratology, and biostatistics. Its members are invited to serve overlapping terms of up to four years. BSC and TRR Subcommittee meetings are held annually or biannually.

Dated: December 9, 2008.

Samuel H. Wilson,

Acting Director, National Institute of Environmental Health Sciences and National Toxicology Program.

Preliminary Agenda

National Toxicology Program Board of Scientific Counselors

Technical Reports Review Subcommittee Meeting

February 25, 2009

National Institute of Environmental Health Sciences

Rodbell Auditorium, Rall Building

111 T.W. Alexander Drive, Research Triangle Park, NC

Technical Reports (TR) Scheduled for Review

- TR 559 2,3′,4,4′,5-Pentachlorobiphenyl (PCB 118) (CASRN 31508–00–6)

○ Insulating fluid for electronics; a representative mono-ortho substituted PCB evaluated as part of a series of

studies to assess the carcinogenic potency of a class of agents with dioxin-like activity

- TR 558 3,3′,4,4′-Tetrachloroazobenzene (CASRN 14047–09–7)
  - Impurity in dichloroaniline and in herbicides derived from dichloroaniline; evaluated as part of the Dioxin Toxic Equivalency Factor Evaluation for compounds with dioxin-like activity
- TR 560 Androstenedione (CASRN 63–05–8)
  - Dietary supplement that was used by athletes during training, but now is banned for over-the-counter sale
- TR 557 β-Myrcene (CASRN 123–35–3)
  - Intermediate in the commercial production of terpene alcohols, which are intermediates in the production of aroma and flavoring chemicals; used as a scent in cosmetics and soaps and as a flavoring additive in food and beverages; major constituent of hop and bay oils
- TR 555 Tetralin (CASRN 119–64–2)
  - Used as an industrial solvent for paints, waxes, polishes, pesticides, rubber, asphalt, and aromatic hydrocarbons; used as an insecticide; derived from naphthalene
- TR 562 Goldenseal Root Powder (CASRN goldensealRT)
  - Natural herbal remedy for which there is little or no toxicity data

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Assistant Secretary for Planning and Evaluation; Privacy Act of 1974; Report of New System of Records

AGENCY: Office of the Assistant Secretary for Planning and Evaluation (ASPE).

ACTION: Notice of new System of Records (SOR).

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, the Office of Assistant Secretary for Planning and Evaluation (ASPE) is proposing to establish a new system of records, called the Partnership for Long Term Care Data Set. The Partnership allows states to offer special Medicaid asset disregards to persons purchasing specially certified long term care insurance policies. This program and the data collection were established by the Deficit Reduction Act of 2005—Section 6021. Although the Privacy Act requires only that the ''routine uses'' portion of the system be published for comment, ASPE invites comments on all portions of this notice. Elsewhere in today's **Federal Register**, a related final rulemaking establishing the State Long Term Care Partnership: Reporting Requirements for Insurers.

DATES: *Effective Date:* The new system of records, including routine uses, will become effective January 27, 2009 unless ASPE receives comments that require alteration to this notice.

ADDRESSES: Address comments to the Privacy Act Officer, Office of Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, 200 Independence Ave, SW., Room Number 436E.2, Washington, DC 20201. Comments received will be available for review at this location, by appointment, during regular business hours, Monday through Friday from 9 a.m.–3 p.m. Eastern Time Zone. Call 202–205–8999 for appointment.

FOR FURTHER INFORMATION CONTACT: Hunter McKay, Office of the Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, 200 Independence Ave, SW., Room Number 424E, Washington, DC 20201. The telephone number is (202) 205–8999 and the e-mail address is *hunter.mckay@hhs.gov.*

SUPPLEMENTARY INFORMATION:

The Partnership for Long Term Care initiative was mandated by Section 6021 of Public Law 109–171, the Deficit Reduction Act of 2005 (DRA). The Partnership allows states to offer special Medicaid asset disregards to persons purchasing specially certified long term care insurance policies. The asset disregards allow program participants to keep additional assets should they need to apply for Medicaid coverage of long term care. DRA also mandates the use of a standard reporting system for all insurers participating in a state Partnership for Long Term Care program through a Medicaid State Plan Amendment approved after May 14, 1993. Participating insurers are required to report data on Partnership policy purchasers, features of the policies they purchase, and, selected claims information.

The Privacy Act permits us to disclose information without the consent of individuals under a ''routine use.'' A routine use is a disclosure outside of the Department of Health and Human Services that is compatible with the purpose for which we collected the information. The proposed routine uses in the new system of records meet the compatibility criterion of the statute.

Dated: November 21, 2008.

Mary M. McGeein,

Principal Deputy Assistant Secretary for Planning and Evaluation.

SYSTEM NO.
09–90–0085

SYSTEM NAME:

Partnership for Long Term Care Data Set.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Thomson Reuters, 610 Opperman Drive, Eagan, Minnesota 55123.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Purchasers of long term care insurance policies certified by a selected state (Medicaid state plan amendment approved after May 14, 1993) insurance commissioner as meeting the state's Partnership's requirements for certification.

CATEGORIES OF RECORDS IN THE SYSTEM:

- ◊ Name
- ◊ Address
- ◊ Social Security Number
- ◊ Date of Birth
- ◊ Long Term Care Insurance Policy Information
  - Long Term Care Insurance Company
  - Long Term Care Insurance Policy Number
  - Type of Policy (Group, Individual and Comprehensive, Nursing Home Only)
  - Policy Issue State
  - Lifetime Maximum Benefit
  - Duration of Insurance Benefits (dollars or days)
  - Daily Benefit Amount
  - Inflation Protection Feature (required by DRA for select ages)
- ◊ Claims Information
  - Qualifying Condition for Claim (ADL, Cognitive Impairment, Other)
  - Benefits Payment by Type of Service (institutional or home)
  - Remaining Lifetime Maximum Benefits (by service type when multiple pools)

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The authority for this system of records is contained in Section 6021 of the Deficit Reduction Act of 2005, Public Law 109–171, 42 U.S.C. 1396p note.

PURPOSE(S) OF THE SYSTEM:

The purpose of the system of records is to support Medicaid eligibility determinations for persons participating in a Partnership for long term care program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Section 552a(b)(3) of the Privacy Act permits an agency to establish disclosures not anticipated by the statute itself, compatible with the purpose for which the information was collected, under which the information may be released without the consent of the individual to whom the information pertains. ASPE is identifying the following routine disclosures for information held in the Partnership for Long Term Care Data Set. Each proposed disclosure of information under these routine uses will be evaluated to ensure that the disclosure is legally permissible, including, but not limited to, ensuring that the purpose of the disclosure is compatible with the purpose for which the information was collected. Disclosure may be made under the following circumstances.

1. Disclosure may be made to a State, local, tribal or other public authority for the purpose of verifying Partnership program participation and calculation of the amount of the Medicaid Partnership asset disregard.

2. Disclosure may be made to the Department of Justice when: (a) The agency or any component thereof; or (b) any employee of the agency in his or her official capacity; (c) any employee of the agency in his or her individual capacity where agency or the Department of Justice has agreed to represent the employee; or (d) the United States Government, is a party to litigation or has an interest in such litigation, and by careful review, the agency determines that the records are both relevant and necessary to the litigation and the use of such records by the Department of Justice is therefore deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.

3. Disclosure may be made to a court or adjudicative body in a proceeding when: (a) The agency or any component thereof; or (b) any employee of the agency in his or her official capacity; (c) any employee of the agency in his or her individual capacity where agency or the Department of Justice has agreed to represent the employee; or (d) the United States Government, is a party to litigation or has an interest in such litigation, and by careful review, the agency determines that the records are both relevant and necessary to the litigation and the use of such records is therefore deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.

4. When a record on its face, or in conjunction with other records, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto, disclosure may be made to the appropriate public authority, whether Federal, foreign, state, local, tribal, or otherwise responsible for enforcing, investigating, or prosecuting such violation or charged with enforcing, or implementing the statute, rule, regulation, or order issued pursuant hereto, if the information disclosed is relevant to any enforcement, regulatory, investigative or prosecutorial responsibility of the receiving entity.

5. Disclosure may be made to a Member of Congress or to a congressional staff member in response to an inquiry of the congressional office made at the written request of the constituent about whom the record is maintained. The Member of Congress does not have any greater authority to obtain records than the individual would have if requesting the record directly.

6. Disclosure may be made to agency contractors, grantees, or volunteers who have been engaged to assist the agency in the performance of a contract service, grant, cooperative agreement or other activity related to this system of records and who need to have access to the records in order to perform the activity. Recipients shall be required to comply with the requirements of the Privacy Act of 1974, as amended 5 U.S.C. 552a.

7. Disclosure may be made to an individual or organization conducting a research, demonstration, or evaluation project related to long term care financing generally, the performance of long term care insurance or Partnership programs, or for the purposes of determining, evaluating, assessing cost effectiveness, or quality of the long term care services provided through a Partnership program.

8. To another Federal or state agency for the purpose of operating the Medicaid program or otherwise assisting states in the administration of those portions of the Medicaid program with direct connection to state Partnership programs.

9. To appropriate federal agencies and Department contractors that have a need to know the information for the purpose of assisting the Department's efforts to respond to a suspected or confirmed breach of the security or confidentiality of information maintained in this system of records, and the information disclosed is relevant and necessary for that assistance.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All records are stored on paper or magnetic media.

RETRIEVABILITY:

The records are retrieved by the long term care insurance policy number, name, social security number, or a combination of these.

SAFEGUARDS:

For computerized records, safeguards established in accordance with Department standards and National Institute of Standards and Technology guidelines (e.g., security codes) will be used, limiting access to authorized personnel. System security policy and practices are established in accordance with HHS, Information Resources Management (IRM) Circular #10, Automated Information Systems Security Program; HCFA Automated Information System (AIS) Guide, Systems Security Policies; and OMB Circular No. A–130 (revised), Appendix III.

RETENTION AND DISPOSAL:

We are working with the National Archives and Records Administration (NARA) to determine the appropriate retention schedule. Due to the nature of these records, we expect them to be preserved for at least 20 years after the death of the policyholder. When the retention period has been approved by NARA, we will amend this notice.

SYSTEM MANAGER(S) AND ADDRESS:

Hunter McKay, Office of the Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, 200 Independence Ave, SW., Room Number 424E, Washington, DC 20201.

NOTIFICATION PROCEDURE:

For purpose of notification, individuals may write the system manager, who will require the insured's name, insurance company name, insurance policy number, and, for verification purposes, date of birth, to ascertain whether or not the individual's record is in the system. (These notification procedures are in accordance with Department regulation 45 CFR part 5b.)

RECORD ACCESS PROCEDURE:

Same as notification procedures. Requestors should also reasonably specify the record contents being

sought. (These access procedures are in accordance with the Department regulation 45 CFR 5b.5(a)(2).)

CONTESTING RECORD PROCEDURES:

Contact the system manager named above, and reasonably identify the record and specify the information to be contested. State the corrective action sought and the reasons for the correction with supporting justification. (These procedures are in accordance with Department regulation 45 CFR 5b.7.)

RECORD SOURCE CATEGORIES:

Information is reported by private long term care insurance companies selling policies that have been certified by a state insurance commissioner as Partnership qualified in a state that had obtained a Medicaid state plan amendment approved after of May 14, 1993.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2008–N–0613]

Clinical Studies of Safety and Effectiveness of Orphan Products

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration's (FDA) Office of Orphan Product Development (OPD) is providing notice of a funding opportunity announcement for Federal assistance. The goal of the OPD grant program is to support the clinical development of products for use in rare diseases or conditions where no current therapy exists or where the proposed product will be superior to the existing therapy. FDA provides grants for clinical studies on safety and/or effectiveness that will either result in, or substantially contribute to, market approval of these products.

DATES: See section IV.E of the **SUPPLEMENTARY INFORMATION** section for application submission dates.

FOR FURTHER INFORMATION CONTACT:

Scientific/Research Contact: Katherine Needleman, Office of Orphan Products Development, Food and Drug Administration (HF–35), rm. 6A–55, 5600 Fishers Lane, Rockville, MD 20857, 301–827–3666, e-mail: *katherine.needleman@fda.hhs.gov*.

Financial/Grants Management Contact: Vieda Hubbard, Office of Acquisitions & Grant Services, 5630 Fishers Lane (HFA–500), rm. 2104, Rockville, MD 20857, 301–827–7177, e-mail: *vieda.hubbard@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Funding Opportunity Description

Research Project Grants (R01)
Request for Application (RFA) Number: RFA–FD–09–001
Catalog of Federal Domestic Assistance Number(s): 93.103

A. Research Objectives

1. Background

OPD was created to identify and promote the development of orphan products. Orphan products are drugs, biologics, medical devices, and foods for medical purposes that are indicated for a rare disease or condition (that is, one with prevalence, not incidence, of fewer than 200,000 people in the United States). Diagnostics and vaccines will qualify for orphan status only if the U.S. population to whom they will be administered is fewer than 200,000 people per year.

2. Research Objectives

The goal of FDA's OPD grant program is to support the clinical development of products for use in rare diseases or conditions where no current therapy exists or where the proposed product will be superior to the existing therapy. FDA provides grants for clinical studies on safety and/or effectiveness that will either result in, or substantially contribute to, market approval of these products. Applicants must include, in the application's ''Background and Significance'' section, documentation to support the estimated prevalence of the orphan disease or condition (or in the case of a vaccine or diagnostic, information to support the estimates of how many people will be administered the diagnostic or vaccine annually) and an explanation of how the proposed study will either help gain product approval or provide essential data needed for product development.

See section VII.A of this document for policies related to this announcement.

II. Award Information

A. Mechanism of Support

Support will be in the form of a research project (R01) grant. The R01 grant is an award made to support a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing the investigator's specific interest and competencies, based on the mission of FDA. The Project Director/Principal Investigator (PD/PI) will be solely responsible for planning, directing, and executing the proposed project.

All awards will be subject to all policies and requirements that govern the research grant programs of the Public Health Service (PHS) as incorporated in the Department of Health and Human Services (HHS) Grants Policy Statement, dated January 1, 2007 (*http://www.hhs.gov/grantsnet/adminis/gpd/index.htm*), including the provisions of 42 CFR part 52 and 45 CFR parts 74 and 92. The regulations issued under Executive Order 12372 do not apply to this program. The National Institutes of Health (NIH) modular grant program does not apply to this FDA grant program. All grant awards are subject to applicable requirements for clinical investigations imposed by sections 505, 512, and 515 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355, 360b, and 360e), section 351 of the PHS Act, regulations issued under any of these sections, and other applicable HHS statutes and regulations regarding human subject protection.

Except for applications for studies of medical foods that do not need premarket approval, FDA will only award grants to support premarket clinical studies to determine safety and effectiveness for approval under section 505 or 515 of the Federal Food, Drug, and Cosmetic Act or safety, purity, and potency for licensing under section 351 of the PHS Act. FDA will support the clinical studies covered by this notice under the authority of section 301 of the PHS Act (42 U.S.C. 241). FDA's research program is described in the Catalog of Federal Domestic Assistance (CFDA) No. 93.103.

B. Funds Available

1. Award Amount

Of the estimated FY 2010 funding ($14.1 million), approximately $10 million will fund noncompeting continuation awards, and approximately $4.1 million will fund 10 to 12 new awards, subject to availability of funds. It is anticipated that funding for the number of noncompeting continuation awards and new awards in FY 2011 will be similar to FY 2010. Grants will be awarded up to $200,000 or up to $400,000 in total (direct plus indirect) costs per year for up to 4 years. Please note that the dollar limitation will apply to total costs, not direct costs, as in

previous years. A fourth year of funding is available only for phase 2 or 3 clinical studies. Applications for the smaller grants ($200,000) may be for phase 1, 2, or 3 studies. Study proposals for the larger grants ($400,000) must be for studies continuing in phase 2 or 3 of investigation. Budgets for each year of requested support may not exceed the $200,000 or $400,000 total cost limit, whichever is applicable.

Phase 1 studies, including the initial introduction of an investigational new drug (IND) or device into humans, are usually conducted in healthy volunteer subjects, and are designed to determine the metabolic and pharmacological actions of the product in humans, and the side effects, including those associated with increasing drug doses. In some phase 1 studies that include subjects with the rare disorder, it may also be possible to gain early evidence on effectiveness.

Phase 2 studies include early controlled clinical studies conducted to: (1) Evaluate the effectiveness of the product for a particular indication in patients with the disease or condition and (2) determine the common short-term side effects and risks associated with it.

Phase 3 studies gather more information about effectiveness and safety that is necessary to evaluate the overall risk-benefit ratio of the product and to provide an acceptable basis for product labeling.

2. Length of Support

The length of support will depend on the nature of the study. For those studies with an expected duration of more than 1 year, a second, third, or fourth year of noncompetitive continuation of support will depend on the following factors: (1) Performance during the preceding year, (2) compliance with regulatory requirements of IND/investigational device exemption (IDE), and (3) availability of Federal funds.

3. Funding Plan

In addition to the requirement for an active IND/IDE discussed in section V.C of this document, documentation of assurances with the Office of Human Research Protection (OHRP) (see section IV.F.1 of this document) must be on file with the FDA grants management office before an award is made. Any institution receiving Federal funds must have an institutional review board (IRB) of record even if that institution is overseeing research conducted at other performance sites. To avoid funding studies that may not receive or may experience a delay in receiving IRB approval, documentation of IRB approval and Federal Wide Assurance (FWA or assurance) for the IRB of record for all performance sites must be on file with the FDA grants management office before an award to fund the study will be made. In addition, if a grant is awarded, grantees will be informed of any additional documentation that should be submitted to FDA's IRB.

Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. Although the financial plans of FDA provide support for this program, awards under this funding opportunity are contingent upon the availability of funds.

FDA grants policies as described in the HHS Grants Policy Statement: (*http://www.hhs.gov/grantsnet/adminis/gpd/index.htm*) will apply to the applications submitted and awards made in response to this FOA.

III. Eligibility Information

A. Eligible Applicants

1. Eligible Institutions

The grants are available to any foreign or domestic, public or private, for-profit or nonprofit entity (including State and local units of government). Federal agencies that are not part of HHS may apply. Agencies that are part of HHS may not apply. For-profit entities must commit to excluding fees or profit in their request for support to receive grant awards. Organizations that engage in lobbying activities, as described in section 501(c)(4) of the Internal Revenue Code of 1968, are not eligible to receive grant awards.

2. Eligible Individuals

Any individual(s) with the skills, knowledge, and resources necessary to carry out the proposed research as the PD/PI is invited to work with his/her organization to develop an application for support. Individuals from under-represented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for FDA support.

More than one PD/PI (i.e., multiple PDs/PIs) may be designated on the application for projects that require a ''team science'' approach and therefore clearly do not fit the single-PD/PI model. Additional information on the implementation plans and policies and procedures to formally allow more than one PD/PI on individual research projects is available at *http://grants.nih.gov/grants/multi_pi*.[1] All PDs/PIs must be registered in the NIH electronic Research Administration (eRA) Commons (hereafter called eRA Commons or the Commons) prior to the submission of the application. (See *http://era.nih.gov/ElectronicReceipt/preparing.htm* for instructions.)

When multiple PDs/PIs are proposed, FDA requires one PD/PI to be designated as the ''Contact'' PI. The ''Contact'' PI will be responsible for: (1) All communication between the PDs/PIs and FDA, (2) assembling the application materials outlined in section IV of this document, and (3) coordinating progress reports for the project. The contact PD/PI must meet all eligibility requirements for PD/PI status in the same way as other PDs/PIs, but has no other special roles or responsibilities within the project team beyond those mentioned in the previous sentence.

The decision of whether to apply for a single PD/PI or multiple PD/PI grant is the responsibility of the investigators and applicant organizations and should be determined by the scientific goals of the project. Applications for multiple PD/PI grants will require additional information, as outlined in the instructions in section IV of this document, and the FDA review criteria for approach, investigator, and environment has been modified to accommodate applications involving either a single PD/PI or multiple PDs/PIs as indicated in section IV of this document. A weak or inappropriate PD/PI can have a negative effect on the review. Multiple PDs/PIs on a project share the authority and responsibility for leading and directing the project, intellectually and logistically. Each PD/PI is responsible and accountable to the grantee organization, or, as appropriate, to a collaborating organization, for the proper conduct of the project or program, including the submission of all required reports. For further information on multiple PDs/PIs, please see *http://grants.nih.gov/grants/multi_pi*.

B. Cost Sharing or Matching

This grant program does not require the applicant to match or share in the project costs if an award is made.

C. Other Special Eligibility Criteria

Applicants may submit more than one application, provided each application is scientifically distinct.

[1] FDA has verified the Web site addresses throughout this document, but FDA is not responsible for any subsequent changes to the Web sites after this document publishes in the **Federal Register**.

IV. Application and Submission Information

To comply with the President's Management Agenda, HHS is participating, as a partner, in the new governmentwide grants.gov application site. Applicants should apply electronically by visiting the Web site www.grants.gov and following instructions under ''Apply for Grants.''Users of grants.gov will be able to download a copy of the application package, complete it offline, and then upload and submit the application via the grants.gov Web site. We strongly encourage using the ''Tips'' posted on www.grants.gov under the announcement number when preparing your submission. This process is similar to the R01 Grant Application process currently used at NIH. You can visit the following Web site for helpful background on preparing to apply, preparing an application, and submitting an application to Grants.gov: *http://era.nih.gov/ElectronicReceipt/*. In order to apply electronically, the applicant must have a Data Universal Number System (DUNS) number, and register in the Central Contractor Registration (CCR) database, in eRA Commons (*http://era.nih.gov/ElectronicReceipt/preparing.htm*), and in grants.gov (further explained in the following section IV.A of this document).

A. Registration Information

To download a SF424 (R&R) Application Package and SF424 (R&R) Application Guide for completing the SF424 (R&R) forms for this FOA, link to *http://www.grants.gov/Apply/* (hereafter called Grants.gov/Apply) and follow the directions provided on that Web site.

A one-time registration is required for institutions/organizations at both:

- Grants.gov (*http://www.grants.gov/GetStarted*) and
- eRA Commons (*http://era.nih.gov/ElectronicReceipt/preparing.htm*).

A registration process with Grants.gov and eRA Commons is necessary before submission and applicants are highly encouraged to start the process at least 4 weeks prior to the grant submission date. PDs/PIs should work with their institutions/organizations to make sure they are registered in the eRA Commons.

Several additional separate actions are required before an applicant institution/organization can submit an electronic application, as follows:

(1) Organizational/Institutional Registration at: *http://www.grants.gov/applicants/get_registered.jsp.*

- Your organization will need to obtain a DUNS number (*https://eupdate.dnb.com/requestoptions/government/ccrreg/*) and register with the CCR (*http://www.ccr.gov/*) as part of the Grants.gov registration process.
- The DUNS number is a 9-digit identification number that uniquely identifies business entities.
- The CCR database is a governmentwide warehouse of commercial and financial information for all organizations conducting business with the Federal Government.
- If your organization does not have a Taxpayer Identification Number (TIN) or Employer Identification Number (EIN), allow for extra time. A valid TIN or EIN is necessary for CCR registration.
- The CCR also validates the EIN against Internal Revenue Service records—a step that will take an additional 1 to 2 business days.
- Tips for foreign organization registration are available at: *http://era.nih.gov/ElectronicReceipt/preparing.htm#4*.
- Direct questions regarding Grants.gov registration can be directed to the

Grants.gov Customer Support Center: (*http://www.grants.gov/help/help.jsp*), 1–800–518–4726, Monday through Friday, 7 a.m. to 9 p.m., e.s.t., e-mail: *support@grants.gov*.

(2) Organizational/Institutional Registration on the eRA Commons (*https://commons.era.nih.gov/commons/registration/registrationInstructions.jsp*)

- To find out if an organization is already Commons-registered, see the ''List of Grantee Organizations Registered in eRA Commons''(*http://era.nih.gov/userreports/ipf_com_org_list.cfm*).
- Direct questions regarding the Commons registration can be directed to: eRA Commons Help Desk, 301–402–7469 or 866–504–9552 (toll free), TTY: 301–451–5939, Monday through Friday, 7 a.m. to 8 p.m., e.s.t., e-mail: *commons@od.nih.gov*.

(3) PD/PI Registration on the eRA Commons Web site at: *http://era.nih.gov/docs/COM_UGV2630.pdf*.

- The individual(s) designated as PDs/PIs on the application must also be registered in the eRA Commons. In the case of multiple PDs/PIs, all PDs/PIs must be registered in the eRA Commons prior to the submission of the application.
- Each PD/PI must hold a PD/PI account in the Commons. Applicants should not share a Commons account for both an Authorized Organization Representative/Signing Official (AOR/SO) role and a PD/PI role; however, if they have both a PD/PI role and an Internet Assisted Review (IAR) role, both roles should exist under one Commons account. When multiple PDs/PIs are proposed, all PDs/PIs at the applicant organization must be affiliated with that organization. PDs/PIs located at another institution need not be affiliated with the applicant organization, but must be affiliated with their own organization to be able to access the Commons.
- This registration/affiliation must be done by the AOR/SO or their designee who is already registered in the Commons.
- Both the PD/PI(s) and AOR/SO need separate accounts in the eRA Commons since both are authorized to view the application image.Note that if a PD/PI is already registered in the eRA Commons, another registration to apply for an FDA opportunity is not necessary.

Note that if a PD/PI is also an NIH peer reviewer with an Individual DUNS and CCR registration, that particular DUNS number and CCR registration are for the individual reviewer only. These are different than any DUNS number and CCR registration used by an applicant organization. Individual DUNS and CCR registration should be used only for the purposes of personal reimbursement and should not be used on any grant applications submitted to the Federal Government.

Several of the steps of the registration process could take 4 weeks or more. Therefore, applicants should immediately check with their business official to determine whether their organization/institution is already registered in both Grants.gov and the Commons (*https://commons.era.nih.gov/commons/*). The FDA will accept electronic applications only from organizations that have completed all necessary registrations.

If you experience technical difficulties with your online submission, you should contact the grants.gov Customer Response Center: (*http://www.grants.gov/contactus/contactus.jsp*. If the Customer Response Center is unable to resolve your problem, please contact Marc Pitts, Grants Management Specialist, Division of Acquisition Support and Grants (DASG), Office of Acquisition & Grant Services (OAGS), Food and Drug Administration, 301–827–7162, e-mail: *marc.pitts@fda.hhs.gov*.

B. Request Application Information

In FYs 2010 and 2011, all applications must be submitted electronically through Grants.gov. Applicants must download the SF424 (R&R) application forms and the SF424 (R&R) Application Guide for this FOA through Grants.gov/Apply.

Note: Only the forms package directly attached to a specific FOA can be used. You will not be able to use any other SF424 (R&R) forms (e.g., sample forms, forms from another FOA), although some of the ''Attachment'' files may be useable for more than one FOA.

For further assistance, contact Marc Pitts at 301–827–7162. Telecommunications for the hearing impaired: 301–480–0434.

C. Content and Form of Application Submission

Prepare all applications using the SF424 (R&R) application forms along with the SF424 (R&R) Application Guide for this FOA through *http://www.grants.gov/applicants/apply_for_grants.jsp*.

Note: The following link provides additional information to the Adobe transition submission process: (*http://era.nih.gov/ElectronicReceipt/files/adobe_transition.pdf*).

The SF424 (R&R) Application Guide is critical to submitting a complete and accurate application to FDA. Some fields within the SF424 (R&R) application components, although not marked as mandatory, are required by FDA (e.g., the ''Credential'' log-in field of the ''Research & Related Senior/Key Person Profile'' component must contain the PD/PI's assigned eRA Commons User ID). Agency-specific instructions for such fields are clearly identified in the Application Guide. For additional information, see ''Frequently Asked Questions—Application Guide, Electronic Submission of Grant Applications'' (*http://era.nih.gov/ElectronicReceipt/faq_prepare_app.htm#1*).

Prepare all applications using the SF424 (R&R) application forms along with the SF424 (R&R) Application Guide for this FOA through Grants.gov/Apply at: *http://www.grants.gov/applicants/apply_for_grants.jsp*.

Note that the move to electronic applications has brought a change in terminology. The new Grants.gov terminology is as follows:

New = New

Resubmission = A Revised or Amended application

Renewal = Competing Continuation

Continuation = Noncompeting Progress Report

Revision = Competing Supplement

The SF424 (R&R) application has several components. Some components are required, others are optional. The forms package associated with this FOA in Grants.gov/APPLY includes all applicable components, required and optional. A completed application in response to this FOA includes the data in the following components:

Required Components

SF424 (R&R) (Cover component)

Research & Related Project/Performance Site Locations

Research & Related Other Project Information

Research & Related Senior/Key Person

PHS398 Cover Page Supplement

PHS398 Research Plan

PHS398 Checklist

PHS398 Research & Related Budget

Research & Related Subaward Budget Attachment(s) Form

Optional Components

PHS398 Cover Letter File

Foreign Organizations—(Non-domestic (non-U.S.) Entity)

Applications from foreign organizations must:

- Request budgets in U.S. dollars.
- Prepare detailed budgets for all applications (that is, complete the Research & Related Budget component of the SF424).
- Not seek charge back of customs and import fees.
- Make every effort to comply with the format specifications, which are based upon a standard U.S. paper size of 8.5'' x 11'' within each portable document format (PDF).
- Comply with Federal/FDA policies on human subjects, animals, and biohazards.
- Comply with Federal/FDA biosafety and biosecurity regulations. See section VI.B of this document, ''Administrative and National Policy Requirements.''
- Indicate in the 398 Research Plan how the proposed project has specific relevance to FDA's mission and objectives and has the potential for significantly advancing sciences in the United States.

Proposed research should provide special opportunities for furthering research programs through the use of unusual talent, resources, populations, or environmental conditions in other countries that are not readily available in the United States or that augment existing U.S. resources.

D. Special Instructions

1. Applicants Who Are Submitting a Renewal or Revision

Applicants submitting a renewal or resubmission are required to enter the previous grant number into the Federal Identifier field in the SF424 (R&R) Cover Component form (box #8). Renewal and resubmission applications that do not include this number will receive an error message. Applicants should log on to the eRA Commons to obtain the previous grant number. If the number is not available in Commons, contact Marc Pitts at 301–827–7162 at FDA to get the previous grant number in order to submit the application. Visit *http://era.nih.gov/ElectronicReceipt/resubmission_FAQ.htm* for additional information. If an application for the same study was submitted in response to a previous RFA but has not yet been funded, an application in response to this notice will be considered a request to withdraw the previous application. The applicant for a resubmitted application should address the issues presented in the summary statement from the previous review and include a copy of the summary statement itself as part of the resubmitted application. An application that has received two prior disapprovals is not eligible for resubmission.

2. Applications With Multiple PDs/PIs

When multiple PDs/PIs are proposed, FDA requires one PD/PI to be designated as the ''Contact'' PI. The ''Contact PI will be responsible for: (1) All communication between the PDs/PIs and FDA, (2) assembling the application materials outlined below, and (3) coordinating progress reports for the project. The contact PD/PI must meet all eligibility requirements for PD/PI status in the same way as other PDs/PIs, but has no other special roles or responsibilities within the project team beyond those mentioned in the previous sentence.

Information for the Contact PD/PI should be entered in item 15 of the SF424 (R&R) Cover component. All other PDs/PIs should be listed in the Research & Related Senior/Key Person component and assigned the project role of ''PD/PI.'' Please remember that all PDs/PIs must be registered in the eRA Commons prior to application submission. The Commons ID of each PD/PI must be included in the ''Credential'' field of the Research & Related Senior/Key Person component. Failure to include this data field will cause the application to be rejected.

All projects proposing multiple PDs/PIs will be required to include a new section describing the leadership of the project.

Multiple PD/PI Leadership Plan: For applications designating multiple PDs/PIs, a new section of the research plan entitled ''Multiple PD/PI Leadership Plan'' (section 14 of the PHS398 Research Plan component), must be included. A rationale for choosing a multiple PD/PI approach should be described. The governance and organizational structure of the research project should be described, and should include communication plans, process

for making decisions on scientific direction, and procedures for resolving conflicts. The roles and administrative, technical, and scientific responsibilities for the project or program should be delineated for the PDs/PIs, including responsibilities for human subjects or animal studies as appropriate.

If budget allocation is planned, the distribution of resources to specific components of the project or the individual PDs/PIs should be delineated in the Leadership Plan. In the event of an award, the requested allocations may be reflected in a footnote on the Notice of Award (NoA).

3. Applications Involving a Single Institution

When all PDs/PIs are within a single institution, follow the instructions contained in the SF424 (R&R) Application Guide: (*http://grants.nih.gov/grants/funding/424/index.htm*).

4. Applications Involving Multiple Institutions

When multiple institutions are involved, one institution must be designated as the prime institution and funding for the other institution(s) must be requested via a subcontract to be administered by the prime institution. When submitting a detailed budget, the prime institution should submit its budget using the Research & Related Budget component. All other institutions should have their individual budgets attached separately to the Research &Related Subaward Budget Attachment(s) Form. See section 4.8 of the SF424 (R&R) Application Guide for further instruction regarding the use of the subaward budget form.

Information concerning the consortium/subcontract budget is provided in the budget justification. Separate budgets for each consortium/subcontract grantee are required.

E. Submission Dates and Times

1. Submission, Review, and Anticipated Start Dates

Opening Date: January 4, 2009, for FY 2010 and January 3, 2010, for FY 2011 (Earliest date an application may be submitted to Grants.gov)
Application Due Date(s): February 4, 2009, in FY 2010 and February 3, 2010, in FY 2011
Peer Review Date(s): May/June 2009 and 2010 and November/December 2009 and 2010
Council Review Date(s): September 2009 and September 2010
Earliest Anticipated Start Date(s): November 2009 and November 2010

Please note that there is only one receipt date for FY 2010 and one receipt date for FY 2011 for new and resubmitted applications.Resubmissions and applications that were submitted previously but were deemed non-responsive to the RFA due to technical or IND issues will be allowed to resubmit on October 15, 2009, and October 15, 2010. Resubmissions will also be accepted in the February receipt dates in both FYs.

Note: On time submission requires that applications be successfully submitted to Grants.gov no later than 5 p.m. local time (of the applicant institution/organization). Applications must be received by the close of business on February 4, 2009. Late applications may be accepted under extreme circumstances beyond the control of the applicant. Applications not received on time will not be considered for review and will generally be returned to the applicant.

The protocol in the grant application should be submitted to the IND/IDE no later than January 5, 2009, for FY 2010 and no later than January 4, 2010, for FY 2011. The current version of the protocol that is included in the grant application and is intended to be used if the study is funded is the protocol that must be submitted to the IND/IDE before the application is reviewed. The date that corresponds with the IND/IDE submission/amendment date that corresponds to the protocol in the grant application should be reported in the title of the grant with the IND/IDE number.

a. *Letter of intent.* A letter of intent is not required for the funding opportunity.

2. Submitting an Application Electronically to FDA

To submit an application in response to this FOA, applicants should access this FOA via *http://www.grants.gov/Apply* and follow steps 1 through 4. Note: Applications must only be submitted electronically.

3. Application Processing

Applications may be submitted on or after the opening date and must be successfully received by Grants.gov no later than 5 p.m. local time (of the applicant institution/organization) on the application submission/receipt date(s). (See section IV.D.1. of this document.) If an application is not submitted by the receipt date(s) and time, the application may be delayed in the review process or not reviewed.

Once an application package has been successfully submitted through Grants.gov, any errors have been addressed, and the assembled application has been created in the eRA Commons, the PD/PI and the AOR/SO have 2 business days to view the application image to determine if any further action is necessary.

- If everything is acceptable, no further action is necessary. The application will automatically move forward for processing after 2 business days, excluding Federal holidays.
- Prior to the submission deadline, the AOR/SO can ''Reject'' the assembled application and submit a changed/corrected application within the 2-day viewing window. This option should be used if it is determined that some part of the application was lost or did not transfer correctly during the submission process, the AOR/SO will have the option to ''Reject'' the application and submit a Changed/Corrected application. In these cases, please contact the eRA Help Desk to ensure that the issues are addressed and corrected. Once rejected, applicants should follow the instructions for correcting errors in section 2.12 of the SF424 (R&R) Application Guide (*http://grants.nih.gov/grants/funding/424/index.htm#*), including the requirement for cover letters on late applications. The ''Reject'' feature should also be used if you determine that warnings are applicable to your application and need to be addressed now. Remember, warnings do not stop further application processing. If an application submission results in warnings (but no errors), it will automatically move forward after 2 weekdays if no action is taken. Some warnings may need to be addressed later in the process. If the 2-day window falls after the submission deadline, the AOR/SO will have the option to ''Reject'' the application if, due to an eRA Commons or Grants.gov system issue, the application does not correctly reflect the submitted application package (e.g., some part of the application was lost or didn't transfer correctly during the submission process). The AOR/SO should first contact the eRA Commons Helpdesk (*http://ithelpdesk.nih.gov/eRA/*) to confirm the system error, document the issue, and determine the best course of action. FDA will not penalize the applicant for an eRA Commons or Grants.gov system issue.
- If the AOR/SO chooses to ''Reject'' the image after the submission deadline for a reason other than an eRA Commons or Grants.gov system failure, a changed/corrected application still can be submitted but it will be subject to the NIH/FDA late policy (*http://grants.nih.gov/grants/guide/notice-files/NOT-OD-05-030.html*) guidelines and may not be accepted. The reason for this

delay should be explained in the cover letter attachment. Late applications may be accepted under extreme circumstances beyond the control of the applicant. In the absence of such extreme circumstances beyond the applicant's control, applications not received on time will not be considered for review and will generally be returned to the applicant.

- Both the AOR/SO and PD/PI will receive e-mail notifications when the application is rejected or the application automatically moves forward in the process after 2 days.
- In unusual circumstances, the following can occur: Additional information may be considered, on a case-by-case basis, for inclusion in the ad hoc expert panel review, however, FDA cannot assure inclusion of any information after the receipt date other than evidence of final IRB approval, FWA or assurance, and certification of adequate supply of study product.

Upon receipt, applications will be evaluated for completeness. Incomplete applications will not be reviewed.

There will be an acknowledgement of receipt of applications from Grants.gov and the Commons. The submitting AOR receives the Grants.gov acknowledgments. The AOR and the PI receive Commons acknowledgments. Information related to the assignment of an application to a Scientific Review Group is also in the Commons.

Note: Because e-mail can be unreliable, it is the responsibility of the applicant to check periodically on their application status in the Commons.

FDA will not accept any application in response to this FOA that is essentially the same as one currently pending initial merit review unless the applicant withdraws the pending application. FDA will not accept any application that is essentially the same as one already reviewed. However, FDA will accept a resubmission application, but such application must include an introduction (3 pages maximum) addressing the critique from the previous review.

F. Intergovernmental Review

This initiative is not subject to Intergovernmental Review under the terms of Executive Order 12372.

G. Funding Restrictions

All FDA awards are subject to the terms and conditions, cost principles, and other considerations described in the HHS Grants Policy Statement *http://www.hhs.gov/grantsnet/adminis/gpd/index.htm*.

1. Protection of Human Research Subjects

All institutions engaged in human subject research financially supported by HHS must file an assurance of protection for human subjects with the OHRP (45 CFR part 46). Applicants are advised to visit the OHRP Web site at *http://www.hhs.gov/ohrp* for guidance on human subject protection issues. Also refer to section VII of this document.

The requirement to file an assurance applies to both ''awardee'' and collaborating ''performance site'' institutions. Awardee institutions are automatically considered to be ''engaged'' in human subject research whenever they receive a direct HHS award to support such research, even where all activities involving human subjects are carried out by a subcontractor or collaborator. In such cases, the awardee institution bears the responsibility for protecting human subjects under the award. Please see the following link for more on Engagement of Institutions in Research *http://www.hhs.gov/ohrp/humansubjects/assurance/engage.htm*.

The awardee institution is also responsible for, among other things, ensuring that all collaborating performance site institutions engaged in the research hold an approved assurance prior to their initiation of the research. No awardee or performance site institution may spend funds on human subject research or enroll subjects without the approved and applicable assurance(s) on file with OHRP. An awardee institution must, therefore, have its own IRB of record and assurance. The IRB of record may be an IRB already being used by one of the ''performance sites,'' but it must specifically be registered as the IRB of record with OHRP.

For further information, applicants should review the section on human subjects in the application instructions as posted on the Grants.gov application Web site. The clinical protocol should comply with ICHE6 ''Good Clinical Practice Consolidated Guidance'' which sets an international ethical and scientific quality standard for designing, conducting, recording, and reporting trials that involve the participation of human subjects. All human subject research regulated by FDA is also subject to FDA's regulations regarding the protection of human subjects (21 CFR parts 50 and 56). Applicants are encouraged to review the regulations, guidance, and information sheets on human subject protection and good clinical practice available on the Internet at *http://www.fda.gov/oc/gcp/*.

2. Key Personnel and Human Subject Protection Education

The awardee institution is responsible for ensuring that all key personnel receive appropriate training in their human subject protection responsibilities. Key personnel include all PIs, co-investigators, and performance site investigators responsible for the design and conduct of the study. HHS, FDA, and OPD do not prescribe or endorse any specific education programs. Many institutions have already developed educational programs on the protection of research subjects and have made participation in such programs a requirement for their investigators. Other sources of appropriate instruction might include the online tutorials offered by the Office of Human Subjects Research, NIH at *http://ohsr.od.nih.gov/* and by OHRP at *http://www.hhs.gov/ohrp/education/*.

Within 30 days of the award, the PI should provide a letter to FDA's grants management office that includes the names of the key personnel, the title of the human subjects protection education program completed for each key personnel, and a one-sentence description of the program. This letter should be signed by the PI and cosigned by an institution official and sent to the Grants Management Specialist whose name appears on the official Notice of Grant Award (NGA).

H. Other Submission Requirements

1. Informed Consent

Consent forms, assent forms, and any other information given to a subject are part of the grant application and must be provided, even if in a draft form. The consent forms should be attached in an appendix section. The applicant is referred to HHS and FDA regulations at 45 CFR 46.116 and 21 CFR 50.25 for details regarding the required elements of informed consent.

2. PD/PI Credential (e.g., Agency Login)

FDA requires the PD/PI(s) to fill in his/her Commons User ID in the ''PROFILE—Project Director/Principal Investigator'' section, ''Credential'' log-in field of the ''Research & Related Senior/Key Person Profile'' component.

3. Organizational DUNS

The applicant organization must include its DUNS number in its Organization Profile in the eRA Commons. This DUNS number must match the DUNS number provided at CCR registration with Grants.gov. For additional information, see ''Frequently

Asked Questions—Application Guide, Electronic Submission of Grant Applications'' at: *http://era.nih.gov/ElectronicReceipt/faq_prepare_app.htm#1*.

4. PHS398 Research Plan Component Sections

Page limitations of the PHS398 Research Plan component must be followed as outlined in the SF424 (R&R) Application Guide. Although each section of the Research Plan component needs to be uploaded separately as a PDF attachment, applicants are encouraged to construct the Research Plan component as a single document, separating sections into distinct PDF attachments just before uploading the files. This approach will enable applicants to better monitor formatting requirements such as page limits. All attachments must be provided to FDA in PDF format, filenames must be included with no spaces or special characters, and a .pdf extension must be used.

All application instructions outlined in the SF424 (R&R) Application Guide must be followed. Note: The link below provides additional information regarding the Adobe transition submission process: (*http://era.nih.gov/ElectronicReceipt/files/adobe_transition.pdf*).

5. Appendix Materials

Applicants must follow the specific instructions on Appendix materials as described in the SF424 (R&R) Application Guide. (See *http://grants.nih.gov/grants/funding/424/index.htm*.)

Do not use the appendix to circumvent the page limitations of the Research Plan component. An application that does not observe the required page limitations may be delayed in the review process.

6. Resource Sharing Plan(s)

Not Applicable

7. Foreign Applications(Non-domestic (non-U.S.) Entity)

Indicate how the proposed project has specific relevance to the mission and objectives of FDA and has the potential for significantly advancing sciences in the United States.

V. Application Review Information

A. General Information

FDA grants management and program staff will review all applications sent in response to this notice. To be responsive, an application must be submitted in accordance with the requirements of this notice.

Applications found to be non-responsive will be returned to the applicant without further consideration.

Applicants are strongly encouraged to contact FDA to resolve any questions about criteria before submitting their application. Please direct all questions of a technical or scientific nature to the OPD program staff and all questions of an administrative or financial nature to the grants management staff (see **FOR FURTHER INFORMATION CONTACT**).

Responsive applications will be reviewed and evaluated for scientific and technical merit by an ad hoc panel of experts in the subject field of the specific application. Consultation with the proper FDA review division may also occur during this phase of the review to determine whether the proposed study will provide acceptable data that could contribute to product approval. Responsive applications will be subject to a second review by the National Cancer Institute, National Cancer Advisory Board (NCAB) for concurrence with the recommendations made by the first-level reviewers, and funding decisions will be made by the Commissioner of Food and Drugs or his designee.

A score will be assigned to each application based on the scientific/technical review criteria. The review panel may advise the program staff about the appropriateness of the proposal to the goals of the OPD grant program.

Applications submitted in response to this FOA will compete for available funds with all other recommended applications submitted in response to this FOA. The following will be considered in making funding decisions:

- Scientific merit of the proposed project as determined by peer review,
- Availability of funds, and
- Relevance of the proposed project to program priorities.

The goal of FDA's OPD grant program is to support the clinical development of products for use in rare diseases or conditions where no current therapy exists or where the product will improve the existing therapy. In their written critiques, reviewers will be asked to comment on each of the following criteria in order to judge the likelihood that the proposed research will have a substantial impact on the pursuit of these goals. Each of these criteria will be addressed and considered in assigning the overall score, and weighted as appropriate for each application. Note that an application does not need to be strong in all categories to be judged likely to have major scientific impact and thus deserve a meritorious priority score.

Investigators: Assessing the competence of the principal investigator(s) and key personnel to conduct the proposed research.This includes their academic qualifications, research experiences, productivity, and any special attributes.

Resources and Environment: Evaluating any special attributes or deficiencies relevant to the conduct of the proposed studies.

Budget: Evaluating whether all items of the requested budget are appropriate and justified.

Human Subjects and Monitoring: Evaluating possible physical, psychological, or social injury patients might experience as subjects in the proposed research. Discussing whether the rights and welfare of the individuals will be adequately protected. Assessing the safety-monitoring plan including the reporting of adverse events. Evaluating the informed consent documents as well as the plan to monitor the integrity of the data collected and the compliance with the protocol.

B. Scientific/Technical Review Criteria

The ad hoc expert panel will review the application based on the following scientific and technical merit criteria:

(1) The soundness of the rationale for the proposed study;

(2) The quality and appropriateness of the study design, including the design of the monitoring plans;

(3) The statistical justification for the number of patients chosen for the study, based on the proposed outcome measures, and the appropriateness of the statistical procedures for analysis of the results;

(4) The adequacy of the evidence that the proposed number of eligible subjects can be recruited in the requested timeframe;

(5) The qualifications of the investigator and support staff, and the resources available to them;

(6) The adequacy of the justification for the request for financial support;

(7) The adequacy of plans for complying with regulations for protection of human subjects and monitoring; and

(8) The ability of the applicant to complete the proposed study within its budget and within time limits stated in this RFA.

C. Program Review Criteria

(1) Applications must propose clinical trials intended to provide safety and/or efficacy data.

(2) There must be an explanation in the ''Background and Significance''

section of how the proposed study will either contribute to product approval or provide essential data needed for product development.

(3) The ''Background and Significance'' section of the application must contain information documenting the prevalence, not incidence, of the population to be served by the product is fewer than 200,000 individuals in the United States. The applicant should include a detailed explanation supplemented by authoritative references in support of the prevalence figure. Diagnostic tests and vaccines will qualify only if the population to whom they will be administered is fewer than 200,000 individuals in the United States per year.

(4) The study protocol proposed in the grant application must be under an active IND or IDE (not on clinical hold) to qualify the application for scientific and technical review. Additional IND/IDE information is described as follows:

The proposed clinical protocol should be submitted to the applicable FDA IND/IDE review division a minimum of 30 days before the grant application deadline. The number assigned to the IND/IDE that includes the proposed study should appear on the face page of the application with the title of the project. The date the subject protocol was submitted to FDA for the IND/IDE review should also be provided. Protocols that would otherwise be eligible for an exemption from the IND regulations must be conducted under an active IND to be eligible for funding under this FDA grant program. If the sponsor of the IND/IDE is other than the principal investigator listed on the application, a letter from the sponsor permitting access to the IND/IDE must be submitted in both the IND/IDE and in the grant application. The name(s) of the principal investigator(s) named in the application and in the study protocol must be submitted to the IND/IDE. Studies of already approved products, evaluating new orphan indications, are also subject to these IND/IDE requirements.

Only medical foods that do not need premarket approval and medical devices that are classified as non-significant risk (NSR) are free from these IND/IDE requirements. Applicants studying an NSR device should provide a letter in the application from FDA's Center for Devices and Radiological Health indicating the device is an NSR device.

(5) The requested budget must be within the limits, either $200,000 in total costs per year for up to 3 years for any phase study, or $400,000 in total costs per year for up to 4 years for phase 2 or 3 studies. Any application received that requests support over the maximum amount allowable for that particular study will be considered non-responsive.

(6) In an appendix to the application, there must be evidence that the product to be studied is available to the applicant in the form and quantity needed for the clinical trial proposed.A current letter from the supplier as an appendix will be acceptable. If negotiations regarding the supply of the study product are underway but have not been finalized at the time of application, please provide a letter indicating such in the application. Verification of adequate supply of study product will be necessary before an award is made.

(7) The protocol should be submitted in the application. The protocol may be included as an appendix. Page limits, font size, and margins should comply with the Application Guide, Electronic Submission of Grant Applications (*http://era.nih.gov/ElectronicReceipt/faq_prepare_app.htm#1*).

D. Additional Review Criteria

In addition to the previously mentioned criteria, the following items will continue to be considered in the determination of scientific merit and the priority score:

Resubmission Applications (formerly ''revised/amended'' applications): The adequacy of the responses to comments from the previous scientific review group will be assessed including the appropriateness of the improvements in the resubmission application.

Protection of Human Subjects from Research Risk: The involvement of human subjects and protections from research risk relating to their participation in the proposed research will be assessed. See the ''Human Subjects Sections'' of the PHS398 Research Plan component of the SF424 (R&R).

Inclusion of Women, Minorities and Children in Research: The adequacy of plans to include subjects from both genders, all racial and ethnic groups (and subgroups), and children as appropriate for the scientific goals of the research will be assessed. Plans for the recruitment and retention of subjects will also be evaluated. See the ''Human Subjects Sections'' of the PHS398 Research Plan component of the SF424 (R&R).

Care and Use of Vertebrate Animals in Research: The adequacy of the plans for care and use of vertebrate animals to be used in the project will be assessed. See the ''Other Research Plan Sections'' of the PHS398 Research Plan component of the SF424 (R&R).

Biohazards: If materials or procedures are proposed that are potentially hazardous to research personnel and/or the environment, determine if the proposed protection is adequate.

E. Additional Review Considerations

Budget and Period of Support: The reasonableness of the proposed budget and the appropriateness of the requested period of support in relation to the proposed research may be assessed by the reviewers. The priority score should not be affected by the evaluation of the budget.

Applications from Foreign Organizations: Whether the project presents special opportunities for furthering research programs through the use of unusual talent, resources, populations, or environmental conditions in other countries that are not readily available in the United States or that augment existing U.S. resources will be assessed.

F. Sharing Research Data

Sharing research data is not applicable.

G. Sharing Research Resources

Sharing research resources is not applicable.

H. Anticipated Announcement and Award Dates

Earliest anticipated start/award date(s): November 1, 2009, and November 1, 2010.

VI. Award Administration Information

A. Award Notices

After the review of the application is completed, the PD/PI will be able to access his or her summary statement (written critique) via the eRA Commons.

If the application is under consideration for funding, FDA may request information from the applicant prior to making the award. For details, applicants may refer to the HHS Grants Policy Statement: (*http://www.hhs.gov/grantsnet/adminis/gpd/index.htm*).

A formal notification in the form of a NoA will be provided to the applicant organization. The NoA signed by the grants management officer is the authorizing document. Once all administrative and programmatic issues have been resolved, the NoA will be generated via e-mail notification from the awarding component to the grantee business official.

Selection of an application for award is not an authorization to begin performance. Any costs incurred before receipt of the NoA are at the recipient's risk. These costs may be reimbursed only to the extent considered allowable

pre-award costs. See section IV.G, ''Funding Restrictions.''

B. Administrative and National Policy Requirements

All FDA grant and cooperative agreement awards include the HHS Grants Policy Statement as part of the NoA. For these terms of award, see the HHS Grants Policy Statement at: *http://www.hhs.gov/grantsnet/adminis/gpd/index.htm*.

C. Reporting

1. Monitoring Activities

a. *OPD monitoring of clinical trials language*. These guidelines are intended to provide information for principal investigators who are conducting clinical trials. The procedures outlined herein are in addition to (and not in lieu of) IRB, OHRP, and other FDA requirements.

It is an OPD policy that data and safety monitoring of a clinical trial is to be commensurate with the risks posed to study participants and with the size and complexity of the study. In addition, the OPD requires that a Grantee and any third party engaged in supporting the clinical research be responsible for oversight of data and safety monitoring, ensuring that monitoring systems are in place, that the quality of the monitoring activity is appropriate, and that the OPD Project Officer is informed of recommendations emanating from monitoring activities.

b. *FDA requirements for monitoring*. The OPD requires that each clinical trial it supports, regardless of phase, has data and safety monitoring procedures in place to safeguard the well-being of study participants and to ensure scientific integrity. Monitoring must be performed on a regular basis throughout the subject accrual, treatment, and followup periods.

The specific approach to monitoring will depend on features of the clinical trial to be conducted e.g., several levels of monitoring: Data and Safety Monitoring Board (DSMB), Study Monitoring Committee (SMC) and Independent Medical Monitor.

Monitoring activities should be appropriate to the study, study phase, population, research environment, and degree of risk involved.

In small, single-site studies, safety monitoring is often performed by the independent medical monitor or a safety monitoring committee in conjunction with the study statistician. All phase 3 studies and any high risk phase 1 or 2 clinical trial will also require a DSMB. It may be desirable to utilize a DSMB for:

- Trials involving highly experimental therapies or specialized review procedures external to the OPD (e.g., gene therapy or xenotransplantation);
- Trials involving substantial risk to study participants (e.g., studies with irreversible outcomes); or
- Trials involving particularly vulnerable study participants (e.g., children or persons with impaired ability to consent).

c. *Study monitoring plan*. The OPD requires that the protocol document include a section describing the proposed plan for interim data monitoring. This section will detail who is to be responsible for interim monitoring (i.e., a DSMB, an SMC, or the study investigator), what data will be monitored (i.e., performance and safety data only vs. efficacy data as well), the timing of the first data review (e.g., ''the first interim look will occur when the initial 20 participants have completed the 6-month followup visit''), and the frequency of interim reviews (which will depend on such factors as the study design, interventions and anticipated recruitment rate). The plan will specify ''stopping guidelines'' and other criteria for the monitors to follow in their review of the interim data.

A preliminary monitoring plan must be submitted as part of the Research Plan portion of the grant application for a clinical trial. The plan will be examined as part of the peer review process, and any comments and concerns will be included in an administrative note in the summary statement. OPD staff will ensure that all concerns are resolved before the grant award is made.

2. Oversight Activities

The program project officer will monitor grantees periodically. The monitoring may be in the form of telephone conversations, e-mails, or written correspondence between the project officer/grants management officer or specialist and the principal investigator. Information including, but not limited to, information regarding study progress, enrollment, problems, adverse events, changes in protocol, and study monitoring activities will be requested. Periodic site visits with officials of the grantee organization may also occur. The results of these monitoring activities will be recorded in the official grant file and will be available to the grantee upon request consistent with applicable disclosure statutes and with FDA disclosure regulations. Also, the grantee organization must comply with all special terms and conditions of the grant, including those which state that future funding of the study will depend on recommendations from the OPD project officer. The scope of the recommendations will confirm the following: (1) There has been acceptable progress toward enrollment, based on specific circumstances of the study; (2) there is an adequate supply of the product/device; and (3) there is continued compliance with all applicable FDA and HHS regulatory requirements for the trial.

In addition to the requirement for an active IND/IDE discussed in section V.C of this document, documentation of assurances with the OHRP (see section IV.F.1 of this document) must be on file with FDA's grants management office before an award is made. Any institution receiving Federal funds must have an IRB of record even if that institution is overseeing research conducted at other performance sites. To avoid funding studies that may not receive or may experience a delay in receiving IRB approval, documentation of IRB approval and (FWA or assurance) for the IRB of record for all performance sites must be on file with the FDA grants management office before an award to fund the study will be made. In addition, if a grant is awarded, grantees will be informed of any additional documentation that should be submitted to FDA's IRB.

3. Reporting Requirement

The grantee must file a final program progress report, financial status report, and invention statement within 90 days after the end date of the project period as noted on the notice of grant award.

When multiple years are involved, awardees will be required to submit the Non-Competing Grant Progress Report (PHS 2590) annually and financial statements as required in the HHS Grants Policy Statement, dated October 1, 2006, (*http://www.hhs.gov/grantsnet/adminis/gpd/*). Also, all new and continuing grants must comply with all regulatory requirements necessary to keep the status of their IND/IDE ''active'' and ''in effect,'' that is, not on ''clinical hold.'' Failure to meet regulatory requirements will be grounds for suspension or termination of the grant.

Awardees will be required to submit the Non-Competing Continuation Grant Progress Report (PHS 2590) (*http://grants.nih.gov/grants/funding/2590/2590.htm*) annually and financial statements as required in the HHS Grants Policy Statement *http://www.hhs.gov/grantsnet/adminis/gpd/index.htm*.

A listing and a justification for any study changes that occurred in the past year must be included in the Non-Competing Continuation Grant Progress Report (PHS 2590).

A final progress report, invention statement, and Financial Status Report are required when an award is relinquished when a recipient changes institutions or when an award is terminated.

VII. Other Information

A. Required Federal Citations

1. Clinical Trials Data Bank

The Food and Drug Administration Amendments Act of 2007 (FDAAA) contains provisions that expand the current database known as ClinicalTrials.gov to include additional requirements for individuals and entities, including grantees, who are involved in conducting clinical trials that involve products regulated by FDA or that are funded by HHS, including FDA. These additional requirements include mandatory registration of certain types of clinical trials, as well as reporting of results for certain trials for inclusion in the ClinicalTrials.gov database. ClinicalTrials.gov, which was created after the Food and Drug Administration Modernization Act of 1997, provides patients, family members, healthcare providers, researchers, and members of the public easy access to information on clinical trials for a wide range of diseases and conditions. The U.S. National Library of Medicine has developed this site in collaboration with NIH and FDA. ClinicalTrials.gov is available to the public through the Internet at *http://clinicaltrials.gov*.

ClinicalTrials.gov contains information about certain clinical trials, both federally and privately funded, of drugs (including biological products) and medical devices. The types of trials that are required to be registered, and for which results must be reported, are known as ''applicable clinical trials.'' FDAAA defines the types of clinical trials that are ''applicable clinical trials'' and, therefore, are subject to the registration and results reporting requirements. The registry listing for each trial includes information such as descriptive information about the trial, patient eligibility criteria, recruitment status, location information on the clinical trial sites, and points of contact for those wanting to enroll in the trial. The database also contains information on the results of clinical trials. More detailed information on the definition of ''applicable clinical trial'' and the registry and results reporting requirements can be found at *http://grants.nih.gov/grants/guide/notice-files/NOT-OD-08-014.html* and *http://prsinfo.clinicaltrials.gov/fdaaa.html*.

FDAAA also added new requirements concerning clinical trials supported by grants from HHS, including FDA. Under these provisions, any grant or progress report forms required under a grant from any part of HHS, including FDA, must include a certification that the person responsible for entering information into ClinicalTrials.gov (the ''responsible party'') has submitted all required information to the database. There are also provisions regarding when agencies within HHS, including FDA, are required to verify compliance with the database requirements before releasing funding to grantees.OPD program staff will be providing additional information on these requirements, including the appropriate means by which to certify that a grantee has complied with the database requirements.

2. Data and Safety Monitoring Plan

Data and safety monitoring may be required for certain types of clinical trials. See section VI.C.1.c for more details and other FDA monitoring requirements. The establishment of DSMBs is required for multi-site clinical trials involving interventions that entail potential risk to the participants, and generally for phase 3 clinical trials. Although phase 1 and phase 2 clinical trials may also use DSMBs, smaller clinical trials may not require this oversight format, and alternative monitoring plans may be appropriate.

3. Access to Research Data Through the Freedom of Information Act (FOIA)

FOIA, (5 U.S.C. 552), provides individuals with a right to access certain records in the possession of the Federal government, subject to certain exemptions. The government may withhold information under the exemptions and exclusions contained in the FOIA. The exact language of the exemptions can be found in the FOIA. Additional guidance on the exemptions and how they apply to certain documents can be found in the HHS regulations implementing the FOIA (45 CFR part 5) and FDA regulations implementing the FOIA(21 CFR part 20). (Also see the HHS Web site: (*http://www.hhs.gov/foia/*).

Data included in the application may be considered trade secret or confidential commercial information within the meaning of relevant statutes and implementing regulations. FDA will protect trade secret or confidential commercial information to the extent allowed under applicable law.

4. Use of Animals in Research

Recipients of PHS support for activities involving live vertebrate animals must comply with PHS Policy on Humane Care and Use of Laboratory Animals (*http://grants.nih.gov/grants/olaw/references/PHSPolicyLabAnimals.pdf*) as mandated by the Health Research Extension Act of 1985 (*http://grants.nih.gov/grants/olaw/references/hrea1985.htm*), and the U.S. Department of Agriculture Animal Welfare Regulations (*http://www.nal.usda.gov/awic/legislat/usdaleg1.htm*) as applicable.

5. Inclusion of Women And Minorities in Clinical Research

Applicants for PHS clinical research grants are encouraged to include minorities and women in study populations so research findings can be of benefit to all people at risk of the disease or condition under study. It is recommended that applicants place special emphasis on including minorities and women in studies of diseases, disorders, and conditions that disproportionately affect them. This policy applies to research subjects of all ages. If women or minorities are excluded or poorly represented in clinical research, the applicant should provide a clear and compelling rationale that shows inclusion is inappropriate.

6. Inclusion of Children as Participants in Clinical Research

FDA regulations at 21 CFR part 50, subpart D, contain additional requirements that must be met by IRBs reviewing clinical investigations regulated by FDA and involving children as subjects. FDA is part of HHS; accordingly, the research project grants under this program are supported by HHS, and HHS regulations at 45 CFR part 46, subpart D also apply to research involving children as subjects.

7. Standards for Privacy of Individually Identifiable Health Information

HHS issued final modification to the ''Standards for Privacy of Individually Identifiable Health Information,'' the ''Privacy Rule,'' on August 14, 2002. The Privacy Rule is a federal regulation under the Health Insurance Portability and Accountability Act of 1996 that governs the protection of individually identifiable health information, and is administered and enforced by the HHS Office for Civil Rights (OCR).

Decisions about applicability and implementation of the Privacy Rule reside with the researcher and his/her institution. The OCR Web site *http://www.hhs.gov/ocr/* provides information on the Privacy Rule.

8. Healthy People 2010

PHS is committed to achieving the health promotion and disease prevention objectives of ''Healthy People 2010,'' a PHS-led national activity for setting priority areas. This FOA is related to one or more of the priority areas. Potential applicants may obtain a copy of ''Healthy People 2010'' at *http://www.health.gov/healthypeople*.

9. Smoke-Free Workplace

PHS strongly encourages all grant recipients to provide a smoke-free workplace and discourage the use of all tobacco products. In addition, Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of a facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

10. Authority and Regulation

This program is not subject to the intergovernmental review requirements of Executive Order 12372. FDA's research program is described in the Catalog of Federal Domestic Assistance (CFDA), No. 93.103 *http://www.cfda.gov/*.

FDA will support the clinical studies covered by this notice under the authority of section 301 of the PHS Act as amended (42 U.S.C. 241) and under applicable regulations at 42 CFR part 52 and 45 CFR parts 74 and 92. All grant awards are subject to applicable requirements for clinical investigations imposed by sections 505, 512, and 515 of the Federal Food, Drug, and Cosmetic Act or safety, purity, and potency for licensing under section 351 of the PHS Act, including regulations issued under any of these sections.

All human subject research regulated by FDA is also subject to FDA's regulations regarding the protection of human subjects (21 CFR parts 50 and 56). Applicants are encouraged to review the regulations, guidance, and information sheets on human subject protection and Good Clinical Practice available on the Internet at *http://www.fda.gov/oc/gcp/*.

The applicant is referred to HHS regulations at 45 CFR 46.116 and 21 CFR 50.25 for details regarding the required elements of informed consent.

All awards will be subject to all policies and requirements that govern the research grant programs of the PHS as incorporated in the HHS Grants Policy Statement, dated January 1, 2007, (*http://www.hhs.gov/grantsnet/adminis/gpd/index.htm*).

11. Human Subjects Protection

Federal regulations (45 CFR part 46) require that applications and proposals involving human subjects must be evaluated with reference to: (1) The risks to the subjects, (2) the adequacy of protection against these risks, (3) the potential benefits of the research to the subjects and others, and (4) the importance of the knowledge gained or to be gained (*http://www.hhs.gov/ohrp/humansubjects/guidance/45cfr46.htm*).

12. Human Embryonic Stem Cell Research and Cloning

Section 498 of the PHS Act places certain restrictions on human fetal research.In addition, under currently applicable executive orders, HHS funds may not be used to support human embryo research under any extramural award instrument. HHS funds may not be used for the creation of a human embryo for research purposes or for research in which a human embryo is destroyed, discarded, or knowingly subjected to risk of injury or death greater than that allowed for research on fetuses *in utero* under 45 CFR 46.204 and 46.207 and subsection 498(b) of the PHS Act (42 U.S.C. 289g(b)). The term ''human embryo'' includes any organism not protected as a human subject under 45 CFR part 46, as of the date of enactment of the governing appropriations act, that is derived by fertilization, parthenogenesis, cloning, or any other means from one or more human gametes or human diploid cells.

In addition, HHS is prohibited, by a March 4, 1997, Presidential memorandum, from using Federal funds for cloning human beings. In implementing this program, FDA will comply with all applicable statutes, regulations, presidential memoranda and Executive orders.

Criteria for Federal funding of research on hESCs can be found at: *http://www.hhs.gov/faq/research/stemcell/r-0006.html* and *http://stemcells.nih.gov/research/registry/eligibilityCriteria.asp*.

Dated: December 9, 2008.

Jeffrey Shuren,

Associate Commissioner for Policy and Planning.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict: Behavior and Health.

Date: December 19, 2008.

Time: 10 a.m. to 12 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Gayle M. Boyd, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3141, MSC 7808, Bethesda, MD 20892, 301–451–9956, *gboyd@mail.nih.gov*.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: December 9, 2008.

Jennifer Spaeth,

Director, Office of Federal Advisory Committee Policy.

National Institutes of Health

National Institute of Nursing Research; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the National Advisory Council for Nursing Research.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council for Nursing Research.

Date: January 27–28, 2009.

Open: January 27, 2009, 1 p.m. to Adjournment.

Agenda: Discussion of Program Policies and Issues.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 6C, Room 6, Bethesda, MD 20892.

Closed: January 28, 2009, 9 a.m. to 1 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 6C, Room 6, Bethesda, MD 20892.

Contact Person: Mary E. Kerr, FAAN, RN, PhD, Deputy Director, National Institute of Nursing, National Institutes of Health, 31 Center Drive, Room 5B–05, Bethesda, MD 20892–2178, 301–496–8230, *kerrme@mail.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *http://www.nih.gov/ninr/a-advisory.html*, where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–M

DEPARTMENT OF HOMELAND SECURITY

Identification of Foreign Countries Whose Nationals Are Eligible To Participate in the H–2A Visa Program

AGENCY: Office of the Secretary, DHS.

ACTION: Notice.

SUMMARY: On December 18, 2008, DHS published in the **Federal Register** a final rule ''Changes to Requirements Affecting H–2A Nonimmigrants,'' which provides that the Secretary of Homeland Security will publish a list of designated countries whose nationals can be the beneficiaries of an approved H–2A petition and are eligible for H–2A visas. This initial list will be composed of countries that are important for the operation of the H–2A program and are cooperative in the repatriation of their citizens, subjects, nationals or residents who are subject to a final order of removal from the United States. Publication of such notice is made by the Secretary of Homeland Security, with the concurrence of the Secretary of State. Under the final rule, the Department of Homeland Security (DHS) will only approve petitions for H–2A nonimmigrant status for nationals of countries designated by means of this list or by means of the special procedure allowing petitioners to request approval for particular beneficiaries if the Secretary of Homeland Security determines that it is in the U.S. interest. Pursuant to the final rule, this notice designates those countries the Secretary of Homeland Security, with the concurrence of the Secretary of State, has found to be eligible to participate in the H–2A program.

DATES: This notice is effective January 17, 2009, and shall be without effect at the end of one year after January 17, 2009.

SUPPLEMENTARY INFORMATION:

Designation of Countries Whose Nationals Are Eligible To Participate in the H–2A Visa Program

Pursuant to the authority provided to the Secretary of Homeland Security under sections 241, 214(a)(1), and 215(a)(1) of the Immigration and Nationality Act (INA) (8 U.S.C. 1231, 1184(a)(1), and 1185(a)(1)), I have designated, with the concurrence of the Secretary of State, that nationals from the following countries are eligible to participate in the H–2A visa program: Argentina; Australia; Belize; Brazil; Bulgaria; Canada; Chile; Costa Rica; Dominican Republic; El Salvador; Guatemala; Honduras; Indonesia; Israel; Jamaica; Japan; Mexico; Moldova; New Zealand; Peru; Philippines; Poland; Romania; South Africa; South Korea; Turkey; Ukraine; United Kingdom.

This notice does not affect the status of aliens who currently hold H–2A nonimmigrant status.

Nothing in this notice limits the authority of the Secretary of Homeland Security or his or her designee or any other federal agency to invoke against any foreign country or its nationals any other remedy, penalty or enforcement action available by law.

Paul A. Schneider,

Deputy Secretary.

BILLING CODE 4410–10–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2006–24163]

National Environmental Policy Act; Draft Environmental Impact Statement on U.S. Coast Guard Pacific Area Operations

AGENCY: Coast Guard, DHS.

ACTION: Notice of availability; request for public comments.

SUMMARY: The U.S. Coast Guard, with the National Marine Sanctuary Program West Coast Region as a cooperating agency, announces the availability of the Draft Environmental Impact Statement (DEIS) to implement enhanced environmental protection measures to the Coast Guard's operations in the areas of responsibility for Coast Guard Districts 11 (California) and 13 (Oregon and Washington) for public review and comment. The DEIS analyzes the environmental impacts of routine Coast Guard vessel and air operations when engaged in the following missions and activities: Law enforcement, national security, search and rescue, aids to navigation, and oil pollution and vessel grounding response. This analysis does not include live fire exercises.

Comments and suggestions are invited from all interested parties to ensure that the full range and significance of issues related to this proposed action are identified. The Coast Guard has established a Web site at the address below to provide the public with additional information. *http://pacareaeis.uscg.e2m-inc.com.*

DATES: Comments and related materials must reach the Docket Management Facility on or before February 17, 2009.

ADDRESSES: You may submit comments identified by Coast Guard Docket Number USCG–2006–24163 to the Docket Management Facility at the U.S. Department of Transportation. To avoid duplication, please use only one of the following methods:

(1) *Online: http://www.regulations.gov.*

(2) *By mail:* Docket Management Facility (M-30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

(3) *Fax:* 202–493–2251.

(4) *Delivery:* Room W12–140 on the Ground Floor of the West Building, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, the proposed project, or the associated draft Environmental Impact Statement, contact LT Jeff Bray, Coast Guard Commandant, CG–0942, *JEFF.R.BRAY@USCG.MIL* or telephone 202–372–3752. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

We encourage you to submit comments and related material on the Draft Environmental Impact Statement (DEIS). Publication of this notice begins the official 45-day public comment period that will help refine the alternatives being considered. The Coast Guard provides this notice to advise the public and other agencies of the Coast Guard's intentions, to obtain suggestions and information on the issues and alternatives included in the DEIS, and to request comments from those parties that may be interested or affected by these proposed alternatives.

All comments received will be posted, without change, to *http://www.regulations.gov,* docket number USCG–2006–24163, and will include any personal information you have provided.

If you submit a comment, please include your name and address, identify the docket number for this notice (USCG–2006–26143), indicate the specific section of this document to which each comment applies, and give the reason for each comment. You may submit your comments by electronic means, mail, fax, or delivery to the Docket Management Facility at the address under **ADDRESSES**; but please submit your comments by only one means. If you submit them by mail or delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit them by mail and would like to know that they reached the Facility, please enclose a self-addressed, stamped postcard or envelope. We will consider all comments received during the comment period.

Proposed Action

The Coast Guard proposes to develop and implement enhanced protective measures, as necessary, for marine protected species and marine protected areas that occur in the Eleventh Coast Guard District (California) (CGD11) and Thirteenth Coast Guard District (Washington and Oregon) (CGD13) areas of responsibility. The Coast Guard proposes this action to aid in the fulfillment of its missions, including protection of the environment, while fulfilling Coast Guard obligations to protect living marine resources. The Coast Guard published a notice of intent to prepare this EIS in the **Federal Register** (71 FR 14233, March 21, 2006).

The Proposed Action will be accomplished by (1) establishing a baseline (i.e., analyzing the No Action Alternative) of the significance of the environmental impact of current routine Coast Guard vessel and aircraft operations on the coastal and marine environment within the CGD11 and CGD13 areas of responsibility, with particular focus paid to impacts on marine protected species and marine protected areas; and (2) identifying and analyzing alternative measures which could be implemented to avoid or minimize adverse impacts on marine protected species and marine protected areas. Specifically, the Proposed Action is intended to incorporate measures that will help reduce the environmental impact of Coast Guard vessel and aircraft operations on marine protected species and marine protected areas when engaged in the following routine missions and activities: Law enforcement, national security, search and rescue, aids to navigation, and oil pollution and vessel grounding response. Live fire exercises were not included within this analysis. Budget and legal limitations dictate that any proposed measures be cost effective. Therefore, to be viable, proposed measures would have to further the Coast Guard's natural resource protection mission without compromising its ability to perform other missions.

The Coast Guard is committed to conducting operations in a manner that supports conservation and recovery of marine protected species and marine protected areas. The Proposed Action will further the Coast Guard's environmental protection mission while recognizing and supporting accomplishment of the Coast Guard's full mission portfolio.

Alternatives to the Proposed Action

The DEIS evaluates a variety of actions, listed below as Alternatives 1 through 6, to determine whether modification or supplementation of current procedures is required to accomplish the wide variety of Coast Guard missions in a manner that lessens the probability of adverse impacts on marine protected species and marine protected areas. Alternative 1, the No Action Alternative, documents baseline strategies the Coast Guard currently employs to protect marine resources in the CGD11 and CGD13 areas of responsibility. Alternatives 2 through 5 present discrete actions and are evaluated individually to determine whether their implementation is reasonable and would serve the purpose and need of minimizing and avoiding negative impacts on marine protected species and marine protected areas. Alternatives 2 through 5 are designed to augment or otherwise amend all those actions described in the No Action Alternative. Alternative 6, the Coast Guard's Preferred Alternative, represents a combination of select components of Alternatives 1 through 5.

Alternative 1—No Action Alternative: Under the No Action Alternative, the Coast Guard would continue current operations, without augmentation or modification. Existing strategic plans, directives, guidance, and permits would continue to guide Coast Guard vessel and aircraft operations in a manner intended to minimize, to the maximum extent possible, adverse impacts on marine protected species and marine protected areas. The level of protected living marine resource efforts would continue to be balanced with other Coast Guard missions and requirements, and would remain constantly in flux due to other mission responsibilities and operational tempo.

Alternative 2—Implement Improved Local Operating Procedures; Revise Coast Guard Speed and Approach Guidance; and Enhance Law Enforcement Operations To Include ''Pulse Operations'': This alternative would amend, append, eliminate portions of, or wholly incorporate the No Action Alternative and would build upon the existing Protected Living Marine Resources Program (PLMRP) at each District by formalizing localized operational mitigation procedures and protection efforts, strengthening and expanding Coast Guard speed and approach guidance, and better unifying inter-District and intra-District law enforcement strategies, including engaging in ''pulse operations.''

Alternative 3—Enhance Marine Protected Species and Marine Protected Area Awareness Training for Coast Guard Personnel: This alternative would amend, append, eliminate portions of, or wholly incorporate the No Action Alternative and would build upon the existing PLMRP at each District by requiring the Coast Guard to review, and if necessary, enhance, training for Officer of the Deck (OOD), coxswain, vessel lookouts and Air Station personnel.

Alternative 4—Implement a Web-based Whale Reporting Program: This alternative would amend, append, eliminate portions of, or wholly incorporate the No Action Alternative and would build upon the existing PLMRP at each District by implementing a Whale Reporting Program for CGD11 and CGD13 surface and aviation units. This reporting program would establish a real-time, Web-based whale reporting protocol within the ROI. This program would be maintained centrally by Coast Guard Pacific Area (PACAREA) personnel and would collect vital information on real-time locations of live, dead, injured, or entangled whales. The following information would be collected each time a whale is sighted: Time and location of sighting; distinctive features of the animal; estimated length; signs of injury or entanglement; description of behavior; description of any injuries; condition of carcass for dead whales; and contact information of reporter. The Web site would allow for regional sorting so that units could prepare for a patrol by logging on to the Web site and receiving vital real-time sighting information for the area they would be transiting or patrolling.

Alternative 5—Strengthen Partnerships To Facilitate Marine Protected Species and Marine Protected Area Public Outreach Programs: This alternative would amend, append,

eliminate portions of, or wholly incorporate the No Action Alternative and would build upon the existing PLMRP at each District by strengthening joint partnerships and efforts to support the conservation and recovery of marine protected species and marine protected areas.

Alternative 6—Preferred Alternative: Under the Preferred Alternative, the Coast Guard would further minimize or avoid impacts to marine protected species and marine protected areas by strengthening its current operations (No Action Alternative) by incorporating some of the various additional components described in Alternatives 2, 3 and 5. Specifically, this would entail:

A. Implementing Improved Local Operating Procedures, Revised Guidance, and Enhanced Law Enforcement Operations

- Annually review and update formal Protected Living Marine Resource Programs (PLMRPs) for the Districts.
- Require all Sectors, Air Stations and major Cutters to designate a Marine Protected Species (MPS) Point of Contact (POC).
- Update and amend speed and approach guidance (e.g., Guidance on Vessel Speed and Approach Around Whales message) to include both vessels and aircraft and continue to update regularly.
- Require each District to plan, execute, and document one collaborative marine protected species-driven pulse operation per year, thereby utilizing resources and the subject matter expertise of our partners.

B. Enhancing In-House Marine Protected Species and Marine Protected Area Training

- Enhance regional lookout, coxswain, and deck watch officer skills by providing CGD11 and CGD13 units a standardized regionally-focused marine protected species awareness training module. Module will include methods for detecting, identifying, and avoiding marine protected species and marine protected areas. Require personnel to demonstrate proof of knowledge of marine protected species sections of unit SOPs and knowledge of Speed and Approach Guidance.

C. Enhancing Partnerships To Facilitate Marine Protected Species and Marine Protected Area Outreach and Conservation

- Require each District to participate in one collaborative marine protected species public outreach campaign per year.
- Broadcast Notice to Mariners (NTMs) advising caution in known areas of high marine protected species concentration in bays.
- Include National Oceanic and Atmospheric Administration (NOAA), National Marine Sanctuary Program (NMSP) and U.S. Fish and Wildlife Service (USFWS) educational resources on PACAREA's Internet public domain.
- Utilize the Coast Guard Auxiliary and Sea Partners Program as main vehicles for public outreach; provide educational materials to the Coast Guard Auxiliary and Sea Partners.

We request comments from all interested parties to ensure that the full range and significance of issues related to this proposed action are identified. The Coast Guard requests that comments be as specific as possible with regard to the issues associated with the proposed action, alternatives, and analysis.

Dated: November 24, 2008.

David P. Pekoske,

Vice Admiral, United Stated Coast Guard, Pacific Area Commander.

BILLING CODE 4910–15–P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

[Docket No. TSA–2008–0021]

Public Meetings on Large Aircraft Security Program, Other Aircraft Operator Security Program, and Airport Operator Security Program

AGENCY: Transportation Security Administration, DHS.

ACTION: Notice of public meetings and requests for comments.

SUMMARY: This notice provides the time and location of public meetings that will be held by the Transportation Security Administration (TSA) regarding the Notice of Proposed Rulemaking entitled ''Large Aircraft Security Program, Other Aircraft Operator Security Program, and Airport Operator Security Program'' (LASP NPRM), which was published in the **Federal Register** on October 30, 2008 (73 FR 64790).

DATES: The public meetings will be on January 6, 2009, in White Plains, NY; January 8, 2009, in Atlanta, GA; January 16, 2009, in Chicago, IL; January 23, 2009 in Burbank, CA; and January 28, 2009 in Houston, TX. The meetings will begin at 9 a.m., and registration will start at 8 a.m. All interested persons may provide written comments, which must be received in the public docket by February 27, 2009.

ADDRESSES: The public meetings will be held at the following locations:

(1) White Plains, NY: Westchester County Airport (HPN), Building 1 Airport Road, White Plains, NY 10604;

(2) Atlanta, GA: Renaissance Concourse Hotel Atlanta Airport, One Hartsfield Centre Parkway, Atlanta, GA 30354;

(3) Chicago, IL: Crowne Plaza Chicago O'Hare Hotel & Conference Center, 5440 North River Road, Rosemont, IL 60018;

(4) Burbank, CA: Burbank Airport Marriott Hotel & Convention Center, 2500 North Hollywood Way, Burbank, CA 91505; and

(5) Houston, TX: Conference Center, Hilton Houston Hotel—North Greenspoint, 12400 Greenspoint Drive, Houston, TX 77060.

Participants should check in with TSA staff when they arrive at the public meeting.

All interested persons may submit comments, identified by the TSA docket number to this document, to the Federal Docket Management System (FDMS), a government-wide, electronic docket management system, using any one of the following methods:

Electronically: You may submit comments through the Federal eRulemaking portal at *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Mail, In Person, or Fax: Address, hand-deliver, or fax your written comments to the Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; Fax (202) 493–2251. The Department of Transportation (DOT), which maintains and processes TSA's official regulatory dockets, will scan the submission and post it to FDMS.

See **SUPPLEMENTARY INFORMATION** for format and other information about comment submissions.

FOR FURTHER INFORMATION CONTACT: Erik Jensen, Assistant General Manager, Policy and Plans, Office of General Aviation, TSNM, TSA–28, Transportation Security Administration, 601 South 12th Street, Arlington, VA 02598–6028; telephone (571) 227–2401; facsimile (571) 227–2918; e-mail *LASP@dhs.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

TSA invites interested persons to participate in this public meeting by submitting written comments, data, or views. We invite comments relating to

any aspect of the LASP NPRM. The areas in particular in which TSA seeks information and comment at the public meeting are listed below in the ''Specific Issues for Discussion'' section. We also invite comments relating to the economic, environmental, energy, or federalism impacts that might result from this action. See **ADDRESSES** above for information on where to submit comments.

With each comment, please identify the docket number at the beginning of your comments. TSA encourages commenters to provide their names and addresses. The most helpful comments reference a specific portion of the document, explain the reason for any recommended change, and include supporting data. You may submit comments and material electronically, in person, by mail, or fax as provided under **ADDRESSES**, but please submit your comments and material by only one means. If you submit comments by mail or delivery, submit them in an unbound format, no larger than 8.5 by 11 inches, suitable for copying and electronic filing.

If you would like TSA to acknowledge receipt of comments submitted by mail, include with your comments a self-addressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it to you.

TSA will file in the public docket all comments received by TSA, except for comments containing confidential information and sensitive security information (SSI).[1] TSA will consider all comments received on or before the closing date for comments and will consider comments filed late to the extent practicable. The docket is available for public inspection before and after the comment closing date.

Handling of Confidential or Proprietary Information and Sensitive Security Information (SSI) Submitted in Public Comments

Do not submit comments that include trade secrets, confidential commercial or financial information, or SSI to the public regulatory docket. Please submit such comments separately from other comments on the action. Comments containing this type of information should be appropriately marked as containing such information and submitted by mail to the address listed in **FOR FURTHER INFORMATION CONTACT** section.

Upon receipt of such comments, TSA will not place the comments in the public docket and will handle them in accordance with applicable safeguards and restrictions on access. TSA will hold documents containing SSI, confidential business information, or trade secrets in a separate file to which the public does not have access, and place a note in the public docket that TSA has received such materials from the commenter. If TSA determines, however, that portions of these comments may be made publicly available, TSA may include a redacted version of the comment in the public docket. If TSA receives a request to examine or copy information that is not in the public docket, TSA will treat it as any other request under the Freedom of Information Act (FOIA) (5 U.S.C. 552) and the Department of Homeland Security's (DHS') FOIA regulation found in 6 CFR part 5.

Reviewing Comments in the Docket

Please be aware that anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual who submitted the comment (or signed the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the applicable Privacy Act Statement published in the **Federal Register** on April 11, 2000 (65 FR 19477), or you may visit *http://DocketInfo.dot.gov.*

You may review TSA's electronic public docket on the Internet at *http://www.regulations.gov.* In addition, DOT's Docket Management Facility provides a physical facility, staff, equipment, and assistance to the public. To obtain assistance or to review comments in TSA's public docket, you may visit this facility between 9 a.m. to 5 p.m., Monday through Friday, excluding legal holidays, or call (202) 366–9826. This docket operations facility is located in the West Building Ground Floor, Room W12–140 at 1200 New Jersey Avenue, SE., Washington, DC 20590.

Availability of Rulemaking Document

You can get an electronic copy using the Internet by—

(1) Searching the electronic Federal Docket Management System (FDMS) Web page at *http://www.regulations.gov;*

(2) Accessing the Government Printing Office's Web page at *http://www.gpoaccess.gov/fr/index.html;* or

(3) Visiting TSA's Security Regulations Web page at *http://www.tsa.gov* and accessing the link for ''Research Center'' at the top of the page.

In addition, copies are available by writing or calling the individual in the **FOR FURTHER INFORMATION CONTACT** section. Make sure to identify the docket number of this rulemaking.

Background

On October 30, 2008, TSA published in the **Federal Register** (73 FR 64790) the Notice of Proposed Rulemaking for the Large Aircraft Security Program, Other Aircraft Operator Security Program, and Airport Operator Security Program. The LASP NPRM describes TSA's proposal to enhance the security of general aviation by expanding the scope of current requirements and by adding new requirements for certain U.S. operators with aircraft exceeding 12,500 pounds maximum take-off weight (MTOW) (large aircraft) and certain airports serving those aircraft. These measures are based on the current security program that applies to operators providing scheduled or charter services. Proposed measures include requiring the adoption of a security program, checking passengers against government terrorist watch lists, conducting criminal history checks on pilots, designating a security coordinator, and submission to an audit by an independent third party every two years. The LASP NPRM also proposes further security measures for all-cargo aircraft and for private charter operations with aircraft weighing over 45,500 kilograms (100,309.3 pounds) and would require certain airports that serve large aircraft to adopt a security program. TSA seeks comment on the proposal described in the LASP NPRM. TSA intends to analyze the public comments and issue a final rule.

Specific Issues for Discussion

There are several areas in particular in which TSA seeks information and comment from the industry at the public meeting, listed below. These key issues are intended to help focus public comments on subjects that TSA must explore in order to complete its review of the Large Aircraft Security Program (LASP). The comments at the meeting need not be limited to these issues, and TSA invites comments on any other aspect of the LASP NPRM. These are:

(1) The weight threshold of aircraft covered by the proposed rule.

(2) The phased approach in the implementation of the proposed rule and the determination of which phase would be applicable to each large aircraft operator.

(3) The security threat assessment (STA) requirements, including the

[1] ''Sensitive Security Information'' or ''SSI'' is information obtained or developed in the conduct of security activities, the disclosure of which would constitute an unwarranted invasion of privacy, reveal trade secrets or privileged or confidential information, or be detrimental to the security of transportation. The protection of SSI is governed by 49 CFR part 1520.

transferability of the STAs for flight crew members and whether a proprietor, general partner, officer, director, or owner of aircraft operators should undergo a STA.

(4) Methods for positively identifying pilots and effectively linking them to the aircraft they are operating.

(5) The watchlist service provider (WLSP) requirement, including comments on the WLSP's system security plan, the role that watchlist service providers may continue to have if the responsibility for watchlist matching shifts to the U.S. Government in the future, whether there should be a limitation of the number of entities that would be approved as a WSLP, and whether WLSP covered personnel should be limited only to U.S. citizens, nationals or lawful permanent residents.

(6) Whether TSA should establish a minimum time for submission of passenger information to the service providers, what that minimum time should be, and the reasons supporting the suggested minimum time.

(7) Whether full program aircraft operators should be permitted to conduct their own audit and/or watchlist matching on flights operated under their LASP.

(8) Proposed privacy notice requirement.

(9) The third-party auditor requirement, including the establishment of a system of assigning auditors and methods of doing so, qualifications of auditors, and conflict of interests and independence issues affecting an auditor.

(10) Whether certain large aircraft operators (for instance, operators that are not carrying persons or property for compensation or hire or with aircraft having a MTOW of more than 45,500 kg) should have a different requirement as to what weapons are prohibited (for example, limit the prohibited items to only guns and firearms).

(11) The requirement for security coordinator, including the use of a single individual for multiple security coordinator roles.

(12) Whether any other types of airport should be covered by a security program.

(13) Amendment of the partial program or the supporting program for airports.

(14) Applicability of the proposed rule to fractional ownership operations.

(15) Qualifications of individuals who would be exempted from liability under the voluntary provision of emergency services.

(16) The burden estimates, estimated costs of compliance, estimates regarding the small entities affected, and economic impact on the newly-regulated entities.

Participation at the Meeting

The meeting is expected to begin at 9 a.m. Following an introduction by TSA, members of the public will be invited to present their views.

Anyone wishing to present an oral statement at the meeting must register in person between 8 and 9 a.m. on the day of the meeting, and provide his or her name and affiliation. Speakers should keep comments brief and plan to speak for no more than three minutes when presenting comments.

Public Meeting Procedures

TSA will use the following procedures to facilitate the meeting:

(1) There will be no admission fee or other charge to attend or to participate in the meeting. The meeting will be open to all persons who are scheduled to present statements or who register in person between 8 and 9 a.m. on the day of the meeting at the site of the public meeting. TSA will make every effort to accommodate all persons who wish to participate, but admission will be subject to availability of space in the meeting room. The meeting may adjourn early if scheduled speakers complete their statements or questions in less time than is scheduled for the meeting.

(2) An individual, whether speaking in a personal or a representative capacity on behalf of an organization, will be limited to a three-minute statement and scheduled on a first-come, first-served basis. If a large number of persons register to present comments, this amount of time may be shortened to provide all registered persons an opportunity to present their comments.

(3) Any speaker prevented by time constraints from speaking will be encouraged to submit written remarks, which will be made part of the record.

(4) For information on facilities or services for individuals with disabilities or to request assistance at the meeting, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above before December 31, 2008.

(5) Representatives of TSA will preside over the meeting.

(6) The meeting will be recorded by a court reporter. A transcript of the meeting and any material accepted by the panel during the meeting will be included in the public docket.

(7) Statements made by TSA representatives are intended to facilitate discussion of the issues or to clarify issues. Any statement made during the meeting by a TSA representative is not intended to be, and should not be construed as, a position of TSA.

(8) The meeting is designed to invite public views and gather additional information. No individual will be subject to cross-examination by any other participant; however, TSA representatives may ask questions to clarify a statement.

Issued in Arlington, Virginia, on December 12, 2008.

John Sammon,

Assistant Administrator for Transportation Sector Network Management.

U.S. Citizenship and Immigration Services

U.S. Customs and Border Protection

U.S. Immigration and Customs Enforcement

[CIS No. 2461–08; DHS Docket No. USCIS–2008–0065]

RIN 1615–ZA75

H–2A Petitioner's Employment-Related or Fee-Related Notification

AGENCY: U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, U.S. Immigration and Customs Enforcement, DHS.

ACTION: Notice.

SUMMARY: This Notice announces the manner in which petitioners must notify U.S. Citizenship and Immigration Services regarding their employment of agricultural workers in H–2A nonimmigrant status or job placement fee information. These procedures are necessary to enable petitioners to comply with the notification requirements established by the Department of Homeland Security's regulations governing the H–2A nonimmigrant classification.

DATES: This Notice is effective January 17, 2009.

FOR FURTHER INFORMATION CONTACT:

USCIS: Hiroko Witherow, Service Center Operations, U.S. Citizenship and Immigration Services, Department of Homeland Security, 20 Massachusetts Avenue, NW., Washington, DC 20529, telephone (202) 272–8410.

USICE: Joe Jeronimo, National Program Manager, U.S. Immigration and Customs Enforcement, Department of Homeland Security, 500 12th Street,

SW., Washington, DC 20024, telephone (202) 732–3978.

USCBP: Bruce Ingalls, Chief, Debt Management Branch, U.S. Customs and Border Protection, Revenue Division, Attn: H–2 Team, Suite 100, 6650 Telecom Drive, Indianapolis, IN 46278, telephone (317) 298–1307.

SUPPLEMENTARY INFORMATION:

I. Background

The H–2A nonimmigrant classification applies to alien workers seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States on a temporary basis. Immigration and Nationality Act (INA) sec. 101(a)(15)(H)(ii)(a), 8 U.S.C. 1101(a)(15)(H)(ii)(a); *see* 8 CFR 214.1(a)(2) (H–2A classification designation). Aliens seeking H–2A nonimmigrant status must be petitioned for by a U.S. employer. However, prior to filing the petition, the U.S. employer must complete a temporary agricultural labor certification process with the Department of Labor (DOL) for the job opening the employer seeks to fill with an H–2A worker. After receiving a temporary labor certification, the U.S. employer files Form I–129, ''Petition for Nonimmigrant Worker,'' with the appropriate USCIS office. *See* 8 CFR 214.2(h)(5)(i)(A). Once a petition has been granted, the regulations impose additional responsibilities on such H–2A petitioners. These responsibilities include notifying DHS of certain occurrences related to their H–2A workers, as discussed below.

A. Employment-Related Notifications

The regulations require H–2A petitioners to provide notification to DHS within 2 work days in the following instances:

- When an H–2A worker fails to report to work within 5 work days of the employment start date on the H–2A petition or within 5 work days of the start date established by the petitioner, whichever is later;
- When the agricultural labor or services for which H–2A workers were hired is completed more than 30 days early; or
- When the H–2A worker absconds from the worksite or is terminated prior to the completion of agricultural labor or services for which he or she was hired.

8 CFR 214.2(h)(5)(vi)(B). The regulations also require that petitioners retain evidence of the notification filed with DHS for a one-year period beginning from the date of the notification. 8 CFR 214.2(h)(5)(vi)(B)(*2*). Those petitioners that use a different employment start date than the start date stated on the H–2A petition must retain evidence of the changed start date and make such evidence available for inspection by DHS officers for a one-year period beginning on the newly established employment start date. *Id.* An H–2A petitioner that fails to meet these requirements is subject to liquidated damages in the amount of $10. 8 CFR 214.2(h)(5)(vi)(B)(*3*).

B. Fee-Related Notifications

The regulations provide petitioners with the opportunity to avoid denial or revocation (on notice) of their H–2A petition if they notify DHS regarding information they obtained following the filing of their H–2A petition concerning the beneficiary's payment or agreement to pay a fee or compensation in connection to any facilitator, recruiter, or similar employment service as a condition of obtaining the H–2A employment. 8 CFR 214.2(h)(5)(xi)(A)(*4*). The regulations prohibit such payments and agreements. 8 CFR 214.2(h)(5)(xi)(A). Notification of a beneficiary's payment or agreement to pay the prohibited fees must be made within 2 workdays of gaining such knowledge. 8 CFR 214.2(h)(5)(xi)(A)(*4*).

This Notice specifies the manner in which H–2A petitioners must file employment-related and fee-related notifications with DHS in order to comply with the regulations. 8 CFR 214.2(h)(5)(vi)(B) and 8 CFR 214.2(h)(5)(xii)(A)(*4*).

II. Employment-Related Notifications

A. Filing Notifications

This Notice announces that beginning on January 17, 2009, H–2A petitioners must provide employment-related notifications to USCIS within 2 workdays of an event specified in 8 CFR 214.2(h)(5)(vi)(B). The petitioner must include the following information in the notification.

(1) The reason for the notification;

(2) The reason for untimely notification and evidence for good cause, if applicable;

(3) The USCIS receipt number of the approved H–2A petition;

(4) The petitioner's name, address, telephone number, and employer identification number (EIN);

(5) The employer's name, address, and telephone number, if it is different from that of the petitioner;

(6) The name of the H–2A worker in question;

(7) The date and place of birth of the H–2A worker in question; and

(8) The last known physical address and telephone number of the H–2A worker in question.

USCIS acknowledges that where an H–2A petitioner is reporting the failure of an H–2A worker to report to work within the prescribed time frame, petitioners may not know the names of H–2A workers who fail to report to the employment site if the workers are unnamed beneficiaries of the H–2A petition. In such cases, USCIS requires the petitioner to supply only the number of workers who failed to report to work within the prescribed time frame instead of such workers' names, dates of birth, and places of birth.

USCIS encourages the petitioner to submit notification electronically by e-mail. However, USCIS realizes that in certain instances electronic notification may not be possible or feasible for the H–2A petitioner. Accordingly, the following two methods for notification are acceptable. Notification by mail must be postmarked before the end of the 2 workday reporting window.

By e-mail: CSC–X.H–2AAbs@dhs.gov.

By mail: California Service Center, Attn: Div X/BCU ACD, P.O. Box 30050, Laguna Niguel, CA 92607–3004.

B. Failure To Comply With the Requirements

In cases where an H–2A petitioner makes an admission of an untimely notification (for example, a notification letter admitting that the notification is being sent after the close of the 2 workdays window), USCIS will make a determination of liability for liquidated damages. Untimely notification must be accompanied by evidence of good cause. Failure to notify timely may be excused in the discretion of USCIS if it is demonstrated that the delay was due to extraordinary circumstances beyond the control of the H–2A petitioner, and USCIS finds the delay commensurate with the circumstances. If the H–2A petitioner fails to demonstrate good cause for failure to make a timely notification, USCIS will communicate liability for liquidated damages to the H–2A petitioner and inform the petitioner that it will receive a demand letter for payment directly from U.S. Customs and Border Protection (CBP). H–2A petitioners must not send checks to USCIS when sending untimely notifications.

In any situation where U.S. Immigration and Customs Enforcement (ICE) uncovers evidence of liability for H–2A liquidated damages in the course of its investigatory work, ICE will make a determination of liability. ICE will provide the petitioner with written notice of non-compliance as well as the

petitioner's liability for liquidated damages. If the petitioner wishes to contest the allegations set forth in the notice of non-compliance, written notice must be received by ICE within 30 days of receipt of the notice of non-compliance. 8 CFR 214.2(h)(5)(vi)(C). If the petitioner fails to contest the finding of non-compliance, or the petitioner's response fails to raise an issue of material fact, ICE will communicate liability for liquidated damages to the H–2A petitioner and inform the petitioner that it will receive a demand letter for payment for liquidated damages directly from CBP.

CBP will collect all liquidated damage payments. The CBP demand letter will specify the manner in which payment must be made.

III. Fee-Related Notifications

This Notice announces that on January 17, 2009, H–2A petitioners may begin filing fee-related notifications to USCIS pursuant to 8 CFR 214.2(h)(5)(xi)(A)(*4*). The notification must include the following information:

(1) The USCIS receipt number of the H–2A petition;

(2) The petitioner's name, address, and telephone number;

(3) The employer's name, address, and telephone number, if it is different from that of the petitioner; and the

(4) Name and address of the facilitator, recruiter, or placement service to which alien beneficiaries paid or agreed to pay the prohibited fees.

As previously stated, USCIS encourages the petitioner to submit notification electronically by e-mail. However, USCIS realizes that in certain instances, electronic notification may not be possible or feasible for the H–2A petitioner. Accordingly, the following two methods for notification are acceptable. Notification by mail must be postmarked before the end of the 2 workday reporting window.

By e-mail: CSC.H2AFee@dhs.gov.

By mail: California Service Center, P.O. Box 10695, Laguna Niguel, CA 92607–1095.

IV. Paperwork Reduction Act

This Notice sets forth the procedures for H–2A petitioners to notify USCIS when:

- An H–2A worker fails to report to work within 5 workdays of the employment start date on the H–2A petition or within 5 workdays of the start date established by the petitioner, whichever is later;
- When the agricultural labor or services for which H–2A workers were hired is completed more than 30 days early; or
- When the H–2A worker absconds from the worksite or is terminated prior to the completion of agricultural labor or services for which he or she was hired.

H–2A petitioners must retain evidence of any such notification sent to USCIS, as well as evidence of an employment start date if different from the start date stated on the H–2A petition, for a one-year period.

This Notice further provides the procedures for H–2A petitioners to notify USCIS, after an H–2A petition has been filed, within 2 work days of learning that an H–2A alien worker paid a fee or other compensation to a facilitator, recruiter, or similar employment service as a condition of obtaining the H–2A employment.

These notification requirements are considered information collections covered under the Paperwork Reduction Act (PRA).

Since implementation will begin 30 days from the date of publication of this notice in the **Federal Register**, this new information collection has been submitted and approved by OMB under the emergency review and clearance procedures covered under the PRA. USCIS is requesting comments on this new information collection no later than January 17, 2009. When submitting comments on the information collection, your comments should address one or more of the following four points:

(1) Evaluate whether the collection of information is necessary for the proper performance of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of the information on those who are to respond, including through the use of any and all appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of Information Collection

a. *Type of information collection:* New information collection.

b. *Title of Form/Collection:* H–2A's Petitioners Employment-Related or Fee-Related Notification

c. *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* No form number. U.S. Citizenship and Immigration Services.

d. *Affected public who will be asked or required to respond, as well as a brief abstract: Individuals or Households.* This information collection is necessary to provide employment related or fee related notification by an H–2A petitioner.

e. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 1,000 respondents at .50 (30 minutes) per response.

f. *An estimate of the total of public burden (in hours) associated with the collection:* Approximately 500 burden hours.

All comments and suggestions or questions regarding additional information should be directed to the Department of Homeland Security, U.S. Citizenship and Immigration Services, Regulatory Management Division, 111 Massachusetts Avenue, NW., 3rd Floor, Washington, DC 20529, *Attention:* Chief, 202–272–8377.

Paul A. Schneider,

Deputy Secretary.

BILLING CODE 9117–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[CBP Dec. 08–48]

Notice of H–2A Temporary Worker Visa Exit Program Pilot

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: General notice.

SUMMARY: This notice announces that U.S. Customs and Border Protection (CBP) is establishing a new land-border exit system for certain temporary agricultural workers, starting on a pilot basis, at certain designated ports of entry. Under this pilot program, aliens admitted to the United States as H–2A temporary workers who were admitted to the United States at the ports of San Luis, Arizona, or Douglas, Arizona, must depart from either one of those ports and provide certain biographic and biometric information at one of the kiosks established for this purpose. Any nonimmigrant alien admitted under an H–2A nonimmigrant visa at one of the designated ports of entry will be issued a CBP Form I–94, Arrival and Departure Record, and be presented with

information material that explains the pilot program requirements.

DATES: The pilot program will commence August 1, 2009.

FOR FURTHER INFORMATION CONTACT: Ms. Erin M. Martin via e-mail at *ERIN.Martin@dhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

On February 13, 2008, the Department of Homeland Security (DHS) published a Notice of Proposed Rulemaking in the **Federal Register** (73 FR 8230) proposing changes to requirements affecting temporary and seasonal agricultural workers within the H–2A nonimmigrant classification and their U.S. employers.[1] Among other things, DHS proposed to establish a visa exit program on a pilot basis that would require temporary agricultural workers within the H–2A nonimmigrant classification to register with CBP at the time of departure from the United States. DHS is publishing the final rule implementing the H–2A program in today's edition of the **Federal Register**, concurrent with this notice.

Specifically, the final rule implements the pilot program by adding 8 CFR 215.9, which provides that an alien admitted on an H–2A visa at a port of entry participating in the Temporary Worker Visa Exit Program must also depart at the end of his or her authorized period of stay through a port of entry participating in the program and present designated biographic and/or biometric information upon departure. Section 215.9 further states that CBP will publish a notice in the **Federal Register** designating which H–2A workers must participate in the Temporary Worker Visa Exit Program, which ports of entry are participating in the program, which biographical and/or biometric information would be required, and the format for submission of that information by the departing designated temporary workers.

The final rule indicates that the Temporary Worker Visa Exit Program will begin as a pilot. Accordingly, CBP is implementing the Temporary Worker Visa Exit Program, on a pilot basis. This notice contains all the required elements referenced in 8 CFR 215.9. Any alien subject to the program that is admitted into the United States at a designated port on or after August 1, 2009, is subject to the pilot program.

[1] The H–2A nonimmigrant classification applies to aliens seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States. Immigration and Nationality Act (Act or INA) sec. 101(a)(15)(H)(ii)(a), 8 U.S.C. 1101(a)(15)(H)(ii)(a); *see* 8 CFR 214.1(a)(2) (designation for H–2A classification).

General Requirements of the Temporary Worker Visa Exit Program Pilot

Any alien subject to the Temporary Worker Visa Exit Program must depart from a designated port of entry and must submit certain biographic and biometric information at one of the kiosks established for this purpose.

Aliens Subject to the Pilot Program

Any alien admitted into the United States under an H–2A nonimmigrant visa at one of the designated ports.

Designated Ports

San Luis, Arizona; Douglas, Arizona.

Entry Procedures

Any nonimmigrant alien admitted under an H–2A nonimmigrant visa at one of the designated ports of entry will be issued a CBP Form I–94, Arrival and Departure Record, and be presented with information material that explains the pilot program requirements. The information material will instruct the alien to appear in person at one of the designated ports of entry and register his or her final departure from the United States at that port on or before the date his or her work authorization expires.

Exit Procedures

An alien admitted under an H–2A nonimmigrant visa must depart at a designated port on or before the date his or her work authorization expires. At the time of departure, the alien must present the following biographic and biometric information at a kiosk installed for this purpose:

- *1—Biographic information*—name, date of birth, country of citizenship, passport number, and the name of the Consulate where the alien's visa was issued. The biographic information will be provided by scanning the alien's travel document (visa). If the scan of the visa fails, the alien will scan his or her passport. If the scan of the passport fails the alien will manually enter the required biographic information.
- *2—Biometric information*—a 4-finger scan from one hand.
- *3—The departure portion of the CBP Form I–94*—this must be deposited into the kiosk and the departing alien will receive a receipt verifying a successfully completed checkout registration.

Kiosks

Instructions for departure registration will be available in both English and Spanish for use by departing aliens at the kiosks.

Officer assistance will be available in the event that an alien is unable to utilize the designated kiosk to record his or her departure.

Jayson P. Ahern,

Acting Commissioner, U.S. Customs and Border Protection.

[FR Doc. E8–29787 Filed 12–17–08; 8:45 am]

BILLING CODE 9111–14–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5274–N–01]

Notice of HUD-Held Multifamily and Healthcare Loan Sale

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of sale of mortgage loan.

SUMMARY: This notice announces HUD's intention to sell an unsubsidized multifamily mortgage loan, without Federal Housing Administration (FHA) insurance, in a competitive, sealed bid sale (Pool 101 of MHLS 2009–1). This notice also describes generally the bidding process for the sale and certain persons who are ineligible to bid.

DATES: For Pool 101 of MHLS 2009–1, the Bidder's Information Package (BIP) was made available to qualified bidders on November 20, 2008. Bids for the loan must be submitted on the bid date, which is currently scheduled for December 19, 2008. HUD anticipates that an award will be made on or before December 22, 2008. The sale closing is expected to take place on December 30, 2008.

ADDRESSES: To become a qualified bidder and receive the BIP, prospective bidders must complete, execute, and submit a Confidentiality Agreement and a Qualification Statement acceptable to HUD. Both documents will be available on the HUD Web site at *http://www.hud.gov/fhaloansales.cfm.* The executed documents must be mailed and faxed to DebtX at: The Debt Exchange, 133 Federal Street, 10th Floor, Boston, MA 02111, Attention: MHLS 2009–1 Sale Coordinator, Fax 1–617–531–3499.

FOR FURTHER INFORMATION CONTACT: John Lucey, Deputy Director, Asset Sales Office, Room 3136, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000; telephone 202–708–2625, extension 3927. Individuals with hearing or speech impairments may call 202–708–4594 (TTY). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: HUD announces its intention to sell in Pool 101 of MHLS 2009–1 an unsubsidized mortgage loan (Mortgage Loan) secured by a multifamily property located in Columbus, Ohio. The Mortgage Loan is non-performing. The Mortgage Loan will be sold without FHA insurance and with servicing released. HUD will offer qualified bidders an opportunity to bid competitively on the Mortgage Loan.

The mortgagor, if it is a qualified bidder, may submit a bid on the Mortgage Loan. If interested, the Mortgagor should review the Qualification Statement to determine whether it may be eligible to qualify to submit a bid for Pool 101 of MHLS 2009–1.

The Bidding Process

The BIP will describe in detail the procedure for bidding in Pool 101 of MHLS 2009–1. The BIP or its supplement(s) will also include a standardized nonnegotiable loan sale agreement (Loan Sale Agreement). As part of its bid, each bidder must submit a deposit equal to the greater of $100,000 or 10 percent of the bid price. In the event the bidder's bid is less than $100,000.00, the minimum deposit shall be not less than fifty percent of the bidder's bid. HUD will evaluate the bids submitted and determine the successful bid in its sole and absolute discretion. If a bidder is successful, the bidder's deposit will be non-refundable and will be applied toward the purchase price. Deposits will be returned to unsuccessful bidders. The Closing for Pool 101 of MHLS 2009–1 is scheduled for December 30, 2008.

These are the essential terms of sale. The Loan Sale Agreement, which will be included in the BIP or its supplement(s), will contain additional terms and details. To ensure a competitive bidding process, the terms of the bidding process and the Loan Sale Agreement are not subject to negotiation.

Due Diligence Review

The BIP will describe the due diligence process for reviewing loan files in Pool 101 of MHLS 2009–1. Qualified bidders will be able to access loan information remotely via a high-speed Internet connection. Further information on performing due diligence review of the Mortgage Loans will be provided in the BIP.

Mortgage Loan Sale Policy

HUD reserves the right to reject any and all bids, in whole or in part, without prejudice to HUD's right to include this Mortgage Loan in a later sale. The Mortgage Loan will not be withdrawn after the Award Date except as is specifically provided in the Loan Sale Agreement.

This is a sale of an unsubsidized mortgage loan, pursuant to Section 204(a) of the Departments of the Department of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act of 1997, 12 U.S.C. 1715z–11a(a).

Mortgage Loan Sale Procedure

HUD selected a competitive sale as the method to sell the Mortgage Loan. This method of sale optimizes HUD's return on the sale of this Mortgage Loan, affords the greatest opportunity for all qualified bidders to bid on the Mortgage Loan, and provides the quickest and most efficient vehicle for HUD to dispose of the Mortgage Loan.

Bidder Eligibility

In order to bid in the sale, a prospective bidder must complete, execute and submit both a Confidentiality Agreement and a Qualification Statement acceptable to HUD. The following individuals and entities are ineligible to bid on the Mortgage Loan included in Pool 101 of MHLS 2009–1:

(1) Any employee of HUD, a member of such employee's household, or an entity owned or controlled by any such employee or member of such an employee's household;

(2) Any individual or entity that is debarred, suspended, or excluded from doing business with HUD pursuant to Title 24 of the Code of Federal Regulations, Part 24, and Title 25 of the Code of Federal Regulations, Part 2424;

(3) Any contractor, subcontractor and/or consultant or advisor (including any agent, employee, partner, director, principal or affiliate of any of the foregoing) who performed services for or on behalf of HUD in connection with Pool 101 of MHLS 2009–1;

(4) Any individual who was a principal, partner, director, agent or employee of any entity or individual described in subparagraph 3 above, at any time during which the entity or individual performed services for or on behalf of HUD in connection with Pool 101 of MHLS 2009–1;

(5) Any individual or entity that uses the services, directly or indirectly, of any person or entity ineligible under subparagraphs 1 through 4 above to assist in preparing any of its bids on the Mortgage Loan;

(6) Any individual or entity which employs or uses the services of an employee of HUD (other than in such employee's official capacity) who is involved in Pool 101 of MHLS 2009–1;

(7) Any mortgagor (or affiliate of a mortgagor) that failed to submit to HUD on or before February 21, 2008, audited financial statements for fiscal years 1999 through 2007 for a project securing a Mortgage Loan;

(8) Any individual or entity and any Related Party (as such term is defined in the Qualification Statement) of such individual or entity that is a mortgagor in any of HUD's multifamily housing programs and that is in default under such mortgage loan or is in violation of any regulatory or business agreements with HUD, unless such default or violation is cured on or before December 9, 2008;

(9) Any entity or individual that serviced or held the Mortgage Loan at any time during the 2-year period prior to December 1, 2008, is ineligible to bid on the Mortgage Loan or on the pool containing such Mortgage Loan; and

(10) Any affiliate or principal of any entity or individual described in the preceding sentence (subparagraph 9); any employee or subcontractor of such entity or individual during that 2-year period; or any entity or individual that employs or uses the services of any other entity or individual described in this subparagraph in preparing its bid on such Mortgage Loan.

Prospective bidders should carefully review the Qualification Statement to determine whether they are eligible to submit bids on the Mortgage Loan in Pool 101 of MHLS 2009–1.

Eligible Bidders With Respect to Pool 101 of MHLS 2009–1

Notwithstanding the foregoing, in order to bid on Pool 101 of MHLS 2009–1, bidders must be a Non-Profit entity, Housing Finance Authority, or a unit of local government.

Freedom of Information Act Requests

HUD reserves the right, in its sole and absolute discretion, to disclose information regarding Pool 101 of MHLS 2009–1, including, but not limited to, the identity of any successful bidder and its bid price or bid percentage for the loan, upon the closing of the sale. Even if HUD elects not to publicly disclose any information relating to Pool 101 of MHLS 2009–1, HUD will have the right to disclose any information that HUD is obligated to disclose pursuant to the Freedom of Information Act and all regulations promulgated thereunder.

Scope of Notice

This notice applies to Pool 101 of MHLS 2009–1 and does not establish

HUD's policy for the sale of other mortgage loans.

Dated: December 12, 2008.

Brian D. Montgomery,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R4–ES–2008–NO247; 40120–1113–0000–C2]

Notice of Availability of the Florida Panther Recovery Plan

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: We, the Fish and Wildlife Service, announce the availability of the third revision of the Florida Panther Recovery Plan. The plan includes specific recovery objectives and criteria to be met in order to reclassify the Florida panther (*Puma concolor coryi*) to threatened status and eventually delist this species under the Endangered Species Act of 1973, as amended (Act).

ADDRESSES: You can obtain copies of the Florida Panther Recovery Plan by contacting the Fish and Wildlife Service, South Florida Ecological Services Office, 1339 20th Street, Vero Beach, FL 32960 (telephone, 772–562–3909) or by visiting our Web sites at *http://endangered.fws.gov* or *http://verobeach.fws.gov.*

FOR FURTHER INFORMATION CONTACT: Chris Belden, South Florida Ecological Services Office, 772–562–3909, ext. 237.

SUPPLEMENTARY INFORMATION:

Background

Restoring listed animals and plants to the point where they are again secure, self-sustaining components of their ecosystems is a primary goal of our threatened and endangered species program. To help guide the recovery effort, we are preparing recovery plans for most listed species. Recovery plans describe actions that may be necessary for conservation of species, establish criteria for reclassification from endangered to threatened status or delisting, and estimate time and cost for implementing recovery measures.

The Act (16 U.S.C. 1533 *et seq.*) requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act requires us to provide a public notice and an opportunity for public review and comment during recovery plan development. We made the draft third revision of the Florida Panther Recovery Plan available for public comment from January 31, 2006, through April 3, 2006 (71 FR 5066). We considered information we received during the public comment period and information from peer reviewers in our preparation of this final revised recovery plan. We will forward substantive comments to other Federal agencies so each agency can consider these comments in implementing approved recovery plans.

The Florida panther is the last subspecies of *Puma* still surviving in the eastern United States. Historically occurring throughout the southeastern United States, the panther today is restricted to less than 5 percent of its historic range in 1 breeding population of approximately 100 animals, located in south Florida. Wide ranging, and secretive, panthers occur at low densities. They require large contiguous areas to meet their social, reproductive, and energetic needs. Panther habitat selection is related to prey availability (i.e., habitats that make prey vulnerable to stalking and capturing are selected).

Habitat loss, degradation, and fragmentation are among the greatest threats to panther survival. Vehicle strikes and problems associated with being a single, small, isolated population have continued to keep the panther population at its current low numbers. Potential panther habitat throughout the southeast continues to be affected by urbanization, residential development, conversion to agriculture, mining and mineral exploration, and lack of land-use planning that recognizes panther needs. Public support is critical to attainment of recovery goals for the Florida panther and any reintroduction efforts. Potential opposition to panthers will be the most difficult aspect of panther recovery and must be addressed before any reintroduction efforts are initiated.

The goal of the Florida panther recovery plan is to achieve long-term viability of the panther to a point where it can be reclassified from endangered to threatened and then ultimately removed from the Federal List of Endangered and Threatened Species. The recovery plan identifies three objectives to meet this goal, including:

1. Maintain, restore, and expand the Florida panther population and its habitat in south Florida and expand the breeding portion of the population in south Florida to areas north of the Caloosahatchee River.

2. Identify, secure, maintain, and restore panther habitat in potential reintroduction areas within the panther's historic range, and establish viable populations of the panther outside south and south-central Florida.

3. Facilitate panther recovery through public awareness and education.

The plan presents criteria for reclassifying or delisting the panther. These criteria are based on the number of individuals and number of populations that provide for demographically and genetically viable populations, as determined by several population viability analyses, to ensure resilience to catastrophic events.

Reclassification of the Florida panther will be considered when:

1. Two viable populations of at least 240 individuals (adults and subadults) each have been established and subsequently maintained for a minimum of 12 years (or 2 panther generations).

2. Sufficient habitat quality, quantity, and spatial configuration to support these populations is retained/protected or secured for the long term.

Delisting of the Florida panther will be considered when:

1. Three viable, self-sustaining populations of at least 240 individuals (adults and subadults) each have been established and subsequently maintained for a minimum of 12 years.

2. Sufficient habitat quality, quantity, and spatial configuration to support these populations is retained/protected or secured for the long term.

A viable population, for purposes of Florida panther recovery, has been defined as one in which there is a 95 percent probability of persistence for 100 years. This population may be distributed in a metapopulation structure composed of subpopulations that total 240 individuals. There must be exchange of individuals and gene flow among subpopulations. For reclassification, exchange of individuals and gene flow can be either natural or through management. If managed, a commitment to such management must be formally documented and funded. For delisting, exchange of individuals and gene flow among subpopulations must be natural (i.e., not manipulated or managed). Habitat should be in relatively unfragmented blocks that provide for food, shelter, and characteristic movements (e.g., hunting, breeding, dispersal, and territorial behavior) and support each metapopulation at a minimum density of 2 to 3 animals per 100 square miles.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: December 10, 2008.

Teresa H. McKitrick.

Acting Regional Director, Southeast Region.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R2–ES–2008–N0311]; [20124–1113–0000–F2]

Barton Creek Office Park Environmental Assessment and Habitat Conservation Plan, Travis County, TX

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Availability of an Environmental Assessment and Habitat Conservation Plan (EA/HCP).

SUMMARY: Brandywine Realty Trust (Applicant) has applied to the U.S. Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a) of the Endangered Species Act of 1973, as amended (Act). The Applicant has been assigned permit number TE–198648–0. The requested permit, which is for a period of 30 years, would authorize incidental take of the endangered golden-cheeked warbler (*Dendroica chrysoparia*). The proposed take would occur as a result of the construction and operation of the 14.83-acre Barton Creek Office Park.

DATES: To ensure consideration, we must receive written comments on or before February 17, 2009.

ADDRESSES: Persons wishing to review the application and/or EA/HCP may obtain a copy by written or telephone request to William Amy, U.S. Fish and Wildlife Service, Ecological Services Office, 10711 Burnet Road, Suite 200, Austin, TX 78758 (512/490–0057, extension 234). All documents will be available for public inspection, by written request or by appointment only, during normal business hours (8 a.m. to 4:30 p.m.) at the above address. Data or comments concerning the application and HCP should be submitted in writing to the Field Supervisor at the above address. Please refer to permit number TE–198648–0 when submitting comments.

FOR FURTHER INFORMATION CONTACT: William Amy at the above address.

SUPPLEMENTARY INFORMATION: Section 9 of the Act prohibits the ''taking'' of endangered species such as the golden-cheeked warbler. However, the Service, under limited circumstances, may issue permits to take endangered wildlife species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22.

The subject tract is located in southwest Austin, on the west side of the Capital of Texas Highway (also known as Loop 360) immediately across from the intersection of Walsh Tarlton Lane, Travis County, Texas. Habitat for the golden-cheeked warbler has been documented on and adjacent to the subject tract. An EA/HCP has been included as part of the permit application. A determination of jeopardy or non-jeopardy to the species and a decision pursuant to the National Environmental Policy Act will not be made until at least 60 days from the date of publication of this notice. This notice is provided pursuant to section 10(c) of the Act and National Environmental Policy Act regulations (40 CFR 1506.6).

Applicant: Brandywine Realty Trust plans to construct and operate a commercial development on the 14.83-acre tract and pay Travis County an amount equal to 79.47 acres (the proposed alternative's mitigation acreage) multiplied by the Balcones Canyonlands Conservation Plan's (the ''BCCP'') fee level under its Alternative Process option (currently $6,500 per acre) in effect at the time of such payment. Payment shall be made prior to initiation of clearing activities for the development.

In the event that the Alternative Process fee option becomes unavailable, the Applicant will provide funding in the amount of $516,555 toward the acquisition of 79.47 acres of land within the Balcones Canyonlands Preserve (BCP) acquisition area.

The EA/HCP was prepared to consider the impacts of the proposed action on the human environment and to address impacts to listed species as a result of developing the subject tract. This document describes the impacts to the golden-cheeked warbler that would likely result from the development, steps the Applicant would take to minimize and mitigate such impacts to the maximum extent practicable, the funding available to implement those steps, and the alternatives that have been considered.

Thomas L. Baur,

Acting Regional Director, Region 2.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WO–260–09–1060–00–24 1A]

Call for Nominations for the Wild Horse and Burro Advisory Board

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Wild Horse and Burro Advisory Board Call for Nominations.

SUMMARY: The purpose of this notice is to solicit public nominations for three members to the Wild Horse and Burro Advisory Board. The Board provides advice concerning management, protection and control of wild free-roaming horses and burros on the public lands administered by the Department of the Interior, through the Bureau of Land Management, and the Department of Agriculture, through the Forest Service.

DATES: Nominations should be submitted to the address listed below no later than February 17, 2009.

ADDRESSES: National Wild Horse and Burro Program, Bureau of Land Management, Department of the Interior, P.O. Box 12000, Reno, Nevada 89520–0006, Attn: Ramona Delorme; Fax 775–861–6618.

FOR FURTHER INFORMATION CONTACT: Don Glenn, Division Chief, Wild Horse and Burro Program, (202) 452–5073. Individuals who use a telecommunications device for the deaf (TDD) may contact Ramona Delorme at any time by calling the Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Nominations for a term of three years are needed to represent the following categories of interest:

Wildlife Management

Humane Advocacy

Livestock Management

Any individual or organization may nominate one or more persons to serve on the Wild Horse and Burro Advisory Board. Individuals may also nominate themselves for Board membership. All nomination letters/or resumes should include the following:

1. *Which positions are you interested in being considered for:*
2. *Nominee's Full Name:*
3. *Business Address and Phone: (include e-mail address).*
4. *Home Address and Phone:* (include e-mail address).
5. *Present Occupation/Title:*
6. *Education:* (colleges, degrees, major field of study):

7. *Career Highlights:* Significant related experience, civic and professional activities, elected offices (included prior advisory committee experience or career achievements related to the interest to be represented) Attach additional pages, as necessary.

8. *Qualifications:* Education, training and experience that qualify you to serve on the Board.

9. *Experience or knowledge of wild horse and burro management and the issues facing the Bureau of Land Management:*

10. *Experience or knowledge of horses or burros:* (Equine health, training and management)

11. *Experience in working with disparate groups to achieve collaborative solutions:* (*e.g.*, civic organizations, planning commissions, school boards)

12. *Indicate any BLM permits, leases or licenses that you hold:*

13. *Attach or have Letters of References sent from Special Interests or Organizations you may represent. Also letters of endorsement from business associates, friends, coworkers, local State and/or Federal government or members of Congress if applicable.*

The above information is critical in determining selection and will influence the appointments.

As appropriate, certain Board members may be appointed as Special Government Employees. Special Government Employees serve on the board without compensation, and are subject to financial disclosure requirements in the Ethics in Government Act and 5 CFR 2634. Nominations are to be sent to the address listed under **ADDRESSES**, above.

Each nominee will be considered for selection according to their ability to represent their designated constituency, analyze and interpret data and information, evaluate programs, identify problems, work collaboratively in seeking solutions and formulate and recommend corrective actions. Pursuant to section 7 of the Wild Free-Roaming Horses and Burros Act, Members of the Board cannot be employed by either Federal or State Government. Members will serve without salary, but will be reimbursed for travel and per diem expenses at current rates for Government employees. The Board will meet no less than two times annually. The Director, Bureau of Land Management may call additional meetings in connection with special needs for advice.

Edwin L. Roberson,

Assistant Director, Renewable Resources and Planning.

Notice of Proposed Reinstatement of Terminated Oil and Gas Leases, Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), Whiting Oil and Gas Corporation timely filed a petition for reinstatement of oil and gas leases UTU27917, UTU27918, UTU47084, UTU79133, UTU79134, UTU79795, and UTU79796, for lands in Summit and San Juan County, Utah, and it was accompanied by all required rentals and royalties accruing from October 1, 2008, the date of termination.

FOR FURTHER INFORMATION CONTACT: Kent Hoffman, Deputy State Director, Division of Lands and Minerals at (801) 539–4080.

SUPPLEMENTARY INFORMATION: The Lessee has agreed to new lease terms for rentals and royalties at rates of $5 and $10 per acre and 16⅔ percent, respectively. The $500 administrative fee for the leases has been paid and the lessee has reimbursed the Bureau of Land Management for the cost of publishing this notice.

Having met all the requirements for reinstatement of the leases as set out in Section 31(d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the leases, effective October 1, 2008, subject to the original terms and conditions of the leases and the increased rental and royalty rates cited above.

Dated: December 11, 2008.

Kent Hoffman,

Deputy State Director, Division of Lands and Minerals.

Bureau of Land Management

[CA–320–1610–DR; CA–350–1610–DR; CA–370–1610–DR]

Notice of Availability of Record of Decision for the Sage Steppe Ecosystem Restoration Strategy for the Alturas, Eagle Lake, and Surprise Field Offices

AGENCY: Bureau of Land Management.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA), the Federal Land Policy and Management Act (FLPMA), and the Bureau of Land Management (BLM) policies, the BLM announces the availability of the Records of Decision (RODs) for the Sage Steppe Ecosystem Restoration Strategy for the Alturas, Eagle Lake, and Surprise Field Offices. The RODs constitute the final decisions of the BLM and make the Sage Steppe Ecosystem Restoration Strategy effective immediately.

ADDRESSES: Copies of the RODs are available at the following locations: Alturas Field Office, Bureau of Land Management, 708 West 12th Street, Alturas, CA 96101; Eagle Lake Field Office 2950 Riverside Drive, Susanville, CA 96130; and Surprise Field Office, 602 Cressler Street, Cedarville, CA 96104. The RODs are also available on the internet at *http://www.blm.gov/ca/st/en/prog/planning.html.*

FOR FURTHER INFORMATION CONTACT: For further information contact Jeff Fontana, Public Affairs Officer, Bureau of Land Management, 2950 Riverside Dr., Susanville, CA 96130, telephone (530) 257–0456.

SUPPLEMENTARY INFORMATION: One of the most significant factors affecting the health, diversity and productivity of public lands in the region is the rapid expansion and encroachment of western juniper into the sagebrush steppe ecosystem. Western juniper has significantly increased in density and distribution since the late 1800's and if left unchecked can have significant impacts on soil resources, plant community structure and composition, water and nutrient cycles, and wildlife habitat. In order to address this ecosystem management issue across jurisdictional boundaries, the BLM joined forces with the United States Forest Service (USFS) and county governments to develop a comprehensive vegetation management strategy across a planning area that encompasses 6.5 million acres of public

and private land. The strategy broadly identifies restoration methods and provides guidelines for implementing site specific treatments over a 50-year timeframe. The Modoc National Forest is issuing a companion Record of Decision (ROD) and both agencies will work closely with county governments to implement the strategy in a cooperative and coordinated manner. BLM officially initiated the planning process for the Draft Sage Steppe EIS with the publishing of the Notice of Intent (NOI) to prepare an EIS in the **Federal Register** on July 18, 2005. A Public Scoping Notice was distributed following the NOI and a public notice was published in the Modoc Record on July 28, 2005. The Notice of Availability of the DEIS was published in the **Federal Register** on August 31, 2007. During the comment period nine public meetings, presentations and field trips were offered and 23 comment letters were received. Based upon public comments on the DEIS an additional alternative was added to the FEIS. This new alternative was identified by the agencies as the Preferred Alternative, as it best meets the purpose and need for the project. The Notice of Availability of the Final EIS was published in the **Federal Register** on May 9, 2008.

Any party adversely affected by the BLM's decision(s) to implement the Sage Steppe Ecosystem Restoration Strategy may appeal within 30 days of publication of this Notice of Availability. The appeal must be filed with the field office manager whose decision is being appealed at the above listed addresses. Please consult 43 CFR, part 4 for further information on the IBLA appeal process.

Dayne Barron,

Field Manager.

BILLING CODE 4310–40–P

DEPARTMENT OF THE INTERIOR

Minerals Management Service

[Docket No. MMS–2008–OMM–0030]

MMS Information Collection Activity: 1010–0059, Oil and Gas Production Safety Systems, Extension of a Collection; Submitted for Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of extension of an information collection (1010–0059).

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), we are notifying the public that we have submitted to OMB an information collection request (ICR) to renew approval of the paperwork requirements in the regulations under 30 CFR 250, subpart H, Oil and Gas Production Safety Systems. This notice also provides the public a second opportunity to comment on the paperwork burden of these regulatory requirements.

DATE: Submit written comments by January 20, 2009.

ADDRESSES: You should submit comments directly to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for the Department of the Interior (1010–0059), either by fax (202) 395–6566 or e-mail (*OIRA_DOCKET@omb.eop.gov*).

Please also send a copy to MMS by either of the following methods:

- *http://www.regulations.gov.* Under the tab More Search Options, click Advanced Docket Search, then select Minerals Management Service from the agency drop-down menu, then click submit. In the Docket ID column, select MMS–2008–OMM–0030 to submit public comments and to view supporting and related materials available for this rulemaking. Information on using *Regulations.gov*, including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's User Tips link. Submit comments to *regulations.gov* by January 20, 2009. The MMS will post all comments.
- Mail or hand-carry comments to the Department of the Interior; Minerals Management Service; Attention: Cheryl Blundon; 381 Elden Street, MS–4024; Herndon, Virginia 20170–4817. Please reference Information Collection 1010–0059 in your subject line and mark your message for return receipt. Include your name and return address in your message text.

FOR FURTHER INFORMATION CONTACT: Cheryl Blundon, Regulations and Standards Branch, (703) 787–1607. You may also contact Cheryl Blundon to obtain a copy, at no cost, of the regulation that requires the subject collection of information.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR Part 250, Subpart H, Oil and Gas Production Safety Systems.

OMB Control Number: 1010–0059.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior (Secretary) to prescribe rules and regulations to manage the mineral resources of the OCS. Such rules and regulations will apply to all operations conducted under a lease, right-of-use and easement, and pipeline right-of-way. Operations on the OCS must preserve, protect, and develop oil and natural gas resources in a manner that is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; to balance orderly energy resource development with protection of human, marine, and coastal environments; to ensure the public a fair and equitable return on the resources of the OCS; and to preserve and maintain free enterprise competition. Section 1332(6) states that ''operations in the [O]uter Continental Shelf should be conducted in a safe manner by well trained personnel using technology, precautions, and other techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstructions to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property or endanger life or health.''

Regulations implementing these responsibilities are under 30 CFR part 250, subpart H. Responses are submitted to MMS on occasion and are mandatory. No questions of a sensitive nature are asked. The MMS protects proprietary information according to the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR Part 2), 30 CFR part 252, OCS Oil and Gas Information Program, and 30 CFR 250.197, Data and information to be made available to the public or for limited inspection.

The MMS uses the information collected under subpart H to evaluate equipment and/or procedures that lessees and/or operators propose to use during production operations, including evaluation of requests for departures or use of alternative procedures. Information is also used to verify that production operations are safe and protect the human, marine, and coastal environment. The MMS inspectors review the records maintained to verify compliance with testing and minimum safety requirements.

Frequency: On occasion.

Estimated Number and Description of Respondents: Approximately 130 potential Federal oil or gas or sulphur lessees and/or operators.

Estimated Reporting and Recordkeeping Hour Burden: The estimated annual hour burden for this information collection is a total of 47,021 hours. The following chart

details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Citation 30 CFR 250 subpart H and NTL(s)	Reporting and recordkeeping requirement	Non-hour cost burdens		
		Hour burden	Average No. of annual responses	Annual burden hours
Submittals				
800; 801; 802; 803	Submit application for a production safety system with > 125 components.	8	2	16.
		$5,030 per submission × 2 = $10,060; $13,238 per offshore visit × 2 = $26,476; $6,884 per shipyard visit × 1 = $6,884.		
	25–125 components	7	21	147.
		$1,218 per submission × 21 = $25,578; $8,313 per offshore visit × 8 = $66,504; $4,766 per shipyard visit × 1 = $4,766.		
	< 25 components	6	76	456.
		$604 per submission × 76 = $45,904.		
	Submit modification to application for production safety system with > 125 components.	4	324	1,296.
		$561 per submission × 324 = $181,764.		
	25–125 components	3.5	188	658.
		$201 per submission × 188 = $37,788.		
	< 25 components	3	901	2,703.
		$85 per submission × 901 = $76,585.		
801(a)	Submit application for a determination that a well is incapable of natural flow.	3	50	150.
803(b)(2)	Submit required documentation for unbonded flexible pipe.	Burden is covered by the application requirement in § 250.802(e).		0.
803(b)(8); related NTLs.	Request approval to use chemical only fire prevention and control system in lieu of a water system.	8	150	1,200.
804; related NTL	Submit copy of state-required Emergency Action Plan (EAP) containing test abatement plans (Pacific OCS Region).	1	7	7.
NTL	Plan (EAP) containing test abatement plans (Pacific OCS Region).			
Subtotal			1,719 responses	6,633 hours.
			$482,309.	
General				
801(h)(2); 803(c)	Identify well with sign on wellhead that subsurface safety device is removed; flag safety devices that are out of service.	Usual/customary safety procedure for removing or identifying out-of-service safety devices.		0.
803(b)(8)(iv); (v)	Post diagram of firefighting system; furnish evidence firefighting system suitable for operations in subfreezing climates.	2	95	190.
804(a)(12); 800	Notify MMS prior to production when ready to conduct pre-production test and upon commencement for a complete inspection.	¾	208	156.
806(c)	Request evaluation and approval of other quality assurance programs covering manufacture of SPPE.	2	1	2.
Subtotal			304 responses	348 hours.

Citation 30 CFR 250 subpart H and NTL(s)	Reporting and recordkeeping requirement	Non-hour cost burdens		
		Hour burden	Average No. of annual responses	Annual burden hours
Recordkeeping				
801(h)(2); 802(e); 804(b).	Maintain records on subsurface and surface safety devices to include approved design & installation features, testing, repair, removal, etc.	20	770	15,400.
803(b)(1)(iii), (2)(i)	Maintain pressure-recorder charts	17	770	13,090.
803(b)(4)(iii)	Maintain schematic of the emergency shutdown (ESD) which indicates the control functions of all safety devices.	9	770	6,930.
803(b)(11)	Maintain records of wells that have erosion-control programs and results for 2 years; make available to MMS upon request.	6	770	4,620.
Subtotal			3,080 responses	40,040 hours.
Total Burden Hours			5,103 responses	47,021 hours.
			$482,309 non-hour burden costs.	

* Due to rulemaking (August 25, 2008, 73 FR 49942) cost recovery fees increased, effective 9/24/08.

Estimated Reporting and Recordkeeping Non-Hour Cost Burden: We have identified 10 non-hour cost burdens, all of which are the cost recovery fees required under § 250.802(e). However, note that the actual fee amounts are specified in 30 CFR 250.125, which provides a consolidated table of all of the fees required under the 30 CFR part 250 regulations. The total of the non-hour cost burden (cost recovery fees) in this IC request is an estimated $482,309.

The non-hour cost burdens required in 30 CFR part 250, subpart H (and respective cost-recovery fee amount per transaction) are required as follows:

- Submit application for a production safety system with > 125 components—$5,030 per submission; $13,238 per offshore visit; and $6,884 per shipyard visit.
- Submit application for a production safety system with 25–125 components—$1,218 per submission; $8,313 per offshore visit; and $4,766 per shipyard visit.
- Submit application for a production safety system with < 25 components—$604 per submission.
- Submit modification to application for production safety system with > 125 components—$561 per submission.
- Submit modification to application for production safety system with 25–125 components—$201 per submission.
- Submit modification to application for production safety system with < 25 components—$85 per submission.

We have not identified any other non-hour cost burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3501, *et seq.*) requires each agency ''* * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *'' Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

To comply with the public consultation process, on June 18, 2008, we published a **Federal Register** notice (73 FR 34787) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day comment period. In addition, § 250.199 provides the OMB control number for the information collection requirements imposed by the 30 CFR part 250, subpart H regulation. The regulation also informs the public that they may comment at any time on the collections of information and provides the address to which they should send comments. We have received no comments in response to these efforts.

If you wish to comment in response to this notice, you may send your comments to the offices listed under the **ADDRESSES** section of this notice. The OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days. Therefore, to ensure maximum consideration, OMB should receive public comments by January 20, 2009.

Public Availability of Comments: Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

MMS Information Collection Clearance Officer: Arlene Bajusz (202) 208–7744.

Dated: October 8, 2008.

E.P. Danenberger,

Chief, Office of Offshore Regulatory Programs.

BILLING CODE 4310–MR–P

DEPARTMENT OF THE INTERIOR

Minerals Management Service

States' Decisions on Participating in Accounting and Auditing Relief for Federal Oil and Gas Marginal Properties

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of states' decisions to participate or not participate in accounting and auditing relief for Federal oil and gas marginal properties located in their state for calendar year 2009.

SUMMARY: The Minerals Management Service (MMS) published final regulations on September 13, 2004 (69 FR 55076), codified at 30 CFR 204.200 through 204.215, to provide accounting and auditing relief for marginal Federal oil and gas properties. The rule requires MMS to publish in the **Federal Register** the decisions of the states concerned to allow or not allow one or both forms of relief in their state. As required in the rule, MMS provided states receiving a portion of the Federal royalties with a list of qualifying marginal Federal oil and gas properties located in their state so that each affected state could decide whether to participate in one or both relief options. This notice provides the decisions by the states concerned to allow one or both types of relief.

DATES: Effective January 1, 2009.

FOR FURTHER INFORMATION CONTACT: Mary Williams, Manager, Federal Onshore Oil and Gas Compliance and Asset Management, telephone (303) 231–3403, FAX (303) 231–3744, e-mail to *mary.williams@mms.gov*, or mail to P.O. Box 25165, MS 392B2, Denver Federal Center, Denver, Colorado 80225–0165.

SUPPLEMENTARY INFORMATION: The rule implemented certain provisions of section 7 of the Federal Oil and Gas Royalty Simplification and Fairness Act of 1996 and provides two options for relief: (1) Notification-based relief for annual reporting, and (2) other requested relief, as proposed by industry and approved by MMS and the state concerned. The rule requires that MMS publish by December 1 of each year, a list of the states and their decisions regarding marginal property relief.

To qualify for the first option of relief (notification-based relief) for calendar year 2009, properties must have produced less than 1,000 barrels-of-oil-equivalent (BOE) per year for the base period (July 1, 2007, through June 30, 2008). Annual reporting relief will begin on January 1, 2009, with the annual report and payment due February 28, 2010; or March 31, 2010, if you have an estimated payment on file. To qualify for the second option of relief (other requested relief), properties must have produced less than 15 BOE per well per day for the base period.

The following table shows the states that have marginal properties, where a portion of the royalties are shared between the state and MMS, and the states' decisions to allow one or both forms of relief.

State	Notification-based relief (less than 1,000 BOE per year)	Request-based relief (less than 15 BOE per well per day)
Alabama	No	No.
California	No	No.
Colorado	No	No.
Kansas	No	No.
Louisiana	Yes	Yes.
Michigan	Yes	No.
Mississippi	No	No.
Montana	No	No.
Nebraska	No	No.
Nevada	No	No.
New Mexico	No	No.
North Dakota	No	No.
Oklahoma	No	No.
South Dakota	No	No.
Utah	No	No.
Wyoming	Yes	No.

Federal oil and gas properties located in all other states, where a portion of the royalties is not shared with the state, are eligible for relief if they qualify as marginal under this rule. For information on how to obtain relief, please refer to the rule, which can be viewed on the MMS Web site at *http://www.mrm.mms.gov/Laws_R_D/FRNotices/AC30.htm*.

Unless the information received is proprietary data, all correspondence, records, or information received in response to this notice are subject to disclosure under the Freedom of Information Act (FOIA). If applicable, please highlight the proprietary portions, including any supporting documentation, or mark the page(s) that contain proprietary data. Proprietary information is protected by the Trade Secrets Act (18 U.S.C. 1905), FOIA, Exemption 4, and Department regulations (43 CFR, Part 2).

Dated: December 1, 2008.

Gregory J. Gould,

Associate Director for Minerals Revenue Management.

BILLING CODE 4310–MR–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–1020 (Review)]

Barium Carbonate From China

AGENCY: United States International Trade Commission.

ACTION: Scheduling of an expedited five-year review concerning the antidumping duty order on barium carbonate from China.

SUMMARY: The Commission hereby gives notice of the scheduling of an expedited review pursuant to section 751(c)(3) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(3)) (the Act) to determine whether revocation of the antidumping

duty order on barium carbonate from China would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time. For further information concerning the conduct of this review and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

DATES: *Effective Date:* December 8, 2008.

FOR FURTHER INFORMATION CONTACT: Cynthia Trainor (202–205–3354), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*http://www.usitc.gov*). The public record for this review may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background. On December 8, 2008, the Commission determined that the domestic interested party group response to its notice of institution (73 FR 51315, September 2, 2008) of the subject five-year review was adequate and that the respondent interested party group response was inadequate. The Commission did not find any other circumstances that would warrant conducting a full review.[1] Accordingly, the Commission determined that it would conduct an expedited review pursuant to section 751(c)(3) of the Act.

Staff report. A staff report containing information concerning the subject matter of the review will be placed in the nonpublic record on December 30, 2008, and made available to persons on the Administrative Protective Order service list for this review. A public version will be issued thereafter, pursuant to section 207.62(d)(4) of the Commission's rules.

Written submissions. As provided in section 207.62(d) of the Commission's rules, interested parties that are parties to the review and that have provided individually adequate responses to the notice of institution,[2] and any party other than an interested party to the review may file written comments with the Secretary on what determination the Commission should reach in the review. Comments are due on or before January 7, 2009 and may not contain new factual information. Any person that is neither a party to the five-year review nor an interested party may submit a brief written statement (which shall not contain any new factual information) pertinent to the review by January 7, 2009. However, should the Department of Commerce extend the time limit for its completion of the final results of its review, the deadline for comments (which may not contain new factual information) on Commerce's final results is three business days after the issuance of Commerce's results. If comments contain business proprietary information (BPI), they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's rules do not authorize filing of submissions with the Secretary by facsimile or electronic means, except to the extent permitted by section 201.8 of the Commission's rules, as amended, 67 FR 68036 (November 8, 2002). Even where electronic filing of a document is permitted, certain documents must also be filed in paper form, as specified in II (C) of the Commission's Handbook on Electronic Filing Procedures, 67 FR 68168, 68173 (November 8, 2002).

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the review must be served on all other parties to the review (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

Issued: December 12, 2008.

By order of the Commission.

William R. Bishop,

Hearings and Meetings Coordinator.

[FR Doc. E8–29996 Filed 12–17–08; 8:45 am]

BILLING CODE 7020–02–P

[1] A record of the Commissioners' votes, the Commission's statement on adequacy, and any individual Commissioner's statements will be available from the Office of the Secretary and at the Commission's Web site.

[2] The Commission has found the response submitted by Chemical Products Corp. to be individually adequate. Comments from other interested parties will not be accepted (*see* 19 CFR 207.62(d)(2)).

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–664]

In the Matter of Certain Flash Memory Chips and Products Containing the Same Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on November 17, 2008, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Spansion, Inc. of Sunnyvale, California and Spansion LLC of Sunnyvale, California. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation, of certain flash memory chips and products containing the same that infringe certain claims of U.S. Patent Nos. 6,380,029, 6,080,639, 6,376,877, and 5,715,194. The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainants request that the Commission institute an investigation and, after the investigation, issue an exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Heidi E. Strain, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–3352.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2008).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on December 11, 2008, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation, of certain flash memory chips or products containing the same that infringe one or more of claims 1–13 of U.S. Patent No. 6,380,029; claims 1–12 of U.S. Patent No. 6,080,639; claims 1–8 of U.S. Patent No. 6,376,877, and claims 13, 15–18, and 20–22 of U.S. Patent No. 5,715,194, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are—

Spansion, Inc., 915 DeGuigne Drive, P.O. Box 3453, Sunnyvale, California 94088.

Spansion LLC, 915 DeGuigne Drive, P.O. Box 3453, Sunnyvale, California 94088.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Samsung Electronics Co., Ltd., 250, Taepyeongno 2-ga, Jung-gu, Seoul 100–742 South Korea.

Samsung Electronics America, Inc., 105 Challenger Road, Ridgefield Park, New Jersey 07660.

(c) The Commission investigative attorney, party to this investigation, is Heidi E. Strain, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Room 401, Washington, DC 20436; and

(3) For the investigation so instituted, Paul J. Luckern, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

Issued: December 12, 2008.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–663]

In the Matter of Certain Mobile Telephones and Wireless Communication Devices Featuring Digital Cameras, Components Thereof; Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on November 17, 2008, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Eastman Kodak Company of Rochester, New York. A letter supplementing the complaint was filed on December 11, 2008. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation, of certain mobile telephones and wireless communication devices featuring digital cameras, and components thereof that infringes certain claims of U.S. Patent Nos. 5,493,335 and 6,292,218. The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue an exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Lisa A. Murray, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2734.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2008).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on December 11, 2008, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation, of certain mobile telephones and wireless communication devices featuring digital cameras, or components thereof that infringe one or more of claims 1 and 4 of U.S. Patent No. 5,493,335 and claims 15 and 23–27 of U.S. Patent No. 6,292,218, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—

Eastman Kodak Company, 343 State Street, Rochester, NY 14650.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Samsung Electronics Company, Ltd., 250, Taepyeongno 2-ga, Jung-gu, Seoul 100–742 Korea;

Samsung Electronics America, Inc., 105 Challenger Road, Ridgefield Park, NJ 07660;

Samsung Telecommunications America, LLC, 1301 East Lookout Drive, Richardson, TX 75082;

LG Electronics, Inc., LG Twin Towers, 20, Yoido-dong, Youngdungpo-gu, Seoul 150–721 Korea;

LG Electronics USA, Inc., 1000 Sylvan Avenue, Englewood Cliffs, NJ 07632;

LG Electronics MobileComm USA, Inc., 10101 Old Grove Road, San Diego, CA 92131.

(c) The Commission investigative attorney, party to this investigation, is Lisa A. Murray, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Room 401, Washington, DC 20436; and

(3) For the investigation so instituted, Paul J. Luckern, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

Issued: December 12, 2008.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 332–502]

Sub-Saharan African Textile and Apparel Inputs: Potential for Competitive Production

AGENCY: United States International Trade Commission.

ACTION: Revised deadline for filing pre-hearing briefs and statements.

SUMMARY: The Commission has revised the deadline for filing pre-hearing briefs and statements for investigation No.

332–502, *Sub-Saharan African Textile and Apparel Inputs: Potential for Competitive Production*, from January 17, 2009 to January 16, 2009. The revised schedule reflecting this change is set out immediately below. All other requirements and procedures set out in the November 19, 2008 notice continue to apply (73 FR 71682).

DATES:

January 15, 2009: Deadline for filing request to appear at the public hearing.

January 16, 2009: Deadline for filing pre-hearing briefs and statements.

January 29, 2009: Public hearing.

February 12, 2009: Deadline for filing post-hearing briefs and statements.

February 24, 2009: Deadline for filing all other written submissions.

May 15, 2009: Transmittal of Commission report to the appropriate congressional committees and the Comptroller General.

FOR FURTHER INFORMATION CONTACT: Project leader Kimberlie Freund (202–708–5402 or *kimberlie.freund@usitc.gov*) or deputy project leader Joshua Levy (202–205–3236 or *joshua.levy@usitc.gov*) for information specific to this investigation. For information on the legal aspects of this investigation, contact William Gearhart of the Commission's Office of the General Counsel (202–205–3091 or *william.gearhart@usitc.gov*). The media should contact Margaret O'Laughlin, Office of External Relations (202–205–1819 or *margaret.olaughlin@usitc.gov*). Hearing-impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal at 202–205–1810. General information concerning the Commission may also be obtained by accessing its Internet site (*http://www.usitc.gov*). Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

Issued: December 12, 2008.

By order of the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Air Act, the Clean Water Act, RCRA, and EPCRA

Under 28 CFR 50.7, notice is hereby given that on December 1, 2008, a proposed Consent Decree in the *United States* v. *Shintech Incorporated and K-Bin Inc.,* Civil Action No. 4:08-cv-3519, was lodged with the United States District Court for the Southern District of Texas, Houston Division.

In its Complaint, the United States alleged that Shintech Incorporated and/or K-Bin Inc. (''Defendants''), at their facilities in Freeport, Texas, violated the provisions of the Clean Air Act that regulate industrial refrigerants to protect the stratospheric ozone layer; the hazardous waste management provisions of the Resource Conservation and Recovery Act (''RCRA''); the permit requirement of the Clean Water Act; and the provisions of the Emergency Planning and Community Right-to-Know Act (''EPCRA'') that require annual reports on materials present at regulated facilities.

Under the Consent Decree, Defendants will (1) pay a civil penalty of $2.585 million; (2) spend an estimated $4.8 million on injunctive relief; and (3) spend at least $4.7 million on three supplemental environmental projects (''SEPs'').

To address the Clean Air Act violations, Defendants will replace six refrigeration equipment with units that use non-ozone depleting refrigerants; conduct training programs for employees that service, maintain, or repair refrigeration equipment; and conduct third-party audits of its facilities. To ensure compliance with RCRA, Shintech has agreed to close two hazardous waste management units and install an aboveground tank system to prevent the storage or disposal of hazardous waste on land. Shintech has already corrected the Clean Water Act and EPCRA violations.

All three SEPs will be performed by Shintech. Two are designed to reduce air pollution and the third is designed to improve water quality. First, Shintech has agreed, for a period of at least two years, to implement and manage a recycling program in the City of Houston that will collect, recycle, and dispose of residential, refrigerant-containing appliances containing ozone depleting substances. Second, Shintech will upgrade five of its polyvinyl chloride (''PVC'') slurry strippers to reduce its emissions of PVC an estimated 10,000 pounds per year. Third, Shintech will add at least 300 acres of forest and wetlands to the Austin's Woods preserve (also called the Colombia Bottomlands area), which will be managed by the U.S. Fish and Wildlife Service.

The United States Department of Justice will receive for a period of thirty (30) days, from the date of this publication, comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, or submitted via e-mail to *pubcomment-ees.enrd@usdoj.gov,* and should refer to the *United States* v. *Shintech Incorporated and K-Bin Inc.,* DOJ case number 90–5–2–1–08745/1.

During the public comment period, the Consent Decree may be examined on the following Department of Justice Web site: *http://www.usdoj.gov/enrd/Consent_Decrees.html.* A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (*tonia.fleetwood@usdoj.gov*), fax number (202) 514–0097, phone confirmation number (202) 514–1547. If requesting from the Consent Decree Library a full copy of the Consent Decree including all attachments, please enclose a check in the amount of $18.25 (25 cents per page reproduction cost) payable to the U.S. Treasury.

Maureen M. Katz,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Proposed Information Collection Request on the ETA 203, Characteristics of the Insured Unemployed; Comment Request for Extension Without Change

AGENCY: Employment and Training Administration.

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collection of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

A copy of the proposed information collection request (ICR) can be obtained by contacting the office listed below in the addressee section of this notice or by accessing: *http://www.doleta.gov/OMBCN/OMBControlNumber.cfm.*

DATES: Written comments must be submitted to the office listed in the addressee section below on or before February 17, 2009.

ADDRESSES: Send comments to Scott Gibbons, U.S. Department of Labor, Employment and Training Administration, Office of Workforce Security, 200 Constitution Avenue, NW., Frances Perkins Bldg. Room S–4531, Washington, DC 20210, telephone number (202) 693–3308 (this is not a toll-free number) or by e-mail: *gibbons.scott@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Background: The ETA 203, Characteristics of the Insured Unemployed, is a once a month snapshot of the demographic composition of the claimant population. It is based on those who file a claim in the week containing the 19th of the month which reflects unemployment during the week containing the 12th. This corresponds with the BLS total unemployment sample week. This report serves a variety of socio-economic needs because it provides aggregate data reflecting unemployment insurance claimants' sex, race/ethnic group, age, industry, and occupation.

II. Desired Focus of Comments: Currently, the Employment and Training Administration is soliciting comments concerning the proposed extension without change of the ETA 203, Characteristics of the Insured Unemployed. Comments are requested to:

- Evaluate whether the proposed collection of information is necessary to assess performance of the nonmonetary determination function, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions: This is a request for OMB approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)) for continuing an existing collection of information previously approved and assigned OMB Control No. 1205–0009.

Type of Review: Extension without change.

Agency: Employment and Training Administration.

Title: Characteristics of the Insured Unemployed.

OMB Number: 1205–0009.

Agency Number: ETA 203.

Affected Public: State Governments.

Total Respondents: 53.

Frequency: Monthly.

Total Responses: 636.

Average Time per Response: .33 hours.

Estimated Total Burden Hours: 212 hours per year.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintaining): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: December 11, 2008.

Cheryl Atkinson,

Administrator, Office of Workforce Security.

DEPARTMENT OF LABOR

Employee Benefits Security Administration

Publication of Year 2008 Form M–1 With Electronic Filing Option; Notice

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Notice on the Availability of the Year 2008 Form M–1 with Electronic Filing Option.

SUMMARY: This document announces the availability of the Year 2008 Form M–1, Annual Report for Multiple Employer Welfare Arrangements and Certain Entities Claiming Exception. It is substantively identical to the 2007 Form M–1. The Form M–1 may again be filed electronically over the Internet.

FOR FURTHER INFORMATION CONTACT: For inquiries regarding the Form M–1 filing requirement, contact Amy J. Turner or Beth L. Baum, Office of Health Plan Standards and Compliance Assistance, at (202) 693–8335. For inquiries regarding how to obtain or file a Form M–1, see the **SUPPLEMENTARY INFORMATION** section below.

SUPPLEMENTARY INFORMATION:

I. Background

The Form M–1 is required to be filed under section 101(g) and section 734 of the Employee Retirement Income Security Act of 1974, as amended (ERISA), and 29 CFR 2520.101–2.

II. The Year 2008 Form M–1

This document announces the availability of the Year 2008 Form M–1, Annual Report for Multiple Employer Welfare Arrangements (MEWAs) and Certain Entities Claiming Exception (ECEs). This year's Form M–1 is substantively identical to the Year 2007 Form M–1. The electronic filing option has been retained and filers are encouraged to use this method. The Year 2008 Form M–1 is due March 2, 2009, with an extension until May 1, 2009 available.

The Employee Benefits Security Administration (EBSA) is committed to working together with administrators to help them comply with this filing requirement. Copies of the Form M–1 are available on the Internet at *http://www.dol.gov/ebsa/forms_requests.html.* In addition, after printing, copies will be available by calling the EBSA toll-free publication hotline at 1–866–444–EBSA (3272). Questions on completing the form are being directed to the EBSA help desk at (202) 693–8360. For questions regarding the electronic filing capability, contact the EBSA computer help desk at (202) 693–8600.

Statutory Authority: 29 U.S.C. 1021–1024, 1027, 1029–31, 1059, 1132, 1134, 1135, 1181–1183, 1181 note, 1185, 1185a–b, 1191, 1191a–c; Secretary of Labor's Order No. 1–2003, 68 FR 5374 (February 2, 2003).

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–64,160]

Boise Cascade, LLC, Wood Products Division, St. Helens, OR; Notice of Affirmative Determination Regarding Application for Reconsideration

By application dated November 3, 2008, Oregon AFL–CIO Labor Liaison requested administrative reconsideration of the negative

determination regarding workers' eligibility to apply for Trade Adjustment Assistance (TAA) and Alternative Trade Adjustment Assistance (ATAA) applicable to workers and former workers of the subject firm. The determination was issued on October 8, 2008. The Notice of Determination was published in the **Federal Register** on October 27, 2008 (73 FR 63736).

The initial investigation resulted in a negative determination based on the finding that imports of softwood veneer did not contribute importantly to worker separations at the subject firm and no shift of production to a foreign source occurred.

In the request for reconsideration, the petitioner provided additional information regarding imports of softwood veneer and requested the Department of Labor conduct additional investigation regarding import impact on subject plant production.

The Department has carefully reviewed the request for reconsideration and the existing record and has determined that the Department will conduct further investigation to determine if the workers meet the eligibility requirements of the Trade Act of 1974.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the U.S. Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 10th day of December 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

Nestaway, LLC, Garfield Heights, OH; Notice of Affirmative Determination Regarding Application for Reconsideration

By application dated November 13, 2008, the International Union, United Automobile, Aerospace & Agricultural Implement Workers of America, Region 2–B requested administrative reconsideration of the negative determination regarding workers' eligibility to apply for Trade Adjustment Assistance (TAA) and Alternative Trade Adjustment Assistance (ATAA) applicable to workers and former workers of the subject firm. The determination was issued on October 8, 2008. The Notice of Determination was published in the **Federal Register** on October 27, 2008 (73 FR 63736).

The initial investigation resulted in a negative determination based on the finding that imports of dishwasher rack components did not contribute importantly to worker separations at the subject firm and no shift of production to a foreign source occurred.

In the request for reconsideration, the petitioner provided additional information regarding the customers of the subject firm and alleged that there were other products manufactured at the subject facility, which were not revealed in the initial investigation.

The Department has carefully reviewed the request for reconsideration and the existing record and has determined that the Department will conduct further investigation to determine if the workers meet the eligibility requirements of the Trade Act of 1974.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the U.S. Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 10th day of December 2008.

[TA–W–63,976]

Stauble Machine and Tool Co., Inc., Louisville, KY; Notice of Affirmative Determination Regarding Application for Reconsideration

By application dated December 2, 2008, petitioners requested administrative reconsideration of the negative determination regarding workers' eligibility to apply for Trade Adjustment Assistance (TAA) and Alternative Trade Adjustment Assistance (ATAA) applicable to workers and former workers of the subject firm. The determination was issued on November 7, 2008. The Notice of Determination was published in the **Federal Register** on November 25, 2008 (73 FR 71696).

The initial investigation resulted in a negative determination based on the finding that imports of metal stamping parts did not contribute importantly to worker separations at the subject firm and no shift of production to a foreign source occurred.

In the request for reconsideration, the petitioner provided additional information regarding subject firm's production facility in Mexico and alleged a shift in production from the subject firm to Mexico.

The Department has carefully reviewed the request for reconsideration and the existing record and has determined that the Department will conduct further investigation to determine if the workers meet the eligibility requirements of the Trade Act of 1974.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the U.S. Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 10th day of December 2008.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–63,052]

Chrysler LLC, St. Louis North Assembly Plant Including On-Site Leased Workers From HAAS TCM, Inc., and Logistics Services, Inc., Fenton, MO; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and Section 246 of the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on April 14, 2008, applicable to workers of Chrysler LLC, St. Louis North Assembly Plant, Fenton, Missouri. The notice was published in the **Federal Register** on May 2, 2008 (73 FR 24317). The certification was

subsequently amended to include on-site leased workers from HAAS TMC, Inc. The amendment was issued on November 18, 2008, and published in the **Federal Register** on December 1, 2008 (73 FR 72848).

At the request of a UAW, Region 5 official, the Department reviewed the certification for workers of the subject firm. The workers assemble Dodge Ram full-sized pickup trucks.

New information shows that leased workers from Logistics Services, Inc., were employed on-site at the Fenton, Missouri, location of Chrysler LLC, St. Louis North Assembly Plant. The Department has determined that these workers were sufficiently under the control of Chrysler LLC, St. Louis North Assembly Plant, to be considered leased workers.

Based on these findings, the Department is amending this certification to include workers leased from Logistics Services, Inc., working on-site at the Fenton, Missouri, location of the subject firm.

The intent of the Department's certification is to include all workers employed at Chrysler LLC, St. Louis North Assembly Plant, Fenton, Missouri, who were adversely affected by increased imports of Dodge Ram full-sized pickup trucks.

The amended notice applicable to TA–W–63,052 is hereby issued as follows:

''All workers of Chrysler LLC, St. Louis North Assembly Plant, including on-site leased workers from HAAS TCM, Inc., and Logistics Services, Inc., Fenton, Missouri, who became totally or partially separated from employment on or after March 18, 2007, through April 14, 2010, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.''

Signed at Washington, DC, this 9th day of December 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

[TA–W–61,962K]

Hanesbrands, Inc., Eden Division, Including On-Site Leased Workers From Diversco Integrated Services, Eden, NC; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273), the Department of Labor issued a Certification of Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on September 13, 2007, applicable to workers of Hanesbrands, Inc., Eden Division, Eden, North Carolina. The notice was published in the **Federal Register** on September 27, 2007 (72 FR 54939).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. The workers are engaged in a variety of support activities related to the firm's production of laminated fabric and fabric components.

New information shows that workers leased from Diversco Integrated Services were employed on-site at the Eden Division, Eden, North Carolina, location of Hanesbrands, Inc.

The Department has determined that these workers were sufficiently under the control of the subject firm to be considered leased workers.

Based on these findings, the Department is amending this certification to include leased workers from Diversco Integrated Services working on-site at the Eden Division, Eden, North Carolina, location of the subject firm.

The intent of the Department's certification is to include all workers employed at Hanesbrands, Inc., Eden Division who were adversely affected by a shift in production of laminated fabric and fabric components to El Salvador, the Dominican Republic and Honduras.

The amended notice applicable to TA–W–61,962K is hereby issued as follows:

''All workers of Hanesbrands, Inc., Eden Division, Eden, North Carolina, including on-site leased workers from Diversco Integrated Services, Eden, North Carolina, who became totally or partially separated from employment on or after August 7, 2006, through September 13, 2009, are eligible to apply for trade adjustment assistance under Section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.''

Signed at Washington, DC, this 9th day of December 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

[TA–W–64,327; TA–W–64,327A; TA–W–64,327B

Jatco USA, Inc., Remanufacturing Department, Including On-Site Workers of Kelly Services, Inc. and Express Personnel, Wixom, MI; Jatco USA, Inc., Quality Investigations Department, Including On-Site Workers of Kelly Services, Inc. and Express Personnel, Wixom, MI; Jatco USA, Inc., Administrative Department, Including On-Site Workers of Kelly Services, Inc. and Express Personnel, Wixom, MI; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and Section 246 of the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on November 18, 2008, applicable to workers of Jatco USA, Inc., Remanufacturing Department, Wixom, Michigan (TA–W–64,327); Jatco USA, Inc., Quality Investigations Department, Wixom, Michigan (TA–W–64,327A); and Jatco USA, Inc., Administrative Department, Wixom, Michigan (TA–W–64,327B). The notice will be published in the **Federal Register** soon.

The workers were engaged in the production of remanufactured automatic transmissions. Workers also inspected the remanufactured automatic transmissions and provided administrative support for the production of remanufactured automatic transmissions.

At the request of the company official, the Department reviewed the certification for workers of the subject firm.

Information shows that workers leased from Kelly Services, Inc. and Express Personnel were employed on-site at the Remanufacturing Department, Quality Investigations Department and Administrative Department at the Wixom location of Jatco USA, Inc. The Department has determined that these workers were sufficiently under the control of Jatco USA, Inc., Remanufacturing Department, Wixom, Michigan (TA–W–64,327); Jatco USA, Inc., Quality Investigations Department, Wixom, Michigan (TA–W–64,327A); and Jatco USA, Inc., Administrative Department, Wixom, Michigan (TA–W–64,327B).

Based on these findings, the Department is amending this certification to include leased workers from Kelly Services, Inc. and Express Personnel working on-site at Jatco USA, Inc., Remanufacturing Department, Wixom, Michigan (TA–W–64,327); Jatco USA, Inc., Quality Investigations Department, Wixom, Michigan (TA–W–64,327A); and Jatco USA, Inc., Administrative Department, Wixom, Michigan (TA–W–64,327B) to be considered leased workers.

The intent of the Department's certification is to include all workers employed at Jatco USA, Inc., Remanufacturing Department, Wixom, Michigan (TA–W–64,327); Jatco USA, Inc., Quality Investigations Department, Wixom, Michigan (TA–W–64,327A); and Jatco USA, Inc., Administrative Department, Wixom, Michigan (TA–W–64,327B) who were adversely affected by a shift in production of remanufactured automatic transmissions to Mexico. The amended notice applicable to TA–W–64,327 is hereby issued as follows:

All workers of Jatco USA, Inc., Remanufacturing Department, including on-site leased workers of Kelly Services, Inc. and Express Personnel, Wixom, Michigan (TA–W–64,327); Jatco USA, Inc., Quality Investigations Department, including on-site leased workers of Kelly Services, Inc. and Express Personnel, Wixom, Michigan (TA–W–64,327A); and Jatco USA, Inc., Administrative Department, including on-site leased workers of Kelly Services, Inc. and Express Personnel, Wixom, Michigan (TA–W–64,327B), who became totally or partially separated from employment on or after October 30, 2007, through November 18, 2010, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.

Signed at Washington, DC this 8th day of December 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) number and alternative trade adjustment assistance (ATAA) by (TA–W) number issued during the period of December 1 through December 5, 2008.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(a) of the Act must be met.

I. Section (a)(2)(A) all of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. The sales or production, or both, of such firm or subdivision have decreased absolutely; and

C. Increased imports of articles like or directly competitive with articles produced by such firm or subdivision have contributed importantly to such workers' separation or threat of separation and to the decline in sales or production of such firm or subdivision; or

II. Section (a)(2)(B) both of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. There has been a shift in production by such workers' firm or subdivision to a foreign country of articles like or directly competitive with articles which are produced by such firm or subdivision; and

C. One of the following must be satisfied:

1. The country to which the workers' firm has shifted production of the articles is a party to a free trade agreement with the United States;

2. The country to which the workers' firm has shifted production of the articles to a beneficiary country under the Andean Trade Preference Act, African Growth and Opportunity Act, or the Caribbean Basin Economic Recovery Act; or

3. There has been or is likely to be an increase in imports of articles that are like or directly competitive with articles which are or were produced by such firm or subdivision.

Also, in order for an affirmative determination to be made for secondarily affected workers of a firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(b) of the Act must be met.

(1) Significant number or proportion of the workers in the workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The workers' firm (or subdivision) is a supplier or downstream producer to a firm (or subdivision) that employed a group of workers who received a certification of eligibility to apply for trade adjustment assistance benefits and such supply or production is related to the article that was the basis for such certification; and

(3) Either—

(A) The workers' firm is a supplier and the component parts it supplied for the firm (or subdivision) described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) A loss or business by the workers' firm with the firm (or subdivision) described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for the Division of Trade Adjustment Assistance to issue a certification of eligibility to apply for Alternative Trade Adjustment Assistance (ATAA) for older workers, the group eligibility requirements of section 246(a)(3)(A)(ii) of the Trade Act must be met.

1. Whether a significant number of workers in the workers' firm are 50 years of age or older.

2. Whether the workers in the workers' firm possess skills that are not easily transferable.

3. The competitive conditions within the workers' industry (*i.e.*, conditions within the industry are adverse).

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of Section 222(a)(2)(A) (increased imports) of the Trade Act have been met.

None.

The following certifications have been issued. The requirements of section 222(a)(2)(B) (shift in production) of the Trade Act have been met.

None.

The following certifications have been issued. The requirements of section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) of the Trade Act have been met.

None.

The following certifications have been issued. The requirements of Section 222(b) (downstream producer for a firm whose workers are certified eligible to apply for TAA based on increased imports from or a shift in production to Mexico or Canada) of the Trade Act have been met.

None.

Affirmative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of section 222(a)(2)(A) (increased imports) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA–W–64,345; Sunspring America, Inc., Henderson, KY: October 25, 2007.

TA–W–64,464; Times Fiber Communications, A Division of Amphenol Corporation, Liberty, NC: November 15, 2007.

TA–W–64,478; Broyhill Furniture Industries, Inc., Corporate Office, Lenoir, NC: November 18, 2007.

TA–W–64,052; Arkansas Extrusions, LLC, Hot Springs, AR: September 12, 2007.

TA–W–64,286; MTD Acquisition, Chisholm, MN: October 24, 2007.

TA–W–64,324; Chrysler LLC, Mack Avenue Engine Plant, Power Train Division, Detroit, MI: October 30, 2007.

TA–W–64,529; Broyhill Furniture Industries, Lenoir Chair #5, aka Lenoir Plant, Lenoir, NC: November 17, 2007.

TA–W–63,675; Kerry Group, Inc., Germantown, WI: July 9, 2007.

TA–W–64,308; DLJ Production, Inc., Brooklyn, NY: October 27, 2007.

The following certifications have been issued. The requirements of section 222(a)(2)(B) (shift in production) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA–W–64,087; Affymetrix, Inc., West Sacramento, CA: September 18, 2007.

TA–W–64,100; Ark II Manufacturing, LLC, Amweld Building Products, Stow, OH: September 22, 2007.

TA–W–64,217; ICG Castings, Inc., Dowagiac, MI: September 15, 2007.

TA–W–64,263; Celanese Emulsions Corp., Emulsion Polymers Division, Emulsion Polymers Division, Meredosia, IL: October 9, 2007.

TA–W–64,297; Hewlett-Packard Company, Minnetonka, MN: October 22, 2007.

TA–W–64,306; Ainsworth Engineered LLC, Bemidji, MN: October 29, 2007.

TA–W–64,339; Tenneco, Elastomers, Napoleon, OH: October 31, 2007.

TA–W–64,379; Chole Hersee Company, South Boston, MA: May 12, 2008.

TA–W–64,380; Alcoa, Inc., U.S. Primary Metals Division, Rockdale, TX: November 6, 2007.

TA–W–64,447; Vibracoustic North America, Ligonier Division, Ligonier, IN: November 13, 2007.

TA–W–64,454; Alcatel-Lucent, Global Supply Chain, Charlotte, NC: November 17, 2007.

TA–W–64,488; Robertshaw Controls Company, dba Invensys Controls, Holland, MI: November 17, 2007.

TA–W–64,317; Callaway Golf Company, Carlsbad, CA: October 30, 2007.

TA–W–64,340; A. B. Carter, Inc., Gastonia, NC: October 31, 2007.

The following certifications have been issued. The requirements of section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA–W–64,295; Coupled Products, LLC, Formerly Known as Dana Corp., Upper Sandusky, OH: October 23, 2007.

TA–W–64,487; Advanced Urethane Technologies, Dubuque, IA: November 19, 2007.

The following certifications have been issued. The requirements of section 222(b) (downstream producer for a firm whose workers are certified eligible to apply for TAA based on increased imports from or a shift in production to Mexico or Canada) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

None.

Negative Determinations for Alternative Trade Adjustment Assistance

In the following cases, it has been determined that the requirements of 246(a)(3)(A)(ii) have not been met for the reasons specified.

The Department has determined that criterion (1) of section 246 has not been met. The firm does not have a significant number of workers 50 years of age or older.

None.

The Department has determined that criterion (2) of section 246 has not been met. Workers at the firm possess skills that are easily transferable.

None.

The Department has determined that criterion (3) of section 246 has not been met. Competition conditions within the workers' industry are not adverse.

None.

Negative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In the following cases, the investigation revealed that the eligibility criteria for worker adjustment assistance have not been met for the reasons specified.

Because the workers of the firm are not eligible to apply for TAA, the workers cannot be certified eligible for ATAA.

The investigation revealed that criteria (a)(2)(A)(I.A.) and (a)(2)(B)(II.A.) (employment decline) have not been met.

None.

The investigation revealed that criteria (a)(2)(A)(I.B.) (Sales or production, or both, did not decline) and (a)(2)(B)(II.B.) (shift in production to a foreign country) have not been met.

TA–W–64,263A; Celanese Emulsions Corp., Solid Adhesives Division, Solid Adhesives Division, Meredosia, IL.

TA–W–64,500; Fortune Swimwear LLC, Design Studio, New York, NY.

The investigation revealed that criteria (a)(2)(A)(I.C.) (increased imports) and (a)(2)(B)(II.B.) (shift in production to a foreign country) have not been met.

TA–W–64,314; Town of Forest City, Wastewater Treatment Department, Forest City, NC.

TA–W–64,328; E. Toman and Company, Lyons, IL.

TA–W–64,510; Ford Motor Company, Chicago Assembly Plant, Chicago, IL.

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–64,314A; Town of Forest City, Wastewater Treatment Department, Forest City, NC.

TA–W–64,314B; Town of Forest City, Public Works Dept., Water Maintenance Division, Sewer Maintenance Division, Forest City, NC.

TA–W–64,314C; Town of Forest City, Parks and Recreation Department, Forest City, NC.

TA–W–64,314D; Town of Forest City, Police Department, Forest City, NC.

TA–W–64,314E; Town of Forest City, Fire Department, Forest City, NC.

TA–W–64,314F; Town of Forest City, Public Works Department, Electric Distribution Division, Forest City, NC.

TA–W–64,314G; Town of Forest City, Administration Department, Forest City, NC.

TA–W–64,338; Pine Island Sportswear, Ltd, Monroe, NC.

TA–W–64,369; ABX Air, Inc., Wilmington, OH.

TA–W–64,381; MetLife Group, Inc., Shared Services Division, Tulsa, OK.

TA–W–64,412; United Airlines, Inc., United Airlines Maintenance Base, San Francisco, CA.

TA–W–64,418; Blockbuster, Inc., Information Technology, McKinney, TX.

The investigation revealed that criteria of section 222(b)(2) has not been met. The workers' firm (or subdivision) is not a supplier to or a downstream producer for a firm whose workers were certified eligible to apply for TAA.

None.

I hereby certify that the aforementioned determinations were issued during the period of December 1 through December 5, 2008. Copies of these determinations are available for inspection in Room N–5428, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: December 11, 2008.

Wireless Communications and Electronic Tracking Systems Guidance

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Notice of availability of Program Policy Letter; request for comments.

SUMMARY: This notice is announcing the issuance of a Program Policy Letter (PPL) to provide mine operators guidance for implementing the Mine Improvement and New Emergency Response Act (MINER Act) requirements for wireless communications and electronic tracking systems. Material in the guidance does not constitute a regulation.

DATES: All comments must be received by Midnight Eastern Standard Time on January 8, 2009.

ADDRESSES: Comments may be sent by any of the following methods:

(1) *Electronic mail:* zzMSHA-Standards—Comments to Fed Reg Group@dol.gov.

(2) *Electronic mail: GoodGuidance@dol.gov.*

(3) *Regular mail:* MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2350, Arlington, Virginia 22209–3939.

(4) *Hand Delivery or Courier:* MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2350, Arlington, Virginia. Sign in at the receptionist's desk on the 21st floor.

Comments can be accessed electronically at *http://www.msha.gov/currentcomments.asp.* MSHA will post all comments on the Internet without change, including any personal information provided. Comments may also be reviewed at the Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2350, Arlington, Virginia. Sign in at the receptionist's desk on the 21st floor.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, *patricia.silvey@dol.gov* (E-mail), 202–693–9440 (Voice).

SUPPLEMENTARY INFORMATION:

I. Background

On June 15, 2006, the President signed the MINER Act of 2006 (Pub. L. 109–236). The MINER Act requires that each underground coal mine operator have an approved Emergency Response Plan (ERP) that includes post-accident communications and post-accident tracking. Further, the MINER Act requires that by June 15, 2009, each operator must submit a plan that provides for ''a post-accident communication system between underground personnel and surface personnel via a wireless two-way medium and an electronic tracking system that permits surface personnel to determine the location of any persons trapped underground, or set forth within the plan the reasons such provisions can not be adopted''.

II. Overview

As of December 12, 2008, approved electronic tracking systems are available. However, fully wireless communications technology is not sufficiently developed at this time, nor is it likely to be technologically feasible by June 15, 2009.

In accordance with Executive Order (EO) 12866 on Regulatory Planning and

Review, as amended by EO 13422 (January 18, 2007), and the Bulletin for Agency Good Guidance Practices (Good Guidance Bulletin), adopted by the Office of Management and Budget, MSHA has issued a PPL to provide mine operators guidance for implementing MINER Act requirements for wireless communications and electronic tracking systems by June 15, 2009. Specifically, the guidance addresses electronic tracking systems and acceptable alternatives to fully wireless communication systems for use in mine emergencies. The guidance represents MSHA's current thinking with respect to two-way communication and electronic tracking for use in mine emergencies.

In accordance with the Good Guidance Bulletin, MSHA has made the PPL on ''Guidance for Compliance with Post-Accident Two-Way Communications and Electronic Tracking Requirements of the MINER Act'' publicly available on the Agency's Web site for comment. MSHA is also making available on the Agency's website preliminary estimates of costs associated with implementing the MINER Act requirements under the guidance in the PPL. MSHA invites the public to comment on the guidance in the PPL, as well as the preliminary cost estimates. MSHA's draft PPL and preliminary cost estimates are posted on the Internet at *http://www.msha.gov/regs/complian/pplmen.htm.* You may view all comments on the Agency's Web site at *http://www.msha.gov/currentcomments.asp.*

MSHA will consider initiating rulemaking on requirements for wireless post-accident communication systems and electronic tracking systems in the future. In the interim, MSHA is issuing the PPL to respond to underground coal mine operators' requests for guidance to assist them in implementing these requirements of the MINER Act in a timely and effective manner. MSHA will use comments received to help the Agency determine the most appropriate course of action.

Richard E. Stickler,

Acting Assistant Secretary for Mine Safety and Health.

Effective Date: _____

Expiration Date: _____

Program Policy Letter No. P08-

From: Kevin Stricklin, Administrator for Coal Mine Safety and Health; Mark Skiles, Director of Technical Support.

Subject: Guidance for Compliance with Post-Accident Two-Way Communications and Electronic Tracking Requirements of the Mine Improvement and New Emergency Response Act (MINER Act).

Scope

This program policy letter (PPL) is intended for Mine Safety and Health Administration (MSHA) personnel, equipment manufacturers, repair facilities, underground coal mine operators and independent contractors, miners' representatives, and other interested parties.

Purpose

This PPL is a general statement of policy that provides mine operators guidance in implementing: (1) Alternatives to fully wireless post-accident two-way communication between underground and surface personnel and (2) electronic tracking systems, both of which are required by the MINER Act. The two-way communication alternatives (or ''partially wireless'' systems) include infrastructure underground to provide untethered communications with miners.

Policy

The following guidance is provided to assist mine operators in developing post-accident two-way communication between underground and surface personnel and electronic tracking for their Emergency Response Plans (ERPs), as required by the MINER Act. The MINER Act requires, by June 15, 2009, a plan be submitted that provides for a post-accident communication system between underground personnel and surface personnel via a wireless two-way medium and an electronic tracking system that permits surface personnel to determine the location of any persons trapped underground. If these provisions cannot be adopted, the MINER Act requires that ERPs must set forth an alternative means of compliance that approximates, ''as closely as possible, the degree of functional utility and safety protection provided by the wireless two-way medium and tracking system'' referenced.

With respect to tracking, because electronic systems currently are available and MSHA approved, new ERPs and revisions to existing ERPs should provide for electronic tracking of persons underground.

However, because fully wireless communications technology is not sufficiently developed at this time, nor is it likely to be technologically feasible by June 15, 2009, this guidance addresses acceptable alternatives to fully wireless communication systems. New ERPs and revisions to existing ERPs should provide for alternatives to fully wireless communication systems.

This guidance represents MSHA's current thinking with respect to two-way communication and electronic tracking for use in mine emergencies. It does not create or confer any rights for any person and it does not operate to bind mine operators or any other members of the public. Mine operators can use an alternative approach or system to provide two-way communication or electronic tracking, if the approach or system satisfies the requirements of applicable statutes and regulations. If you are a mine operator, miners' representative, or miner and want to discuss another approach or system, you may contact the MSHA District Manager for the area in which the mine is located. Other interested parties may contact the individuals identified in this PPL. References to the District Manager in this PPL refer to the Agency's existing consultative process for approving mine plans, as opposed to the process for enforcement decisions related to citations.

Two-Way Communication System

By June 15, 2009, in accordance with Section 2 of the MINER Act, until fully wireless systems are available, operators must set forth in their Emergency Response Plans the reasons that they are proposing alternative systems, that is, that wireless systems are not available, and provide an alternative that approximates, as closely as possible, the degree of functional utility and safety protection provided by a wireless two-way communications system. While operators and District Managers must consider mine-specific circumstances in determining appropriate two-way communications systems, this guidance outlines the features MSHA believes would best approximate the functional utility and safety protections of a fully wireless system, given the limitations of current technology. As noted, operators and others may propose other approaches or systems, and the District Manager will exercise his discretion in evaluating them. Communications systems that are already in use may need to be updated to comply with the MINER Act requirements to approximate the utility and safety protections of a fully wireless system.

1. General Considerations—An alternative to a fully wireless communications system used to meet the requirements of the MINER Act for post-accident communication either can be a system used for day-to-day operations or a stored system used in the event of an accident. Examples of currently available technologies that

may be capable of best approximating a fully wireless communications system include, but are not limited to, leaky feeder, mesh and medium frequency systems. Any alternative system generally should:

a. Have an untethered device that miners can use to communicate with the surface. The untethered device should be readily accessible to each group of miners working or traveling together and to any individual miner working or traveling alone.

b. Provide communication in the form of two-way voice and/or two-way text messages. If used, pre-programmed text messages should be capable of providing information to the surface necessary to determine the status of miners and the conditions in the mine, as well as providing the necessary emergency response information to miners.

c. Provide an audible, visual, and/or vibrating alarm that is activated by an incoming signal. The alarm should be distinguishable from the surrounding environment.

d. Be capable of sending an emergency message to each of the untethered devices.

e. Be installed to prevent interference with blasting circuits and other electrical systems.

2. Coverage Area

a. The system must provide coverage for each working section in a mine including all intersections.

b. The system also generally should provide continuous coverage along the escapeways and a coverage zone both inby and outby strategic areas of the mine, such as belt drives and transfer points, power centers, loading points, refuge alternatives, SCSR caches and other areas identified by the District Manager. While a coverage zone of 200 feet inby and 200 feet outby strategic areas normally should be adequate, the District Manager may require longer or shorter distances given circumstances specific to the mine.

i. The District Manager may approve alternative coverage areas to those areas identified in 2(b), such as adjacent entries, for reasons such as radio frequency interference or other factors that may reduce the coverage area at the identified strategic areas.

ii. Miners should follow an established check-in/check-out procedure or an equivalent procedure when assigned to work in bleeders or other remote areas of the mine that are not provided with communications coverage.

3. Permissibility—The communication system must be approved by MSHA to comply with 30 CFR part 23 and applicable policies.

4. Standby Power for Underground Components and Devices

a. Stationary components (infrastructure) generally should be equipped with a standby power source capable of providing sufficient power to facilitate evacuation and rescue in the event the line power fails or is cut off. In many mining situations, at least 24 hours of standby power based on a 5% transmit time, 5% receive time, and 90% idle time duty cycle (denoted as 5/5/90) generally should be adequate, but mine-specific conditions may warrant more or less standby power capability.

b. Portable devices, such as hand-held radios, generally should provide sufficient power to facilitate evacuation and rescue following an accident. In many mining situations, at least 4 hours of operation in addition to the normal shift duration (12-hour minimum total duration) based on a 5/5/90 duty cycle generally should be adequate, but mine-specific conditions may warrant more or less capability.

5. Surface Considerations

a. The communication system generally should include a line-powered surface component with a standby power source to ensure continued operation in the event the line power is interrupted.

b. The surface components of the communication system should be located at the communication facility required under 30 CFR 75.1600–1 where a person who is always on duty when persons are underground can receive incoming messages and respond immediately in the event of an emergency. The person should be trained in the operation of the communication system and knowledgeable of the mine's Emergency Response Plan.

6. Survivability

a. The post-accident communication system generally should provide redundant signal pathways to the surface component.

b. Redundancy can be achieved by multiple systems installed in multiple entries, or one system with multiple pathways to the surface; provided that a failure in one system or pathway does not affect the other system or pathway.

c. Redundancy means that the system can maintain communications with the surface when a single pathway is disrupted. Disruption can include major events in an entry or component failure.

d. If system components must be installed in areas vulnerable to damage (such as in front of seals), protection against forces that could cause damage should be provided.

7. Maintenance

a. The equipment manufacturer generally should provide a maintenance schedule and checklist to the mine operator.

b. The mine operator generally should:

i. Establish and follow a procedure to provide communications during system or component failures in the event that an accident occurs before the failure can be corrected.

ii. Check the standby power and functionality of the system and the untethered devices on a weekly basis as required by 30 CFR 75.512–2.

iii. Follow the manufacturer's maintenance recommendations.

Electronic Tracking System

Approved electronic tracking systems are available. While operators and District Managers must consider mine-specific circumstances in determining an appropriate electronic tracking system, this guidance outlines features MSHA believes would provide the protection contemplated in the MINER Act in many underground coal mining environments. As noted, operators and others may propose alternative approaches or systems, and the District Manager will exercise his discretion in evaluating them.

1. By June 15, 2009, a plan must be submitted that provides for determining the location of persons underground using an electronic tracking system pursuant to 30 U.S.C. 876(b)(2)(F)(ii).

2. Performance

a. While the required capabilities of a particular tracking system will depend on mine-specific circumstances, an effective electronic tracking system generally should be capable of:

i. Determining the location of miners on a working section including all intersections to within 200 feet.

ii. Determining the location of miners in escapeways at intervals not exceeding 2,000 feet.

iii. Determining the location of miners within 200 feet of strategic locations such as belt drives and transfer points, power centers, loading points, refuge alternatives, SCSR caches, and other areas deemed appropriate by the District Manager (example: A reader is placed 200 feet or less from each strategic location).

iv. Determining direction of travel at key junctions in escapeways.

b. Electronic tracking systems generally should be installed to prevent interference with blasting circuits and other electrical systems.

3. Permissibility—The tracking system must be approved by MSHA under 30 CFR part 23 and applicable policies.

4. Standby Power for Underground Components

a. Stationary components (infrastructure) should be capable of tracking persons underground during evacuation and rescue efforts, even upon loss of mine power. In many circumstances, the capacity to provide a minimum of 24 hours of continuous tracking operation after a power loss generally should be sufficient.

b. An individually-worn/carried tracking device (e.g., a tag) generally should provide a low power warning. To facilitate evacuation and rescue efforts, the individually-worn/carried tracking device generally should provide at least 4 hours of operation in addition to the normal shift duration (12-hour total minimum duration).

5. Capacity—Tracking system components (readers) must be capable of tracking the maximum number of persons, including visitors, expected to be in a coverage area.

6. Scanning rate—In order to provide timely and relevant information, the tracking system generally should be capable of updating (refreshing) location data at least every 60 seconds.

7. Surface Considerations

a. The surface component of a tracking system should be located at the communication facility required under 30 CFR 75.1600–1 where a person is always on duty when miners are underground and should include a line-powered interface that can display the location of all miners underground. The person should be trained in the operation of the tracking system.

b. The surface tracking component should be equipped with standby power to ensure continuous operation in the event the line power is interrupted.

c. The tracking system interface should display the last known location of a miner when the tracking device is not communicating with the system.

d. Each miner should be uniquely identified.

e. Location data should be associated with a time stamp.

f. Location data should be stored for two weeks so that it will be available for evacuation and rescue of persons underground, as well as for accident investigations.

8. Survivability

a. If system components must be installed in areas vulnerable to damage (such as in front of seals), protection against forces that could cause damage should be provided. For example, protection could be provided by installing enclosures in recessed areas, around corners, or other areas that reduce potential for damage, or routing and protecting cables such that potential for damage is minimized.

b. Data storage should not be impacted by interruption of the data link between underground and surface components.

9. Maintenance

a. The equipment manufacturer generally should provide a maintenance schedule and checklist to the mine operator.

b. The mine operator generally should:

i. Establish and follow a procedure to provide tracking during system or component failures in the event that an accident occurs before the failure can be corrected.

ii. Check the standby power and functionality of the system and the devices worn by the miner on a weekly basis as required by 30 CFR 75.512–2.

iii. Follow the manufacturer's maintenance recommendations.

Background

The MINER Act of 2006 included the following requirement for communications and tracking systems:

> Not later than 3 years after the date of enactment of the Mine Improvement and New Emergency Response Act of 2006, a [n emergency response] plan shall, to be approved, provide for post accident communication between underground and surface personnel via a wireless two-way medium, and provide for an electronic tracking system permitting surface personnel to determine the location of any persons trapped underground or set forth within the plan the reasons such provisions can not be adopted. Where such plan sets forth the reasons such provisions can not be adopted, the plan shall also set forth the operator's alternative means of compliance. Such alternative shall approximate, as closely as possible, the degree of functional utility and safety protection provided by the wireless two-way medium and tracking system referred to in this subpart.

Since fully wireless communication systems technology is not currently available to mine operators, alternative means of compliance using partially wireless two-way communication is warranted.

In addition, the MINER Act requires:

> Consistent with available technology and with the physical constraints, if any, of the mine, the plan shall provide for above ground personnel to determine the current, or immediately pre-accident, location of all underground personnel. Any system so utilized shall be functional, reliable, and calculated to remain serviceable in a post-accident setting.

As of the date of this PPL, electronic tracking is available and MSHA approved. As technological advances are made and become available, MSHA will update this guidance, and District Managers will review existing Emergency Response Plans to consider the manner in which intervening advances in electronic tracking systems may enhance miners' ability to evacuate or otherwise survive in an emergency.

Authority

Section 316 of the Federal Mine Safety and Health Act of 1977, as amended, 30 U.S.C. 876; 30 CFR part 23 and 75.1600.

Filing Instructions

This program policy letter should be filed behind the tab marked ''Program Policy Letters'' at the back of Volume II of the Program Policy Manual.

Internet Availability

This program policy letter may be viewed on the World Wide Web by accessing the MSHA home page (*http://www.msha.gov*) and choosing ''Compliance Info'' and ''Program Policy Letters.'' A list of MSHA-approved two-way communications systems and a list of MSHA-approved electronic tracking systems may be found at *http://www.msha.gov/techsupp/PEDLocating/MSHAApprovedPEDproducts.pdf.*

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2008–0049]

Hazardous Waste Operations and Emergency Response (HAZWOPER); Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comment.

SUMMARY: OSHA solicits comments concerning its proposal to extend OMB approval of the information collection requirements contained in the Standard on Hazardous Waste Operations and Emergency Response (HAZWOPER) (29 CFR 1910.120). Section 126(e) of the ''Superfund Amendments and Reauthorization Act of 1986'' (SARA) (Pub. L. 99–499) which became law on October 17, 1986, required the Secretary of Labor, pursuant to Section 6 of the Occupational Safety and Health Act of 1970 (the Act), to promulgate standards for the safety and health protection of employees engaged in hazardous waste operations and emergency response. Section 126(b) lists 11 employee protection provisions that the Secretary of Labor had to include in OSHA's final standard. Those provisions require OSHA to address the preparation of various written programs, plans and records; the training of employees; the monitoring of airborne hazards; the conduct of medical surveillance; and the distribution of information to employees. The provisions also require the collection of information from employers engaged in hazardous waste operations and their emergency response to such operations. The final standard covers the provisions mandated in SARA.

DATES: Comments must be submitted (postmarked, sent, or received) by February 17, 2009.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages, you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit three copies of your comments and attachments to the OSHA Docket Office, Docket No. OSHA–2008–0049, U.S. Department of Labor, Occupational Safety and Health Administration, Room N–2625, 200 Constitution Avenue, NW., Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Department of Labor's and Docket Office's normal business hours, 8:15 a.m. to 4:45 p.m., e.t.

Instructions: All submissions must include the Agency name and OSHA docket number (OSHA–2008–0049) for the Information Collection Request (ICR). All comments, including any personal information you provide, are placed in the public docket without change, and may be made available online at *http://www.regulations.gov.* For further information on submitting comments see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION.**

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov* or the OSHA Docket Office at the address above. All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at the address below to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Theda Kenney or Todd Owen, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Standard specifies a number of collection of information (paperwork) requirements. Each provision is described in detail in the Information Collection Request. Employers can use the information collected under the HAZWOPER rule to develop the various programs the standard requires and to ensure that their employees are trained properly about the safety and health hazards associated with hazardous waste operations and emergency response to hazardous waste releases. OSHA will use the records developed in response to this Standard to determine adequate compliance with the Standard's safety and health provisions. The employer's failure to collect and distribute the information required in this standard will affect significantly OSHA's effort to control and reduce injuries and fatalities. Such failure would also be contrary to the direction Congress provided in SARA.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Hazardous Waste Operations and Emergency Response (HAZWOPER) (29 CFR 1910.120). OSHA is proposing to decrease the existing burden hour estimate for the collection of information requirements specified by the Standard from 1,235,602 hours to 1,199,205 hours. This decrease is primarily a result of a decline in the number of sites to be remediated. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Hazardous Waste Operations and Emergency Response (29 CFR 1910.120).

OMB Number: 1218–0202.

Affected Public: Business or other for-profits; not-for-profit organizations; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 34,812.

Frequency of Response: On occasion.

Average Time Per Response: Varies from one minute (.02 hour) to maintain a certification record to 24 hours for initial employee training.

Estimated Total Burden Hours: 1,199,205.

Estimated Cost (Operation and Maintenance): $3,111,762.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) Electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal; (2) by facsimile (FAX); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA–2008–0049). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627).

Comments and submissions are posted without change at *http://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and date of birth. Although all submissions are listed in the *http://www.regulations.gov* index, some information (e.g., copyrighted material) is not publicly available to read or download through this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *http://www.regulations.gov* Web site to submit comments and access the docket is available at the Web site's ''User Tips'' link. Contact the OSHA Docket Office for information about materials not available through the Web site, and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

Thomas M. Stohler, Acting Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 5–2007 (72 FR 31159).

Signed at Washington, DC, on December 5, 2008.

Thomas M. Stohler,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2008–0050]

Longshoring and Marine Terminal Operations; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comment; correction.

SUMMARY: The Occupational Safety and Health Administration (OSHA) published a document in the **Federal Register** on December 8, 2008, soliciting public comments concerning its proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements specified in OSHA's Standards on Longshoring (29 CFR part 1918) and Marine Terminal Operations (29 CFR part 1917). The document contains an incorrect OMB Control Number.

FOR FURTHER INFORMATION CONTACT: Theda Kenney, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–2222.

Correction

In the **Federal Register** of December 8, 2008 (73 FR 74527–74528), on page 74528, in the first column under ''III. Proposed Actions,'' correct the line which reads: OMB Number: 1218–0106 to read: OMB Control Number: 1218–0196.

Authority and Signature

Thomas M. Stohler, Acting Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 5–2007 (72 FR 31159).

Signed at Washington, DC, on December 12, 2008.

Thomas M. Stohler,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

Maritime Advisory Committee for Occupational Safety and Health (MACOSH)

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: MACOSH membership, notice of.

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended (5 U.S.C., App. 2), and after consultation with the General Services Administration, the Secretary of Labor announced on September 22, 2008, her intention to re-charter the Maritime Advisory Committee for Occupational Safety and Health (MACOSH) as being in the public interest (73 FR 54624). She signed the MACOSH charter on September 23, 2008, which, pursuant to FACA, will expire after two years on September 23, 2010. On November 12, 2008, the Secretary of Labor selected and approved 15 members to serve on the Committee. The Committee is diverse and balanced, both in terms of segments of the maritime industry represented (e.g., shipyard, longshoring and marine terminal, and fishing industries), and in the views or interests represented by the members. MACOSH will contribute to OSHA's performance of the duties imposed by the Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*).

FOR FURTHER INFORMATION CONTACT: For general information about MACOSH, contact: Joseph V. Daddura, Director,

Office of Maritime, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue, NW., Washington, DC 20210; phone: (202) 693–2086; Fax: (202) 693–1663.

SUPPLEMENTARY INFORMATION:

I. Background

The maritime industry has historically experienced a high incidence of work-related fatalities, injuries, and illnesses. OSHA has targeted this industry for special attention due to that experience. This targeting has included development of guidance or outreach materials specific to the industry, rulemaking to update requirements, and other activities. MACOSH will advise OSHA on matters relevant to the safety and health of employees in the maritime industry. The Committee's advice will result in more effective enforcement, training and outreach programs, and streamlined regulatory efforts. The Committee will function solely as an advisory body, in compliance with the provisions of FACA and OSHA's regulations covering advisory committees (29 CFR part 1912).

II. Appointment of Committee Members

OSHA received nominations of highly qualified individuals in response to the Agency's request for nominations. The Secretary has selected to serve on the Committee the following individuals who have broad experience relevant to the issues to be examined by the Committee. The MACOSH members are:

Stewart Adams, U.S. Department of the Navy, Naval Sea Systems Command (NAVSEA);

Alan Davis, American Seafoods Company;

Michael J. Flynn, International Association of Machinists and Aerospace Workers;

Alton H. Glass, Sr., United Steelworkers;

Lesley E. Johnson, International Brotherhood of Electrical Workers;

Kenneth W. Killough, South Carolina Stevedores Association;

Charles R. Lemon, Washington State Department of Labor and Industries; Jennifer M. Lincoln, National Institute of Occupational Safety and Health (NIOSH);

George S. Lynch, Jr., International Longshoremen's Association;

Marc MacDonald, Pacific Maritime Association;

Tim Podue, International Longshore and Warehouse Union;

Donald Raffo, General Dynamics;

Barry E. Richardson, MTS Technologies, Inc.;

Kenneth A. Smith, U.S. Coast Guard, Vessel and Facility Operating Standards; and

James R. Thornton, Northrop Grumman, Newport News Shipyard.

III. Authority

This notice was prepared under the direction of Thomas M. Stohler, Acting Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210, pursuant to Sections 6(b)(1) and 7(b) of the OSH Act (29 U.S.C. 655, 656), 29 CFR part 1912, and FACA (5 U.S.C., App. 2).

Signed at Washington, DC, this 12 day of December, 2008.

Thomas M. Stohler,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. E8–30065 Filed 12–17–08; 8:45 am]

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Meetings; Sunshine Act

December 10, 2008.

TIME AND DATE: 10 a.m., Thursday, January 8, 2009.

PLACE: The Richard V. Backley Hearing Room, 9th Floor, 601 New Jersey Avenue, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following in open session: *Secretary of Labor* v. *Nelson Quarries, Inc.*, Docket Nos. CENT 2006–151–M, CENT 2006–203–M, and CENT 2006–201–M. (Issues include whether the Administrative Law Judge properly concluded that certain individuals were agents of the operator and therefore their negligence was imputable to the operator for unwarrantable failure and penalty assessment purposes, that the operator's violation of 30 CFR 56.6130(a) was significant and substantial, and that the operator violated 30 CFR 56.6300(b).)

Any person attending this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR 2706.150(a)(3) and 2706.160(d).

CONTACT PERSON FOR MORE INFO: Jean Ellen, (202) 434–9950/(202) 708–9300 for TDD Relay/1–800–877–8339 for toll free.

Jean H. Ellen,

Chief Dockets Clerk.

BILLING CODE 6735–01–P

NATIONAL CREDIT UNION ADMINISTRATION

Community Development Revolving Loan Fund for Credit Unions

AGENCY: National Credit Union Administration.

ACTION: Notice of application period.

SUMMARY: The National Credit Union Administration (NCUA) will accept applications for participation in the Community Development Revolving Loan Fund's [Fund] Loan Program in the last quarter of 2009, subject to availability of funds. The Fund's total appropriation is $13.4 million. Because the CDRLF will be fully loaned in early 2009, new loans will be awarded from loan repayments made throughout the year in 2009. Based on the CDRLF's aggregate loan amortization schedule, approximately $3.1 million will be repaid and available for loans in late 2009. Therefore, the loan application period will open in the last quarter of 2009. Application procedures for the 2009 Fund Loan Program will be posted to the NCUA Web site.

ADDRESSES: Applications for participation may be obtained from and should be submitted to: NCUA, Office of Small Credit Union Initiatives, 1775 Duke Street, Alexandria, VA 22314–3428.

DATES: Applications can be submitted starting on October 1, 2009, and closing on November 30, 2009.

FOR FURTHER INFORMATION CONTACT: Tawana James, Director, Office of Small Credit Union Initiatives at the above address or telephone (703) 518–6610.

SUPPLEMENTARY INFORMATION: Part 705 of the NCUA Rules and Regulations implements the Community Development Revolving Loan Fund (Fund) for Credit Unions. The purpose of the Fund is to assist officially designated ''low-income'' credit unions in providing basic financial services to residents in their communities that result in increased income, home ownership, and employment. The Fund makes available low interest loans in the aggregate amount of $300,000 to qualified participating ''low-income'' designated credit unions. Interest rates are currently set at one percent, subject

to change depending on market interest rates.

Specific details regarding availability and requirements for technical assistance grants from the Fund will be published in a Letter to Credit Unions and on NCUA's website at *http://www.ncua.gov/*. Fund participation is limited to existing credit unions with an official ''low-income'' designation.

This notice is published pursuant to Section 705.9 of the NCUA Rules and Regulations that states NCUA will provide notice in the **Federal Register** when funds in the program are available.

By the National Credit Union Administration Board on December 11, 2008.

Mary F. Rupp,

Secretary, NCUA Board.

[FR Doc. E8–30031 Filed 12–17–08; 8:45 am]

BILLING CODE 7535–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts; *Arts Advisory Panel*

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that six meetings of the Arts Advisory Panel to the National Council on the Arts will be held at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC, 20506 as follows (ending times are approximate):

State & Regional (Regional Arts Organization Partnership Agreements: Mid America Arts Alliance, New England Foundation for the Arts): January 14, 2009 by teleconference. This meeting, from 3 p.m. to 4:30 p.m., will be open.

State & Regional (Regional Arts Organization Partnership Agreements: Mid-Atlantic Arts Foundation, Southern Arts Federation): January 22, 2009 by teleconference. This meeting, from 3 p.m. to 4:30 p.m., will be open.

State & Regional (National Services): January 21, 2009 by teleconference. This meeting, from 3 p.m. to 4 p.m., will be open.

State & Regional (State Partnership Agreements): January 28–29, 2009 in Room 716. This meeting, from 9:30 a.m. to 6 p.m. on January 28th, and from 9:30 a.m. to 4 p.m. on January 29th, will be open.

State & Regional (State Partnership Agreements/Folk Infrastructure): January 30, 2009 in Room 716. This meeting, from 9 a.m. to 6:30 p.m. will be open.

Media Arts (application review): January 29–30, 2009 in Room 730. This meeting, from 9 a.m. to 6 p.m. on January 29th, and from 9 a.m. to 4:30 p.m. on January 30th, will be closed.

The closed portions of meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chairman of February 28, 2008, these sessions will be closed to the public pursuant to subsection (c)(6) of section 552b of Title 5, United States Code.

Any person may observe meetings, or portions thereof, of advisory panels that are open to the public, and if time allows, may be permitted to participate in the panel's discussions at the discretion of the panel chairman. If you need special accommodations due to a disability, please contact the Office of AccessAbility, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202–682–5532, TDY–TDD 202–682–5496, at least seven (7) days prior to the meeting.

Further information with reference to these meetings can be obtained from Ms. Kathy Plowitz-Worden, Office of Guidelines & Panel Operations, National Endowment for the Arts, Washington, DC, 20506, or call 202–682–5691.

Dated: December 12, 2008.

Kathy Plowitz-Worden,

Panel Coordinator, Panel Operations, National Endowment for the Arts.

[FR Doc. E8–29928 Filed 12–17–08; 8:45 am]

BILLING CODE 7537–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–034 and 52–035]

Luminant Generation Company LLC; Comanche Peak Nuclear Power Plant Units 3 and 4 Combined License Application; Notice of Intent To Prepare an Environmental Impact Statement and Conduct Scoping Process

Luminant Generation Company LLC (Luminant) has submitted an application for two combined licenses (COLs) to build Units 3 and 4 at its Comanche Peak Nuclear Power Plant (CPNPP) site, located on approximately 7,950 acres in Somervell and Hood Counties, Texas. CPNPP is located on Squaw Creek Reservoir, approximately 5.2 miles (mi) north of Glen Rose, Texas. Luminant submitted the application for the COL to the U.S. Nuclear Regulatory Commission (NRC) by letter dated September 19, 2008, pursuant to Title 10 of the Code of Federal Regulations (10 CFR) Part 52. A notice of receipt and availability of the application for the COLs, including the Environmental Report (ER), was published in the **Federal Register** on November 7, 2008 (73 FR 66276). A notice of acceptance for docketing of the application for the COLs was published in the **Federal Register** on December 10, 2008 (73 FR 75141). A notice of hearing and opportunity to petition for leave to intervene in the proceeding will be published at a later date. The purposes of this notice are (1) to inform the public that the NRC staff will be preparing an Environmental Impact Statement (EIS) as part of the review of the application for the COLs; and (2) to provide the public with an opportunity to participate in the environmental scoping process as defined in 10 CFR 51.29.

In addition, as outlined in 36 CFR 800.8(c), ''Coordination with the National Environmental Policy Act,'' the NRC staff plans to coordinate compliance with Section 106 of the National Historic Preservation Act (NHPA) with steps taken to meet the requirements of the National Environmental Policy Act of 1969, as amended (NEPA). Pursuant to 36 CFR 800.8(c), the NRC staff intends to use the process and documentation for the preparation of the EIS on the proposed action to comply with Section 106 of the NHPA in lieu of the procedures set forth in 36 CFR 800.3 through 800.6.

In accordance with 10 CFR 51.45 and 51.50, Luminant submitted the ER as part of the application. The ER was prepared pursuant to 10 CFR Parts 51 and 52 and is available for public inspection at the NRC Public Document Room (PDR) located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland 20852, or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible at *http://www.nrc.gov/reading-rm/adams.html*, which provides access through the NRC's Electronic Reading Room link. The accession number in ADAMS for the environmental report included in the application is ML083240374. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC's PDR Reference staff at 1–800–397–4209/301–415–4737 or by e-mail to *pdr@nrc.gov*. The application may also

be viewed on the Internet at *http://www.nrc.gov/reactors/new-reactors/col/comanche-peak.html*. In addition, the Somervell County Library located at 108 Allen Drive, Glen Rose, Texas 76043, and the Hood County Library located at 222 North Travis Street, Granbury, Texas 76048, have agreed to maintain a copy of the ER and make it available for public inspection.

The following key reference documents related to the application and the NRC staff's review processes are available through the NRC's Web site at *http://www.nrc.gov*:

a. 10 CFR Part 51, Environmental Protection Regulations for Domestic Licensing and Related Regulatory Function;

b. 10 CFR Part 52, Licenses, Certifications, and Approvals for Nuclear Power Plants;

c. 10 CFR Part 100, Reactor Site Criteria;

d. NUREG–1555, Standard Review Plans for Environmental Reviews for Nuclear Power;

e. NUREG/BR–0298, Brochure on Nuclear Power Plant Licensing Process;

f. Regulatory Guide 4.2, Preparation of Environmental Reports for Nuclear Power Stations;

g. Regulatory Guide 4.7, General Site Suitability Criteria for Nuclear Power Stations;

h. Fact Sheet on Nuclear Power Plant Licensing Process;

i. Regulatory Guide 1.206, Combined License Applications for Nuclear Power Plants; and

j. Nuclear Regulatory Commission Policy Statement on the Treatment of Environmental Justice Matters in NRC Regulatory and Licensing Actions.

The regulations, NUREG-series documents, regulatory guides, and the fact sheet can be found under Document Collections in the Electronic Reading Room on the NRC Web page. The environmental justice policy statement can be found in the **Federal Register**, 69 FR 52040, August 24, 2004.

This notice advises the public that the NRC intends to gather the information necessary to prepare an EIS as part of the review of the application for the COLs at the CPNPP site. Possible alternatives to the proposed action (issuance of the COLs for the CPNPP Units 3 and 4) include no action, reasonable alternative energy sources, and alternate sites. As set forth in 10 CFR 51.20(b)(2), issuance of a COL under 10 CFR Part 52 is an action that requires an EIS. This notice is being published in accordance with NEPA and the NRC's regulations in 10 CFR Part 51.

The NRC will first conduct a scoping process for the EIS and, as soon as practicable thereafter, will prepare a draft EIS for public comment. Participation in this scoping process by members of the public and local, State, Tribal, and Federal government agencies is encouraged. The scoping process for the draft EIS will be used to accomplish the following:

a. Define the proposed action that is to be the subject of the EIS;

b. Determine the scope of the EIS and identify the significant issues to be analyzed in depth;

c. Identify and eliminate from detailed study those issues that are peripheral or that are not significant;

d. Identify any environmental assessments and other EISs that are being or will be prepared that are related to but are not part of the scope of the EIS being considered;

e. Identify other environmental review and consultation requirements related to the proposed action;

f. Identify parties consulting with the NRC under the NHPA, as set forth in 36 CFR 800.8(c)(1)(i);

g. Indicate the relationship between the timing of the preparation of the environmental analyses and the Commission's tentative planning and decision-making schedule;

h. Identify any cooperating agencies and, as appropriate, allocate assignments for preparation and schedules for completing the EIS to the NRC and any cooperating agencies; and

i. Describe how the EIS will be prepared, including any contractor assistance to be used.

The NRC invites the following entities to participate in the scoping process:

a. The applicant, Luminant Generation Company LLC;

b. Any Federal agency that has jurisdiction by law or special expertise with respect to any environmental impact involved or that is authorized to develop and enforce relevant environmental standards;

c. Affected State and local government agencies, including those authorized to develop and enforce relevant environmental standards;

d. Any affected Indian tribe;

e. Any person who requests or has requested an opportunity to participate in the scoping process; and

f. Any person who intends to petition for leave to intervene.

In accordance with 10 CFR 51.26, the scoping process for an EIS may include a public scoping meeting to help identify significant issues related to a proposed activity and to determine the scope of issues to be addressed in an EIS. The NRC will hold two identical public scoping meetings for the EIS regarding the Luminant COL application. The scoping meetings will be held at the Glen Rose Expo Center, 202 Bo Gibbs Blvd., Glen Rose, Texas 76043, on Tuesday, January 6, 2009. The first meeting will convene at 1 p.m. and will continue until approximately 4 p.m. The second meeting will convene at 7 p.m., with a repetition of the overview portions of the first meeting, and will continue until approximately 10 p.m. The meetings will be transcribed and will include the following: (1) An overview by the NRC staff of the NEPA environmental review process, the proposed scope of the EIS, and the proposed review schedule; and (2) the opportunity for interested government agencies, organizations, and individuals to submit comments or suggestions on the environmental issues or the proposed scope of the EIS. Additionally, the NRC staff will host informal discussions for one hour prior to the start of each public meeting. No formal comments on the proposed scope of the EIS will be accepted during the informal discussions. To be considered, comments must be provided either at the transcribed public meeting or in writing, as discussed below.

Persons may register to attend or present oral comments at the meeting on the scope of the NEPA review by contacting Mr. Michael Willingham or Mr. John Fringer by telephone at 1–800–368–5642, extension 3924 or 6208. In addition, persons can register via e-mail to the NRC at *Comanche.COLEIS@nrc.gov* no later than December 30, 2008.

Members of the public may also register to speak at the meeting prior to of the start of the session. Individual oral comments may be limited by the time available, depending on the number of persons who register. Members of the public who have not registered may also have an opportunity to speak, if time permits. Public comments will be considered in the scoping process for the EIS. If special equipment or accommodations are needed to attend or present information at the public meeting, the need should be brought to Mr. Willingham's attention no later than December 23, 2008, so that the NRC staff can determine whether the request can be accommodated.

Members of the public may send written comments on the scope of the CPNPP COL environmental review to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, Mailstop TWB–05–B01M, U.S. Nuclear Regulatory Commission, Washington,

DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. To be considered in the scoping process, written comments must be postmarked or delivered by February 17, 2009. Electronic comments may be sent by e-mail to the NRC at *Comanche.COLEIS@nrc.gov*. Electronic submissions must be sent no later than February 17, 2009, to be considered in the scoping process. Comments will be made available electronically and will be accessible through the NRC's Electronic Reading Room link *http://www.nrc.gov/reading-rm/adams.html*.

Participation in the scoping process for the EIS does not entitle participants to become parties to the proceeding to which the EIS relates. A notice of a hearing and opportunity to request leave to petition to intervene in the proceeding on the application for the COL, will be published in a future **Federal Register** notice.

At the conclusion of the scoping process, the NRC staff will prepare a concise summary of the determination and conclusions reached on the scope of the environmental review. The summary will include the significant issues identified. The NRC staff will send this summary to each participant in the scoping process for whom the staff has an address. The staff will then prepare and issue for comment the draft EIS, which will be the subject of a separate **Federal Register** notice and a separate public meeting. Copies of the draft EIS will be available for public inspection at the PDR through the above-mentioned address and one copy per request will be provided free of charge. After receipt and consideration of comments on the draft EIS, the NRC will prepare a final EIS, which will also be available to the public.

Information about the proposed action, the EIS, and the scoping process may be obtained from Mr. Michael Willingham at 301–415–3924, by e-mail at *michael.willingham@nrc.gov*, or by mail to the U.S. Nuclear Regulatory Commission, Mail Stop T6–E38M, Washington, DC 20555–0001 and from Mr. John Fringer at 301–415–6208 or by e-mail at *john.fringer@nrc.gov*.

Dated at Rockville, Maryland, this 12th day of December, 2008.

For the Nuclear Regulatory Commission.

Scott Flanders,

Director, Division of Site and Environmental Reviews, Office of New Reactors.

[FR Doc. E8–30052 Filed 12–17–08; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No 52–037]

Union Electric Company d/b/a Amerenue; Acceptance for Docketing of an Application for Combined License for Callaway Plant Unit 2 Nuclear Power Plant

By letter dated July 28, 2008, as supplemented by letters dated September 24, 2008, November 14, 2008, and November 25, 2008, Union Electric Company d/b/a AmerenUE (AmerenUE), submitted an application to the U.S. Nuclear Regulatory Commission (NRC) for a combined license (COL) for a single unit of the U.S. Evolutionary Power Reactor (U.S. EPR) in accordance with the requirements contained in 10 CFR Part 52, ''Licenses, Certifications and Approvals for Nuclear Power Plants.'' This reactor will be identified as Callaway Plant Unit 2 and is to be located at the current Callaway County, Missouri site of the Callaway Power Plant. A notice of receipt and availability of this application was previously published in the **Federal Register** (73 FR 59677) on October 9, 2008, as corrected in **Federal Register** (73 FR 61444 on October 16, 2008).

The NRC staff has determined that AmerenUE has submitted information in accordance with 10 CFR Part 2, ''Rules of Practice for Domestic Licensing Proceedings and Issuance of Orders,'' and 10 CFR Part 52 that is acceptable for docketing. The Docket Number established for Unit 2 is 52–037.

The NRC staff will perform a detailed technical review of the application. Docketing of the application does not preclude the NRC from requesting additional information from the applicant as the review proceeds, nor does it predict whether the Commission will grant or deny the application. The Commission will conduct a hearing in accordance with Subpart L, ''Informal Hearing Procedures for NRC Adjudications,'' of 10 CFR Part 2 and will receive a report on the COL application from the Advisory Committee on Reactor Safeguards in accordance with 10 CFR 52.87, ''Referral to the Advisory Committee on Reactor Safeguards (ACRS).'' If the Commission finds that the COL application meets the applicable standards of the Atomic Energy Act and the Commission's regulations, and that required notifications to other agencies and bodies have been made, the Commission will issue a COL, in the form and containing conditions and limitations that the Commission finds appropriate and necessary.

In accordance with 10 CFR Part 51, the Commission will also prepare an environmental impact statement for the proposed action. Pursuant to 10 CFR 51.26, and as part of the environmental scoping process, the staff intends to hold a public scoping meeting. Detailed information regarding this meeting will be included in a future **Federal Register** notice.

Finally, the Commission will announce in a future **Federal Register** notice the opportunity to petition for leave to intervene in the hearing required for this application by 10 CFR 52.85.

Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland, and will be accessible electronically through the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room link at the NRC Web site *http://www.nrc.gov/reading-rm/adams.html.* The application is also available at *http://www.nrc.gov/reactors/new-reactors/col.html.* Persons who do not have access to ADAMS or who encounter problems in accessing documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1–800–397–4209, 301–415–4737, or by e-mail to *pdr@nrc.gov.*

Dated at Rockville, Maryland this 12th day of December 2008.

For the Nuclear Regulatory Commission.

Joseph Colaccino,

Chief, U.S. EPR Projects Branch, Division of New Reactor Licensing, Office of New Reactors.

[FR Doc. E8–30058 Filed 12–17–08; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030–29462]

Notice of Availability of Environmental Assessment and Finding of no Significant Impact for License Amendment to Materials License No. 45–23645–01na, to Incorporate the Decommissioning Plan for the Naval Surface Warfare Center at Dahlgren, Virginia

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Environmental Assessment and Finding of No

Significant Impact for License Amendment.

FOR FURTHER INFORMATION CONTACT: Orysia Masnyk Bailey, Health Physicist, Decommissioning Branch, Division of Nuclear Materials Safety, Region I, 475 Allendale Road, King of Prussia, Pennsylvania, 19406; telephone (864) 427–1032; fax number (610) 680–3497; or by e-mail: *orysia.masnykbailey@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Materials License No. 45–23645–01NA. The license is held by the Department of the Navy (Navy). This is a Master Materials License and covers many sites around the country. The proposed action pertains to Building 200 and adjacent grounds (the Facility) at the Navy's Naval Surface Warfare Center Dahlgren Division in Dahlgren, Virginia. Issuance of the amendment would incorporate the Decommissioning Plan into the license to allow completion of decommissioning activities at the site and eventual unrestricted release of the Facility. The NRC has evaluated and approved the Navy's Decommissioning Plan. The findings of this evaluation are documented in a Safety Evaluation Report which will be issued along with the license amendment. The Navy requested this action in a letter dated March 4, 2008. The NRC has prepared an Environmental Assessment in support of this proposed action in accordance with the requirements of Title 10, Code of Federal Regulations (CFR), Part 51 (10 CFR Part 51). Based on the Environmental Assessment, the NRC has concluded that a Finding of No Significant Impact is appropriate with respect to the proposed action. The license amendment will be issued to the Navy following the publication of this Finding of No Significant Impact and Environmental Assessment in the **Federal Register**.

II. Environmental Assessment

Identification of Proposed Action

The proposed action would approve the Navy's March 4, 2008, license amendment request to incorporate the Decommissioning Plan into the license, resulting in final decommissioning of the Facility and subsequent release of the Facility for unrestricted use. Test firing of depleted uranium rounds at the facility began in the early 1970s under NRC Materials License No. SMB–1145. The Navy issued Navy Radioactive Materials Permit No. 45–00178–S1NP authorizing the test firing of depleted uranium rounds at the Facility in 1987 when the Master Materials License was issued to the Navy. The Navy initiated decommissioning of the facility in 1993 and work is ongoing. In January 2002, the permit was converted to decommissioning permit, NRMP No. 45–00178–Y1NP. The Decommissioning Plan submitted by the Navy addresses the residual contamination in Bay 4 in Building 200 and adjacent soil outside of the building.

The facility is the largest tenant at the Naval Support Facility Dahlgren, which is located in King George County, Virginia, approximately 40 miles south of Washington, DC, and 25 miles east of Fredericksburg, Virginia. The Naval Support Facility Dahlgren encompasses approximately 4,300 acres on the western bank of the Potomac River. The region surrounding Naval Support Facility Dahlgren is sparsely populated.

Bay 4 in Building 200 consists of the target bay and gun bay. The target bay is 14.5 feet wide, 9 feet high, and 106 feet in length; and the gun bay is 14.5 feet wide, 9 feet high, and 138 feet in length. Building 200, Bay 4 is an indoor firing range where single shot tests on 20–40 millimeter depleted uranium and tungsten energy penetrators were fired. It is estimated that between 2,000 and 3,000 depleted uranium rounds were fired in Bay 4.

Need for the Proposed Action

The proposed action is to approve the Decommissioning Plan that the Navy may complete Facility decommissioning activities. Completion of the decommissioning activities will reduce residual radioactivity at the facility. The NRC's regulations require licensees to begin timely decommissioning of their sites, or any separate buildings that contain residual radioactivity, upon cessation of licensed activities, in accordance with 10 CFR 30.36(d). The proposed licensing action will support such a goal. The NRC is fulfilling its responsibilities under the Atomic Energy Act to make a decision on a proposed license amendment for decommissioning that ensures protection of the public health and safety.

Environmental Impacts of the Proposed Action

The historical review of licensed activities conducted at the facility shows that such activities involved the test firing of depleted uranium rounds and the storage of contaminated targets and debris.

The NRC staff has reviewed the Navy's amendment request for the Facility and examined the impacts of this license amendment request. Potential impacts include water resource impacts (e.g., water may be used for dust control), air quality impacts from dust emissions, temporary local traffic impacts resulting from transporting debris, human health impacts, noise impacts from equipment operations, scenic quality impacts, and waste management impacts.

Based on its review, the staff has determined that no surface or ground water impacts are expected from the decommissioning activities. Additionally, the staff has determined that significant air quality, noise, land use, and off-site radiation exposure impacts are also not expected. No significant air quality impacts are anticipated because of the contamination controls that will be implemented by the Navy during decommissioning activities. The environmental impacts associated with the decommissioning activities are bounded by impacts evaluated by NUREG–1496, ''Generic Environmental Impact Statement in Support Rulemaking on Radiological Criteria for License Termination of NRC Licensed Nuclear Facilities.'' Generic impacts for this type of decommissioning process were previously evaluated and described in the ''Generic Environmental Impact Statement in Support Rulemaking on Radiological Criteria for License Termination of NRC Licensed Nuclear Facilities,'' which concludes that the environmental consequences are small. The risk to human health from the transportation of all radioactive material in the United States was evaluated in NUREG–0170, ''Final Environmental Statement on the Transportation of Radioactive Materials by Air and Other Modes.'' The principal radiological environmental impact during normal transportation is direct radiation exposure to nearby persons from radioactive material in the package. The average annual individual dose from all radioactive material transportation in the United States was calculated to be approximately 0.5 mrem, which is well below the 10 CFR 20.1301 limit of 100 mrem for a member of the public. Additionally, the Navy estimates that approximately 78 cubic yards of solid radioactive waste will be generated during decommissioning activities. This proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of effluents that may be released off site, and there

is no significant increase in occupational or public radiation exposure. Thus, waste management and transportation impacts from the decommissioning will not be significant.

Occupational health was also considered in NUREG–0170, ''Final Environmental Impact Statement of the Transportation of Radioactive Material by Air and Other Modes.'' Shipment of these materials would not affect the assessment of environmental impacts or the conclusions in NUREG–0170.

The staff also finds that the proposed license amendment will meet the radiological criteria for unrestricted release as specified in 10 CFR 20.1402. The Navy demonstrated this through the development of building surface derived concentration guideline limits for its Facility. The Navy conducted site specific dose modeling using parameters specific to the Facility that adequately bounded the potential dose. The release limits for soil at the Facility will be those published in the **Federal Register** on December 7, 1999 (Volume 64, Number 234, Pages 68395–68396).

The Navy will maintain an appropriate level of radiation protection staff, procedures, and capabilities; and will implement an acceptable program to keep exposure to radioactive materials as low as reasonably achievable (ALARA). Work activities are not anticipated to result in radiation exposures to the public in excess of 10 percent of the 10 CFR 20.1301 limits.

The NRC also evaluated whether cumulative environmental impacts could result from an incremental impact of the proposed action when added to other past, present, or reasonably foreseeable future actions in the area. The proposed NRC approval of the license amendment request, when combined with known effects on resource areas at the site, including further site remediation, are not anticipated to result in any cumulative impacts at the site.

Environmental Impacts of the Alternatives to the Proposed Action

Due to the largely administrative nature of the proposed action, its environmental impacts are small. Therefore, the only alternative the staff considered is the no-action alternative, under which the staff would leave things as they are by simply denying the amendment request. This no-action alternative is not feasible because it conflicts with 10 CFR 30.36(d), requiring that decommissioning of byproduct material facilities be completed and approved by the NRC after licensed activities cease. The no action alternative would keep radioactive material on-site without disposal. Additionally, denying the amendment request would result in no change in current environmental impacts. The environmental impacts of the proposed action and the no-action alternative are therefore similar, and the no-action alternative is accordingly not further considered.

Conclusion

The NRC staff has concluded that the proposed action is consistent with the NRC's unrestricted release criteria specified in 10 CFR 20.1402. Because the proposed action will not significantly impact the quality of the human environment, the NRC staff concludes that the proposed action is the preferred alternative.

Agencies and Persons Consulted

NRC provided a draft of this Environmental Assessment to the Virginia Bureau of Radiological Health for review on August 1, 2008. On October 30, 2008, the Virginia Bureau of Radiological Health responded by email. The Commonwealth agreed with the conclusions of the Environmental Assessment, and otherwise had no comments.

The NRC staff has determined that the proposed action is of a procedural nature, and will not affect listed species or critical habitat. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. The NRC staff has also determined that the proposed action is not the type of activity that has the potential to cause effects on historic properties. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

III. Finding of No Significant Impact

The NRC staff has prepared this Environmental Assessment in support of the proposed action. On the basis of this Environmental Assessment, the NRC finds that there are no significant environmental impacts from the proposed action, and that preparation of an environmental impact statement is not warranted. Accordingly, the NRC has determined that a Finding of No Significant Impact is appropriate.

IV. Further Information

Documents related to this action, including the application for license amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at *http://www.nrc.gov/reading-rm/adams.html*. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of the NRC's public documents. The documents related to this action are listed below, along with their ADAMS accession numbers.

BILLING CODE 7590–01–P

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board Meeting

Board meeting: January 28, 2009-Las Vegas, Nevada; The U.S. Nuclear Waste Technical Review Board will meet to discuss repository tunnel stability and ''burnup'' credit related to Department of Energy plans for a proposed repository for spent nuclear fuel and high level radioactive waste at Yucca Mountain in Nevada.

Pursuant to its authority under section 5051 of Public Law 100–203, Nuclear Waste Policy Amendments Act of 1987, the U.S. Nuclear Waste Technical Review Board will meet in Las Vegas, Nevada, on Wednesday, January 28, 2009. The focus of the meeting is expected to be repository tunnel stability and issues related to burnup credit. Burnup is the amount of energy produced in a nuclear reactor per unit weight of nuclear fuel. The Board will review U.S. Department of Energy (DOE) activities related to these and other issues as part of the Board's ongoing technical evaluation of DOE's proposed plans for disposing of spent nuclear fuel and high-level radioactive waste (HLW) in a permanent repository at Yucca Mountain in Nevada.

The Board was charged in the Nuclear Waste Policy Amendments Act of 1987 with conducting an independent review of the technical and scientific validity of DOE activities related to the implementation of the Nuclear Waste Policy Act, including transporting, packaging, and disposing of spent nuclear fuel and HLW.

The Board meeting will be held at the Marriott Suites Convention Center; 325 Convention Center Drive; Las Vegas, Nevada 89109; (tel) 702–650–2000, (fax) 702–6509466.

A detailed meeting agenda will be available on the Board's Web site, *http://www.nwtrb.gov*, approximately one week before the date of the meeting. The agenda also may be obtained by telephone request at that time. The meeting will be open to the public, and opportunities for public comment will be provided.

Board Chairman B. John Garrick will call the meeting to order at 8 a.m. Dr. Garrick's remarks will be followed by a DOE program overview and science update. The balance of the morning agenda will be devoted to discussions of drift stability, thermal conductivity of drift collapse material, and the effects of the presence of drift collapse material on waste package temperatures. After lunch, issues related to the allowance of burnup credit will be discussed, and an update of the Welding-Closure Cell work will be presented.

Time will be set aside at the end of the day for public comments. Those wanting to speak are encouraged to sign the ''Public Comment Register'' at the check-in table. A time limit may have to be set on individual remarks, but written comments of any length may be submitted for the record.

Transcripts of the meeting will be available on the Board's Web site, by e-mail, on computer disk, and on a library-loan basis in paper format from Davonya Barnes of the Board's staff no later than February 16, 2009.

A block of rooms has been reserved for meeting attendees at the Marriott Suites. When making a reservation, please state that you will be attending the Nuclear Waste Technical Review Board meeting, Group Code: NWT. Reservations should be made by Monday, January 5, 2009, to ensure receiving the meeting rate. To make reservations, call 1–800–228–9290.

For more information, contact Karyn Severson, NWTRB External Affairs; 2300 Clarendon Boulevard, Suite 1300; Arlington, VA 22201–3367; (tel) 703–235–4473; (fax) 703–235–4495.

Dated: December 12, 2008.

William D. Barnard,

Executive Director, Nuclear Waste Technical Review Board.

[FR Doc. E8–29909 Filed 12–17–08; 8:45 am]

BILLING CODE 6820–AM–M

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension: Rule 15c2–1, SEC File No. 270–418, OMB Control No. 3235–0485.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget requests for approval of extension on the following rule: Rule 15c2–1.

Rule 15c2–1 (17 CFR 240.15c2–1) prohibits the commingling under the same lien of securities of margin customers (a) with other customers without their written consent and (b) with the broker or dealer. The rule also prohibits the rehypothecation of customers' margin securities for a sum in excess of the customer's aggregate indebtedness. *See* Securities Exchange Act Release No. 2690 (November 15, 1940); Securities Exchange Act Release No. 9428 (December 29, 1971). Pursuant to Rule 15c2–1, respondents must collect information necessary to prevent the rehypothecation of customer securities in contravention of the rule, issue and retain copies of notices of hypothecation of customer securities in accordance with the rule, and collect written consents from customers in accordance with the rule. The information is necessary to ensure compliance with the rule and to advise customers of the rule's protections.

There are approximately 126 respondents (*i.e.*, broker-dealers that carry or clear customer accounts that also have bank loans) that require an aggregate total of 2835 hours to comply with the rule. Each of these approximately 126 registered broker-dealers makes an estimated 45 annual responses. Each response takes approximately 0.5 hours to complete. Thus, the total compliance burden per year is 2835 burden hours.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Comments regarding the estimated burden hours should be directed to: (i) The Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or by sending an e-mail to *nfraser@omb.eop.gov*; and (ii) Lewis W. Walker, Acting Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, c/o Shirley Martinson, 6432 General Green Way, Alexandria, Virginia 22312; or send an e-mail to: *PRA_Mailbox@sec.gov*. Comments must be submitted within 30 days of this notice.

Dated: December 10, 2008.

Florence E. Harmon,

Acting Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Investor

Education and Advocacy, Washington, DC 20549–0213.

Extension: Form 20–F; OMB Control No. 3235–0288; SEC File No. 270–156.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Form 20–F (17 CFR 249.220f) is used by foreign private issuers to either register a class of securities under the Securities Exchange Act of 1934 pursuant to section 12(b) or 12(g) (15 U.S.C. 78*l*(b) or 78*l*(g)) or to satisfy their annual report obligation pursuant to section 13 or 15(d) of the Exchange Act (15 U.S.C. 78m and 78o(d)). The information collected is intended to enable investors in foreign private issuers to make informed investment decisions. Form 20–F takes approximately 2,611 hours per response to prepare and is filed by 942 foreign private issuers annually. We estimate that 25% of the 2,611 hours per response (652.75 hours) is prepared by the issuer for an annual reporting burden of 614,891 hours (652.75 hours per response × 942 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Written comments regarding the above information should be directed to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or send an e-mail to *nfraser@omb.eop.gov*; and (ii) Lewis W. Walker, Acting Director/CIO, Securities and Exchange Commission, C/O Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312; or send an e-mail to: *PRA_Mailbox@sec.gov*. Comments must be submitted to OMB within 30 days of this notice.

December 11, 2008.

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension: Form N–54A, SEC File No. 270–182, OMB Control No. 3235–0237.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

• Form N–54A (17 CFR 274.53) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) (the ''Act''); Notification of Election to be Subject to Sections 55 through 65 of the Investment Company Act of 1940 (15 U.S.C. 80a–54 through 64) Filed Pursuant to Section 54(a) of the Act (15 U.S.C. 80a–53(a)).

Form N–54A is the notification to the Commission of election to be regulated as a business development company. A company making such an election only has to file a Form N–54A once.

It is estimated that approximately 6 respondents per year file with the Commission a Form N–54A. Form N–54A requires approximately 0.5 burden hours per response resulting from creating and filing the information required by the Form. The total burden hours for Form N–54A would be 3.0 hours per year in the aggregate. The estimated annual burden of 3.0 hours represents a decrease of 20.0 hours over the prior estimate of 23.0 hours. The decrease in burden hours is attributable to a decrease in the number of respondents from 46 to 6.

The estimate of average burden hours for Form N–54A is made solely for the purposes of the PRA and is not derived from a comprehensive or even representative survey or study of the cost of Commission rules and forms.

The collection of information under Form N–54A is mandatory. The information provided by the Form is not kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct general comments regarding the above information to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or e-mail to: *nfraser@omb.eop.gov*; and (ii) Lewis W. Walker, Acting Director/CIO, Securities and Exchange Commission, c/o Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312; or send an e-mail to: *PRA_Mailbox@sec.gov*. Comments must be submitted to OMB within 30 days of this notice.

Dated: December 10, 2008.

Florence E. Harmon,

Acting Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon written request, copies available from: U.S. Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension: Regulation AC, OMB Control No. 3235–0575, SEC File No. 270–517.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

• Regulation Analyst Certification (AC) (17 CFR 242.500–505).

Regulation AC requires that research reports published, circulated, or provided by a broker or dealer or covered person contain a statement attesting that the views expressed in each research report accurately reflect the analyst's personal views and whether or not the research analyst received or will receive any compensation in connection with the views or recommendations expressed in the research report. Regulation AC also requires broker-dealers to, on a quarterly basis, make, keep, and maintain records of research analyst statements regarding whether the views expressed in public appearances accurately reflected the analyst's personal views, and whether any part of the analyst's compensation is related to the specific recommendations or views expressed in the public appearance. Regulation AC also requires that research prepared by

foreign persons be presented to U.S. persons pursuant to Securities Exchange Act Rule 15a–6 and that broker-dealers notify associated persons if they would be covered by the regulation. Regulation AC excludes the news media from its coverage.

The Commission estimates that Regulation AC imposes an aggregate annual time burden of approximately 28,538 hours on 5,186 respondents, or approximately 5.5 hours per respondent. The Commission estimates that the total annual internal cost of the 28,538 hours is approximately $10,525,642.00, or approximately $2,030.00 per respondent, annually.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Comments should be directed to: Lewis W. Walker, Acting Director/Chief Information Officer, Securities and Exchange Commission, c/o Shirley Martinson, 6432 General Green Way, Alexandria, Virginia 22312 or send an e-mail to: *PRA_Mailbox@sec.gov*. Comments must be submitted within 60 days of this notice.

Dated: December 10, 2008.

Florence E. Harmon,

Acting Secretary.

[FR Doc. E8–29970 Filed 12–17–08; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: U.S. Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension: Rule 12a–5, OMB Control No. 3235–79, SEC File No. 270–85.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the existing collection of information provided for in: Rule 12a–5 (17 CFR 240.12a–5) and Form 26 (17 CFR 249.26) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act'').

Section 12(a) of the Exchange Act generally makes it unlawful for any security to be traded on a national securities exchange unless such security is registered on the exchange in accordance with the provisions of the Exchange Act and the rules and regulations thereunder.

Rule 12a–5 (the ''Rule'') under the Exchange Act and Form 26 (the ''Form'') were adopted by the Commission in 1936 and 1955, respectively, pursuant to Sections 3(a)(12), 10(b), and 23(a) of the Exchange Act. Subject to certain conditions, Rule 12a–5 affords a temporary exemption (generally for up to 120 days) from the registration requirements of Section 12(a) of the Exchange Act for a new security when the holders of a security admitted to trading on a national securities exchange obtain the right (by operation of law or otherwise) to acquire all or any part of a class of another or substitute security of the same or another issuer, or an additional amount of the original security. The purpose of the exemption is to avoid an interruption of exchange trading to afford time for the issuer of the new security to list and register it, or for the exchange to apply for unlisted trading privileges.

Under paragraph (d) of Rule 12a–5, after an exchange has taken action to admit any security to trading pursuant to the provisions of the Rule, the exchange is required to file with the Commission a notification on Form 26. Form 26 provides the Commission with certain information regarding a security admitted to trading on an exchange pursuant to Rule 12a–5, including: (1) The name of the exchange, (2) the name of the issuer, (3) a description of the security, (4) the date(s) on which the security was or will be admitted to when-issued and/or regular trading, and (5) a brief description of the transaction pursuant to which the security was or will be issued.

The Commission generally oversees the national securities exchanges. This mission requires that, under Section 12(a) of the Exchange Act specifically, the Commission receive notification of any securities that are permitted to trade on an exchange pursuant to the temporary exemption under Rule 12a–5. Without the Rule and the Form, the Commission would be unable fully to implement these statutory responsibilities.

There are currently eleven national securities exchanges subject to Rule 12a–5. The Commission staff estimates that there could be one Form 26 filed every five years. The reporting burdens are not typically spread evenly among the exchanges. For purposes of this analysis of burden, however, the Commission staff has assumed that each exchange files an equal number of Form 26 notifications. Each notification requires approximately 20 minutes to complete. Accordingly, the Commission staff estimates the annual aggregate compliance burden for all respondents in a given year would be approximately 4 minutes (20 minutes/report x .2 reports/year = 4 minutes), and for each respondent the annual compliance burden would be approximately .36 minutes (4 minutes/respondent ÷ 11 respondents = .36 minutes), or .006 hours.

Based on the most recent available information, the Commission staff estimates that the cost to respondents of completing a notification on Form 26 is, on average, $43.23 per response. Therefore, the Commission staff estimates that the total annual related reporting cost per respondent is $.86 (.02 responses/respondent/year × $43.23 cost/response), for a total annual related cost to all respondents of $9.46 ($.86 cost/respondent × 11 respondents).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or by sending an e-mail to: nfraser@omb.eop.gov; and (ii) Lewis W. Walker, Acting Director/Chief Information Officer, Securities and Exchange Commission, c/o Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312 or send an e-mail to *PRA_Mailbox@sec.gov*. Comments must be submitted within 30 days of this notice.

Dated: December 10, 2008.

Florence E. Harmon,

Acting Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–59086; File No. SR–CBOE–2008–124]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Increase the Class Quoting Limit in One Option Class

December 11, 2008.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 9, 2008, the Chicago Board Options Exchange, Incorporated (''CBOE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Exchange has designated this proposal as one constituting a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule under Section 19(b)(3)(A)(i) of the Act,[3] and Rule 19b–4(f)(1) thereunder, which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to increase the class quoting limit in one option class. The text of the proposed rule change is available on CBOE's Web site (*http://www.cboe.org/legal*), at the CBOE's Office of the Secretary, and at the Commission's public reference room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

CBOE Rule 8.3A, *Maximum Number of Market Participants Quoting Electronically per Product*, establishes class quoting limits (''CQLs'') for each class traded on the Hybrid Trading System.[4] A CQL is the maximum number of quoters that may quote electronically in a given product and Rule 8.3A, Interpretation .01(a) provides that the current levels are generally established at 50.

In addition, Rule 8.3A, Interpretation .01(b) provides a procedure by which the President of the Exchange may increase the CQL for an existing or new product. In this regard, the President of the Exchange may increase the CQL in a particular product when he deems it appropriate. The effect of an increase in the CQL is procompetitive in that it increases the number of market participants that may quote electronically in a product. The purpose of this filing is to increase the CQL in the American-style option class on the Standard & Poor's 100 Index (OEX) from its current limit of 50 to 100.

Given the impending transition of OEX to the Hybrid Trading System Platform (''Hybrid''), which is currently planned for December 9, 2008, CBOE's President has determined that it would be appropriate to increase the CQL in OEX. With a current limit of 50, we anticipate that there will be a wait-list when OEX moves to Hybrid. Increasing the CQL to 100 will accommodate Market-Makers interested in trading OEX when it moves to Hybrid and will enable the Exchange to enhance the liquidity offered, thereby offering deeper and more liquid markets. Lastly, CBOE represents that it has the systems capacity to support this increase in the CQL.

2. Statutory Basis

CBOE believes the proposed rule change is consistent with the Act and the rules and regulations under the Act applicable to a national securities exchange and, in particular, the requirements of section 6(b) of the Act.[5] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[6] requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts and, in general, to protect investors and the public interest. As indicated above, the Exchange believes that increasing the CQL in this option class will enable the Exchange to enhance the liquidity offered, thereby offering deeper and more liquid markets.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither received nor solicited written comments on the proposal.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing proposed rule change will take effect upon filing with the Commission pursuant to Section 19(b)(3)(A)(i) of the Act[7] and Rule 19b–4(f)(1) thereunder,[8] because it constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–CBOE–2008–124 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2008–124. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the CBOE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2008–124 and should be submitted on or before January 8, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Florence E. Harmon,

Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–59096; File No. SR–FINRA–2008–044]

Self-Regulatory Organizations: Financial Industry Regulatory Authority, Inc.; Order Granting Approval of Proposed Rule Change Relating to the Supervision of Market Letters

December 12, 2008.

I. Introduction

On September 4, 2008, Financial Industry Regulatory Authority, Inc. (''FINRA'') (f/k/a National Association of Securities Dealers, Inc. (''NASD'')) filed with the Securities and Exchange Commission (''Commission'' or ''SEC''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change relating to the supervision of market letters. The proposed rule change was published for comment in the **Federal Register** on October 1, 2008.[3] The Commission received four comment letters on the proposal.[4] This order approves the proposed rule change.

II. Description of the Proposal

FINRA proposed to amend NASD Rules 2210 (Communications with the Public) and 2211 (Institutional Sales Material and Correspondence) and Incorporated New York Stock Exchange (''NYSE'') Rule 472 (Communications with the Public) to address the supervision of market letters.[5] Among other things, the proposed rule change would amend the definition of ''sales literature'' in NASD Rule 2210 to exclude market letters that qualify as ''correspondence'' and would define ''correspondence'' in NASD Rule 2211 to include market letters distributed by a member to one or more of its existing retail customers and fewer than 25 prospective retail customers within any 30 calendar-day period.

NASD Rule 2210 (Communications with the Public) requires a registered principal of a member to approve prior to use any item of sales literature. The term ''sales literature'' does not include any item distributed or made available only to institutional investors.[6] ''Sales literature'' includes ''market letters.'' Incorporated NYSE Rule 472 similarly requires a qualified person to approve in advance of distribution any market letter, but contains no exception for market letters sent only to institutional investors. FINRA is concerned that the pre-approval requirements may, in some circumstances, inhibit the flow of information to traders and other investors who base their investment decisions on timely market analysis.

To address this concern, FINRA proposed to amend the definition of ''sales literature'' in NASD Rule 2210 to exclude market letters that qualify as a ''correspondence'' and further to amend ''correspondence'' in NASD Rule 2211 to include market letters (as well as any written letter or electronic mail message) distributed by a member to one or more of its existing retail customers and fewer than 25 prospective retail customers within any 30 calendar-day period. Pursuant to NASD Rule 2211(b)(1)(A), correspondence does not require approval by a registered principal prior to use, unless such correspondence is distributed to 25 or more existing retail customers within any 30 calendar-day period and makes a financial or investment recommendation or otherwise promotes a product or service of the member. The proposed rule change also would amend Incorporated NYSE Rule 472 to eliminate the requirement that a qualified person approve market letters in advance of distribution.

Thus, under the proposed rule change, all FINRA members would be permitted under FINRA rules to distribute market letters to institutional investors (as defined in NASD Rule 2211(a)(3)) without requiring prior approval by a registered principal or qualified person. In addition, under the proposed rules, a member also could distribute without prior approval by a registered principal a market letter that

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 58648 (September 25, 2008); 73 FR 57177, 57179 (October 1, 2008).

[4] William A. Jacobson, The Cornell Securities Law Clinic (October 20, 2008) (the ''Cornell Letter''); Neal E Nakagiri, NPB Financial Group LLC (October 20, 2008); Dale E. Brown, Financial Services Institute (October 22, 2008); Michael Mungenast, president, ProEquities (Nov. 7, 2008).

[5] The FINRA rulebook currently includes (1) NASD Rules and (2) rules incorporated from NYSE (''Incorporated NYSE Rules''). While the NASD Rules generally apply to all FINRA members, the Incorporated NYSE Rules apply only to members of both FINRA and the NYSE, referred to as Dual Members.

[6] Pursuant to NASD Rule 2211(a)(2), communications of any kind sent only to institutional investors (as defined in NASD Rule 2211(a)(3)) are considered to be ''institutional sales material.'' NASD Rule 2210 does not require approval of institutional sales material by a registered principal prior to use. However, institutional sales material remains subject to the supervision and review requirements of NASD Rule 2211(b)(1)(B).

is sent only to existing retail customers and fewer than 25 prospective retail customers within a 30 calendar-day period. However, prior principal approval would be required if the market letter both (1) is sent to 25 or more existing retail customers and (2) makes a financial or investment recommendation or otherwise promotes a product or service of the member. In addition, similar to the manner in which other forms of correspondence (i.e., written letters and electronic mail messages) are addressed by NASD Rules 2210 and 2211, if a market letter were sent to 25 or more prospective retail customers within a 30-calendar day period, the market letter would fall within the definition of sales literature and have to be supervised as such, including approval by a registered principal prior to use.

As correspondence, market letters would remain subject to the supervision and review requirements of NASD Rule 3010, which requires each firm to establish written procedures that are appropriate to its business, size, structure and customers for the review of outgoing correspondence. If these procedures do not require review of all correspondence prior to use or distribution, they must provide for the education and training of associated persons as to the firm's procedures governing correspondence, documentation of such education and training, and surveillance and follow-up to ensure that such procedures are implemented and adhered to.[7]

The proposed rule changes would allow firms to distribute most market letters in a timely manner without requiring a registered principal to review each market letter prior to distribution, but would maintain investor protection by requiring firms to review such correspondence in accordance with mandated supervisory policies and procedures.

The proposal also would create a new definition of the term ''market letter'' in NASD Rule 2211—and modify the existing definition in Incorporated NYSE Rule 472—to mean any communication specifically excepted from the definition of ''research report'' under NASD Rule 2711(a)(9)(A) and Incorporated NYSE Rule 472.10(2)(a), respectively. This exception consists of:

- Discussions of broad-based indices;
- Commentaries on economic, political or market conditions;
- Technical analyses concerning the demand and supply for a sector, index or industry based on trading volume and price;
- Statistical summaries of multiple companies' financial data, including listings of current ratings;
- Recommendations regarding increasing or decreasing holdings in particular industries or sectors; and
- Notices of ratings or price target changes (subject to certain disclosure requirements).

FINRA proposed to define market letters by reference to an exception from the definition of ''research report'' in NASD Rule 2711 and Incorporated NYSE Rule 472 to make clear that a firm may not supervise as correspondence communications that fall within the definition of ''research report.'' The proposed rule change would, however, increase a firm's flexibility in supervising market letter communications that do not qualify as research reports.

III. Comment Letters

The Commission received four comment letters on the proposal, all of which expressed support for the proposed rule change.[8] For example, one commenter stated that it supported the effort to provide more timely information to a subset of investors while retaining procedures for review and supervision of correspondence and maintaining consistency across NASD and NYSE rules.[9]

IV. Discussion and Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and the rules and regulations thereunder that are applicable to a national securities association.[10] In particular, the Commission believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[11] which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. The Commission concludes that the proposed rule would increase the flow of timely information to investors while providing appropriate safeguards from potential abuse and fraud.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[12] that the proposed rule change (SR–FINRA–2008–044) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Florence E. Harmon,

Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–59091; File No. SR–FINRA–2008–031]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Order Approving Proposed Rule Change To Amend the Arbitration Uniform Submission Agreement and Related Rules

December 12, 2008.

I. Introduction

The Financial Industry Regulatory Authority, Inc. (''FINRA'') (f/k/a National Association of Securities Dealers, Inc. (''NASD'')) filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') on June 19, 2008, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the Uniform Submission Agreement (''USA''), which parties must sign prior to entering into arbitration, and certain rules of the Code of Arbitration Procedure for Customer Disputes (''Customer Code'') and the Code of Arbitration Procedure for Industry Disputes (''Industry Code'') that contain references to the agreement. The proposed rule change was published for comment in the **Federal Register** on July 16, 2008.[3] The Commission received five comments in response to the proposed rule change. This order approves the proposed rule change.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 58124 (July 9, 2008), 73 FR 40890 (July 16, 2008) (SR–FINRA–2008–031) (notice).

II. Description of the Proposed Rule Change

The USA is an agreement that claimants and respondents (hereinafter, collectively referred to as ''parties'') must sign prior to entering into arbitration. Rule 12302(a) of the Customer Code and Rule 13302(a) of the Industry Code require a claimant to file a signed and dated USA and a statement of claim to initiate an arbitration. Similarly, Rule 12303(a) of the Customer Code and Rule 13303(a) of the Industry Code require a respondent to directly serve each other party with a signed and dated USA and an answer within 45 days of receipt of the statement of claim. By signing the USA, the parties agree to submit to the arbitration process, and to be bound by the determination that may be rendered by the arbitrator(s).

FINRA proposed to amend the USA to: (1) Clarify what the parties are attesting to when they execute the agreement; (2) require parties to indicate in what capacity they are signing the agreement; (3) convert it to a FINRA-specific agreement; and (4) use plain English to make the agreement easier to read. FINRA also proposed to amend the rules of the Customer Code and the Industry Code that refer to the USA.

First, FINRA proposed to amend paragraph 2 of the USA to clarify what the parties are attesting to when they execute the agreement. Currently, this section states that the parties have read the procedures and rules relating to arbitration. FINRA stated that it understands that few investors who are represented by counsel actually read the relevant self-regulatory organization (SRO) rules (such as the Customer Code). Rather, in most cases, these investors are relying on their attorneys or other representatives to know the rules. Thus, some investors have been reluctant to sign a statement that they have read all the relevant rules. In light of these concerns, FINRA proposed to amend paragraph 2 to permit parties to certify that they or their representatives have read the relevant procedures and rules and that the parties agree to be bound by them. FINRA stated that it believes that the provision as proposed to be amended would reflect more accurately what the parties are attesting to when they execute the USA. The new language would make clear that the parties themselves are bound by the procedures and rules, regardless of whether they have read them personally.

Second, FINRA proposed to require that parties indicate in what capacity they are signing the agreement. Because the USA is a contract between the parties and FINRA's dispute resolution forum, FINRA must ensure that the parties entering into the agreement have the authority or standing to sign the agreement. In those cases in which the signatory is not a named party, the signatory must state the capacity in which he or she is acting if other than an individual and sign in that capacity, so that FINRA can determine from the statement of claim and other supporting information whether he or she is authorized to enter the agreement. For example, a person signing as the trustee of a family trust would sign his or her name exactly as shown on the trust documents and then write ''Trustee'' on the line below the instruction ''State Capacity if other than individual (example: Executor, Trustee, Corporate Officer).'' According to FINRA, this change would formalize an existing practice. Currently, if a party fails to sign the USA in the capacity in which he or she is submitting the claim, FINRA classifies the claim as deficient, which can delay the arbitration and increase the party's costs. FINRA stated that it believes that the proposed change would clarify how the agreement must be signed, and should help expedite the processing of claims, thereby minimizing unnecessary delays and expenses that parties could incur.

Third, FINRA proposed to convert the USA into a FINRA-specific agreement. The USA was designed by the Securities Industry Conference on Arbitration (SICA) [4] a number of years ago and was intended to be used by the ten SROs that offered an arbitration forum at that time. Thus, the language is generic and references to rules or procedures include broad terms to encompass the rules from the various SROs. Over the years, most SROs have closed their arbitration forums and contracted with FINRA to handle their arbitrations. In addition, on August 6, 2007, FINRA consolidated its dispute resolution program with that of the New York Stock Exchange, Inc.[5] As a result, FINRA now handles over 99 percent of all arbitrations filed with SROs. In light of these changes, FINRA proposed to convert the USA to a FINRA-specific agreement by removing references to ''sponsoring organization'' and replacing them with references to FINRA; expressly referencing the FINRA Code of Arbitration Procedure; [6] and removing the term ''Uniform'' from the title of the agreement. FINRA stated that it believes these changes would minimize confusion for parties concerning the applicability of the form and would clarify which FINRA rules apply in the arbitration context.

Fourth, FINRA proposed to make minor stylistic changes to the document, such as defining ''undersigned parties'' as ''parties'' after the first usage, moving the reference to cross-claims and dividing a long sentence in paragraph 4 into two sentences.[7] FINRA stated that it believes these changes will make the agreement easier to read.

Finally, FINRA proposed to amend Rules 12100(x), 12100(y), 12302(a)(1), (b), and (d), 12303(a) and (c), 12306(a) and (c), and 12307(a) of the Customer Code to conform the references to the USA to the proposed changes to the agreement. FINRA proposed to amend Rules 13100(z)–(bb), 13302(a)(1), (b), and (d), 13303(a) and (c), 13306(a) and (c), and 13307(a) of the Industry Code for the same reason.

III. Comments

The SEC received five comments,[8] as well as FINRA's response to comments,[9] which are discussed below. Two

[4] SICA was formed in 1977 to develop and maintain a Uniform Code of Arbitration and to provide a forum for the discussion of new developments in securities arbitration among SRO arbitration forums and participants in those forums. The membership currently includes representatives of each securities SRO that currently sponsors an arbitration forum, three ''public'' members, and representatives from the Securities Industry and Financial Markets Association (SIFMA) and the North American Securities Administrators Association (NASAA).

[5] *See* Securities Exchange Act Release No. 56145 (July 26, 2007), 72 FR 42169 (August 1, 2007) (SR–NASD–2007–023) (approval order).

[6] The Submission Agreement's use of the term ''FINRA Code of Arbitration Procedure'' means the Customer Code or the Industry Code, as applicable.

[7] In the proposed definition of ''Submission Agreement'' (proposed NASD Rules 12100(x) and 13100(z)), FINRA did not propose to replace references to ''NASD Submission Agreement'' with ''FINRA Submission Agreement'' as part of this rule filing, because those changes were proposed as part of a separate rule filing (FINRA's Proposed Rule Change to Adopt NASD Rules 4000 Through 1000 Series and the 12000 Through 14000 Series as FINRA Rules in the New Consolidated FINRA Rulebook (SR–FINRA–2008–021) (*See* Exhibit 5 at pp. 530 and 550–551)), which was approved by the Commission but has not yet been implemented. *See* Securities Exchange Act Release No. 58643 (September 25, 2008), 73 FR 57174 (October 1, 2008) (SR–FINRA–2008–021) (approval order). This change, as set forth in SR–FINRA–2008–021, will take effect on December 15, 2008. *See* FINRA Regulatory Notice 08–57 (SEC Approves New Consolidated FINRA Rules) (October 2008).

[8] *See* Letter from Seth E. Lipner, Professor of Law, Baruch College, August 6, 2008 (''Lipner Letter''); Letter from Lawrence S. Schultz, President, Public Investors Arbitration Bar Association, August 6, 2008 (''PIABA Letter''); Letter from Daniel S. Wilkerson, July 30, 2008 (''Wilkerson Letter''); Letter from Philip M. Aidikoff, Attorney, July 23, 2008 (''Aidikoff Letter''); and Letter from Steven B. Caruso, Esq., Maddox Hargett Caruso, P.C., July 16, 2008 (''Caruso Letter'').

[9] Letter from Mignon McLemore, FINRA, dated October 29, 2008 (''FINRA Letter'').

commenters supported the proposed rule change; [10] three opposed it.[11] Two commenters who opposed the proposed rule change, however, raised concerns that are outside the scope of the proposal.

Detailed Discussion of Comments and Finra Response

Certifying that Party's Representative Read the Rules

Under the proposed rule change, parties would be permitted to rely on their representatives to be familiar with the rules and procedures of the forum. Two commenters stated that this is a positive change.[12]

Removing References to Certain Rules and Corporate Documents

FINRA proposed to make the USA specific to FINRA and to remove language that is overly broad or that is generic to encompass the rules of the various self-regulatory organizations. A commenter who opposed the proposed rule change argued that amending paragraph three of the USA to remove the requirement that the arbitration be conducted pursuant to the Constitution, By-Laws, Rules and Regulations of the sponsoring organization may eliminate FINRA's authority under its Conduct Rules to enforce or collect on an arbitration settlement or award.[13]

FINRA stated that it disagrees with the commenter's argument for several reasons. Firms and associated persons are subject to FINRA's jurisdiction under FINRA By-Laws, regardless of whether they sign a USA.[14] In addition, firms and associated persons agree again to be bound by the By-Laws in paragraph one of the USA. Therefore, FINRA stated that similar references in paragraph three of the USA are redundant, and that their removal will make the document easier to read and understand for users of its dispute resolution forum. Moreover, the focus in paragraph three is on the procedures under which the arbitration will be conducted, and the proper reference in this context is the FINRA Code of Arbitration Procedure. For these reasons, FINRA declined to amend paragraph three.

One commenter contended that the proposed amendments to the USA do not define explicitly the rules and procedures to which the document refers, thereby making it difficult for parties to review them and agree to be bound by them.[15] In particular, the commenter seeks ''specific document names, section names, page numbers, [and] web URLs * * * where these rules can be found.'' [16]

FINRA responded that one of the goals of the proposal is to streamline the USA by using plain English to make the document easier to read. In keeping with this goal, FINRA eliminated redundant and generic references to corporate documents as described above. FINRA stated that inserting a detailed list of all rules and procedures that might possibly apply to any arbitration proceeding would make the USA unduly lengthy and complex for the average user of the dispute resolution forum. More importantly, the nature of a particular claim determines which rules and procedures would apply in the forum. A listing of all rules and procedures available in the forum may be confusing to investors when only some of the rules and procedures may apply to a particular claim. Thus, the proposed changes to the USA incorporate by reference the relevant rules and procedures of the forum, which are readily accessible on FINRA's Web site at *http://www.finra.org* or in hard copy upon request. FINRA stated that most investors will find that the Code of Arbitration Procedure and the packet of materials provided for claimants will provide them with all the necessary rules and procedures applicable to their arbitration proceedings. For these reasons, FINRA declined to amend the proposal to address this issue at this time.

Comments Outside the Scope of Proposed Rule Change

Four commenters expressed concerns over alleged disparate treatment of claimants and respondents with regard to executing a USA.[17] Specifically, they stated that respondents are frequently permitted to participate in arbitrations without ever having signed the USA, and that FINRA does not enforce its rules with respect to those respondents who fail to submit a signed USA by barring participation, or otherwise imposing sanctions.

FINRA determined that these comments are outside the scope of the rule filing, because FINRA is not proposing to amend the provisions of the Codes that address the execution requirements concerning the USA.[18] FINRA responded that it does believe it is important, however, to correct misconceptions expressed by the commenters concerning the accountability of respondents when they do not execute a USA. First, as noted previously, firms and associated persons or registered representatives are subject to FINRA's jurisdiction under FINRA By-Laws,[19] which means that they are bound to arbitrate in the forum and are subject to the forum's rules and procedures. Second, Rules 12303(a) and 13303(a) of the Customer and Industry Codes, respectively, require respondents to serve each other party with a signed and dated USA. In addition, Rules 12307(c) and 13307(c) prohibit a panel from considering any counterclaim, cross claim or third party claim that is deficient, which includes a USA that is not properly signed and dated.[20] Third, if respondents fail to submit a signed USA or otherwise object to jurisdiction within 30 days, arbitrators are instructed in the initial pre-hearing conference script to impose sanctions as provided in the Codes.[21] Last, FINRA trains its arbitrators extensively on how its rules and procedures should be applied. With regard to respondents' failure to submit a USA, FINRA recently published an article in *The Neutral Corner* that addressed this issue and reminded arbitrators of their ability to issue sanctions for noncompliance.[22] Therefore, FINRA concluded that its rules, procedures, and arbitrator training programs address effectively the instances in which respondents fail to submit a USA.

[10] Aidikoff and Caruso Letters.

[11] PIABA, Lipner, and Wilkerson Letters.

[12] Aidikoff and PIABA Letters.

[13] PIABA Letter.

[14] *See* By-Laws of the Corporation, Article IV, Membership, and Article V, Registered Representatives and Associated Persons. For a firm to become a member of FINRA, it must agree to comply with the FINRA By-Laws, the Rules of the Corporation, and all rulings, orders, directions, and decisions issued and sanctions imposed under the Rules of the Corporation. Article IV, Sec. 1(a)(1) of By-Laws. Article V, Sec. 2(a)(1) of the By-Laws contains a similar requirement for registered representatives and associated persons. The Code of Arbitration Procedure is included in the Rules of the Corporation. Article I, Sec. (w) of the By-Laws states, '' 'Rules of the Corporation' or 'Rules' means the numbered rules set forth in the manual of the Corporation beginning with the Rule 0100 Series, as adopted by the Board pursuant to these By-Laws, as hereafter amended or supplemented.''

IV. Discussion and Findings

After careful review of the proposed rule change, the comments and FINRA's response to the comments, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and the rules and regulations thereunder that are applicable to a national securities association.[23] In particular, the Commission believes the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[24] which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. The Commission believes that the proposed rule change would enhance the efficiency of the forum in processing claims, by clarifying the terms of the agreement and improving its readability. Moreover, the Commission believes the proposed rule change is consistent with FINRA's statutory obligations under the Act to prevent fraudulent and manipulative practices by requiring that signers of the agreement indicate in what capacity they are signing, so that FINRA can ensure that signers of the agreement are authorized to do so.

The Commission believes that FINRA has adequately responded to the comments regarding removal of references to certain rules and corporate documents. As stated above, one of the purposes of the proposed rule change is to convert the USA to a FINRA-specific document. In order to do this, FINRA proposed to remove language that is overly broad or that is generic to encompass the rules of the various self-regulatory organizations. By citing to relevant provisions of its By-Laws, FINRA has sufficiently explained why the removal of the requirement that the arbitration be conducted pursuant to the ''Constitution, By-Laws, Rules and Regulations'' of the sponsoring organization would not eliminate FINRA's authority to enforce or collect on an arbitration settlement or award.

The Commission carefully considered the comment suggesting that the agreement should contain an explicit definition of the ''procedures and rules'' to which the parties agree to be bound, under paragraph two of the agreement. However, as noted above, another principal goal of the proposed rule change is to make the agreement easier to read. Since the Commission's oversight of the securities arbitration process is directed at ensuring that it is fair and efficient, the Commission agrees with FINRA's determination that inserting a detailed list of all rules and procedures that might possibly apply to any arbitration proceeding would make the agreement unduly lengthy and complex for the average user of the dispute resolution forum, and consequently, would hinder the goals of fairness and efficiency. Furthermore, the Commission believes that the commenter's concerns are addressed by the fact that, as FINRA pointed out, claimants can refer to the Code of Arbitration Procedure and the packet of materials provided for claimants to find all the necessary rules and procedures applicable to their arbitration proceedings.

With respect to the comments regarding the alleged disparate treatment of claimants and respondents with regard to executing an agreement, the Commission believes that FINRA has adequately responded, by highlighting the rules, procedures, and arbitrator training programs that address the instances in which respondents fail to submit an agreement.

V. Conclusions

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[25] that the proposed rule change (SR–FINRA–2008–031) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[26]

Florence E. Harmon,

Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–59087; File No. SR–NASDAQ–2008–093]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify the Bid Price Required for Initial Listing on the Nasdaq Global and Global Select Markets from $5 to $4

December 11, 2008.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 1, 2008, The NASDAQ Stock Market LLC (''Nasdaq'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and III below, which Items have been prepared by Nasdaq. Nasdaq has filed this proposal pursuant to Exchange Act Rule 19b–4(f)(6)[3] and requests that the Commission waive the 30-day pre-operative waiting period contained in Exchange Act Rule 19b–4(f)(6)(iii).[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Nasdaq proposes to modify the bid price required for initial listing on the Nasdaq Global and Global Select Markets from $5 to $4.

The text of the proposed rule change is below. Proposed new language is italicized; proposed deletions are in brackets.[5]

4420. Quantitative Listing Criteria

In order to be listed on the Nasdaq National Market, an issuer shall be required to substantially meet the criteria set forth in paragraphs (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n) or (o) below. Nasdaq may extend unlisted trading privileges to any security for which Nasdaq has in effect rules providing for transactions in such class or type of security. Provisions of Rule 4420 that govern trading hours and surveillance procedures, and that relate to information circulars and prospectus delivery, shall apply to securities traded on an unlisted trading privileges basis.

(a) Entry Standard 1—First Class of Common Stock, Shares or Certificates of Beneficial Interest of Trusts, Limited Partnership Interests in Foreign or Domestic Issues and American Depositary Receipts

(1)–(3) No change.

(4) The bid price per share is [$5] *$4* or more.

(5)–(7) No change.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.19b–4(f)(6).

[4] 17 CFR 240.19b–4(f)(6)(iii).

[5] Changes are marked to the rule text that appears in the electronic manual of Nasdaq found at *http://nasdaqomx.cchwallstreet.com.*

(b) Entry Standard 2—First Class of Common Stock, Shares or Certificates of Beneficial Interest of Trusts, Limited Partnership Interests in Foreign or Domestic Issues and American Depositary Receipts

(1)–(3) No change.

(4) The bid price per share is [$5] *$4* or more.

(5)–(7) No change.

(c) Entry Standard 3—First Class of Common Stock, Shares or Certificates of Beneficial Interest of Trusts, Limited Partnership Interests in Foreign or Domestic Issues and American Depositary Receipts

An issuer listed under this paragraph does not also need to be in compliance with the quantitative criteria for initial listing in the Rule 4300 series.

(1)–(2) No change.

(3) The bid price per share is [$5] *$4* or more.

(4)–(6) No change.

(d)–(j) No change.

(k) Quantitative Listing Criteria—Preferred Stock and Secondary Classes of Common Stock

For initial listing, if the common stock or common stock equity equivalent security of the issuer is listed on Nasdaq or another national securities exchange, the issue shall have:

(1)–(2) No change.

(3) A minimum bid price per share of [$5] *$4*;

(4)–(5) No change.

Alternatively, in the event the issuer's common stock or common stock equivalent security is not listed on either Nasdaq or another national securities exchange, the preferred stock and/or secondary class of common stock may be traded on Nasdaq so long as the security satisfies the listing criteria for common stock.

* * * * *

4426. Nasdaq Global Select Market Listing Requirements

(a)–(c) No change.

(d) Price. For inclusion in the Nasdaq Global Select Market, an issuer not listed on the Nasdaq Global Market shall have a minimum bid price of [$5] *$4* per share.

(e)–(f) No change.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Nasdaq included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Nasdaq has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Nasdaq proposes to change the minimum bid price required for initial listing on the Nasdaq Global and Global Select Markets from $5 to $4. Nasdaq believes that this change will permit the listing of more companies on Nasdaq, thereby enhancing investor protection by allowing these companies, and their investors, to benefit from Nasdaq's liquid and transparent marketplace, supported by strong regulation including Nasdaq's listing and market surveillance and FINRA's independent regulation.

Nasdaq believes that companies satisfying the proposed minimum $4 price requirement, along with all of Nasdaq's other listing requirements, are suitable for listing. Nasdaq notes that the proposed $4 minimum price meets the criteria from the definition of a penny stock contained in Rule 3a51–1 under the Act.[6] In addition, the proposed $4 price is the same as the requirement recently adopted for listing on the New York Stock Exchange.[7]

2. Statutory Basis

Nasdaq believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[8] in general and with Sections 6(b)(5) of the Act,[9] in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The proposed rule change removes an impediment for certain otherwise qualified companies to list on Nasdaq, and thereby benefit from Nasdaq's liquid and transparent marketplace and strong regulation.

B. Self-Regulatory Organization's Statement on Burden on Competition

Nasdaq does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of this filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[10] and Rule 19b–4(f)(6) thereunder.[11]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act normally does not become operative for 30 days after the date of filing.[12] However, Rule 19b–4(f)(6)(iii)[13] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. In making this determination, the Commission notes that it recently approved a substantially similar rule proposal for the NYSE.[14] The

[6] *See* 17 CFR 240.3a51–1(a)(2)(i)(C).

[7] *See* Section 102.01B (applicable to domestic companies) and Section 103.01A (applicable to non-U.S. companies) of the NYSE Listed Company Manual, which require a $4 minimum price for initial listing. Securities Exchange Act Release No. 57785 (May 6, 2008), 73 FR 27597 (May 13, 2008) (approving SR–NYSE–2008–17).

[8] 15 U.S.C. 78f.

[9] 15 U.S.C. 78f(b)(5).

[10] 15 U.S.C. 78s(b)(3)(A).

[11] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) under the Act requires that a self-regulatory organization submit to the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this notice requirement.

[12] 17 CFR 240.19b-4(f)(6)(iii).

[13] *Id.*

[14] *See supra* note 7.

Commission believes that the Nasdaq's proposed rule change raises no new regulatory issues that were not previously considered by the Commission in approving the NYSE's similar proposal. In approving the NYSE proposal, the Commission found that adopting a $4 price requirement for initial listing was consistent with the requirements of the Act and that this requirement meets the criteria from the definition of penny stock contained in Rule 3a51–1 under the Act.[15] Further, the Commission notes that the NYSE's proposal was subject to full notice and comment, and the Commission received no comments on the price requirement portion of the NYSE's rule proposal. Accordingly, for the reasons discussed above, the Commission finds that the Exchange's proposal is consistent with the protection of investors and the public interest and therefore designates the proposed rule change operative immediately upon filing.[16]

At any time within 60 days of the filing of such proposed rule change the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2008–093 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2008–093. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the self-regulatory organization. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2008–093 and should be submitted on or before January 8, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Florence E. Harmon,

Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–59082; File No. SR–NYSEArca–2008–135]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change Amending Rule 6.47A To Reduce the Order Exposure Period from Three Seconds to One Second

December 11, 2008.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on December 9, 2008, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its rules governing order exposure requirements on the OX system. This proposal will revise Rule 6.47A. A copy of this filing is available on the Exchange's Web site at *http://www.nyse.com,* at the Exchange's principal office and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to reduce the exposure period contained in Rule 6.47A, Order Exposure Requirements—OX, from three seconds to one second.

Rule 6.47A provides that with respect to orders routed to OX, Users may not execute as principal orders they represent as agent unless (i) Agency orders are first exposed on the Exchange for at least three (3) seconds or (ii) the User has been bidding or offering on the Exchange for at least three (3) seconds prior to receiving an agency order that is executable against such bid or offer.

Specifically, order entry firms may not execute as principal, orders they represent as agent unless: (i) the agency order has first exposed on the NYSE Arca OX trading system for at least three seconds; (ii) the order entry firm has been bidding or offering for at least three seconds prior to receiving the agency order that is executable against such bid or offer. During this three-second exposure period, other market participants may enter orders to trade

against the exposed order. Under this proposal, the exposure periods contained in Rule 6.47A would be reduced to one second.

The Exchange notes that in incorporating a three-second order exposure period in Rule 6.47A, it recognized that three seconds would not be long enough to allow human interaction with the exposed orders. Rather, market participants on NYSE Arca are sufficiently automated that they can react to these orders electronically. In this context, NYSE Arca believes it would be in all market participants' best interest to minimize the exposure period to a time frame that continues to allow adequate time for market participants to electronically respond, while at the same time reducing any market risk associated with the longer exposure period. In this respect, the Exchange states that its experience with the three-second exposure time period indicates that one second would provide an adequate response time.[4] Accordingly, the Exchange does not believe it is necessary or beneficial to the orders being exposed to continue to subject them to market risk for a full three seconds.

When adopting the existing three-second order exposure period, the Exchange realized that, in today's electronic trading environment, a three-second exposure period could provide timely executions of orders while still providing market participants with an adequate opportunity to compete for exposed bids and offers. Continuing on that same logic, the Exchange believes that reducing its order exposure period from three seconds to one second will benefit market participants. Since market participants have the ability to react to these orders electronically, and regularly do so in less than one second, the Exchange believes that reducing the time period to one second will continue to afford sufficient time to ensure effective interaction with orders. At the same time, NYSE Arca believes that reducing the time period to one second will allow it to provide investors and other market participants with more timely executions, thereby reducing market risk.

A shortened exposure period would be fully consistent with the electronic nature of the NYSE Arca OX trading system. In order to substantiate that market participants on NYSE Arca would not be disadvantaged by a reduced exposure period, the Exchange conducted a survey of OTP Firms to find out whether they had the systems capability available that would allow them to respond in a meaningful way within the proposed timeframe. The Exchange surveyed twenty-six (26) OTP Firms, representing fifty-one (51) different OTP Holders, that regularly access the Exchange on an electronic basis,[5] regarding the proposed change to Rule 6.47A, specifically the Exchange asked; 1. ''What is the approximate turnaround time for your firm to take in, process and respond to trading interest posted on NYSE Arca Options?'' and 2. ''Do you foresee any problems if NYSE Arca Options reduces the exposure time from three seconds to one second?'' Of the nine OTP Firms that responded to the Exchange's survey, all but one indicated that their approximate turnaround time for responding to trading interest was equal to, or less than, 100 milliseconds. The other responding OTP Firm simply stated that their turnaround time was ''less than one second''. None of the responding OTP Firms anticipated any problems related to order processing, if the Exchange was to reduce the exposure period to one second.

Based on the findings of the survey, the Exchange believes that the proposed exposure period will continue to provide market participants with sufficient time to respond, and compete for orders, while also reducing some of the risks associated with a prolonged exposure period.

2. Statutory Basis

NYSE Arca believes that the proposed rule change is consistent with Section 6(b) of the Act[6] in general, and furthers the objectives of Section 6(b)(5) of the Act[7] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system. In particular, the Exchange believes that the proposed rule change will provide investors with more timely execution of their options orders, while ensuring that there is an adequate exposure of all orders on NYSE Arca.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange solicited comments from a broad cross section of OTP Holders. As previously stated, the Exchange received no negative comments on the proposed rule change.[8]

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

The Exchange has requested accelerated approval of this proposed rule change prior to the 30th day after the date of publication of the notice in the **Federal Register**. The Commission is considering granting accelerated approval of the proposed rule change at the end of a 15-day comment period.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2008–135 on the subject line.

[4] There are numerous market participants on NYSE Arca that have the capability and already opt to respond within the first one-second of the present three second exposure period, currently in force for the OX trading system.

[5] The twenty-six (26) surveyed collectively accounted for slightly more than 90% of all electronically executed transactions on the NYSE Arca OX system, during the month of October 2008.

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(5).

[8] *See* Form 19b–4 and e-mail from Glenn Gsell, Managing Director, NYSE Regulation, to Kristie Diemer, Special Counsel, Commission, dated December 10, 2008 (requesting that language from Item 5 of Form 19b–4 replace language in Item II, Part C of Exhibit 1).

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2008–135. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 100 F Street, NE., Washington, DC 20549–1090. Copies of the filing will also be available for inspection and copying at NYSE Arca's principal office. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2008–135 and should be submitted on or before January 2, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Florence E. Harmon,

Acting Secretary.

BILLING CODE 8011–01–P

SMALL BUSINESS ADMINISTRATION

[License No. 03/03–0247]

Solutions Capital I, L.P.; Notice Seeking Exemption Under Section 312 of the Small Business Investment Act, Conflicts of Interest

Notice is hereby given that Solutions Capital I, L.P., 1100 Wilson Blvd, Suite 3000, Arlington, VA 22209, a Federal Licensee under the Small Business Investment Act of 1958, as amended (''the Act''), in connection with the financing of a small concern, has sought an exemption under Section 312 of the Act and Section 107.730, Financings which Constitute Conflicts of Interest, of the Small Business Administration (''SBA'') Rules and Regulations (13 CFR 107.730). Solutions Capital I, L.P., proposes to provide equity/debt security financing to Jet Plastica Industries, Inc., 1100 Schwab Road, Hatfield, PA 19440. The financing is contemplated for working capital and general corporate purposes.

The financing is brought within the purview of § 107.73 0(a)(1) of the Regulations because MCG Capital Corporation, an Associate of Solutions Capital I, L.P., owns more than ten percent of Jet Plastica Industries, Inc.; therefore Jet Plastica Industries, Inc. is considered an Associate of Solutions Capital I, L.P., as defined in Sec. 105.50 of the regulations.

Notice is hereby given that any interested person may submit written comments on the transaction to the Associate Administrator for Investment, U.S. Small Business Administration, 409 Third Street, SW., Washington, DC 20416.

December 1, 2008.

A. Joseph Shepard,

Associate Administrator for Investment.

BILLING CODE 8025–01–P

DEPARTMENT OF STATE

[Public Notice 6459]

Bureau of Educational and Cultural Affairs (ECA) Request for Grant Proposals: Three Summer Institutes for 2009, Including a Summer Institute for Norwegian Students in the Sciences, a Summer Institute for European Student Leaders, and a Summer Institute for European Student Leaders in Education

Announcement Type: Three new Cooperative Agreements.

Funding Opportunity Number: ECA/A/E/EUR 09–05.

Catalog of Federal Domestic Assistance Number: 00.000.

Key Dates: April 1, 2009–July 1, 2010.

Application Deadline: February 26, 2009.

Executive Summary: The Office of Academic Exchange Programs, European and Eurasian Programs Branch (ECA/A/E/EUR) announces an open competition for three (3) Summer Institutes for European undergraduate students to take place during the summer of 2009. The Institutes vary in focus, the number of participants, length, timing, and funding. Accredited, post-secondary educational institutions in the United States may submit proposals to administer one or more of the Institute programs. Institutions must submit separate proposals for each Institute. All Institutes will be funded in FY2009 pending the availability of funds.

I. Funding Opportunity Description

Authority: Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is ''to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries * * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world.'' The funding authority for the program above is provided through legislation.

Purpose of each Summer Institute: Please refer to the Project Objectives, Goals, and Implementation (POGI) document for a complete program description for all three Institutes.

The Summer Institute for Norwegian Students in the Sciences will introduce twelve (12) undergraduate students who have completed at least two years of university studies in the natural sciences at Norwegian institutions to the scientific research being conducted on the polar regions. Proposals should interweave the themes and issues being examined by the International Polar Year (IPY) program into the Institute plan. For example, topics covered in the academic program may include climate change, the influence of the polar regions on the global system, community and environmental sustainability in the polar regions, and and/or other issues being examined by the IPY program.

The six-week Institute is also intended to introduce Norwegian students to the U.S. university classroom and lab, campus life, and offer them opportunities to interact with their U.S. peers.

The U.S.-Norway Fulbright Commission for Educational Exchange will recruit and nominate the participants. The Institute will take place during a six-week period between late June and mid-August, preferably

[9] 17 CFR 200.30–3(a)(12).

July 5–August 15, 2009. Funding for this Institute will be up to $200,000, pending the availability of FY2009 funds.

Guidelines: The program should be designed to support the following components:

(a) An academic program that focuses on polar studies, with particular relevance to the circumpolar region, also known as the ''High North''. The academic program can be a mix of lectures, seminars, and/or special projects and should include lab and/or field research at the host institution or other sites.

(b) A cultural component that allows participants to explore their host city and region and have full participation in campus life at the host institution.

(c) It is anticipated that all participants will be fluent in English. However, the host institution should be prepared to offer English language support as necessary.

(d) A U.S. peer mentor component. The host institution should retain three (3) qualified upper division or graduate U.S. students majoring in science who exhibit cultural sensitivity and an understanding of the Institute's objectives to accompany the participants throughout the academic and cultural components of the program.

2. The Summer Institute for European Student Leaders will offer a group of twenty-four (24) European undergraduate students from a broad range of ethnic, religious and socio-economic backgrounds the opportunity to learn about the United States and build leadership skills during a five-week program on an American campus. The Fulbright Commissions in Denmark, France, the Netherlands, Norway, Portugal, Spain, Sweden, and the United Kingdom will recruit participants who are first- or second-year undergraduate students or recent high school graduates who will enter university in fall 2009. The Institute will promote study and learning about the United States, civic engagement, and leadership development through academic coursework and participatory activities that will serve the participants in their academic and professional careers and to promote mutual understanding between the United States and their home countries. ECA anticipates that the five-week Institute will begin mid-July 2009. Funding for this Institute will be up to $215,000, pending the availability of FY 2009 funds.

Guidelines: The program should be designed to support the following components:

(a) An academic program that will introduce participants to the important events, people, and documents that have shaped the United States and contemporary American life. The host institution is encouraged to identify or develop an academic course that Institute participants can take together with American students at the university.

(b) A cultural component that complements and reinforces the academic component. Activities should include visits to historical and cultural sites of interest and participation in extra-curricular activities that will allow an optimal level of interaction with American peers. This component should include plans for participants to be engaged in a community service activity one to two hours per week.

(c) An English language component designed to strengthen the English proficiency of all participants. While all program activities should aim to promote English-language learning, preparations should be in place to assist students through one-on-one or small group tutorials. The tutorials should be held several times a week throughout the duration of the Institute and will be mandatory for those participants deemed to require additional language instruction based on their English language assessment.

(d) A U.S. peer mentor program. The host institution should retain four qualified upper division or graduate U.S. students who exhibit cultural sensitivity and an understanding of the Institute's objectives to serve as cultural interpreters and accompany the participants throughout the program. The mentors should reside in the dormitories or other campus housing with the participants.

Applicants should take into account that the participants may not be familiar with the American student-centered classroom approach and will have varying degrees of experience in expressing their opinions in a classroom environment. In this respect, all aspects of the Institute program should be designed to encourage the students to interact with each other and American counterparts.

3. The Summer Institute for European Student Leaders in Education will offer a group of twelve (12) European undergraduate students from a broad range of ethnic, religious and socio-economic backgrounds the opportunity to learn about the U.S. system of education at the primary, secondary and higher education levels through an integrated and uniquely designed program that focuses on the U.S. education system, American pedagogical practices, U.S. education policy, the openness of the U.S. higher education system, and integration and diversity in American schools. Participants will have completed at least two years of university studies in an education-related field. Recruitment and nomination of the participants will be managed by the Fulbright Commission in France, Germany, Spain, and the United Kingdom. ECA anticipates that the five-week Institute will begin mid-July 2009. Funding for the Education Institute will be up to $110,000, pending the availability of FY 2009 funds.

Guidelines: The program should be designed to support the following components:

(a) An academic program that will introduce participants to the U.S. system of education as described above, while interweaving the perspectives, experiences and current challenges facing the local educational system wherever appropriate. A component focused on familiarizing the participants with the United States should also be included that will require the students to explore key documents and important events and periods that have shaped the United States.

(b) A cultural component that complements and reinforces the academic component. Activities should include visits to schools, historical, and cultural sites of interest. This component should include plans for participants to be engaged in a community service activity one to two hours per week.

(c) An English language component designed to strengthen the English proficiency of all participants. While all program activities should aim to promote English-language learning, preparations should be in place to assist students through one-on-one or small group tutorials. The one-on-one and/or small group tutorials should be held several times a week throughout the duration of the Institute and will be mandatory for those participants deemed to require additional language instruction based on their English language assessment.

(d) A U.S. peer mentor program. The host institution should retain three (3) qualified upper division or graduate U.S. students who exhibit cultural sensitivity and an understanding of the Institute's objectives to serve as cultural interpreters and accompany the participants throughout the program.

Each of the three Institutes will be funded through a Cooperative Agreement. Please note that in a Cooperative Agreement, ECA/A/E/EUR is substantially involved in program

activities above and beyond routine monitoring. ECA/A/E/EUR's activities and responsibilities for all three Institutes are as follows:

○ ECA will select participants who are nominated by the participating Fulbright Commissions.

○ ECA will facilitate sending pre-arrival orientation materials electronically to participants via the participating Fulbright Commissions.

○ ECA will enroll all participants in the Accident and Sickness and Sickness Program for Exchanges (ASPE). This health benefits program will be of no cost to the host institutions. The host institutions will be responsible for the co-pays for medical treatment.

○ ECA will issue DS–2019s for the participants to enter the United States on J-visas.

○ ECA will organize debriefing sessions in Washington, DC, at the conclusion of the Institutes. All costs for the debriefing (travel to Washington, lodging, meals) will be the responsibility of the host institution and should be included in the proposal budget.

○ ECA will provide the host institution with biographical information about the participants and their travel itineraries.

Proposal Contents: Applicants should submit a complete and thorough proposal describing the Institute in a convincing and comprehensive manner. Please clearly indicate which Institute the proposal is being submitted for. Since there is no opportunity for applicants to meet with reviewing officials, the proposal should respond to the criteria set forth in the solicitation and other guidelines as clearly as possible.

II. Award Information

Type of Awards: Cooperative Agreements.

Fiscal Year Funds: 2009.

Approximate Total Funding:

Summer Institute for Norwegian Students in the Sciences: $200,000.

Summer Institute for European Student Leaders: $215,000.

Summer Institute for European Student Leaders in Education: $110,000.

Approximate Number of Awards: 3.

Anticipated Award Date: April 1, 2009.

Anticipated Project Completion Date: July 1, 2010.

Additional Information: Pending successful implementation of each program and the availability of funds in subsequent fiscal years, it is ECA's intent to renew the cooperative agreement for the Summer Institute for European Student Leaders and Summer Institute for European Student Leaders in Education for two additional fiscal years, before openly competing them again. **Please note that at this time,** the Summer Institute for Norwegian Students in the Sciences is a one-time opportunity.

III. Eligibility Information

III.1. Eligible applicants: Applications may be submitted by public and private non-profit organizations meeting the provisions described in Internal Revenue Code section 26 U.S.C. 501(c)(3).

III.2. Cost Sharing or Matching Funds: There is no minimum or maximum percentage required for this competition. However, the Bureau encourages applicants to provide maximum levels of cost sharing and funding in support of its programs.

When cost sharing is offered, it is understood and agreed that the applicant must provide the amount of cost sharing as stipulated in its proposal and later included in an approved grant agreement. Cost sharing may be in the form of allowable direct or indirect costs. For accountability, you must maintain written records to support all costs which are claimed as your contribution, as well as costs to be paid by the Federal government. Such records are subject to audit. The basis for determining the value of cash and in-kind contributions must be in accordance with OMB Circular A–110, (Revised), Subpart C.23—Cost Sharing and Matching. In the event you do not provide the minimum amount of cost sharing as stipulated in the approved budget, ECA's contribution will be reduced in like proportion.

III.3. Other Eligibility Requirements:

(a) Bureau grant guidelines require that organizations with less than four years experience in conducting international exchanges be limited to $60,000 in Bureau funding. ECA anticipates awarding three cooperative agreements, all in an amount excessive of $60,000 to support program and administrative costs required to implement this exchange program. Therefore, organizations with less than four years experience in conducting international exchanges are ineligible to apply under this competition. The Bureau encourages applicants to provide maximum levels of cost sharing and funding in support of its programs.

(b) Accredited, post-secondary educational institutions in the United States may submit proposals to administer one or more of the Institute programs but must submit separate proposals for each Institute.

IV. Application and Submission Information

Note: Please read the complete announcement before sending inquiries or submitting proposals. Once the RFGP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

IV.1 Contact Information To Request an Application Package: Please contact the Office of Academic Exchange Programs, European and Eurasian Programs, U.S. Department of State, SA–44, 301 4th Street, SW., Washington, DC 20547, 202–453–8524 to request a Solicitation Package. Please refer to the Funding Opportunity Number ECA/A/E/EUR 09–05 located at the top of this announcement when making your request. Alternatively, an electronic application package may be obtained from grants.gov. Please see section IV.3f for further information.

The Solicitation Package contains the Proposal Submission Instruction (PSI) document which consists of required application forms, and standard guidelines for proposal preparation.

It also contains the Project Objectives, Goals and Implementation (POGI) document, which provides specific information, award criteria and budget instructions tailored to this competition.

Please specify Carolina Chavez, Program Officer, and refer to the Funding Opportunity Number (ECA/A/E/EUR 09–05) located at the top of this announcement on all other inquiries and correspondence.

IV.2. To Download a Solicitation Package Via Internet: The entire Solicitation Package may be downloaded from the Bureau's Web site at *http://exchanges.state.gov/grants/open2.html,* or from the Grants.gov Web site at *http://www.grants.gov.*

Please read all information before downloading.

IV.3. Content and Form of Submission: Applicants must follow all instructions in the Solicitation Package. The application should be submitted per the instructions under IV.3f. *''Application Deadline and Methods of Submission'' section below.*

IV.3a. You are required to have a Dun and Bradstreet Data Universal Numbering System (DUNS) number to apply for a grant or cooperative agreement from the U.S. Government. This number is a nine-digit identification number, which uniquely identifies business entities. Obtaining a DUNS number is easy and there is no charge. To obtain a DUNS number, access *http://www.dunandbradstreet.com* or call 1–

866–705–5711. Please ensure that your DUNS number is included in the appropriate box of the SF–424 which is part of the formal application package.

IV.3b. All proposals must contain an executive summary, proposal narrative and budget. Please Refer to the Solicitation Package. It contains the mandatory Proposal Submission Instructions (PSI) document and the Project Objectives, Goals and Implementation (POGI) document for additional formatting and technical requirements.

IV.3c. You must have nonprofit status with the IRS at the time of application. **Please note:** Effective March 14, 2008, all applicants for ECA federal assistance awards must include with their application, a copy of page 5, Part V–A, ''Current Officers, Directors, Trustees, and Key Employees'' of their most recent Internal Revenue Service (IRS) Form 990, ''Return of Organization Exempt From Income Tax.'' If an applicant does not file an IRS Form 990, but instead files Schedule A (Form 990 or 990–EZ)—''Organization Exempt Under Section 501(c)(3),'' applicants must include with their application a copy of Page 1, Part 1, ''Compensation of the Five Highest Paid Employees Other Than Officers, Directors and Trustees,'' of their most recent Internal Revenue Service (IRS) Form—Schedule A (Form 990 or 990–EZ).

If your organization is a private nonprofit which has not received a grant or cooperative agreement from ECA in the past three years, or if your organization received nonprofit status from the IRS within the past four years, you must submit the necessary documentation to verify nonprofit status as directed in the PSI document. Failure to do so will cause your proposal to be declared technically ineligible.

IV.3d. Please take into consideration the following information when preparing your proposal narrative:

IV.3d.1 Adherence to All Regulations Governing the J Visa

The Bureau of Educational and Cultural Affairs places critically important emphases on the security and proper administration of the Exchange Visitor (J visa) Programs and adherence by grantees and sponsors to all regulations governing the J visa. Therefore, proposals should demonstrate the applicant's capacity to meet all requirements governing the administration of the Exchange Visitor Programs as set forth in 22 CFR 62, including the oversight of Responsible Officers and Alternate Responsible Officers, screening and selection of program participants, provision of pre-arrival information and orientation to participants, monitoring of participants, proper maintenance and security of forms, record-keeping, reporting and other requirements. ECA will be responsible for issuing DS–2019 forms to participants in this program.

A copy of the complete regulations governing the administration of Exchange Visitor (J) programs is available at *http://exchanges.state.gov* or from: United States Department of State, Office of Exchange Coordination and Designation, ECA/EC/ECD—SA–44, Room 734, 301 4th Street, SW., Washington, DC 20547, Telephone: (202) 203–5029, FAX: (202) 453–8640.

Please refer to Solicitation Package for further information.

IV.3d.2 Diversity, Freedom and Democracy Guidelines

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. ''Diversity'' should be interpreted in the broadest sense and encompass differences including, but not limited to, ethnicity, race, gender, religion, geographic location, socio-economic status, and disabilities. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the 'Support for Diversity' section for specific suggestions on incorporating diversity into your proposal. Public Law 104–319 provides that ''in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy,'' the Bureau ''shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries.'' Public Law 106–113 requires that the governments of the countries described above do not have inappropriate influence in the selection process. Proposals should reflect advancement of these goals in their program contents, to the full extent deemed feasible.

IV.3d.3. Program Monitoring and Evaluation

Proposals must include a plan to monitor and evaluate the project's success, both as the activities unfold and at the end of the program. The Bureau recommends that your proposal include a draft survey questionnaire or other technique plus a description of a methodology to use to link outcomes to original project objectives. The Bureau expects that the grantee will track participants or partners and be able to respond to key evaluation questions, including satisfaction with the program, learning as a result of the program, changes in behavior as a result of the program, and effects of the program on institutions (institutions in which participants work or partner institutions). The evaluation plan should include indicators that measure gains in mutual understanding as well as substantive knowledge.

Successful monitoring and evaluation depend heavily on setting clear goals and outcomes at the outset of a program. Your evaluation plan should include a description of your project's objectives, your anticipated project outcomes, and how and when you intend to measure these outcomes (performance indicators). The more that outcomes are ''smart'' (specific, measurable, attainable, results-oriented, and placed in a reasonable time frame), the easier it will be to conduct the evaluation. You should also show how your project objectives link to the goals of the program described in this RFGP.

Your monitoring and evaluation plan should clearly distinguish between program outputs and outcomes. Outputs are products and services delivered, often stated as an amount. Output information is important to show the scope or size of project activities, but it cannot substitute for information about progress towards outcomes or the results achieved. Examples of outputs include the number of people trained or the number of seminars conducted. Outcomes, in contrast, represent specific results a project is intended to achieve and is usually measured as an extent of change. Findings on outputs and outcomes should both be reported, but the focus should be on outcomes.

We encourage you to assess the following four levels of outcomes, as they relate to the program goals set out in the RFGP (listed here in increasing order of importance):

1. Participant satisfaction with the program and exchange experience.

2. Participant learning, such as increased knowledge, aptitude, skills, and changed understanding and attitude. Learning includes both substantive (subject-specific) learning and mutual understanding.

3. Participant behavior, concrete actions to apply knowledge in work or community; greater participation and responsibility in civic organizations; interpretation and explanation of experiences and new knowledge gained; continued contacts between participants, community members, and others.

4. Institutional changes, such as increased collaboration and partnerships, policy reforms, new programming, and organizational improvements.

Please note: Consideration should be given to the appropriate timing of data collection for each level of outcome. For example, satisfaction is usually captured as a short-term outcome, whereas behavior and institutional changes are normally considered longer-term outcomes.

Overall, the quality of your monitoring and evaluation plan will be judged on how well it (1) specifies intended outcomes; (2) gives clear descriptions of how each outcome will be measured; (3) identifies when particular outcomes will be measured; and (4) provides a clear description of the data collection strategies for each outcome (*i.e.*, surveys, interviews, or focus groups). (Please note that evaluation plans that deal only with the first level of outcomes [satisfaction] will be deemed less competitive under the present evaluation criteria.)

Grantees will be required to provide reports analyzing their evaluation findings to the Bureau in their regular program reports. All data collected, including survey responses and contact information, must be maintained for a minimum of three years and provided to the Bureau upon request.

IV.3e. Please take the following information into consideration when preparing your budget:

IV.3e.1. Applicants must submit a comprehensive budget for the entire program. Budget requests may not exceed the amounts stated in Section I. There must be a summary budget as well as breakdowns reflecting both administrative and program budgets. Applicants may provide separate sub-budgets for each program component, phase, location, or activity to provide clarification.

IV.3f. Application Deadline and Methods of Submission:

Application Deadline Date: February 26, 2009.

Reference Number: ECA/A/E/EUR 09–05.

Methods of Submission: Applications may be submitted in one of two ways:

(1) In hard-copy, via a nationally recognized overnight delivery service (*i.e.*, DHL, Federal Express, UPS, Airborne Express, or U.S. Postal Service Express Overnight Mail, etc.), or

(2) Electronically through *http://www.grants.gov.*

Along with the Project Title, all applicants must enter the above Reference Number in Box 11 on the SF–424 contained in the mandatory Proposal Submission Instructions (PSI) of the solicitation document.

IV.3f.1 Submitting Printed Applications

Applications must be shipped no later than the above deadline. Delivery services used by applicants must have in-place, centralized shipping identification and tracking systems that may be accessed via the Internet and delivery people who are identifiable by commonly recognized uniforms and delivery vehicles. Proposals shipped on or before the above deadline but received at ECA more than seven days after the deadline will be ineligible for further consideration under this competition. Proposals shipped after the established deadlines are ineligible for consideration under this competition. ECA will not notify you upon receipt of application. It is each applicant's responsibility to ensure that each package is marked with a legible tracking number and to monitor/confirm delivery to ECA via the Internet. Delivery of proposal packages may not be made via local courier service or in person for this competition. Faxed documents will not be accepted at any time. Only proposals submitted as stated above will be considered.

Important note: When preparing your submission please make sure to include one extra copy of the completed SF–424 form and place it in an envelope addressed to ''ECA/EX/PM''.

The original and 6 copies of the application should be sent to: U.S. Department of State, SA–44, Bureau of Educational and Cultural Affairs, Ref.: ECA/A/E/EUR–09–05, Program Management, ECA/EX/PM, Room 534, 301 4th Street, SW., Washington, DC 20547.

Applicants submitting hard-copy applications must also submit the ''Executive Summary'' and ''Proposal Narrative'' sections of the proposal in a Microsoft Word format on a CD–ROM.

IV.3f.2—Submitting Electronic Applications

Applicants have the option of submitting proposals electronically through Grants.gov (*http://www.grants.gov*). Complete solicitation packages are available at Grants.gov in the ''Find'' portion of the system. Please follow the instructions available in the ''Get Started'' portion of the site (*http://www.grants.gov/GetStarted*).

Several of the steps in the Grants.gov registration process could take several weeks. Therefore, applicants should check with appropriate staff within their organizations immediately after reviewing this RFGP to confirm or determine their registration status with Grants.gov.

Once registered, the amount of time it can take to upload an application will vary depending on a variety of factors including the size of the application and the speed of your Internet connection. Therefore, we strongly recommend that you not wait until the application deadline to begin the submission process through Grants.gov.

Direct all questions regarding Grants.gov registration and submission to: Grants.gov Customer Support,

Contact Center Phone: 800–518–4726,

Business Hours: Monday—Friday, 7a.m.–9p.m. Eastern Time, E-mail: *support@grants.gov.*

Applicants have until midnight (12 a.m.), Washington, DC time of the closing date to ensure that their entire application has been uploaded to the Grants.gov site. There are no exceptions to the above deadline. Applications uploaded to the site after midnight of the application deadline date will be automatically rejected by the Grants.gov system, and will be technically ineligible.

Applicants will receive a confirmation e-mail from Grants.gov upon the successful submission of an application. ECA will not notify you upon receipt of electronic applications.

It is the responsibility of all applicants submitting proposals via the Grants.gov Web portal to ensure that proposals have been received by Grants.gov in their entirety, and ECA bears no responsibility for data errors resulting from transmission or conversion processes.

IV.3g. Intergovernmental Review of Applications: Executive Order 12372 does not apply to this program.

V. Application Review Information

V.1. Review Process

The Bureau will review all proposals for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. All eligible proposals will be reviewed by the program office, as well as the Public Diplomacy section overseas, where appropriate. Eligible proposals will be subject to compliance with Federal and Bureau regulations and guidelines and forwarded to Bureau grant panels for advisory review. Proposals may also be reviewed by the Office of the Legal Adviser or by other Department elements. Final funding decisions are at the discretion of the Department of State's Assistant Secretary for Educational and Cultural Affairs. Final technical authority for cooperative

agreements resides with the Bureau's Grants Officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. Quality of Program Idea/Plan: Your proposal should exhibit originality, substance, precision, and relevance to the Bureau's mission. Detailed agenda and relevant work plan should demonstrate substantive undertakings and logistical capacity.

2. Ability to Achieve Overall Program Objectives: Objectives should be reasonable, feasible, and flexible. Your proposal should clearly demonstrate how the institution will meet the program's objectives and plan.

3. Support for Diversity: Your proposal should demonstrate substantive support of the Bureau's policy on diversity. Achievable and relevant features should be cited in both program administration (selection of presenters, program venue and program evaluation) and program content (orientation and wrap-up sessions, program meetings and resource materials).

4. Evaluation and Follow-Up: Your proposal should include a plan to evaluate the activity's success, both as the activities unfold and at the end of the program. Your proposal should also discuss provisions made for follow-up with returned grantees as a means of establishing longer-term individual and institutional linkages.

5. Cost-effectiveness/Cost-sharing: The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. Your proposal should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

6. Institutional Track Record/Ability: Your proposal should demonstrate an institutional record of successful exchange programs, including responsible fiscal management and full compliance with all reporting requirements for past Bureau grants as determined by Bureau Grants Staff. The Bureau will consider the past performance of prior recipients and the demonstrated potential of new applicants. Proposed personnel and institutional resources should be fully qualified to achieve the project's goals.

VI. Award Administration Information

VI.1a. Award Notices

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures. Successful applicants will receive an Assistance Award Document (AAD) from the Bureau's Grants Office. The AAD and the original grant proposal with subsequent modifications (if applicable) shall be the only binding authorizing document between the recipient and the U.S. Government. The AAD will be signed by an authorized Grants Officer, and mailed to the recipient's responsible officer identified in the application.

Unsuccessful applicants will receive notification of the results of the application review from the ECA program office coordinating this competition.

VI.2 Administrative and National Policy Requirements

Terms and Conditions for the Administration of ECA agreements include the following:

Office of Management and Budget Circular A–122, ''Cost Principles for Nonprofit Organizations.''

Office of Management and Budget Circular A–21, ''Cost Principles for Educational Institutions.''

OMB Circular A–87, ''Cost Principles for State, Local and Indian Governments''.

OMB Circular No. A–110 (Revised), Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and other Nonprofit Organizations.

OMB Circular No. A–102, Uniform Administrative Requirements for Grants-in-Aid to State and Local Governments.

OMB Circular No. A–133, Audits of States, Local Government, and Non-profit Organizations

Please reference the following Web sites for additional information: *http://www.whitehouse.gov/omb/grants; http://fa.statebuy.state.gov.*

VI.3. Reporting Requirements

You must provide ECA with a hard copy original plus one copy of the following reports:

(1) A final program and financial report no more than 90 days after the expiration of the award;

(2) A concise, one-page final program report summarizing program outcomes no more than 90 days after the expiration of the award. This one-page report will be transmitted to OMB, and be made available to the public via OMB's USAspending.gov Web site—as part of ECA's Federal Funding Accountability and Transparency Act (FFATA) reporting requirements.

Grantees will be required to provide reports analyzing their evaluation findings to the Bureau in their regular program reports. (Please refer to IV. Application and Submission Instructions (IV.3.d.3) above for Program Monitoring and Evaluation information.

(3) A SF–PPR, ''Performance Progress Report'' Cover Sheet with all program reports.

All data collected, including survey responses and contact information, must be maintained for a minimum of three years and provided to the Bureau upon request.

All reports must be sent to the ECA Grants Officer and ECA Program Officer listed in the final assistance award document.

VII. Agency Contacts

For questions about this announcement, contact: Carolina Chavez, ECA/A/E/EUR, Room 246, ECA/A/E/EUR 09–05, U.S. Department of State, SA–44, 301 4th Street, SW., Washington, DC 20547, 202–453–8524, *ChavezCC@state.gov.*

All correspondence with the Bureau concerning this RFGP should reference the above title and number ECA/A/E/EUR 09–05.

Please read the complete announcement before sending inquiries or submitting proposals. Once the RFGP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

VIII. Other Information

Notice: The terms and conditions published in this RFGP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFGP does not constitute an award commitment on the part of the Government. The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements per section VI.3 above.

Goli Ameri,

Assistant Secretary for Educational and Cultural Affairs, Department of State.

[FR Doc. E8–30128 Filed 12–17–08; 8:45 am]

BILLING CODE 4710–05–P

DEPARTMENT OF STATE

[Public Notice 6458]

Policy of Denial Regarding ITAR Regulated Activities of EP Investments, LLC (a/k/a Blackwater)

AGENCY: Department of State.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Department of State has imposed a policy of denial with certain exceptions concerning EP Investments, LLC pursuant to section 38 of the Arms Export Control Act (AECA) (22 U.S.C. 2778) and section 126.7 of the International Traffic in Arms Regulations (ITAR). The Department of State is providing this information as a matter of courtesy to interested parties given the specific circumstances presented.

DATES: *Effective Date:* December 2, 2008.

FOR FURTHER INFORMATION CONTACT: David C. Trimble, Director, Office of Defense Trade Controls Compliance, Directorate of Defense Trade Controls, Bureau of Political-Military Affairs, Department of State (202) 663–2807.

SUPPLEMENTARY INFORMATION: Section 126.7 of the ITAR provides that any application for an export license or other approval under the ITAR may be disapproved, and any license or other approval or exemption granted may be revoked, suspended, or amended without prior notice whenever, among other things, the Department of State believes that 22 U.S.C. 2778, any regulation contained in the ITAR, or the terms of any U.S. Government export authorization (including the terms of a manufacturing license or technical assistance agreement, or export authorization granted pursuant to the Export Administration Act, as amended) has been violated by any party to the export or other person having a significant interest in the transaction; or whenever the Department of State deems such action to be in furtherance of world peace, the national security or the foreign policy of the United States, or is otherwise advisable.

The Department of State has determined that a policy of denial regarding EP Investments, LLC (a/k/a Blackwater and hereafter referred to as EPI), including its subsidiaries or associated companies, is necessary to provide the U.S. Government with assurance that EPI is both capable and willing to comply with the AECA and ITAR and will do so. The Department recognizes the recent steps taken by EPI to improve its compliance program, for example setting up the Export Compliance Committee (ECC), and has tailored the policy of denial accordingly to leverage these measures by permitting certain exceptions to be made. The policy of denial is as follows:

(1) There is a presumption of denial for all new authorizations submitted by EPI, except concerning applications for licenses and other approvals that are in direct support to the U.S. Government, provided that EPI, or one of its subsidiaries listed in its registration, has a direct contract with the U.S. Government, and:

(a) Along with each application, EPI's Export Compliance Committee (ECC) submits a letter certifying to the accuracy of the information in the submission, and that the training and internal controls necessary to implement the authorization are in place;

(b) For each authorization, the ECC must provide reports to the Office of Defense Trade Controls Compliance (DTCC) thirty (30) and then sixty (60) days after export activities have commenced certifying that all provisions of the approval have been complied with, all training necessary to implement the authorization was done, and that appropriate internal controls are in place.

(2) All other new authorizations, those that are not in direct support of a U.S. Government contract, are subject to a presumption of denial. Transaction exception requests will be considered on a case by case basis as follows:

(a) The request for an exception to the denial policy must address why the request is based on overriding U.S. national security, foreign policy or law enforcement grounds or present other compelling reasons;

(b) Along with the request for an exception, the ECC must submit a letter certifying to the accuracy of the information in the application submission, and that the training and internal controls necessary to implement the authorization are in place; and

(c) If the transaction exception is granted, for each authorization, the ECC must provide reports to DTCC thirty (30) and then sixty (60) days after export activities have commenced certifying that all provisions of the approval have been complied with, all training necessary to implement the authorization was done, and that the appropriate internal controls are in place.

(3) EPI, including all of its subsidiaries, are considered ineligible to use ITAR exemptions. Transaction exception requests to use ITAR exemptions will be accepted and considered on a case by case basis.

(4) Current authorizations, licenses in support of current authorizations and minor amendments to existing authorizations will not be subject to a policy of denial.

Dated: December 11, 2008.

Frank J. Ruggiero,

Acting Assistant Secretary of State for Political Military Affairs, Department of State.

BILLING CODE 4710–25–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Availability of Draft Advisory Circulars, Other Policy Documents and Proposed Technical Standard Orders

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Availability.

SUMMARY: The FAA's Aviation Safety, an organization responsible for the certification, production approval, and continued airworthiness of aircraft, and certification of pilots, mechanics, and others in safety related positions, publishes proposed non-regulatory documents that are available for public comment on the Internet at *http://www.faa.gov/aircraft/draft_docs/*.

DATES: We must receive comments on or before the due date for each document as specified on the Web site.

ADDRESSES: Send comments on proposed documents to the FAA at the address specified on the Web site for the document you comment on, to the attention of the individual and office identified as point of contact for the document.

FOR FURTHER INFORMATION CONTACT: The individual or FAA office identified on the Web site for the specified document.

SUPPLEMENTARY INFORMATION: Final Advisory Circulars (ACs), other policy documents, and Technical Standard Orders (TSOs), including final documents published by the Aircraft Certification Service, are available on FAA's Regulatory and Guidance Library (RGL) at *http://rgl.faa.gov/*.

Comments Invited

You will find draft ACs, other policy documents, and proposed TSOs currently offered by Aviation Safety on FAA ''Aviation Safety Draft Documents Open for Comment'' Web site at *http://www.faa.gov/aircraft/draft_docs/*. We do not publish an individual **Federal**

Register Notice for each document we make available for public comment on the Web site. The FAA invites comments on these draft documents. When commenting on draft ACs, other policy documents or proposed TSOs, you should identify the document by its number. The Aviation Safety organization will consider all comments received on or before the closing date before issuing a final document. For Internet retrieval assistance, contact the AIR Web Content Program Manager at (202) 267–3074.

To obtain a paper copy of the draft document or proposed TSO, contact the individual or FAA office responsible for the document as identified on the Web site.

Background

This is a recurring Notice of Availability, and request for comments, on draft ACs, other policy documents, and proposed TSOs currently offered by Aviation Safety on the Web site at *http://www.faa.gov/aircraft/draft_docs/*. On the Web site, you may subscribe to receive e-mail notification when new draft documents are made available. This notice of availability and request for comments on FAA Aviation Safety draft documents will appear again in 180 days.

Issued in Washington, DC on December 10, 2008.

Jennifer Arquilla,

Manager, Planning and Program Management Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Public Availability of an Environmental Assessment (EA) and Finding of No Significant Impact/ Record of Decision (FONSI/ROD) for Proposed Northeast Cargo Area Improvements at Chicago O'Hare International Airport (ORD) Located in Chicago, IL

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of Availability of an EA and FONSI/ROD for Proposed Northeast Cargo Area Improvements at Chicago O'Hare International Airport.

SUMMARY: The FAA is making available the EA and FONSI/ROD for Proposed Northeast Cargo Area Improvements at Chicago O'Hare International Airport. The EA was prepared in accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, FAA Orders 1050.1E, ''Environmental Impacts: Policies and Procedures'' and FAA Order 5050.4B, ''NEPA Implementing Instructions for Airport Actions''. The FONSI/ROD contains FAA's findings that no significant environmental impacts would result from the project and contains all needed approvals for the action to proceed.

Point of Contact: Ms. Amy Hanson, Environmental Protection Specialist, CHI–603, Federal Aviation Administration, Chicago Airport District Office, 2300 East Devon Avenue, Des Plaines, IL 60018. Telephone number: 847–294–7354.

SUPPLEMENTARY INFORMATION: The FAA is making an EA and FONSI/ROD for the evaluation of environmental impacts associated with the proposed Northeast Cargo Area Improvements for the Chicago O'Hare International Airport (the Airport), located in Chicago, Illinois. The proposed project consists of developing a consolidated cargo complex that groups multiple cargo warehouses around a shared apron with airfield access, parking/truck docks, and landside access over approximately 122 acres in the Northeast Quadrant/former military area of the existing airfield. The project is proposed to be completed in three phases (Phases 1, 2, and 3). The Proposed Action would consolidate the proposed collateral development parcels identified on the Approved ALP in the Northeast Quadrant and maintain the current alignment of Bessie Coleman Drive (different from the approved ALP) to provide a contiguous area for cargo facility development. The proposed project would not cause significant impacts to any of the environmental resources evaluated in the EA and the FONSI/ROD contains all needed approvals for the action to proceed. Further information is available from the point of contact listed above. These documents will be available for public review during normal business hours at the Chicago Airport District Office, 2300 East Devon Avenue, Des Plaines, IL 60018. Please call the point of contact prior to visiting this office.

Issued in Des Plaines, Illinois, November 26, 2008.

James G. Keefer,

Manager, Chicago Airport District Office, FAA, Great Lakes Region.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Request To Release Airport Property at Ellington Field, Houston, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of request to release airport property.

SUMMARY: The FAA proposes to rule and invites public comment on the release of land at the Ellington Field under the provisions of Section 125 of the Wendell H. Ford Aviation Investment Reform Act for the 21st Century (AIR 21).

DATES: Comments must be received on or before January 20, 2009.

ADDRESSES: Comments on this application may be mailed or delivered to the following address: Mr. Mike Nicely, Manager, Federal Aviation Administration, Southwest Region, Airports Division, Texas Airports Development Office, ASW–650, Fort Worth, Texas 76193–0650.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Richard Vacar, Director of Aviation, at the following address: City of Houston, Department of Aviation, 16930 JFK Blvd., Houston, Texas 77032.

FOR FURTHER INFORMATION CONTACT: Mr. Ben Guttery, Senior Program Manager, Federal Aviation Administration, Texas Airports Development Office, ASW–650, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0650, Telephone: (817) 222–5614, E-mail: *ben.guttery@faa.gov*, Fax: (817) 222–5989.

The request to release property may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA invites public comment on the request to release property at Ellington Field under the provisions of the AIR 21.

On December 9, 2008, the FAA determined that the request to release property at Ellington Field, submitted by the City, met the procedural requirements of the Federal Aviation Regulations, Part 155.

The following is a brief overview of the request: The City of Houston requests the release of 12.00 acres of non-aeronautical use airport property. The land was part of two General Services Administration deeds of property and a sale to the City in 1984. The funds generated by the release will be used for upgrading, maintenance,

operation and development of the airport.

Any person may inspect the request in person at the FAA Office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents relevant to the application in person at Ellington Field in Houston, Texas, telephone number 713–847–4200.

Issued in Fort Worth, Texas on December 9, 2008.

Kelvin L. Solco,

Manager, Airports Division.

Third Meeting—RTCA Special Committee 217/EUROCAE WG 44—Airport Mapping Databases

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of RTCA Special Committee 217 meeting: Airport Mapping Databases.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of RTCA Special Committee 217 meeting: Airport Mapping Databases

DATES: The meeting will be held on January 26–30, 2009, from 9 a.m. to 5 p.m.

ADDRESSES: The meeting will be held at Honeywell, 21111 N. 19th Avenue, Phoenix, AZ 85036–1111, Contact: Allan Hart, Telephone: Office: 602–436–1098, Cell: 602–317–5414, Fax: 602–822–7333.

FOR FURTHER INFORMATION CONTACT: RTCA Secretariat, 1828 L Street, NW., Suite 805, Washington, DC 20036–5133; telephone (202) 833–9339; fax (202) 833–9434; Web site *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., Appendix 2), notice is hereby given for a Special Committee 217 meeting. The agenda will include:

26 January

- Opening Plenary (Chairmen's remarks and introductions)
- Review and approve meeting agenda
- Review and approval of meeting minutes of previous meeting
- Discussion
- Schedule for this week
- Schedule for next meetings
- Action Items
- Presentations
- Final Review and Comments (FRAC) process

27 January

- Final Review and Comments (FRAC) process

28 January

- Final Review and Comments (FRAC) process
- Begin work on revisions to DO–272, DO–276 and DO–291
- Review new Terms of Reference for application to new work
- Determine need for subgroups
- Presentations as appropriate

29 January

- Work on revisions to DO–272, DO–276, and DO–291

30 January

- Work on revisions to DO–272, DO–276, and DO–291
- Plenary Session
- Summarize action items
- Determine and agree on action plan
- Closing Plenary (Meeting Plans and Dates, Other Business)

Attendance is open to the interested public but limited to space availability. With the approval of the chairmen, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on December 11, 2008.

Francisco Estrada C.,

RTCA Advisory Committee.

Federal Aviation Administration

1st Meeting—Special Committee 222—Inmarsat Aeronautical Mobile Satellite (Route) Services

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of RTCA Special Committee 222 meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of RTCA Special Committee 222: Inmarsat Aeronautical Mobile Satellite (Route) Services.

DATES: The meeting will be held January 15–16, 2009 from: 1 p.m. to 5:30 p.m. January 15 and 8 a.m. to Noon on January 16.

ADDRESSES: The meeting will be held at Cocoa Beach Hilton, Cocoa Beach, FL. (This meeting is held in conjunction with the AEEC Air-Ground Communications Subcommittee meeting.) For hotel information and driving directions see *http://www.aviation-ia.com/events/AirGroundAnnounce.pdf*

FOR FURTHER INFORMATION CONTACT: RTCA Secretariat, 1828 L Street, NW, Suite 805, Washington, DC 20036; telephone (202) 833–9339; fax (202) 833–9434; Web site *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., Appendix 2), notice is hereby given for a Special Committee 222, Inmarsat Aeronautical Mobile Satellite (Route) Services. The agenda will include:

January 15

- Opening Plenary Session (Greetings and Introductions).
- RTCA specific information: Presented by Dr. LaBerge.
- Overview of activity background.
- Background on ICAO/RTCA NGSS process.
- Background on MSV Auxiliary Terrestrial Component (ATCt) technology.
- Background on DO–210D issues.
- Review of Authorizing Document (Terms of Reference) as approved by Program Management Committee on October 2, 2008.
- Discussion of and action on committee planning items in Terms of Reference (TOR).
- Discussion of technical items as developed in Agenda Item 4.
- Technical approach to ATCt assessment: basic methodology, structure, effect on and input to RTCA documents.
- Technical approach to Swift Broadband AMS(R)S: basic methodology, structure, documents to be prepared, etc.

Discussions continued on Friday, as necessary.

January 16

- SC–222 work task organization and working groups, if necessary
- Discussion of proprietary issues, if any. RTCA, Inc. has specific policies regarding the inclusion of proprietary technology in an RTCA Standard document. This discussion will provide a preliminary look at whether the

proprietary policies of RTCA will be relevant to the SC–222 deliberations.

• Discussion of meeting summary, if necessary

• Schedule next meeting, adjourn (No later than January 16, Noon)

Attendance is open to the interested public but limited to space availability. With the approval of the chairmen, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC on December 11, 2008.

Francisco Estrada C.,

RTCA Advisory Committee.

Federal Aviation Administration

Membership Availability in the National Parks Overflights Advisory Group Aviation Rulemaking Committee—Representative of Native American Tribes

ACTION: Notice.

SUMMARY: The National Park Service (NPS) and the Federal Aviation Administration (FAA), as required by the National Parks Air Tour Management Act of 2000, established the National Parks Overflights Advisory Group (NPOAG) in March 2001. The NPOAG was formed to provide continuing advice and counsel with respect to commercial air tour operations over and near national parks and adjacent tribal lands. This notice informs the public of a vacancy (due to completion of membership on April 2, 2009) on the NPOAG (now the NPOAG Aviation Rulemaking Committee (ARC) for a representative of Native American tribal concerns and invites interested persons to apply to fill the vacancy. A previous notice was published in the **Federal Register** on October 16, 2008. but did not draw adequate response from any interested individuals. This notice is being re-published to identify qualified candidates to fill the position.

DATES: Persons interested in serving on the NPOAG ARC should contact Mr. Barry Brayer in writing and postmarked or e-mailed on or before February 10, 2009.

FOR FURTHER INFORMATION CONTACT: Barry Brayer, AWP–1SP, Special Programs Staff, Federal Aviation Administration, Western-Pacific Region Headquarters, P.O. Box 92007, Los Angeles, CA 90009–2007, telephone: (310) 725–3800, e-mail: *Barry.Brayer@faa.gov*.

SUPPLEMENTARY INFORMATION:

Background

The National Parks Air Tour Management Act of 2000 (the Act) was enacted on April 5, 2000, as Public Law 106–181. The Act required the establishment of the advisory group within 1 year after its enactment. The advisory group was established in March 2001, and is comprised of a balanced group of representatives of general aviation, commercial air tour operations, environmental concerns, and Native American tribes. The Administrator of the FAA and the Director of NPS (or their designees) serve as ex officio members of the group. Representatives of the Administrator and Director serve alternating 1-year terms as chairman of the advisory group.

The advisory group provides ''advice, information, and recommendations to the Administrator and the Director—

(1) On the implementation of this title [the Act] and the amendments made by this title;

(2) On commonly accepted quiet aircraft technology for use in commercial air tour operations over a national park or tribal lands, which will receive preferential treatment in a given air tour management plan;

(3) On other measures that might be taken to accommodate the interests of visitors to national parks; and

(4) At the request of the Administrator and the Director, safety, environmental, and other issues related to commercial air tour operations over a national park or tribal lands.''

Members of the advisory group may be allowed certain travel expenses as authorized by section 5703 of Title 5, United States Code, for intermittent Government service.

By FAA Order No. 1110–138, signed by the FAA Administrator on October 10, 2003, the NPOAG became an Aviation Rulemaking Committee (ARC). FAA Order No. 1110–138, was amended and became effective as FAA Order No. 1110–1 38A, on January 20, 2006.

The current NPOAG ARC is made up of one member representing general aviation, three members representing the air tour industry, four members representing environmental concerns, and two members representing Native American interests. Current members of the NPOAG ARC are: Randy Kenagy, Aircraft Owners and Pilots Association; Alan Stephen, fixedwinged air tour operator representative; Elling Halvorson, Papillon Airways, Inc.; Matthew Zuccaro, Helicopters Association International; Chip Dennerlein, Siskiyou Project; Gregory Miller, American Hiking Society; Kristen Brengel, The Wilderness Society; Don Barger, National Parks Conservation Association; Rory Majenty, Hualapai Nation; and Richard Deertrack, Taos Pueblo.

Public Participation in the NPOAG ARC

In order to retain balance within the NPOAG ARC, the FAA and NPS invite persons interested in serving on the ARC to represent Native American tribes, to contact Mr. Barry Brayer (contact information is written above in **FOR FURTHER INFORMATION CONTACT**).

Requests to serve on the ARC must be made to Mr. Brayer in writing and postmarked or e mailed on or before February 10, 2009. The request should indicate whether or not you are a member of an association or group related to Native American tribal issues or concerns or have another affiliation with issues relating to air tour flights over national parks and adjacent tribal lands The request should also state what expertise you would bring to the NPOAG ARC as related to tribal concerns. The term of service for NPOAG ARC members is 3 years.

Issued in Hawthorne, CA on December 8, 2008.

Barry Brayer,

NPOAG Chairman, Manager, Special Programs Staff, Western-Pacific Region.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2008–0176]

Agency Information Collection Activities: Notice of Request for Renewal of Two Previously Approved Information Collections

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval to renew two information collections, which are summarized below under **SUPPLEMENTARY INFORMATION**. We

published a **Federal Register** Notice with a 60-day public comment period on this information collection on October 30, 2008. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by January 20, 2009.

ADDRESSES: You may submit comments identified by Docket ID Number FHWA–2008–0176 by any of the following methods:

Web Site: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov*. Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title 1: A Guide to Reporting Highway Statistics.

OMB Control Number: 2125–0032.

Abstract: A Guide to Reporting Highway Statistics provides for the collection of information by describing policies and procedures for assembling highway related data from the existing files of State agencies. The data includes motor-vehicle registration and fees, motor-fuel use and taxation, driver licensing, and highway taxation and finance. Federal, State, and local governments use the data for transportation policy discussions and decisions. Motor-fuel data are used in attributing receipts to the Highway Trust Fund and subsequently in the apportionment formula that are used to distribute Federal-Aid Highway Funds. The data are published annually in the FHWA's Highway Statistics. Information from Highway Statistics is used in the joint FHWA and Federal Transit Administration required biennial report to Congress, Status of the Nation's Highways, Bridges, and Transit: Conditions and Performance, which contrasts present status to future investment needs.

Respondents: State and local governments of the 50 States, the District of Columbia and the Commonwealth of Puerto Rico.

Estimated Average Burden per Response: The estimated average reporting burden per response for the annual collection and processing of the data is 825 hours for each of the States (including local governments), the District of Columbia and the Commonwealth of Puerto Rico.

Estimated Total Annual Burden: The estimated total annual burden for all respondents is 42,900 hours.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Erickson, (202) 366–9235, Department of Transportation, Federal Highway Administration, Office of Policy, Office of Highway Policy Information, Highway Funding and Motor Fuels Division (HPPI–10), 1200 New Jersey Avenue, SE., Washington, DC 20590. Office hours are from 7 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Title 2: Highway Performance Monitoring System (HPMS).

OMB Control Number: 2125–0028.

Abstract: The HPMS data that is collected is used for management decisions that affect transportation, including estimates of the Nation's future highway needs and assessments of highway system performance. The information is used by the FHWA to develop and implement legislation and by State and Federal transportation officials to adequately plan, design, and administer effective, safe, and efficient transportation systems. This data is essential to the FHWA and Congress in evaluating the effectiveness of the Federal-aid highway program. The HPMS also provides miles, lane-miles and travel components of the Federal-Aid Highway Fund apportionment formulae. The data that is required by the HPMS is continually reassessed and streamlined by the FHWA.

Respondents: State governments of the 50 States, the District of Columbia and the Commonwealth of Puerto Rico.

Estimated Average Burden per Response: The estimated average burden per response for the annual collection and processing of the HPMS data is 1,440 hours for each State, the District of Columbia and the Commonwealth of Puerto Rico.

Estimated Total Annual Burden: The estimated total annual burden for all respondents is 74,880 hours.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Rozycki, (202) 366–5059, Department of Transportation, Federal Highway Administration, Highway Systems Performance (HPPI–20), Office of Highway Policy Information, Office of Policy & Governmental Affairs, 1200 New Jersey Avenue, SE., Washington, DC 20590. Office hours are from 7:30 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

Public Comments Invited

You are asked to comment on any aspect of these information collections, including: (1) Whether the proposed collections are necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burdens could be minimized, including use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of these information collections.

Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78) or you may visit *http://dms.dot.gov*.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Ch. 35, as amended; and 49 CFR 1.48.

Issued on: December 12, 2008.

Tina Campbell,

Acting Chief, Management Programs and Analysis Division.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on State Highway 99 (Segment F–1) in Texas

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Limitation on Claims for Judicial Review of Actions by FHWA and Other Federal Agencies.

SUMMARY: This notice announces actions taken by the FHWA and other Federal agencies that are final within the meaning of 23 U.S.C. 139(l)(1). The actions relate to a proposed highway project, Grand Parkway (State Highway 99) Segment F–1, from United States Highway 290 (U.S. 290) to State Highway 249 (S.H. 249) in Harris County, Texas. Those actions grant licenses, permits, and approvals for the project.

DATES: By this notice, the FHWA is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions on the highway project will be barred unless the claim is filed on or before June 16, 2009. If the Federal law that authorizes judicial review of a claim provides a time period of less than 180 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Mr. Gregory Punske, P.E., District Engineer, District B (South), Federal Highway Administration, 300 East 8th Street, Room 826 Austin, Texas 78701; telephone: (512) 536–5960; e-mail: *gregory.punske@fhwa.dot.gov.* The FHWA Texas Division Office's normal business hours are 7:45 a.m. to 4:15 p.m. (central time) Monday through Friday. You may also contact Dianna Noble, P.E., Texas Department of Transportation, Environmental Affairs Division, 118 E. Riverside Drive, Austin, Texas 78704; telephone: (512) 416–2734; e-mail: *dnoble@dot.state.tx.us.* The Texas Department of Transportation's normal business hours are 8 a.m. to 5 p.m. (central time) Monday through Friday.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the FHWA and other Federal agencies have taken final agency actions by issuing licenses, permits, and approvals for the following highway project in the State of Texas: Grand Parkway (State Highway 99) Segment F–1 from U.S. 290 to S.H. 249 in Harris County; FHWA Project Reference Number: FHWA–TX–EIS–03–01–F. The project will be a 19.3 km (12.0 mi) long, four-lane controlled access toll road with intermittent frontage roads, grade-separated intersections with exit and entrance ramps at four intersecting roadways, and elevated directional interchanges at State Highway 99 and U.S. 290 and State Highway 99 and U.S. 249. It will begin in northwestern Harris County at U.S. 290. It will then proceed north then west through Harris County and end at U.S. 249. The purpose of the project is to efficiently link the suburban communities and major roadways, enhance mobility and safety, and respond to economic growth. The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Final Environmental Impact Statement (FEIS) for the project, approved on April 18, 2008, in the FHWA Record of Decision (ROD) issued on November 20, 2008 and in other documents in the FHWA administrative record. The FEIS, ROD, and other documents in the FHWA administrative record file are available by contacting the FHWA or the Texas Department of Transportation at the addresses provided above. The FHWA FEIS and ROD can be viewed and downloaded from the Grand Parkway Association Web site at *http://www.grandpky.com/segments/f-1/.*

This notice applies to all Federal agency decisions as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. General: National Environmental Policy Act (NEPA) [42 U.S.C. 4321–4335]; Federal-Aid Highway Act [23 U.S.C. 109].

2. Air: Clean Air Act, 42 U.S.C. 7401–7671(q).

3. Land: Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303].

4. Wildlife: Endangered Species Act [16 U.S.C. 1531–1544] Fish and Wildlife Coordination Act [16 U.S.C. 661–667(d)], Migratory Bird Treaty Act [16 U.S.C. 703–712].

5. Historic and Cultural Resources: Section 106 of the National Historic Preservation Act of 1966, as amended [16 U.S.C. 470(f) et seq.]; Archeological Resources Protection Act of 1977 [16 U.S.C. 470(aa)–(11)]; Archeological and Historic Preservation Act [16 U.S.C. 469–469(c)].

6. Social and Economic: Civil Rights Act of 1964 [42 U.S.C. 2000(d)–2000(d)(1)]; Farmland Protection Policy Act (FPPA) [7 U.S.C. 4201–4209].

7. Wetlands and Water Resources: Clean Water Act, 33 U.S.C. 1251–1342; Land and Water Conservation Fund (LWCF), 16 U.S.C. 4601–4604.

8. Executive Orders: E.O. 11990 Protection of Wetlands; E.O. 11988 Floodplain Management; E.O. 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations; E.O. 11514 Protection and Enhancement of Environmental Quality.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. 139(l)(1).

Issued on: December 12, 2008.

Gregory S. Punske,

District Engineer, Austin.

BILLING CODE 4910–RY–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2008–0189]

Notice of Cancelation of Public Meeting; BMW Mini Cooper S Vehicles; Exhaust Pipe Tips

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of cancelation of public meeting.

SUMMARY: This notice announces a cancelation of NHTSA's December 17, 2008, public meeting regarding its Initial Decision that model year (MY) 2007 and certain MY 2008 BMW Mini Cooper S vehicles (subject vehicles) contain a defect related to motor vehicle safety in the vehicle's exhaust pipe tips.

FOR FURTHER INFORMATION CONTACT: AnnaLisa Nash, Office of Chief Counsel, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590; (202) 366–5263.

SUPPLEMENTARY INFORMATION: NHTSA's public meeting regarding its Initial Decision that model year (MY) 2007 and certain MY 2008 BMW Mini Cooper S vehicles (subject vehicles) contain a defect related to motor vehicle safety in the vehicle's exhaust pipe tips, previously scheduled for Wednesday, December 17, 2008,[1] is now canceled. The matter is moot. On December 12, 2008, BMW of North America, LLC (BMW) submitted a Defect and Noncompliance Information Report to NHTSA under 49 CFR 573.6. BMW has thus initiated a safety recall on the subject vehicles within the meaning of the 49 U.S.C. 30118–30120 and 49 CFR Part 573.

Authority: 49 U.S.C. 30118(a), (b); delegations of authority at 49 CFR 1.50(a) and 49 CFR 501.8.

Issued on: December 12, 2008.

Daniel C. Smith,

Associate Administrator for Enforcement.

[1] The agency published notice of the meeting on Friday, December 5, 2008 (Initial Decision That Certain BMW Mini Cooper S Vehicles Contain a Safety-Related Defect Regarding the Exhaust Pipe Tips; and Scheduling of a Public Meeting, 73 FR 235 (noticed Dec. 5, 2008)).

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2008–0184; Notice 1]

Goodyear Tire and Rubber Company, Receipt of Petition for Decision of Inconsequential Noncompliance

Goodyear Tire and Rubber Company (Goodyear), has determined that certain passenger car tires manufactured from June 2, 2008 through July 10, 2008 did not fully comply with paragraphs S5.5(e) and S5.5(f) of Federal Motor Vehicle Safety Standards (FMVSS) No. 139 *New Pneumatic Radial Tires for Light Vehicles.* Goodyear has filed an appropriate report pursuant to 49 CFR Part 573, *Defect and Noncompliance Responsibility and Reports.*

Pursuant to 49 U.S.C. 30118(d) and 30120(h) (see implementing rule at 49 CFR part 556), Goodyear has petitioned for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of Goodyear's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Affected are approximately 112 size P265/60R18 109S Dunlop Rover AT passenger car tires manufactured from June 2, 2008 through July 10, 2008.

Paragraphs S5.5(e) and S5.5(f) of FMVSS No. 139 require in pertinent part:

S5.5 Tire markings. Except as specified in paragraphs (a) through (i) of S5.5, each tire must be marked on each sidewall with the information specified in S5.5(a) through (d) and on one sidewall with the information specified in S5.5(e) through (i) according to the phase-in schedule specified in S7 of this standard. The markings must be placed between the maximum section width and the bead on at least one sidewall, unless the maximum section width of the tire is located in an area that is not more than one-fourth of the distance from the bead to the shoulder of the tire. If the maximum section width falls within that area, those markings must appear between the bead and a point one-half the distance from the bead to the shoulder of the tire, on at least one sidewall. The markings must be in letters and numerals not less than 0.078 inches high and raised above or sunk below the tire surface not less than 0.015 inches * * *

(e) The generic name of each cord material used in the plies (both sidewall and tread area) of the tire;

(f) The actual number of plies in the sidewall, and the actual number of plies in the tread area, if different * * *

Goodyear explains that the noncompliance is that, due to a mold labeling error, the sidewall marking incorrectly describes the plies in the tread area of the tires.

Specifically, the tires in question were inadvertently manufactured with ''Tread 2 Polyester + 2 Steel + 1 Nylon'' marked on the sidewall. The labeling should have been ''Tread 2 Polyester + 2 Steel.''

Goodyear makes the argument that this noncompliance is inconsequential to motor vehicle safety because the noncompliant sidewall marking does not affect the safety of the tire and that the tires were built as designed and all other sidewall identification markings and safety information is correct.

Goodyear points out that NHTSA has previously granted petitions for sidewall marking noncompliances that it believes are similar to the instant noncompliance.

Goodyear also stated that it has corrected the problem that caused these errors so that they will not be repeated in future production.

In summation, Goodyear states that it believes that because the noncompliances are inconsequential to motor vehicle safety that no corrective action is warranted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, these provisions only apply to vehicles and equipment that have already passed from the manufacturer to an owner, purchaser, or dealer.

Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited at the beginning of this notice and be submitted by any of the following methods:

a. By mail addressed to: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

b. By hand delivery to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except Federal Holidays.

c. Electronically: by logging onto the Federal Docket Management System (FDMS) Web site at *http://www.regulations.gov/.* Follow the online instructions for submitting comments. Comments may also be faxed to 1–202–493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that your comments were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

You may view documents submitted to a docket at the address and times given above. You may also view the documents on the Internet at *http://www.regulations.gov* by following the online instructions for accessing the dockets available at that Web site.

The petition, supporting materials, and all comments received before the close of business on the closing date indicated below will be filed and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: January 20, 2009.

Authority: 49 U.S.C. 30118, 30120: delegations of authority at CFR 1.50 and 501.8.

Issued on: December 10, 2008.

Claude H. Harris,

Director, Office of Vehicle Safety Compliance.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Office of Hazardous Materials Safety; Notice of Applications for Modification of Special Permit

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: List of Applications for Modification of Special Permit.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation's Hazardous Material Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the application described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Request of modifications of special permits (e.g., to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) are described in footnotes to the application number. Application numbers with the suffix ''M'' denote a modification request. These applications have been separated from the new application for special permits to facilitate processing.

DATES: Comments must be received on or before January 2, 2009.

Address Comments to: Record Center, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC 20590. Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Records Center, East Building, PHH–30, 1200 New Jersey Avenue Southeast, Washington DC or at *http://dms.dot.gov*.

This notice of receipt of applications for modification of special permit is published in accordance with Part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on December 11, 2008.

Delmer F. Billings,

Director, Office of Hazardous Materials, Special Permits and Approvals.

RIN 1205–AB55

Temporary Agricultural Employment of H–2A Aliens in the United States; Modernizing the Labor Certification Process and Enforcement

AGENCY: Employment and Training Administration, and Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: The Department of Labor (DOL or Department) is amending its regulations regarding the certification for the temporary employment of nonimmigrant workers in agricultural occupations on a temporary or seasonal basis, and the enforcement of the contractual obligations applicable to employers of such nonimmigrant workers.

This final rule re-engineers the process by which employers obtain a temporary labor certification from the Department for use in petitioning the Department of Homeland Security (DHS) to employ a nonimmigrant worker in H–2A (agricultural temporary worker) status. The final rule utilizes an attestation-based application process based on pre-filing recruitment and eliminates duplicative H–2A activities currently performed by State Workforce Agencies (SWAs) and the Department. The rule also provides enhanced enforcement, including more rigorous penalties, to complement the modernized certification process and to appropriately protect workers.

DATES: This final rule is effective January 17, 2009.

FOR FURTHER INFORMATION CONTACT: For further information about 20 CFR part 655, subpart B, contact William L. Carlson, Administrator, Office of Foreign Labor Certification, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room C–4312, Washington, DC 20210. Telephone: (202) 693–3010 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone number above via TTY by calling the toll-free Federal Information Relay Service at 1–800–877–8339.

For further information regarding 29 CFR part 501, contact James Kessler, Farm Labor Team Leader, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S–3510, Washington, DC 20210; Telephone (202) 693–0070 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone number above via TTY by calling the toll-free Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Background Leading to the NPRM

A. Statutory Standard and Current Department of Labor Regulations

The H–2A visa program provides a means for U.S. agricultural employers to employ foreign workers on a temporary basis to perform agricultural labor or services when U.S. labor is in short supply. Section 101(a)(15)(H)(ii)(a) of the Immigration and Nationality Act (INA or the Act) (8 U.S.C. 1101(a)(15)(H)(ii)(a)) defines an H–2A worker as a nonimmigrant admitted to the U.S. on a temporary or seasonal basis to perform agricultural labor or services. Section 214(c)(1) of the INA (8 U.S.C. 1184(c)(1)) mandates that the Secretary of DHS consult with the Secretary of the Department of Labor (the Secretary) with respect to adjudication H–2A petitions, and, by cross-referencing Section 218 of the INA (8 U.S.C. 1188), with determining the availability of U.S. workers and the effect on wages and working conditions. Section 218 also sets forth further details of the H–2A application process and the requirements to be met by the agricultural employer.

Although foreign agricultural labor has contributed to the growth and success of America's agricultural sector since the 19th century, the modern-day agricultural worker visa program originated with the creation, in the INA (Pub. L. 82–144), of the ''H–2 program''—a reference to the INA subparagraph that established the program. Today, the H–2A nonimmigrant visa program authorizes the Secretary of DHS to permit employers to hire foreign workers to come temporarily to the U.S. and perform agricultural services or labor of a seasonal or temporary nature, if the need for foreign labor is first certified by the Secretary.

Section 218(a)(1) of the INA (8 U.S.C. 1188(a)(1)) states that a petition to import H–2A workers may not be approved by the Secretary of Homeland Security unless the petitioner has applied to the Secretary for a certification that:

(a) There are not sufficient U.S. workers who are able, willing, and qualified, and who will be available at the time and place needed to perform the labor or services involved in the petition; and

(b) The employment of the alien in such labor or services will not adversely affect the wages and working conditions of workers in the United States similarly employed.

The INA specifies conditions under which the Secretary must deny certification, and establishes specific timeframes within which employers must file—and the Department must process and either reject or certify—applications for H–2A labor certification. In addition, the statute contains certain worker protections, including the provision of workers' compensation insurance and housing as well as minimum recruitment standards to which H–2A employers must adhere. *See* 8 U.S.C. 1188(b) and (c). The INA does not limit the number of foreign workers who may be accorded H–2A status each year or the number of labor certification applications the Department may process.

The Department has regulations at 20 CFR part 655, subpart B—''Labor Certification Process for Temporary Agricultural Employment Occupations in the United States (H–2A Workers),'' governing the H–2A labor certification process, and at 29 CFR part 501 implementing its enforcement responsibilities under the H–2A program. Regulations relating to employer-provided housing for agricultural workers appear at 20 CFR part 654, subpart E (Housing for Agricultural Workers), and 29 CFR 1910.142 (standards set by the Occupational Safety and Health Administration); *see* also 20 CFR 651.10, and part 653, subparts B and F.

The Department was charged with reviewing the efficiency and effectiveness of its H–2A procedures in light of the increasing presence of undocumented workers in agricultural occupations and because of growing concern about the stability of the agricultural industry given its difficulty in gaining access to a legal workforce.[1] The Department reviewed its administration of the program and, in light of its extensive experience in both the processing of applications and the enforcement of worker protections, proposed measures to re-engineer the H–2A program in a Notice of Proposed Rulemaking on February 13, 2008 (73 FR 8538) (NPRM or Proposed Rule).

B. Overview of the Proposed Redesign of the System

The NPRM described a pre-filing recruitment and attestation process as part of a re-engineered H–2A program. The Department proposed a process by which employers, as part of their application, would attest under threat of penalties, including debarment from the program, that they have complied with and will continue to comply with all applicable program requirements. In addition, employers would not be required to file extensive documentation with their applications but would be required to maintain all supporting documentation for their application for a period of 5 years in order to facilitate the Department's enforcement of program requirements. The Department's proposal also contained new and enhanced penalties and procedures for invoking those penalties against employers as well as their attorneys or agents who fail to perform obligations imposed under the H–2A program. The program also eliminates duplicative administration and processing by the State Workforce Agencies (SWAs) and the Department by requiring filing of the application only with the Department's National Processing Center (NPC) in Chicago, Illinois. This program would also enable the SWAs to better perform their mandated functions in processing H–2A agricultural clearance orders, by enhancing their ability to conduct housing inspections well in advance of the employer's application date. The SWAs would also continue to clear and post intrastate job orders, circulate them through the Employment Service interstate clearance system and refer potential U.S. workers to employers.

Finally, the Department proposed additional processes for penalizing employers or their attorneys or agents who fail to perform obligations required under the H–2A program, including provisions for debarring employers, agents, and attorneys and revoking approved labor certifications.

C. Severability

The Department declares that, to the extent that any portion of this Final Rule is declared to be invalid by a court, it intends for all other parts of the Final Rule that are capable of operating in the absence of the specific portion that has been invalidated to remain in effect. Thus, even if a court decision invalidating a portion of this Final Rule resulted in a partial reversion to the current regulations or to the statutory language itself, the Department intends that the rest of the Final Rule would continue to operate, if at all possible, in tandem with the reverted provisions.

II. Discussion of Comments on Proposed Rule

The Department received over 11,000 comments in response to the proposed rule, the vast majority of them form letters or e-mails repeating the same contentions. Commenters included individual farmers and associations of farmers, agricultural associations, law firms, farmworker advocates, community-based organizations, and individual members of the public. The Department has reviewed these comments and taken them into consideration in drafting this Final Rule.

We do not discuss here those provisions of the NPRM on which we received no comments. Those provisions were adopted as proposed. We have also made some editorial changes to the text of the proposed regulations, for clarity and to improve readability. Those changes are not intended to alter the meaning or intent of the regulations.

A. Revisions to 20 CFR Part 655 Subpart B

Section 655.93 Special Procedures

The Department proposed to revise the current regulation on special procedures to clarify its authority to establish procedures that vary from those procedures outlined in the regulations. We received numerous comments about this revised language on special procedures.

[1] Fact Sheet: Improving Border Security and Immigration Within Existing Law, Office of the Press Secretary, The White House (August 10, 2007); see also Statement on Improving Border Security and Immigration Within Existing Law, 43 Weekly Comp. Pres. Doc. (August 13, 2007).

Several commenters questioned the effect the proposed language would have on special procedures currently in use. Section 655.93(b) of the current regulations provides for special procedures, stating that: ''the Director has the authority to establish special procedures for processing H–2A applications when employers can demonstrate upon written application to and consultation with the Director that special procedures are necessary.'' The proposed rule provides that ''the OFLC Administrator has the authority to establish or to revise special procedures in the form of variances for processing certain H–2A applications when employers can demonstrate upon written application to and consultation with the OFLC Administrator that special procedures are necessary.''

Four associations of growers/producers specifically requested clarification of the phrase ''in the form of variances.'' These associations asked the Department to confirm that the proposed language does not pose a threat to the continued use of the special procedures for sheepherders currently in place. One association expressed concern that this revised language would require hundreds of employers engaged in the range production of livestock to annually document their need for special procedures.

The addition of the phrase ''in the form of variances'' is intended to clarify that special procedures differ from those processes set out in the regulation, which otherwise apply to employers seeking to hire H–2A workers. The special procedures for sheepherders, for example, arise from decades of past practices and draw upon the unique nature of the activity that cannot be completely addressed in the generally applicable regulations. The establishment of special procedures recognizes the peculiarities of an industry or activity, and provides a means to comply with the underlying program requirements through an altered process that adequately addresses the unique nature of the industry or activity while meeting the statutory and regulatory requirements of the program. The special procedures do not enable industries and employers to evade their statutory or regulatory responsibilities but rather establish a feasible and tailored means of meeting them while recognizing the unique circumstances of that industry. The language in § 655.93(b) affirms the Department's authority to develop and/or revise special procedures. The Department does not intend to require any industry currently using special procedures to seek ratification of their current practice, nor does the Department intend to require annual or periodic justifications of an industry's need for special procedures. The Department does reserve the right to make appropriate changes to those procedures after consultation with the industry involved.

Section 655.93(b) in the NPRM enables the Administrator/OFLC ''to establish or revise special procedures in the form of variances for processing certain H–2A applications when employers can demonstrate upon written application to and consultation with the OFLC Administrator that special procedures are necessary.'' In contrast, the current rule states that the subpart permits the Administrator/OFLC to ''continue and * * * revise the special procedures previously in effect for the handling of applications for sheepherders in the Western States (and to adapt such procedures to occupations in the range production of other livestock) and for custom combine crews.''

The Department received several comments about the proposed language, universally expressing concern that the new language provides the Department with broader authority for changing or revoking existing special procedures without providing due process with respect to altering the procedures. An association of growers/producers stated that the proposed rule uses ''more ominous terms'' and gives the impression that the Administrator/OFLC has unilateral authority to make changes without safeguards, review, or democratic procedures. One association of growers and producers expressed the view that the revocation language gives the Department authority to revoke the procedures without advance notice and opportunity for comment and is, therefore, a violation of the Administrative Procedure Act.

A law firm that provides counsel to agricultural employers stated that the new language does not adequately solidify the Department's commitment to existing special procedures and recommended that the Department amend the regulation to affirm its commitment to continuing such long-standing special procedures by providing that any proposed changes to the existing special procedures and policies can be made only after publication in the **Federal Register** with at least a 120-day period for public comment. The firm also commented that the proposal to empower the Administrator/OFLC to revoke special procedures would violate Section 218(c)(4) of the INA, which requires the Secretary of Labor to issue regulations addressing the specific requirements of housing for employees principally engaged in the range production of livestock.

The Department has decided, following consideration of these concerns, to retain the NPRM language in the final regulation, but has added language similar to that in the current regulation, to enumerate those special procedures currently in effect as examples of the use of special procedures. It is our belief that this provision, as it now reads, provides both the Department and employers using the H–2A program essential flexibility regarding special procedures, thus permitting the Department to be far more responsive to employers' changing needs, crop mechanization, and similar concerns. In addition, the language on special procedures in the Final Rule reaffirms the Department's continuing commitment to use special procedures where appropriate. The Department has no present intent to revoke any of the special procedures that are already in place, nor does the language of the final regulation give the Department any new power to do so. While it is possible that at some time in the future the Department may need to revoke or revise existing special procedures, that step would be taken with the same level of deliberation and consultation that was employed in the creation of those procedures. To strengthen our commitment to continue the current consultative process, we have changed the word ''may'' in the last sentence of paragraph (b) to ''will.'' The provision also provides the Department with the authority to develop new procedures to meet employer needs and, additionally, provides employers with the opportunity to request that the Department consider additional procedures or revisions to existing special procedures. Proposed paragraph (c) has been deleted as unnecessarily duplicative of the language in paragraph (b).

Two associations of growers and producers requested that the Department formulate special procedures for dairy workers, stating that these requested special procedures should not be different from those already established for sheepherders. The associations stated the provisions for sheepherders have ''special relevance to the current dairy situation'' and also stated the ''special procedures relieve the sheepherding industry from having to make a showing of temporary or seasonal employment.'' The longstanding special procedures that allow sheepherders to participate in the

H–2A program have their origins in prior statutory provisions dating back to the 1950s. The Department is unaware of any comparable statutory history pertaining to the dairy industry. The Department would, of course, consider a specific request from dairy producers or their representatives for the development of special procedures that would be applicable to eligible H–2A occupations (*see* further discussion on this point in the discussion of the definition of ''agricultural labor or services'' below). The Department does not believe, however, that it would be appropriate to speculatively address the merits of a specific special procedures request in this regulation, particularly before a request making a detailed case for the appropriateness of such special procedures has been received.

An individual employer commented that those involved in discussing and considering changes to the H–2A program should preserve the special procedures for sheepherders and extend them to all occupations engaged in the range production of other livestock (cattle and horses). A private citizen provided suggestions for improving the handling of certification for sheep shearers.

The Department has previously established special procedures for open range production of livestock and sheep shearers and does not have any plans to change those procedures at this time and does not believe that it would be appropriate to address in this regulation the merits of the commenters' general suggestions for revising these special procedures. The Department would, of course, be willing to consider a specific request from livestock producers or their representatives for the revision or expansion of special procedures consistent with its authority and this regulation.

Section 655.100—Overview and definitions

(a) Overview

The Department included a provision in the NPRM, similar to a provision in the current regulation, which provides an overview of the H–2A program. This overview provides the reader, especially readers unfamiliar with the program, a general description of program obligations, requirements, and processes.

Only two commenters identified concerns with the overview as written. Both expressed concern with the proposed earlier time period for the recruitment of U.S. workers. They questioned whether U.S. workers who agreed to work on a date far in advance would then be available to work for the entire contract period. The overview, however, simply describes in broad-brush fashion the regulatory provisions that are discussed in detail later in the NPRM, and in and of itself has no legal effect. The concerns and observations expressed by commenters will be addressed in the context of the relevant regulatory provision to which they apply rather than in the overview. The overview has also been edited for general clarity and to reflect changes made throughout the regulatory text.

(b) Transition

The Department, due to past program experience, has decided to add a transition period in order to provide an orderly and seamless transition to the new system created by these regulatory revisions. This will allow the Department to make necessary changes to program operations, provide training to the NPC, SWAs and stakeholder groups, and allow employers and their agents/representatives to become familiar with the new system. Employers with a date of need for workers on or after July 1, 2009 will be obligated to follow all of the new procedures established by these regulations. Prior to that time, the Department has created a hybrid system involving elements of the old and the new regulations as delineated in the new § 655.100(b).

Even though the NPRM put current and future users of H–2A workers on some notice regarding what this Final Rule will require, the rule as a whole implements several significant changes to the administration of the program. Several commenters requested that the Department allow employers some period of time to prepare and adjust their requests for temporary agricultural workers. These regulations implement new application forms, new processes, and new time periods for conducting recruitment for domestic workers to which current and new users of the program will need to become accustomed.

The Department is accordingly adopting a transition period after the effective date of this Final Rule. The transition period establishes procedures that will apply to any application for which the first date of need for H–2A workers is no earlier than the effective date of this rule and no later than June 30, 2009.

During this transition period, the Department will accept applications in the following manner: An employer will complete and submit Form ETA–9142, *Application for Temporary Employment Certification*, in accordance with § 655.107, no less than 45 days prior to their date of need. The employer will simultaneously submit Form ETA–790 *Agricultural and Food Processing Clearance Order* (job order), with the *Application for Temporary Employment Certification* (application) directly to the Chicago NPC. Activities that are required to be conducted prior to filing an application under the Final Rule will be conducted post-filing during this transition period, much as they are under the current rule. The employer will also be expected to make attestations in its application applicable to its future recruitment activities, payment of the offered wage rate, etc. Employers will not be required to complete an initial recruitment report for submission with the application, but will be required to complete a recruitment report for submission to the NPC prior to certification, and will also be required to complete a final recruitment report covering the entire recruitment period.

The employer will not separately request a wage determination from the Chicago NPC. Upon receipt of Forms ETA–9142 and ETA–790, the Chicago NPC will provide the employer with the minimum applicable wage rate to be offered by the employer, and will process the application and job order in a manner consistent with § 655.107, issuing a modification for any curable deficiencies within 7 calendar days. Once the application and job order have been accepted, the Chicago NPC will transmit a copy of the job order to the SWA(s) serving the area of intended employment to initiate intrastate and interstate clearance, request the SWA(s) schedule an inspection of the housing, and provide instructions to the employer to commence positive recruitment in a manner consistent with § 655.102. The NPC will designate labor supply States during this transition period on a case-by-case basis, applying the basic information standard for such designations that is set forth in § 655.102(i).

This transition period process will apply only to applications filed on or after the effective date of this regulation with dates of need no earlier than the effective date and no later than June 30, 2009. Employers with a date of need on or after July 1, 2009 will be expected to fully comply with all of the requirements of the Final Rule. Moreover, after the Final Rule's effective date, the requirements of the Final Rule will fully apply except for those modifications that are expressly mentioned as transition period procedures in § 655.100(b); all other

provisions of the Final Rule will apply on the effective date of the Final Rule.

These transition period procedures are designed to ensure that employers seeking to utilize the program immediately after its effective date, especially those with needs early in the planting season, will not be prejudiced by the new pre-filing requirements regarding wage determinations and recruitment, which might otherwise substantially impact employers' application timing. Because the Department's seasonal H–2A workload begins to peak in January of each year, however, the Department deems it essential to the smooth and continuous operation of the H–2A program throughout calendar year 2009 to make the rule effective as early in the year as possible.

(c) Definitions 655.100

Definition of ''agent,'' ''attorney,'' and ''representative''

The Department did not propose any changes to the definition of ''agent'' from existing regulations but added definitions for ''attorney'' and ''representative'' in the proposed rule. A major trade association commented that the definitions of, and references to, the terms ''agent,'' ''attorney'' and ''representative'' are confusing. The association found the definitions of agent and representative to be duplicative and the distinctions between these two terms, both of which encompass the authority to act on behalf of an employer, unclear. The association also commented that the definition of ''attorney'' is self-evident and appears to be a vehicle for permitting attorneys to act as ''agents'' or ''representatives.'' Further, according to the commenter, the term ''representative'' is also problematic and the Department should consider revising it or eliminating it entirely. The association believes the main purpose of the definition is to deem the person who makes the attestations on behalf of the employer a ''representative,'' but the association believes it is not clear whether the intent of the definition of ''representative'' is to also make the representative liable for any misrepresentations made in an attestation on behalf of an employer. The association recommended the proposed rule should clarify the intent of the definition of ''representative'' and also under what circumstances an agent will be liable for activities undertaken on behalf of an employer. The association recommended a clear set of standards for liability and suggested such standards should not deviate from the current standards where agents, attorneys, and representatives (under the proposed rule) are not liable if they perform the administrative tasks necessary to file labor certification applications and petitions for visas and do not make attestations that are factually based. In addition, the association recommended that the agents, attorneys, or representatives should not be liable for program violations by the employer.

The Department understands the need for clarity in determining who qualifies as a representative before the Department and what responsibilities and liabilities attach to that role and has accordingly simplified the definition of a representative. Although the Department does distinguish between the different roles of attorneys and agents, both groups are held to the same standards of ethics and honesty under the Department's rules. Under the rules, attorneys can function as agents, and either attorneys or agents can function as a representative of the employer. The Department has, in addition, replaced the word ''official'' with ''person or entity'' to parallel the definition of agent.

However, the Department disagrees with the commenter's interpretation of the extent to which an agent or attorney can be held accountable by the Department for their own and their clients' conduct in filing an application for an employer. While agents and attorneys are of course not strictly liable for all misconduct engaged in by their clients, they do undertake a significant duty in attestations to the Department regarding their employer-clients' obligations. They are, therefore, responsible for exercising reasonable due diligence in ensuring that employers understand their responsibilities under the program and are prepared to execute those obligations. Agents and attorneys do not themselves make the factual attestations and are not required to have personal knowledge that the attestations they submit are accurate. They are, however, required to inform the employers they represent of the employers' obligations under the program, including the employers' liability for making false attestations, and the prohibition on submitting applications containing attestations they know or should know are false. The debarment provisions at § 655.118 of the final regulations have accordingly been clarified to state that agents and attorneys can be held liable for their employer-clients' misconduct when they ''participated in, had knowledge of, or had reason to know of, the employer's substantial violation.''

The same association also questioned why the Department is ''singling out attorneys'' in the definition of ''representative'' by requiring an attorney who acts as an employer's representative and interviews and/or considers U.S. workers for the job offered to the foreign worker(s) to also be the person who normally considers applicants for job opportunities not involving labor certifications. The association found no apparent rationale justifying why the Department should dictate who and under what circumstances an attorney or any other person should interview U.S. job applicants. It further recommended that the rule eliminate the reference to attorneys or, at a minimum, clarify that the rule does not reach attorneys who merely advise and guide employers through the H–2A program. The Department has accordingly clarified the definition of representative by deleting the sentence limiting the role attorneys can play in interviewing and considering workers, primarily because, unlike other labor certification programs administered by the Department, the relatively simple job qualifications that apply to most agricultural job opportunities render it unlikely that U.S. workers would be discouraged from applying for those jobs by the prospect of being interviewed by an attorney.

A specialty bar association urged that the definition of ''agent'' be changed in order to prevent abuses related to foreign nationals paying recruiters' fees. The association suggested that the Department limit representation of employers to that recognized by DHS: attorneys duly licensed and in good standing; law students and law graduates not yet licensed who are working under the direct supervision of an attorney licensed in the United States or a certified representative; a reputable individual of good moral character who is assisting without direct or indirect remuneration and who has a pre-existing relationship with the person or entity being represented; and accredited representatives, who are persons representing a nonprofit organization which has been accredited by the Board of Immigration Appeals.

The Department acknowledges that its allowance of agents who are not attorneys and who do not fit into the categories recognized by DHS creates a difference of practices between the two agencies. However, the Department has for decades permitted agents who do not meet DHS's criteria to appear before it. Agents who are not attorneys have adequately represented claimants before the Department in a wide variety of

activities since long before the development of the H–2A program. To change such a long-standing practice in the context of this rulemaking would represent a major change in policy that the Department is not prepared to make at this time. The Department has, however, added language to the definition of both ''agent'' and ''attorney'' to clarify that individuals who have been debarred by the Department under § 655.118 cannot function as attorneys or agents during the period of their debarment.

Definition of ''adverse effect wage rate''

The Department proposed a revised definition of ''adverse effect wage rate,'' limiting its application to only H–2A workers. A law firm commented that the proposed definition of ''adverse effect wage rate'' appears to apply only to H–2A workers and not to U.S. workers who are employed in ''corresponding employment.'' The Department has clarified the definition to make clear that those hired into corresponding employment during the recruitment period will also receive the highest of the AEWR, prevailing wage, or minimum wage, as applicable. The firm also requested the same revision to 29 CFR Part 501 regulations. The Department believes that this requirement is adequately explained in the text of the regulations at § 655.104(l) and § 655.105(g).

Definition of ''agricultural association''

The Department added a definition for ''agricultural association'' in the proposed regulation. A major trade association commented that the proposed definition does not acknowledge that associations may be joint employers and suggests that the definition could cause confusion because other sections of the proposed regulation acknowledge that associations may have joint employer status. The association recommended the definition clarify that agricultural associations may serve as agents or joint employers and define the circumstances under which joint employer arrangements may be utilized. A professional association further commented that associations should not be exempt from Farm Labor Contractor provisions if the associations are performing the same activities as Farm Labor Contractors.

The Department agrees that agricultural associations play a vital role in the H–2A program and seeks to minimize potential confusion about their role and responsibilities. The regulation has been revised to clarify that agricultural associations may indeed serve as sole employers, joint employers, or as agents. The definition of ''H–2A Labor Contractors'' has also been revised to clearly differentiate labor contractors from agricultural associations and that an agricultural association that meets the definition in this part is not subject to the requirements attaching to H–2A Labor Contractors. Finally, the regulation has been clarified by specifying that ''processing establishments, canneries, gins, packing sheds, nurseries, or other fixed-site agricultural employers'' can all be encompassed by agricultural associations.

Definition of Application for Temporary Employment Certification

The Department has added to the Final Rule a definition of *Application for Temporary Labor Certification.* An Application for Temporary Labor Certification is an Office of Management and Budget (OMB)-approved form that an employer submits to DOL to secure a temporary agricultural labor certification. A complete submission is required to include an initial recruitment report.

Definition of ''date of need''

The Department slightly modified the definition of ''date of need'' to clarify that the applicable date is the one that is specified in the employer's Application for Temporary Employment Certification.

Definition of ''employ'' and ''employer''

In the NPRM, the Department added a definition for ''employ'' and made revisions to the existing definition of ''employer.'' A trade association suggested that the Department eliminate the definition of ''employ'' but retain the definition of ''employer,'' stating that the definition of ''employ'' adds nothing to clarify status or legal obligations under the H–2A program. The association believes the status of an employer under the H–2A program is defined by the labor certification and visa petition processes and that the incorporation of the broad FLSA and MSPA definitions of ''employ'' insinuate broad legal concepts that add unnecessary confusion. The association further recommended that the Department eliminate the fourth criterion related to joint employment status in its proposed definition of ''employer'' and, instead, provide a separate definition of joint employer associations and the respective liabilities of the association and its joint employer members.

The Department agrees with these comments and has, accordingly, removed the definition of ''employ'' as superfluous and created a separate definition of ''joint employment'' (using that portion of the definition of employer which discussed joint employers) to eliminate any confusion between the two terms. The definition of ''employer'' has also been revised. First, the Final Rule clarifies the proposal's statement that an employer must have a ''location'' within the U.S. to more specifically state that it must have a ''place of business (physical location) within the U.S.'' Second, out of recognition that some H–2A program users, such as H–2ALCs, are itinerant by nature, and that SWA referrals may thus occasionally need to be made to non-fixed locations, the Final Rule states that an employer must have ''a means by which it may be contacted for employment'' rather than a specific location ''to which U.S. workers may be referred.'' Finally, the Final Rule clarifies that an employer must have an employment relationship ''with respect to H–2A employees or related U.S. workers under this subpart'' rather than less specifically referring to ''employees under this subpart,'' and deletes the references to specific indicia of an employment relationship because the applicable criteria are spelled out in greater detail in the definition of ''employee.'' The definition of ''joint employer'' is modified slightly from the concept that appeared in the NPRM to clarify that the two or more employers must each have sufficient indicia of employment to be considered the employer of the employee in order to meet the test for joint employment.

Definition of ''farm labor contracting activity'' and ''Farm Labor Contractor (FLC)''

The Department proposed adding definitions for ''farm labor contracting activity'' and ''Farm Labor Contractor (FLC)'' to this section. In the Final Rule, the Department has eliminated the definition for ''farm labor contracting activity'' and revised the definition for ''Farm Labor Contractor.'' The revised definition is now contained under the heading ''H–2A Labor Contractor.''

A law firm commented that neither agents nor attorneys should be required to register as H–2A Labor Contractors. The commenter did not specifically address why it believed agents and attorneys would be required to register under the proposed definitions, so the Department is unable to respond to this point. As a general matter, however, an agent or attorney, if performing labor contracting activities as they appear in the revised definition of an H–2A Labor Contractor, would be required to register

as, and would be held to the standards of, an H–2A Labor Contractor.

A group of farmworker advocacy organizations commented that the definition proposed for Farm Labor Contractor (H–2A Labor Contractor) would exclude recruiters of foreign temporary workers from the scope of the rule, making enforcement impossible. This organization pointed out that under the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), H–2A workers are not migrant or seasonal agricultural workers and, therefore, a contractor recruiting workers to become H–2A visa holders would not fit within the proposed regulatory definition. The organization also commented that the reference to ''fixed-site'' employers in the ''farm labor contracting activity'' definition could present problems in some employment situations, such as employment for a custom harvester, where the employer would not have a fixed site. An association of growers/producers suggested the MSPA definitions for ''farm labor contracting activity'' and ''Farm Labor Contractor'' should be used.

In response to the comments, the Department has deleted the definition of ''agricultural employer'' and included a separate definition for ''fixed-site employer.'' The Department also deleted the definition of ''Farm Labor Contractor'' in the final regulation and replaced it with a new definition for ''H–2A Labor Contractor.'' This will differentiate the two terms since the definition of an ''H–2A Labor Contractor'' does not match the definition of a ''Farm Labor Contractor'' as used in MSPA, and the operational differences between the H–2A program and MSPA do not allow perfect parallels to be drawn between the two statutory schemes. The definition of ''farm labor contracting activity'' has been deleted as redundant since the activities have been made part of the definitions of ''fixed-site employer'' and ''H–2A Labor Contractor.''

Definition of ''joint employment''

The Department included in its definition of ''employment'' a reference to what would constitute ''joint employment'' for purposes of the H–2A program. The Department received one comment suggesting the inclusion of the definition of ''joint employment'' within the definition of ''employment'' was confusing. The Department has accordingly removed the last phrase from the proposed definition of ''employer'' and provided a separate definition for ''joint employment.''

Definition of ''prevailing''

The Department proposed a revision to the definition of ''prevailing'' to include, ''with respect to certain benefits other than wages provided by employers and certain practices engaged in by employers, that practice or benefit which is most commonly provided by employers (including H–2A and non-H–2A employers) for the occupation in the area of intended employment.'' This represented a change from the current rule, which does not refer to ''commonly provided'' practices or benefits but instead uses a percentage test (50 percent or more of employers in an area and for an occupation must engage in the practice or offer the benefit for it to be considered ''prevailing,'' and the 50 percent or more of employers must also employ in aggregate 50 percent or more of U.S. workers in the occupation and area''). The Department received comments on the change, specifically inquiring whether the SWAs would continue to conduct prevailing wage and practice surveys, and requesting that if the Department intends to no longer require SWAs to conduct prevailing wage and practice surveys, the change should be discussed in the preamble.

The Department has determined that, to provide greater clarity and for ease of administration, the definition of ''prevailing'' will revert to the definition in the current regulation that requires that 50 percent or more of employers in an area and for an occupation engage in the practice or offer the benefit and that the 50 percent or more of the employers in an area must also employ in aggregate 50 percent or more of U.S. workers in the occupation and area.

The Department notes it does not intend to change the provision on prevailing wage surveys currently undertaken by SWAs. The Department has included specific definitions for the terms ''prevailing piece rate'' and ''prevailing hourly rate,'' the two kinds of wage surveys that have traditionally been undertaken by SWAs, and has included express references to both types of surveys throughout the rule.

Definition of ''strike''

The Department has been added to the Final Rule a definition for the term *strike*. The definition conforms to the changes explained in the discussion of § 655.105(c), and clarifies that the Department will evaluate whether job opportunities are vacant because of a strike, lockout, or work stoppage on an individualized, position-by-position basis.

Definition of ''successor in interest''

The Department's proposal included a debarment provision allowing for debarment of a successor in interest to ensure that violators are not able to re-incorporate to circumvent the effect of the debarment provisions. A national agricultural association commented that this provision as drafted could result in an innocent third party buying the farm of a debarred farmer and being subject to debarment, even though the successor is free of any wrongdoing, and thus the rule would place roadblocks on the sale of assets to innocent parties.

The Department agrees with this commenter. We have addressed this issue by including a definition of ''successor in interest'' to make clear that the Department will consider the facts of each case to determine whether the successor and its agents were personally involved in the violations that led to debarment in determining whether the successor constitutes a ''successor in interest'' for purposes of the rule.

Definition of ''United States''

The Consolidated Natural Resources Act of 2008, Public Law 110–229, Title VII (CNRA), applies the INA to the Commonwealth of the Northern Mariana Islands (CNMI) at the completion of the transition period as provided in the CNRA, which at the earliest, would be December 31, 2014. Accordingly, the H–2A program will not apply to the CNMI until such time. However, the CNRA amends the definition of ''United States'' in the INA to include the CNMI. It should be noted that the amendment to the INA of the definition of ''United States'' does not take effect until the beginning of the transition period which could be as early as June 1, 2009, but may be delayed up to 180 days. Accordingly, the Department has included CNMI in the definition of ''United States'' with the following qualification: ''as of the transition program effective date, as defined in the Consolidated Natural Resources Act of 2008, Public Law 110–229, Title VII.'' The Department will publish a notice in the **Federal Register** at such time that its regulations regarding the foreign labor programs described in the INA, including the H–2A program, will apply to the Commonwealth.

Definition of ''Within [number and type] days''

The Department has added to the Final Rule a definition of the term *within [number and type] days*. The definition clarifies how the Department will calculate timing for meeting filing

deadlines under the rule where that term, in some formulation, appears. The definition specifies that a period of time described by the term ''within [number and type] days'' will begin to run on the first business day after the Department sends a notice to the employer by means normally assuring next-day delivery, and will end on the day that the employer sends whatever communication is required by the rules back to the Department, as evidenced by a postal mark or other similar receipt.

Definition of ''Work contract''

The Department has added to the Final Rule a definition of the term *work contract*. The definition was borrowed from the definition section of 29 CFR part 501 of the NPRM, with minor modifications made for purposes of clarification.

d. Definition of ''agricultural labor or services''

The Department proposed changes to the definition of ''agricultural labor or services'' to clarify, as in the current regulation, that an activity that meets either the Internal Revenue Code (IRC) or the Fair Labor Standards Act (FLSA) definition of agriculture is considered agricultural labor or services for H–2A program purposes and, more significantly, to remove limitations on the performance of certain traditional agricultural activities which, when performed for more than one farmer, are not considered agricultural labor or services under the IRC or the FLSA, including packing and processing.

The Department received several comments supporting these changes, with some specific suggestions for additional changes. A major trade association complimented the Department on providing ''bright line'' definitional guidance regarding the activities that constitute agricultural work to be covered by the H–2A program as distinct from the H–2B program. A number of these commenters mentioned that the Department's inclusion of packing and processing activities in work considered as agricultural provides an option for obtaining legal workers, especially in light of the numerical limitations on H–2B visas. One association of growers/producers supported the expansion of the current definition to include packing and processing but suggested that agricultural employers who have previously used the H–2B program for packing or processing operations be allowed to continue using the H–2B program. Another association of growers/producers suggested that the definition be changed to allow product that is moving from on-farm production directly to the end consumer be included as permissible work for H–2A workers, and suggested that the definition provide that it is a permissible activity for H–2A workers to work on production of a purchased crop when the crop is purchased by a farm because of weather damage to that farm's crops in a particular year.

The Department appreciates the general support for the proposed changes and has retained them in the final regulation. Regarding packing and processing activities, the proposed definition includes as agricultural activities ''handling, planting, drying, packing, packaging, processing, freezing, grading, storing or delivering to storage or to market or to a carrier for transportation to market, in its unmanufactured state, any agricultural or horticultural commodity while in the employ of the operator of a farm.'' In response to the request to allow employers who have used the H–2B program for packing or processing operations to continue using the H–2B program, the Department has revised the definition to clarify that while the Department cannot permit H–2A workers and H–2B workers to simultaneously perform the same work at the same establishment, the distinctions between establishments at which operations of this nature should be performed by H–2A workers and those at which the operations should be performed by H–2B workers are too fine for the Department to reasonably distinguish between them with sufficient precision to establish a bright line test. The Department will therefore defer to operators as to whether the ''handling, planting, drying, packing, packaging, processing, freezing, grading, storing or delivering'' operations at their particular establishment are more properly governed by the H–2A or the H–2B program, but will not accept applications for both kinds of workers to simultaneously perform the same work at the same establishment.

The Department agrees with the comment that H–2A workers should be permitted to work in the production of a purchased crop, as well as work in processing or packing a farm product that is moving from on-farm production directly to the end consumer. Moreover, the Department believes such activities are permitted by the definition in the proposed rule and therefore the provision requires no additional language in the Final Rule.

The Department has clarified the Final Rule to reflect existing law, which provides that work performed by H–2A workers, or workers in corresponding employment, which is not defined as agriculture under Section 3(f) of the Fair Labor Standards Act, 29 U.S.C. 203(f), is subject to the provisions of the FLSA as provided therein, including the overtime provisions in Section 7(a)(29 U.S.C. 207(a)).

Incidental Activities

The Department also proposed clarifications to reflect that work activity of the type typically performed on a farm and incident to the agricultural labor or services for which an H–2A labor certification was approved may be performed by an H–2A worker. A number of commenters, including a professional association, a major trade association, and several associations of growers/producers supported this change, stating that it was positive and would provide more flexibility for employers. A major trade association commented this change would allow employers to include duties in H–2A certified job opportunities that reflect the actual duties performed by farm workers and further commented that, ''[p]resumably the provision will cover a farm worker who engages in incidental employment in the farm's roadside retail stand, a farm worker who assists in managing 'pick your own' activities, and a farm worker who occasionally drives a tractor pulling a hay wagon for a hay ride, to cite a few examples of incidental activities customarily performed by farm workers that have been disallowed in the past.'' This commenter's understanding of the Department's interpretation is correct.

One association of growers/producers commented that allowing H–2A workers to perform duties typically performed on a farm benefits the employee as well as the employer. A trade association commented that being able to use workers in other jobs not listed on the contract is needed, particularly when weather prevents field work.

The Department has revised the wording in the definition of ''agricultural labor or services'' provided in § 655.100(d)(1)(vi) to provide additional clarity for employers. The definition now reads: ''Other work typically performed on a farm that is not specifically listed on the *Application for Temporary Employment Certification* and is minor (i.e., less than 20 percent of the total time worked on the job duties that are listed on the *Application for Temporary Employment Certification*) and incidental to the agricultural labor or services for which the H–2A worker was sought.'' The Department recognizes that, due to the unpredictable nature of weather

conditions and agricultural work itself, employers need some flexibility in assigning tasks, and that it would be difficult if not impossible to list all potential minor and incidental job responsibilities of H–2A workers on the *Application for Temporary Employment Certification*. The proposed amendment of the definition is intended to recognize the reality of working conditions at agricultural establishments and ensure that an H–2A worker's performance of minor and incidental activity does not violate the terms and conditions of the worker's H–2A visa status. The further revision to the definition will assist employers in determining whether activities or work not included on the *Application for Temporary Employment Certification* can reasonably be considered as minor and incidental.

Inclusion of Other Occupations

The Department proposed to include logging employment in its definition of ''agricultural labor or services'' for purposes of the H–2A program. Two commenters voiced their support for this inclusion; we received no comments in opposition. The Department also sought comments as to whether there are other occupations that should be included within the definition of agriculture used in the H–2A program. The Department received several suggestions of other industries that should be considered, including livestock and dairy producers, fisheries, nurseries, greenhouses, landscapers, poultry producers, wine businesses, equine businesses, turf grass growers, mushroom producers, maple syrup producers, and employers engaging in seasonal food processing as well as growers who operate processing and packing plants.

Of those requesting expansion of the definition to include other occupations, representatives of the dairy industry submitted the most comments. A major trade association and a number of associations of growers/producers commented that the dairy industry is unable to use the H–2A agricultural worker visa program and that this exclusion is unfair. They stated dairy farmers need and deserve the same access to legal foreign workers as other sectors of the agricultural industry. The association suggested that H–2A visas for dairy workers should last at least three years rather than one. Two trade association commenters stated they understood the importance under the statutory definition of H–2A workers needing to be temporary or seasonal, but not why the jobs themselves needed to be temporary or seasonal. A farm bureau provided comments suggesting dairy and livestock operations should be allowed to designate seasonal jobs within their operations for which H–2A workers could be employed. This association commented that current worker patterns suggest typical milkers stay in their positions for 9 to 10 months and then voluntarily leave, but return to seek a job after 2 to 3 months.

The Department also received comments from an association of growers/producers and from two individual employers requesting that reforestation work be considered as agricultural labor. These commenters assert that there are reforestation activities including planting, weed control, herbicide application and other unskilled tasks related to preparing the site and cultivating the soil and that workers who perform these tasks deserve consideration for eligibility for H–2A visas, as do workers who perform the same or similar tasks in cultivating other agricultural and horticultural commodities on many of the same farms. These commenters also pointed out that workers performing reforestation tasks for farmers or on farms are clearly agricultural employees under the FLSA and, additionally, believed the Internal Revenue Code supports their position for considering reforestation work performed on a farm or for a farmer as agricultural labor or services.

Following review of the comments discussed above, the Department has decided the definition of agriculture should not be further expanded at this time and no additional activities have been selected for inclusion as agricultural activities beyond those included in the NPRM. In most cases where there was the suggestion for the inclusion of a particular industry or activity in the definition of agriculture there was not strong support for the inclusion by representatives of that industry, as indicated by the number and source of the comments received. For example, one commenter supported adding maple syrup harvesting and ancillary activities to the definition of agricultural labor. The suggestion did not come from someone actually involved in the maple syrup industry, however, but rather from a State Workforce Agency. While the Department appreciates the input of such commenters, it would be inappropriate to impose on those industries (most of which currently qualify for the H–2B program rather than the H–2A program) changes that the industry itself did not seek.

The two exceptions to this pattern in the comments were the dairy industry and the reforestation industry, both of which, as discussed above, submitted comments evidencing industry-based support. The Department's analysis of the comments from the dairy industry, however, indicates it is not the program's definition of agriculture, which already includes dairy activities, that presents a potential barrier to the industry's use of the H–2A program, but rather the statutory requirement for the work to be temporary or seasonal in nature.

The H–2A program, by statute, provides a means for agricultural employers to employ foreign workers on a *temporary* basis. Many dairy-related job needs, however, appear to be year-round and permanent in nature.

While the H–2A program is specially designed for agricultural employers, they are not limited to using only the H–2A program. The employment-based permanent visa program is also open to agricultural employers with a permanent need for which they are unable to secure U.S. workers. At the same time, year-round operations are permitted to seek certification to utilize H–2A workers for seasonal or temporary jobs within their industries when they can substantiate the temporary or seasonal nature of the jobs. The Department recognizes that an employer may have both permanent and temporary jobs in the same occupation. However, employers should be aware that the Department does not typically approve subsequent applications requesting foreign workers for the same position when, taken together, those applications would cover a continuous period of time in excess of 10 months, unless exceptional circumstances are present.

The comments from the reforestation industry, while thoughtful, represented the input of only two individual employers and a single employer association who do not necessarily provide a representative sample of the entire reforestation industry. The Department is reluctant to overturn the regulatory practices of several decades and impose the significant obligations of an H–2A employer on an entire industry without significant input from that industry. While the Department is willing to further explore whether to include the reforestation industry in the definition of agriculture, it does not believe a decision to do so is warranted at this time.

''On a seasonal or other temporary basis''

The Department proposed a definition of the key terms ''on a seasonal or other temporary basis'' in the definition of

agricultural labor or services in the NPRM that continued the interpretation of the current regulation. We received several comments related to the phrase ''on a seasonal or other temporary basis.'' A trade association suggested the rule borrow the temporary and seasonal concepts from the Migrant and Seasonal Agricultural Workers Protection Act (MSPA) definitions that are appropriate in an H–2A context without incorporating the MSPA regulations and related judicial precedent. It was the association's belief that this approach would allow an H–2A worker to be admitted for longer than a 10-month period. An association of growers/producers suggested the definition of temporary or seasonal should apply to the worker rather than the job and also that year-round farming operations/nurseries should be allowed to access a workforce to provide year-round services by rotating ''shifts'' of workers with different contract/visa periods. Another trade association also suggested the definition and interpretation of temporary and seasonal could be expanded.

The Department does not agree that the definition of temporary or seasonal should focus on the worker rather than the job. The INA is clear that the employer must have a need for foreign labor to undertake work of a temporary or seasonal nature for which it cannot locate U.S. workers. The Department's position has traditionally been that job opportunities that are permanent in nature do not qualify for the H–2A program. The controlling factor is the employer's temporary need, generally less than 1 year, and not the nature of the job duties. *See Matter of Artee Corp.*, 18 I&N Dec. 366 (Comm. 1982); *see* also *Global Horizons, Inc.* v. *DOL*, 2007–TLC–1 (November 30, 2006) (upholding the Department's position that a failure to prove a specific temporary need precludes acceptance of temporary H–2A application); *see also* 11 U.S. Op. Off. Legal Counsel 39 (1987). An H–2A worker could, however, be employed continuously by successive H–2A employers having a temporary need for the worker's services and thus be employed and remain in the U.S. for a period beyond one year.

In addition, the Department has made several edits to the Definitions section of the NPRM to provide consistency with other changes to the regulatory text and to clarify the Final Rule. For example, the definition of ''*Application for Temporary Employment Certification*'' has been amended to help ensure the public has a clear understanding of what this regulation requires. Other definitions, such as ''temporary agricultural labor certification determination'' and ''unauthorized alien,'' have been eliminated because they are not used in this regulation. We have also made non-substantive changes to provide clarity and to comport with plain English language requirements.

Section 655.101 Applications for Temporary Employment Certification in Agriculture

(a) Instituting an Attestation-based Process

The Department proposed instituting an application requiring employers to attest to their adherence to the obligations of the H–2A program. The Department received several comments in favor of the new process, several opposed, and others generally in favor but suggesting changes to the process as outlined in the Department's proposal.

Some commenters believed that attestations to future events should not be required, and that attestations should be made under the ''applicant's best knowledge and belief'' standard and not the ''under penalty of perjury'' standard because applicants cannot know what will happen in the future.

The Department believes that the attestations the Final Rule requires employers to make do not require employers to predict future events, but rather represent straightforward commitments to comply with program requirements. Such compliance is fully in the control of the employer. It is, therefore, not necessary to delete or modify the manner in which attestations are made.

(1) Support for an Attestation-based Process

Those commenters who favored the shift to an attestation-based process generally believed the new process would make the H–2A application more efficient and less burdensome for employers. One State government agency commented that the process would enable the SWAs to focus on job orders, referrals, and housing inspections while relieving them of the burden to review the applications themselves. Another commenter supported the shift but encouraged the Department to ensure the ''Administrator * * * acquires the agricultural expertise necessary to provide training and guidance to those who are reviewing and overseeing the operating of a program that is critical to future U.S. agricultural production.''

The Department appreciates support for its proposed process. As of June 1, 2008, the Department has centralized the Federal processing of all applications for H–2A temporary foreign workers in the Chicago National Processing Center. This centralization will enhance the Department's ability to handle the expected increases in the usage of the H–2A program and ensure consistency in application of program requirements. The Department recognizes the unique needs and timeframes associated with this program and anticipates that centralization will lead to the development of greater expertise to meet those needs and timeframes. It also believes that centralized processing of applications will facilitate the identification of areas where program training should be enhanced and that the centralized environment will maximize the effectiveness of such training.

An association of growers/producers supported the attestation-based process but found the process, as described in the proposed regulation, confusing and duplicative. This commenter requested that all of the attestation requirements be consolidated into one rule clearly stating which facts are to be verified.

The Department appreciates the commenter's suggestion about consolidation of the attestation requirements and, as provided in the proposal, has retained the comprehensive listing of the requirements in § 655.105, ''Assurances and Obligations of H–2A Employers'' and § 655.106, ''Assurances and Obligations of H–2A Labor Contractors.'' It was not clear if this commenter was requesting a consolidated listing of the attestations required by both the Departments of Labor and Homeland Security. The Department of Labor is including in the comprehensive lists only those attestations that DOL requires. The commenter did not include specific examples of duplication or confusing information and the Department, therefore, is unable to provide any further response.

(2) Legality of the Attestation-based Process

Several of the commenters who opposed the change asserted an attestation-based process conflicts with the statutory mandate in Section 218 of the INA (8 U.S.C. 1188). These commenters interpreted the INA to require the Department to make a determination based upon an active verification of the H–2A application. One group commented that the attestation process violates the statute's Congressional mandate. Two organizations expressed the belief that the certification process has always been understood to require active

oversight by the Department of the employer's recruitment and hiring of U.S. workers as well as the details of the job offer. One commenter, an advocacy organization, voiced the opinion that the statutory standard is not whether the employer has made adequate assurances that it has or will meet the obligations of the H–2A program but is whether the employer has actually met them. Another commenter opined that labor certifications were not meant to be attestation-based and that this approach will dramatically reduce government oversight of this program. These commenters believe that the Secretary will not be able to certify that wages and working conditions have not been adversely affected and that this regulation is contrary to the statute.

The attestation-based process implemented by the Final Rule is not inconsistent with any statutory requirements, but rather is a reasonable means selected by the Department to fulfill its statutory responsibilities. The Department does not interpret Section 218 of the INA to specify a particular methodology that the Department must employ to determine that all of the statutory criteria have been met, and indeed, various aspects of the Department's methodology have changed through the years. The attestation-based system, backed by audits, that is implemented by the Final Rule is an acceptable means, within the reasonable discretion of the Secretary, for the Department to ensure that the statutory criteria for certification are met and that program requirements are satisfied. Similar approaches have been used by the Department in other contexts (such as approval of permanent labor certifications) to fulfill its statutory responsibilities. Indeed, as discussed in greater detail in various sections below, under the statutory time limits for filing applications and issuing certifications the Department typically makes certification determinations on applications prior to the completion of many of the recruitment requirements and without any direct observation or inspection by the Department or its SWA agents that rental housing secured by employers complies with all of the applicable legal standards.

No system for review and approval of applications, of course, is foolproof, and the statute prescribes appropriate penalties for situations in which the terms of approved labor certifications are later violated. *See* 8 U.S.C. 1188(b)(2)(A). There will always be bad actors who attempt to circumvent program requirements. Employers sometimes violate program requirements under the current H–2A application process, and the Department has also detected violations in other foreign worker programs it administers. Under the final rule, the Department will have more enforcement tools at its disposal than ever before to deal with such violations. The Department believes that the attestation-based process fully complies with all statutory requirements and, when utilized in concert with a strong audit and review process, represents the best means for the Department to deploy its limited resources in a manner that ensures that statutory timelines are met and that the program's integrity is maintained.

(3) Protections for U.S. Workers in an Attestation-based Process

Several commenters believed the proposed attestation-based process would not provide adequate protections for U.S. and H–2A workers because it would reduce the oversight responsibilities of the Department. Some of these commenters also said the current system should be maintained to ensure that the Department oversees worker protection, especially in the areas of housing and wages. An organization commented that while this change may ease the application process for employers it ignores the damage that could be caused by false attestations and a lack of active oversight of the job terms, recruitment, and hiring of U.S. workers. A farmworker advocacy organization questioned the change to an attestation-based process claiming there is a long history of labor abuse in agriculture and saying they believed that when ''self-inspection procedures'' are implemented they are generally based upon a prior record of compliance and an accompanying determination that resources would be better utilized in another pursuit. Another farmworker advocacy organization commented that the attestation-based process, as proposed, would further remove and diminish the Department's role in assuring all reasonable efforts to locate U.S. workers had been exhausted before foreign guest workers could be certified. Another commenter voiced concern that the proposed process would eliminate the current process of follow-up correspondence that has been instrumental in ensuring that employers have actually undertaken the required recruitment steps. A worker advocacy organization commented the proposed process, with its emphasis on meeting paper requirements, would be ''ill suited to deal with the inherent disparities in bargaining power between U.S. agricultural employers and impoverished workers from the developing world.''

The Department believes these commenters' concerns, while not invalid, are substantially resolved by the safeguards that have been built into the new process. The new program model emphasizes compliance through enforcement mechanisms such as audits, revocation of approved certifications, and debarment from the program. In light of these enforcement tools, employers will have a substantial incentive to be truthful in their representations that they cannot find U.S. workers willing to engage in agricultural work at the appropriate wage, because good-faith compliance with program obligations is necessary to maintain continued access to a legal nonimmigrant workforce. Because the rule requires pre-filing recruitment, the Department will also have an opportunity to review recruitment reports and (through its SWA partners) to conduct housing inspections before applications are approved. Job orders must also be reviewed, approved, and circulated by the SWAs before labor certifications can be granted, making it impossible for even bad actor employers to entirely circumvent the program's core recruitment requirements. Finally, it is worth noting that the bulk of the program's requirements, including requirements to pay workers at prescribed rates, maintain housing conditions, and provide transportation that complies with applicable safety requirements, have always been, and must necessarily be, enforced by the Department after the labor certification has been granted.

Although not a factor in our evaluation of the comments here, the Department also notes that many commenters who opposed the attestation-based system in this rulemaking, claiming that it will adversely affect U.S. workers, have enthusiastically endorsed proposed legislation before the U.S. Congress that would in fact mandate that the Department adopt an attestation-based application system in the H–2A program. Those organizations in their comments on this rulemaking made no attempt to explain their contradictory public positions regarding the merits of an attestation-based application system.

(4) Improvements for Employers in an Attestation-based Process

Several commenters questioned whether the proposed process would yield a simplified process for employer applicants. These commenters believed the new process requires the same amount of paperwork and only relieves employers of submitting documentation while at the same time imposes

additional requirements including post-filing audits, increased penalties, and a five-year records retention requirement. Several commenters were concerned that the attestation-based process would lead to increased liabilities for employers.

The Department does not believe that employers, attorneys, and agents wishing to comply with program obligations will be adversely affected by the institution of an attestation-based process. The process is designed to give employers specific notice of the assurances they are making to the Department and what their obligations are. Once the employer is on notice of those assurances, it is better able to understand what it must do to comply with H–2A requirements and to conform its conduct to those requirements.

A trade association of agricultural employers agreed with the shift to an attestation-based process but believed the process as outlined in the proposed regulations was not a true attestation-based process and recommended the process used in the H–1B program serve as a model. Other commenters also recommended use of a process similar to the one used in the H–1B program. Several commenters also suggested that the Department combine the *Application for Temporary Employment Certification* with the I–129 petition for simultaneous submission to the Departments of Labor and Homeland Security.

In response to the proposals to convert the proposed attestation-based process into a process modeled after the H–1B labor condition application, the statutory differences between the two programs are sufficiently substantial to make such an idea impractical. In the H–1B program, the Department is statutorily limited to reviewing the attestations made by an employer for ''completeness and obvious inaccuracies.'' 8 U.S.C. 1182(n)(1)(G)(ii). The Department believes the different H–2A statutory language suggests that a different application and review process is appropriate for the H–2A program. The Department appreciates the suggestion that simultaneous submissions to the Department and DHS could lead to further application efficiencies for employers. However, the Department believes that the complexity of the current statutory requirements for the H–2A program would make it unworkable to combine the Department's application with the petition submitted to DHS. A proposal presented by the Department several years ago to employ such a process in the H–2B program for temporary nonagricultural workers was met with significant opposition. To attempt to undertake a similar process with the significantly more complex H–2A program does not appear feasible at this time.

Some commenters appeared not to understand the proposed attestation process. The Department received comments stating that it is not clear what should be included with the attestation. The Department has accordingly clarified in the Final Rule that the application must be accompanied by the prevailing wage determinations obtained in anticipation of the recruitment for the application as well as the initial recruitment report. The employer will be required to keep all other supporting documentation in case of an audit, which means the employer should keep all records relating to compliance with the H–2A program, including advertising, job orders, recruitment logs/reports, and housing inspection requests. To eliminate any lingering confusion over document retention requirements, the Department has spelled these out in a new regulatory section (§ 655.119) in this Final Rule.

(b) SWA Involvement/Application Submission

The NPRM revised the application submission requirements by proposing to have employers submit applications only to the NPC rather than to both the NPC and SWA as currently required. Most of the comments received about this proposal were in favor of it, but a few commenters expressed concerns about the reduced role for SWAs. One person commented that eliminating the SWA involvement would leave employers who seek assistance and guidance from the government in completing applications more disposed to making errors and would increase their potential liability. A farmworker advocacy organization commented that SWA knowledge has proven useful to workers in the past and that the advantage of SWA involvement is the detailed knowledge their experienced staff can bring to bear about local agricultural practices and the use of agricultural labor in their area. The commenter also believed that the proposed process, which requires the employer to place a job order with the SWA, means that the SWA must take on faith that the employer's job offer is consistent with the terms of the H–2A application because the SWA will no longer receive a copy of the application. This organization recommended that applications should be filed with the SWA as well as the NPC so the SWA could advise the NPC if the application did not appear legitimate. A growers and producers association believed retaining responsibility for the substantive review by the NPC staff could remain a problem because of their lack of expertise related to agriculture.

A State governor suggested the process could be improved by eliminating the Department from the process. The governor believes the States know their agricultural industry better, can resolve issues more quickly, and are in the best position to identify and enforce sanctions against fraud. Conversely, a professional association of immigration attorneys recommended the SWA be eliminated from the recruitment process and, alternatively, the employer handle all recruitment for the positions, including accepting applications received as a result of a job order placed by the SWA in the interstate and intrastate system.

The Department remains committed to modernizing the application process and continues to believe the submission of applications directly to the NPC is the most effective way of accomplishing this goal. Eliminating the SWAs' participation in the application review process will provide more efficient review of applications, as well as greater consistency of review. The Department disagrees that NPC staff have insufficient knowledge of the agricultural industry; to the contrary, NPC reviewers who have handled H–2A applications have, in some cases, more experience with such applications than many SWA staff.

The SWAs will, moreover, continue to play an important role in the H–2A application process. SWAs will be responsible for posting job orders, both intrastate and interstate, under § 655.102(e) and (f) and 20 CFR Part 653, thus reducing the risk for employers to make mistakes with respect to job descriptions, minimum requirements, and other application particulars. SWAs will review the job offer, its terms and conditions, any special requirements, and the justifications therefor. As part of their duties to post job orders pursuant to 20 CFR Part 653, SWAs will also refer eligible workers to employers as well as conduct housing inspections and follow up on deficiencies in the job order. Finally, SWAs will continue an active role in conducting prevailing hourly wage, prevailing piece rate, and prevailing practice surveys.

Two commenters noted potential coordination or communication issues could result when the SWA did not also receive the application. One commenter was concerned there would be no assurance that the job order posted by

the SWA would be the same as that on the application. The other commenter pointed out the proposed regulations provided that the SWA receive a copy of the notice of deficiency when one was issued, but the SWA would not have a copy of the submitted application and thus could have inadequate information to be of assistance to the involved employer. An association of growers/producers recommended the Department provide training to H–2A employers about the need to send a formal request to the SWA to request a housing inspection and also recommended the Department notify the SWA when an application was received for processing so the SWA could, in turn, contact the employer.

The Department appreciates the concerns about the need for communication between the NPC and the SWA and reiterates that there was never any intent to eliminate the SWA from all H–2A activity. As discussed above, SWAs remain an integral partner in key respects: The placing of the intrastate/interstate job orders, conducting prevailing hourly wage, prevailing piece rate, and prevailing practice surveys, referring eligible workers, and conducting housing inspections, all activities for which SWAs will continue to receive grants from the Department. Moreover, nothing in the regulations precludes the Department from contacting SWAs, where there is reason to believe that it is necessary, to verify that the terms in the employer's Application for Temporary Employment Certification are consistent with the terms of the job offer.[2] However, SWAs will no longer process H–2A applications. Accordingly, to minimize confusion about roles and responsibilities, the Department has removed from § 655.107(a)(3) (§ 655.107(b) of the Final Rule) the provision requiring that SWAs be sent deficiency notices.

(c) Electronic Filing

The Department invited comments on the concept of a future electronic filing process for the H–2A program and received comments supporting the concept, although some also included suggestions for on-line training, the establishment of a toll-free help line, and an outreach and education component. A trade association recommended that a paper-based option should also remain available. One commenter noted that the Department did not provide an effective date for the electronic filing process.

The Department appreciates the support for electronic filing and is in the process of developing a system that will include the ability to complete and submit an application form online with sufficient security (PIN numbers, features to deter fraud and maintain system integrity, electronic notifications, etc.). The Department is aware of the need to provide outreach and training prior to the implementation of electronic filing and will involve user groups in these efforts. Additionally, the Department will ensure an adequate notice process and timeframe for transitioning to a new or revised electronic application system.

(d) H–2A Labor Contractor Applications

The Final Rule has been clarified slightly to more clearly state the obligations of H–2A Labor Contractors in filing applications. The proposed rule stated that H–2ALCs must have a place of business in the United States ''to which U.S. workers may be referred.'' Because H–2ALCs may be mobile, however, and because referrals during the season may need to be made to whatever location an H–2ALC is working at rather than to the physical location of the H–2ALC's place of business, the final rule has been modified to state that H–2ALCs must have a place of business in the United States ''and a means by which it may be contacted for employment.'' This slightly modified requirement will ensure that referrals can be made to H–2ALCs during the course of a season (where such referrals are provided for by the Final Rule), and that U.S. workers will have a means of contacting the H–2ALC to secure employment. All other changes made to the paragraph on filing requirements for H–2ALCs were purely stylistic and made for purposes of clarity.

(e) Master Applications

Both the current and proposed regulations require an association of agricultural producers filing an application to identify whether the association is the sole employer, a joint employer with its employer-members, or the agent of its employer-members. Although the current regulations do not specifically describe a ''master application'' that can be filed by associations, they are clearly contemplated by 8 U.S.C. 1188(d), and the Department has permitted them to be filed as a matter of practice. *See* 52 FR 20496, 20498 (Jun. 1, 1987) (cited in ETA Handbook No. 398).

The Department received several comments objecting to the omission of a provision in the NPRM for the filing of master applications. An association of growers/producers commented that the Department should encourage agricultural employers in small commodity groups or large associations of employers to jointly participate in the H–2A program, as this will make processing more efficient for both the Department and farmers. Another association of growers/producers stated that using an association application is the only possible solution for the H–2A program to accommodate growers who need harvest workers for a short period of time (one month or less). A major trade association also commented that the master application significantly reduces the paperwork and bureaucratic burden for the associations and its members, as well as for the Department.

A major trade association and other associations of growers/producers recommended that the Department retain and improve the master application process and fully incorporate it into the H–2A regulatory structure. The association recommended the master application also be simplified as part of the new H–2A application process. It recommended the regulations include the essential components of the master application process that has been followed in practice, including the filing of one application on behalf of multiple employers seeking workers in virtually the same occupation, permitting the association to place the required advertisements and conduct the required positive recruitment on behalf of all participants but without the listing of every individual employer in the advertisement as currently required, permitting referral of workers to the association, and allowing the association to place workers in the job opportunities. The association further recommended the master application process also apply to applications filed by associations acting as agents.

The statute governing the H–2A program requires that agricultural associations be permitted to file H–2A applications, *see* 8 U.S.C. 1188(d), and that they be permitted to do so either as agents or as employers, *see* 8 U.S.C. 1188(c)(3)(B)(iv) and (d)(2). Consequently, the Department has, as a matter of longstanding practice,

[2] There is also no prohibition preventing a SWA from contacting the Department to ensure that the employer's job order and Application for Temporary Employment Certification are consistent. As a practical matter, a SWA will rarely be able to do so before posting a job order, because Applications for Temporary Employment Certification generally are not filed with the Department under the Final Rule until at least 15 days after the job order has been submitted to the SWA. Communication between SWAs and the Department has always been essential to identifying and putting a stop to deceitful employer behavior, however, and the Department expects that such communication will continue under the Final Rule.

accepted master applications from agricultural associations. In response to the comments received on this subject, the Department has decided to include specific language concerning such applications in the regulation text at § 655.101(a)(3).

The basic theory behind master applications is that agricultural associations should be able to file a single H–2A application on behalf of all their employer members in essentially the same manner that a single employer controlling all the work sites and all the job opportunities included in the application would. Two important limitations apply to such applications. First, all the workers requested by the application must be requested for the same date of need. If an agricultural association needs workers at different times, it must file a separate Application for Temporary Employment Certification for each date of need, just as a single employer would. Second, the combination of job duties and opportunities that are listed in the application must be supported by a legitimate business reason, which must be provided as part of the application. The purpose of this limitation is to prevent agricultural associations from creating undesirable combinations of job duties and opportunities for the sole purpose of discouraging U.S. workers from applying for the jobs. So long as a legitimate business reason exists supporting the combination presented, however, the Department will deem it acceptable. An acceptable business reason for a combination of job duties and opportunities could include, for example, the efficiencies that closely proximate employers expect to gain from having access to a flexible, readily available pool of workers, even though the employers in question do not grow the same crops, which may be necessary for agricultural employers to deal with uncertain and weather-dependent planting and harvesting times.

The Department is aware that this may mean that at times a U.S. worker wishing to perform only one type of job duty, such as picking asparagus, may be required to perform an additional job duty, such as harvesting tobacco, in order to secure an agricultural job with that association. It is not at all uncommon, however, for jobs in the United States to include multiple job duties, some of which workers may view as more desirable than others. Indeed, many job opportunities offered under the current H–2A regulations include multiple job duties, some of which may be more desirable than others. There is nothing in the statute governing the H–2A program indicating that Congress intended to require agricultural employers to allow prospective workers to selectively choose which job duties they want to perform and which job duties they do not, with regard to a particular job opportunity. The Department is requiring that combinations of job duties be supported by a legitimate business reason to prevent the deliberate and unnecessary discouragement of U.S. workers from applying for job opportunities, but the Department does not believe that further restrictions on job duty combinations are warranted or necessary to fulfill the statutory criteria for certification.

(f) Timeliness of Filing Application

As required by statute, the provision stating a completed application is not required to be filed more than 45 calendar days before the date of need was retained in the proposed rule. The Department has continued that requirement in § 655.101(c). The Department received some suggestions for changes to the proposed timeframes for submitting applications. Two commenters suggested the Department should at least provide the employer with the option of applying not more than 45 days before the date of need, undertaking the recruitment after the application has been accepted, and continuing to accept referrals under the 50 percent rule.

The Department may not require an application to be filed more than 45 calendar days before the date of need under 8 U.S.C. 1188(c). The Department does not agree with the suggestion for offering employers the option of applying not more than 45 days prior to the date of need, doing post-acceptance recruitment, and continuing to accept referrals under the 50 percent rule. Given the need to maintain consistency in the program's requirements, the Department cannot offer varying options for recruitment timeframes.

(g) Emergency Situations

The NPRM did not contain the current regulatory provision (currently found at § 655.101(f)(2)) allowing the Administrator/OFLC to waive the required timeframe for application submission for employers who did not use the H–2A program during the prior agricultural season or for any employer for good and substantial cause. The Department received a number of comments objecting to its elimination. A major trade association stated the elimination would preclude many employers from legalizing their workforce simply because their decision to join the program was made too late to meet the required timeframes. Another major trade association commented that a provision allowing filing after the deadline is even more essential because the *de facto* deadline for meeting requirements under the final regulation is further in advance of the date of need than the current requirement. One association of growers/producers cited the situation following Hurricane Katrina when many employers needed to secure additional H–2A workers as an example of the need for an emergency application process.

Most of those requesting that the provision for an emergency application be reinstated also commented that if an emergency application is filed in an area of intended employment and for a job opportunity for which other employers have previously been certified for the same time frame, the emergency application should be certified immediately. These commenters also suggested that post-application recruitment could be extended for emergency applications to ensure that their availability would not create an incentive to avoid the pre-filing recruitment efforts.

The Department agrees that a provision allowing the Certifying Officer (CO) to waive the required timeframe for submission of applications in emergency situations is necessary and has included such a provision in the Final Rule at § 655.101(d). The provision, which substantially replicates the current regulatory provision governing emergency situations, requires submission of a completed application, except for the initial recruitment report that would otherwise be required, and a statement of the emergency situation giving rise to the waiver request. The emergency situation giving rise to a request for a waiver may include a lack of experience with the H–2A program obligations (including housing and transportation requirements) or for other good and substantial cause. The Department anticipates that employers who were non-users of the program during the previous year may fail to meet the filing deadline due to miscalculation of the time needed to complete the application. The Department will entertain waiver requests from employers in this situation but will consider them only after first verifying that the employer did not use the program during the prior year.

The Department is not providing an explicit definition of good and substantial cause in order to preserve flexibility when faced with unanticipated situations or conditions.

We have provided some examples in the regulatory text to assist employers in determining what might constitute sufficient cause warranting a waiver. One example provided is a dramatic change in the weather conditions resulting in a substantial change to the anticipated date of need for H–2A workers with significant attendant crop loss unless the waiver is granted. However, the employer must be able to demonstrate that the situation or condition leading to the request for a waiver was genuinely outside of the control of the employer.

The Department is requiring, in the Final Rule, that the employer who requests a waiver must conduct some recruitment as a condition for obtaining that waiver. The employer will be required to submit a job order to the relevant SWA(s) and conduct positive recruitment from the time of filing the application until the date that is 30 days after the employer's date of need. The SWA must transmit the job offer for interstate clearance as in a normal application process. We have also added a provision that requires the CO to specify a date upon which the employer must submit a recruitment report consistent with the requirements of this part.

The Department recognizes that the suggestions that waivers be approved if other applications for similar occupations and dates of need in the same geographic locations have been previously certified are intended to expedite the process. However, each application is unique and the Department must consider each request on its own merits, and therefore does not believe it should commit to approving requests solely because there have been prior approvals for employers with similar job opportunities and dates of need in the same area.

Finally, the Department made changes in § 655.101 to conform to other changes made to the rule. Such changes include, but are not limited to, changes to clarify a potential electronic filing of future applications. In addition, the Department has made non-substantive changes to enhance readability.

Section 655.102 Required Pre-Filing Activity

The Department has changed the title of this section from ''Required Pre-filing Recruitment'' to ''Required Pre-filing Activity'' to include the activities other than recruitment that are discussed in this section.

(a) Section 655.102(a) Time of Filing of Application

The NPRM proposed requiring that applications be filed at least 45 days before the employer's date of need (as required by statute) with a pre-filing recruitment period commencing no more than 120 days prior to the date of need and not less than 60 days prior to the date of need. The Department received a number of comments on the change to a pre-filing recruitment framework and the related timing for that recruitment.

The Department received multiple comments opposing this proposed timeframe; several commenters were generally opposed to the expanded timeframe and others raised more specific concerns. Several commenters questioned the Department's legal authority for a shift to pre-filing recruitment. The Department also received comments arguing that the proposed pre-filing recruitment requirement has the effect of moving the deadline for filing an application. Several commenters argued that the proposed requirement that employers begin recruitment earlier than they are required to file applications would be inconsistent with the Congressionally set timeframes and thus beyond the Department's statutory authority.

The Department disagrees strongly with the premise that its revised recruitment steps are a violation of the statute. The INA is clear that the Department may not require an application for labor certification to be filed more than 45 days prior to the date of need. *See* 8 U.S.C. 1188(c)(1). The statute is silent on how the Department implements the certification process: It does not specify when the recruitment of U.S. workers should take place, whether prior to or subsequent to filing. The INA clearly contemplates at 8 U.S.C. 1188 that recruiting U.S. workers is a separate activity from filing and considering applications, and the statute does not provide any express timeframes during which recruitment must be conducted. There is thus nothing in the statute that prevents the Department from requiring employers to recruit before filing an application, much as it requires that recruitment be conducted prior to the filing of an application in other immigration programs. The Department has determined that program integrity would be improved by being able to review a preliminary recruitment report at the time the application is filed, a requirement that is consistent with both the intent and the language of the statute.

Several commenters opined that it was not feasible for employers to make accurate assessments of timeframes and the number of workers needed so far in advance and many questioned how effective an early recruitment period would be in helping employers to locate U.S. workers who would still be available at the time the work actually began. Additionally, many commenters believed the earlier recruitment would not benefit U.S. agricultural workers seeking employment because it is inconsistent with the traditional job-seeking patterns of these workers.

Some commenters expressed concern that extending the recruitment time would either not increase the number of U.S. worker applicants for a position, or would increase the number of U.S. workers who applied for a position but would not translate into more actual workers taking the jobs, as many would not report to work. A trade association also commented that the employer is put at risk because, by the time the jobs begin, U.S. applicants may have long since changed their minds or accepted other employment. A State government agency commented that most agricultural workers would not make a commitment to a job so far in advance of the start date. One individual employer believed the proposed pre-filing recruitment would actually have the opposite effect the Department anticipates because U.S. workers would be reluctant to make commitments so far in advance of the start date. An employer association recommended that the final regulation specifically permit employers to ask workers identified during the recruitment process to attest to or affirm their intentions to actually report to work to perform the jobs.

An association of growers/producers shared its data from the 2006–2007 season which shows only 9 percent of U.S. applicants applied during the first 15 days of the current 45-day recruitment period and questioned whether a longer timeframe would yield additional applicants. The association also reported 83 percent of the applicants who applied during the initial 15-days of the recruitment period failed to report for work on the date of need, as compared to a 60 percent failure-to-report rate for applicants who applied during the last 30 days of recruitment leading up to the date of need.

Some commenters stated that the current recruitment timeframes are adequate for identifying and hiring U.S. workers and others advocated alternate timeframes. Commenters presented a number of options for the recruitment timeframe, including the current

timeframe, and options ranging between 90 to 75 days prior to the date of need for beginning recruitment and 60 to 45 days prior to the date of need for filing the application. In the words of one trade association, which was representative of the comments received on this point: ''For the sector for which H–2A is predominantly applicable—fruits and vegetables—the ability to predict months in advance when labor will be required is simply impossible.''

The Department takes seriously its twin obligations, consistent with all H–2A statutory requirements, to ensure both that an adequate workforce is available to U.S. agricultural producers and that U.S. workers have a meaningful opportunity to apply for all open agricultural job opportunities. The Department believes it can best fulfill its statutory responsibilities by requiring employers to recruit in advance of filing, which will enable employers to submit preliminary recruitment reports with their applications, giving the Department better information than it has ever had before about the availability of U.S. workers before the Department is required by the tight statutory timeframes to make a determination on an application. The current pattern of forcing positive recruitment combined with the Department's near simultaneous evaluation of the application into a substantially narrow window of only 15 days is simply inadequate to address these workforce and program integrity needs. Based on the comments received, however, the Department has come to believe that requiring employers to seek and secure a workforce 120 days in advance of need may not be practicable, given the substantial likelihood that over such an extended period variables such as weather conditions, competition from other industries for available workers, and competition among farms and crops could intervene and result in increased labor uncertainty for employers.

The Final Rule accordingly shortens the pre-filing recruitment period described in the NPRM. Employers will be required to initiate recruitment no more than 75 days prior and no less than 60 days prior to the anticipated date of need. Reducing the pre-filing recruitment time period in this manner from the time period that was proposed, while simultaneously adjusting the Department's proposal by extending the referral period beyond the date of need (discussed further below), will ensure U.S. workers have access to these job opportunities, and enable employers to recruit effectively for U.S. workers without adversely affecting planting and harvesting schedules. This revised recruitment schedule, which is closer in time to the employer's actual date of need, also addresses the commenters' concerns about the job search patterns of likely U.S. workers. The Department declines, at this time, to implement any requirement that U.S. workers affirm in writing their intent to show up for work when needed, as that is a contractual matter between the worker and the employer. The Department notes that it has afforded employers some flexibility in the Final Rule in § 655.110(e), ''Requests for determinations based on nonavailability of able, willing, and qualified U.S. workers,'' to address situations where U.S. workers have failed to appear as promised.

(b) Section 655.102(b) General Attestation Obligation

(1) General Comments Regarding the Attestations

A group of farmworker advocacy organizations commented on the language in the proposed regulation that states ''the employer shall attest that it will continue to cooperate with the SWA by accepting referrals of all eligible U.S. workers who apply.'' The organization stated it is the employer's duty to hire all qualified U.S. workers who apply and believed the proposed language did not make this clear.

An association of growers requested that the language describing the time period for acceptance of referrals be modified by adding the word ''first'' before ''begin to depart'' because not all foreign workers depart on the same date. A professional association requested the regulation be changed to permit employers to stop local recruitment efforts no more than five days prior to the date of need rather than three days as proposed. This change was requested to accommodate the actual transit time required for workers to arrive from abroad. As discussed in more detail below, the points made by these commenters have been rendered moot by changes made to this provision.

(2) The ''50 Percent Rule'' and the Cessation of Recruitment

The Department sought comments on program users' experience with the ''50 percent rule,'' which requires employers of H–2A workers to hire any qualified U.S. worker who applies to the employer during the first 50 percent of the period of the H–2A work contract. We received numerous comments and several commenters offered alternative approaches.

Several commenters questioned the Department's authority to make changes to the 50 percent rule, citing the 1986 IRCA amendments which added the 50 percent rule to the INA as a temporary 3-year statutory requirement, pending the findings of a study that the Department was required to conduct regarding its continuation. In 1990, pursuant to what is now INA § 218(c)(3)(B)(iii), ETA published an Interim Final Rule to continue the 50 percent requirement. *See* 55 FR 29356, July 19, 1990. That rule was never finalized.

As the Department stated in the NPRM, since the 1990 publication of the Interim Final Rule continuing the 50 percent rule, it has gained substantial experience and additional perspective calling into question whether the Department's 1990 decision was in fact supported by the data contained in the 1990 study, and whether the rule is in fact a necessary, efficient and effective means of protecting U.S. workers from potential adverse impact resulting from the employment of foreign workers.

The Department received several comments in support of retaining the 50 percent rule as it is currently administered. Commenters asserted that the rule is an important method for granting U.S. workers job preference over foreign temporary workers and creates an incentive for pre-season recruitment of U.S. workers. Some commenters stated their belief that many U.S. workers gain jobs under the 50 percent rule and that its elimination would deprive many U.S. workers of jobs unfairly, although these commenters did not provide any data to support their assertion.

Several commenters believed that few employers have had to lay off H–2A workers under the 50 percent rule, and that the rule has enabled many U.S. workers to secure jobs, and that elimination of the rule would unfairly deprive them of those jobs. The commenters believed that by eliminating this rule, the Department may keep U.S. farmworkers from applying for jobs they would otherwise be able to take. Other commenters believed that for those U.S. workers who learn of an H–2A job, the proposal would eliminate the protections that safeguard against employers rejecting qualified U.S. workers.

One commenter argued that the 50 percent rule provides an incentive that should be maintained to create an attractive working environment, and that it is critical to the integrity of the H–2A program. The commenter asserted that it prevents growers from engaging in practices that are tolerated by H–2A workers only because of their greater economic vulnerability and in turn

ensures that labor standards are not driven down for U.S. workers unable to compete with H–2A workers who have no choice but to endure such conditions.

While one commenter admitted that they could not provide data regarding the cost and benefits of the 50 percent rule, they expressed the belief that employers will hire fewer domestic workers without it, thereby adversely affecting an already vulnerable population. A number of commenters noted that the elimination of the 50 percent rule would make it more difficult for traditional farm workers who move with crops along the traditional migrant streams to secure jobs. The commenter believed that U.S. workers will be ''absolutely foreclosed'' from much if not most H–2A related employment if they cannot be hired just before, at, and past the date of need. An obligation to continue to hire U.S. workers after the departure of any foreign workers to the U.S. for employment was viewed by the commenter as critical to maintaining and developing a U.S. agricultural workforce.

Finally, another commenter observed that the 50 percent rule has served as an important tool for ensuring that the H–2A program does not adversely affect U.S. workers, and that at a time of increasing unemployment, the Department should not choose this particular moment to abandon these long-standing labor protections for U.S. workers.

Several other commenters argued the 50 percent rule should be abolished. These commenters argued that H–2A users have long considered the 50 percent rule to be unfair and unreasonable. They observed that no other temporary or permanent worker program has an even remotely corresponding requirement. Commenters also observed that the 50 percent rule was purportedly designed to enable domestic workers to accept agricultural employment opportunities, but that its costs outweigh its benefits. Commenters shared experiences that many of the domestic workers who apply under the 50 percent rule do so to maintain government benefits under the Unemployment Insurance program (the UI program requires unemployed workers to show that they have actively sought employment each week in order to continue benefits). They also found that while the rule does not actually provide substantial additional employment to domestic workers, it creates needless insecurity and uncertainty for H–2A workers who are employed under H–2A contracts.

A commenter from a state agency asserted that the elimination of the rule would relieve the SWA from having to track these H–2A job orders and would remove unnecessary burdens on employers. The commenter believed that there is no tangible evidence that the rule produces the desired results of increasing employment of domestic workers:

> My experience is that it is rare for [U.S.] workers to search our Internet postings for agricultural positions in the middle of a growing season. Employers find this requirement confusing and worrisome. Smaller employers have expressed concern that they could lose their fully trained and settled foreign worker(s), suddenly disrupting their operation. Unfortunately, their experience is that U.S. workers who drop in during a season have a tendency to not stay till the end of the contract period. If this practice had historically produced significant results, the government-mandated grower investment of time and money might be justifiable, but it has not.

One commenter stated that there is no need for the 50 percent rule where recruiting indicates that there are no or few local workers. The commenter also found no need for the rule in situations where the employers typically hire a large number of local workers. The commenter went on to argue that if the Department wants to retain the rule, it should do so only as a condition of approval of an application where there is evidence indicating that there are a relatively large number of local workers but the employer has indicated that it intends to hire few if any local workers.

A number of commenters observed that all available data support the view that relatively few U.S. workers desire employment in agriculture. They argued that it necessarily follows from this fact that the 50 percent rule provides almost no benefit to U.S. workers, yet its presence dissuades employers from participating in the program because of the uncertainty it creates. These commenters concluded that the rule should be abandoned. One commenter believed that if the Department wished to retain the rule, it should reserve the right to do so on a case by case basis, as a condition of approval for an application where the CO and SWA believed that insufficient local recruiting has been accomplished. The Department believes that this idea may have some merit, but has not devised a means to implement it at this time.

A number of agricultural employers commented that the rule requiring H–2A employers to hire any qualified U.S. worker during the first 50 percent of the H–2A work contract makes it very difficult for a producer to manage labor supply and costs over the life of the contract. Commenters from state agencies found that the features of the rule are seldom completely understood by the growers who need the H–2A program, adding to their impression that the entire process is complicated and rife with red tape. Another State commenter found the rule to be antiquated and ineffective.

Another commenter observed that the rule has been disruptive and non-productive for both workers and employers and that its elimination will provide much-needed stability in the workforce obtained by the employer. A commenter found that a cost-benefit analysis of the situation indicates that continuing to recruit U.S. workers beyond the date of need results in no corresponding benefit. One farmer observed,

> It's just not right that after I have made the best attempt to hire domestic workers that once halfway through the season I be forced to replace a trained H–2A worker. I really would prefer to hire local workers and keep that wage money at home, if I could find them.

Commenters from various farm bureaus around the country argued that under current conditions, the 50 percent rule is without foundation. They argued that anecdotal evidence shows that few, if any, employees referred for employment after the employer's date of need apply for or maintain their work status. They believed that agricultural employers, especially those with perishable crops, must be able to operate with greater certainty. Once an operation begins, the success of the work effort is the product of coordinated teamwork. Employers are willing to make strong recruitment efforts before the date of need, but they seek certainty and continuity once the work period has begun.

A commenter from a farming association found that the actual benefits of the 50 percent rule for domestic workers are, to all practical intent, illusory. The commenter strongly supported eliminating the rule entirely, arguing that such an approach would result in a substantial improvement in program operations. The commenter argued that while the Department has a statutory obligation to protect the rights of U.S. workers when implementing the program, it is necessary to strike a balance between the priority given to U.S. workers and the rights of employers, who have met all of the legal obligations that attach to employing H–2A workers. It went on to argue:

> The current 50 percent rule, while seemingly a provision to protect U.S.

workers, is more disruptive to farm operations and a disincentive to program participation than it is a true protection for workers. There is no reason to mandate that a grower's obligations to find and recruit eligible U.S. workers should extend past the recruitment period; imposing such an obligation serves only to disrupt operations of the producer and does little to protect U.S. workers * * *. The fact is, and all available data support this view, relatively few U.S. workers desire employment in agriculture * * *. The work is arduous, episodic, taxing, requires relatively little skill and virtually no education. Within the U.S. economy the pay—while increasing—is relatively low. These jobs provide tremendous economic opportunity for migrant workers but are not perceived as offering the same benefit to U.S. workers. In fact, approximately 10 million individuals in the U.S. economy today choose to work in jobs which pay them less than they could earn in agriculture. The 50 percent rule provides virtually no benefit to U.S. workers yet its presence has clearly been a disincentive to program participation. It should be abandoned.

Other commenters offered alternatives to the 50 percent rule including a 25 percent rule, recognizing that referrals after the date of need may serve a useful purpose but extending through 50 percent of the contract completion might be too long. One farming association suggested that the obligation to accept domestic referrals should terminate not later than three days before the date of need.

A number of state agencies suggested that SWAs should leave job orders open for 30 days after the date of need and employers should be required to offer employment to any qualified and eligible U.S. workers who are referred during that time, also recognizing that the current 50 percent of the contract period is too long and perhaps too uncertain to manage.

Another commenter similarly recommended that employers be required to begin recruitment no more than 60 days prior to the date of need and continue until between one and 30 days after the date of need, with adjustments made according to the expected duration of the job opportunity. Under this commenter's proposal, the determination of the end date for recruitment should be no earlier than the date of need, but the 50 percent rule should be revisited and adjusted to lessen its potential negative impact on the agricultural employer's workforce. Finally, another commenter suggested a continued obligation of 50 percent of the work period or 30 days, whichever is longer.

It is clear to the Department from these comments that many view the current 50 percent rule as a substantially burdensome requirement that does not provide a corresponding benefit to U.S. workers.[3] Others see the rule as benefiting U.S. workers by providing them expanded job opportunities. Based on the comments it has received and its substantial experience in operating the H–2A program, the Department believes that the 50 percent rule clearly does provide some benefits to U.S. workers, but that the rule creates substantial uncertainty for employers in managing their labor supply and labor costs during the life of an H–2A contract and serves as a substantial disincentive to participate in the program.

Based on the comments it received, the Department has decided to modify the rule. The requirements of 8 U.S.C. 1188(c)(3)(B)(iii) were fully satisfied when the Department promulgated interim final regulations on July 19, 1990. Nevertheless, the language of that provision suggests that when issuing regulations dictating whether agricultural employers should be required to hire U.S. workers after H–2A workers have already departed for the place of employment, the Department should weigh the ''benefits to United States workers and costs to employers.'' After considering its own experience and the experience of its SWA agents, the Department agrees, on balance, with those commenters who argued that the costs of the 50 percent rule outweigh any associated benefits the rule may provide to U.S. workers. It is beyond dispute that the obligation to hire additional workers mid-way through a season is disruptive to agricultural operations and makes it difficult for agricultural employers to be certain that they will have a steady, stable, properly trained, and fully coordinated work force. It is also apparent from the comments received that the current rule is poorly understood by employers, difficult for the SWAs to administer, and a disincentive for employers to use the H–2A program. Finally, the rule requires agricultural employers to incur additional unpredictable and unnecessary expenses, forcing them to choose between either hiring a greater number of workers than they actually need to complete their work part-way through a season, or discharging some or all of their H–2A workers, in which case the employer will lose its entire investment in those workers and will be required to incur the immediate additional expense to transport the workers back to their home countries. It is for all of these reasons that no other permanent or temporary worker program administered by the Department contains such a burdensome requirement, even though most of these programs are subject to similar statutory or regulatory requirements that the Secretary certify (1) that there are not sufficient workers in the United States who are able, willing, and qualified to perform the labor or services needed and (2) that the employment of the aliens in such labor or services will not adversely affect the wages and working conditions of workers in the United States similarly employed.

It is clear to the Department that the current 50-percent rule does provide some benefits to U.S. workers, since at least some U.S. workers secure jobs through referrals made pursuant to the rule. The number of such hires, however, appears to be quite small. Moreover, the comments indicate that many workers hired pursuant to the 50-

[3] In December 2007, the Department commissioned a survey of stakeholder representatives to evaluate the effectiveness of the 50 percent rule as a mechanism to minimize adverse impacts of the H–2A program on U.S. farm workers. The Department had conducted a similar study of the impact of the 50 percent rule in 1990, but upon reviewing that study as part of the H–2A review which led to this recent NPRM the Department concluded that it was of limited utility because it covered only two states—Virginia and Idaho—and because, given the significant changes that have occurred in the field of agricultural employment over the last two decades, it was substantially out of date. The surveyors for the new study conducted interviews with a number of stakeholders to gather information on the impact of the 50 percent rule and how it is currently working. The surveyors queried a far more representative sample of entities affected by the 50 percent rule than the 1990 study had, including employers, state workforce agencies, and farm worker advocacy organizations.

While the new study identified a diversity of opinion about the value and effectiveness of the current 50 percent rule, the researchers found that the rule ''plays an insignificant role in the program overall, hiring-wise, and has not contributed in a meaningful way to protecting employment for domestic agricultural workers.'' *See* ''Findings from Survey of Key Stakeholders on the H–2A '50 Percent Rule','' HeiTech Services, Inc. Contract Number: DOLJ069A20380, April 11, 2008. The researchers estimated that the number of agricultural hires resulting from referrals to employers during the 50 percent rule period was exceedingly small, with H–2A employers hiring less than 1 percent of the legal U.S. agricultural workforce through the 50 percent rule. All of the categories of surveyed stakeholders, including employers, state workforce agencies, and even farm worker assistance and advocacy organizations, reported that U.S. workers hired under the 50 percent rule typically do not stay on the job for any length of time when hired, frequently losing interest in the work when they learn about the job requirements. Many of the survey respondents, including representatives from each of the three groups, suggested that the rule should be either eliminated or modified.

The Department did not specifically rely on either of the two surveys in crafting the Final Rule. It does, however, believe that the information provided adds some additional depth to the discussion contained in this preamble. Accordingly, it has posted the studies on the Department's Web site.

percent rule do not complete the entire work period, adding costs to employers and further diminishing the total economic benefits derived from the rule by U.S. workers. It is also relevant that under the Final Rule, the period of time that a job order is posted by a SWA prior to an employer's dates of need has been substantially expanded from the current rule, which will provide U.S. workers with more up-front information about agricultural job opportunities, rendering mandatory post-date-of-need hiring less necessary.

In sum, after considering the best information currently available, the Department has concluded that the benefits of the 50-percent rule to U.S. workers are not, on balance, sufficient to outweigh its costs. The Department has also determined that modifying or eliminating the 50-percent rule would not compromise the Department's ability to ensure that U.S. workers are not adversely affected by the hiring of H–2A workers, just as the absence of a 50-percent rule from the other permanent and temporary worker programs administered by the Department has never been thought to compromise the Department's ability to ensure that U.S. workers are not adversely affected by the hiring of foreign workers under those programs. If it is true, as some commenters suggested, that some U.S. agricultural workers simply drift from employer to employer without paying attention to actual advertising about agricultural job opportunities, the Department is confident that farm worker advocacy and assistance organizations will help to spread the word about advertised agricultural job openings, much as they do today. The available hiring and referral data strongly suggest, however, that such workers only rarely secure their jobs through the 50-percent rule today. It is also worth noting that to the extent workers can identify agricultural job openings before those jobs have started, they will gain the additional benefit of a longer period of employment.

Despite these conclusions, the Department is concerned that the sudden and immediate elimination of the 50-percent rule might prove disruptive to the access of some U.S. workers to agricultural employment opportunities. If some U.S. workers have become accustomed to the ability to secure H–2A-related employment after the jobs have already started, those workers may benefit from a transition period that will allow those workers to adjust their employment patterns. A transition period would also allow the Department to collect additional data about the costs and benefits of mandatory post-date-of-need hiring under the new rule structure over a period of several years, allowing the Department to assure itself that its initial conclusions regarding the rule are sound.

For these reasons, the Department has created a five-year transitional period under the Final Rule during which mandatory post-date-of-need hiring of qualified and eligible U.S. worker applicants will continue to be required of employers for a period of 30 days after the employer's date of need. In determining precisely what form mandatory hiring should take during this transitional period, the Department considered all of the various options presented by commenters. Several commenters suggested limiting the period during which employers are required to engage in mandatory post-date-of-need hiring to 30 days. The Department has adopted this suggestion as the transitional period rule, both for ease of administration and to minimize the extent to which the various costs and considerations outlined above will burden employers during the transition. The Department believes that the use of this 30-day post-date-of-need mandatory hiring period during the five-year transition period will allow a smooth adjustment of the expectations of U.S. workers and will provide the Department additional time to collect data on the effect of the rule. At the end of the transition period, the mandatory post-date-of-need hiring requirements under the Final Rule will expire, and employers will only be required to accept referrals of U.S. workers until the first date the employer requires the services of H–2A workers. However, the Department intends to conduct a study of the impact of this transitional 30-day rule on U.S. workers and on employers during the five-year transition period, and under the rule retains the ability to indefinitely extend the 30-day rule by notice published in the **Federal Register** should the Department's study determine that the rule's benefits outweigh its costs.

We believe this framework addresses the concerns of many of the commenters, both for and against continuation of the 50-percent rule, and strikes an appropriate balance between the concerns of agricultural employers and the need to protect U.S. workers' access to the employment opportunities under the H–2A program. Having a set period of time during the transition period, not tied to a percentage of the contract length, will provide employers more predictability and be easier to administer for employers, workers and SWAs making referrals. The language of § 655.102(b) as originally proposed implied that mandatory post-date-of-need hiring would no longer be required by the H–2A regulations. The language creating the transitional 30-day mandatory hiring period outlined above may be found at § 655.102(f)(3) of the Final Rule.

To the extent that the 30-day rule applies, the employer would require similar safeguards as under the 50-percent rule so long as the employer continues to have an affirmative obligation to hire U.S. workers beyond the date of need. Accordingly, the Department has included a provision in § 655.102(f)(3)(ii) of the Final Rule on the prohibition of withholding of U.S. workers. The provision is similar to the provision in § 655.106(g) of the current regulations, but has been modified to reflect the centralization of the application process with the NPC. Under the final rule, the CO, and not the SWA, receives and investigates the complaint and makes a determination whether the application of the 30-day rule should be suspended with respect to the employer.

(c) Section 655.102(c) Retention of Documentation

The Department proposed in the NPRM a 5-year retention requirement for all H–2A applications and their supporting documents. The vast majority of commenters who provided observations on this provision voiced concern with the proposed 5-year document retention period and recommended 3 years, stating that they did not have adequate staff to comply with the requirement or that it is not an industry standard and not legally consistent with other regulations and might even discourage use of the H–2A program. The Department has reconsidered its position and has changed the retention requirement to 3 years.

One commenter suggested that all record retention requirements and periods be combined into one section of the amended regulations to provide program participants with clearer guidance for these obligations. The Department agrees and has added a new § 655.119 to the regulatory text. The new section lists all the document retention requirements.

Another commenter requested that the Department add a sentence to the rule indicating that the employer is not liable for eliminating records after the retention period expires. The Department has not added an express provision to this effect, as we believe the cessation of the employer's

responsibility to retain the records after the retention period expires is self-evident. The Department suggests, however, that there may be some benefits to employers keeping records beyond the required 3-year period; if the employer later faces an allegation of fraud or some other alleged violation that has a statute of limitations of longer than 3 years, retained documents may help the employer defend itself. Indeed, if a proceeding or investigation relating to the retained records has already been initiated, it should be understood that the employer is obligated to retain the records that are the subject of the proceeding or investigation until it has come to a conclusion.

One commenter requested that the Department allow applicants who are denied certification to discard records 180 days after the denial. The Department has decided to eliminate the requirement to retain records pertaining to denied certifications in its entirety. If an application is denied on grounds of fraud or malfeasance, the Department expects that it will have already obtained copies of any documents necessary to prove the fraud or malfeasance during the process of denying the certification, and thus the retention of such documents by the employer would be needlessly duplicative. Under the Final Rule, any employer who has been denied certification can discard the records immediately upon receiving the denial notice, or, if the employer appeals the decision, whenever the decision to deny certification becomes final. If the denial is ultimately overturned on appeal and certification is granted, the application of course becomes subject to the document retention requirements for approved cases.

A SWA requested that we define who is responsible for monitoring the documentation and ensuring compliance. This Final Rule places responsibility squarely with the employer to maintain the documentation. The NPC, through the audit function as well as the other enforcement tools at its disposal, will ensure compliance. SWAs would not be responsible for monitoring documentation or ensuring compliance with this provision.

(d) Section 655.102(d) Positive Recruitment Steps

The Department proposed ''positive recruitment'' steps including posting a job order with the SWA serving the area of intended employment; placing three print advertisements; contacting former U.S. employees who were employed within the last year; and recruiting in additional States designated by the Secretary as States of traditional or expected labor supply.

Many commenters, primarily employers and employer associations, expressed concerns with the specific proposed pre-filing recruitment steps. Many argued that the proposed longer recruitment period and increased advertising would simply increase the cost of the recruiting effort without increasing the benefits and that the increased steps were duplicative. These commenters believe that their workforce shortage problem is not due to a lack of awareness of available jobs, but rather is because of a lack of willing and available U.S. workers. They suggested that rules be promulgated to use only the current state employment service system and not require agricultural employers to perform a substantial prolonged search for U.S. workers before being able to apply for an H–2A labor certification. According to these commenters, the time required in the current rules is sufficient to identify and notify the U.S. work force of the availability of particular jobs.

Requiring pre-filing recruitment is, in the Department's view, essential to the integrity of an attestation-based process. Only with sufficient time for adequate recruitment can the Department ensure that the potential U.S. worker pool is apprised of the job opportunity in time to access that opportunity. The current recruitment time frame, in which employers file applications 45 days prior to the date of need, recruit for 15 days thereafter, and in which a CO must adjudicate the application no later than 30 days prior to need, has proven unworkable. COs are today certifying the absence of U.S. workers based on, at best, a handful of days of recruitment activity, which is insufficient to apprise U.S. workers of job opportunities through either the SWA employment service system or other positive recruitment activities.

The belief of some commenters that the time allotted in the present regulatory scheme for recruiting is sufficient to canvass the potential U.S. workforce is, in the Department's view, incorrect. The Department has heard significant concerns voiced by the farmworker advocate community that there is an inability to access job opportunities within the short recruitment period provided in the current system. The Department takes seriously these concerns about the length of the recruitment, particularly in light of the Department's modification of the 50 percent rule (discussed above with respect to § 655.102(b)) and the possibility that it will be phased out entirely after a period of five years. The movement of the recruitment period to a time prior to the filing of the application provides a clear and well-defined time for the employer to make available and for the U.S. farmworker to access job opportunities, and provides the Department with better information with which to make its certification determination. The establishment of a 30-day post-date-of-need referral period for the next five years further ensures that the expectations of workers will not be unduly disrupted.

A trade association recommended SWAs be removed from the recruitment process altogether, and only be involved in the inspection of worker housing and workplace conditions after approval of the labor certification and visa and the commencement of work. A State agency representative recommended the SWAs receive copies of the ETA–750 (*Application for Temporary Employment Certification*) and ETA–790 not for review but to ensure the SWA would have access to accurate information.

The Department notes that it is statutorily prohibited at this time from amending the Wagner-Peyser regulations to remove SWAs from the H–2A process. *See* Public Law 110–161, Division G, Title I, Section 110. Nor does it believe such a step would be beneficial at this time. SWAs provide an effective means of completing many required activities, such as inspections of employer-provided housing. SWAs are also integral to the process of receiving and posting agricultural job orders. The Department declines to require that SWAs also receive the form ETA–750, as they will receive far more significant information in the form ETA–790 job clearance order request.

A group of farmworker advocacy organizations also claimed that the proposed changes to the recruitment process were inconsistent with INA requirements, portions of the Wagner-Peyser Act, and MSPA. The organization believed the proposed regulations changed the standards for employer recruitment efforts to the detriment of U.S. workers and did not address recruitment violations that had been uncovered in the past. Specifically, the organization objected to the elimination of the standard for positive recruitment based on comparable efforts of other employers and the H–2A applicant employer as found in the current regulation at § 655.105(a). This organization was also concerned about the elimination of the current provision requiring that ''[w]hen it is the prevailing practice in the area of employment and for the occupation for

non-H–2A agricultural employers to secure U.S. workers through farm labor contractors and to compensate farm labor contractors with an override for their services, the employer shall make the same level of effort as non-H–2A agricultural employers and shall provide an override which is no less than that being provided by non-H–2A agricultural employers.'' 20 CFR 655.103(f). The organization made several recommendations for revisions regarding recruitment, including preserving the burden on the employer (under Departmental review) to identify and positively recruit in locations with potential sources of labor, and the obligation to work with the SWA to do so; retaining current regulatory provisions requiring that employers engage in the same kind and degree of recruitment for U.S. workers as they utilize for foreign workers; and requiring adequate compensation of farm labor contractors who find U.S. workers. Additionally, it recommended preserving the role of SWAs contained in the current regulations and detailed in the internal Departmental H–2A Program Handbook.

Other commenters expressed concern that the Department's proposal to reduce the scope and type of required recruitment efforts while increasing the length of time to perform recruitment was primarily intended to streamline the program, but would not actually benefit U.S. workers. These commenters disagreed with the proposed rule's elimination of the current regulatory requirement to contact farm labor contractors, labor organizations, nonprofits and similar organizations to recruit domestic employees. If the Department seeks to revise the current recruitment practices, in the opinion of these commenters, it would be more effective to maintain or increase current recruitment standards, while giving agricultural employers additional time within which to meet their obligations; otherwise the Department is reducing opportunities for U.S. workers.

One commenter suggested that the Department bolster word-of-mouth recruitment because it is, in the commenter's opinion, the only way that U.S. workers find out about jobs in the agricultural sector and it encourages free-market competition as long as the information is accurate. This commenter believes too many H–2A employers do not provide accurate information to U.S. workers because it is in their best interests to hire H–2A workers who must stay tied to that employer for the entire agricultural season.

While the Department appreciates the concerns expressed, it believes these concerns are misplaced in light of the recruitment methods that the Department will be requiring employers to undertake under the Final Rule. The Department will continue, and in some respects expand, those core positive recruitment requirements that have a proven track-record of providing cost-effective information to U.S. workers about available job opportunities. For example, the Final Rule retains the current requirement that employers run two newspaper advertisements in the area of intended employment, but expands that requirement, as laid out more fully in § 655.102(g), by requiring that one of the advertisements be placed on a Sunday, which typically is the newspaper edition that has the highest circulation. The Department declines, however, to continue obscure and difficult-to-administer provisions requiring employers and the Department to abstractly measure the amount of ''effort'' that employers put into their domestic positive recruitment, or to determine precisely what the prevailing practice is in a given area with respect to the payment of labor contractor override fees. Provisions that call for the measurement of employer effort require the Department to make highly subjective judgments and are extremely difficult to enforce. Moreover, the Department's program experience has shown that most of the discontinued recruitment methods cited by commenters—radio ads and contacting fraternal organizations, for example—substantially add to the burden of using the program, but add little to the total amount of information about agricultural job opportunities that is made available to U.S. workers through the positive recruitment methods that are required by the Final Rule. The elimination of specific requirements to contact entities such as fraternal organizations does not mean that interested entities will be entirely deprived of information about open agricultural job opportunities. Rather, it means that interested entities should pay attention to newspaper advertisements and SWA job orders.

The Department appreciates the suggestion that it should develop methods for encouraging word-of-mouth as a recruitment tool, and that word-of-mouth is frequently a successful way for U.S. workers to learn about job opportunities. We do not believe that word-of-mouth recruitment can effectively be mandated by regulation, however. Rather, the Department anticipates that word-of-mouth communication will be instigated by the positive recruitment efforts that the Final Rule requires, particularly through the assistance of farm worker assistance and advocacy organizations, which can spread the word about available job openings.

The Department takes seriously its statutory obligation to determine whether there are sufficient numbers of U.S. workers who are able, available, willing, and qualified to perform the labor or services involved in the petition and to ensure that U.S. workers' wages and working conditions are not adversely affected by the hiring of H–2A workers. The Department believes that the positive recruitment methods it has selected for inclusion in the Final Rule—the use of newspaper advertisements, the state employment service system, contact with former workers, and recruitment in traditional or expected labor supply States—provide notice of job opportunities to the broadest group of potential applicants in an efficient and cost-effective manner, while avoiding burdening employers with requirements that have proven costly and at times difficult to administer without yielding clear benefits. The Department notes that employers stand to gain a great deal from recruiting eligible U.S. workers rather than incurring the considerable time and expense of securing foreign workers from thousands of miles away. The various provisions of these regulations, including wage, housing, and transportation requirements, ensure that it is virtually always more expensive for employers to hire H–2A workers than it is for them to hire U.S. workers outside the H–2A program. Thus, employers have significant incentives to use the positive recruitment methods prescribed by these regulations to maximum effect, and the Department is confident that these methods will adequately spread the word to U.S. workers about available job opportunities. The Department expects that many employers will also engage in additional recruitment efforts that can, in the absence of rigid and overly prescriptive regulatory requirements, be flexibly tailored to the particular circumstances of local labor markets.

(e) Section 655.102(e) Job Order

Proposed § 655.102(e) required that, prior to filing its application with the NPC, the employer place a job order, consistent with 20 CFR part 653, with the SWA serving the area of intended employment. The NPRM also required the job order to be placed at least 75 but no more than 120 days prior to the anticipated date of need.

Several commenters focused on the requirements for placement of the job order. Three commenters posited that the rule would create problems for program users by establishing requirements for acceptable job offers that are subject to the Department's discretion, while employers would have to conduct the recruitment before the terms and conditions of the employer's job offer have been reviewed and approved by the Department. According to these commenters, the rule is silent on what happens if, after the employer conducts the pre-filing recruitment, the Department does not approve the employer's job offer. Under the current program, the recruitment would be considered invalid, and the employer would be required to revise the job offer and repeat the recruitment. This situation, according to these commenters, introduces an unacceptable degree of uncertainty and risk into the process. A trade association further commented that, because there will be no prior approval of the job offer by the NPC, all SWAs would be independently interpreting and making decisions about the job offers, and believed that such a process would lead to inconsistencies among SWAs. The association was also concerned there would be inconsistency between what a local SWA employee would accept and what the CO would later find acceptable. The association recommended retaining the existing process as an option for employers.

The Department requires that the employer submit an acceptable job order (current form ETA–790) to the appropriate SWA for posting in the intrastate and interstate clearance system. The ETA–790 describes the job and terms and conditions of the job offer: the job duties and activities, the minimum qualifications required for the position (if any), any special requirements, the rate of pay (piece rate, hourly or other), any applicable productivity standards, and whether the employee is expected to supply tools and equipment. This form is submitted to the SWA for acceptance prior to the employer's beginning positive recruitment. As long as the employer's advertisements do not depart from the descriptions contained in the accepted job order, the advertisements will be deemed acceptable by the Department. Thus, employers should place advertisements after the form ETA–790 has been accepted for intrastate/interstate clearance, eliminating any chance that recruitment will later be rejected by the NPC due to problems with the job offer and corresponding advertisements.

The Department also does not anticipate significant problems in uniform decision making among SWAs. SWAs will be, as they have been for some time, the primary arbiter of whether job descriptions and job orders are acceptable. In response to comments on the subject, however, the Department has clarified in the text of the rule that employers may seek review by the NPC of a SWA rejection, in whole or in part, of a job description or job order. The regulations have also been revised to permit the NPC to direct the SWA to place the job order where the NPC determines that the applicable program requirements have been met and to provide the employer with an opportunity for review if the NPC concludes that the job order is not acceptable. This modification renders concrete what has long been the informal practice with respect to H–2A related job orders, as the NPC has worked hand-in-hand with the SWAs to ensure that job orders comply with applicable requirements. It is also implicit in the status of the SWAs as agents of the Department, assisting the Department in the fulfillment of its statutory responsibilities.

One trade association noted that the job order must be filed in compliance with part 653, and that § 653.501 requires that the employer give an assurance of available housing as part of the job offer. This commenter opined that this would be impossible to do since employers cannot guarantee the availability of housing that far in advance for purposes of using the proposed housing voucher. The Department's disposition of the proposed housing voucher, discussed below, renders this comment moot.

The same commenter noted that § 653.501(d)(6) requires that the SWA staff determine whether the housing to be provided by the employer meets all of the required standards before accepting a job order, and argued that this would be an impossible task 120 days before the actual date of need, as the proposed rule purported to allow. As explained above in the discussion of § 655.102(a), the Department has amended the timeframe for recruitment by moving the first date for advertising and placement of the job order to no more than 75 days and no fewer than 60 days prior to the date of need. Moreover, in response to the comments received, the Department has specified in the Final Rule that SWAs should place job orders into intrastate and interstate clearance prior to the completion of the housing inspections required by 20 CFR 653.501(d)(6) where necessary to meet the timeframes required by the governing statute and regulations. This will maximize the time that job orders are posted, providing better information to workers. The Final Rule further directs SWAs that have posted job orders prior to completing a housing inspection to complete the required inspections as expeditiously as possible thereafter. This provision is consistent with the current regulations, which already permit job orders to be posted prior to the completion of a housing inspection pursuant to § 654.403. If a SWA notes violations during a subsequent housing inspection, and the employer does not cure the violations after being provided a reasonable opportunity to do so, the corresponding job order may be revoked. With these amendments, the Department believes it has adequately addressed the concerns contained in this comment.

In addition, a group of farmworker organizations objected to the use of the language ''place where the work is contemplated to begin'' in describing which SWA should receive a job order when there are multiple work locations within the same area of intended employment and the area of intended employment is found in more than one State. It believed this language would allow employers to choose where they wanted to recruit U.S. workers simply by ''contemplating'' that the work would begin in an area unlikely to have U.S. workers. The Department received other comments that supported this requirement. After considering these comments, the Department has revised the language of the provision to state that an employer can submit a job order ''to any one of the SWAs having jurisdiction over the anticipated worksites.'' The revised language affords employers some flexibility in determining where to initially send job orders, but it does not allow employers to use this flexibility to avoid recruitment obligations, as § 655.102(f) provides that the SWA that receives the job order ''will promptly transmit, on behalf of the employer, a copy of its active job order to all States listed in the job order as anticipated worksites.'' Thus, no matter where the job order is initially sent, the scope of required recruitment will be the same, covering all areas in which anticipated worksites are located.

A sentence has also been added to the Final Rule, simply as a procedural direction to the SWAs, that ''[w]here a future master application will be filed by an association of agricultural employers, the SWA will prepare a single job order in the name of the

association on behalf of all employers that will be duly named on the Application for Temporary Employment Certification.''

(f) Section 655.102(f) Intrastate/Interstate Recruitment

The proposed regulation instructs the SWA receiving an employer's job order to transmit a copy to all States listed as anticipated worksites and, if the worksite is in one State, to no fewer than three States. Each SWA receiving the order must then place the order in its intrastate clearance system and begin referral of eligible U.S. workers.

The Department received some general comments regarding the referral process for U.S. workers. One group of farmworker advocacy organizations expressed concern about the lack of referrals by SWAs to H–2A employers in the past and believed the proposed regulation would not cure this deficiency. One association of agricultural employers expressed concern regarding the ability of the SWAs to adequately handle the referral process.

The Department believes these concerns are misplaced, especially under a modernized system in which SWA responsibilities with respect to each H–2A application is reduced. A core function of the SWA system is the clearance and placement of job orders and the referral of eligible workers to the employers who placed those job orders. Past program experience demonstrates the occurrence of a sufficient number of referrals to sustain this requirement.

One SWA commented that although the NPRM states the purpose of removing the SWA is to remove duplication of effort, one important duplicative effort is retained—the requirement for sending job orders to other labor supply States and neighboring States. This agency suggested that if the job orders are uploaded to the national labor exchange program, then the transmittal of job orders to other States is unnecessarily duplicative. Other commenters recommended all agricultural job orders be posted in an automated common national job bank.

The Department acknowledges the potential benefits of a national online system for posting job offers. However, automating interstate job clearance would require regulatory reforms that the Department is currently constrained from undertaking by Congress. *See* Public Law 110–161, Division G, Title I, Section 110. There is currently no online national exchange organized under the auspices of the Department to which such jobs could be posted. The Department's former internet-based labor exchange system, America's Job Bank, was disbanded in 2007 because the private sector provides much more cost-effective and efficient job search databases than the federal government can provide. The Department, however, does not wish to impose mandatory participation in such job databases on SWAs or employers at this time. Because the Department already has an existing system in place for handling interstate job orders, and given the current legal and operational constraints of changing that system, the Department has determined that the only feasible and prudent approach at this time is to continue to require SWAs to process the interstate job orders in accordance with 20 CFR Part 653.

An association of growers/producers opposed the requirement for transmitting job orders to additional States and recommended the job orders be circulated only in the State where the job is located. This association also suggested that any out of State notifications should list only the location of the job offer and never list the employer's name.

The Department's circulation of the job order to any States that are designated by the Secretary as labor supply States is required by statute. Section 218(b)(4) of the INA prohibits the Secretary from issuing a labor certification after determining that the employer has not ''made positive recruitment efforts within a multi-state region of traditional or expected labor supply where the Secretary finds that there are a significant number of qualified United States workers who, if recruited, would be willing to make themselves available for work at the time and place needed.'' The interstate recruitment must be conducted ''in addition to, and shall be conducted within the same time period as, the circulation through the interstate employment service system of the employer's job offer.'' The Department does not have the ability to eliminate or alter the requirement absent Congressional amendment.

At the same time, the Department does not read the statutory language to require the Secretary to designate traditional or expected labor supply States with respect to all States in which H–2A applications may be filed. Rather, the Department believes that the statutory language is most reasonably read to require the Secretary to make a determination for each area (which the Secretary has elected to do on a State-by-State basis) whether, with respect to agricultural job opportunities in that area, there are other areas (which the Secretary has also elected to examine at the State-by-State level) in which ''there are a significant number of qualified United States workers who, if recruited, would be willing to make themselves available for work at the time and place needed.'' In other words, the Department reads the statute as contemplating that with respect to agricultural job opportunities in certain States at certain times, as a factual matter there simply will not be other States in which there are ''a significant number of qualified United States workers who, if recruited, would be willing to make themselves available for work at the time and place needed.'' Under this reading of the statute, the word ''where'' in 8 U.S.C. 1188(b)(4) essentially means ''if'': *If* the Secretary determines that the statutory criteria have been met, then she is required by the statute to designate the area of traditional or expected labor supply, but *if* the Secretary determines that the statutory criteria have not been met, then the requirement is simply inapplicable. This sensible reading of the statute comports with the realities of the agricultural sector: The pattern of seasonal migrant work has clearly changed over time, and in some cases older patterns have become well-established while others have fallen away. The changeable nature of the agricultural labor flow, which is highly dependent upon weather patterns, crop distribution, the availability of transportation, and even the price of gasoline, are all recognized under this system of flexible, fact-specific designations by the Secretary.

A group of farmworker advocacy organizations pointed out that the proposed regulations do not provide a timeframe for how long the local SWA can wait before placing the H–2A job order into interstate clearance, and only require the SWA to ''promptly transmit'' the job offer. The Department does not believe that its requirement of ''prompt'' transmission requires further clarification, however. Posting job orders is one of the core functions of the SWAs, and the Department is confident the SWAs will continue to act responsibly in promptly transmitting and posting job orders as they have in the past.

The organization was also concerned about the clarity of the instructions to be followed by SWAs for circulating job orders among other States. The proposed regulations require the SWA to transmit a copy of the open job order to all States listed in the employer's application as anticipated worksites or, if the employer's anticipated worksite is

within a single State, to no fewer than three States, including those designated as traditional or expected labor supply States. However, the organization believed the proposed regulation would be read to not require any additional job order circulation by the SWA if the employer has anticipated worksites in two States, and thus would provide less circulation of job orders and no contact of labor supply States in such situations. The Department agrees and has clarified the language of § 655.102(f)(1) by removing the phrase, ''If the employer's anticipated worksite location(s) is contained within the jurisdiction of a single State'' to make clear that job orders with locations in more than one State must be circulated to any traditional or expected labor supply States designated by the Secretary for either of the work locations.

An attorney for an association of growers/producers suggested the H–2A process could be further improved by allowing State officials to affirm that employers need agricultural workers in their State. The Department believes it cannot implement such an affirmation process, as similar processes for determining the unavailability of U.S. workers have been found to be insufficient for the factual determination required by the Secretary. *See First Girl, Inc.* v. *Reg. Manpower Admin. DOL*, 361 F. Supp. 1339 (N.D. Ill. 1973) (availability of U.S. workers could not be determined by generic listing of available workers listed with state agency).

A public legal service firm recommended that the Department require employers to circulate all job orders in Texas, which they said is a traditional agriculture labor surplus state. If the commenter's factual assertions about labor availability in Texas are correct, the Department would expect that Texas will frequently be designated as a labor supply State. The Department is cognizant of the changeable nature of worker flows, however, and therefore does not wish to require the mandatory inclusion of one or more specific States in the designation process. It is subject to question, for example, whether significant numbers of agricultural workers in Texas would be willing to accept seasonal employment in Alaska or Hawaii. Rather, the Department will rely on annually updated information in designating labor supply States to ensure the accuracy of the assertions that farm workers are indeed available in the purported labor supply State and that recruitment there for out of State jobs would not take needed workers away from open agricultural jobs in the labor supply State. In response to these concerns, however, the Department notes it will announce, at least 120 days in advance of the Secretary's annual designation, an opportunity for the public to offer information regarding States to be designated.

Finally, a group of farmworker advocacy organizations expressed concern regarding the content of job orders placed by agricultural associations. It objected to the placement of job orders with a range of applicable wage offers with a statement that ''the rate applicable to each member can be obtained from the SWA.''

In promulgating this rule, the Department made no changes to current practice. An association is permitted to pay a different wage for each of its members, should it choose to do so, as long as that wage meets the criteria established in the regulations (now found at § 655.108). U.S. workers seeking a job opportunity from or within an association can acquire from the SWA a list of member locations and the wages associated with each so that the worker can make a fully informed decision as to which job, if any, the worker wishes to apply.

We made several minor edits that are consistent with the above discussion to the language of § 655.102(f) for purposes of clarity. Some language was also moved to other sections or deleted, again for purposes of clarity and without substantive effect. Section 655.102(f)(3), which describes the recruitment period during which employers are required to accept referrals of U.S. workers, was added to the rule for reasons described at length in the discussion of the 50 percent rule under § 655.102(b).

(g) Section 655.102(g) Newspaper Advertisements

The Department proposed that in addition to the placement of a job order with the SWA, employers be required to place three advertisements (rather than the current two) with a newspaper or other appropriate print medium. Most who commented on this suggestion believed the additional advertising would result in additional costs without any additional benefits. An association of growers/producers stated: ''Additional newspaper advertising is a very expensive alternative of recruiting workers in today's world and should not be the only method allowed.''

A trade association also questioned the expansion of the advertising requirements in the proposed regulations and commented that newspapers are not a usual or even occasional source of labor market information for farm workers. The association and other commenters referenced the National Agricultural Worker Survey (NAWS) which reported that percent of seasonal crop workers (both legal and illegal) learn about jobs from a friend or relative or already know about the existence of the job (although how such knowledge is attained was not reported). The association further commented that the proportion of workers who learn about their jobs from a ''help wanted'' ad was apparently too small even to warrant inclusion in the report. Several of these commenters suggested it would be more efficient to simply allow for posting to the SWA's job bank which is more practical, less expensive, and reaches applicants more readily.

A few employers objected to the very concept of newspaper advertising. One employer objected to having to advertise in a newspaper, commenting that newspaper advertisement is ''not only expensive, but doesn't find any hiding sheep shearers.'' Another employer objected to the increase in required newspaper advertising for U.S. workers ''when it is clear that local workers are simply not available for seasonal jobs.'' Many commenters were particularly concerned that increasing the number of ads from two to three in addition to requiring that one be placed in a Sunday edition would greatly increase employer costs. One trade association commented that it is likely that in the typical situation an employer's advertising costs would increase by three to four times under the proposed regulations, adding hundreds to thousands of dollars to the employers' application costs. That commenter did not provide data supporting this conclusion, however.

Several commenters were in favor of the proposal to increase advertising and expressed support for the additional ad in the expectation it would provide additional notice to the target population. An association of growers/producers supported the increase in advertisements from two to three, believing it would enhance the ability of an eligible U.S. worker to identify and apply for agricultural job openings before the job begins. A farmworker/community advocacy organization agreed that requiring three instead of two advertisements would be a step toward improving the recruitment of U.S. workers.

The Department appreciates that a newspaper ad frequently may not, of itself, result in significant numbers of U.S. workers applying for employment. However, such advertising has been required for decades and remains the central mechanism by which jobs are

advertised, especially to workers who may have only limited access to the Internet. The ads may not necessarily be seen by all farmworkers, but may be, and indeed are, seen by those who participate in the greater farm work community and who can pass along a description of the jobs ads through ''word-of-mouth.'' Newspaper advertising remains, along with the state employment service system network, an objective mechanism by which notice of upcoming farm work can be assessed by the Department and communicated to those who are interested.

The study referenced by many commenters suggesting that most referrals in the agricultural sector take place through word-of-mouth rather than through newspaper advertisements was actually conducted by the Department, and, as noted above, the Department acknowledges that word-of-mouth frequently results in U.S. workers learning about job opportunities. However, the Department believes it would be nearly impossible to effectively implement and enforce a word-of-mouth regulatory standard. The Department believes the combination of job orders and required newspaper advertisements are cost-effective, easily administrable, and readily enforceable, and will make job information available in ways that will result in word-of-mouth referrals.

Although it may be true that few agricultural workers themselves read such advertisements, others do read them, including farm labor advocacy organizations, community organizations, faith-based organizations, and others who seek out such opportunities on behalf of their constituents. The newspaper becomes a very visible source of information for such organizations that are in turn able to spread the word to workers. Through publication to this wide audience, the information ultimately reaches those for whom it is intended.

The Department appreciates the substantial concern raised by a number of commenters regarding the placement of multiple ads and has thus revised its proposal on the number of ads that must be placed in the area of intended employment. The Department has decided to revert from the proposed three to the existing rule's requirement for two ads. The Department is retaining its proposal, however, to require that one of the newspaper advertisements be run on a Sunday, as that is typically the newspaper edition with the broadest circulation and that is most likely to be read by job-seekers.

In response to the various comments about the proposed advertising requirements, the Department is also slightly modifying the language of § 655.102(g)(1) to provide some limited flexibility in selecting the newspaper in which the job advertisement should be run. The Final Rule clarifies that the newspaper must have a ''reasonable distribution.'' Thus, advertisements need not be placed in the New York Times, even if the New York Times is the newspaper of highest circulation in a given area, but also cannot be placed in a local newspaper with such a small distribution that it is unlikely to reach local agricultural workers. The Final Rule also clarifies that the newspaper must be ''appropriate to the occupation and the workers likely to apply for the job opportunity,'' but deletes the modifier requiring that the newspaper must be the ''most'' appropriate. This change was made out of a recognition that in many areas there are multiple newspapers with a reasonable distribution and that are likely to reach U.S. workers interested in applying for agricultural job opportunities, and that as long as these criteria are met, an employer's positive recruitment should not be invalidated. If an employer is uncertain whether a particular newspaper satisfies these criteria, it can seek guidance from the local SWA or the NPC.

The Final Rule also instructs employers not to place the required newspaper advertisements until after the job order has been accepted by the SWA for intrastate/interstate clearance; this replaces the time frame contained in the NPRM and shifts the initiation of recruitment back to the submission to and clearance by the SWA of the job order. This ensures that advertisements reflect the job requirements and conditions accepted by the SWA and minimizes the risk that employers' advertisements will later be determined to be invalid by the NPC.

One commenter suggested that a better alternative to employer-placed advertisements would be for the Department to maintain an up-to-date database listing advertisements for farming and ranching jobs and directing interested workers to contact the SWA in the States where the jobs were located. The commenter believed this approach would expand the ability of U.S. workers to select more varied jobs in a larger geographic area. The Department does not disagree; however, as noted above, amending the current job order clearance process is not an option at this time.

A private citizen commented that the SWA, not the employer, is in the best position to know which newspaper is most likely to reach U.S. workers, and that the SWA should, therefore, continue to have a role in determining where advertising is conducted. Nothing, of course, prevents an employer from consulting with the SWA regarding the most appropriate publication in which to place advertising and thus ensure compliance with the regulations, particularly in instances in which a professional, trade or ethnic publication is more appropriate than a newspaper of general circulation. In fact, a representative of a State government agency suggested the advertising requirements should be limited to local area media and trade publications where available, and that the specific publications should be agreed to by the employer and the SWA based on the potential for attracting candidates and historical experience. While we are not incorporating this suggestion for coordination into the regulation as a requirement, we note that the regulation at § 655.102(g)(1) already requires the ads to be placed in the ''newspaper of general circulation serving the area of intended employment that has a reasonable distribution and is appropriate to the occupation and the workers likely to apply for the job opportunity.''

(h) Section 655.102(h) Contact With Former U.S. Workers

The Department proposed that employers be required to contact by mail former U.S. workers as part of the recruitment process. A group of farmworker organizations objected to the requirement and commented: ''if DOL had intended to come up with the least effective way of contacting former employees, it could not have selected a better method than by mail.'' This organization was concerned because they claimed a majority of farm workers are not literate in English or their primary language and, therefore, might not understand the written communication and the regulation does not require the written communication to be in any language other than English. The organization also recommended contact by telephone or through crew leaders or foremen as alternative methods of contact. In response, we have modified this provision in the Final Rule to permit employers to also contact former U.S. workers through alternative effective means, and document those means in some manner (telephone bills or logs, for example).

Additionally, the organization believes many workers would be missed by the proposed mailing effort because the proposed regulation limits the requirement to contacting former

workers ''employed by the employer in the occupation at the place of employment, during the previous year'' and does not require that H–2ALCs contact a growers' former workers who did not work for the H–2ALC during the previous season. The Department declines to adopt a requirement that employers contact workers who did not work for them during the previous season, as such a requirement would be quite impractical, and the other positive recruitment requirement methods included in the Final Rule are intended to reach such workers. It is not at all clear how H–2ALCs would even gain access to the necessary contact information for former employees of other employers, and in the judgment of the Department such a requirement would be excessively burdensome.

One association of growers/producers suggested the proposed rule be modified to allow employers the ability to deny work to employees hired in previous years who demonstrated an unsatisfactory work history/ethic even if the worker was not terminated for cause. A trade association and other commenters expressed concern about former employees who were the subject of no-match letters from the Social Security Administration and requested a safe harbor or common sense exception in such situations.

The Department appreciates that employers that do not participate in the H–2A program generally are not required to rehire employees who have a poor work history. The Department also appreciates that employers frequently may allow short-term workers who prove to be poor performers to finish their job terms if it is easier and, in light of potential litigation risks, less costly than firing them. There is a countervailing concern, however, that if the Department allowed employers to reject former workers who completed their previous job term on the alleged ground that the workers were actually poor performers, it would open the door for bad actor employers to reject former workers on the basis of essentially pretextual excuses. The Department has therefore decided to address employers' concerns about poorly performing workers by creating an exception allowing employers not to contact certain poor performers, but only in the narrow circumstance where the employer provided the departing employee at the end of the employee's last job with a written explanation of the lawful, job-related reasons for which the employer intends not to contact the worker during the next employment season. The employer must retain a copy of the documentation provided to the worker for a period of 3 years, and must make the documentation available to the Department upon request. The Department will review the propriety of the employer's non-contact in such situations on a case-by-case basis. The Department believes that the insertion of this provision is responsive to the comment in that it relieves employers from the burden of being required to rehire truly poorly performing workers, while ensuring that workers who will not be recontacted are aware of the employer's intentions and reasons well in advance of the next employment season and have the opportunity to bring reasons they regard as pretextual to the Department's attention.

With respect to the comment about no-match letters, we note that employers are not required to hire a worker who cannot demonstrate legal eligibility to work. Receipt of a no-match letter may give rise to a duty on the employer's part to inquire about work eligibility, but the letter in and of itself is not sufficient legal justification to refuse to hire a U.S. worker.

One trade association expressed concern about the related requirement for documenting contact with former employees and stated, ''This requirement could reasonably be interpreted to mean that the employer must maintain a copy of its correspondence with each former employee demonstrating that it had been mailed. The only practical way to do this would be to send each letter by certified mail or some other means providing evidence of attempt to deliver. Such a requirement would be unnecessarily burdensome and costly.'' The association recommended this be simplified by requiring the employer to keep a copy of the form of the letter sent and a statement attesting to the date on which it was sent and to whom. Additionally, the association questioned what kind of documentation would demonstrate that the employee ''was non-responsive to the employer's request.'' The association suggested the employer's recruitment report should be sufficient to document which employees were responsive and requiring documentation of non-responsiveness is unreasonable.

The Department does not intend this requirement to be overly burdensome to employers and agrees that copies of form letters together with the employer's attestation that the letters were mailed to a list of former employees would be sufficient to meet the requirements of this provision. The Department also agrees that the recruitment report can be used to sufficiently document the non-responsiveness of former employees. The Department inserted language into the Final Rule clarifying the Department's expectations regarding the type of documentation that should be maintained.

(i) Section 655.102(i) Additional Positive Recruitment

(1) Designation of Traditional or Expected Labor Supply States

In the NPRM, the Department continued to impose on employers the requirement that the employer make ''positive recruitment efforts within a multi-state region of traditional or expected labor supply where the Secretary finds that there are a significant number of qualified U.S. workers who, if recruited, would be willing to make themselves available for work at the time and place needed,'' as mandated by 8 U.S.C. 1188(b)(4). The Department proposed that each year the Secretary would make a determination with respect to each State in which employers sought to hire H–2A workers whether there are other States in which there a significant number of eligible, able and qualified workers who, if recruited, would be willing to make themselves available for work in that State. The Department also proposed to continue the current regulatory provision stating that the Secretary will not designate a State as a State of traditional or expected labor supply if that State had a significant number of local employers recruiting for U.S. workers for the same types of occupations. The Department proposed to publish an annual determination of labor supply States to enable applicable employers to conduct recruitment in those labor supply States prior to filing their application. The Department received several comments on this provision.

A group of farmworker advocacy organizations opined that the Department's proposal contravenes the H–2A statutory requirements regarding positive recruitment. The organization believes the Department's proposal will result in employers not competing with one another for migrant workers and workers not receiving job information even though a particular job in another State may offer a longer season, a higher wage, or better work environment. Another farmworker advocacy organization commented that it makes no sense in a market economy which recognizes competition as good to stop requiring employers to recruit for farmworkers in areas where other employers are seeking farmworkers. A labor organization commented that this

provision demonstrates a lack of understanding of farmworker recruitment and what it believes is an inappropriate desire to ease the recruitment obligations for growers at the expense of U.S. farmworkers. This organization recommended the current positive recruitment rules should be retained and enforced. A U.S. Senator was concerned that the NPRM would cost American workers jobs because they would not have access to information about jobs in other areas.

Employers seeking farmworkers are statutorily required to recruit out-of-State if the Secretary has determined that other States contain a significant number of workers who, if recruited, would be willing to pick up and move in order to perform the work advertised in accordance with all of its specifications. The commenters referenced above appear to believe that the Department's proposal is a new regulatory provision. That is incorrect. The current regulations at 20 CFR 655.105(a), which have been in place for 20 years, specify that Administrator, OFLC should ''attempt to avoid requiring employers to futilely recruit in areas where there are a significant number of local employers recruiting for U.S. workers for the same types of occupations.'' This longstanding provision reflects two judgments on the part of the Department. First, it reflects the Department's reading that 8 U.S.C. 1188(b)(4) was intended to require out-of-State advertising only in areas with a surplus labor supply, and was not intended to deleteriously impact farmers in certain areas by instituting federal program requirements that would draw away their local workers. Second, it reflects the Department's judgment that where a ''significant'' number of local employers are already recruiting U.S. workers in a given area for the same types of occupations, there is already significant competition for workers in that area and the addition of further out-of-State advertising would likely be futile. The Department's program experience in applying this limitation over a long period of time leads it to believe that it has worked well in practice to aid program administration and avoid the imposition of unnecessary program expense. The Department notes that this limitation does not mean that out-of-state recruitment will cease in States where workers are being locally recruited, since SWAs will continue to have discretion to post job orders in those States where appropriate.

Several commenters sought more information on the methodology that would be used in making the determinations about labor supply States. A group of farmworker/community advocacy organizations voiced its concern that ''The annual survey is flawed in many respects and not designed to identify sources of labor at the time of need.'' The organization was also concerned about the timing and specificity of the survey to be used. A representative of a State Workforce Agency requested additional information about the designation of labor supply States for the logging industry in her State. A trade association commented that ''the same types of occupations'' should mean something more than merely agricultural work. An individual commenter believed that just because an employer in a State may request H–2A workers for a certain crop activity for a certain time period should not mean that State should not be considered a labor supply State for other crop activities and time periods.

The Department has addressed many of these concerns by modifying the provision to allow for notice to be published in the **Federal Register** at least 120 days before the announcement of the annual determination, allowing anyone to provide the Department with information they believe will assist the Secretary in making her determination about labor supply states. The Department will consider all timely submissions made in response to this notice. In addition to the information presented by the public, the Department expects that it will continue to consult SWAs, farmworker organizations, agricultural employers and employer associations, and other appropriate interested entities. As discussed above, the ''same types of occupations'' language in the Final Rule has been carried over from the current regulations, and the Department intends to apply the term in the same manner that it has in the past. The Department agrees that the phrase is not intended to lump all agricultural work together as the ''same type of occupation.''

(2) Required Out-of-State Advertising

The Department proposed that each employer would be required to engage in positive recruitment efforts in any State designated as a labor supply State for the State in which the employer's work would be performed. This recruitment obligation would consist of one newspaper advertisement in each designated State.

Several commenters felt the newspaper advertisement requirements were too burdensome on employers and that the additional time and expense of recruiting in traditional or expected labor supply States should be borne by the Department rather than the employer. An association of growers/producers recommended that the regulation only require SWAs to send the job orders to those States designated as labor supply States as they do now. A United States Senator recommended that after the employer has satisfied the intrastate recruitment requirements and has attested that insufficient domestic workers are available, the burden of proof that U.S. workers are unavailable should shift to the Department.

The Department does not consider a requirement to place a single out-of-state advertisement in each designated labor supply state to be unjustifiably onerous on employers and is of the opinion at this time that the potential benefit to be gained in locating eligible and available U.S. workers outweighs the costs of the advertising. This is required in the current program and the Department has received little negative feedback on the burden of such advertising. The Department does not agree that this is an expense the Department should bear, beyond the expense of the interstate agricultural clearance system that the Department already finances. The INA at sec. 218(b)(4) is clear that it is an employer who must engage in such out-of-state positive recruitment, not the Department.

Several associations of growers/producers commented that placing newspaper advertisements should be limited to no more than three States, to avoid the possibility that the Department could require recruitment in 50 States and the additional territories because the language in the companion recruitment provision for SWAs at § 655.102(f) reads ''no fewer than 3 States.'' A United States Senator also endorsed a limit on the number of States in which an employer is required to recruit and suggested the Department should provide a means of indemnifying employers from liability associated with mandatory out-of-State advertising.

The Department anticipates the number of States to be so designated will be no more than three for any one State, but that the number of States designated will vary by State. In some cases, no State or only one or two States may meet the relevant criteria. In response to these comments, the Department has added to the Final Rule language specifying that ''[a]n employer will not be required to conduct positive recruitment in more than three States designated in accordance with paragraph (i)(1) for each area of intended employment listed on the employer's application.'' This is

generally consistent with past practice concerning required out-of-State recruitment, as employers have only very rarely been required to conduct advertising in more than three States of traditional or expected labor supply. Providing this modest cap will provide employers with needed certainty regarding expected advertising costs.

A farmworker advocacy organization believed the requirement should be for three advertisements, not one, in each designated State and also recommended that the Department require that the language predominant among agricultural workers in the region be used. A representative of a State government agency commented that the proposed regulations were not clear as to how an employer's ad in another State would be handled. The individual commented that the advertising instructions indicate interested applicants should contact the SWA, but asserted that this procedure would not work well for an ad placed out of State and recommended the ads placed out of State should advise applicants to contact the employer directly. Another commenter recommended the newspaper ads in other States should direct all applicants to the SWA and the SWA should then refer them to the employer's SWA. An association of growers/producers recommended the required newspaper advertisements should contain only the job specifications and the SWA contact information.

The Department agrees that more clarity on the mechanics of out-of-state recruitment is appropriate. The Department has added language to the regulation to clarify that one advertisement is to be placed in each State identified for the area of intended employment as a traditional or expected labor supply State. The Department declines to require more than one ad in each State, which would be a significant departure from the advertising requirements under the current regulations and would add additional program expense. In response to comments, and out of recognition that employers often will not be well-versed in the characteristics of out-of-State newspapers, the Department has included language in the Final Rule specifying that its annual **Federal Register** notice will not only announce the designation of labor supply States, but will also specify the acceptable newspapers in the designated States that employers may utilize for their required out-of-State advertisements. In no case will an employer be required to place an ad in more than one newspaper in a labor supply State. In response to comments, the Final Rule has also been modified to specify that ads should refer interested employees to the SWA nearest the area in which the advertisement was placed. The SWA will then refer eligible individuals to the SWA of the employer's State. The Department believes these procedures will provide a workable advertisement-and-referral system to provide farmworkers information about available jobs and to supply needed labor to prospective users of the H–2A program.

(j) Section 655.102(j) Referrals of Verified Eligible U.S. Workers

The Department proposed to require SWAs to ''refer for employment only those individuals whom they have verified through the completion of a Form I–9 are eligible U.S. workers.'' These provisions are consistent with the Department's statutory mandate. Although the INA prohibits the referral of workers where it is known that they are unauthorized to work in the United States, this rule clarifies and spells out the Department's expectations. Based upon comments received and the Department's experience with this requirement, which has been in effect administratively since the issuance of TEGL 11–07, Change 1 on November 14, 2007, and with respect to which ETA has provided recent training webinars for SWAs, the Department believes that SWAs should be required to verify the identity and employment authorization of referred workers by completing USCIS Form I–9 in accordance with DHS regulations at 8 CFR 274a.2 and 274a.6. The NPRM, ETA's written guidance, and an opinion by the Solicitor of Labor, all of which have been shared with SWAs over the past year, explain both the rationale for the SWA verification requirement.

Comments on this subject were received from a national association representing state agencies, 12 individual SWAs, several civil rights and labor advocacy organizations, members of Congress, and numerous employer groups and individual employers. Commenters supporting the proposal generally cited the longstanding need for a reliable employment service system that is based on affirmative verification and refers only workers who are authorized to work in the U.S. Commenters opposing the proposal raised a variety of legal, programmatic, resource-related, and policy-based concerns.

Many commenters considered the employment verification requirement to be a change in policy after decades of contrary Departmental interpretation. Another argued that the requirement runs afoul of the Department's FY08 Appropriations Act, Public Law 110–161, Division G, Title I, Section 110, in which Congress prohibited ETA from finalizing or implementing any rule under the Wagner-Peyser or Trade Assistance Acts until each is reauthorized.

The Department has always required that SWAs fulfill the requirements of the INA to refer only eligible workers by verifying their employment authorization. Recent instructions by the Department (including TEGL 11–07, Change 1) have clarified the way that employment verification is required to be accomplished. To the extent that these requirements were thought by some to represent a shift in Departmental policy, they are now being clearly stated in the Department's regulations. The Department has not reviewed the H–2A regulations comprehensively since the current program's inception in 1986. After a top-to-bottom review of the program requested by the President in August 2007, the Department is revising and modifying a number of established practices based on program experience, years of feedback from stakeholders, and changing economic conditions.

As discussed in the NPRM our clarification of SWAs' obligation to affirmatively verify employment eligibility is in direct response to longstanding concerns about the reliability of SWA referrals. The referral of workers not authorized to work undermines the integrity of the H–2A program, can harm U.S. workers, and can disrupt business operations.

Many commenters argued that the requirement is inconsistent with INA provisions at 8 U.S.C. 1324a, and DHS regulations at 8 CFR 274a.6, which permit but do not require SWAs to verify employment eligibility for individuals they refer. The USCIS regulations expressly permit SWAs to verify the identity and employment authorization of workers before making referrals, and certainly do not prohibit such verification. *See* 8 CFR 274a.6. The Acting General Counsel of DHS has issued an interpretive letter stating that while the USCIS regulations do not require SWAs to verify the eligibility of workers before referring them, those regulations do not prevent other agencies with independent authority from imposing such a requirement. *See* November 6, 2007 letter from Gus P. Coldebella, DHS Acting General Counsel, to Gregory F. Jacob, Senior Advisor to the Secretary of Labor. The Department is now exercising its independent statutory authority under

the INA to require through regulation that SWAs verify employment eligibility of referrals. Further, to ensure that the regulated community has appropriate notice of the specific requirement, and to ensure a standard process for verification remains in place consistent with the procedures already approved by Congress, we have clarified in the regulatory text that states must at a minimum use the I–9 process for purposes of verification. The Department also strongly suggests (but does not require), as it did in the NPRM, that States utilize the DHS-administered E-Verify system. State agencies with procedures that do not comply with the minimum requirements of the Form I–9, however, such as verification through scanned documents transmitted over the Internet, must revise their processes to ensure that agricultural referrals are made only as a result of in-person verification.

The INA requires that employers execute a Form I–9 for all new employees. Some commenters interpreted the NPRM to shift this employer responsibility to SWAs. A subset of these commenters raised concern that removing responsibility for verification from agricultural employers alone would be unfair to other, non-agricultural employers who would still be required to complete the Form I–9 form.
