US EPA ARCHIVE DOCUMENT

BACKGROUND: In the 8 month response to the Carbaryl RED, the registrant cited acute toxicity studies to support the reregistration of EPA Reg. No. 432-1210. The MRID's are as follows: 419191-01 (81-1), 466856-16 (81-2), 466856-19 (81-5), 466856-20 (81-6). Two (81-2, & 81-5) of studies were conducted by SafePharm Labs. The acute oral study (81-1) was conducted by Stillmeadow, Inc. The skin sensitization study (81-6) was conducted by CIT. The test material used in each of the studies was EPA Reg. No. 264-333. In response to a rebatching request PRB/SRRD on 10/18/05 determined that the subject product could cite these four studies conducted with EPA Reg. No. 264-333.

On 10/18/05, the Agency determined that an acute inhalation study (81-3) and a primary eye irritation study (81-4) must be conducted on EPA Reg. No. 432-1210 due to the inerts.

The registrant has now submitted an acute inhalation study (MRID# 467617-01) and a primary eye irritation study (MRID# 467620-01). Both studies were conducted by Product Safety Labs and the test material used in each was the subject product

RECOMMENDATIONS:

- The two studies (81-3 & 81-4) submitted are acceptable to support the reregistration of EPA Reg. No. 432-1210.

The acute toxicity profile for EPA Reg. No. 432-1210 is currently:

Acute Oral	III	Acceptable
Acute Dermal	III	Acceptable
Acute Inhalation	IV	Acceptable
Primary Eye	IV	Acceptable
Primary Dermal	IV	Acceptable
Skin Sensitization	non sensitizer	Unacceptable

NOTE: The acute toxicity study requirements have been satisfied for the subject product.

Chamber Environment	Dose Level
	2.06 mg/L
Chamber Volume	6.7 L
Airflow	31.7 Lpm
Temperature (°C)	20 - 22
Relative Humidity (%)	42 - 47

**Clinical Observations:** All appeared to be active and healthy throughout study

**Gross Necropsy Findings:** No observable abnormalities noted

**DATA REVIEW FOR PRIMARY EYE IRRITATION TESTING (§81-4, 870.2400)**

Note to CRM/PM/Registrant:

The proposed label should contain a Note to Physician which addresses the presence of a

cholinesterase inhibitor. The following statements are some suggested types of information that could be included, if applicable, in the Note to Physicians:

- technical information on symptomatology;
- use of supportive treatments to maintain life functions;
- medicine that will counteract the specific physiological effects of the pesticide;
- company telephone number to specific medical personnel who can provide specialized medical advice.
