## Charge Questions

### **AEATF Liquid Pour Completed Study (AEA05)**

**Study Title: “A Study for Measurement of Potential Dermal and Inhalation Exposure during Manual Pouring of a Liquid Containing an Antimicrobial”**

1. Was the research reported in the Antimicrobial Exposure Assessment Task Force II (AEATF) completed liquid pour study report (AEA05) faithful to the design and objectives of the protocol and governing documents of AEATF?
2. Has EPA adequately characterized, from a scientific perspective, the limitations on these data that should be considered when using the data in estimating the exposure of people who pour liquid antimicrobial pesticide products?
3. Does available information support a determination that the study was conducted in substantial compliance with subparts K and L of 40 CFR Part 26?
