MEMORANDUM

OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

SUBJECT: Meeting With Roussel Uclaf on Data Call-In Testing on Allethrins

Tox. Chem. No. 25

TO: Arturo Castillo, PM Team # 17
Registration Division (TS-767c)

FROM: Pamela Hurley, Toxicologist
Toxicology Branch
Hazard Evaluation Division (TS-769c)

THRU: Edwin R. Budd, Section Head
Toxicology Branch
Hazard Evaluation Division (TS-769c)

Pamela M. Hurley
E. R. Budd
7/10/86

On Thursday, July 3, Pamela Hurley and Quang Bui attended a meeting with members of the Registration Division and Roussel Uclaf to discuss questions concerning protocols that Roussel will use in testing allethrin under the amended data call-in notice of February 21, 1985. Roussel will be conducting chronic, oncogenicity and reproductive studies. Roussel's major concerns about the studies centered on the use of satellite dosage groups (for interim sacrifices) above the MTD in the combined chronic/oncogenicity studies, the type of diet to be used (pellet or powder), how often the chemical analysis of the diet should be conducted and the type of format EPA prefers for the final report.
