

US EPA ARCHIVE DOCUMENT

STATE OF GEORGIA  
OFFICE OF THE GOVERNOR  
ATLANTA 30334-0900

Roy E. Barnes  
GOVERNOR

June 30, 2000

Mr. John Hankinson  
Regional Administrator  
U.S. EPA Region IV  
The Sam Nunn Federal Center  
61 Forsyth Street, SW  
Atlanta, GA 30303-8960

Dear Mr. Hankinson:

The United States Environmental Protection Agency (EPA) has promulgated a new 8-hour ozone National Ambient Air Quality Standard and has advised states that it is obligated by the Clean Air Act and the Transportation Equity Act for the 21<sup>st</sup> Century to designate areas throughout the country as attainment/unclassifiable or nonattainment for the standard. Section 107(d)(1) of the Clean Air Act provides each State Governor an opportunity to recommend designations including appropriate boundaries to EPA. EPA's memorandum dated March 28, 2000, "Boundary Guidance on Air Quality Designations for the 8-Hour Ozone National Ambient Air Quality Standards," requested that all State Governors submit their designation recommendations and supporting documentation to EPA by June 30, 2000.

The attached table provides my recommendations for the designation status for each county in Georgia. This includes 21 counties in metropolitan Atlanta and three counties outside metropolitan Atlanta.

I am making these recommendations based on the 8-hour ozone standard as revised July 1997 and EPA's most recent guidance. However, these recommendations may be revised, based on more recent ozone monitoring during 2000 or other pertinent information which could become available.

Mr. John Hankinson  
Page 2  
June 30, 2000

An important factor in my recommendation is the EPA and Georgia Tech ozone modeling. This indicates that Muscogee, Bibb and Richmond Counties may attain the 8-hour ozone standard after implementation of the regional nitrogen oxide emission reductions and stricter national fuel and vehicle standards, with no additional local control measures required. In light of this modeling, and given the impact a nonattainment designation will have on any county, I am recommending only those counties outside of metropolitan Atlanta which have ozone monitors showing violations of the standard be designated nonattainment. If we find in the future that this modeling is incorrect, we will re-analyze what is needed to attain the standard.

I also encourage EPA to wait to finalize any designations until the U.S. Supreme Court acts on the May 1999 D.C. Circuit Court of Appeals ruling regarding the revised standard. I understand EPA's desire to move forward with implementation to ensure public health protection, but business and government need enough time and certainty to plan for the implementation of this standard.

While I encourage EPA to wait on designations until these legal issues are resolved, the State of Georgia will still be preparing for these standards by increasing monitoring, preparing emission inventories, working with local governments on transportation planning issues, and advising the general public regarding air quality in their areas. These actions will help ensure positive air quality planning in our State, regardless of the eventual court action and effect on the ozone standard.

Please contact Mr. Harold Reheis, Director of the Georgia Environmental Protection Division, at 404/656-4713 should you have any questions regarding this matter.

Sincerely,

A handwritten signature in cursive script that reads "Roy E. Barnes".

Roy E. Barnes
