December 12, 2003

Mr. Raymond Werner
Chief, Air Programs Branch
EPA Region 2
290 Broadway
New York, NY 10007-1866

Dear Mr. Werner:

As per Regional Administrator Jane Kenny's letter dated December 3, 2003 to Commissioner Crotty, I am submitting the following ozone monitoring data summary tables for 2001-2003. The data provided has been quality assured and should be considered validated by the New York State Department of Environmental Conservation except where noted. Please note that the "expected exceedances" for the one hour ozone data is taken directly from AIRS and simply reproduced here. Whereas the Department does not question this data, it is noted that this value is calculated by EPA. The inputs used to calculate this value, however, are those reported by the Department of Environmental Conservation (DEC).

In addition, the data reported for Holtsville, Suffolk County is from a network that is neither a SLAMS nor a NAMS site and is not operated by the DEC. Therefore, whereas I am not questioning the data from the Holtsville site, I am not in a position to validate the data reported at this location. For this reason, we are not affirming a design value for this site, and we caution you not to use the data for either ozone designations or associated classifications. We do not plan to incorporate it in our Ozone SIP development for this reason. We also want to point out that since the second site in Queens (Site # 36-081-0124) became operational in July, 2001, there is insufficient data to develop a design value for this location.

Should you need additional information, please feel free to contact me.

Sincerely,

Patrick Lavin, P.E.
Director
Bureau of Air Quality Surveillance
