Reg./File # 239-2505

Chemical Name: Diquat Dibromide

Type Product: Herbicide

Company Name: Chevron Chemical Company

Purpose: Responses to registration standard: Glove permeability, spray drift and questions on the soil dissipation study sampling scheme.

Date Received: 3/12/87 9/16/87

Action Code: 660

Date Completed: 12/14/87

EAB # (s): 700150, 70320, 70957,

Monitoring Study Requested:

Total Reviewing Time: 2.0 days

7. CONCLUSIONS:

- A. This review contains several data submissions sent to the exposure assessment Branch for review. Because reviews from several sections and disciplines were combined on the Registration Review Data Record forms, this 12 point summary form combines these study reviews and a recent submission regarding a soil dissipation study to aid in final tracking of these submissions. Individual 12 point summary sheets accompany the spray drift and glove permeability studies. Conclusions for these are found in the individual reviews.
- B. EAB concurs with the registrant's request to limit the soil sampling depths in the soil dissipation studies with diquat as noted in the appended letter. This concurrence was conveyed from Dr. Holst to Mr. J. C. White on August 8, 1987.
- C. Reentry questions should be resubmitted to EAB as a separate review. Similarly, future data on spray drift and protective clothing should be separated from environmental fate data as the reviewers for these items are in separate sections of EAB.

8. RECOMMENDATIONS:

- A. The individual recommendations for the spray drift data and the glove permeability are noted in the individual reviews.
- B. EAB recommends that the registrant proceed with sampling as proposed in the appended letter.
- C. EAB recommends that future reviews for the various sections of the branch be forwarded as such. This will aid in tracking and determining whether all reviews are forwarded to appropriate reviewers.
- D. Reentry data included in this package should be submitted to EAB as a separate review item.

9. BACKGROUND:

- A. The data reviewed and the soil sampling scheme for the soil dissipation study discussed in these reviews is in response to the registration standard for diquat.
