Subject: Pesticide Petition Number 270653 requesting tolerances for O,O-Diethyl S-[4-oxo-1,2,3-benzotriazin-3(4H)-ylmethyl] phosphorodithioate (Ethyl Cation) submitted by Chemagro Corporation, and filed October 13, 1967.

We have examined the residue data, analytical methods, and other information in this petition for tolerances for O,O-Diethyl S-[4-oxo-1,2,3-benzotriazin-3(4H)-ylmethyl] phosphorodithioate (Ethyl Cation) of 0.1 part per million (ppm) in or on cottonseed and potatoes, and 0.01 ppm in or on soybeans. As required by Public Law 918, 83rd Congress, we herein offer an opinion as to whether the proposed tolerances reasonably reflect the amounts of residues likely to result when this pesticide chemical is used as proposed.

It is the opinion of this Department that the proposed tolerances reasonably reflect the amounts of residues likely to result.

cc: D. W. Dean
