MEMORANDUM

Subject: EPA Reg. # 55146-AU; Champ Plus Flowable Copper Hydroxide

TO: Cynthia Giles-Parker PM # 22. Attn.: James Stone
Herbicide-Fungicide Branch
Registration Division (7505C)

FROM: David L. Ritter, Toxicologist *DLR 12-1-93*
Precautionary Review Section
Registration Support Branch
Registration Division (7505W)

THRU:: Thomas C. Ellwanger, Jr., Section Head
Precautionary Review Section
Registration Support Branch
Registration Division (7505W)

*Mary Walker
for T.E.
12/28/93*

Registrant: Agtrol Chemical Products
7322 Southwest Freeway Suite 4000
Houston TX 77074

FORMULATION FROM LABEL:

<u>Active Ingredient(s):</u>	<u>% by Wt.</u>
Copper Hydroxide	37.5%
<u>Inert Ingredient(s):</u>	<u>62.5%</u>
Total	100.0%

Action Requested:

Expedite review of information from a dermal contact hypersensitivity study previously submitted (MRID # 428718-06) in support of this registration action. The study lacked positive control data. See my memorandum of 10/28/93.

The present submission includes the requisite information.

PRS Response:

The study references positive historical controls, but no detailed analytical data were submitted. The present submission likewise contains no such data. However, we reviewed our records of other sensitization studies performed at this laboratory (Stillmeadow, Inc.) and found that adequate positive control data are on file

Recycled/Recyclable
Printed with Soy/Canola Ink on paper that
contains at least 50% recycled fiber

there. These data demonstrate that the assay as performed will detect dermal sensitizing agents.

PRS Recommendation:

The study is upgraded to CORE Guideline. The product is not a dermal sensitizing agent.

PRS data requirements for precautionary labeling are satisfied.

Precautionary Label Review:

Precautionary Statement:

Acceptable, except add a final sentence, "Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse."

Statement of Practical Treatment:

Acceptable.

*Not needed.
