Pyramin W - BASF

Reg 7969-7

Tank mixtures on sugar beets

Pyramin W + Betoval - ⁰⁶⁹⁶⁰¹ ⁰⁹⁸⁷⁰¹

TANK mix not required

Pyramin W + Endothal - ⁰⁶⁹⁶⁰¹ ⁰³⁸⁹⁰¹

TANK mix required

if post emerge application is sought.

Comment to registrant of 2/27/73 Jwa

Of the recommended times of application for the tank mixture of Pyramin W as herbicide 283 is to include the postemerge application, bird toxicity data for the tank mixture will be necessary. This would require the LD₅₀ determination for mallard duck or the upland species, bobwhite quail or ring-necked pheasant.

Uses of the tank mixture Pyramin W + Betoval - the preemerge Pyramin W + Endothal on sugar beets will not require bird data on the tank mixtures.
