Please find below the OREB review of

HED Project #: 1-1209

RD or SRRD Record #: 164134

Caswell #: 508

Date Received: 5/9/91 Review Time: 1 day

Date Returned: 7/25/91

- Deferral to: Biological Analysis Branch/BEAD
- Science Analysis & Coordination Branch
- TB - Insecticide/Rodenticide Support Section
- TB - Herbicide/Fungicide/Antimicrobial Support Section

OREB has been requested to comment on a proposed label change for BAYGON Technical (EPA Reg. No. 3125-174) submitted by Mobay Corporation. The registrant wishes to include a protective glove statement in the Precautionary Statements of the label for this product. The proposed statement is "Wear natural rubber gloves, protective clothing, and goggles." OREB has no data addressing the permeability of natural rubber gloves to this material and requires that the statement be amended to read "chemical resistant gloves" rather than specifying natural rubber as the glove material. If the specification for natural rubber is to be included on this label, glove permeability data should be submitted to support the proposed statement.
